

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

EDINBURGH :
FULLARTON AND MACNAB, PRINTERS, LEITH WALE.

PREFACE.

THE 'GAZETTEER OF THE WORLD,' or 'DICTIONARY OF GEOGRAPHICAL KNOWLEDGE,' which the publishers have now the satisfaction of presenting to the numerous body of Subscribers who have honoured it with their patronage, has been prepared on the most approved and comprehensive plan, and under considerably higher advantages than any previous works of its class; and aims to supersede them all, as a book of reference, by the accuracy of its information, the extent of its range, and the care bestowed on its execution.

The publishers, Messrs. A. FULLARTON & Co., have contemplated the work, now completed, for many years, and have bestowed great care, cost, and labour in conducting it through the press. They now place it before the public with a confident persuasion that it will be found, on examination, to be **MORE COMPREHENSIVE, MORE ACCURATE, and MORE GENERALLY ADAPTED TO USEFULNESS** than any existing work of the class.

Its **COMPREHENSIVENESS** is attained by the amplitude of its plan, embracing a vast amount of important matter, combining abstract with practical, and solid with pleasing, information, not usually comprised in works of the class, and derived from a great variety of sources,—by the studied compression of its matter,—by the use of easily understood abbreviations,—and by extreme compactness in the style of printing. Its articles amount to nearly **ONE HUNDRED THOUSAND**,—some necessarily restricted to a few lines, others, such as those on the principal states and territories, complete and comprehensive geographical treatises not unfitted for separate publication,—but each nearly proportioned to its real importance. It may also be noted, that while it will be found to embrace all that information which has long been regarded as the common property of all geographers, a large proportion of the articles contained in the present publication have never before appeared in any existing Gazetteer, having been drawn from the researches of recent travellers, and other still original authorities; and comprising the substance of whatever is most interesting and authentic in the enlarged geographical science of the day.

Its **ACCURACY** has been secured by extensive collation of the best authorities in the principal European languages,—by consulting only such maps and charts as enjoy the confidence of scientific men,—and by diligently examining all recent, statistical, official documents, published in the several states of Europe, and throughout the world, and endeavouring to embody, and, in many instances, tabulate their most interesting and important results.

ITS USEFULNESS, the publishers conceive, is, (in its best elements at least,) insured by its fulness of arrangement and facility of reference, in combination with comprehensiveness and accuracy; and as a work specially designed for the use of the British public, by giving peculiar prominence to the possessions and colonies of Great Britain, and those regions to which British enterprise is chiefly directed, and the manner and means by which our commerce is conducted with them. And as their aim has been to insure the reception of the work in every region of the globe in which the language of Shakspeare and Milton is spoken, they have bestowed more than ordinary care in consulting the most recent and authentic sources on the United States of America, and the rising colonies of Australia.

Besides the above general features of value, it may be desirable to mention rather more in detail a few points on which the *GAZETTEER OF THE WORLD* claims the notice and the support of the public. Its distinguishing features are as follow:—

1. **PHYSICAL GEOGRAPHY.** Under this head, besides the usual acceptation of the word, is included the geology, botany, zoology, and climate of each country or region.

2. **POLITICAL AND STATISTICAL GEOGRAPHY** has received that attention to which, in the present age, it is so justly entitled, from its value to the manufacturer and merchant; but it has not been permitted to exclude Physical Geography, as is too often the case; while something of the past history and antiquities of different countries and localities has been given where it appeared desirable to do so.

3. The **POSITIONS** of places, comprising the three elements of latitude, longitude, and altitude, have been given for several thousand points of importance, with, in many instances, the authority on which they rest, and the degree of dependence to be placed on them. No one who has not critically examined the common Gazetteers, can form a notion of their extreme imperfection under this head. With respect to positions, the admirable tables of *Positions Géographiques* by M. DAUSSY in the *Connaissance des Temps*, and those of Lieut. RAPER, R. N., in the recently published third edition of his *Treatise of Navigation*, have been consulted, and every reasonable effort has been made to approximate positions.

4. **HYDROGRAPHY.** As the desire of the publishers is to render their work, in some respects, a nautical as well as a general Gazetteer, they have spared no pains to give such a description of ports and harbours as shall render their work of practical utility to the commander of a ship. They do not pretend to give sailing directions in detail, but they have given details as to position, depth of water, rise of tide, nature of supplies, &c., which will be found useful even to the navigator.

5. **ORTHOGRAPHY.** If existing Gazetteers are imperfect as to position of places, they are absolute confusion as to orthography. On turning to any Oriental or African name, it will not unfrequently be found spelt, in the same article, according to three different modes of orthoepey, as the compilers have indiscriminately, and apparently unconsciously,

copied German, French, and English spelling. In the present work an effort has been made to reduce the orthography of Oriental, African, and unwritten languages, to a uniform system, adopting that sanctioned by the Geographical and Asiatic Societies of London, and now generally prevailing among the best European writers. It may also be stated here, that the signification of the names of places, the different modes of spelling them, and, in many cases, their pronunciation, have been given.

6. ETHNOGRAPHY. Bearing in mind that the "earth was made for man," and that mankind are of more importance than the physical condition and distribution of the earth's surface on which they live, the subject of Ethnography, and the history of man as a social being, has, in this work, received position and prominence. The origin and migration of nations, the division of the human family, though 'of one blood,' into distinct and physically distinguished races, and the affinity of languages and dialects, are subjects that have recently had much light thrown on them by the invaluable labours of HUMBOLDT, DUPONCEAU, MORTON, PRICHARD, PICKERING, and others; and a store of materials has by their labours been accumulated, which the Publishers have sought to incorporate in the present work.

The GAZETTEER OF THE WORLD has been illustrated occasionally by plans of harbours and diagrams in explanation of the text and to assist the reader in comprehending the relative positions of different localities, also by a series of MAPS and ENGRAVINGS. The MAPS, which in numerous instances exhibit details not to be met with in ordinary maps or atlases, with rare exceptions have been prepared expressly for this work. The ENGRAVINGS consist of views of cities, localities, or natural objects throughout the world, important either in themselves, or by their historical or other associations, by W. Finden, E. Finden, J. Talfourd Smyth, W. Forrest, W. B. Scott, &c. &c.; after drawings by Turner, Harding, Prout, Stanfield, Roberts, Brockedon, Calcott, and other distinguished artists of the present day. The typographical execution of the work will speak for itself. No expense has been spared, in any department of the present work, that would either enhance its beauty, increase its comprehensiveness and accuracy, or add to the convenience and satisfaction of the reader.

In conclusion, the title of GAZETTEER OF THE WORLD has not been assumed without a due consideration of the requirements which such a title imposes upon the Editor and Publishers of the work. They feel, however, assured that the extent and value of that geographical information which has been condensed and arranged in the present work, and the exertions they have made to accomplish the professions with which they embarked in this extensive publication, warrant their being sanguine of success; and they confidently, though respectfully, submit their GAZETTEER OF THE WORLD as deserving its title, and as not unworthy of the patronage of the PUBLIC. It has been their aim to bring together from all sources the best existing geographical knowledge; and to make it a complete repertory of geographical knowledge, and of whatever has given detail and precision to the science. Geography is eminently and necessarily a progressive science, and as each day that passes brings a fresh accession of geographical and statistical knowledge, arising from the labours

of our missionaries, from the explorations of our travellers and colonists, from the extension of our commercial relations, from the government-surveys in progress in nearly every country of Europe, and in the United States of America, from the researches and publications of scientific geographers and associations devoted to the promotion of geographical science, and from modifications and changes in the political distribution of territories, the *GAZETTEER OF THE WORLD*, in as far as it may be found to be a faithful and successful attempt to digest and arrange the daily increasing mass of materiel furnished through these several channels, will supply an important want in the present day,—a want specially felt and acknowledged in every department of government, in our public libraries, by all our diplomatists and consuls abroad, by members of Parliament, merchants, and manufacturers at home, and by every student of the most useful and attractive science of geography.

To a work of this kind, a complete *ATLAS* is considered by some an indispensable accompaniment. But as many purchasers are already in possession of a good *Atlas*; no attempt has been made to *incorporate* one with the *Gazetteer*, so as unnecessarily to enhance its price. At the same time, as an *Atlas* of reference, as an adjunct of great convenience for the proper understanding of its letter-press, has been desired by many readers, to accommodate these, the Publishers have issued a *SPECIAL ATLAS*, consisting of a set of the most useful general maps, on a large scale, and presenting several features of originality and utility, which they supply to the purchasers of the *Gazetteer exclusively*, during a limited period.

EDINBURGH. *August* 15, 1856.

GAZETTEER OF THE WORLD,

OR DICTIONARY OF GEOGRAPHICAL KNOWLEDGE.

TA

TA, or **LADY'S ISLAND** (LOUGH), a sea-lough or lagoon in co. Wexford, connected with the ocean by a narrow and brief strait, $1\frac{1}{2}$ m. WNW of Carnsore-point. It penetrates the land nearly 2 m. NNE, with an extreme breadth of about 7 furl.

TAAIF, or **TAYER**, a town of Arabia, 80 m. SE of Mecca, situated in a mountainous but fertile and well-cultivated district, whence Jidda and Mecca are supplied with fruits, particularly almonds.

TAAI, a town on the SE coast of the island of Luzon, in the Philippine group, S of Manila.

TAAPAN, a town on the W coast of Illano bay, in the island of Mindanao.

TAARS, a village on the NW coast of the Danish island of Læsland. Pop. 750.

TAA8, or **TAA88**, a city of Yemen, in Arabia, on the road from Mokha to Sana, and 48 m. ENE of Mokha. It is encompassed with a wall from 16 to 30 ft. thick, flanked with several towers, and composed of bricks dried in the sun, but with a facing of burnt bricks. The garrison consists of about 600 men. It is surrounded by mountains, which are in the possession of independent sheikhs.

TAA8INGE, or **THOR88888**, an island of Denmark, about 8 m. long and 4 m. broad, lying between Funen and Langeland. The soil is tolerably fertile, and the inhabitants, 8,750 in number, are employed in agriculture, navigation, and fishing. The island has a small town of the same name.

TAAWIRRY, an island in the S. Pacific, situated within the reef of the island of Otaheite, and on the E side of the main island.

TAB, a river of Persia, the ancient *Arosis*, which rises in the mountains of Fars, in two head-streams, the *Harharas* and the *Rudkhonisk-Shir*, which unite about 20 m. WNW of Shiraz. It runs SW, dividing Fars from Khuzistan; and falls into the Persian gulf near Indian, after a course of 180 m. At its mouth it is 80 yds. wide, and is navigable for boats of 20 tons up to Indian.

TAB, a village of the Punjab, on the l. bank of the Chenab, in N lat. $32^{\circ} 32'$.

TABA ISLANDS, four small islands in the Eastern seas, near Saint-Anthony's point, on the E coast of Borneo, in N lat. $2^{\circ} 6'$.

TABABELLAH, a town of Hindostan, in the prov. of Malwah, in N lat. $23^{\circ} 16'$.

TABAFRA, a village on the Ivory coast of Africa, 15 m. E of Drevin.

TABAGO, or **TABOGA**, an island in the Pacific, near the coast of Mexico, 18 m. S of Panama about 3 m. long and 2 m. broad. It is mountainous, and

TAB

on the N side declines with a gentle descent to the sea. It produces plantains and bananas. Before it is a good road, about 1 m. from the shore, where ships may ride safely in 16 or 18 fath.

TABAGO. See **TORAGO**.

TABAI, an island of the S. Pacific, in the Society group, in S lat. $23^{\circ} 40'$.

TABAJANA, a village of Wulli, in Western Africa, 12 m. WSW of Medina.

TABAJO, a river of Brazil, in the prov. of São Paulo, a tributary of the Paranapanema.

TABAK, a town of Bessarabia, 80 m. NNW of Ismail.

TABANERA, a village of Spain, in the prov. and 52 m. N of Palencia. Pop. 300.

TABANIEH, a village of Lower Egypt, on the E branch of the Nile, 6 m. SW of Mansurah.

TABARCAH, a small port of Algeria, situated in the midst of extensive woods, at the mouth of the Wad-el-Barba, opposite to a small island, famous for its coral fishery. It was long in possession of the Lomellines, a noble Genoese family, from whom it was taken in 1740.

TABARCA-NUEVA, an island of Spain, in the Mediterranean, off the coast of Valencia. It is almost destitute of trees and water, but is inhabited by the descendants of a colony of Spaniards who were redeemed from slavery in Barbary by the government, and settled here in 1771.

TABARIAH, **TABARIEH**, **TABARIYEH**, or **TIBERIAS**, a town of Syria, in the pash. and 48 m. ESE of Acre, on the W shore of the lake of Tiberias, a little to the S of its centre. It is built in the form of an irregular crescent, and is enclosed toward the land by a thick wall about 20 ft. in height, flanked with circular towers. Some of the houses on its E front are almost washed by the sea. Its S wall approaches almost to the beach; but the NW angle of the northern wall, being on a rising ground, recedes some little distance from the water, and thus gives an irregular form to the enclosure. The whole does not appear to exceed 1 m. in circuit, and cannot contain more than 500 separate dwellings. Its pop. has been estimated at 4,000. On the W it has a small plain fit for cultivation, whence the land rises into lofty hills which almost overhang the town. The interior presents few objects of interest beside the ordinary habitations, which are small and mean. There is a mosque with a dome and minaret, and another with an octangular tower in ruins. There are also two synagogues near the centre of the town, and one

Christian place of worship, called 'the House of Peter,' near the southern quarter, close to the water's edge. This last, which is thought by some to be the oldest place of Christian worship now extant in Palestine, is a vaulted room, 30 ft. by 15 ft., and about 15 ft. in height. T. is one of the four holy cities of the Talmud; the other three being Szaffad, Jerusalem, and Hebron. It is esteemed holy ground, because Jacob is supposed to have resided here, and because it is situated on the lake of Gennesareth, from which, according to the generally received opinion of the Talmud, the Messiah is to rise. The greater part of the Jews who reside in these holy places do not engage in mercantile pursuits; but are a society of religious persons occupied solely with sacred duties. Three or four missionaries are sent out from the four sacred cities every year; one to the coasts of Africa from Damietta to Mogadore, another to the coasts of Europe from Venice to Gibraltar, a third to the Archipelago, Constantinople, and Anatolia; and a fourth through Syria. Those who go abroad as missionaries are allowed 10 per cent. upon all alms collected, besides their travelling expenses. The Jewish devotees pass the whole day in the schools or the synagogue, reciting the Old Testament and the Talmud.

The lake of T., or the sea of Gennesareth, occupies the mountain-basin formed within the sweep of the two great mountain-chains of Syria as they run southward, forming the extreme N part of the singularly depressed tract called El-Ghor. It is in fact an expansion of the river El-Urdun or Jordan, of an irregular oval form, 12 m. in length from N to S, and upwards of 5 m. in its greatest width, near Tabariyeh. It is everywhere surrounded by rocky, bare, brown-coloured mountains.

TABARINSKAIA, a town of Asiatic Russia, in the gov. and 150 m. SW of Tobolsk, on the r. bank of the Tafia.

TABARISTAN, a province of Persia, lying between the parallels of 35° 35' and 36° 15' N; and bounded by Mazanderan on the N; by Khorasan on the E; on the SE by Kohistan; on the S by Irak-Ajemi; and on the W by Ghilan. It is a mountainous region, being intersected by the great Elburz chain, and several of its spurs. Its cap. is Demavend.

TABAS, a city of Khorasan, on the road from Herat to Yezd, 337 m. from the former, and 150 m. from the latter. It is situated amid a range of mountains, and contains a pop. of about 20,000.—Also a village of Anatolia, in Asiatic Turkey, 34 m. S of Dagnislu.

TABASCO, a province of Mexico, bounded on the N by the gulf of Mexico, along which it extends from the river Coazacoalco on the W, to the Lagodoe-Terminos on the E. On the E it has Yucatan; on the S, the provs. of Chiapa and Oaxaca; and on the W, Vera-Cruz. The soil is fertile, and the surface is in general flat, marshy, and filled with small lagoons or lakes. The coast is subject, from September to March, to dreadful storms; the northerly gales prevailing during that period render navigation dangerous and difficult. In February, March, and April, the heat is insupportable; and infinite swarms of mosquitoes and other venomous insects, add to the annoyances of the season. There are, however, numerous good farms, well stocked with cattle, in this prov. The natives reap from three to four harvests of maize in the year, and rear rice, barley, European garden-herbs, fruits, cacao, sugar-cane, and cotton.—The capital of the state is San-Juan-Bautista.

TABASCO, a river of Mexico, which rises on the frontiers of Guatemala, and flowing WNW, and then

N and NNE, intersects Chiapan and the state of Tabasco, and flows into the bottom of the gulf of Mexico, in N lat. 18° 34', W long. 92° 38'. Its bar has from September to March in general 11 ft. water; but vessels are sometimes detained a couple of months inside for want of water. At the W side of the entrance to the river is the Isla-del-Buey or Great Ox island; and $\frac{3}{4}$ m. to the N of it lies the smaller Ox island. About 1 m. above the entrance, on the E bank, is a small fort, and the pilot establishment. Between this fort and the town of Tabasco or La Frontera, is a thickly wooded island about $1\frac{1}{2}$ m. long. The river abreast of the fort and at Frontera, is nearly $\frac{3}{4}$ m. wide, but above the town its breadth greatly diminishes. About 8 m. above the town, the Tabasquillo branches off to the SW; and 3 m. above the mouth of this arm, at Los-Tres-Brazos, the San-Pedro-el-Chiquito, and the Usamasinta, join the T. At 9 leagues above La Frontera, the Chilapa enters the T. on the r. bank; and 4 leagues above the latter point of confluence, the T. is joined by the Chilapilla. The town of Villa-Hermosa-de-San-Juan-Bautista, the cap. of the state of Tabasco, is situated on the W or l. bank of the T., about 24 leagues above La Frontera.

TABASCO (LA FRONTERA DE), a village of the Mexican state of Tabasco, built on the E bank of the Tabasco river, in N lat. 18° 31'. It is a straggling assemblage of bamboo and adobe huts. Its principal inhabitants are the agents of the logwood-cutters. It is the port of San-Juan-Bautista, and is chiefly frequented by vessels from Campeachy, the United States, and the Havannah. Its chief exports are logwood, cocoa, and fustic.

TABASSERAN, a town and small district of Shirvan, in the Russian prov. of Daghestan, 20 m. WSW of Derbend.

TABATINGA, a town of Brazil, in the prov. of Para, 60 m. S of Olivença, on the l. bank of the Amazon, in S lat. 4° 12', at the confluence of the Rio-Jabari.

TABERG, a village of Oneida co., New York. U. S., 110 m. WNW of Albany.

TABERNA, a town of Spain, in the prov. and 18 m. NE of San-Felipe, on the great road leading along the coast in the direction of Catalonia. Pop. 4,500.

TABERNAS-Y-TURRILLAS, a town of Spain, in the prov. and 15 m. NE of Almeria. Pop. 5,500. Coal, lead, iron, and copper are or have been wrought in the vicinity.

TABIO, a settlement of New Granada, in the prov. of Cundinamarca, 15 m. NW of Santa Fé.

TABLADA, a settlement of New Granada, in the prov. of Santa-Marta, on the shore of the river Magdalena, on an island formed by an arm of this river, 90 m. SSE of Mampox.

TABLAS, one of the Philippine islands, due S of Luçon and N of Panay. It is about 30 m. long, by 3 m. in average breadth.

TABLAT, or **SAINT-FIDEN**, a town of the Swiss cant. of St. Gall, 7 m. SW of Rorschach. Pop. 2,500.

TABLE (LA), a river of Savoy, 3 m. NE of La Rochette, on the r. bank of the Jelon. Pop. 1,300.

TABLE-BAY, a bay on the E coast of Labrador, in N lat. 53° 44'.—Also a bay on the W coast of the Cape of Good Hope. See that article.

TABLE-CAPE, a cape on the E coast of New Zealand, in S lat. 39° 7'.—Also a steep rocky point of land on the N coast of Van Diemen's Land, in S lat. 40° 56'.

TABLE-ISLAND, a small flat island of the Eastern seas, in Gaspar's strait.—Also a small island in the S. Pacific, in S lat. 18° 54'.—Also a small island near the coast of Spitzbergen, in N lat. 80°

57'.—Also one of the New Hebrides in the S. Pacific, in S lat. 15° 38'.

TABLE-MOUNTAIN. See **CAPE OF GOOD HOPE.**

TABLE-MOUNTAIN, a mountain of S. Carolina, U. S., near the NW border of the state, 26 m. NW of Greenville, 3,168 ft. higher than the surrounding country, and about 4,000 ft. above the level of the sea. It presents on one side a tremendous precipice of solid rock.—Also a mountain of California, in Sierra co., 151 m. NE of Vallejo, said to exceed 8,000 ft. in alt.

TABLE-MOUNTAIN, one of the central alps of co. Wicklow. Its summit forms part of the watershed between the river-systems of the Slaney and the Oveca; and has an alt. above sea-level of 2,312 ft. But so nearly fused is this cloud-cleaving summit into the great general ridge of the Slaney and Oveca watershed, that the 'gap' which affords a path of communication between Glenmalure and the glen of Imaal, and which is situated about $\frac{1}{2}$ m. S of the summit, has an alt. above sea-level of 2,266 ft.

TABLE-POINT, or **TAPEL-HOECK**, the S extremity of Bali island, in the Eastern seas, and the eastern boundary of the S entrance into Bali straits, in S lat. 3° 50'.

TABLE-RIVER, a river of Louisiana, which runs into the Mississippi, in N lat. 37° 12'.

TABLEY (Nether and Over), two townships of Cheshire, 2 m. WNW of Nether Knutsford. Pop. of former in 1851, 123; of latter, 537.

TABO, or **LITTLE DIEPPE**, a river and port on the Grain coast of Africa, 52 m. NE of Cape Palmas.

TABOÃO, a village of Portugal, in the prov. of Beira, comarca of Samego.

TABOCAS, a river of Brazil, in the prov. of Gováz, which descends from the E flank of the Cordillera Grande, and flowing ENE, joins the Tocantins on the l. bank, after a course of 90 m.

TABOGA. See **TABAGO.**

TABOLEO, a river of Chili, which runs E and NNE, and enters the Biobio.

TABOR, a circle in the SE of Bohemia; bounded on the N by the circle of Czeslau; on the E by Moravia; and on the S and W by the circle of Budweis. Its extent is 1,270 sq. m.; its pop. in 1843, 207,824. Its soil is fertile, and adapted both to tillage and pasture.—Its capital, of the same name, situated on a hill on the river Luschnitz, 88 m. W by N of Brunn, and 49 m. SSE of Prague, is fortified, and naturally strong, but has been frequently taken. It contains 4,000 inhabitants, whose principal occupation is weaving. It was built by Zisca, the Hussite general, and called by the Hussites, *Hradištie-Hory-Tabor*, or 'the Camp of Mount Tabor'; and from it they take the name of Taborites.

TABOR, or **THABOR**, the *Ithabarius* of the ancients, and **JEBEL-TUR** of the Arabs, a mountain of Palestine, situated to the SW of the lake of Tiberias, over which it commands a most extensive prospect. It is of a conical form, and limestone formation; and contains on its summit a plain of great extent, and highly cultivated. Its rounded sides are richly clothed with the *valonia* oak, the myrtle, and wild pistachio. Mr. Spencer, who recently ascended it, thus describes the view from its summit:—"Notwithstanding the desolation of T., compared with its glory once, in other days, we beheld there what man has neither given nor can take away—the glorious view of the surrounding country, which is unsurpassed in all Palestine. I would that I possessed the power of graphic description, that I might tell you of what we saw from the summit of this noble mount; how grandly loomed up in the far distance, to the N, the snow-crowned Jebel-es-

Sheikh, the Hermon of Scripture! How picturesque appeared the hills and mountains to the NE and the E, beyond and on this side the silvery Jordan, which springs out of their very bosom! How lovely seemed that lake, of all others most interesting to the Christian's heart, the lake of Tiberias, a part of which we could plainly see! How noble toward the S, looked the valley of the Jordan, Gilead, Gilboa, the Little Hermon, and the charming vales between! But how surpassingly beautiful, which I cannot find words rightly to express, was the scene in the west, as, at this commanding elevation, some 1,500 ft. above the plain, we looked down upon Esdraelon, in all its glory and magnificent verdure, its extent, its fertility, its loveliness, its surrounding hills, its streams and rivulets, its river, the Kishon, and its many, many points of attractiveness! Believe me, I stood as it were entranced on the steep brow of T., and beheld this scene with emotions too deep for utterance." Colonel Wildenbruch estimates the alt. of the plain at the foot of Mount T., extending towards the lake of Tiberias, at 845 ft. above the level of the Mediterranean; but the American survey makes it only 652 ft.

TABORAO, a river of Brazil, in the prov. of Sante Catharina. Its banks are said to produce the best flax in the prov.

TABRABOUCCHA, a swamp of New South Wales, in the co. of Roxburgh, near the head of Cunningham creek, and 131 m. from Sydney.

TABREK, a mountain of Persia, in the prov. of Irak-Ajemi, and district of Teheran, near Rei. On its side is a castle of the same name.

TABRIZ, or **TENRIZ**, a city of Persia, the cap. of the prov. of Azerbijan, in the centre of which it is situated, in N lat. 46° 8' 30", E long. 38° 3' 59" (*Monteith*). It is the principal commercial depot of Northern Persia. Chardin estimated its pop. in 1686 at 500,000; at present it does not exceed 20,000. It contains about 8,000 brick houses, several good bazaars and mosques, and an extensive *maidan* or square. Its SW extremity is occupied by the ark or citadel. "The towering pile of the ark, being the only building to be seen in the distance above its embosoming forest of fruit-trees, one might readily fancy the place to be a huge orchard stretching along the base of the red and barren mountain-wall which bounds it on the south. The area thus covered by the town itself, and these miles of surrounding gardens," continues a very recent visitor, "is, I am told, nearly equal to that of London. T. being by far the largest and most important city in Persia. The town proper is surrounded by a crumbling brick wall and a fosse, constructed with such utter disregard to any principles of scientific engineering, as to have been, even in their best condition, but a poor protection against any attacking force provided with artillery. At present these fortifications are in many places a mere heap of ruins. Inside, the streets are of the worst description; and, excepting in the bazaars, are in reality little more than mud-wall avenues, broken at irregular intervals by doorways of burnt bricks, which lead—usually through small gardens—to the quiet and well-hidden dwelling-houses within. Excepting the ark, an old tower within the citadel, where cannon are cast, and bored by machinery driven by a pair of buffaloes, and the splendid remains of the old blue mosque destroyed about 80 years ago by an earthquake, T. contains no public buildings worth mentioning. Its bazaars and caravansaries, however, are unequalled in Persia: the former are filled with European goods, especially those of England; and the latter with the costly products of India, Cashmere, and Arabia, en route for Constantinople, to be there exchanged for

the manufactures of the West. The inhabitants themselves weave silk goods—the raw material of which comes from Mazanderan and Ghilan, on the Caspian—that command extensive sales throughout Asia Minor, in Constantinople, and very largely in Russia." A few European merchants have establishments in this city. Our journalist adds that the present pop. of T. (including the suburban villages) numbers about 180,000; but this estimate must include the entire district administratively attached to the city. T. was founded A. D. 787. It has frequently been devastated by earthquakes. In 1792, upwards of 80,000 inhabitants perished by one of these fearful convulsions. It has also suffered greatly from the constant struggles of the Persians and the Turks.

TABUA, a village of Brazil, in the prov. of Minas-Geraes, and comarca of Rio-de-Jequitinhon, on a mountain of the same name.

TABUENCA, a town of Spain, in the prov. and 39 m. W of Zaragoza, and partido of Borja. Pop. 780.

TABURUHINA, a river of Brazil, in the prov. of Mato-Grosso, which descends from the N side of the Cordilheira-dos-Parecis, runs NE, and joins the Juruena, on the r. bank. A tribe of the Mambare Indians, who inhabit its banks, bear the same name.

TABY, or **GABANIT**, a mountain of Northern Africa, in the territory of Bertat, about 30 m. from the l. bank of the Bahr-el-Azrek, in N lat. 11° 20'. It is partly covered with wood, and detached huts inhabited by negro idolaters.

TACALAYO, a settlement of Laplata, in the prov. and 105 m. N of Salta.

TACALOA, a town of New Granada, in the dep. of the Magdalena, prov. and 84 m. SE of Cartagena, on the l. bank of the Cauca, a little above its confluence with the Magdalena.

TACAMBARO, a settlement of Mexico, in the state of Michoacan, and 33 m. SE of Valladolid. Pop., Spanish and Creoles, 2,000.

TACAMES. See **ATACAMES**.

TACAMOCHO, a settlement of New Granada, in the dep. of the Magdalena, and prov. of Cartagena, on the Magdalena, near the mouth of the Cauca.

TACANA, a town of Guatemala, in the dep. of Quetzaltenango and Soconusco. Pop. 2,600.

TACANEHUNA, **TOOAHUNOS**, or **TARACUNA**, a river of Brazil, in the prov. of Para, which has its source in N lat. 8° 10', and W long. 51° 40', on the NE confines of the prov. of Mato-Grosso; takes at first the name of Paraupaba; runs NE; forms several sinuosities; and after a course of about 330 m., joins the Tocantins on the l. bank near Itabocas. It derives its name from a tribe of the Tupinambas Indians, who inhabit its banks.

TACARATU, or **TARCAVATU**, a town of Brazil, in the prov. of Alagoas, 135 m. NW of Penedo, and 33 m. NNE of the fall of Paulo-Afonso, formed by the São-Francisco. It has a chapel frequented by several Indian tribes.

TACARIGUA. See **VALENCIA (LAKE OF)**.

TACAZZE, or **TAKKAZER**, a river of Abyssinia, second in importance to the Abai or Nile. It rises in about 11° 30' N lat., and 39° E long.; and first runs N, receiving the Tzelari and the Bellegas in this early part of its course. It then sweeps round to the W, enclosing the lofty plateau of Samen within its bend, and after running some distance nearly W, about the meridian of 37°, and nearly under the parallel of 14°, turns NW, receives the Sirch and the Setif on its r. bank, and the Angrab and the Guangué on its l. After the junction of the latter stream, on the N frontier of the Shangalla territory, it assumes the name of the Athara, and flows in a NNW direction to the Nile, which it joins at Addemer, the

extreme N point of the island of Meroe, as the large region enclosed by the Nile on the W, and the T. on the E, is named. Its principal tributaries in Nubia are the Mareb and the Mogren. Dr. Ruppell states that a descent of 2,400 ft. from the plains of Temben, led to the banks of the T., which he found rushing like a torrent through a deep valley, on the W side of which the mountains of Simen or Samen rear their rugged summits nearly to the limits of perpetual snow. The absolute height of the river where he crossed it was 2,900 ft., and as its course is extremely rapid, we may infer that the plains in which, under the name of Athara, it joins the Nile 450 m. lower down, cannot be raised much more than 2,000 above the level of the sea, which is but half of the elevation assigned to them by Rennell, Humboldt, and other speculative geographers. Salt says, that the Abyssinians in general shudder at the thought of bathing in the river, on account of the crocodiles which infest it.

TACCORARAY, a town of Upper Guinea, on the Gold Coast, in the kingdom of Ashantee, 27 m. NE of Cape Three-Points, on a rocky headland. The Dutch had formerly a fort here.

TACENO, a village of Austria, in Lombardy, in the prov. and 21 m. NNE of Como, in the valley of Sasina, near the r. bank of a river of the same name.

TACHAU, **TACHOW**, or **DRZEWKOW**, a town of Bohemia, in the circle and 36 m. W of Pilsen, at the foot of the Böhmerwald, on the l. bank of the Misa. Pop. 2,932, of whom 266 are Jews. It has a castle, and a Franciscan convent. It has a forge and a copper-mine. In the vicinity is the glass-manufactory of Ströbl, the most ancient in Bohemia.

TACHBROOK (Bishop's), a parish in Warwickshire, 2½ m. SE of Warwick, watered by a branch of the Avon. It comprises the hamlet of Tachbrook-Mallory. Area 3,446 acres. Pop. 663.

TA-CHING-HEEN, a district and town of China, in the prov. of Chih-le, and dep. of Shun-teen-fu, in N lat. 38° 48', and E long. 116° 40'.

TA-CHU, a district and town of China, in the prov. of Sze-chuen, and div. of Shun-king-fu, in N lat. 29° 50', and E long. 105° 51'.

TACKLEY, a parish in Oxfordshire, 3 m. NE by N of Woodstock, on the road from Oxford to Deddington. Area 2,850 acres. Pop. in 1851, 558.

TACLATUR, or **TAKKLAGUR**, a town of Northern Hindostan, in Nepal, on the W side of the Gogra or Sarjon, 85 m. N of Jemlah, at an alt. of 14,500 ft. above sea-level. It is a dependency on Gurdon, a Chinese station and carries on an active trade with Tartary in wool, woollen fabrics, gold, tea, wax, borax, and a species of grain locally named awajou. The latter is carried N to the banks of lake Rawanshrad, where it forms during winter the chief sustenance of the horses.

TACNA, a city of Peru, in the prov. of Arequipa, situated in S lat. 18° 1' 50", on the Barrosa, about 25 m. from the sea, and 120 m. direct distance SW by W of La Paz. It stands in a small valley from 2 to 3 m. wide, on the interior edge of a broad barren plain, extending from Arica on the coast, at an alt. of 1,795 ft. above sea-level, with moderate elevations on the N and S, and the snowy-crested Cordillera on the E. In the general plan of the arrangement of its streets and walks, in the paving and the style of building, one is reminded of Lima, but in several respects T. is decidedly superior; the shops are larger and more commodious, and the houses of the better classes are larger and finished exteriorly in decidedly better style,—some of them being built of hewn stone, and many of them with a balcony to the second floor, while the interior is in many instances finished elegantly and furnished in a style

in keeping with the wealth of the proprietors. This is accounted for by the fact, that the prominent merchants of the place are English, that is, they were born in England, and educated there, though most of them have been long resident in T., and a majority have married Spanish ladies. The merchants of T. boast of the finest club-room in South America. It is very spacious, and is occupied as a reading-room, and supplied with the American, French, and English papers; a good library is also attached to the establishment. Several attempts have been made to adorn the place by the erection of a cathedral, but it has twice been partially thrown down by earthquakes, and the walls and towers which are yet standing are rent and weakened. The city has suffered greatly from these commotions. Twice since the commencement of the present century it has been destroyed, and the inhabitants are raising the inquiry whether they may not secure themselves against so great liability of disaster from this cause, by the use of iron to a considerable extent in the framework of their buildings. A large proportion of the primary instruction here is private, yet there is a primary school supported by the government and free to the children of every citizen. In these schools, whether public or private, it is said that nearly all the children are taught to read and write, and many study the elements of geography and arithmetic; many of the slaves even receive instruction thus far. For more advanced instruction there are two colleges, so called—one for males, and one for females—designed to meet the wants not of T. only, but of the whole southern province of Peru, of which this is the principal city. These are institutions of recent origin, have no funds, no library or apparatus of any amount, and with the exception of a small gratuity from the government, depend on tuition fees for support. Pupils who board and lodge at home pay about 100 d. per annum; such as are furnished everything pay about 250 d. In the college for boys a corps of 5 instructors is employed. The matriculation list in 1853 showed a list of 39 pupils in the regular course, and 36 in the primary course.—A large proportion of the business by which Bolivia is connected with the exterior world is done here. Bolivia has a small seaport, Cobija, and between that and Arica there are for local purposes some others; but access to every part of Bolivia is less difficult and less expensive from Arica than from any other port. The great business of Bolivia—though the whole is but a trifle—centres here. T. is a part of Peru only in its political relations; by treaty stipulations, goods pass in bond to the Peruvian frontier free of duty, and the Bolivian duties are paid there as if it were a port-of-entry. This city, therefore, sustains to Bolivia precisely the same relations that Lima does to Peru. Inconsiderable in size compared with Lima, having a pop. of only about 8,000, but in several respects they are much alike. The merchants realize fully that the proper place for a commercial city is the sea-port where goods are shipped and landed, and more than one effort has been made to effect a removal to Arica. Between T. and its sea-port—a distance of 40 m.—except in the immediate vicinity of Arica, there is not a blade of grass or a drop of water; the transportation of freight was therefore a matter of great difficulty, and performed entirely by mules and donkeys; but a railroad between the two places is now being constructed under a concession from government for 99 years, which will diminish the cost of labour and of living in T., and greatly increase its business.—The environs of T. are very barren. One indeed is surprised that vegetation can subsist at

all in a region apparently of such absolute sterility. But irrigation has developed considerable fertility. The valley near the river consists of a bed of clay overlying a deep bed of pebbles. This clayey surface on each side of the city, and for miles above and below it, is divided into lots of a few acres each, called *chaclas* or farms. Anything that will allow of hilling, as corn or potatoes, is planted on low ridges, and the water is let into the intervening ditches long enough each alternate day to furnish the roots with moisture. The *alfalfa*, much like red clover, and upon which mules, horses, and cattle are chiefly fed, is sown in beds a rod square. Each bed is surrounded with a slight ridge of earth. The water is let into each bed till it covers all the surface, and in sufficient quantity to give, when absorbed, abundant moisture to the soil. The pear, peach, grape, &c., are planted near the permanent water-courses, so that they need no care of irrigation. Many other shrubs are allowed to grow along these runs, but are turned to no account: among others the cotton-plant grows spontaneously, producing an article of excellent quality, but it is never gathered.

TACOARA, or TAGGARY, a river of Brazil, in the prov. of Matto-Grosso, which rises in the district of Camapuan, and runs WSW to the Paraguay, which it joins after a course of about 300 m.

TACOLNESTON, or TACLESTON, a parish in Norfolk, 10 m. SW by S of Norwich. Area 1,580 acres. Pop. in 1831, 486; in 1851, 501.

TACORA (NEVADO-DE), a snowy summit on the exterior edge of the Bolivian Andes. It rises above the pass of Las Gualillas, which runs between it and the Nevado of Ninta, and probably exceeds 17,000 ft. in alt. Near its base is a village and convent of Franciscan monks, at an alt. of 14,275 ft. above sea-level.

TACORONTA, a town on the N coast of the island of Tenerife. Pop. 3,500.

TACOTALPE, a settlement of Mexico, in the state of Tabasco, 47 leagues SE of Vera Cruz.

TACUBA, or TALCOPAK, a town of Mexico, the capital of a district of the same name, 6 m. WNW of the city of Mexico, with which it is connected by a beautiful causeway of cut stone, being the same by which Cortes made his way into the capital. Pop. 2,500, chiefly Indians.

TACUBAYA, a town of Mexico, 4 m. SW of the city of Mexico. Pop. 2,000. The archbishop of Mexico has a fine palace here.

TACULUM, a town of Hindostan, in the Carnatic, in N lat. 13° 4'.

TACUMSHANE, a parish on the S coast of co. Wexford, 2 m. SW of Broadway. Area 3,153 acres. Pop. in 1831, 907; in 1841, 961.

TACUNGA, a province of Ecuador; bounded on the N by the prov. of Quito; on the E by the valley of Vicioso; on the S by the prov. of Ambato; on the SW by Chimbo; and on the NW by Esmeraldas and Guayaquil. It abounds in excellent pastures, and produces wheat, barley, and rye.—The capital, of the same name, is situated in an extensive plain to the S of Quito, near the cordillera of the Andes. It is a large and well-arranged town, with wide streets, and houses built chiefly of a light porous lava. It was destroyed in 1698 by an earthquake, when the greater part of the inhabitants perished. A similar catastrophe was repeated in 1743 and 1757. The inhabitants are computed at 17,000, the greater part being Spaniards and Mestizoes.

TACURUCA, an island of Brazil, off the coast of the prov. of Porto Seguro, near Santa-Cruz.

TADCASTER, a parish and market-town of Yorkshire, 9 m. SW of York, on the river Wharfe, and within 3 m. of the North Midland railway.

The p. includes the townships of Stutton with Hazlewood, Catterton, Oxtou, and T. Area 6,010 acres. Pop. in 1801, 2,072; in 1831, 2,855; in 1851, 2,979. The town, built in the form of a cross, is pleasantly situated on the river Wharfe, which is here spanned by a bridge of 9 arches, and is navigable up to the town. The houses are neat and well-built. No manufactures are carried on in the town. In the neighbourhood are several stone-quarries, and corn or flour mills. T. was the *Calcaria* of the Romans. In the civil wars of England it was always esteemed a post of considerable importance.

TADDINGTON, a chapelrv in Bakewell p., in Derbyshire, 4 m. S by W of Tideswell. Pop. 460.

TADEN, a canton and village of France, in the dep. of Cotes-du-Nord, 2 m. NE of Dinan, near the Rance. Pop. 1,200.

TADICOMBO, a town of Hindostan, in the Carnatic, 9 m. N of Dondigol.

TADLA, a town of Morocco, on the l. bank of the Morbeysa, 85 m. NE of Morocco.

TADLEY, a township of Southamptonshire, 6½ m. NNW of Basingstoke. Area 2,047 acres. Pop. in 1851, 876.

TADLOW, a parish of Cambridgeshire, 6 m. S of Caxton. Area 1,717 acres. Pop. in 1851, 189.

TADMARTON (GREAT), a parish of Oxfordshire, in which is situated the hamlet of Little Tadmarton, 4½ m. WSW of Banbury. Area 2,500 acres. Pop. in 1831, 355; in 1851, 450.

TADMOR. See PALMIRA.

TADOUSAC, a settlement of Lower Canada, at the mouth of the Saguenay, on the l. bank of the St. Lawrence. It has a fort.

TADVAN, a village of Persia, on a small bay of Lake Van, 10 m. E by N from Betlis. It is inhabited by about 40 Armenian families.

TAE-CHU, a division and town of China, in the prov. of Shan-se. The div. comprises 3 districts. The town is 96 m. NE of Tae-yuen-fu, near the great wall, in N lat. 39° 3' 50", and E long. 112° 18'.—Also a division and town in the prov. of Kan-suh. The div. comprises 7 districts.

TAE-CHU-FU, a division and town of China, in the prov. of Che-keang. The division comprises 6 districts. The town is 120 m. SE of Hang-chu-fu, in N lat. 24° 54', and E long. 121° 9' 24". It is situated on an affluent of the Yellow sea, 30 m. from the coast, which here abounds with a species of ray, the skin of which is manufactured into sheaths for cutlasses, and forms an important article of export to Japan and all parts of the empire.

TAE-CHUN, a district and town of China, in the prov. of Che-keang, and div. of Wan-chu-fu, 120 m. S of Hang-chu, in N lat. 27° 34' 48", and E long. 119° 50' 20".

TAE-GAN-FU, a division and town of China, in the prov. of Shan-tung. The div. comprises 7 districts. The town is 39 m. SSW of Tse-nan-fu, in N lat. 36° 14' 15", and E long. 117° 15' 30". It is scantily peopled. In the principal street is a triumphal arch, and at the extremity a large handsome pagoda.

TAE-HANG-SHAN, a chain of mountains in China, which detaches itself from the In-shan mountains in Mongolia; penetrates China proper; enters the dep. of Tae-tung-fu in Shan-se, and that of Seu-en-hwa-fu in Chih-le, and running S to the confines of Honan, forms a line of separation between these two former provinces.

TAE-HING-HEEN, a district and town of China, in the prov. of Keang-su, and div. of Tung-chu, in N lat. 32° 12', and E long. 120°.

TAE-HO, a district and town of China, in the prov. of Keang-se, and div. of Keih-gan-fu, 150 m.

SSW of Nan-chang, in N lat. 26° 46', and E long. 114° 54'. It is pleasantly situated on the l. bank of the Kan-keang. At its entrance is a tower 9 stories in height.

TAE-HO-HEEN, a district and town of China, in the prov. of Gan-hwuy, and div. of Ying-chu-fu, in N lat. 38° 10', and E long. 115° 43'.—Also a district and town of China, in the prov. of Yun-nan, and div. of Ta-le-fu.

TAE-HO-SHIN, a river of China, in the prov. of Kwang-tung, and island of Hai-nan. It issues from the S side of the Wei-chishan; runs first SE, then E; passes 3 m. N of Leen-chu-fu, and along the base of a mountain which gives rise to the Poki-shin; divides soon after into two branches, forming Cotton-tree island, and throws itself into the bay of Shwuy-kaou-keang.

TAE-HU-HEEN, a district and town of China, in the prov. of Gan-hwuy, and div. of Gan-king-fu, in N lat. 80° 30', and E long. 116° 20'.—Also a new town in the prov. of Kiang-nan, and dep. of Su-chu-fu, in an island of a lake of the same name.

TAE-KANG, a district and town of China, in the prov. of Ho-nan, and div. of Chin-chu-fu, in N lat. 34° 7', and E long. 114° 54'.

TAE-KUH, a district and town of China, in the prov. of Shan-se, and div. of Tae-yuen-fu, in N lat. 37° 25', and E long. 112° 33'.

TAE-LAO, an island of China, in the prov. of Kwang-tung, at the entrance to the roadstead of Macao, in N lat. 22° 7', and E long. 113° 39'.

TAENSAPAVA, a river of West Florida, which runs into the Iberville, in N lat. 30° 19'.

TAE-PE-SHAN, a mountain of China, in the prov. of Shen-se, and dep. of Fung-seang-fu, in N lat. 33° 55', and E long. 107° 42'.—Also a mountain in the prov. of Shan-se, in the dep. of Tae-tung-fu, in N lat. 39° 20', and E long. 111° 59'.—Also a mountain in the prov. of Kan-suh, in N lat. 32° 46', and E long. 105° 3'. These mountains are all covered with perpetual snow.

TAE-PING, a district and town of China, in the prov. of Che-keang, and div. of Tae-chu-fu, in N lat. 28° 26', and E long. 121° 25', or according to Klaproth, 120° 42'.—Also a district and town in the prov. of Shan-se, and div. of Ping-yang-fu, in N lat. 35° 46', and E long. 111° 18'.—Also a district and town of China, in the prov. of Sze-chuen, and div. of Kwei-chu-fu, in N lat. 32° 8', and E long. 108° 14'.

TAE-PING-FU, a division and town of China, in the prov. of Gan-hwuy. The div. comprises 8 districts. The town is 120 m. NE of Gan-king-fu, in N lat. 31° 38' 38", and E long. 118° 31' 45", on the r. bank of the Yang-tse-keang, which here receives 3 tributaries. It has a considerable trade.—Also a division and town in the prov. of Kwan-se. The div. comprises 7 districts. The town is 69 m. SW of Nan-ning-fu, on the r. bank of the Le-keang, on a peninsula formed by that river, in N lat. 22° 25' 12", and E long. 107° 7' 10". It is defended landwards by a wall. The surrounding district is the most fertile and populous in the prov., and contains numerous forts erected for the defence of its frontier towards An-nam.

TAE-PING-HEEN, a district and town of China, in the prov. of Gan-hwuy, and div. of Ning-kwo-fu, in N lat. 80° 25', and E long. 118° 8'.

TAERENDO-ELF, a branch of the river Tornea, in Lapland, which is said to communicate with the river Calix, though it afterwards takes a contrary direction, and flows N to the Frozen ocean.

TAE-TEEN-HEEN, a district and town of China, in the prov. of Fo-keen, and div. of Yung-chun-chu, in N lat. 25° 40', and E long. 118° 8'.

TAE-TSANG-CHU, a division and town of

China, in the prov. of Keang-su. The div. comprises 4 districts. The town is 150 m. ESE of Nanking-fu, in N lat. $31^{\circ} 30'$, and E long. $120^{\circ} 52'$.

TAE-TUNG-FU, a division and town of China, in the prov. of Shan-se. The div. comprises 10 districts. The town is 180 m. NNE of Tae-yuen-fu, near the great wall, in N lat. $40^{\circ} 5' 42''$, and E long. $113^{\circ} 16' 30''$. It stands amid mountains, in a locality exposed to the incursions of Tartars, but it is well-fortified, and has a numerous garrison. The streets are narrow, and the houses confined, but tolerably well-built. There are several triumphal arches built of wood, some of them of great antiquity. It has a large pop., and possesses an active trade in furs. The environs afford marble, porphyry, lapis-lazuli, jasper, and many kinds of rare medicinal plants.

TAE-TUNG-HEEN, a district and town of China, in the prov. of Shan-se, and div. of Tae-tung-fu.

TAE-WAN-FU. See FORMOSA.

TAE-YO, an island of China, in the prov. of Kwang-tung, at the entrance to the roadstead of Macao, formerly called Lan-tao, in N lat. $22^{\circ} 15'$, and E long. $113^{\circ} 52'$. It has a town of the same name.

TAE-YUEN, a district and town of China, in the prov. of Shan-se, div. and 12 m. SW of Tae-yuen-fu, near the r. bank of the Fuen-ho.

TAE-YUEN-FU, a division and town of China, in the prov. of Shan-se. The div. comprises 11 districts. The town is 279 m. SW of Pe-king, in N lat. $37^{\circ} 53' 30''$, and E long. $112^{\circ} 33'$. It is 9 m. in circumference. It is well fortified, and populous, although considerably decayed in importance since it ceased to be an imperial residence. The palace is rapidly falling into ruins. It has manufactories of fine earthen vessels, of various kinds of iron-ware, and of varieties of woollen fabrics, inclusive of carpets. The environs afford musc and azure stone. On the adjacent mountains are the sepulchres of several princes, some of them of great beauty.

TAF, or **TAAFE**, a river of Wales, which rises among the hills in Brecknockshire, in two streams, the Greater and Lesser Taf, which unite their waters below the village of Coed-y-Cymmer, on their entrance into Glamorganshire; and thence proceed by Merthyr-Tydvil. About 12 m. below the latter town, the T. receives the Rangoid-Taf, a mountain-stream which flows into it from the E. Lower down it is joined by the Cynon from the W, and a few miles lower by the united waters of the two Rhondas. It then flows nearly S. to Llandaff, and afterwards passing Cardiff, enters the small bay of Penarth. In dry weather the T. contains but little water; when swollen by the floods from the mountains, it rolls over its rocky bed in an impetuous torrent. It is navigable for small craft as far as Cardiff, to which the tide ascends.

TAFALISGA, a town of Gallam, in Central Africa, situated at the junction of the Falemé with the Senegal.

TAFALLA, a small but ancient town of Spain, in the prov. of Pampeluna, on the river Cidacos, 27 m. N of Tudela, and 19 m. S of Pampeluna. Pop. 4,100. It was formerly the residence of the kings of Navarre, and the seat of a university. It has several churches and convents.

TAFARA, a walled village of Bambarra, in Central Africa, 120 m. WSW of Segou.

TAFELBERG, a town on the E coast of the island of Ceram, in S lat. $3^{\circ} 20'$.

TAFELFICHTE, or **TAFELSTEIN**, a mountain of Prussia, situated at the point of meeting of the Bohemian, Silesian, and Lusatian ranges. Its elevation is 3,370 ft., and the prospect from its summit, on the side of Bohemia, is immense.

TAFELNEH (CAPE), a promontory on the coast of W. Africa, 27 m. SSW of Mogador. It rises to an alt. of 780 ft.

TAFFERS, a commune and village of Switzerland, in the cant. and 3 m. ENE of Friburg. Pop. 2,600.

TAFILET, a large district situated to the SE of the chain of Atlas, tributary to the empire of Morocco. It has the prov. of Draha on the SW, and Fez on the N; and consists of a vast plain, presenting an unvaried surface like the sea. It is traversed by two rivers running in opposite directions, one of which loses itself in the desert of Angad, the other in the loose sands of the Sahara. Water, though brackish, is everywhere to be found at the depth of 12 ft. Dates are its chief produce, though wheat and barley are cultivated on the banks of the rivers. There are mines of antimony and lead, which are carefully worked for the preparation of the composition called *kukol fileli*, used all over the East for blackening the eyebrows. The inhabitants possess numerous herds of sheep and goats, from the wool of which the women manufacture stuffs and carpets which are held in considerable estimation. Sigilmessa was once the most remarkable place in this region, but the town called Tafilet or Taflet, on the r. bank of the Zin, and 230 m. ESE of the city of Morocco, has supplanted it.

TAFI, a town of Persia, in the prov. of Fars, 21 m. SW of Yazd, on the Debala. Pop. 6,000.

TAFU, a town of Upper Guinea, on the Gold coast, 12 m. N of Coomassi.

TAFYLE, a town of Syria, in the pash. of Damascus, near the frontiers of Arabia, inhabited by about 3,000 Howalat Arabs.

TAGADEMPT, a village of Algiers, 106 m. SW of Algiers, round which are the remains of a very large city, supposed to be the ancient *Vaga*.

TAGAI, a town of Russia, in the gov. and 46 m. W of Simbirsk, on the Tagaika, an affluent of the Sviaga. Pop. 1,200.

TAGAL. See TAGGAL.

TAGALUN, one of the Fox islands, in the N. Pacific, in N lat. $53^{\circ} 30'$.

TAGAMA, a district in the African desert, to the south of Fezzan, inhabited by Tuaricks, remarkable for the comparative whiteness of their complexion.

TAGANROG, a town of European Russia, in the gov. of Ekaterinoslav, near the N extremity of the sea of Azof, in N lat. $47^{\circ} 13'$. It is built on the side of a lofty promontory, nearly opposite the embouchure of the Don, and conducts through the medium of that river an extensive traffic. It has a harbour and a fortress, maritime and commercial courts, a naval hospital, and a lazaretto. It trades with Kertsh, Caffa, Odessa, Constantinople, Smyrna, and some Italian ports. Its exports are corn, Siberian iron, timber, pitch, tar, potash, linseed, sailcloth, wax, isinglass, leather, fish, and caviar; it imports Greek wines, fruit, and manufactured articles. The vessels which arrived at this port in 1846 were 1,287; among which were 49 English, 3 French, and 16 American. The chief exports during the same period were, 293,436 chetwerts of grain, 13,392 chetwerts of linseed, 3,090 chetwerts of rye, 21,257 poods of wool, and 125,263 poods of tallow. T. was fortified by Peter I. in 1697, but dismantled after the treaty of Pruth, and given up to the Turks, in whose possession it remained till 1768, when it was seized by Catharine II., to whom it was finally ceded in 1774. Alexander I. died here in December 1825. The environs are extremely fertile.—The bay of T. extends from Point Armianskaia to Cape T., 5 m. S of the former.

TAGAPOLA, a small island in the Philippine group, 25 m. W of Samar.

TAGARABUENA, a village of Spain, in the prov. and 18 m. ESE of Zamora.

TAGASA, or **TAGASTA**, a town of Morocco, in the prov. of Fez, situated on a river about 8 leagues from the Mediterranean, 20 m. N of Melilla.

TAGAVOST, a town of Morocco, in the prov. of Susa, on the l. bank of the Messa, 24 m. W of Talent.

TAGAZOUTE, a village of Algiers, 45 m. SE of Oran.

TAGERFELDEN, a village of Switzerland, in the cant. of Aargau, 3 m. S of Zurzach. Pop. 750.

TAGGAH, a village of Algiers, 50 m. SW of Constantina, in a fertile plain. In the vicinity are some ancient Roman ruins.

TAGGAL, or **TÉGAL**, a town of the island of Java, on the N coast, in 8 lat. 6° 44', E long. 109° 12½', or 2° 20' E of Batavia, prettily situated on a broad river. It has a church and a small fort, and presents altogether a very neat appearance. The resident's house is a commodious and very handsome building. The country around is fertile; and this part of Java is the rice granary not only for the supply of Batavia but for exportation to the Eastern isles.—Also an island in the strait of Sunda, 15 m. NE of Mahitam.

TAGGART, an inhabited island of Lough-Strangford, co. Down, on the W side of the lough, nearly 1 m. NNE of the town of Killyleagh. It measures ½ m. in length from N to S.—Also an islet near the head of Clew bay, co. Mayo, 3½ m. WNW of Westport.

TAGGIA, a town of the Sardinian states, in the prov. of Genoa, 6 m. NE of San-Remo.

TAGHADOE, **TEAGHDOE**, or **TARROO**, a parish in co. Kildare, 2 m. SSW of Maynooth. Area 4,126 acres. Pop. in 1831, 467; in 1841, 423.

TAGHANIE, a township of Columbia co., in the state of New York, U. S., 40 m. S of Albany. Pop. 1,540.

TAGHATU, or **TATAU**, a river of Persian Armenia, one of the principal feeders of Lake Urumiyah. It is formed by the junction of two considerable streams, one flowing N from the mountains of Kurdistan, the other called the Saruk, flowing W from near the Takht-i-Soleiman. These streams unite to the E of Mindel, under the parallel of 10° 15' N, and the united stream pursues a NNW course to the SE extremity of the lake, into which it flows at a point to the SSW of Binab.

TAGHBOY, or **TAUGHBOY**, a parish 5½ m. S by E of Athleague, partly in co. Galway, but chiefly in co. Roscommon. Area 13,996 acres. Pop. 3,825.

TAGHEEN, or **TAUGHHEEN**, a parish in co. Mayo, 2½ m. NNE of Hollymount. Area 6,837 acres. Pop. in 1831, 2,561; in 1841, 3,084.

TAGHKANIC MOUNTAINS, a range partly in the E part of the state of New York, U. S., and partly in Massachusetts, a spur of the Green mountains. It is about 50 m. in length, and attains an alt. of 3,000 ft. above sea-level.

TAGH KASI, a populous village of Asiatic Turkey, in the district of Kaisariyah, on a rivulet which flows from the N foot of Mount-Arjish to the Sarimsak.

TAGHMACONNEL, a parish in co. Roscommon, 4½ m. NNE of Ballinaloe. Area 18,826 acres, of which 215 are water. Pop. in 1841, 4,807.

TAGHMOM, a parish in co. Westmeath, 5 m. NNE of Mullingar. Area 3,452 acres. Pop. in 1831, 922; in 1841, 958. It contains the hamlets of Rathcloghrin, Taghmom-bridge, and Crooked-Wood.—Also a parish in co. Wexford. Area 10,132 acres. Pop. in 1831, 2,803; in 1841, 3,737. The

market-town, and formerly a parl. borough of T., stands at the intersection of the road from Ennis-corthy to Bannow, 6½ m. W by S of Wexford.

TAGIL, a river of Asiatic Russia, which rises about 40 m. NW of Yekaterinburg, on the E flank of the Urals; runs N, and then ENE, and joins the Tura on the r., 60 m. SE of Verkhotur, after a course of 230 m.

TAGLIACCOZZO, a town of the kingdom of Naples, in Abruzzo-Ultra 2da, 20 m. SSW of Aquila, near the r. bank of the Imele. Pop. 4,000. It has several fine churches and a ducal palace.

TAGLIAMENTO, a large river of Austrian Lombardy, in the gov. of Venice, which rises on Monte-Mauro, in the prov. of Udine; flows E past Tolmezzo; then turns S, and passing Spielenberg and Mandusco, flows into the Adriatic, in N lat. 45° 38', after a course of 120 m. It is navigable from the small town of Latisana. Its banks were the scene of military operations in the spring of 1797.

TAGLIO, a river of Italy, in the prov. of Genoa, which flows into the Mediterranean, 4 m. E of San Remo.—Also a town of Austrian Lombardy, 6 m. NE of Ariano.

TAGLO-BAY, a bay on the S coast of the island of Mindanao, in N lat. 6° 8'.

TAGOAT, a village in the p. of Roslare, co. Wexford, 1½ m. W of the nearest part of St. George's channel.

TAGOLANDA, a small island, about 20 m. in circumf., situated off the NE extremity of Celebes.

TAGRIVELT (RAS), or **CAPE SEM**, a low sandy point on the W coast of Africa, 8½ m. SW of Mogador. The coast between this point and Mogador is a continued line of bare sand-hills sloping from a height of 70 ft. to the beach.

TAGUS, the **Tajo** of the Spaniards, and **Tejo** of the Portuguese, a magnificent river which issues from a spring in the mountains of Albarracin, on the frontiers of the prov. of Cuenca, in N lat. 40° 38', W long. 2° 46', at the distance of little more than 100 m. from the Mediterranean. Pursuing its course first NW, and then in a W direction, a little inclined to the S, it passes the palace of Aranjuez, the cities of Toledo, Talavera, and Alcantara in Spain, and Abrantes, Santarem, and Lisbon in Portugal, and flows into the sea, 7 m. below the capital of Portugal, in N lat. 38° 45', W long. 10° 2', after a course of 510 m., of which 375 m. are in Spain. Its principal Spanish affluents on the r. are the Jarama, the Guadarrama, the Alberche, the Tietar, and the Alagan; and in Portugal, the Elga, the Ponsal, and the Zezere. On the l. it is joined by the Guadiela, the Guadarranque, and the Solor, in Spain; and by the Sever, the Saraya, the Zatas, and the Cunha, in Portugal. Like the Guadalquivir, and other great rivers of Spain, it absorbs the waters collected between two long parallel chains of mountains. Long before reaching Lisbon it receives the tide, and becomes expanded into an estuary. Its volume of water is large throughout; but in so mountainous a country as Spain, river navigation is very limited, and that of the Tagus is not at present carried farther than Abrantes. It has often been proposed to clear it of its rocks, and to prolong the navigation eventually by canals; but as yet nothing of this nature has been decisively attempted.

TAGYPEEL, a small island in the Eastern seas, near the NE coast of Borneo, in N lat. 6° 29'.

TAGZA, a village of Algiers, 12 m. SSE of Constantina.

TAHA. See **OTAHA**.

TAHA-EL-MODAIN, a village of Egypt, 5 m. SW of Somalut.

TA-HEEN, a district and town of China, in the prov. of Sze-chuen and div. of Suy-ting-fu, in N lat. 31° 18', E long. 107° 37' 30".

TAHEJ, a town of Hindostan, in the prov. of Catch, of which, in the 16th cent., it was the capital, but it is now dwindled to a small village, in N lat. 23° 17'.

TAHIM, a parish of Brasil, in the prov. of São Pedro-do-Rio-Grande, on a river of the same name, an outlet of Lake Mangueira, by which the p. is bordered in its entire extent from N to S. Pop. 900.

TAHIRAN. See TEHRAN.

TAHIRBEGY, a village of Afghanistan, 80 m. E of Merochak, and near the confines of Bokhara.

TAHITI, or OTAHITI, an island of the S. Pacific, the principal in the Society archipelago, in S lat. 17° 40', E long. 150° 30', about 130 m. SE of Raiatea. It is an elongated high ridge of land, composing two peninsulas joined by a low narrow isthmus, each rising gradually from the shore to an alt. of 7,000 ft. above sea-level, and covered to the summit with the most luxuriant foliage. The one section is in length about 25 m., and nearly the same in breadth; the other is about 20 m. in length, by 15 m. in breadth. "From the great central peaks of the larger peninsula—Orohena, Aorai, and Pirohitee—the land radiates on all sides to the sea in sloping green ridges. Between these are broad and shadowy valleys, in aspect each a Tempe, watered with fine streams and thickly wooded. Unlike many of the other islands there extends nearly all round T. a belt of low alluvial soil, teeming with the richest vegetation. Here, chiefly, the natives dwell. Seen from the sea, the prospect is magnificent. It is one mass of shaded tints of green, from beach to mountain-top; endlessly diversified with valleys, ridges, glens, and cascades. Over the ridges here and there, the loftier peaks fling their shadows, and far down the valleys. At the head of these, the waterfalls flash out into the sunlight as if pouring through vertical bowers of verdure. Such enchantment, too, breathes over the whole, that it seems a fairy world, all fresh and blooming from the hand of the Creator. Upon a near approach the picture loses not its attractions. It is no exaggeration to say, that to a European of any sensibility who for the first time wanders back into these valleys, away from the haunts of the natives, the ineffable repose and beauty of the landscape is such that every object strikes him like something seen in a dream; and for a time he almost refuses to believe that scenes like these should have a commonplace existence. No wonder that the French bestowed upon the island the appellation of the New Cytherea. 'Often,' says De Bourgainville, 'I thought I was walking in the garden of Eden.'"—[Melville.]

Climate, &c. The climate is fine, and the soil is a fertile blackish mould, producing spontaneously a great variety of edible fruits, roots, and vegetables; of these the most common and most useful are the *artocarpus*, or bread-fruit, of which there are above fifty varieties, the cocoa-nut, the jambo, thirteen sorts of bananas, the arum, potato, yam, sugar-cane, and the paper-mulberry of which the inhabitants make their cloth. The guava, though only introduced about thirty years ago, now composes the greater part of the woodlands and bush in the lower lands. Dogs, hogs, and rats are numerous. Saddle-horses are imported from S. America; and the missionaries possess a few hundred head of cattle. The birds are of various kinds, and the natives rear the domestic poultry common in Europe; there are also wild ducks, turtle-doves of a green colour, large pigeons, small paroquets, king-fishers, cuckoos,

and herons. Of the small birds which abound in the forests, some are remarkable for the melody of their notes. The ants are troublesome, but no species of serpent has yet been found; and frogs, toads, and scorpions, if they exist at all, are rare. The sea on the coast abounds with fish, among which is the sea-snake of which the bite is mortal.

Inhabitants. Mr. Ellis estimated the pop. of this island at about 10,000; Mr. Williams, at from 18,000 to 20,000. There is no question but that depopulation has taken place here, as in the other islands, to a considerable extent; although for a season, under the renovating and genial influence of Christianity, it seemed to be rapidly increasing. The natives are well-made. Their mode of life—which affords them exercise, without subjecting them to severe labour—imparts to their bodies much of that strength and elegance which the human frame exhibits under good training. Some of the other inhabitants of the islands of the Pacific, and among the rest those of the Friendly islands, may be more hardy and robust, and may display a greater appearance of muscular strength; but none of them seem so generally to unite that strength and elegance of shape which is often seen in the natives of T. Their colour is tawny,—of a shade much lighter than that of the inhabitants of the Friendly islands; sometimes, particularly in those of the higher ranks, it approaches to what we call fair, but the cheeks never display that glow by which the northern Europeans are distinguished. The hair is generally black, but sometimes brown, red or flaxen, and frizzled, but never woolly. The eyes are black, the nose flat, the mouth large, and the teeth white and even. The women are distinguished from the men by greater delicacy of form; and their skin is delicate and soft, which is procured by their frequent bathing, and copious use of the oil of the cocoa. The chiefs—like the mandarins in China—used to be distinguished by long nails. The practice of tattooing was nowhere more prevalent than in T.; and the custom was common to both sexes. The dress of the Otahitians is formed of a kind of cloth resembling paper, made of the bark of certain trees, particularly of the paper-mulberry; but as this substance cannot long resist the rain, the garments formed of it are thrown aside during wet weather, and their place is supplied by others formed of a kind of matting. The missionaries introduced the culture of the cotton-plant, and taught the natives to manufacture a coarse cotton-cloth, and dress in a becoming manner. The climate of this island renders houses almost superfluous, and as the inhabitants require little shelter, they have been proportionally careless in the construction of their habitations. These generally consist only of a shed or roof, resembling the roof of a barn in Europe, supported by three rows of pillars, one in the centre, and one on each side. They are thatched with palm-leaves; and the floor is strewn with hay and covered with mats. A few blocks of wood serve as stools by day, and by night as pillows. The food commonly consists of the bread-fruit, bananas, plantains, yams, apples, and a sort of sour fruit, which is used as a relish to the roasted bread-fruit. The most general dish is *popoi*, which is made of the mountain plantain beaten up to a paste or jelly, with cocoa-nut milk. Every kind of fish is eagerly devoured. Their small canoes are formed of a single tree, and carry from 2 to 6 men. Their larger canoes are formed of several planks sewed together, and are either fitted with an outrigger, or two of them are fixed together with planks. The seams are calked with rushes, and the whole is covered with a gummy substance, which serves the purpose of pitch.

Civil condition.] A rivalry of proselytism has long existed between the Protestant and Catholic missionaries for upwards of ten years in the South seas. In 1827 two Catholic missionaries landed for the first time in the Sandwich islands. They found the country ruled by Protestant missionaries: the laws, both political and religious, the administration, commerce, taxes, sales, cultivation, all emanated from them or their schoolmasters. Nevertheless, the progress of Catholicism was rapid, and MM. Bachelot and Short were, in spite of the energetic protests of the English and American consuls, transported at the end of 1831 to the coast of California. Hearing of a change in the government of those isles in consequence of the death of the Queen Kaahumanu, these two priests attempted a second visit in 1837; but had scarcely set foot on shore at Woa-hu than they were obliged once more to embark on board their vessel, and retrace their voyage to California. These events are nearly an exact counterpart of what recently took place at T. About the end of 1836 MM. Laval and Carot left the isle of Mangavera and arrived at T. They were admitted into the presence of Queen Pomare, and received with kindness and condescension, but were soon after ordered to take their departure. The two strangers refused to depart, and placed themselves under the protection of the American consul; but were ultimately, by order of the queen, taken by force on board an English vessel, and conducted to Valparaiso. This act was resented by the French government, which eventually assumed the protectorate of the island. The French seem to have introduced many stringent municipal regulations into the government of the island; and, it is to be feared, their presence has not contributed to the improvement of Tahitian morals. The pop. of T., which was between 200,000 and 300,000 at the time of Cook's discovery, has dwindled, it is said, to 6,000; and we believe on the best authority that the rate of decrease, during the last five years, is in enormous excess of all previous periods.

Commerce.] The foreign trade of the island is confined to the exportation of pearl-shell, pearls, sugar, cocoa-nut oil, and arrow-root, and is entirely in the hands of Americans and Europeans. The port-dues, however, and trade in supplying shipping, especially the English and American whale-ships, yield the natives considerable emolument.—T. offers every facility for provisioning ships. The harbour is beautiful, and a ship can lie alongside of the dock and be supplied with water in a very few hours. The French authorities are extremely anxious for the establishment of a line of steamers. The following is the time which a well-furnished steamer would take to reach England from Sydney in Australia, by way of T.:—From Sydney to T., 11 days, 12 hours; from T. to Panama, 16 days; to cross the isthmus, 7 hours; from Aspinwall to England, 18 days; total, 45 days, 19 hours, with 3 days' detention in coaling at T. Returning it would take 40 days, with 3 days' detention at T. in coaling. T. may be regarded as under the full influence of the SE trade-winds.

TAHLEQUAH, the capital of the Cherokee Indians, in the state of Arkansas, U. S., 18 m. E of Fort-Gibson, and 53 m. NW of Van Buren, on the Arkansas Illinois river. It became the seat of government of the Cherokee nation in 1839, after the reunion of the eastern and western branches of the Cherokee family. The location of the town is central and beautiful, and combines advantages of good health, excellent spring water, and a plentiful supply of timber for firewood and purposes of building. The surrounding country presents a diversity

of mountain, woodland, and prairie scenery. After T. became the seat of government, a number of log cabins were thrown up about the place, without, however, much regard to order, as they were designed for the temporary accommodation of those engaged in the transaction of public business; but a regular town has been laid off, a number of lots sold to citizens of the nation, and a few houses have been erected, and others are in contemplation. The supreme court holds its annual session in a commodious brick court-house.

TAHMUR, a town of Hindostan, in the prov. of Oude, 30 m. NE of Keyrabad.

TAHOATA. See OHITAHOU.

TAHRAH, a town and fortress of Hindostan, in the prov. of Kutch, 12 m. SE of Luckput-Bunder. The fortress is an irregular building, flanked with round towers. On the N and E of it are extensive basins of water, which render it difficult of access on these points. The town itself is quite undefended. The inhabitants are chiefly Hindus.

TA-HU, or TAI-HO, [*i. e.* 'Great Lake,'] a lake of China, between the provinces of Keang-su and Che-keang. It is 150 m. in circumf., and is enclosed by a chain of picturesque mountains. It is a place of resort to the inhabitants of the adjacent towns. Its waters abound with fish. The great canal passes, at a point to the N of Kia-hing and W of Song-kiang, through a broad sheet of water of considerable extent which probably is part of—or at least joins—this celebrated lake. "This part of the lake is very shallow; and much of it is quite covered with the *Trapa bicornis*—a plant called *ling* by the Chinese. It produces a fruit of a very peculiar shape, resembling the head and horns of a bullock more than anything else,—and is highly esteemed as a vegetable by the Chinese in all parts of the empire. I have seen," adds Mr. Fortune, "three very distinct species or varieties of this plant,—one of which has fruit of a beautiful red colour. Women and boys were sailing about on all parts of the lake in tubs of the same size and form as our common washing-tub, gathering the fruit of the *ling*. I do not know of any contrivance, rude as it appeared, which would have answered the purpose better than these tubs; for they held the fruit as it was gathered, as well as the gatherers, and at the same time were easily propelled through the masses of the *ling* without doing the slightest injury to the plants. Nevertheless, the sight of a number of people swimming about on the lake each in his washing-tub had, in my eyes, something very amusing and ludicrous about it. After leaving this lake, the banks of the canal—and indeed the greater part of the country—are covered with the mulberry. Silk is evidently the staple production in this part of China."

TAHURA, a small island of the N. Pacific, in the group of the Sandwich islands, to the SW of the island of Oni-hao, in N lat. 21° 37', and W long. 160° 30'.

TAHURAWI, one of the smallest of the Sandwich islands, in the N. Pacific, 9 m. SW of the island of Mawi, in N lat. 20° 30', and W long. 156° 35'.

TAHYS, two lakes of Brazil, in the prov. of Rio-de-Janeiro, between S. Salvador and S. Joao-de-Praya, near the r. bank of the Parahiba. The largest is 3 m. in length.

TAIABANA, an extensive parish of Brazil, in the prov. of Parahiba and district of Pilar, on the r. bank of the Rio-Parahiba. Pop. 1,400. The locality is noted for its cotton.

TAIABATE, a river of Brazil, in the prov. of São-Paulo, which joins the Parahiba a little above Jacarehi.

TAIARBU, a peninsula dependent on Tahiti.

TAIBAREISKI, a tribe of the Samoides, in Russia in Europe, in the gov. of Arkhangel and district of Mesen, to the S of the island of Vardar.

TAIDSI, a district of Japan, in the island of Nifon, and prov. of Monta.

TAIFARA, a district of Japan, in the island of Nifon and prov. of Tutomi.

TAIFE. See **TAFFE**.

TAIKANY, a district of Japan, in the island of Nifon and prov. of Sangami.

TAILLADE, a village of France, in the dep. of the Vaucluse, cant. and 3 m. E of Cavailon, at the foot of Mont Leberon. Pop. 320. It has several madder-mills and iron-works.

TAILLANT (La), a village of France, in the dep. of the Gironde, cant. and 2 m. WSW of Blanquefort, on a hill. Pop. 820.

TAILLEBOURG, a commune of France, in the dep. of the Charente-Inferieure, cant. and 4 m. SSE of St. Savinien, partly on the summit, and partly on the slope of a hill, crowned with the ruins of an ancient castle, and the base of which is washed by the Charente. Pop. 1,106. This town was formerly fortified. It is noted for a victory over the English won by St. Louis in 1243.

TAILLES, a department and commune of Belgium, in the prov. of Luxembourg and arrond. of Neufchateau. Pop. of dep. 446; of com. 334.

TAILLEVILLE, a village of France, in the dep. of the Calvados, cant. and 2 m. NW of Douvres. Pop. 1,200. It has the remains of an ancient camp.

TAILLY-LE-HAMEAU, a village of France, in the dep. of the Ardennes, cant. and 6 m. E of Bazancy. Pop. 587. It has a blast-furnace, several lime-kilns, an oil-mill, and a distillery.

TAIMBURNY, a town of Hindostan, in the prov. of Aungmyab and district of Sologpur, 105 m. ESE of Poona.

TAIMELA, a tribe who inhabit the vicinity of the coast of Abyssinia, near the Danakil or Dankali territory.

TAIMYR, a gulf of the Arctic ocean, on the coast of Russia in Asia, in the gov. of Jeniseisk and district of Touroukhansk, between Capes Sievéro-Vostochnoi and Taimour. It is 210 m. in length from N to S, and 60 m. in medium breadth.—Also a lake in the same gov. It is several leagues in length, and discharges itself into the gulf of T. by a river of the same name, which traverses its W part, and has a considerable volume of water far above the point where it enters the lake.

TAIN, a parish on the N border of Ross-shire; bounded on the N by the Dornoch frith. The surface consists of three well-defined districts; a belt of low flat plain along the coast, a broad sheet of land, of middle character, between a terrace and a hanging plain, receding from bank or escarpment of about 50 ft. above the level of the plain; and a ridge or series of gentle uplands along the exterior frontier, sending up their loftiest summit in the hill of Tain to an alt. of nearly 800 ft. above sea-level. The fishing village of Inver, with a pop. of about 150, stands in the extreme E, 4 m. from the burgh of T. Pop. of p. in 1831, 3,078; in 1851, 3,576.

TAIN, a small town, about $\frac{1}{2}$ m. from the Dornoch frith, in the centre of the above parish, $\frac{1}{2}$ m. N by E of Invergordon, and 47 m. N by E of Inverness. Pop. in 1851, 2,588. The only establishments connected in any sense with manufacture, are an iron-foundry, a brewery, and mills respectively for grinding, sawing, carding, and dyeing. Some trade by sea is conducted in the import of coal and lime, and the export of fir-props for coal-pits; but, as T. enjoys no better facility

than a dry berth for vessels on the broad belt of sand between tide-marks, it very generally gives place to a land-communication with Cromarty and Invergordon. T. unites with Wick, Dingwall, Cromarty, Dornoch, and Kirkwall, in sending a member to parliament. Constituency in 1850, 86.

TAÏN, a canton, commune, and town of France, in the dep. of the Drome and arrond. of Valence. The cant. comprises 10 com. Pop. in 1831, 11,008; in 1846, 12,512. The town is 11 m. NNW of Valence, on the l. bank of the Rhône, opposite Tournon, with which it is connected by an iron suspension-bridge. Pop. in 1846, 2,541. It lies at the foot of Hermitage hill, so named from a hermitage on its summit, noted for the wines to which it gives its name, and for the finest granite in France. It has several silk-mills, and carries on an active trade also in wool and almonds. The plain between Tain and the Isere is noted for the victory of Q. Fabius over the Allobroges.

TAÏNIERES-SUR-HON, a commune of France, in the dep. of the Nord, cant. and 2 m. NE of Bavay. Pop. 1,296. It has a distillery of gin, a brewery, and a marble-work. In this com. is the hamlet of Malplacet, noted for the battle to which it gave its name, fought on the 11th Sept. 1709.

TAÏNTIGNIES, a department and commune of Belgium, in the prov. of Hainault and dep. of Tournai. Pop. 2,160.

TAÏNTREUX, a village of France, in the dep. of the Vosges, cant. and 4 m. SW of Diey, in a valley of the Vosges, near the r. bank of the Taintroné. Pop. 1,250.

TAÏNTRONÉ, a river of France, in the dep. of the Vosges, which has its source to the S of Taintreux; runs NNE, and after a course of 9 m. throws itself into the Meurthe, on the l. bank, $\frac{1}{2}$ m. below St. Diey.

TAÏPALE, a town of Russia in Europe, in Finland, in the gov. and 60 m. ESE of Kuopio, and district of Oefre-Karelen, on the S coast of a considerable lake.

TAÏPU, a village of Brazil, in the prov. of Parahiba, 8 m. E of Pilar. Pop. 1,200.—Also a headland of the island of Engua-Guaçu, which with Point-Manduba, to the S of the island of Guahibe, or Santo Amaro, forms the entrance to the bay of Santos. Its summit is in S lat. 24° 1' 11".

TAÏPU. See **TAÏPU**.

TAÏSERO, a town of Japan, in the island of Kiu-siu, and prov. of Tsikousen, 30 m. NE of Sanga. Pop. 2,500.

TAÏTZA. See **JAÏTZE**.

TAÏVERAM, a town of Hindostan, in the Carnatic, 117 m. N of Cape Comorin.

TAÏZE-AÏZIE, a village of France, in the dep. of the Charente, cant. and 3 m. NE of Ruffec, on the r. bank of the Charente, opposite the confluence of the Bioussac. Pop. 824. It has several iron-works.

TAÏACANTES, or **TAKANTER**, a Moorish tribe who inhabit the SW of the Sahara.

TAÏAHY, or **TAÏUCA**. See **ITAÏAHI**.

TAÏJARDI, a town of Turkey in Europe, in Rumelia, in the sanj. of Gallipoli, 13 m. NNW of Ghumurdjina, in a narrow valley, on the r. bank of the Karatch, at the confluence of the Sliho.

TAÏJO, or **TAYO**, a mountain of Brazil, on the confines of the provinces of São-Paulo and Santa Catharina, in S lat. 26° 50', and W long. 50° 10'. It gives rise to the Itajahi, and contains gold mines.

TAÏJO. See **TAGUS**.

TAÏJO, a river of the island of Luzon, in the Philippine archipelago, which runs from S to N, and after a course of about 180 m., throws itself into the ocean near New Segovia.

TAJOVE, a village of Hungary, in the comitat of Sohl, 5 m. W of Neusohl, at the foot of a mountain. It has a copper foundry.

TAJPUR, a town of Hindostan, in the prov. of Malwa, 8 m. from Oojein. Pop. in 1820, 2,500.

TAJUMULEV, a town of Guatemala, in the dep. of Gueztaltenango and Seconusco. Pop. 2,566.

TAJUNA, a river of Spain, which has its source in the mountains of Solorio, in the prov. of Guadala-jara; passes Brihuega, and Loranca-de-Tajuna; waters the SE part of the prov. of Madrid, and joins the Jarama, on the l. bank, at a point 21 m. SSE of the capital.

TAJURAH, or **TAJURRA**, a town on the Adel coast of Eastern Africa, in N lat. $11^{\circ} 46' 35''$, E long. $48^{\circ} 0' 20''$ [Harris], on the N shore of an extensive bay from 32 to 34 leagues long, and 6 or 7 wide. This bay, whose entrance is obstructed by an infinite number of small islands, is studded throughout its whole extent with reefs at 7, 5, and even 2 ft. only below the surface of the water, which causes it to be a very dangerous harbour; besides which, it is exposed to impetuous winds from W by S, and N by W. The islands of Mushakh in this bay have been acquired by the British government from the sultan of T. The NW end of the NE island is in N lat. $11^{\circ} 43'$, E long. $48^{\circ} 19'$. The town or village of T., at the bottom of the channel, consists of about 300 wretched wooden huts, and 2 mosques, with a pop. of nearly 1,500. The spot itself and its environs is a scene of aridity and desolation. It conducts some trade with Hodeidah, Mokha, and Aden, to which it sends wood, sheep, goats, and butter. From T. to the kingdom of Shoa is 129 leagues, which can be traversed only when the rains have filled the natural reservoirs met with on the road: at any other season the traveller runs the risk of dying of thirst. The vast desert which forms the country of Adel is an upheaved volcanic formation, rarely susceptible of cultivation, and still more rarely cultivated. It is traversed in all directions by chains of hills of moderate height, bearing the impress of subterranean fire. The quantity of lava met with is prodigious. About 21 leagues from T. there is a lake, which formerly was part of the bay of Tajurah, but which is now separated from it by a valley 4 leagues long and 9 leagues wide. The lava occurring here is of various character, and in some places is from 180 to 140 ft. thick. From T. to Shoa M. Rochet met with 23 thermal springs, whose temp. varied from 151.25° F. to the boiling point. In the interior of the country, to the distance of 50 leagues from the sea, there is a stratum of siliceo-calcareous clay, containing an immense quantity of fossil shells. From T. to the banks of the Hawash the desert surface of the country is wandered over by various animals, antelopes, gazelles, wild asses, ostriches, and pintadoes; but the animal met with in the greatest numbers is the spotted hyena. The vegetation is very limited; there are a few gum-bearing trees and aloes. The Dankali language is spoken at T.

TAK, a district of the Derajat, on the W side of the Indus; bounded by the Buttunni branch of the Suliman range on the N; Puharpur on the E; Kolachi on the S; and the Viziri and Shirani hills on the W. It is irrigated by the Zam and the Gomul. Its town and fort of the same name are 40 m. direct distance NW of Dera-Ismael-Khan. The fort is an immense pile about 250 yds. square, with walls 4 yds. thick, and a ditch 5 yds. broad. The town in 1847, contained about 300 Hindu and Mahomedan families, but was fast falling into decay. It is famed for its fruits. It yielded a revenue of 100,000 rupees to the Sikhs.—Also a town of Chinese Turkestan, in N lat. $36^{\circ} 48'$, and E long. $82^{\circ} 42'$, 3 m. E of

a small river which has its source in Mount Khera-Tak, 24 m. S of the town.

TAK (JEBEL), a mountain chain on the frontiers of Turkey in Asia, and Persia. It runs from NE to SW, between the pash. of Bagdad on the W, and the Persian prov. of Kurdistan on the E, and joins the Bisuton on the NE. This chain of mountains is crossed by a pass of the same name, said to have been used by the Romans. It is cut out of the solid rock, 12 ft. in breadth, and at the height of 20 ft. is surmounted by an arch. The entrance is ornamented with pilasters of architectural form.

TAKA, a district of Japan, in the island of Nifon, and prov. of Farima.—Also a district in the prov. of Simosa.—Also a town in the island of Sikokf, and prov. of Sanoki, on the Mi-tsou-sima-nada channel.

TAKA, a prov. of Nubia, to the E of the Tacazze, between 16° and 17° N lat. Near Soderab there is a narrow pass in the mountains whence in the rainy season issues a large volume of water, by which a considerable proportion of the prov. is regularly inundated to the depth of several feet. The soil is generally very fertile. It affords excellent dourra, and pastures large herds of cattle.

TAKABOKOUSIMA, or **POFENBERG**, an island of Nagasaki bay, in Japan, near the coast of the island of Kiu-siu.

TA-KAE-SINE-SHAN, a mountain of China, in the prov. of Sze-chuen, in N lat. $30^{\circ} 27'$, E long. $101^{\circ} 45'$. It is covered with perpetual snow.

TAKAGA-VOUOROUNG, a mountain in the E part of the island of Java. Its prolongation forms Cape Sedano, and presents a series of perpendicular pillars of basaltic breccia.

TAKAI-IZ, a district of Japan, in the island of Nifon and prov. of Yamatto.

TAKAKAKKAN, a small island of the Celebes sea, near the E coast of the island of Borneo, in N lat. $3^{\circ} 8'$, E long. $116^{\circ} 51'$.

TAKAKI, a district of Japan, in the island of Kiu-siu, and prov. of Satsoumi.

TAKAKIDA, a district of Japan, in the island of Nifon and prov. of Yetsisen.

TAKAKOU, a district of Japan, in the island of Kiu-siu and prov. of Fizen.

TAKAKOUSA, a town of Japan, in the island of Nifon and prov. of Inaba.

TAKALA, **TAKEL**, or **TAKLE**, a district of Nigritia, in Kordofan, 100 m. SSE of Obeit. It is inhabited by a tribe of Mahomedan Nubas, who have no form of government. Maize is its only production, and forms the chief sustenance of the inhabitants. They suffer much from the ravages of the agents of the king of Sennaar, by whom numbers are annually carried off into slavery.

TAKAMIYA, a town of Japan, in the island of Nifon and prov. of Aki.

TAKAMIYA, a district of Japan, in the island of Nifon and prov. of Aki.

TAKANO, a district of Japan, in the island of Nifon and prov. of Mouts.

TAKAREE, a pass of Beluchistan, across the mountains of the same name, in the Hala range, running from E to W, between Cutch-Gundava and Saravan.

TAKASANGO, a town of Japan, in the island of Nifon and prov. of Nizen, on a bay at the mouth of a river. Pop. 2,000.

TAKASSIMA, a district of Japan, in the island of Nifon and prov. of Omi.

TAKATA, a town of Japan, in the island of Nifon and prov. of Idsu.

TAKATTA, a district of Japan, in the island of Nifon and prov. of Aki.

TAKATU, a river of Guayana, which rises in N

lat. 1° 50', 19 m. W of Pirara; runs N between the Rio-Branco and the Rupununi; and joins the Mahu in N lat. 3° 35'. Its width a little above the point of junction is 192 yds. It abounds in kaimans.

TAKAY, a town of Japan, in the island of Nifon and prov. of Sinano.

TAKDE, a district of Nigritia, in Kordofan, about 90 m. S of Obeit. It is inhabited by a tribe of Mahomedan Nubas.

TAKEAH, a village of Bhawlpur, on the l. bank of the Ghera, 45 m. NE of Bhawlpur.

TA-KEANG, a river of China, in the prov. of Kwang-tung and island of Hai-nan. It has its source in a mountain named Wei-chi-shan; runs N till it reaches a mountain named Na-Khian-ling, to the SE of which it divides into two arms, of which that to the r. bears the name of Gung-kao-keang; runs N, and falls into the bay of Thun-tsu-keang. The other, retaining the name of Ta-keang, takes a W course; forms two islands; passes to the N of Tan-chu, and throws itself into the bay of Gang-fu-keang.

TA-KEANG, or **HUNG-SHUI-KEANG**, a river of China, which has its source in the E part of the prov. of Yun-nan; traverses that of Kwang-se, and in the dep. of Wei-chu, at the junction of the Kwei-keang takes the name of Se-keang. A little below it enters the prov. of Kwang-tung; flows to the W of Canton; and after a course of upwards of 600 m., joins the Pe-keang to form the Chu-keang. Its principal affluents are the Nyo-yu-keang and Keen-keang on the r.; and on the l. the Lieu-keang and Kwei-keang.

TAKEEA, a village of Afghanistan, 30 m. NE of Ghuzni.

TAKEL. See **TAKALA**.

TAKELEY, a parish in Essex, 14 m. NW of Chelmsford. Area 3,154 acres. Pop. in 1851, 991.

TAKENO, a district of Japan, in the island of Kiu-siu and prov. of Tsikougo.

TAKERN, a lake of Sweden, in the prefecture of Linköping, communicating by a river with Lake Wetter.

TAKEYSON, a town of Caffraria, in the Betjuanas territory, on an affluent of the Gariep.

TAKHTALU-DAGH, a mountain of Turkey in Asia, in the S part of Anatolia, on the confines of the sanj. of Meis and Teke-eli, near the W coast of the gulf of Satalieh, and to the SW of Ighidier. Its naked summit rises to the height of 7,700 Parisian ft. above sea-level. The base, consisting of fragile rock, is broken with deep and irregular ravines.

TAKHT-I-SULIMAN, a summit of the Suliman range, in Afghanistan, in N lat. 31° 35', rising to an alt. of 12,000 ft. above sea-level.

TAKHT-I-SULIMAN, an elevated mountain of Persia, in N lat. 36° 30', E long. 47° 10'. Its summit is crowned by a grey hoary mass of crumbling walls and buildings, which Major Rawlinson is inclined to identify with the *Ecbatana* of Herodotus, the capital of *Media Atropatene*, the *Gaza* of some later geographers. The hill appears at first as if it were isolated, but this is not strictly the case. The brow of the hill is crowned by a wall, the most perfect part of which is along the S face, and the most ruinous upon the W. There are the remains of 37 bastions, and the circuit of the wall, measured from point to point of these bastions, is 1,330 paces, or a little more than $\frac{1}{2}$ m. At a few points only is the line of wall perfect; but where it is, the masonry is shown to be most excellent. Above the gateway, and extending from one bastion to the other, are a line of blocks, each carved with a rude representation of an arch, which thus form a sort of ornamen-

tal frieze to the portal, and offer the only specimen of ancient sculpture to be found upon the walls. Passing through the gateway, Major Rawlinson says, "I found myself within the precincts of the deserted city; the first object that attracted my attention was the lake. I found this to be an expanse of water on the highest point of the hill, irregularly shaped, and about 300 paces in circuit; the rocky banks that surround it are formed of a deposit of carbonate of lime, of which the water holds vast quantities in solution, and there can be no doubt but that they are daily narrowing as the calcareous deposit continues; a very short distance from the surface they recede inwards, thus forming a huge incurvated basin for the lake. Sir R. K. Porter states his belief, that the hill has been formed entirely by deposition from the water, and this, in very remote antiquity, would seem to have been the case, for the depth of the water, recently determined by repeated experiments of the Afshar chief at 47 Persian yards, agrees, as near as possible, with the height of the hill, ascertained by myself."

TAKHT-SULIMAN, or **OCH**, a town of Independent Tartary, in the khanate and 195 m. ESE of Kokan. It is governed by a hakim, is well peopled, and is supplied with good water. This town is noted for the tomb of Azef-Barkhia, vizier of Suliman. It is of great dimensions. The throne of Suliman, a low hill to the W, which gives name to the place, is surmounted by a building with a dome. Large numbers of pilgrims from the surrounding districts resort hither in the spring to visit this tomb and bring with them various kinds of merchandise for sale and barter. In the hot season the town is much infested with mosquitoes.

TAKI, a district of Japan, in the island of Nifon and prov. of Mino.—Also a district in the prov. of Tango.

TAKIAN, a village of Turkey in Asia, in the sanj. of Bija, on the coast opposite the island of Tenedos. In its vicinity are the ruins of *Alexandria Troas*, the modern Eski-Stambul.

TAKIMA, a kingdom of Upper Guinea, on the Gold coast, tributary to the state of Ashanti, by which it is bounded on the S. The capital, which bears the same name, is 102 m. N of Kumassi.

TAKINOS, a lake of Turkey in Europe, in Rumelia, in the beglik and 6 m. S of Seres, and 3 m. from the gulf of Orphano. It forms an irregular oval, and is 18 m. from NW to SE, and 5 m. in extreme breadth. It receives several rivers, amongst others the Kara-su, which enters at the NW extremity, and issues on the SE to throw itself into the sea. Except on the N and NE, in which direction it extends into the great marshy plain of Seres, it is bordered on all sides by mountains. On the W bank is a small village of the same name, inhabited entirely by Greeks.

TAKIPUR, a village of Kashmir, 20 m. N of Sopur, on the road thence to Solab. It has a thermal spring.

TAKKAL, a village of Afghanistan, in the district and 6 m. W of Peshawur, on the road through the Khyber pass.

TAK-KUM-TA, a halting-place in Abyssinia, on the confines of the kingdom of Tigre, and of the gov. of Coast districts, and at the foot of Mount Taranta. It is one of the most picturesque localities in the country, and abounds with water.

TAKLI (Cape), a headland of Russia in Europe, in the Crimea, in the district of Kerch, and at the W side of the entrance to the strait of that name, in N lat. 45° 6' 22", E long. 36° 27' 29", 4 m. NE of Cape Opuk. It has a light-house. About $\frac{1}{2}$ m. WNW is a village named Takel.

TAKRURI, a town of Nubia, about 18 m. from the l. bank of the Tacazzé.

TAK-RUSTAN, or **TAK-KHOSRU**, a mountain of Persia, in Kurdistan, to the E of Kermanshah. It rises precipitously to a considerable height, and exhibits numerous sculptures in bas relief, and several excavations which appear to have been the ancient sepulchres of Persian kings and heroes. In the latter, which are difficult of access, urns and antique sarcophagi have been found. The mountain derives its name from Rostan or Rustan, the *Hercules* of the Orientals.

TA-KUNG-TING, a district and town of China, in the prov. of Kwei-chu and div. of Chin-yuen-fu.

TA-KWAN-TING, a district and town of China, in the prov. of Yun-nan and div. of Tung-chuen-fu.

TAL, a river of Afghanistan, which has its source in the Laspissor mountains; flows SW; and after a course of about 120 m., joins the Panjkore or Lundye. On its l. bank, 25 m. NNE of Panjkore, is a village of the same name.

TALA, a town of India beyond the Ganges, in the prov. and 45 m. SE of Aracan, near the gulf of Bengal.

TALA, a lake of New South Wales, in the district of Murrumbidgee, and near the river of that name.

TALABO, a headland of the island of Celebes, on the E coast, in 8 lat. 0° 15', E long. 123° 57'.

TALABOR, or **TEREBLA**, a river of Hungary, in the comitat of Marmaros, formed by the junction of the Raditna and Ozorna-Reka, which descend from the S side of the Carpathian chain. It runs first WSW, then SE, and afterwards in a generally SSW direction; divides into two branches, distinguished as Kis-Talabor and Nagy-Talabor; and after a total course of about 45 m., joins the Theiss on the r. bank, a little to the WNW of Tecso.

TALACH-DDU, a parish in Breconshire, 4 m. NE of Brecon. Area 1,818 acres. Pop. 187.

TALACRE, a small port in the p. of Llanasaph, co. Flint, within 1 m. of the point of Ayr, at the mouth of the estuary of the Dee.

TALAFRU, a village of the Punjab, on the road from Doda to Chumba.

TALAGIR, a small island of the Philippine archipelago, 27 m. W of Samar.

TALAHIGUA, a town of New Granada, in the dep. of the Magdalena, prov. and 27 m. NNW of Mompox, on the l. bank of the Magdalena, a little above the embouchure of the Cauca.

TALAI-HYI, a town of Mongolia, in N lat. 44° 19' 12", E long. 121° 15' 40'.

TALAIN-PYI. See **TALONG**.

TALAK, a town of India beyond the Ganges, in the prov. and 70 m. SSE of Aracan, on a small river of the same name. It consisted in 1827 of about 100 huts, occupied chiefly by Burmese, who carried on an active trade in cotton, yarn, khut, silk fabrics, bees-wax, and ivory, which they bartered for British piece-goods, tobacco, betel-nuts, guapee, and bala-chang.—About 4 m. NE of this town is Phoongee-Dong, a lofty mountain summit, over which the pass runs by which the Burmese army invaded Aracan in 1825. The surrounding country is unhealthy but fertile. It abounds with elephants, and produces tobacco, cotton, ginger, and pepper in great abundance.

TALALHO-KARA-PALGASIN, a town of the Chinese empire, in the Khalkas country, in N lat. 47° 32' 24", and E long. 106° 6'.

TA-LA-MA, or **TARAMA**, an island of the Eastern sea, in the Majicosima group, to the NE of the island of Formosa.

TALAMAN, or **DALAMON**, a village of Asia Minor, 10 m. N of Cape Artemisium, about 4 m. E of a

river of the same name, which Mr. Hoskyn supposes may be the ancient *Indus*.

TALAMANCA, a town of Spain, in the prov. and 30 m. NNE of Madrid, and partido of Colmenar-Viejo, in a flat district, near the l. bank of the Jarama. Pop. 490. It is enclosed by old walls.

TALAMONA, a village of Austria, in Lombardy, in the prov. of the Valteline, district and 1 m. E of Morbegno, near the l. bank of the Adda. Pop. 2,657.

TALAMONE, a town of Tuscany, in the prov. of Sienna, podesteria and 9 m. NNW of Orbitello, on the Tyrrhenian sea.

TALANCE, a village of France, in the dep. of the Gironde, cant. and 2 m. SSW of Bordeaux. Pop. 1,489.

TALANDA, **TALANTI**, or **ATALANTI** (STRAIT OF), an arm of the Grecian Archipelago, extending between the dioceses of Locri and Thebes, in the NE part of Livadia and the island of Euboea. On the NW it forms the gulf of Zeitoun, and opens thence by the channel of Trikeri into the Archipelago. On the SE it is connected by the strait of Egrippo with the gulf of Negropont. Its total length from NW to SE is about 48 m.; in breadth it varies from 8 to 15 m. On the W side are several considerable bays, the principal of which bears the same name. The banks are bordered with lofty hills, from which numerous torrents descend to the channel. This channel is the *Euripus* of the ancients. In the NW part of the gulf of T. is a small island of the same name.

TALANDA, a town in the diocese of Locri, 18 m. NNE of Livadia, on the N of Mount Talanda or Klomo, and 4 m. from the shore of the gulf of the same name. Pop. 1,000. It is defended on the S by a castle, and has considerable trade. This town is the *Opus* of the ancients.

TALANGE, a village of France, in the dep. of the Moselle, cant. and 8 m. N of Metz, near the l. bank of the Moselle. Pop. 534. It has manufactures of beet-root sugar.

TAL-ANG-TING, a district and town of China, in the prov. of Yun-nan and div. of Tsinunh-fu.

TALANT, a village of France, in the dep. of the Cote-d'Or, cant. and 1½ m. WNW of Dijon, on the summit of a mountain. Pop. 580. This place was formerly a town, the mayor of which had the right of entrance to the states of Burgundy. It had a fortress belonging to the dukes of B., in which the Duke de Bar was held prisoner in 1431, and which was demolished by Henry IV.

TALARN, a town of Spain, in the prov. and 45 m. NNE of Lerida, and partido of Tremp, on the r. bank of the Noguera-Pallaresa. Pop. 1,450. It is the residence of a civil and military governor, and has a convent and an hospital. It has manufactures of woollen fabrics, and carries on an active trade in butter, cheese, and meat.

TALARUBIAS, a town of Spain, in the prov. and 66 m. E of Badajoz, and partido of Herrera-del-Duque, in a fertile plain, near the l. bank of the Guadiana. Pop. 2,690. It has several churches and convents, an hospital, a custom-house, and a tannery. It has extensive manufactures of woollen fabrics.

TALAS, a river of Independent Tartary, in the khanat of Kokan, which has its sources in the Alatau mountains; runs WNW, and after a course of 300 m. falls into Lake Sikirlik. On the N its bed is separated from that of the Tehui or Tzui, by the Archatou or Kubakai mountains.

TALASANI, a town of Corsica, in the cant. of Tavagna, 23 m. S of Bastia. Pop. 453.

TALAVAN, a town of Spain, in the prov. and 21 m. NNE of Caoceres, and partido of Garrovillas, on

an inclined plain, $1\frac{1}{2}$ m. from the l. bank of the Tago. Pop. 1,160. It has a parish-church, a custom-house, and several convents.

TALAVERA-DE-LA-REINA, an ancient town of Spain, in the prov. of Toledo, 63 m. WSW of Madrid, on the r. bank of the Tagus, over which there is here a fine but dilapidated bridge of 35 arches, 1200 ft. in length. It stands in a fertile plain of vast extent, intersected by the river. Part of the old ramparts are still in preservation, but the town is, in a military sense, altogether an open place. It contains several well-built churches, in particular that of the Hieronymites; has two public walks, one on the N, the other on the S of the town; but nothing can be poorer than the general appearance of the place. The dwelling-houses are seldom more than one story in height; the streets are badly paved, and crossed by a number of narrow lanes; the pavement is wretched, and the whole place is full of pools after a heavy fall of rain. Its pop., including that of the suburbs, is about 6,400; and it is the seat of several provincial bureaux, has four hospitals, a classical and a theological school. Silk manufactures, established about the year 1748, are still carried on in the town, and in the neighbouring village of Cervera, as well as manufactures of soap, hats, and earthen-ware.—T. is a place of great antiquity, and contains many Roman monuments. It is the *Talabriga* of ancient times; but some identify it with the ancient *Ebora*, *Libora*, or *Elbora*. It received the adjunct of La-Reina from having been bestowed by Alonzo XI. on his queen, Dona Maria. It fell into the hands of the Moors in 714, continued long in their possession, and when the Christians succeeded in re-occupying the inland provinces, was repeatedly taken and retaken. In the beginning of the 12th cent., it was sacked by the Moors, and its walls demolished. This place has given birth to several men of eminence, of whom the best known is Mariana the historian. In the present age it is memorable for a battle fought on 27th and 28th July 1809, between a French army, amounting to 34,000 men, under Victor, Jourdan, and Joseph, and an allied force, in which there were 16,000 British, and between 30,000 and 40,000 Spaniards. The French, after making several desperate attacks on the British position, were repulsed, with the loss of 20 cannon and 10,000 men.

TALAVERA-LA-REAL, a town of Spain, in the prov. and partido of 9 m. ESE of Badajoz, on the l. bank of the Guadiana. Pop. 2,820. It is tolerably well-built, and has a convent, an hospital, and manufactories of silk, cord, and leather.

TALAVERA-LA-VIEGA, a town of Spain, in the prov. and 51 m. NE of Cáceres, and partido of Navalmoral-de-la-Mata, on the l. bank of the Tagus, in a fertile locality. Pop. 450. This town is supposed by some to mark the site of the *Elvora* or *Eura* of the ancients. It contains the ruins of two temples, and some other fine monuments of antiquity.

TALAVO, a canton of Corsica, at the SE extremity of the arrond. of Ajaccio. Pop. 4,335. Zicavo is its chief place.

TALAWAH, a mountain of New South Wales, in the county of Gloucester, to the N of the Wolamba river.

TALAYUELA, a town of Spain, in the prov. and 48 m. NE of Cáceres, and partido of Navalmoral-de-la-Mata. Pop. 290.

TALBAILLA, a town of Spain, in the prov. and 29 m. WNW of Ivria, and partido of Burgo-de-Osma, in the midst of pine-forests. Pop. 226.

TALENNY, a parish in the co. of Pembroke, 7 m. WSW of Haverford-West. Area 1,425 acres. Pop. in 1801, 145; in 1831, 222; in 1851, 235.

TALBERT (POINTE DE), a cape on the coast of Brittany, in the English channel, in N lat. $48^{\circ} 52'$.

TALBERT'S ISLAND, a small island in the Atlantic, on the coast of Georgia, U. S., in N lat. $30^{\circ} 44'$.

TALBINGO, a mountain of New South Wales, in the district of Murrumbidgee, on the E bank of the Dumot.

TALBOLTON, a village of Talbot co., in the state of Georgia, U. S., 73 m. WSW of Milledgeville. Pop. in 1840, 800; in 1850, 600.

TALBOT, a river of Western Australia, in the co. of Gork, which flows SE, and joins the Dale river, on the l. bank.—Also a mountain of Australia, in the district of Wimmera, between the river of that name and the Glenelg.

TALBOT, a county in the W part of the state of Georgia, U. S., comprising an area of 457 sq. m., drained by branches of Flint river, by which it is bounded on the E and NE. The surface is hilly, but the soil is fertile, and is well adapted to the culture of cotton. It is intersected by the Muscogee railway. Pop. in 1840, 15,627. Its capital is Talbottan.—Also a county in the NE part of the state of Maryland, comprising an area of 336 sq. m., drained by several affluents of Choptank river, by which it is bounded on the E, and of Chesapeake bay. On the NW it is bounded by the Wye. Pop. in 1840, 12,090; in 1850, 13,811. Its capital is Easton.

TALBOT DISTRICT, a large district of Upper Canada, bounded by the Niagara and Gore districts on the NE, and Lake Erie on the S, and watered by Big-creek and Otter-creek. Its cap. is Simcoe.

TALBRAGAR, or **POOLABATTA**, a river of New South Wales, which has its source in the co. of Bligh, near Turee; flows along the confines of the county of Bligh, and after receiving the Cooluburragundy, joins the Erskine, an affluent of the Macquarie.

TALCA, or **St. AUGUSTINE**, a town of Chili, in the prov. of Maule, of which it is the cap., in S lat. $35^{\circ} 13'$, on the r. bank of the Maule, 193 m. NNE of La Concepcion. Its pop. is considerable, owing to the mines of gold in the adjacent mountains, and to the low price of provisions. It contains a parish-church, two monasteries, and a college built by the Jesuits. To the NE of this place is a small hill consisting almost entirely of amethysts; and in its vicinity is another hill which furnishes a species of cement known by the name of Talca sand.

TALCAGUANA (PUSTA), a projection of land on the coast of Chili, which bounds the bay of Concepcion towards the W.

TALCAGUANO, or **TALCAHUANO**, a port of Chili, within the bay of La Concepcion, in S lat. $36^{\circ} 42'$, W long. $73^{\circ} 10'$. It is much frequented by small vessels, being completely sheltered from the N winds. A steamer has recently been built in the harbour of T., and finished these three months, destined for the navigation of the Itata. All the agricultural product of Maule, Nuble, and even of Concepcion, will be brought by this steamer to T. at a saving of 300 per cent. upon the present transportation. Large quantities of grain, which now remain in the interior of the country for want of means of transportation, will be brought to the mills at a price not exceeding $12\frac{1}{2}$ cents per fanega, or a little less than 6 cents per bushel.

TALCAN, a town of Independent Tartary, 100 m. SE of Termed.

TA-LE-FU, a division and town of China, in the prov. of Yun-nan. The div. comprises 7 districts. The town is 171 m. WNW of Yun-nan-fu, on the W bank of Lake Shang-koen, in N lat. $25^{\circ} 44' 24''$, E long. $100^{\circ} 21' 50''$. It is large and populous, and is

noted for its manufacture of ornaments of the fine jasper marble, with which the adjacent mountains abound.

TALGARTH, a parish and village in co. Brecon, 8 m. NE by E of Brecknock. The p. includes the hamlets of Forest, Groyne-Vawr, Groyne-Vechan, Pwll-y-Wrach, and Trevecca. Area 16,900 acres. Pop. in 1831, 1,473; in 1851, 1,325.

TALGAU, or **THALGAU**, a town of the archd. of Austria, 9 m. E of Salzburg, on the l. bank of the Fuschl. Pop. 2,000.

TALIANGIERI (CAPE), a headland on the coast of the Black sea, in N lat. 41° 33'.

TALISCAYAN, a settlement of Mexico, in the prov. of Vera-Cruz, 24 m. S of Vera-Cruz.

TALISHIN, a khanate of Asiatic Russia, in the prov. of Shirvan. Its chief place is Astara. It produces silk, cotton, rice, tobacco, and wine.

TALIDJ MOUNTAINS, a chain in Asiatic Russia, in the prov. of Shirvan, which runs NW and SE, and is connected with the Elburz.

TALISSE, a small island in the Eastern seas, near the N coast of the island of Celebes, in N lat. 1° 40'.

TALKAN, a village of Persia, in the prov. of Irak, 30 m. E of Sultaniyeh.

TALKHAN. See **TALCAN**.

TALK-O'-TH'-HILL, a chapelry in Audley p., co. of Stafford, 5 m. NNW of Newcastle-under-Lyne. Pop. in 1831, 1,196; in 1851, 1,979.

TALKIN, a township in Hayton p., Cumberland, 11 m. E by N of Carlisle. Pop. in 1831, 376; in 1851, 311. There are several collieries here, and quarries of slate and free-stone on the river Gelt.

TALLA, a village of Tuscany, in the prov. of Florence, 7 m. SSE of Poppi.

TALLAGHT, a parish in co. Dublin, containing the villages of Greenhills and T. Area 21,868 acres. Pop. in 1831, 4,646; in 1841, 4,921. It is watered along the E side by the rivulet Dodder. The principal summits, together with their respective alts. above sea-level, are Kippure, 2,475 ft.; Slieve-Bane, 2,128 ft.; Mount-Seakin, 1,049 ft.; Killakee-hill, 1,271 ft.; and the hill of Tallaght, 1,263 ft.

TALLAND, a parish in Cornwall, on the English channel, 2 m. SW by W of East Looe. Area 2,665 acres. Pop. in 1831, 1,434; in 1851, 1,605.

TALLANSTOWN, a parish in co. Louth, 2 m. S of Louth. Area 3,210 acres. Pop. in 1841, 933.

TALLANTINE, a hamlet of Cumberland, 3 m. NNW of Cocker-mouth.

TALLARD, a canton, commune, and town of France, in the dep. of the Hautes-Alpes. The cant. comprises 9 com. Pop. in 1831, 4,899; in 1846, 4,812. The town is on the r. bank of the Durance, 7 m. S of Gap. Pop. 1,140.

TALLAPOOSA, or **OAKFUSKEE**, a river of the United States, which rises in Georgia; enters Alabama; flows SW, and unites with the Coosa 3 m. SW of Fort-Jackson, to form the Alabama. It is navigable, except in dry seasons, to the great falls, about 85 m.

TALLATON, a parish in Devon, 3½ m. NW by N of Ottery. Area 2,365 acres. Pop. in 1851, 443.

TALLEGHANY, a town of New South Wales, in the co. of Gloucester, on the banks of the Karuah.

TALLENIRE, a township in Bride-Kirk p., Cumberland, 3 m. NW by N of Cocker-mouth. Area 1,913 acres. Pop. in 1831, 237; in 1851, 250.

TALLERATH, **TELLEBOUGHT**, or **TULLYRATH**, a parish of co. Wexford, 3½ m. SSE of New Ross. Area 1,653 acres. Pop. in 1831, 468; in 1841, 381.

TALLEY (LOWER and UPPER), a parish in Carmarthenshire, 7 m. N of Llandilo-Fawr. Area 7,167 acres. Pop. in 1831, 1,068; in 1851, 1,005.

TALLEYRAND-BAY, a bay of Australia Felix, to the SW of Port Philip, between Capes Petton and Albany-Otway.

TALLIKO, a town of Senegambia, in the kingdom of Futatoro, and 81 m. SE of Bedo.

TALLINGTON, a parish in Lincolnshire, 3 m. WSW of Market-Deeping, on the N bank of the Welland. Area 690 acres. Pop. in 1851, 267.

TALLMADGE, a township of Ottawa co., in the state of Michigan, U. S., on Grand river, 64 m. W by N of Lansing. Pop. in 1840, 189; in 1850, 534. —Also a township of Summit co., in the state of Ohio, 109 m. NE of Columbus, intersected by the Akron branch railroad and the Pennsylvania and Ohio canal. Pop. in 1840, 2,184; in 1850, 2,456.

TALLOIRES, a town of Sardinia, in the div. of Savoy, prov. of Genevois, mand. and 6 m. SE of Annecy, finely situated on the E bank of the lake of Annecy. Pop. 1,115. A noble convent, an hospital, and an infirmary were founded here in 1020, by Rodolph I., king of Burgundy.

TALLOW, a parish, containing a town of the same name, in co. Waterford. Area 5,026 acres. Pop. in 1831, 4,716; in 1841, 4,867. —The town, formerly a parliamentary borough, stands on the r. bank of the river Bride, 4½ m. SW by S of Lismore. The Bride is navigable to the vicinity for barges of 40 tons. Pop. in 1831, 2,998; in 1841, 2,969.

TALLOW-BRIDGE, a village in the p. of Lismore and Mocollop, co. Waterford, on the l. bank of the river Bride, a ½ m. NNE of Tallow.

TALLU, a town of the island of Celebes, in the kingdom and 21 m. from Macassar. The inhabitants manufacture cotton fabrics, white and coloured, which the Dutch export to the Molucca and Philippine islands and to the coasts of India. Fabrics of raw silk, in imitation of those of China, are also manufactured here. —Also a port of the Society islands, on the N coast of the island of Eimeo, in S lat. 17° 30', and W long. 150°. It is 3 m. in length, and 2 m. in breadth, and has a considerable depth of water, but a reef at the entrance renders it difficult of ingress.

TALLULAH, a river of the state of Georgia, U. S., which has its source in Rabun co., in the NE corner of the state; flows SE, and joins the Chatuga, one of the two head-streams of the Savannah.

TALLUYERS, a village of France, in the dep. of the Rhône, cant. and 3 m. NE of Mornant. Pop. 558.

TALLVIG, a village of Norway, in the diocese of Nordland, in Finmark, on the Alten-fjord, 54 m. SSW of Hammerfest.

TALL-WATER, a rivulet of co. Armagh, which rises near Hamilton's-Bawn; and flows N and W to the river Callan, a short distance above its confluence with the Blackwater. Its course is about 9 m.

TALLYA, a town of Hungary, in the comitat and 82 m. SW of Zemplin, at the foot of the Sátor, near the l. bank of the Kacsonta. Pop. 3,700. It has a castle, and two churches, a Catholic and a Reformed. It is noted for its wine.

TALMAS, a commune of France, in the dep. of the Somme, cant. and 10 m. ESE of Domart. Pop. in 1841, 1,912. The houses consist of only a single story, are ill-built, and covered with thatch.

TALMAY, a commune and town of France, in the dep. of the Côte-d'Or, cant. and 4 m. NNE of Pontacillier, on the Vingeanne. Pop. 1,230.

TALMONT, a canton, commune, and town of France, in the dep. of the Vendée, and arrond. Les Sables. The cant. comprises 9 com. Pop. in 1831, 9,498; in 1846, 10,750. The town is 9 m. ESE of Les Sables-d'Olonne, on a hill, near the Guy-Chatenay. Pop. in 1846, 3,863. It is small and ill-

built. In the environs are several salt marshes. A benedictine abbey was founded here by William-the-Bald in 1046.—Also a town in the dep. of the Charente-Inferieure, cant. and 5 m. SW of Coxe, in a peninsula, on the r. bank of the Gironde. Pop. 500. It has a small port, and carries on an active trade in wine. This town was formerly fortified and defended by a citadel flanked with towers, the ruins of which still exist.

TALNERE, a fortress of Hindostan, in the prov. of Candeish, on the r. bank of the Tapti, 90 m. W of Burhanpur. This place was the ancient capital of the sultans of the dynasty of Adil Shah. At the dissolution of the Mogul empire it fell into the hands of the Maharattas, and was ceded by the Holcar family to the British.

TALOKOVI-GORY, a range of mountains in Russia in Asia, in the gov. of Irkutsk and district of Kirensk.

TALONG, **TALAIN-PYR**, or **PEGU-PROPER**, one of the three provinces of the kingdom of Pegu, in the Burman empire, of which it forms the NE part. Its capital is Pegu. See article Pegu.

TALOOLY, a town of New South Wales, in the co. of Bligh, on Bylong creek.

TALORO, a river of Sardinia, in the div. of Cape Cagliari, formed in the prov. of Nuoro by several streams, amongst which is the Gavoi, which descends from the NW side of the mountains of Corno-di-Bue. It directs its course first SE, then W; receives on the l. the Pietre-fitte and the Tiana; enters the prov. of Busachi; waters the plain of Ottana; and, after a course of about 29 m., throws itself into the Oristano, on the l. bank, opposite Sedilo, and 10 m. NNE of Busachi.

TALOUÏ, a town of Russia in Europe, in the gov. of Voronetz, district and 24 m. WSW of Bogutshar, on a river of that name.

TALOVSKAIA, a town of Russia in Asia, in the gov. of Orenburg, district and 120 m. ENE of Tobeliabinsk, in the vicinity of several small lakes.

TALSEN, a town of Russia in Europe, in the gov. of Kourland, 32 m. NW of Toukoun.

TALT (*Lough*), a lake in the p. of Kilmacteigue, co. Sligo, among the Ox mountains, 6½ m. WNW of Tobbercurry. It extends a little upwards of 1 m. SE, and has a mean breadth of about 3 furl. Its surface elevation above sea-level is 455 ft.

TALVENDE-LE-GRAND, a commune of France, in the dep. of the Calvados, cant. and 2 m. W of Vire. Pop. in 1846, 3,284.

TALVENDE-LE-PETIT, or **St. GERMAIN-DE-TALUANDE**, a village of France, in the dep. of the Calvados, cant. and 3 m. S of Vire, on a plateau. Pop. 3,152.

TALYLLYNN, a parish in Merionethshire, 6 m. S by W of Dolgelly. Area 15,182 acres. Pop. in 1831, 767; in 1851, 1,123. The steep cliffs of Cader-Idris add much to the surrounding scenery.

TALYRANG-PEAK, a summit of New South Wales, in the co. of Murray, in the Gurock range.

TALYSCH. See **TALISHIN**.

TAM (*El*), a town of Sistan, on the Helmund, 25 m. E of Zareng.

TAMA, a small river of Brazil, in the prov. of Para, which runs NNW, and enters the arm of the Amazon which forms the island of Marayo.

TAMA, a central county of Iowa, U. S., intersected by the Iowa river. Area 720 sq. m. Pop. in 1850, 8.

TAMAGA, or **TAMEGA**, a river of Spain, which rises in the Sierra-de-San-Mamed, in the prov. and 25 m. SE of Orense; flows S through the valley of Laza, and then SSW; enters Portugal, and joins the Douro, on the r. bank, 12 m. SSW of Amarante,

after a course of 110 m., of which about one-third is in Spain.

TAMAHU, a small island in the Eastern seas, near the W coast of Borneo, in N lat. 0° 7'.

TAMALAMEQUE, a town of New Grenada, in the prov. of Santa-Marta, situated on the r. bank of the Magdalena, 158 m. S of Santa-Marta.

TAMAMES, a town of Spain, in the prov. and 32 m. SSW of Salamanca. Pop. 780. There are mineral springs in the vicinity.

TAMAN, an island of European Russia, in the gov. of Taurida, formed by the straits of Kerch, separating it from the E extremity of the Crimea, the sea of Azof on the N, and the Black sea on the S. On the E it is connected with the Caucasian provinces by a narrow strip of land, but the large lagoons of Ak-tanes and Kuban nearly complete its isolation by water on that side also. It is of very irregular form, being deeply indented on the W side by Taman bay; and on the E by the two lagoons and their offsets. Its extreme N point, Cape Kamennoi, is in N lat. 45° 26', E long. 36° 54'. Its S point, Point Kishla, is in N lat. 45° 8', E long. 36° 48'. Its extreme length from Peresip, on the NE, to Panagia, on the SW, is 30 m. Measured along the parallel of Cape Kamennoi it is 22 m. in length. Part of it lies low, but it contains also a number of small hills from which volcanic eruptions occasionally take place. In 1853, M. Begitschef, a Russian *avout*, while crossing over the strait of T. from Kerch, early in the morning of the 6th of August, saw a flame accompanied by a thick vapour rising from the summit of the mountain of Korabetoff, situated about 8 m. from the town of T. In a few minutes the column of fire and smoke had reached a great height, and remained in that state for five or six minutes. Two other eruptions followed at short intervals, but with less violence than the first. This volcano had remained tranquil for at least 35 years. Immediately on landing, M. Begitschef proceeded towards the mountain, which he reached at 10 o'clock. At about 700 yds. from the foot of it, he found a mass of black mud spread on the ground to a considerable depth, which had been thrown out by the eruption. The crater made a whistling noise, similar to that made by an engine when letting off its steam. The ground was cracked in different directions, and round the fissures the grass appeared perfectly calcined, and in several parts had caught fire. The eruptions lasted altogether about three hours. Wood is scarce, but pasturage is abundant throughout the island. The inhabitants were formerly Crim-Tartars, but in 1798 a Cossack tribe settled here, and continue to occupy the island. Before the Russians took possession of it, it was called **ZMUTANAKAN**. It is now frequently called **FANAGORIA**, from its chief town, or fortress rather, which is situated on the S coast of Taman bay, 1 m. E of the village of Taman.

TAMANDALAHÏ, a river of Brasil, in the prov. of São-Paulo, which flows near the capital, and with the Hinhangabahu, throws itself into the Rio-Tiete.

TAMANDARÉ, a river of Brasil, in the prov. of Pernambuco, which, after a short course ESE, throws itself into the Atlantic, 80 m. SSW of Cape Augustine, by an embouchure which forms one of the best harbours on the coast. It has a depth at the entrance of from 4 to 5 fath. to 18 fath. It is defended by a fort.

TAMANDUA, a town of Brasil, in the prov. of Minas-Geraes, and comarca of Rio-Grande, 90 m. WNW of Villa-Rica, at the foot of the Sierra-Nigra, between two of the head-streams of the Lambari. It has a church and three chapels. The dis-

trict comprises three parishes. Pop. 8,000. Agriculture and mining form the chief objects of local industry.

TAMAR, a river of England, which rises in the NW part of Devonshire, on the borders of Cornwall, about 8 m. from the sea; and on being joined by the Tavy, and passing near Saltash, forms the noble harbour of Hamoaze, below Plymouth, falling into the sea at Mount-Edgcombe.

TAMAQUE, a village of Schuylkill co., in Pennsylvania, U. S., 79 m. NE of Harrisburg. Pop. in 1840, 465; in 1850, 600. It is situated in a wild mountainous district, rich in anthracite coal.

TAMAR, a river of Van Diemen's Land, formed by the union of the North and South Esk, at Launceston, about 30 m. above Port Dalrymple, into which the united stream flows through a deep and narrow valley. It has more the appearance of a chain of lakes, than of a regularly formed river; and such, according to Flinders, it probably was, until, by long undermining, a passage was forced out to the sea.

TAMAR (Cape), the NW point of a large bay and harbour on the N shore of the straits of Magalhães, in 8 lat. 52° 51'. The SE point of this bay is Cape Providence.

TAMARA, a village of Morocco, on the coast of the Atlantic, 30 m. W of Tarodant.

TAMARA, or **TAMARIDA**, a port on the NE part of the island of Socotra, in the Indian ocean.

TAMARA, a settlement of New Granada, in the prov. of San-Juan-de-los-Llanos, at the foot of the mountains of Bogota, 126 m. NE of Santa-Fe, on a small affluent of the Meta.

TAMARA, a town of Spain, in the prov. and 15 m. NNE of Palencia.

TAMARACA. See **ITAMARACA**.

TAMARARE, or **TAMARR**, a tribe of Indians of Brazil, who inhabit the strait between the São-Simão and Jamari rivers, affluents of the Guapore, in the prov. of Mato-Grosso. Fishing and the chase form their chief means of subsistence.

TAMAREVA, a village of St. Clair co., in Illinois, U. S., 114 m. S by W of Springfield, on the Kaskaskia.

TAMARITE, a town of Spain, 20 m. ESE of Balbastro, in the prov. of Huesca. Pop. 3,200.

TAMARIZ, a village of Spain, in the prov. and 24 m. NNW of Valladolid, near the l. bank of the Rio-Secco. Pop. 450.

TAMARO, a small river of New Granada, in the prov. of Maracaybo, which rises near the sea-coast, runs S, and flows into Lake Maracaybo.

TAMARON, a village of Spain, in the prov. and 15 m. WSW of Burgos.

TAMAROVKA, a town of Russia, in the gov. of Kursk, 15 m. WNW of Belgorod.

TAMARUGAL (PAMPA-DE), a flat tract from 3,000 to 3,500 ft. above sea-level, stretching N and S at the foot of the Andes in Bolivia, between the arid mountains of the coast and the outlying ranges of the E slope of the Cordillera, running N into the prov. of Arica, and S into the desert of Atacama. It has an average width of 30 m. It takes its name from the *tamaruga* or tamarisk tree, which grows wherever water reaches the pampa from the ravines on the E. Vast deposits of nitrate of soda occur on the W side of the pampa, commencing immediately where the level plain ceases, and on the sides of some of the ravines running from the pampa towards the coast, and in some of the hollows of the mountains. The nitrate has not been found nearer to the coast than 18 m., and looks as if it gradually transferred itself into salt as it approached the coast. The deposits commence about Tiliviche, and extend S near to Quilliagua, with interruptions of deposits

of common salt. The nitrate caliche grounds vary in breadth; the average may be 500 yds., and is in some places 7 to 8 ft. thick. In the ravines and hollows the nitrate is found on their shelving sides; the hollows look like dried-up lakes, and are covered with salt from 2 to 3 ft. thick. On the margins of these deposits there is nitrate of soda, often going down to some depth; in other cases there is a hard crust upon it occasionally of 4 ft. thick. The nitrate caliche found under this crust is in thin layers, and very solid and pure. There are several varieties of the nitrate of soda, and the pampa of T. contains sufficient nitrate for the consumption of Europe for ages. On the practical question, how to obtain the produce of this fruitful mine at a cheap rate, Mr. Pusey says, "The existence of cubic saltpetre in Tarapaca has been known in Europe about a century, but none was sent to England until 1820; guano had been known for 200 years to be accumulated in the same parched neighbourhood, yet did not reach Europe till some years later. In 1820, however, as Mr. Bollaert informs us, some nitrate was sent to England, but the duty being too high, it was thrown overboard. Ten years afterwards, in 1830, a cargo was sent to the United States, but found unsaleable there; a part of it was therefore forwarded to Liverpool, but returned unsaleable from Liverpool also. Such is the risk of dealing in a new article; yet in the year following another cargo sold in England for £35 per ton; and up to 1850, 239,860 tons of the nitrate were exported from the port of Iquique alone, making a return of towards £5,000,000. The market-rate has since settled down to £17 or £16 per ton, but even at that figure the price, owing to the excessive cost of production, must be greatly too high. For, according to Mr. Darwin, the chief expense in producing it is the transfer from the quarry to the sea-coast. Now the distance as the crow flies is not more than 10 m., and by the circuitous track (road there is none, even for this large traffic), that traveller reached the works from the port, though mounted upon a mule, in a single day. The nitrate also is brought down on the backs of mules, and Mr. Darwin found the desert interval strewn with the bones and dried skins of the many beasts of burden which had perished on it from fatigue. The only living animal was the vulture, which preys on the carcasses." Mr. Pusey suggests that instead of taking English coals to the nitre-pits in Peru, the nitrates might be brought to this country quite fit for agricultural purposes without being refined at all, and might be sold at £6 per ton.

TAMASI, a town of Hungary, 70 m. SSW of Pest, and 15 m. WSW of Simontornya.

TAMATAM, an island of the Pacific, in the archipelago of the Carolina, in N lat. 7° 32'.

TAMATAVE, a town on the E coast of Madagascar, 90 m. SSW of Saint Mary's island. It has a pop. of about 2,000, and is surrounded by palisades. It was taken possession of by the French in 1829.

TAMAUlipA. See **SANTANDER**.

TAMAUlipAS. See **TAMPIOO**.

TAMBACH, a village of Bavarian Franconia, on the borders of Saxony, 4 m. W of Coburg.—Also a village in the principality of Saxe-Coburg-Gotha, 10 m. NE of Schmalcalden, on the Apfelstedt.

TAMBACUNDA, a town of Western Africa, in the country of Neola, 52 m. W of Baniserile.—Also a town of Wulli, in Western Africa, 30 m. ENE of Medina.

TAMBAH, a town of Hindostan, in the prov. of Bejapur, in N lat. 17° 28'.

TAMBAOHU, a village of Brazil, in the prov. of Parahiba, on the shore of the Atlantic, 6 m. E of Parahiba. It has an hospital and a convent.

TAMBAROURA, a creek in New South Wales, between the Turon and the Pyramul, and parallel to both, which disembogues itself into the Macquarie several miles below the junction of the Turon. This place has lately taken an important position among the diggings for richness and extent. The diggings are situated chiefly on table-land.

TAMBEKAN, a town of Hindostan, in the prov. of Nepal, in N lat. 27° 25', celebrated for the copper mines in its vicinity.—Near to it is a celebrated pass through the mountains, which commands the road leading to the coast.

TAMBERTCHERY, a town of Hindostan, in the prov. of Malabar, 18 m. NE of Calicut. The country in the vicinity of this place produces fine teak timber, and abundance of cocoa-nuts.

TAMBI, or **ITAMBI**, a parish of Brazil, in the prov. of Rio-de-Janeiro and district of Santo-Antonio-de-Sua, near the r. bank of the Aldeia. It has a church substantially built of stone. It produces sugar, rice, millet, and mandioc.

TAMBO, a town of Peru, in the prov. of Calca, situated on the r. bank of the Quillabamba, 45 m. NNW of Cusco. In the vicinity is a mountain, on which are the remains of a fortress said to have belonged to the Incas. It is built of large wrought stones beautifully fitted together. It has its bulwarks, gate, and small squares, arranged with singular art; and is entered by long, wide flights of steps, with several landing-places. At a small distance from this fortress are two strong towers, which may have served as advanced posts.—Also a settlement of Chili, in Coquimbo, near the source of the river Chospa.—Also a town of Bolivia, in the prov. of Atacama, on the shore of a small river which enters the Quillabamba.—Also a river of Peru, which, rising on the W flank of the Andes, in S lat. 16° 50', runs SSE to Moquehua, and enters the Pacific ocean, in the bay of Quilca, after a course of about 100 m.—It is also the name of several other inconsiderable settlements in South America.

TAMBOR, a settlement of New Granada, in the prov. of Popayan, 13 m. W of Popayan.

TAMBORETES, a group of islets of Brazil, in the N part of the prov. of Santa-Catharina, and near the island of São-Francisco.

TAMBOV, or **TAMBOY**, a large province in the central part of European Russia, lying between the parallels of 51° 15' and 55° 10' N; and bounded by the govs. of Vladimir and Nijni-Novgorod on the N; by Penza and Saratov on the E; by Voronez on the S; and by Orel, Tula, and Riazan on the W. Its territorial extent is 58,170 sq. versts. Its pop. in 1817 was returned at 1,135,000; in 1846, 1,750,900, Russians, Tartars, and Mordwines. Like the greater part of European Russia, it is level; the whole country from the river Khoper to the borders of Saratov, is occupied by extensive steppes. Many tracts are woody and marshy, but in general a sandy soil pervades the N, and a black and fertile mould the S. It is well watered both by rivers and small lakes. The Oka intersects it on the NW, and here receives the Moksha; in the S, the Vorona, the Suraia, and the Takai, are tributary to the Khoper; the W is traversed by the Don and the Voronez. Winter has here all the severity of the Russian climate, but in summer the heat is such that the Polish mechanical and the Spanish fly are common. The mineral products are iron, sulphur, and salt-petre. The prov. is divided into 12 circles.

TAMBOV, the capital of the above prov., is situated on the river Zna, in N lat. 52° 44', E long. 41° 45', 26 m. SE of Moscow. Pop. 10,700. It is the see of a Greek bishop, and has a large monastery in which are two churches, besides 14 other churches or cha-

pels. It has manufactories of woollen, canvass, linen, and alum, and a considerable carrying trade; but the chief employment of the inhabitants is agriculture. An extensive fair is annually held in the vicinity of this town on an extensive steppe or down, about 2 m. off. On this down a village, at the period of the fair, is erected of wooden booths, in which shops are opened for the sale of all kinds of goods, especially every article necessary for winter-clothing. A number of fire-engines are stationed round the booths, to be useful not only in the event of fire, but as assistants to the police in keeping order, since an engine playing into the midst of a mob speedily disperses the crowd.

TAMBRE, a river of Spain, which rises near Sobrado, in the mountains of Corana; flows WSW; and enters the Atlantic at Noya, after a course of nearly 60 m.

TAMBUCO, or **TABECO**, a town on the E coast of the island of Celebes, situated in a bay, to which it gives name, in S lat. 3° 50'.

TAME, a river of England, which rises near Winslow, in Buckinghamshire, and runs into the Thames below Dorchester.—Also a river in Staffordshire, which rises near Dudley; flows SE; and falls into the Trent, near Eadinghall, about 7 m. above Burton.

TAME, a settlement of New Granada, in the prov. of San-Juan-de-los-Llanos, 58 m. S of Pamplona, on an affluent of the Casanara.

TAMEGA. See **TAMAGA**.

TAMERTON (North), a parish in Cornwall, 8 m. N by W of Launceston. Area 5,261 acres. Pop. in 1831, 517; in 1851, 516.

TAMERTON-FOLLIOTT, a parish on a creek of the river Tamar, in Devonshire, 4 m. N by W of Plymouth. Area 5,150 acres. Pop. in 1851, 1,147.

TAMERVILLE, a village of France, in the dep. of La Manche, 2 m. NNE of Valognes. Pop. 1,240.

TAMIAGUA, a village of Mexico, in the state of Vera-Cruz, situated on a narrow isthmus on the W bank of the lake or lagoon of the same name, 68 m. SE of Tampico, at the point where a channel of about 1 m. in width discharges a portion of the waters of the lagoon over the bar of Tanquijo. It is built in a straggling manner, and presents only adobe houses. In 1830 its pop. did not exceed 200.

TAMIAGUA (LAGUNA DE), a lake of Mexico, in the state of Vera-Cruz, which joins the sea between the river Tampico and the Punta-Delgada, under the parallel of 21° 50' N. It is about 60 m. in length, and 26 m. in greatest breadth. It has a long and narrow outlet towards the S, running parallel with the shore. Its waters are fresh and clear, and abound in fish and alligators.

TAMIEH, a village of the prov. of Fayum, in Egypt, on a canal which forms a communication between the Nile and the Birket-el-Karun, 12 m. NE of Fayum.

TAMIHAK, a town of India, in the Punjab, in N lat. 33° 17', between Attock and Rhotas.

TA-MING-FU, a division and town of China, in the prov. of Chih-le. The div. comprises 7 districts. The town is 270 m. SSW of Pe-king, in N lat. 36° 21' 4", E long. 115° 22'. It is situated in a fertile locality, and is well-peopled.

TAMISE, or **THEMESCHE**, a town of Belgium, in the prov. of E. Flanders, on the Scheldt, 8 m. N of Dendermonde. Pop. 5,000. It has manufactories of linen and lace, and enjoys, like most other towns in this level country, the advantages of inland navigation.

TAMLAGHT, a parish 3½ m. SSE of Money-more, partly in co. Londonderry, partly in co. Tyrone. Area 4,954 acres. Pop. in 1831, 2,854;

in 1841, 3,008.—Also a village in the p. of Tamlaght-O'Crilly, co. Londonderry, $\frac{3}{4}$ m. SSW of Kilrea. Pop. in 1831, 188; in 1841, 211.

TAMLAGHTFINLAGAN, a parish in co. Londonderry, containing the villages of Ballykelly, Crindle, and Moys. Area 17,402 acres. Pop. 7,252.

TAMLAGHT-O'CRILLY, a parish, partly in co. Coleraine, but chiefly in co. Londonderry, containing the villages of Tamlaght and Innisrush, and part of the town of Portglenone. Area of the Coleraine section, 1,334 acres; of the Londonderry section, 15,504 acres. Pop. of the whole, 10,460.

TAMMARO, or **TAMARO**, a small river of Naples, in the prov. of Molise. It rises near Campobasso; runs E, then SSE, S, and SW; and falls into the Calore after a course of 50 m.

TAMMERFORS, a town of European Russia, in the gov. of Finland, 42 m. NNW of Tavasthus. Pop. 600.

TAMOYOS, a tribe of Indians, who formerly inhabited the coast of Brazil from Cape Frio to the prov. of Sao Paulo, and who resisted the efforts of the Jesuits to establish themselves in their territory.

TAMPA-BAY, a large bay in the gulf of Mexico, which sets up NE from the gulf into Hillsboro' co., in the state of Florida, U. S. It is about 40 m. in length, and is in one place 35 m. in breadth. It has from 15 to 20 ft. water on the bar, and affords safe anchorage. It receives five small creeks, of which the Hillsboro' and the Manata are the principal.—Little T. bay is an elliptical inlet about 10 m. in axis, in the N part of the larger bay.

TAMPICO, a town of Mexico, in the state of Vera-Cruz, near the sea, on a rising ground between the river Panuco and the Laguna-del-Carpentero, about 214 m. NNW of Vera-Cruz. It has a few good houses both of brick and stone, and a pretty large square. Its pop. has recently been estimated at about 7,000. Improvements are in progress both with regard to this town and the navigation of its river. New buildings are continually erecting, and the centre of the town is fast filling-up; the principal streets are being paved, and side-walks are completing all over the town. The commerce of T. has suffered much in consequence of the extensive trade in smuggling carried on at Matamoras and the whole of the northern frontier, principally induced and supported by the prohibitory Mexican tariff, which the late revolution has in a measure abolished. At present the communication of T. with the interior is most imperfect; the roads are only suited for mule traffic, goods from T. to San-Luis-Potosi having to be conveyed on mules' backs exposed to sun and rain for 28 or 30 days. The junta of San-Luis-Potosi have in contemplation the formation of a cart-road, on their side, down a branch of the river Panuco called Famina, where steamboats can arrive from T. in 20 hours, by which means goods will reach San-Luis from T. in 8 days. The most important improvement of all is the erection of a light on the N side of the entrance at T. bar, which can be seen 10 or 12 m. off in fine weather.—The old town of T., situated on the borders of the Laguna-de-Tampico, chiefly consists of a few adobe houses, with a pop. of 1,500.

TAMPISCO, a river of Nicaragua, which runs SSE into the gulf of Nicoya. It has a course of 30 m.

TAMRUCK, a small fortress of European Russia, in the gov. of Taurida, on the coast of the sea of Azof, between the mouths of the river Kuban, 156 m. SSW of Azof.

TAMSWEG, a village of Upper Austria, in the circle of Salzburg, 58 m. SSE of Salzburg, on the l. bank of the Minho. Pop. 2,200.

TAMUJA, a river of Spain, which rises in the

prov. of Caceres, and flows NNW to the Rio-del-Monte.

TAMWORTH, a parish and market-town, partly in the co. of Stafford, partly in that of Warwick; at the confluence of the rivers Thame and Anker, and intersected by the Birmingham and Derby junction railway, which has a station here, distant by railway, $2\frac{3}{4}$ m. NNE of Birmingham; $2\frac{1}{4}$ m. SSW of Derby; and 114 $\frac{1}{2}$ m. NW of London. The railway at this point is carried across the Anker by a viaduct of 18 arches. The Coventry canal passes about 1 m. S of the town. The parish includes the town of T., the chapelrys of Fazeley, Wiggington, Wilnecote, Amington, and Hopwas, the townships of Biddesote, Bonehill, Bole-hall-with-Glascote, and the liberties of Tamworth castle and Syerscote. Area 12,420 acres. Pop. in 1801, 3,870; in 1831, 7,182; in 1851, 8,655. The church, an ancient edifice, with a tower, is supposed to occupy the site of a nunnery founded by St. Editha. The town is finely situated in the midst of a tract of rich meadow-land, watered by the rivers Thame and Anker, over which there are here two bridges. It has a neat and handsome appearance. The ancient castle stands on the SE side of the town, upon a lofty artificial mount, and is kept in tolerable repair. Drayton-manoor, the seat of Sir Robert Peel, Bart., is an elegant and spacious mansion in this vicinity. In the 16th cent. the town appears to have declined, and ceased to be regarded as a corporation. It was incorporated, however, anew, by Queen Elizabeth. The income of the corporation, in 1840, was £377; in 1850, £384. It returns 2 members to parliament. The boundaries of the par. borough were enlarged by the reform act, and include the whole of the parish. The electors registered in 1837, 491; in 1852, 307. The trade of the town is chiefly confined to supplying the inhabitants with the usual articles of consumption and wear. There are breweries and tan-works of considerable extent, and extensive cotton-mills; there are also two large wool-stapling establishments, and in different parts of the parish, corn-mills, dyeing-houses, and bleaching-works.

TAMWORTH, a township of Stafford co., New Hampshire, U. S., 43 m. NNE of Concord, on Bearcamp river. Pop. in 1840, 1,717; in 1850, 1,786.

TAMWORTH, a town of New South Wales, on the Peel river, 154 m. W from Maitland.

TAN, a district and town of China, in the prov. of Shan-tung and div. of Tsaou-chu-fu, in N lat. 34° 57', E long. 116° 18'.

TANA-ELV, a large river of Lapland, which forms the boundary between Russia and Norway for 150 m.; traverses the NE part of Finmark; and falls into the Tana-fiord, a gulf of the Arctic ocean, in N lat. 71°, E long. 31° 30', after a course of 200 m.

TANAGA, one of the Fox islands, in the N. Pacific, to the E of Kanaga. It is about 40 m. in circuit, and rises into high snowy peaks, some of which emit smoke.

TANAH, a town of Hindostan, in the prov. of Gujerat, in N lat. 21° 21'.

TANAHPILEH, a town of Sumatra, the cap. of the state of Jambi, about 70 m. from the coast. Pop. 4,000.

TANAIIS. See **DOX**.

TANAK POINT, a cape on the N coast of Java, in S lat. 6° 24'.

TANAKEKE, a small island about 12 m. in circumf., surrounded by a cluster of smaller ones, off the SW extremity of Celebes, in S lat. 5° 30'.

TANALITZKAIA, a fortress of Asiatic Russia, in the gov. and 120 m. E of Orenburg, on the r. bank of the Ural, which here receives the Tanalik.

TANAMO, a port on the N coast of the island of Cuba, in N lat. 20° 42'.

TANAR, a river of Aberdeenshire, which rises at the foot of Mount Battock, and falls into the river Dee near the church of Aboyne. It gives the name of Ghentanar to the district through which it runs.

TANARO, a river of the north of Italy, which rises among the Apennines, and after passing by Ceva, Cherasco, Alba, Asti, and Alessandria, falls into the Po at Bassignana, 8 m. E of Valenza, after a course of 150 m. Its principal affluents are the Corsaglia, Ellero, Pesco, Stura, Borbo, and Versa on the l.; and the Belbo and Bormida on the r.

TANASSERIM. See **TANASSERIM**.

TANAT, a river of Wales, in the counties of Montgomery and Denbigh. It forms part of the boundary between these cos., and runs into the Severn on the NE point of Montgomeryshire.

TAN-CHU, a town of China, in the prov. of Kwang-tung and dep. of Keun-che-fu, or island of Hainan, in N lat. 19° 32', E long. 109° 20'.—Also a district and town of China, in the prov. of Hu-pih and div. of Hwang-chu-fu.

TANCITARO, a village of the Mexican state of Michoacan, 60 m. ENE of Colima, in N lat. 19°.

TANCONVILLE, a village of France, in the dep. of La Meurthe, cant. and 6 m. SW of Lorquin. Pop. 500.

TANCOOK (Great), an island off the SE coast of Nova Scotia, at the entrance of Mahone bay. It is about 8 m. in length.—The little T. lies to the NE of it.

TANCOS, a town of Portugal, in Estremadura, on the r. bank of the Tagus, 68 m. WNW of Lisbon. Pop. 700.

TANDAH, a town of Hindoostan, in the prov. and 9 m. SE of Oude, on the S bank of the Gogra.

TANDERAGEE—anciently **TAWNATCLEE**—a market-town in the p. of Ballymore, co. Armagh, on the river Cusher, $\frac{1}{2}$ m. W of Newry canal, and 2 m. SW of Guilford. In the vicinity of the town are flour, meal, and flax mills. Considerable quantities of flax, and of all kinds of agricultural produce, are sold at the weekly markets. Pop. in 1841, 1,562.

TANDRIDGE, a parish in Sarrey, $\frac{9}{10}$ m. SSE of Croydon. Area 3,944 acres. Pop. in 1851, 594.

TANEGASIMA, an island of Japan, to the S of Kin-siu. It is about 30 m. in length, and is well cultivated.

TANEPANTLA, a town of Mexico, in the state and 10 m. N of the city of Mexico.

TANETE, a town and small principality on the island of Celebes, situated half-way between Fort Rotterdam and the bay of Borian, in S lat. 4° 14'.

TANEY, **TAWNEY**, or **CHURCHTOWN**, a parish in co. Dublin, containing the villages of Dundrum and Windymills. Area 4,571 acres. Pop. 3,848.

TANEY, or **TAWNEY**, a village in the p. of Clondewadlock, co. Donegal, in the peninsula of Fannat, $\frac{6}{10}$ m. N of Millford. Pop. in 1841, 128.

TANEYTOWN, a township of Frederic co., Maryland, U. S.

TANFIELD, a chapelry in Chester-le-Street parish, co.-palatine of Durham, $\frac{6}{10}$ m. SW of Gateshead. It comprises the townships of Beamish and Lintz-Green. Area 7,072 acres. Pop. in 1831, 2,496; in 1851, 3,490. Here are iron and coal mines. The collieries are very extensive.

TANFIELD (West), a parish in the N. R. of Yorkshire, 6 m. NW by N of Ripon, on the N bank of the Ouse. Area 3,139 acres. Pop. in 1851, 628.

TANG, a district and town of China, in the prov. of Chih-le and div. of Paon-ting-fu, in N lat. 38° 44', E long. 115°.—Also a district and town in the prov.

of Ho-nan and div. of Nan-gan-fu, in N lat. 32° 47', E long. 112° 53'.—Also a district and town in the prov. of Kwan-se and div. of Wu-chu-fu, in N lat. 23° 26', E long. 110° 21'.

TANGALA, a small island in the Eastern seas, near the S coast of Java, in S lat. 8° 20'.

TANGALLA, a town on the S coast of the island of Ceylon, 21 m. ENE of Matura.

TAN-GANG, a town of China, in the prov. of Keang-su and div. of Chu-keang-fu, in N lat. 32° 4', E long. 119° 32'.

TANGE, a small river of E. Prussia, which falls into the Kurische-haff, at Memel, where it is of sufficient depth to be navigated.

TANGER, a small river of Prussia, in the Old Mark of Brandenburg, which falls into the Elbe at Tangermünde.

TANGERANG, a village of the island of Java, about 15 m. W of Batavia, on a river of the same name. It is a considerable place; and before the neighbouring territory was ceded to the Dutch, it was a large military station of the state of Bantam. A weekly bazaar is held here, to which the produce of the adjacent country is brought, and thence carried to Batavia, by means of a canal which communicates with the river Tangerang or Tjidanee, and then runs parallel to the carriage-road the whole way to the city of Batavia.

TANGERMUNDE, a small town of Prussia, in the Old Mark of Brandenburg, on the Elbe, 82 m. NNE of Magdeburg, at the confluence of the Tanger. It has 3,000 inhabitants, employed in linen weaving, brewing, and cultivating the neighbouring district. It has an ancient castle, separated from the rest of the town.

TANG-GANG-HEEN, a district and town of China, in the prov. of Hu-pih and div. of King-mun-chu, in N lat. 30° 45', E long. 111° 36'.

TANG-HEEN, a district and town of China, in the prov. of Shan-tung and div. of Yen-chu-fu, in N lat. 35° 15', E long. 117° 24'.

TANGIERS, or **TANGER**, a considerable port of the prov. of Fez, in Morocco, situated at the W entrance of the straits of Gibraltar, to the E of Cape Spartel, and 38 m. WSW of Gibraltar. It has a pop. of 9,000, which subsists chiefly by supplying the British garrison of Gibraltar, and the cities of Cadiz and Lisbon, with cattle, fowls, fruit, and vegetables. It is a place of considerable strength. Its old walls, crenulated and flanked with round and square towers, are perhaps capable of a greater resistance than their appearance indicates. Several bastioned towers have been repaired and put in a state of defence within the last few years. In itself it is of little importance, but from its being the residence of the European consuls. Its commerce is inferior to that of some other ports, notwithstanding its proximity to the European coast. The houses of the consuls form the only ornament of the town. It is situate on the declivity of a calcareous mountain, part of which is not built upon, and presents a naked and unpleasant *coup d'œil*. Like most other places in Morocco, it is surrounded by a wall flanked by round and square towers, and enclosed by a ditch 2,200 metres in extent, but which has no counter-scarp. It is protected by a kasbah or fortress of imposing appearance, and by a fort of Portuguese construction, bastioned in the modern style, but half in ruins. The kasbah is mounted by 12 pieces of cannon, which command the straits of Gibraltar. The ditches round the city are filled with trees, and cultivated as kitchen gardens. The rampart opposite the sea is remarkable for having two tiers of embankments with embrasures mounted by guns. On the N side the city is defended by steep rocks.

which prevent the approach of a besieging force. The principal defences have been raised in front of the landing-place near the marine gate. They consist of two batteries, mounting 60 pieces of heavy calibre, and 8 mortars all bearing on the port. The landing-place is flanked on either side by two batteries. Besides these defences of the port, the bay of T. is defended by six batteries in masonry, one built on Cape Malabata, and the other on the ruins of Old Tangier. These batteries mount together 40 guns. The two batteries which flank the roadstead at its two extremities are raised on small hills, about 150 ft. above the level of the sea; the others are at the water's edge. From 18 to 20 days is required to send a despatch, and get an answer, between T. and Fez, and from Morocco requires from 45 to 50 days. The bay of T. is now encumbered by the ruins of the old mole and fortification, and is not very safe during winter in W winds. The best anchorage for frigates and large vessels is at the E point.—T. was known under the name of *Tingis* or *Tinja* to the Romans. On the invasion of the Saracens, it was surrendered to them by Count Julian. In modern times, T. has often been a subject of contest between the Moors and the Portuguese. In 1437 it was besieged by Prince Ferdinand; but his army was completely defeated. In 1471, Alonzo, king of Portugal, succeeded in obtaining possession of it; and about two centuries after, in 1662, it became the property of England, being ceded to Charles II. as a marriage-portion with the princess Catherine of Portugal. The English, however, abandoned it in 1684, destroying the fortifications. T. became afterwards a distinguished station of piracy, for which its situation at the mouth of the straits gave it great advantages.

TANGIER-ISLANDS, several islands of the Chesapeake, near the coast of Maryland, U. S., opposite the mouth of the Potomac.

TANGIPAO, a river of the United States, which rises in Mississippi, crosses the E part of Louisiana, and flows into Lake Pontchartrain, 10 m. NE of the pass of Manchac.

TANG-KEU-EUL, a small but populous town on the N frontiers of the Chinese prov. of Kan-su. It is an animated place, full of business and bustle, being a rendezvous of caravans from Tibet. Once a-year the Eastern Tibetians quit the slopes of the Bayan-Kara mountains, in large caravans, and bring here furs, butter, and wild fruits for sale.

TANGLEY, a parish in Southamptonshire, 5 m. NNW of Andover. Area 1,561 acres. Pop. in 1831, 283; in 1851, 278.

TANG-MAO, an island of China, in the prov. of Kwang-tung and gulf of Canton, in N lat. 22° 2', E long. 113° 31'.

TANGMERE, a parish in Sussex, 3 m. N by E of Chichester. Area 734 acres. Pop. in 1851, 221.

TANGO, a town of Nifon, in Japan, 65 m. SW of Meaco.

TANGOLOTANGO, a port of Mexico, in the prov. of Oaxaca, in the gulf of Tehuantepec, in N lat. 15° 45', 100 m. SSE of Oaxaca.

TANGRU-MOUNTAINS, a chain in Mongolia, which commences on the frontiers of Siberia, in a spur of the Little Altai, and runs SE towards the Hongaer mountains.

TANG-SHAN, a district and town of China, in the prov. of Chih-le and div. of Shun-tih-fu, in N lat. 37° 22', E long. 114° 48'.—Also a district and town in the prov. of Keang-su and div. of Seu-chu-fu, in N lat. 34° 28' 30", E long. 116° 40' 55".

TANG-TU-HEEN, a district and town of China, in the prov. of Gan-hwuy and div. of Tae-ping-fu.

TANGUEY, or **TONGUEY**, a bay of Chili, on the coast of the Pacific, in 8 lat. 30° 16'.

TANG-YANG, a lake of China, in the prov. of Keang-su, 36 m. N of Hwae-gan-fu. It is about 30 m. in circumf.

TANG-YIH, a district and town of China, in the prov. of Shan-tung and div. of Tung-chang-fu, in N lat. 36° 35', E long. 115° 58'.

TANG-YIN, a district and town of China, in the prov. of Ho-nan and div. of Chang-tih-fu, 78 m. N of Kae-fung-fu, in N lat. 35° 36', E long. 114° 33'.

TANG-YUE-CHU, a district and town of China, in the prov. of Yun-nan and div. of Yung-chang-fu, on the confines of Burmah, in N lat. 24° 58', E long. 98° 45'. It is an important military station.

TANILA, a river of Mexico, which runs into the gulf of Mexico, in N lat. 18° 10'.

TA-NING, a district and town of China, in the prov. of Sze-chuen and div. of Kew-chu-fu, in N lat. 31° 37', E long. 109° 38'.

TANINGE, a town of the Sardinian states, in the prov. of Faucigny, situated in a fertile valley, on the river Feron, 22 m. E by S of Geneva. Pop. 2,700.

TA-NING-HEEN, a district and town of China, in the prov. of Chih-le, div. and 3 m. S of Ta-ning-fu, in N lat. 36° 18', E long. 115° 20'.—Also a district and town of China, in the prov. of Shan-se and div. of Sih-chu, in N lat. 36° 30', E long. 110° 43'.

TANJORE, an extensive, populous, and well cultivated district of the south of Hindostan, in the Carnatic, lying between the parallels of 9° and 12° S. It is bounded on the N by the Colerun; on the E by the sea; on the S by the zemindaries of Ramnad and Shevargunga; and on the W by Trinopoly. Its length from N to S is 115 m.; its breadth 75 m. Area 8,625 sq. m. Pop. in 1831, 1,128,730, chiefly Hindus. The principal rivers are the Cavery, the Colerun, and the Venaar. About one-half of the surface is a flat alluvial delta, intersected by various branches of the Cavery and the Colerun. In the month of January, the whole face of the country is one continuous sheet of paddy ground, here and there interspersed with villages. The total number of villages paying revenue is 4,700. The number of landholders, 40,600. The revenue in 1837-8 was 47,38,607 rupees.—Next to the cap. the chief towns are Negapatam, Combacorum, and Manargudy. For a considerable period this district constituted a small principality which was never completely subdued by the Mahomedan arms. It was, however, conquered by the Mahatta chief Eccojee, about the middle of the 17th cent., and ultimately became tributary to the nabob of the Carnatic. In consequence of the cession of the nabob's territories, in 1799, this district is now in possession of the British.

TANJORE, the capital of the above-mentioned district, is situated in N lat. 10° 45', E long. 79° 11', 205 m. from Madras. It is, with its straggling suburbs, nearly 6 m. in circumf. There are two forts, one of which comprehends the palace and other public buildings; the other contains one of the handsomest temples in the south of India, and a college, formerly a celebrated place of Hindu learning.

TANJORE, a town of the island of Java, situated on high ground, 73 m. SSE from Batavia.

TANKARDSTOWN, a parish in co. Limerick, 2 m. WNW of Kilmallock. Area 1,710 acres. Pop. in 1831, 613; in 1841, 660.—Also a parish partly in Queen's co., and partly in co. Kildare, 3½ m. SSE of Athy. Area 8,350 acres. Pop. 1,914.

TAN-KEANG-TING, a district and town of China, in the prov. of Kwei-chu and div. of Tuyen-fu.

TANKEL, an island in the strait of Sunda, to the NE of Tambikel.

TAN-KEO-HEEN, a district and town of China, in the prov. of Shan-se and div. of Keang-chu.

TANKERSLEY, a parish in the W. R. of Yorkshire, $4\frac{1}{2}$ m. S of Barnesley. Area 8,404 acres. Pop. in 1831, 1,596; in 1851, 1,928.

TANKROWAL, a town of Western Africa, on the l. bank of the Gambia, in N lat. $13^{\circ} 25'$. The English African company had once a factory here, now abandoned. Its chief trade is in wax.

TANKSAL, a town of Hindostan, in the prov. of Delhi, in N lat. $30^{\circ} 51'$.

TANLAY, a village of France, in the dep. of Yonne, 6 m. E of Tonnerre. Pop. 750.

TAN-LING-HEEN, a district and town of China, in the prov. of Sze-chuen and div. of Mei-chu, in N lat. $30^{\circ} 5'$, E long. $103^{\circ} 35'$.

TANN, a town of Bavarian Franconia, on the small river Ulster, 9 m. ENE of Fulda. Pop. 100.

TANNA, a town of Saxony, in the Voigtland, 6 m. SSE of Schleitz.

TANNA (CAPS), a headland of Java, in S lat. $6^{\circ} 30'$, 14 m. NW of Cheribon.

TANNA, an island in the S. Pacific ocean, one of the New Hebrides group, in S lat. $19^{\circ} 32'$, discovered by Cook in 1774. It is about 22 m. in length, and 10 m. in breadth. The inhabitants are of middle size, rather slender than otherwise, and of a very dark colour. The island contains a considerable volcano, and some hot springs, which raised the thermometer to 170° , and in one place to 202° . Cook named the harbour where he lay Port Resolution.

TANNA-BALLU, a small island in the Eastern seas, near the E coast of Borneo, in N lat. $4^{\circ} 52'$.

TANNAH, a town and fortress of Hindostan, in the prov. of Aurangabad, district of Bombay, on the E side of the island of Salsette, in N lat. $19^{\circ} 11'$. The fort, which is very strong, commands the passage between the island and the mainland, which is only about 200 yds. broad. It was taken from the Mahrattas by the British in December 1773, after an obstinate resistance. The town is straggling, but not large, although it contains several Portuguese churches. The Great Indian peninsular railway from Bombay to Callian, after sweeping across Siemmarsh, and giving off a branch to Machim, bends to the right; enters the island of Salsette, and has a station at Bhandup. From this point for the next 14 m. the line is perfectly level, the rails being laid along the surface of the ground, with merely so much embanking as to save them from the risk of flooding during the rains. To the l. are the low rocky wooded ridges of Salsette, woodlands and richly cultivated fields, hamlets, and cottages filling up the intervening space; on the r., parallel to, and close beside, the railway for about 8 m. is the salt water creek called the Tannah river, and beyond are the magnificent ghauts. The railway, on approaching T., becomes embowered under magnificent trees. On entering the village it turns quickly round towards the viaduct, by which it crosses the river, which is here divided into two by a long and rocky island. The channel on the T. side is shallow, and the arches are of moderate span; on the mainland side, the channel is deep and narrow, and an iron bridge, somewhat on the tubular plan, 86 ft. in span, permits the shipping to pass under it. The whole viaduct from shore to shore, including the part over the river, is about 1,000 ft. in length, the ferry-way about 40 ft. above the high water mark. From this the line runs along the base of the hill, at a distance of about 3 m. to the projecting part of Parsick-point, which it penetrates by a channel about 100 yds. in breadth. On the other side the traveller finds

himself passing for about a mile along the margin of the Callian river, surrounded by some of the most magnificent scenery in the world, when a second tunnel is encountered, and no further difficulty presents itself till the village of Callian is attained. The first sod of this line was turned on the 31st of October 1850, and the line was completed to Callian on 1st May 1854. One line is now laid down complete to T., and the second is in rapid progress. —Also a fortress of Bengal, situated on the W bank of the Hugli river, about 2 m. below Calcutta. It was taken by the British in 1687, but was afterwards restored to the nabob. It was again taken by the British in 1756; but the erection of the fortress of Fort William having rendered T. unnecessary, the fortifications have been allowed to decay.

TANNADICE, a parish a little N of the centre of Forfarshire. Area 38,400 acres. The South Esk, ploughing its way between romantic and beautiful banks, forms, over a great distance, the W and S boundary-line. The Noran has most of its fine course either in the interior or along the eastern boundary. The uplands are to a large extent heathy and almost wholly pastoral. Pop. 1,517.

TANNA-MERA, a small island near the E coast of Borneo, in N lat. $3^{\circ} 45'$.

TANNAY, a town of France, dep. of the Nievre, 9 m. S by E of Clamecy, near the l. bank of the Yonne. Pop. 1,400.

TANNE, a village of Brunswick, in the principality of Blankenburg, near Hasselfeld, on the l. bank of the Bode. The village is insignificant, but there are large iron-works in the neighbourhood.

TANNENBURG, a village of E. Prussia, 54 m. S by W of Königsberg.

TANNERRE, a town of France, in the dep. of the Yonne, 21 m. SSW of Ivigny.

TANNER'S CREEK, a river of Indiana, U. S., which runs into the Ohio, 2 m. below Laurenceburg. It is 30 yds. wide at its mouth.

TANNER'S HILL, a village of Newbury district, S. Carolina, U. S.

TANNESAR, or **THANASIR**, a town of Hindostan, in the prov. of Delhi, in N lat. $29^{\circ} 55'$. This place formerly contained the celebrated temple of Jug-Sum, which was held in the highest estimation by the Hindus. Its riches and celebrity attracted the cupidity of Mahmud of Ghizni, who, in 1012, marched against it and captured it.

TANNESERIM. See **TENASSERIM**.

TANNEWANG, a river on the S coast of the island of Celebes, which runs into the sea, 5 m. W of Bonthain.

TANNHAUSEN, a village of Prussian Silesia, in the principality of Schweidnitz, near the borders of Bohemia, 9 m. SE of Waldenburg.

TANNINGTON, a parish in Suffolk, $8\frac{1}{4}$ m. NW of Framlington. Area 1,602 acres. Pop. in 1831, 264; in 1851, 244.

TANON (POINT), a cape on the S coast of the island of Sibiu, in N lat. $9^{\circ} 52'$, E long. $123^{\circ} 18'$.

TANORE, a port of Malabar, 24 m. SE of Calicut, in N lat. $10^{\circ} 55'$. It was formerly a place of considerable note, but is now reduced to a mere village.

TANQUA, a river of Southern Africa, which descends from the Wittemberg, and running WNW, joins the Little Doorn, on the r. bank, after a course of 120 m.

TANQUE, a village on the coast of Chili, on the S side of Tongay bay.

TANSEY, a river of America, which rises in the Rocky mountains, and falls into the Missouri near the great falls. Its general course is from E to W,

through wide valleys, well supplied with both the long and broad leaved cotton wood.

TAN-SHWUY, a district and town of China, in the prov. of Hu-pih and div. of Hwang-chu-fu.

TAN-SHWUY-CHING, a town of China, in the prov. of Fo-keen and dep. of Tae-wan-fu, on the NW coast of the island of Formosa, on a bay of the same name, in N lat. $25^{\circ} 7' 10''$, E long. $121^{\circ} 11'$.

TAN-SHWUY-KI (Lower), a river of China, in the prov. of Fo-keen and dep. of Tae-wan-fu, or island of Formosa, which runs to the SE of Fung-shan, and throws itself into the bay of that name.

TAN-SHWUY-KI (Upper), a river of China, in the prov. of Fo-keen and dep. of Tae-wan-fu, or island of Formosa, which has its source in the lofty mountains on the SE frontier of the Chinese portion of the island; runs NW; receives the Pa-lang-seuen, and throws itself into the bay of the same name. Its banks are finely shaded with wild palm-trees. It is navigable a considerable distance, and its waters abound with a species of fish locally named the *hung-sin-hu*, which averages a length of nearly 10 ft.

TANSIF. See **TENSIF**.

TANSLEY, a township in Crich parish, Derby, $1\frac{1}{2}$ m. E of Matlock. Area 1,150 acres. Pop. in 1831, 507; in 1851, 598.

TANSOR, or **TANOVER**, a parish in Northamptonshire, 2 m. NNE of Oundle, on the E bank of the Nen. Area 2,050 acres. Pop. in 1851, 256.

TANTOYUCA, a settlement of Mexico, in the district of Tampico, 60 leagues NE by N of Mexico.

TANTUMQUERI, a port on the Gold coast of Africa, 18 m. E of Cormantin.

TANWORTH, a parish in the co. of Warwick, 4 m. NW of Henley-in-Arden. Area 9,400 acres. Pop. in 1831, 2,201; in 1851, 1,892.

TAN-YANG, a town of China, in the prov. of Keang-su and div. of Chin-keang-fu, in N lat. $32^{\circ} 4'$, and E long. $119^{\circ} 32'$.

TAOLI-MONASTIR. See **MONASTIR**.

TAONG-SU, a nomade people of the Burman empire, who frequent the country between the Thanlun and Setang.

TAORMINA, a town of Sicily, in the prov. and 33 m. SW of Messina, and district of Castoreale, on one of the heights of Mount Taurus, in a magnificent situation, near the shore of the Ionian sea, in N lat. $37^{\circ} 48' 15''$, and E long. $15^{\circ} 17' 25''$. It is partly enclosed by walls, and is commanded on the NW by two forts. Pop. in 1831, 3,929. It is ill-built and dirty, but contains some handsome churches and convents, an hospital, and several fine ruins. The trade consists chiefly in wine and hemp. This town, the *Tauromenium* of the ancients, was destroyed by the Saracens in 968. About $1\frac{1}{2}$ m. to the SW are the ruins of the ancient *Naxos*. T. gives its name to a bay enclosed on the NE by Cape S. Andrea, and on the SW by Point Pietragala, 3 m. distant from one another. It has a depth of about 2 m.

TAORO. See **OROTAVA**.

TAOS, a county in the NE of the state of New Mexico, between the parallels of 36° and 38° N, traversed by the Rio-Grande, and by numerous small streams. Pop. in 1850, 9,507.

TAOS (PUEBLO DE), a village of New Mexico, situated in N lat. $36^{\circ} 28'$, W long. $106^{\circ} 47'$, on the r. bank of a small affluent of the Rio-del-Norte, 52 m. NNE of Santa-Fe, immediately at the foot of the W side of the first ridge of the Rocky mountains. The village possesses much singularity, combining great strength, with bold conception in the architecture, and enjoying the most complete utility in its honey-comb formation. It is formed of two distinct departments, the rivulet dividing it in the

centre. The buildings are exactly similar. The first, or basement story, occupies a large area; upon this is reared another story, smaller than the first by 10 ft.;—each successive story falling off in the same ratio, until the pagoda becomes 9 stories high. In the basement story there are no doors, the entrance being through a round hole in the offset which forms the roof; a pole being planted in the aperture, with a ladder attached, by which they ascend and descend. The buildings resemble pyramids, only being square. In the formation of the village an equal number of the heads of families divided themselves off and laid two foundations precisely similar, and reared upon them two equal structures. The original inhabitants of the valley of Taos are Indians, and known by the name of Pueblos. They were in possession of this country when the Spaniards first visited Mexico, and they have remained until the present time. The patron saint of the village is St. Jerome; the Pueblos having adopted the Catholic religion through the powerful influence of the missionaries from Spain. The day of St. Jerome is celebrated by selecting thirty of the choicest youths from each side of the stream, to compete with one another in manly sports. Their honesty and industry is proverbial, and well-cultivated fields and well-stocked farms give token of much thrift and independence.

TAOU-CHU, a district and town of China, in the prov. of Hu-nan, and dep. of Yung-chu-fu, 210 m. SSW of Chan-sha-fu, on a river of the same name, an affluent of the Seang-keang, in N lat. $25^{\circ} 32' 29''$, E long. $111^{\circ} 28' 10''$.

TAOU-CHU-TING, a district and town of China, in the prov. of Kan-suh and dep. of Kung-chang-fu, in N lat. $34^{\circ} 35'$, and E long. $103^{\circ} 31'$.

TAOUD, a village of Upper Egypt, in the prov. of Thebes, and near Esneh. It contains the remains of a temple now occupied by fellahs and their cattle. It is the *Thaphn* of the ancients.

TAOU-HING-TENG-SHAN, a mountain of China, in the prov. of Kwei-chu, and dep. of Sze-nan-fu. It is covered with perpetual snow.

TAOU-SU-SHAN, a mountain of China, in the prov. of Chih-le, and div. of Seun-wha-chu, in N lat. $39^{\circ} 52'$, and E long. $114^{\circ} 45'$. It is covered with perpetual snow.

TAOU-YUEN, a district and town of China, in the prov. of Keang-su, and div. of Hwae-gan-fu, in N lat. $33^{\circ} 43'$, and E long. $118^{\circ} 48'$.—Also a district and town in the prov. of Hu-nan, and div. of Chang-tih-fu, in N lat. $28^{\circ} 52' 10''$, and E long. $111^{\circ} 11' 9''$.

TAPACHULA, a town of Guatemala, in the state of that name and dep. of Quezaltenango and Soconusco.

TAPACOAS, a tribe of Indians in Brazil, who inhabit the banks of the Tocantins and Somno, in the N part of the prov. of Goyaz. They subsist by fishing and the chase, but are much addicted to rapine.

TAPACORA, a village of Brazil, in the prov. of Rio-de-Janeiro, and district of São-João-d'Itaboraí. —Also a mountain in the same district. —Also a river of the prov. of Pernambuco, which passes the town of Santo-Antão, and throws itself into the Rio-Capibaribe.

TAPADA, a lake of Brazil, in the prov. of Espírito-Santo, between the Doce and São-Matheos rivers. It is of little extent, but abounds with fish.

TAPADO, a river of Brazil, in the prov. of Pernambuco, 6 m. N of Olinda.

TAPAGI, a headland of Brazil, in the prov. of Caara, and district of Granja, to the E of the Acaracú.

TAPAGIPE, or **ITAPAGIPE**, a parish of Brazil, in the prov. and to the N of Bahia, on a peninsula of

the bay of Todos-os-Santos, and at the mouth of a river of the same name.

TAPAGONIA, a comarca of Brazil, in the prov. of Para, bounded on the N by the Amazon, on the S by the comarca of Dos Arinos; on the W by that of Mundrucania, from which it is separated by the Tapajos; and on the E by the comarca of Xingutania. It is 300 m. in length from N to S, and 180 m. in medium breadth, and is watered by the Xingu, Tapajos, Guajara and Urancu rivers. It is extremely fertile, producing spontaneously cloves, nutmeg, cacao, and varieties of medicinal plants. It is inhabited chiefly by Indians. Its principal towns are Souzel and Santarem.

TAPAJOS, a river of Brazil, formed by the junction, in the prov. of Mato-Grosso, of the Rio-dos-Arinos and Jaruna, the former of which has its sources in the Sierra-Pany, the latter in the Sierra-Parecis, and which unite in S lat. 9° 10', and E long. 57° 36'. Running NE it enters the prov. of Para, in which it bathes the districts of Para and Rio-Negro; receives on the r. the Azevedo, one of its most important tributaries; and, after a total course of 600 m., throws itself, by two branches, into the Amazon, on the r. bank, a little above Santarem. This river is navigable throughout a great part of its course.—Also a tribe of Indians, who inhabit the banks of the above named river.

TAPAJOS, or **SANTAREM**, a town of Brazil, in the prov. of Para and comarca of Rio-de-Tapajos, on the S bank of the Amazon, a little below the confluence of the Tapajos. Its trade consists chiefly in cacao and medicinal plants. Pop. of district 10,000, of whom the majority are whites.

TAPALGUEN, a town, or rather a collection of oven-shaped Indian huts, in the state and 176 m. SSW of the city of Buenos-Ayres, on a river of the same name, which here flows through the pampa in a NE direction to the Rio-Flores, a branch of the Salado.

TAPALGUEN (**SIERRA**), a low range of quartz hills, in the state of Buenos-Ayres, which terminates in Cape Corrientes.

TAPANHUACANGA, **TAPANHUARANGA**, or **JOSE DE TAPANHUACANGA**, a village of Brazil, in the prov. of Minas-Geraes, 12 m. SSW of Villa-do-Principe, in a valley at the E base of the Serra-do-Espinhaço. The church, standing on a platform, commands the houses, which are small, low, and covered with tiles. There were formerly gold mines in its vicinity.

TAPANHUNA, a tribe of Indians of Brazil, who inhabit the banks of the Rio dos Arinos and Jaruna, in the prov. of Mato-Grosso.

TAPARI, a fort of Brazil, in the island of Maranhão, founded in 1612.

TAPARICA. See **ITAPARICA**.

TAPAXANAS, a tribe of Indians who inhabit the banks of the Amazon in Brazil, in the prov. of Para and district of the Rio-Negro.

TAPE, a village of Hungary, in the comitat of Csongrad, 2 m. ENE of Szegedin, on the r. bank of the Theiss, and in the midst of extensive marshes. It has extensive manufactories of mats.

TAPERA, a village of Brazil, in the prov. of Minas-Geraes, on the l. bank of the Chopoto.—Also an island in the bay of Niterohi or Rio-de-Janeiro.

TAPERI, a lake of Brazil, in the prov. of Ceara and district of Mecejana.

TAPEZ, a numerous tribe of Indians of Brazil, who inhabit the NW part of the prov. of São-Pedro-do-Rio-Grande, between the chain of the Cochilla-Grande-de-los-Tapes, and the N bank of the Uruguay.

TAPIA, a town of New Granada, in the prov. and 45 m. SSW of Mompo, on the r. bank of the Cauca.

TAPIAN, a headland of the island of Mindanao, on the W coast, in N lat. 7°, and E long. 124° 30'.

TAPIAN, a town of Prussia, in the prov. of E.

Prussia, regency and 24 m. ESE of Königsberg, and circle of Wylau, on the r. bank of the Pregels, at the junction of the Deime canal. Pop. in 1843, 3,226. It has a royal castle, now used as a house-of-correction, an asylum for the poor, and possesses manufactories of carpets, hosiery, and several tanneries and breweries.

TAPINO, a mountain of the Papal States, in the NW part of the comarca of Rome, to the N of Lake Bracciana, and 3 m. SSE of Sutri.

TAPIOLES, a town of Spain, in the prov. of Zamora, partido and 14 m. ESE of Benevento, in a fertile plain, watered by the Valderaduey. Pop. 660. Wine is cultivated in the environs.

TAPIRAPE, or **TAPIRAQUA**, an Indian tribe of Brazil, who inhabit the banks of a river of the same name, in the prov. of Mato-Grosso and comarca of Tapiraquia. The river T. joins the Araguaia, on the l. bank, some leagues below the island of Bananal.

TAPIRAPOAN, a mountain of Brazil, in the prov. of Mato-Grosso. It forms a ramification of the Cordelheira-dos-Parecis. The Preto, the first important affluent of the Paraguai, and also the Pari and Barvados, take their rise in this mountain.

TAPIRAQUIA, a comarca of Brazil, at the NE extremity of the prov. of Mato-Grosso, bounded on the N by the prov. of Para, on the r. by the Rio-Xingu, by which it is separated from the Com-dos-Arinos, on the S by the comarca of Bororonia, and on the E by the Uruguay, by which it is separated from the prov. of Goyaz. It is 380 m. in length, from N to S, and 210 m. in breadth. With the exception of the E part, this com. is little known. It is inhabited by several Indian tribes, of whom the principal are the Guapindayas, Tapiraques, Ximbinas, and Aracys. It is very fertile, well-watered, and abounds with game, and is said to contain gold and silver-mines.

TAPISI, a river which has its source in Peru, in the mountains of Conomamas, and runs NNW to the Ucayle, which it joins in S lat. 5° 20'.

TAPITAY, a town of Brazil, in the prov. and 465 m. W of São-Paulo, on the l. bank of the Parana.

TAPLOW, a parish in Bucks, 5 m. NW of Eton, on the E bank of the Thames, and in the line of the Great Western railway. Area 1,920 acres. Pop. 704.

TAPLO. See **TARMA**.

TAPOLCSAN (**KIS**), or **MALE-TOPOLCSANY**, a town of Hungary, in the comitat of Bars, 11 m. W of Königsberg, in the midst of mountains. Pop. 1,800. It has a castle, with a superb park, a Catholic church, and an orphan's asylum. It has manufactories of cloth, and in the environs is a mineral spring.

TAPOLCSAN (**NAGY**), or **WELKE-TAPOLCSANY**, a town of Hungary, in the comitat and 19 m. NNE of Neutra, near the r. bank of the Neutra, a little below the confluence of the Heteny. Pop. 2,547.

TAPOLCZA, a hamlet of Hungary, in the comitat of Borsod, in the midst of woody mountains, near the source of the Hejó. It has several mineral baths.—Also a town in the comitat of Szalad, 28 m. SW of Veszprim, at the foot of the mountains of Bakony.

TAPOLCZA (**KUN**). See **KEPLITE**.

TAPOLLAMA (**SERRA-DA**), a mountain-chain of Brazil, in the E part of the prov. of Rio-Grande, and S part of that of Santa-Catharina. It is about 180 m. in length, and runs from NNE to SSW, parallel to and at the distance of about 86 m. from the shore of the Atlantic.

TAPPA, a small island of the Asiatic archipelago, in the group of the Molucca islands, to the NE of the island of Latta-Latta, from which it is separated by a narrow channel. It has a small port on the E side, in which vessels can find safe anchorage.

TAPPA. See **NYFFE**.

TAPPAHANNOCK, a town of Essex co., in Virginia, U. S., on the SW side of the Rappahannock, about 50 m. above its entrance into Chesapeake bay. It has a good port on the river.

TAPPANTOWN, a village in Rockland co., in the state of New York, U. S., 2 m. W of the Hudson river, and 108 m. S of Albany.

TAPPANULY, a bay of the island of Sumatra, on the SW coast, in the Battas territory, in N lat. 1° 45', E long. 98° 40'. This bay, with the island of Mansalar, forms one of the finest harbours in the world. It is so spacious and well sheltered, that vessels of the largest size can find safe harbourage within it from all winds, and so numerous are its bays and ramifications that a large vessel might effectually elude a laborious research. Its banks are inhabited by Battas who carry on an active barter trade with the vessels which visit the harbour. This bay is noted for the kima cockle, a species of mollusca which attains the size of 3 ft. 3 in. in length, and 2 ft. 1 in. in breadth. The shell is white and several inches in thickness, and the fish when detached sometimes exceeds 25 lbs. in weight. The bay abounds also with corallines and madrepoes. On the N bank of the bay is a village of the same name, originally a British settlement, but ceded to the Dutch in 1818.

TAPTI, a river of Hindostan, which has its source in the W part of the prov. of Gundwana; separates the prov. of Berar and Kandeish; traverses the latter prov. and the S part of that of Gujerat; and after a course in a generally W direction of 450 m., throws itself into the gulf of Cambay, between Domus and Swally. Its principal affluents are the Goul and Anneer on the r.; and the Boaree, Guirna, and Panzeera on the l. Burhanpur and Surat are the chief places on its banks.

TA-PU, a district and town of China, in the prov. of Kwang-tung and div. of Chaou-chu-fu, in N lat. 24° 40', E long. 118° 43'.

TAPUERCA, or **ATAPUERCA**, a town of Spain, in the prov. and partido and 9 m. E of Burgos, near the source of the Pico.

TAPUL, a small island of the Sulu archipelago, to the S of Sulu island. It abounds with excellent water, is well-cultivated, and pastures large herds of cattle and goats.

TAQUA, a town of Upper Guinea, on the Gold coast, in the state of Aowin, 84 m. SW of Kumassi.

TAQUARAQU, a village of Brazil, in the prov. of Minas Geraes, on the r. bank of the Rio Guacuihi or das Velhas, and 24 m. N of Sabara.

TAQUARAL, a river of Brazil, in the prov. of Goyaz, which joins the Vermelho on the l. bank, below Goyaz.—Also a river of the prov. of Mato-Grosso, which joins the Peixe, an affluent of the Rio-das-Mortes.—Also two rivers in the prov. of Rio-de-Janeiro.—Also a mountain in the prov. of Mato-Grosso and district of Cuiaba.

TAQUARATINGA, a village of Brazil, in the prov. of Pernambuco and district of Limoeiro, on a mountain of the same name. This village is the oldest in the prov. The mountain has an alt. of 3,000 ft. above sea-level.

TAQUAREMA, a river of Brazil, in the prov. of São-Pedro-do-Rio-Grande and district of Alegrette, which runs W; receives the Jaguari, and joins the Santa-Maria, an affluent of the Paraguay.

TAQUARI, or **TEBICUARI**, a river of Brazil, in the prov. of São-Pedro-do-Rio-Grande and district of Triunpho. It has its source in the mountains of Geral, in S lat. 18°, to the E of the source of the Jacuihi, and after a course in a generally S direction of 105 m., joins that river on the l. bank. Its principal affluents are the Antas and Taquari-Mirim, the

latter of which it receives on the r.—Also a river of the prov. of Rio-de-Janeiro, an affluent of the bay of Angeo-dos-Reis.

TAQUARI-MIRIM, a river of Brazil, in the prov. of São-Pedro-do-Rio-Grande, an affluent of the Taquari.—Also a river of the prov. of Mato-Grosso, an affluent of the Coxim, which it joins on the l. bank, 8 m. above its confluence with the Taquari.

TAQUARITIBA, a village of Brazil, in the prov. of Parahiba and district of Pianco, on the Piranhaa. Millet, mandioc, and cotton are extensively cultivated in the environs.

TAQUASO. See **CHUQUAQUE**.

TAQUENE, **TACUNA**, or **TAQUILE**, an island of Bolivia, in the dep. of Cusco, district and 35 m. NNE of Chucuito, in Lake Titicaca or Chucuito, near the W bank. It is 9 m. in circumference, and is covered with gardens, orchards, and meadows. In its highest part is a plateau, on which are the ruins of an Indian town, the buildings of which are of stone, are vaulted, and exhibit great regularity.

TAR, or **PAMLICO**, a river of the state of North Carolina, U. S., which has its source in Person co., 8 m. SE of Roxboro; waters the cos. of Granville, Franklin, Nash, Edgecombe, Pitt, Beaufort, and Hyde; and after a course in a generally ESE direction of 180 m., flows by a wide estuary into Pamlico sound. Its principal affluent is Fishing creek.

TARA, a river of Russia in Asia, which has its source in the gov. of Tomsk and district of Kainak; runs W into the gov. of Tobolsk; waters the district of the same name; and after a course of about 180 m., joins the Irtysh on the r. bank, near the town of Tara.—Also a town in the gov. and 240 m. SE of Tobolsk, on the Arkarka, which, $\frac{1}{2}$ of a mile below, joins the Irtysh opposite the confluence of the Tara. Pop. 6,000. It consists of two parts, one of which, on a mountain, is enclosed by an earthen rampart, and possesses a fort. The lower part extends along the river into the plain. It contains two churches, a mosque, and manufactories of hats, vitriol, and leather. It has an active trade with Bokara and the Chinese empire. The lower part of the town is inhabited chiefly by Tartars. In the vicinity is the steppe of Baraba, in which there is a colony of exiles.

TARA, a river of Australia Felix, in Gipp's Land, an affluent of Port Albert.

TARA, a village of Sind, 12 m. SW of Tattah.

TARA, a small bay on the E coast of co. Down, opening 1 $\frac{1}{2}$ m. N by E of Ballyquintin-point.—Also a rivulet of co. Armagh, and co. Louth, which rises to the E of the town of Newtown-Hamilton; runs nearly parallel to the Newtown-Hamilton river, and falls into the Castletown or Dundalk river.—Also a hill in co. Wexford, with an alt. of 826 ft. above sea-level, situated 1 $\frac{1}{2}$ m. W of the nearest part of the coast, and 2 $\frac{1}{2}$ m. NE of Gorey.

TARA, **TARAH**, or **TARAGH**, a parish, containing a village and a celebrated hill of the same name, in co. Meath. Area 3,364 acres. Pop. in 1831, 641; in 1841, 586. A prominent feature, not only of the parish, but of the vast rich plain in the midst of which it lies, is the far-famed hill of Tara, a verdant, moundiah, flowingly-outlined mass, about $\frac{1}{2}$ m. in length from N to S, and rather less than $\frac{1}{4}$ m. in extreme breadth,—possessing a wavy, tumulated, tabular summit,—lifting up a large, solitary standing stone or monumental pillar on the crown of one of its tumuli,—sharing with the hill of Skreen, 1 $\frac{1}{2}$ m. to the E, and 507 ft. in alt., the power and interest of relieving the monotony of the vast central expanse of the plain of Meath.

TARABA, a town of Arabia, in the prov. of Sabya, 150 m. E of Mecca. It is well-fortified.

TARABEL, a village of France, in the dep. of the Haute-Garonne, cant. and 4 m. SSE of Laut. Pop. 340.

TARBOLUS. See **TRIPOLI**.

TARABUZUN, a pashalik of Asiatic Turkey, extending southwards from the coast of the Black sea to the frontier of Sivas, and westwards to the river Joruk or Tchoruk. It is a beautiful and richly varied district of mountain-slopes, valleys, and plains, and comprises a large portion of the ancient *Pontus*. On its coast are the ports of Khotz, Solocler, Riza, Eaki, Tarabuzun, Kopa, Makral, Terabolis, Kerasun, Ordu, Fatsa, and Unieh.—The cap., of the same name, is situated on the lower slope of the mountain-chain which rises abruptly from the shores of the Black sea. It is divided into two parts, of which the more ancient probably marks the site of the ancient *Trapensu*. With the exception of a small harbour on the E side of the city, it has only an open roadstead; yet the journey into Persia from this port is shorter by several days than that by Sivas.

TARACENA, a town of Spain, in the prov. and 5 m. ENE of Guadalajara, near the l. bank of the Henares. Pop. 460.

TARACHTCHA, a town of Russia in Europe, in the gov. and 68 m. S of Kiev, on a small affluent of the Ros.

TARADELL, a town of Spain, in the prov. and 30 m. NNE of Barcelona and partido of Vich, on a rugged locality. Pop. 1,600. The streets are sloping, but there is a handsome square ornamented with a fine fountain. It has manufactories of woollen fabrics.

TARAGHUR, a fortress and town of Hindostan, in the prov. of Ajmir. The fortress stands on a hill, and is nearly 2 m. in circumf. It is well supplied with water, and is to a great extent bomb-proof.—Also a fortress of the Punjab, in N lat. 32° 7', E long. 76° 30'.

TARAGUDO, a town of Spain, in the prov. and 15 m. NNE of Guadalajara, and partido of Brihueja, on a hill, in a fine and salubrious situation. Pop. 150. In its vicinity is a palace of the duke of Infantado, with a fine park, orangery, and orchards.

TARAGUES, an Arab tribe of Nubia, in the prov. of Shendy. They inhabit El-Booydah, and employ themselves in the salt-works of that town.

TARAI, or **TARIYANI**, the name given to a tract of highly absorbent land in India, skirt ing the S edge of the outlying ranges of the Himalaya, between the hills and the plains of India, and to the E of the Ganges, with a breadth of about 10 m., usually covered by forest, and remarkable for its utter want of water.

TARAK, a village of Persia, in the prov. of Irak-Ajemi, in the district and vicinity of Ispahan. It has manufactories of articles in ivory and ebony.

TARAKLI, or **TEREKLI**, a town of Turkey in Asia, in Anatolia, and sanj. of Sultanieh, on the r. bank of a river of the same name, an affluent of the Sakaria, and 48 m. SE of Isnikmid. It contains 400 houses, and seems a place of considerable prosperity. It has manufactories of gold and wood ware, and several dye-works. The vine and mulberry are extensively cultivated in the environs. This is probably the *Heradia* of the ancients.

TARALGA, a creek of New South Wales, in the co. of Argyll, an affluent of Guinecor creek.

TARAMANDI, a lake of Brazil, in the E part of the prov. of Rio-Grande-do-Sul. It is 30 m. in length from N to S, and 12 m. in breadth, and discharges itself by a river of the same name into the Atlantic.

TARANCON, a town of Spain, in the prov. of

Cuenca and partido of Ucles, 45 m. SE of Madrid, in a rugged locality, near the r. bank of the Rianzaros. Pop. 4,790. The streets are irregular and ill-paved; the houses, although of stone, are poorly built, and the fountains are in bad taste. The parish-church, originally Gothic, was restored by Philip II., and has a fine front in the Ionic order. There are also several convents and an hospital. Linen and common cloth are the chief manufactures of the town, but the locality is noted for its wine. Coal is also found in the vicinity.

TARANNON, a river of Montgomeryshire, which runs into the Severn, near Corfe-castle, about 5 m. W of Newton.

TARANOVKA, a town of Russia in Europe, in the gov. and 27 m. SSW of Kharkov, and district of Zmiev.

TARANSAY, an Hebridean island of the Harris group, Inverness-shire, off the entrance of West Loch-Tarbert, 1½ m. from Ru-Grodmish. Its length from E to W is 4½ m.; its extreme breadth upwards of 2 m. It consists of two peninsulated hills, probably 800 ft. in height, connected by a narrow sandy isthmus.

TARANTA, a mountain near Arkiko, on the N frontier of Tigre, in Abyssinia, on the road from that city into the interior. On its summit is the village of Halai. Ruppell ascertained the height of this mountain to be 8,600 ft. A small stream creeps from the mountain-plain westwards to the valley of the Mareb; all the other streams southwards to Ategerat, it appears, flow towards the coast.

TARANTA, a town of Naples, in Abruzzo-Citra, 18 m. SSW of Lanciano, near the l. bank of the Avent no.

TARANTAISE (THE), or **TARANTASIA**, a province of the Sardinian states, in the E of Savoy, between Faucigny on the N, and Aosta on the E. Its superficial extent is about 780 sq. m.; its pop. 50,000. Its surface is covered with mountains and rocks, ranges and spurs of the Cottian Alps, and is little susceptible of culture. By the industry of the inhabitants, however, the least sterile parts of it have been brought into cultivation, and made to produce corn, saffron, fruit, and chestnuts; and the pastures nourish a fine race of cattle. Its principal river is the Isere, which rises on Mount Iseran in the SE part of the prov.

TARANTASCA, a village of the Sardinian states, in the prov. and 10 m. N of Coni, on the l. bank of the Grana. Pop. 1,200.

TARANTO, or **TARENTO**, an ancient town of the kingdom of Naples, in the prov. of Otranto, 58 m. WNW of Lecce. It is built on a small island at the N extremity of the great bay called the gulf of Taranto, in N lat. 40° 28', E long. 17° 35', and has several advantages as a maritime position, having behind it, towards the N and E, an inlet called Il Mare Piccolo, which extends a considerable way into the interior, while it communicates with the sea by two channels, one on each side of the island, which is occupied by the town. A castle of some strength protects the harbour. Pop. 18,000. The surrounding country is fertile, but the trade of the town and neighbourhood is inferior to what it might be rendered in a populous and industrious country. Some intercourse is carried on with other ports on the Mediterranean; but the chief support of the inhabitants of T. is derived from fishing. T., at present a town of little interest, filled a conspicuous place in ancient history. It was founded 703 a. c. Its inhabitants, descended from a colony of Greeks, kept up their connection with the mother country, and on the approach of the Roman arms after the conquest of Samnium, about 280 a. c., called to their

aid Pyrrhus, king of Epirus. The Tarantines, abandoned by Pyrrhus, and unable to defend themselves, ultimately called in the Carthaginians; a step which, coinciding with the collisions between that nation and the Romans in Sicily, was the cause of the first Punic war.

TARANTO (GULF OF), a spacious bay of the Mediterranean, formed between the parallels of $39^{\circ} 21'$ and $40^{\circ} 30' N$, by the two extremities of the Italian peninsula. Point Alice on the SW, and Cape Maria-de-Leuca on the NE, form its points of entrance. The rivers Brandano, Bisento, Agri, Sinno, and Cosale, flow into this gulf.

TARAPACA, a province of Southern Peru, in the dep. of Arequipa, lying between the parallels of 19° and $21^{\circ} 30' S$, and the meridians of $68^{\circ} 15'$ and $70^{\circ} 22' W$; and bounded on the N by Arica; on the E by Bolivia; on the S by the desert of Atacama; and on the W by the Pacific. It is subdivided into the 4 *curatos* of T., Peca, Sibuya, and Camina; and has a mixed pop. of about 10,000, chiefly Aymara Indians. Its cap. of the same name is situated in $19^{\circ} 56' S$ lat., and $69^{\circ} 35' W$ long., at the mouth of a ravine which runs down from the cordillera of Lerima. The cultivation in the vicinity consists of maize, wheat, lucern, fruits, and a few vegetables. See articles ATACAMA, IQUEQUE, and TAMARUGAL.

TARAPIA, or **THERAPIA**, a town of Turkey, in the sanj. of Viss, 12 m. NNE of Constantinople, in N lat. $41^{\circ} 8'$.

TABAPUR, a town of Hindostan, in the prov. of Bahar, in N lat. $25^{\circ} 7'$.—Also a town and fortress of Hindostan, situated on a high point of land on the coast between Bombay and Surat, in N lat. $19^{\circ} 30'$.

TARARE, a town of France, in the dep. of the Rhone, on the l. bank of the river Tardine, 16 m. SW of Villefranche, in a valley at the foot of a mountain to which it gives name. Pop. of com. in 1846, 9,690. It has manufactures of muslin and printed cottons, cotton-thread, leather, and pottery ware. The cant., comprising 16 coms., had a pop. of 26,291 in 1846.

TARASCON, a town of France, in the dep. of Bouches-du-Rhone, 9 m. N of Arles, on the Rhone, opposite Beaucaire, with which it communicates by a bridge of boats. Pop. in 1846, 11,968. Of public buildings, the principal is the castle, now a prison, a massive structure of hewn stone, surmounted by a platform affording a view of the adjacent country and of the Rhone, which here approaching to its mouth, rolls along a broad and rapid volume of water. Some of the churches are likewise handsome buildings. The inhabitants manufacture woollens, silks, and stockings, and conduct an export trade in wine, brandy, olive-oil, almonds, and other products of the south of France.

TARASCON-SUR-ARIEGE, a town of France, on the l. bank of the river Ariege, 9 m. S of Foix. Pop. 1,551. In the neighbourhood are the iron-mines of La Rancie.—The cant. comprises 24 coms. Pop. in 1846, 17,775.

TARASORKA, a town of Russia, in the gov. of Charkov, 25 m. from Bogodukhof.

TARASP, a village of Switzerland, in the cant. of the Grisons, 2 m. S of Schuls, near the r. bank of the Inn.

TARAVO, a river of Corsica, which runs SW into the gulf of Valinco, after a course of 30 m.

TARAZONA, a town of Spain, in the prov. and 55 m. SE of Logrono, at the foot of the hill of Moncayo. It is a bishop's see, and has three churches and seven monasteries. Pop. 10,000, whose chief employment is the manufacture of coarse brown cloth. The environs produce large quantities of excellent fruit.

TARAZONA-DE-LA-MANCHA, a town of Spain, in the prov. and 54 m. SSE of Cuenca, in a fertile plain, watered by the Jucar. Pop. 7,000, who carry on a trade in the products of the country, particularly wine and oil.

TARBAGATAI, the chief place of a division of Sungaria, at the E foot of Mount Takhta, in N lat. $46^{\circ} 8'$, E long. $82^{\circ} 38'$, on the river Imily. It is surrounded by a strong wall, and contains 6,000 inhabitants.

TARBAT, a parish in the extreme NE of the co. of Ross and Cromarty, bounded on the N by the Dornoch frith. Area 5,081 acres. Along the coast are six natural harbours, and a number of small creeks. The chief harbour is at the village of Portmaholmack. Pop. in 1831, 1,809; in 1851, 2,151.

TARBATNESS, the point of the peninsula of the above parish, a headland which splits the waters of the Dornoch frith from those of the Moray frith, sweeping round to form the frith of Cromarty. On this narrow and far-projecting point has lately been erected a lighthouse in N lat. $57^{\circ} 51'$, E long. $3^{\circ} 48'$.

* * * **TARBERT**, or **TARBET**, a name applied to numerous places in Scotland, chiefly where there are such narrow necks of land between opposite indentations of sea or lake, as afforded in the primitive state of Scottish navigation an easy portage for curraghs and boats.

TARBERT, a port-town in the p. of Kilnaughtin, co. Kerry, on the coast road from Limerick to Tralee, 3 m. W by S of Glinn, at the head of a small bay, opposite Clonderalaw bay, in co. Clare, which bears the name of Tarbert bay. The steamers which ply between Limerick and Kilrush usually call off T. both in upward and in downward transit; and they achieve an average passage hence to Limerick in 4 hours. Considerable quantities of pigs, butter, and corn are shipped here for Limerick. Pop. in 1831, 956; in 1841, 1,024.

TARBERT (EAST and WEST), two sea-lochs on opposite sides of the southern peninsula of Argyshire, approaching each other to within 1 m., and, together with the narrow isthmus between them, separating Kintyre from Knapdale. The W loch opens 13 m. due E of Ardmore-point in Islay; extends, in nearly a straight line, NE; and measures 11 m. in length, and about $\frac{3}{4}$ m. in mean breadth. At its head is a pier or quay for the accommodation of the Islay steam-packet.—The E loch is of small size,—only about 1 m. long, and nowhere more than about 3 furl. broad; but it is a curious and singularly safe and landlocked natural harbour, and is entered by a narrow and circling passage between low ridges of naked rock. On its S side, near the head, is a steam-boat quay. Behind the quay, and around the head of the loch, stands the neat, picturesque, and crowded village of Tarbert. T. is the grand seat of the celebrated Loch-Fyne herring-fishery; and, additional to its own pop., it is the resort, during the fishing-season, of several hundreds of stranger fishermen.

TARBES, a town of France, the capital of the dep. of Hautes-Pyrenees, situated on the l. bank of the Adour, 22 m. ESE of Pau, and 50 m. SW of Auch, in N lat. $43^{\circ} 13'$. It is surrounded with a wall, and defended by an old castle, and forms the key to communication with the roads conducting through the Pyrenees. The streets are tolerably broad, and well paved; the houses, though low, are constructed of brick or grey marble, and covered with slate. The only public edifices worth notice are the modern cathedral, the churches, the palace of the bishop, the theatre, and an hospital. Pop. in 1821, 8,035; in 1846, 13,521. There are here manufactures of linen, handkerchiefs, paper, knives, small copper articles, and leather. On 20th March 1814,

the French army under Soult were forced from their position here by Wellington.

TARBET (East and West), two deep indentations of the sea, on the opposite coasts of Harris, approaching each other to within a $\frac{1}{2}$ m. See **HARRIS**. East Loch-Tarbet is $5\frac{1}{2}$ m. long, and from $4\frac{1}{2}$ to nearly 2 m. broad; it forks at the head into two slender bays; and it embosoms several islets, and has the considerable island of Scalpa at its entrance. West Loch-Tarbet is 6 m. long, and diminishes in breadth from $4\frac{1}{2}$ m. to nearly a point. It is screened from the W winds by Taransay; and it is overhung by lofty mountains, which stoop precipitously down to its margin. At its head stands the solitary village of Tarbet, the seat of a mission on the Royal bounty.

TARBET, or **TURBOT ISLAND**, a small inhabited island in the p. of Omev, co. Galway, off the N side of Anlhear harbour. It measures about 1 m. in length, and 3 furl. in breadth. It is well cultivated, and has about 100 inhabitants.

TARBO, a town of Upper Guinea, on the Gold coast, on the r. bank of the Ancobra, 9 m. above its embouchure.

TARBOLTON, a parish in Kyle, Ayrshire. Its length is between 7 and 8 m., and its breadth about $\frac{1}{2}$ m. It lies about 5 m. from the sea-coast, and has an aggregate elevation above sea-level higher than the medium height of the co. The rivulet Faile flows through the interior to the Ayr. Pop. in 1831, 2,274; in 1851, 2,824.—Tarbolton, a considerable village, stands near the centre of the cognominal parish, on the r. bank of the rivulet Faile, 4 m. W of Mauchline. Weaving, in various departments of cotton, woollen, and silk, is carried on to a considerable extent here.

TARBOROUGH, a township of Edgecombe co., N. Carolina, U. S., on the Tar river, 85 m. above its mouth, and 63 m. E by N of Raleigh. Pop. in 1850, 700. Large quantities of beef, pork, Indian corn, tobacco, &c. are collected here for exportation.

TARBRET, a handsome village of co. Kerry, on the Shannon, 24 m. WSW of Limerick.

TARCHIN, a town of Bosnia, in the sanj, and 34 m. SE of Trawnik, on the l. bank of the Lepenitza.

TARZAL, a town of Hungary, 2 m. W of Tokay. The wine produced at this place can scarcely be distinguished from Tokay.

TARZYN, a village of Poland, in the obwodzie and 21 m. SSW of Warsaw.

TARDAGIS, a village of Spain, in the prov. and 6 m. WSW of Burgos. Pop. 780.

TARDEBIGG, a parish in Worcestershire, $2\frac{1}{2}$ m. E by S of Bromsgrove, crossed by the Worcester and Birmingham canal. It includes the hamlets of Bentley, Redditch, and Wibbeath-Yields, with Tutnall and Copley. Area 8,994 acres. Pop. 6,423.

TARDES, a river of France, in the dep. of Creuse, which rises 3 m. ENE of Croce; runs SW; and flows into the Cher on the l. bank, after a course of 45 m.

TARDETS, a village of France, in the dep. of Basses-Pyrenees, 30 m. WSW of Pau, on the r. bank of the Saison. Pop. 500.

TARDIERE (LA), a village of France, in the dep. of La Vendee, cant. and 2 m. NNE of La Chataigneraye. Pop. 1,200.

TARDOIRE, a river of France, which rises near Chalus, in the dep. of Haute-Vienne; runs NW, then S, and then NW; and after a course of 48 m. becomes spent in the vicinity of Couleus.

TAREIRI, a river of Brazil, in the prov. of Rio-Grande-del-Norte, which runs into the Atlantic, in S lat. 5°, after a course of 18 m.

TAREM. See **TARUN**.

TARENA, a river of New Granada, in the prov.

of Ystmo, which rises in the central ridge of the isthmus; runs ENE, collecting the waters of many other tributary streams; and enters the Atlantic by four mouths, forming three large islands in the gulf of Darien. This river also forms a large lake of the same name, at some distance from its entrance into the sea.

TARENT, an island on the W shore of the Persian gulf, immediately opposite Ketif. It is about 7 m. in length and in breadth, is well supplied with good water, and produces abundance of fruit.

TARENT, or **TARRANT**, a river of Dorsetshire, which rises near Studhampton, and gives name to several villages through which it passes in its way to where it falls into the Stour, 3 m. SE of Blandford.

TARENTO. See **TARANTO**.

TARE, a beautiful rivulet of Kirkcudbrightshire, formed by the union of Anstool-burn and Glengap-burn. Their united stream, afterwards augmented by seven or eight small burns, runs S 11 m. to the Dee, $1\frac{1}{2}$ m. above Kirkcudbright.—Also a rivulet of Athole forest, in Blair-Athole, Perthshire, which rises on the W side of Benvrackie, and flows 9 m. E to a point 2 m. S of Loch-Tilt, where it is joined from the N by the brief stream, misnamed the Tilt, and from the E by a stream of 5 m. run called Glenmorewater. The whole course of the Tarf is among the savage but sublime scenery of the most towering and impervious part of the great central mountain-range of Scotland.—Also a rivulet of about 7 m. length of course, in Inverness-shire, which rises near the great glen between Lochs Oich and Ness, and circles round the SW end of Stratherrick to the head of Loch-Ness at Fort-Augustus.

TARGON, a town of France, dep. of the Gironde, 17 m. NW of La Reole. Pop. 1,200.

TARGOWICA, or **TERGOWICE**, a town of Russian Poland, in the gov. of Podolia, on the river Simleha, 76 m. ESE of Breslaw. A confederation was formed here in 1791, by some Polish noblemen, which vainly attempted to support the new constitution of Poland.

TARHAR, a small district of Hindostan, in the prov. of Allahabad, bounded on the N by the river Jumna, near its confluence with the Ganges. Its inhabitants are chiefly Hindus.

TARIEGO, a village of Spain, in the prov. and 7 m. SSE of Palencia, on the l. bank of the Pisuerga.

TARIFA, a town of Spain, situated on a small bay on the N side of the straits of Gibraltar, in N lat. 36° 0', W long. 5° 35', 17 m. WSW of Gibraltar. It is fortified with a wall and towers; and in 1811 a British force lodged in it baffled all the efforts of the French to take it after a long siege. It was the *Julia Traiecta* of the Romans, and received its present name from the Moors.

TARIFFVILLE, a village of Hartford co., in Connecticut, U. S., 12 m. NNW of Hartford.

TARIJA, a district and town of Bolivia, in the dep. of Potosi, stretching along a river of the same name, which descends from the Tacora mountains, and flows ESE to the Vermejo. The serene sky and a fine temperature produce wheat, maize, the herb of Paraguay, the cocoa, the vine, and flax, which is cultivated merely for the sake of its seed. A vast number of cattle and sheep also find pasturage in this district.—The town is situated in S lat. 21° 44', 190 m. N of Salta.

TARISSA, or **TARCSA**, a river of Hungary, which descends from the E flank of Mount Brinigh, in the com. of Zips; and flows SE to the Hernath, which it joins after a course of 70 m.

TARKA, a river of S. Africa, which joins the Grand-Brakke, after a SW course of 80 m.

TARKHAN, a town of Russia, in the gov. of

Taurida, on the W coast of the Crimea, in N lat. 45° 21'.

TARKHU, a town of Asiatic Russia, in the prov. of Daghestan, 72 m. SSE of Kisliar, 2½ m. from the Caspian sea, on the slope of a mountain on the crest of which is the fortress of Burnu. Pop. 9,000.

TARLAND-AND-MIGVIE, a parish, consisting of four detached districts, in the SW division of Aberdeenshire. The entire area is about 22 sq. m. The village of T. stands nearly in the centre of the subdivision of Mar, called Cromar, 9 m. NE of Ballater. Pop. in 1831, 1,074; in 1851, 1,197.

TARLETON, a parish of Lancashire, 8 m. N by E of Ormskirk. Area 5,405 acres. Pop. 1,945.

TARLETON, a township of Pickaway co., Ohio, U. S., 17 m. NE of Chillicothe. Pop. in 1850, 456.

TARMA, a province of Peru, comprehending several minor districts, and bounded by the prov. of Truxillo on the N, the Apurimac on the E, and the prov. of Lima and Huancavelica on the S. It is very productive in maize, and has abundance of cattle, the wool of which is here manufactured into cloth. It has also numerous mines of silver and quicksilver, which are worked to considerable profit.—Its capital, of the same name, is situated on the N shore of the river Chanchamayo, a branch of the Puro, in 8 lat. 11° 36', in a deep narrow valley. Pop. 5,000, chiefly Creoles, Mestizoes, and Indians. The adjoining district is fertile; but the climate is unhealthy, as the surrounding mountains prevent a free circulation of air. Quicksilver, antimony, and silver are worked in the vicinity; and in several pits they dig saltpetre of an excellent quality.

TARMON, a rivulet of cos. Donegal and Fermanagh, which rises on the NW side of Crockinagoe, near Lough Derg, and flows about 5 m. S to Lower Lough Erne.—Also a hamlet and fishing harbour in the p. of Kilmore-Erria, co. Mayo, on the W side of Blacksod bay.

TARMONBARRY, or TERMONBARRY, a parish 7 m. E by S of Strokestown, in co. Roscommon, containing part of the village of Rosekey. Area 9,295 acres. Pop. in 1831, 4,048; in 1841, 4,279.

TARN, a river of France, which, rising in the SE of the dep. of Lozère, flows SW into the dep. of Aveyron; turns NW and then WSW, and joins the Garonne on the r. bank after a course of 220 m. Its principal affluents are the Dourbre, the Dourdon, the Rance, and the Agout, on the l.; and the Tescoa and Aveyron on the r.

TARN, a department in the S of France, formed of part of the old province of Languedoc, and bounded by the dep. of Aveyron on the N and E; by Herault on the SE; by Aude on the S; and by Haute-Garonne and Tarn-et-Garonne on the W. It has an area of 574,414 hectares; with a pop. in 1801 of 270,908; in 1841 of 351,656; in 1851, of 363,073, of whom above 50,000 are Protestants. Its surface is an undulating plain, traversed by several chains of small hills, which on the S and SE are connected with the Cevennes. Its principal river is the Tarn, here a large stream flowing from the NE to the Garonne, and navigable to Alby. The next river in importance is the Agout. In the N are the Aveyron and the Viaur. The soil is in general fertile; the climate temperate. The productions are wheat, barley, maize, hemp, flax, vines, chestnuts, fruit, coriander and anise seeds, and saffron. The culture of the vine is extensive. Mines of iron and coal are wrought. The department is divided into the 4 arrondissements of Alby, Castres, Lavaur, and Gaillac, which are subdivided into 35 cantons, and 319 communes.

TARN-ET-GARONNE, a department in the S of France, formed so lately as 1806, of portions of the

depts. of Lot and the Haute-Garonne, Lot-et-Garonne, Gers, and Aveyron. It is intersected on the N by the dep. of Lot; by Aveyron on the NE; by Tarn on the E; by Haute-Garonne on the S; Gers on the SW; and Lot-et-Garonne on the NW. It has an area of 371,367 hectares; with a pop. in 1821 of 238,143; in 1841, 239,297; in 1851, 237,553, of whom above 40,000 are Protestants. Its surface is a plain traversed by three chains of hills, the highest of which is said not to exceed 1,200 ft. Its principal rivers are the Tarn, which here receives the Tescon, the Aveyron, and the Gimone; and the Garonne. Its soil is in general fruitful, and its climate mild. Its productions are wheat, barley, maize, hemp, flax, beetroot, vines, chestnuts, almonds, and figs. The pastures, from the general deficiency of rain, are of comparatively limited extent. Manufacturing industry is of small extent. The department is divided into the 8 arrondissements of Montauban, Moissac, and Castel-Sarrasin; which are subdivided into 23 cantons, and 193 communes.

TARNOCZ, or TARNOWCA, a town of Hungary, in the com. of Liptau, 40 m. W of Kesmark. Pop. 1,100.

TARNOE, an island in the Baltic, off the SE coast of Sweden, in the group called the Skæres of Carlscrona.

TARNOGROD, a town of Poland, 52 m. WSW of Balcz. Pop. 1,700.

TARNOPOL, a circle of Austrian Galicia, bordering on Russia on the E and N. Its territorial extent is 66·9 German sq. m. Pop. in 1848, 211,248. It was ceded in 1810 to Russia, as a recompense for the services which she had rendered to France in the campaign of the preceding year, but was restored to Austria at the congress of Vienna.—The capital, of the same name, is situated on the river Sireth, 84 m. ESE of Lemberg. Pop. 13,000, of whom a large proportion are Jews. The principal manufacturing establishments are tanneries, and woollen and linen manufactories.

TARNOS, a village of France, in the dep. of Landes, cant. and 3 m. N of Saint-Esprit. Pop. 1,300.

TARNOW, a circle of Austrian Galicia, bounded on the N by the Vistula, and by the river Dunajec on the W. Its area is 71·1 German sq. m.; and its pop. in 1843, 240,000. It is in general a level country, with the exception of some hills in the S.—Its capital, of the same name, is situated on the river Biala, an affluent of the Dunajec, 47 m. E of Cracow, in N lat. 59° 0'. Pop. 4,400. It is a bishop's see, and has a gymnasium and high school. It has pleasant environs; but is on the whole ill-built.

TARNOWITZ, a town of Prussian Silesia, on the confines of Poland, 42 m. SE of Oppeln. Pop. 2,200. Productive mines of silver, iron, lead, and calamine are wrought in the vicinity.

TARO, a river which has its source in the Apennines, in Sardinia, in the div. of Genoa and prov. of Chiavari. It runs first NE; enters the state of Parma; bathes Compagno; passes to the W of Parma; and 14 m. NNW of that town throws itself into the Po by the l. bank. It receives the Zeno on the l., and has a total course of about 75 m. Under the French empire, this river gave its name to a dep. of which Parma was the capital.

TARODANT, or TERODANT, a town of Morocco, in the prov. of Susa, on the r. side of the river of that name. Pop. 10,000. It is built of stone, and is enclosed by walls 25 ft. in height, crenelated in all their extent, and of prodigious thickness. It has manufactories of saltpetre, and salt-works, and several tanneries and dye-works. The surrounding country is well-cultivated, and produces maize, water-melons, dates, olives and grapes of the largest size.

TAROLI, a small town of Hindostan, in the prov. of Agra, 26 m. E by N of Jansi.

TARONCA, a town of Portugal, in the prov. of Beira comarca and 12 m. S of Lamego. Pop. 1,689.

TAROUSSA, or **TARESA**, a town of Russia in Europe, in the gov. of Kaluga, 42 m. NNW of Tula, on the l. bank of the Oka, at the confluence of the Taroussa. Pop. 1,000. It has still some remains of an earthen rampart, by which it was formerly enclosed, three churches, and several shops. Wall-cloth is its chief article of manufacture. T. was formerly a small principality belonging to the younger princes of Tchernigov.

TARPA, a town of Hungary, in the comitat of Szathmar, 10 m. NNE of Matecz, in the midst of a woody marsh, near the r. bank of the Theiss.

TARPAULIN COVE, a harbour of the state of Massachusetts, U. S., on the S side of Naushon island, in Vineyard sound. It has a lighthouse on its W side.

TARPERON, or **TARPEZON**, a village of France, in the dep. of the Côte-d'Or, cant. and 1½ m. NW of Aignay. Pop. 180.

TARPORLEY, a parish and market-town in the ex-palatine of Chester, 10 m. ESE of Chester, comprising the townships of Eaton, Rushton, Utlington, and T. Area 6,057 acres. Pop. in 1801, 1,866; in 1831, 2,391; in 1851, 2,632. The town, which is a place of considerable antiquity, is pleasantly situated on the London road to Chester, and within one m. of the Nantwich and Chester canal. It is neatly built, and consists chiefly of one long street, well-paved. The inhabitants are principally occupied in the manufacture of stockings, and in agricultural pursuits. About 2 m. to the S are the extensive ruins of Beccles-castle, a fortress, the strength of which was once proverbial.

TARQUI, a village of Ecuador, in the dep. of Assuay, prov. and 7 m. S of Cuenca, in the midst of lofty mountains, and near the source of the Paute. This village was visited early in the last century by La Coudamine. A battle took place in its vicinity between the Peruvians and Columbians in 1829.

TARQUINO, or **TARQUINO (SIERRA DE)**, a chain of mountains in the E part of the island of Cuba. It attaches itself on the E to the Sierra-de-Cobre, and terminates on the W in Capo Cruz. Its S base is lashed by the Atlantic. Its highest summit bears the same name.

TARAPIL, a bay on the SW coast of the island of Santa-Antonia, Cape Verd archipelago, at the mouth of a river. It affords good anchorage.

TARRAGO, a lagoon of New South Wales, in the co. of Argyle, between Breadalbane plains and Lake George.

TARRAGONA, an administrative province and a town of Spain, in Catalonia.—The prov. contains 7 partidos, and had a pop. of 253,477 in 1834; and 290,000 in 1849.—The town and port of T. is situated near the mouth of the river Francolí, in N lat. 41° 9', 6 m WSW of Barcelona. Pop. 11,000. It is built on a hill, and is surrounded by walls with turrets. T. is the see of a bishop, and has a large cathedral in the Gothic style. It was under the Romans the chief town of the province called *Tarraconensis*, and in 516 was the seat of a church council. It was occupied by the British in the beginning of the 18th cent., with an intention of rendering it a naval station, for which, however, the harbour was not well-calculated, and on the acquisition of Gibraltar in 1704, the design was abandoned. In 1810, it was taken by the French; and an attempt to retake it, in June 1813, by a force under Sir John Murray, was not successful.

TARRAKAI CHANNEL (OF), or **GULF OF TARTARY**,

an arm of the sea, which extends NNE between the island of Sagalin and Mandshuria. It forms the N part of the sea of Japan, and is 450 m. in length from N to S, and 180 m. in extreme breadth. On the N it communicates by a narrow strait with the gulf of Sagalin.

TARRAMUNGALA, a mountain of New South Wales, in the co. of Argyle, 4 m. N of Lake George.

TARRANARKI, a district of New Zealand, in the W part of the prov. of New Ulster. Near its centre is a volcanic mountain, named Egmont or Taranaki, which has an alt. of about 8,840 ft. above sea-level. In its N part are Port Eliot and New Plymouth.

TARRANO, a village of Corsica, in the cant. of Alesani, 48 m. NE of Ajaccio, at the foot of lofty mountains, near the l. bank of the Alesani. Pop. 394.

TARRAS, a small but romantic river in Eskdale, Dumfries-shire, which rises on the S side of Hartgarth, and runs 9 m. S and SSW to the Esk, 2½ m. below the town of Langholm.

TARRASA, a judicial partido and town of Spain, in the prov. of Barcelona. The partido comprises 32 pueblos. The town is 18 m. NNW of Barcelona, in a mountainous locality. Pop. 5,118. It has a collegiate and two other churches, a convent, and an hospital. It has manufactories of fine woollens.

TARRATA, a mountain of New South Wales, in the Wellington district, near the Kalingalungaguy river.

TARRAY, or **DYUNBURN**, a river of Australia-Felix, in the district of Western Port, an affluent of the Loddon.

TARREGA, a town of Spain, in the prov. and partido and 30 m. ENE of Lerida, in a pleasant and fertile plain. Pop. 3,915. Its streets are spacious and well-paved, and the houses well-built. It has three convents, an hospital, and cavalry barracks. It possesses several distilleries, and carries on an active trade in grain, wine, and oil.

TARRENGOWER, a mountain of Australia-Felix, in the district of Western Port, near the Loddon.

TARRETBURN, a township in Bellingham p., Northumberland, 4½ m. NW of Bellingham. Pop. in 1831, 265; in 1851,

TARRINGTON, a parish in Herefordshire, 6½ m. WNW of Ledbury. Area 2,224 acres. Pop. in 1831, 540; in 1851, 534.

TARRING (WEST), a parish in Sussex, 1½ m. NW by W of Worthing. Pop. in 1851,

TARSET (WEST QUARTER), a township in Thorneburn p., Northumberland, 18 m. NW of Hexham. Area 17,408 acres. Pop. in 1831, 149; in 1851, 173.

TARSIA, a town of Naples, in the prov. of Calabria-Citra, district and 15 m. SSE of Castrovillari, in a fertile valley, near the l. bank of the Crati. Pop. 1,140. It has two parish churches.

TARSUS, a city of Asiatic Turkey, the ancient capital of *Cilicia*, situated in a fertile plain on the r. bank of the Cydnus, 9 m. above its embouchure. The houses are interspersed by gardens and orchards; they seldom exceed one story in height, are flat-roofed, and mostly constructed of hewn stone derived from the demolition of the ancient edifices. The castle is said to have been built by Bajazet; and the town is partly surrounded by a wall probably the remains of that erected by Harun-al-Raschid. The city contains public baths, a number of mosques, several handsome caravanserais, and a small ancient church. The land in the neighbourhood is exceedingly fertile, yielding wheat, barley, sesame, and cotton, which are exported to Malta, and thence to Spain and Portugal. Copper from Maden, and gallnuts from the mountains, are also staple commodities. The imports consist chiefly of

rice, sugar, and coffee. The pop. during winter is stated at 60,000. The Turkmen migrate with their families in summer to the uplands of Tarsus. There are a few families from Cyprus, and a few Europeans. Mr. Barker reports, that the air of T. is unhealthy during the months of July and August, when the town and its environs are subject to exhalations productive of putrid and intermittent fevers. "The principal cause of this evil is a stagnant lake, about 80 m. in circumf., now a few miles from T., which formerly communicated with the sea, but which is now separated from it by a sand-bank. This is the harbour mentioned by Strabo, which he says was the port of T. Indeed, its position leads us to infer that the sea once came up to T.; but as the alluvium of the river has raised the ground considerably, it would be easy to drain this lake, while the ground reclaimed would be well adapted to the cultivation of sesame, cotton, and wheat, and its incomparable fertility the first year would no doubt repay a thousand-fold all expenses." T. certainly possesses a very high antiquity, and is said by Arrian and Strabo to have been founded by Sardapalus on the same day with Anchiale, while others are of opinion that it was a Grecian colony founded by Triptolemus. It was much favoured by Augustus, as well as Adrian, and rose to such celebrity as to rival Athens, Antioch, and Alexandria, in wealth and grandeur, as well as in the cultivation of literature and science. It was also adorned with a number of magnificent temples, as well as with a gymnasium and theatre. It has, however, been subject to so many vicissitudes, and has been so often taken and plundered, as to retain scarcely a vestige of its former magnificence. Hardly a single inscription, or any monument of beauty or art, can now be discovered.

TARSUL, a village of France, in the dep. of the Côte-d'Or, and cant. of Is-sur-Tille, on the Jignon. Pop. 317.

TARTAKOW, a town of Galicia, in the circle and 88 m. NE of Zolkiew, in a marshy locality, on a small affluent of the Bug. It has manufactories of wood ware.

TARTARAGHAN, a parish of co. Armagh, 3½ m. NNE of Loughgall, containing the villages of Maghery and Milltown. Area 11,612 acres, of which 1,917 acres are in Lough Neagh. Pop. in 1831, 6,321; in 1841, 7,313.

TARTARAS, a village of France, in the dep. of the Loire, cant. and 8 m. NE of Rive-de-Gier, on a hill, near the l. bank of the Gier and of the Givors canal. Pop. 700. Coal is wrought in the environs.

TARTARO, a river of Austria in Lombardy, which has its source in the prov. of Verona, district and 1¼ m. ESE of Bardolina; runs first S; then SE, passes Villa-Franca; forms afterwards to some extent the boundary-line of the provinces of Mantua and Polesina; turns ESE into the latter prov.; waters Trecenta; and, after a total course of about 66 m., joins the Castagnaro, on the l. bank, to form the Blanco canal. In the lower part, which is navigable, its banks are generally marshy.

TARTARY,

A name vaguely given to a very extensive region comprehending all the tract between the Caspian sea and the great plateau of Central Asia, and extending from the frontiers of Persia and Afghanistan on the S, to those of Asiatic Russia on the N. The geography of this tract is only known in a very general way; so obscure is it that it has been justly characterized as being "chiefly conjectural," and as remaining, to the disgrace of

science, "in a wretched state of imperfection." For our knowledge of it we are chiefly indebted to the Oriental historians and geographers, Abulfeda, Ebn-Haukel, Abulghazi, and others, and to some notices from Jenkinson, Thompson, and Hanway. These imperfect accounts have been followed of late years by more accurate information obtained by Mr. Elphinstone, in his mission to Peshawer, by Lieut. Abbott in his mission to Khiva, by Burnes, by the Russians, in their several embassies to Kokan, Khiva, and Bokhara, and from the memoirs of Baber, a native of this region, and sultan of Kokan, previous to his expulsion by the Usbeks, the present possessors. —Independent Tartary has the Caspian sea and the river Jaik or Ural on the W; the Ural-Tau, and the Algydim-Shalo, on the N and NE; Sungaria and Eastern Turkistan on the E; on the SE, the basin of the Upper Indus, or what we now denominate Western Tibet; and on the S, Persia and Afghanistan. From S to N it extends 16 degrees, or from 35° to 51° N lat., and from W to E 20 degrees, or from 54° to 74° E long., that is, from the Caspian sea to the summit of the Belur-Tagh. It must be observed, however, that as the eastern limit of this vast tract has never been astronomically determined, it is impossible to be precise on this point. The maps generally carry the longitude not farther than 70° and 72° E, and even Malte Brun fixes the eastern frontier, at the summit of the Belur, in only 69° E long., adopting the opinion of Rennel that the range of the Belur has been placed 5 degrees too far E by D'Anville. Independent of the Kirghissian portion of this tract, Balbi has estimated the total superficies of the Usbek and Turkoman portion at 555,000 British sq. m. thus:

The khanate of Bokhara,	230,000 sq. m.
" Khiva,	193,000
" Kokan,	132,000
	<hr/> 555,000

In this estimate the surface of the Aral lake is included, but whether he includes the tract S of the Oxus or Jihun, is not quite certain. Malte Brun makes the whole superficies, exclusive of the steppe of Ishim, only 460,000 sq. m., which is certainly too low. If the medium breadth of this tract be 15 degrees of longitude by 16 degrees of meridional length, then the surface, including the tract S of the Oxus, will be found to be 843,600 sq. m.; and this will not appear too great, if we compare it with the statements of Klapproth and Balbi. The former states the superficies of the tract occupied by the Lesser and Middle Kirghis hordes, lately incorporated with the Russian empire, at 220,000 sq. m., which, added to Balbi's statement of that of the Usbek khanates, makes 775,000 sq. m. To this must be added the large and extensive province of Bactria, extending more than 8 degrees of longitude by 2 degrees of medial breadth.—In compliance with long-established usage, we apply the customary appellation of Independent Tartary to this region. The name of Tartar has been for six centuries applied as a generic appellation to all the nomadic tribes of Northern and Middle Asia, in the same way as the ancients applied the term *Scythia* to all the erratic nations of which they had any knowledge whether in Europe or Asia. All the vagrant tribes to the N and E of the Danube, as far as geographical knowledge then extended, were anciently so called, from the time of Herodotus downwards; and the modern appellation Tartar, has succeeded by common consent to that of Scythian, ever since the middle of the 13th cent. So firmly has this ethnographic term taken root amongst all European writers, that it is now no more possible to

eradicate it, than it would be to abolish the generic term *Indian*, universally applied to all the aboriginal natives of the American continent ever since its discovery. The first writer who introduced the term *Tartar* was the political missionary, Carpini, in 1246, but he applied it solely to the four great Mongolian tribes, who, he says, all spoke the same language, a strong proof that they belonged to the same parent stock. Rubrquis, in 1254, used it in the same sense, when he visited the court of Sartakh-Khan, grandson of Jenghis-Khan; but the Mongolian princes were indignant at being called Tartars, and told him that they were Mongols and not Tartars, who were a different and a vanquished tribe, and that they did not choose to be denominated from the name of a vassal horde. Still, however, the name prevailed, in spite of Mongolian remonstrance, and has been, and still is, applied not merely to the Mongolians, but also, most improperly and erroneously, by almost all modern writers, to designate exclusively, all the tribes of Turkish extraction, although it is certain these are a very different and distinct race. Hence the modern division of Great Tartary amongst Tartars, Mongols, and Mandchurs. The two latter names are just and proper, as designating distinct races, and as recognized by these races themselves; but the first appellation has never been acknowledged by any of the numerous tribes to whom it is applied. They all speak dialects of the same language, and know themselves only by the particular name of their own tribe, or by the general name of Turks. As all these tribes have the best right to fix their own name, it is unjust to call them by one they have never acknowledged; and if the name Tartar be at all applicable to any of the great races, it belongs to the Mongols,—one of whose tribes the ancient Tartars were,—with much greater propriety than to either of the others. By the Arab conquerors of Asia, and by the Arab and Persian geographers, the name of Turks was applied to all the nomadic hordes, Mongols as well as others, of which they had any knowledge, and they divided them into two great branches, Western and Eastern Turks, the former extending to the Black sea, and the latter as far E as China. In this they were more correct than succeeding European writers: both nations knew the people and their language. Their error lay in the too great extension of the name, in applying it to the whole of the nomadic races, instead of limiting it to one. As the real proper name of the race is *Turks*, so the whole region inhabited by the numberless tribes speaking Turkish, even as far E as Hami, at the eastern extremity of the Lesser Bukharia, should have been called *Turkistan*, instead of receiving the name *Tartary*. It is probable that all the Scythian tribes known to the ancients since the days of Herodotus were of Turkish origin, and spoke dialects of the same language. We shall, therefore, divide it into three great divisions, Southern, Middle, and Northern Turkistan, all comprehended under the general name of Western Turkistan, to distinguish it from the extensive region to the E of the Belur, called Chinese or Eastern Turkistan.

Divisions.] This region may be regarded as divided into

I. SOUTHERN TURKISTAN, S of the Amur or Oxus, which is subdivided into 1. Turkman Desert and Khiva; 2. Balkh; 3. Badakshan.

II. MIDDLE TURKISTAN, which, N of the Amur, comprises 1. Khoilan; 2. Karrategin; 3. Hissar or Sagundan; 4. Kesh; 5. The vale of Sogd, comprehending Bokhara and Samarcand; and in the vale of the Syr or Jaxartes: 1. Kokan and Nemangan;

2. Tashkent; 3. Uratippa; 4. Ghaznah or the desert of Ural; 5. Ilak or Iestan; and 6. Turkistan Proper.

III. NORTHERN TURKISTAN, or the Kirghissian region, which is divided amongst the three hordes of the Lesser, Middle, and Great Kirghissian hordes.

Physical features.] All the W and N part of this region is occupied with immense desert plains, whilst the S and E parts, or the basins of the Syr and Amur, are of a different description, having fine tracts of land defended by inaccessible mountains and barren deserts, and watered by numerous streams. But even to this there are exceptions, the fertile plain of Kharizm being a mere basis surrounded by moving sands, and several steppes even occur here and there on both sides of the Syr and Oxus. The surface is very varied in the S and SE parts, consisting of numerous valleys, vast mountains, and extensive plains. The E shores of the Caspian present nothing but a long and gloomy succession of rocks and arid downs.—The southern chain of the Hindu-kush divides this region from Persia and Afghanistan. A number of lateral ranges, enclosing extensive well-watered valleys, run N toward the Amur; and the descent is much greater on the N side than on the S of the Hindu-kush. The other great ranges are the Belur-Tagh, the Muz-Tagh, the Asfera range, and the Kynder-Tagh, besides a vast number of subordinate ranges running in various directions from these chains. The Belur-Tagh, the great range which on the E divides this region from Central Asia, is called Thsong-ling, or 'the Azure mountains,' by the Chinese, and has been long celebrated in the history of Tartary as the great culminating point where the waters flow to the Aral-Nor on the W, and the desert of Shamo on the E. The sources of these waters, running in opposite directions, are estimated by the Chinese geographers at 1,000 li, or 300 geo. m. of elevation; and, according to the geographers of the Ming dynasty, this range is many thousand Chinese feet in height. In the Mongolian and Oigurian languages, it is called the Bolur range; and in the Persian, Bellor Koh, or 'the shining mountain,' from the transparency of the quartz, and sometimes the Belut-Tagh, or 'the dark mountain,' from the perpetual clouds which overhang it. This chain is at least 500 m. in length from SSW to NNE, or from E long. 71° and N lat. 34° 30', to where it meets the Muz-Tagh, in 41° N lat. and 71° E long., according to Waddington's map. From this point it passes N to 42° N lat. where it is intersected by the Alak-Tagh coming from the E. In this part of its course it is called Khashghar Divan. This chain is covered with ever-during snow, and so lofty, abrupt, and precipitous, that the only known passes are those of Badakshan and the source of the Syr. The Asfera range, otherwise called the Pamer mountains, forms the S boundary of Firghana or Kokan, running E and W. It is a very broad chain of mountains rising from an elevated land, and probably is a continuation westward of the Muz-Tagh as far as the vicinity of Khojund. The fact that the only communication between Kokan and Bokhara is by the pass of Khojund, between the extremity of this range and the river Syr, is a strong evidence of its magnitude and impracticability.—From the Asfera range, in 67° 30' E long., are detached the Ak-Tagh, or 'White mountains.' On approaching Uratippa, these are again subdivided into two branches, the most western of which terminates in 63° 30' E long., and forms the N boundary of the vale of Sogd, whilst the Ak-Tagh, properly so called, separates Bokhara from Yar-Ailak, and terminates in two branches at Jizzukh and Joupar.—The Kara-Tagh, or 'Black mountains,' are another lateral range pro-

jected from the S side of the Asfera range, and runs S and SW near 400 m. towards the Amur. Next to the Asfera, it is the most lofty, rugged, and precipitous range in Usbek-Turkistan.—The Samarcand mountains, which form the S boundary of the valley of Sogd, are a branch of this range, projected westward as far as 66° E long. It separates the vale of the Sogd from the district of Kesh, where Tamerlane was born, and is called the hill of Kesh by Sherifeddin, his biographer, and the mountain of Zarkah by Ebn-Haukel. The Ak-Tau ridge is called Al-Botom by Abulfeda.—The Kinder-Tau is the range which bounds the country of Kokan and the vale of the Syr on the N, westwards as far as 65° E long., when it expires in the desert of Aral. It is another offset from the great range of the Belur, and has a longitudinal extent of eight degrees, or 400 m. It is of prodigious elevation, as we are informed by Nazaroff, and is covered with perpetual snow. It is also called the Ming-Bulak mountains, and corresponds to the Arga-Tau or Argjun, or Arka-ula, of Strahlenberg. From this range a lateral one runs S to the Syr, and to the W of Akhsikat, and divides the district of Kokun from that of Tashkant. It appears to be of no great elevation. To the N of the Kinder-Tau the country is little known, but seems not to be so mountainous as the territory of Usbek Turkistan. It is said that, at the NE angle of the Kinder-Tau, it is joined to a range of mountains running far to the E, and thus connecting it with the Ulugh-Tagh. This is probably the Kichuck-Tagh. But we are comparatively ignorant of the directions of the numerous mountain ridges which traverse the country of the great Kirghissian horde. The fact is, the whole of Eastern Usbek Turkistan is full of mountains and difficult both of access and description.—The whole of Usbek Turkistan may be considered as a large basin hollowed out by the waters descending from the Paropamisian and Hindu-kush mountains on the S, and those of the Belur and Kinder-Tagh on the E and N; but formed into two divisions by the Asfera mountains, thus making the two great valleys of the Syr and Amur. The geography of this region will be found further detailed in the articles BALKH, BADAQSHAN, BOKHARA, KHIVA, KOKAN, KIRGHIZ-KAZAKS, and TURKISTAN.

TARTAS, a canton, commune, and town of France, in the dep. of the Landes and arrond. of Saint Sever. The cant. comprises 18 coms. Pop. in 1831, 16,325; in 1846, 17,104. The town is 13 m. WSW of Saint Sever, on the Midouse, 3 m. above its confluence with the Adour. Pop. in 1846, 3,039. It is divided by the river into two parts, distinguished as the upper and lower, and is generally well-built. The upper town, which occupies the slope of a hill, commands a magnificent view. T. has manufactories of linseed oil, and tanneries, and carries on an active trade in wine, grain, timber, saffron, and resin, fruit, hams, &c., the produce of the environs. It is also noted for its bread. Tortoises and red partridges are common in the vicinity. This town was taken from the English by Charles VII. It had a fortress which was long in the possession of the Huguenots.

TARTH, a small river, a tributary of the Lyne, in Peebles-shire, which, during the first 5 m. of its course, is identical with the Medwin. At Garwaldfoot, the Medwin, which had flowed chiefly on the boundary between Lanarkshire and Peebles-shire, splits into two streams, the one of which goes off into Lanarkshire and becomes tributary to the Clyde, and the other passes on to the Lyne, and through it, to the Tweed. The latter, though it continues for a brief space to be called the Medwin, and again

is sometimes called near its mouth Newlands-water, is the Tarth, and undisputedly bears that name over the greater part of its course. Its length of run, measured in straight lines from Garwaldfoot, is only 7 m.; and over that distance it flows SE. Its tributaries, though 16 or 17 in number, are all inconsiderable. Compared to the Lyne, it is a deep, dull, and muddy stream.

TARTLAN, **TARTLEN**, or **PRASMAR**, a town of Transylvania, in the Saxon territory, district and 10 m. ENE of Cronstadt, on the Tartel. Pop., Saxon, 4,000. It has two churches, a Greek and a Lutheran, one of which was formerly fortified. Grain, flax, and tobacco are cultivated in the environs.

TARTOW, a town of Poland, in the gov. and obwod of Sandomir, 15 m. from Opatow, near the Vistula. Pop. 1,531.

TARTZMANS DORF, or **TARCSA**, a village of Hungary, in the comitat of Eisenburg, 15 m. WSW of Guns, in the midst of mountains. It has several mineral springs.

TARUN, or **TAREM**, a town of Persia, in Farsistan, and district of Laristan, 210 m. SE of Shiraz. Pop. 3,000. It is enclosed on all parts, except the W, by mountains, and is surrounded by a lofty crenulated wall, flanked with towers, and a deep ditch. It is entered by only one gate. It has three mosques, a caravanseraï, a bazaar, and an aqueduct. The houses are closely packed together, and the bad quality of the water, with which the town is supplied, renders it extremely unhealthy. It has a considerable trade with Bunder-Abbas in corn, sugar, coffee, and Indian goods.

TARUT, or **TIRHUT**, an island in the W part of the Persian gulf, near the coast of Arabia, in the prov. of Lahsa, and opposite El Kalif. It is about 11 m. in length from NW to SE; is well-watered and adorned with fine gardens.

TARVES, a parish some miles NE of the centre of Aberdeenshire. Area about 30 sq. m. The village of T. stands nearly in the centre of the parish, 6 m. W of Ellon. Pop. in 1851, 2,469.

TARVIN, or **TARVEN**, a parish in the co. palatine of Chester, 6 m. E by N of Chester, comprising the townships of Ashton, Bruen - Stapleford, Burton, Clotton-Hoofield, Dudden, Foulk-Stapleford, Hockenhull - Stapleford, Horton - with - Peele, Kelsall, Mouldsworth, and T. Area 2,007 acres. Pop. 1,282.

TARVIS, a town of Illyria, in the circle and 19 m. SW of Villach, in a deep valley, near the l. bank of the Gailitz. About 4 m. S is Lake Raibler, in which the Gailitz has its source, and in the vicinity of which are mines of lead and calamine. T. formerly belonged to the bishop of Bamberg, and bore the rank of an archducal town.

TARVOERNE, a group of islands in the Atlantic, near the W coast of Norway, in the bail. of South Drontheim-Huusoe. The largest of the group is in N lat. 63° 48', E long. 9° 23'.

TARWIN, a river of South Australia, in the district of Western Port, which has its source in the Strzelecki range, and flows into the ocean to the NW of Cape Liptrap.

TARYSSA, a district and town of Russia in Europe, in the gov. of Kalouga, on the Oka, at the confluence of a river of the same name.

TA-SANG, a town of the Corea, in the prov. of Hwang-hai, 90 m. NW of Han-yang.

TASAU, a town of Moravia, in the circle and 18 m. ESE of Iglaun, on the slope of a hill, near the l. bank of the Aslaw.

TASBURGH, or **TASBOROUGH**, a parish in Norfolk, 8 m. S by W of Norwich. Area 916 acres. Pop. 475.

TASCHITZ. See DASCHITZ.

TASCO, a town of New Granada, in the depts. of Boyaca and Tunja. Pop. 180.

TASCO, or **TLACHCO**, a town of Mexico, in the state and 75 m. SSW of Mexico, near the r. bank of the Zacatula. It is delightfully situated at an alt. of 915 toises above sea-level, and has a fine parish-church. The environs abound with fruit trees. Veins of silver are found in the locality.

TASCOFFIN, or **TISCOFFIN**, a parish in co. Killenny, $8\frac{1}{2}$ m. NNW of Gowran. Area 4,708 acres. Pop. in 1831, 1,283; in 1841, 1,314.

TAS-EL-NAMLI, a cataract formed by the Tigris, between Mosul and Teksit, in Turkey in Asia.

TASGAON, a town of Hindostan, in the prov. of Bejapur, on an affluent of the Kistna, 90 m. WNW of Bejapur. It is well-fortified.

TA-SHAN, a range of mountains in China, which traverse the island of Formosa from N to S, and the summits of which are covered with snow as early as November. The principal summit, Mu-kang-shan, sometimes gives its name to the entire chain.

TASHAN-DEGH, a range of mountains in Turkey in Asia, in the NW part of the pash. of Sivas, on the confines of the sanjaks of Djanik and Amasia.

TASH-BURIK, **TASH-BALIG**, or **TASH-BALIK**, a small town of Chinese Turkistan, on the l. bank of the Yaman-yar, 42 m. SW of Kashgar, in N lat. $39^{\circ} 6'$, E long. $75^{\circ} 34' 20''$.

TASHEM, **Id.** or **Rowo**, a volcano in the E part of the island of Java, and prov. of Palembang. At its last eruption, which took place in 1796, a large volume of water issued from its N side, charged with large quantities of sulphuric acid and particles of flint.

TASHEN-SEE, a lake of Bavaria, in the circle of Upper Bavaria, 15 m. NW of Salzburg. It is 8 m. in length from NNW to SSE, and from $\frac{1}{2}$ to 1 m. in breadth, and discharges itself by a small river into the Salza.

TASHINNY, or **TAGSHINNY**, a parish in co. Longford, 8 m. NE of Ballymahon, containing the village of Barry. Area 4,880 acres. Pop. 2,338.

TASHKAND, or **TASHKANT**, a town of Independent Tartary, formerly an independent state, and now making part of that of Kokan, on the Tcherchek, a little above its confluence with the Sir or Sihon, and 150 m. NW of Kokan. Pop. 100,000. The greater part of the town is built in a valley, and is enclosed for 14 m. by a lofty brick wall, with 12 gates. In the interior, skirting the wall, are numerous gardens and orchards. Water from the river is conveyed into the town by means of canals, and is distributed to numerous fountains. Each house is supplied besides with a reservoir or bath for the use of the inmates. The mosques are without roofs, but many of the old temples are surmounted with antique cupolas. The suburbs contain numerous gardens. The constant passage of caravans through this town renders it a place of great importance. The inhabitants are indolent, but polite in their manners, and great lovers of music and dancing. It contains few artisans. They profess Islamism and keep their women in strict seclusion. Near T. is a fortress containing a garrison of 10,000 men, defended in the direction of Kokan by lofty walls and two deep ditches, and on the side towards Tashkand, by a wall at the foot of which is a deep canal. In the midst of these fortifications, on the site of the palace of the ancient Khans, is a castle, also surrounded by lofty walls and by ditches, and forming the residence of the governor. This town was formerly called Shah. The climate of the locality is pleasant, and the soil highly productive, affording every necessary of life, and in great abundance grapes, pomegranates, oranges, peaches, and figs.

The banks of the river are finely lined with poplars.

TASH-KULVIN, a town of Asiatic Turkey in Anatolia, in the sanj. and 24 m. NE of Kastamim, in a plain, on the r. bank of the Kara-su, which is here crossed by a fine stone-bridge constructed to a great extent of the ruins of ancient architecture. Pop. 400. It contains 13 mosques, a khan, and baths, and has manufactories of stuffs and leather. This town occupies the site of the ancient *Pompeopolis*.

TASHLIDGE, **TASHLIEZA**, or **PLEVLE**, a town of Bosnia, in the sanj. of Novi-Bazar, 70 m. SE of Bosna-Serai, on the slope of a mountain, near the r. bank of the Oschookina. Pop. 4,000. It has a public fountain, on the basin of which is an inscription in honour of Adrian. The environs are stony, but tolerably well cultivated.

TASIEEVA. See **OUNA**.

TASIMA, a prov. of Japan, in the W part of the island of Nifon, to the W of the provinces of Tango and Tamba, to the N of that of Farima, and E of the prov. of Inaba. On the N it is bathed by the sea of Japan. Yoki is its chief place. Its inhabitants find their chief employment in fishing and the culture of silk.

TASMANIA. See **VAN DIEMEN'S LAND**.

TASMAN'S HEAD, the most southerly point of Brune Island, in the co. of Buckingham, Van Diemen's Land, in N lat. $43^{\circ} 46'$.

TASMAN'S ISLAND, or **THE PILLAR**, an island of Van Diemen's Land, in the co. of Pembroke, to the S of Cape Pillar, the SE extremity of Tasman's peninsula.

TASMAN'S PENINSULA, a peninsula of Van Diemen's Land, in the SE part of the island, and co. of Pembroke, extending between $42^{\circ} 56'$ and $43^{\circ} 12' 31''$ S lat. and between $147^{\circ} 44'$ and $148^{\circ} 7'$ E long., and bounded on the N by Norfolk bay, on the E and S by the ocean, and on the W by Storm bay. It is 22 m. in extreme length from N to S, and about 17 m. in breadth, and is connected with Forestier's peninsula, by a narrow isthmus on which is a military station. Its principal headlands are Capes Raoul and Pillar. Between these is Port Arthur; on the E coast is Fortesque bay, and on the W Wedge bay and Burnett harbour. It was first visited by Tasman in 1642.

TASNAD, **TOSNAD**, **TRESSENBERG**, **TRESTENBURY**, or **TESNADU**, a town of Transylvania, in the comitat of Kozep-Szolnok, on the slope of a hill. Pop. 3,068. It has a fortress in ruins. The vine is cultivated in the environs.

TA-SOW-HEEN, a district and town of China, in the prov. of Keang-se and div. of Nan-gan-fu.

TASQUE, a village of France, in the dep. of the Gers, cant. and 3 m. NNW of Plaisance, on the l. bank of the Sarros. Pop. 458. It had a Benedictine abbey.

TASSAI, a district of Japan, in the island of Kiushiu, and prov. of Tsikonsen.

TASSENIERE, a village of France, in the dep. of the Jura, cant. and 6 m. SE of Chausain, in a woody and marshy locality. Pop. 400.

TASSISUDON, a town of Northern Hindostan, capital of Bhotan, 180 m. SW of Lassa, in a well-cultivated valley, about $\frac{1}{2}$ of a mile in breadth, and watered by the Tchin-tchin, the banks of which are lined with willows. It consists chiefly of the sovereign's palace, the residences of the government officers, and a long range of sheds in which forges are constantly employed in the manufacture of bronze idols and ornaments for the temples. It has also extensive manufactories of paper manufactured from the bark of a tree named deah, which abounds in the environs, and the filaments of which

are sufficiently strong to admit of their being woven into textures. The palace, which is surrounded by a wall 30 ft. in height, forms a kind of citadel. It consists of 7 stories, each from 15 to 20 ft. in height.

TASWELL, or **St. AUGUSTINE**, an island of the South Pacific, or more properly two islands on one reef, in S lat. 5° 37', and E long. 176° 9'. It was discovered in 1781.

TAT, an insular rock in the Baltic, forming part of the group of the Erd-Holmer, and lying about 700 ft. to the N of Græsholm.

TATA. See **DORIS**.

TATALISGA, a small town of Gallam, in Western Africa, 60 m. W of Gallam.

TATARA PASS, a route leading through the Khyber mountains in Afghanistan, in N lat. 34° 10', to the N of the Khyber pass.

TATAR-BAZAR, or **TATAR-BAZARQI**, a considerable town of European Turkey, in Bulgaria, on the l. bank of the Maritza, 16 m. WNW of Philippopolis, and on the great road from Constantinople to Belgrade. It is said to contain several mosques, baths, and other good buildings, with about 10,000 inhabitants.

TATARBUNAR, a town of Bessarabia, 70 m. S of Bender. It is said to have been once a populous city; but is now almost deserted. Near it is a lake, partly dried up in summer, which communicates with the Black sea.

TATE, a township of Clermont co., in Ohio, U. S. Pop. in 1840, 2,364.

TATENHILL, a parish in Staffordshire, 3½ m. WSW of Burton-upon-Trent, containing the chapels of Barton-under-Needwood and Wichnor, with the township of Dunstall. Area 9,408 acres. Pop. in 1831, 2,180; in 1851, 2,329.

TATESVILLE, a village of De Soto co., in Mississippi, U. S., 161 m. N of Jackson.

TATHAM, a parish in the co.-palatine of Lancaster, 11½ m. NE by E of Lancaster, watered by the Wenning, comprising the township of Ireby. Area 8,501 acres. Pop. in 1851, 654.

TATHWELL, a parish in Lincolnshire, 2½ m. S by W of Louth. Area 4,814 acres. Pop. in 1831, 338; in 1851, 429.

TATIBSCHEVSKAIA, a fortress of Asiatic Russia, in the gov. of Ufa, on the r. bank of the Ural, 28 m. W of Orenburg.

TATING, a town of Denmark, in the duchy of Sleswick, 9 m. WNW of Tonningen, on the r. bank of the Eider. Pop. 1,000.

TA-TING-FU, a division and town of China, in the prov. of Kwei-chu. The div. comprises 5 districts. The town is in N lat. 27° 5', E long. 108° 33'.

TATMAGUCHE, or **TATAMAGUCHE**, a port of Nova Scotia, on a short bay which sets up southerly from the straits of Northumberland, about 25 m. from Onslow. It has a good road for vessels.

TATNALL, a county in the SW part of Georgia, U. S. Area 1,023 sq. m. Pop. in 1840, 2,724; in 1850, 3,227. It is watered by the Great Ochopee, a tributary of the Ocmulgee. It cap. is Reidsville.

TATNAM (CAVE), the E point of Haye's river, in Hudson's bay, in N lat. 57° 35'.

TATRA MOUNTAINS, that part of the Carpathian chain which lies in the Hungarian counties of Zypps, Liptau, and Arva, and on the S frontier of Galicia. It contains the highest summits of the chain, amongst which are the Krivan and the Lomnitz, rising to the height of at least 8,500 ft. above the level of the sea.

TA-TSEEN-TU-TING, a district, town, and fortress of China, in the prov. of Sze-chuen and div. of Ya-chu-fu, 150 m. WSW of Ching-tu-fu, on the Tung-po-ho, in N lat. 30° 8' 24', E long. 101° 49' 50'.

The walls are of free-stone. It is inhabited by Chinese and Tibetans, and forms an important egress from China of troops for Tibet, and of exports of tea under government inspection. Its inhabitants are Buddhists. The surrounding country is cold, bristled with mountains, rocks, and precipices, and is intersected by the Lou-ho. It formerly belonged to Han-chao.

TATSFIELD, a parish in Surrey, 8½ m. SE of Croydon. Area 1,276 acres. Pop. in 1851, 182.

TA-TSUH, a district and div. of Chun-king-fu, in N lat. 29° 50', and E long. 105° 51'.

TATTA, a village of Barbary, 240 m. SE of Marocco, in the prov. of Draha, on the skirts of the Sahara.

TATTA, an extensive district and a town of Sind. The district comprises the whole of the delta of the river Indus, 150 m. in length, by 50 m. in breadth. It is in general sandy and barren; but it produces rice and salt, and the numerous rivers abound with fish. This prov. was invaded by the Arabs in the beginning of the 8th cent., and may be considered as having been subject to the Mahomedans from that period. It was taken possession of by Akbar in 1590, and acknowledged the Mogul authority till the dissolution of that empire. Its remaining history is identical with that of Sind.—Its former capital was Brahminabad; its present capital, of the same name as the prov., is situated about 3 m. W of the Indus, and 130 m. from the sea, in a fertile valley formed by the low range of the Minkali hills, which, during the freshes of the river, is frequently inundated. Some of the houses are built of brick and mortar, but the greater number are constructed of mud and timber. The circumf. of the modern town is 4 m., and it is supposed to contain 15,000 inhabitants, but some carry it as high as 40,000. Barnes states that it was once 30 m. in circuit. It was formerly famous for its commerce and manufactures; but its wealth and trade have greatly declined, although it still continues to carry on a considerable traffic, and to manufacture large quantities of a rich cloth, called *kungis*, and coarse cottons. The art of cotton-printing is skillfully practised here. The modern city of T. was founded by Jam-Mundel in 1445, the 14th of the Someah dynasty, A. D. 1585, and was plundered by the Portuguese in 1555. Robertson is of opinion that T. was the *Patala* of the Greeks.

TATTARAN, a small island in the Sulu archipelago, in N lat. 6° 10'.

TATTENHALL, a parish in the co.-palatine of Chester, 4½ m. SW by W of Taporley, watered by a small branch of the Dee, comprising the townships of Golborn-Bellow, Newton by Tattenhall, and T. Area 4,184 acres. Pop. in 1831, 1,080; in 1851, 1,204.

TATTENHOE, or **TORTREXHOE**, a parish in Bucks, 8½ m. W of Fenny-Stratford. Area 690 acres. Pop. 55.

TATTERFORD, a parish in Norfolk, 4 m. W by S of Fakenham, watered by the Wensum. Area 959 acres. Pop. in 1831, 75; in 1851, 86.

TATTERSET, or **GATSEND**, a parish in Norfolk, 5 m. W of Fakenham. Area 1,759. Pop. in 1851, 189.

TATTERSHALL, a parish and town in the co. of Lincoln, 9 m. SSW of Horncastle, on the river Bane, near its junction with the Witham, and intersected by the Horncastle canal. The church, which was made collegiate in the reign of Henry VI., is a spacious and elegant cruciform edifice. SW of the town stand the remains of T. castle, a stately edifice erected about the year 1440. Area of p. 4,560 acres. Pop. in 1831, 599; in 1851, 987.

TATTINGSTONE, or **TADINGSTON**, a parish of

Suffolk, $5\frac{1}{2}$ m. S by W of Ipswich, in the line of the Eastern Counties railway. Area 1,637 acres. Pop. in 1831, 856; in 1861, 597.

TATTORA, a town of Hindostan, in the prov. of Bejapur, in N lat. $17^{\circ} 58'$.

TATTUBT, the remains of a considerable town in Algiers, 25 m. S of Constantina.

TATTYMOLE, a mountain in co. Tyrone, $8\frac{1}{2}$ m. SSW of Fintona, connected by hill ranges with the great mountain-group of both Tyrone and Fermanagh. Its summit has an alt. of 1,081 ft. above the level of the sea.

TA-TUNG, a district and town of China, in the prov. of Kan-suh and div. of Se-ning-fu, in N lat. $36^{\circ} 50'$, E long. $102^{\circ} 50'$.

TATUTCHE, a barren island on the NW coast of North America, at the entrance of Juan-de-Fuca's straits. It is of small extent, and is surrounded with breakers in every direction.

TAUBATE, or **THAUBATE**, a town of Brazil, in the prov. and district and 90 m. NE of São-Paulo, on the r. bank of the Paraíba, a little above the confluence of a small river, in S lat. $22^{\circ} 54' 12''$, W long. $45^{\circ} 20'$. It is one of the principal places in the prov., and has a church, two chapels, and two convents, and possesses manufactories of matting and vases. The district produces tobacco, sugar, coffee, cotton, millet, and pulse. Pop. 10,000.

TAUBER, a river which has its source in Württemberg, in the circle of the Jaxt, bail. and 11 m. NE of Gerabronn; runs first SE past Hausen, turns afterwards E into Bavaria; runs N and NNW; passes Rotenburg; re-enters Württemberg, but soon returns to Bavaria; bends W into the circle of the Lower Main; bathes Rottingen; again re-enters Württemberg; waters Weikersheim, Markelsheim, Mergentheim, and Edelfingen; takes a NW direction; penetrates the grand-duchy of Baden; passes Königshofen, Landa, Distelhausen, and Bischofsheim; and after a total course of about 84 m., joins the Main on the l. bank, at Wertheim.

TAUBER-BISCHOFSHHEIM. See **BISCHOFSHHEIM**.

TAUBRATH, a village of Austria, in Bohemia, in the circle of Elnbogen and district of Frai. It has mines of cobalt and of iron.

TAUCHA, a town of Saxony, on the small river Partha or Parde, 6 m. ENE of Leipsic. It was the scene of sharp fighting at the battle of Leipsic, on 18th October 1813. Pop. 1,800.

TAUCRA, or **TEUKERA**, a town of Tripoli, in Barca, 21 m. SW of Ptolemeta, on the Mediterranean. This town, the *Teuchira* of antiquity, still retains a portion of its ancient walls, strongly built of free-stone, defended at short intervals by quadrangular towers. It has also the remains of several monuments. The sepulchral grottoes of T. bear a close resemblance to those of Ptolemais.

TAUDA, a river of Asiatic Russia, formed by the junction of the Sosva and the Losva, which falls into the Tobol, 40 m. S of Tobolsk.

TAUDENY, a large village of the Sahara, on the caravan route from Morocco to Timbuctu. A supply of excellent water gives fertility to the district, and enables it to afford refreshment to the travellers crossing the desert. In the neighbourhood also are numerous beds of salt, an article of considerable demand throughout the countries on the Niger. These beds are from 5 to 8 ft. deep, and from 20 to 30 yds. in circumf. The salt, which is partly red, comes up in large lumps mixed with earth.

TAUDICUMBU, a town of India, in the district of Dindigul, in N lat. $10^{\circ} 24'$.

TAUGON-LA-RONDE, a village of France, in the dep. of Charente-Inferieure, 18 m. NE of La Rochelle. Pop. 1,000.

TAUJEPUR, a town of Bengal, in the district of Purneah, in N lat. $25^{\circ} 45'$.

TAULE, a town of France, dep. of Finistere, 8 m. NW of Morlaix. Pop. 2,800.

TAULIGNAN, a town of France, dep. of the Drôme, 14 m. ESE of Montelimart. Pop. 1,800, employed partly in the manufacture of silk.

TAULLAH, or **JALLAH-MHUKI**, a town of Hindostan, in the prov. of Lahore, district of Nadone, in N lat. $32^{\circ} 5'$. It contains a temple held in high estimation by the Hindus, on account of a volcanic flame which issues from the side of a mountain in its vicinity.

TAUMAGO, an island in the Pacific, in S lat. $10^{\circ} 0'$, E long. $169^{\circ} 25'$, discovered by Quiros in 1606, and is about 24 or 25 m. in circumf.; and abounds with bananas, cocoa-trees, palms, and many kinds of nutritious roots.

TAUNDA. See **TANDA**.

TAUNSK, or **TAUISK**, a small fortress of Russia in Asia, in the district and 240 m. ENE of Okotak, at the confluence of the Tain with the Kova, and at the distance of about 80 m. from the shore of the gulf of Tamskai-Gouba.

TAUNSKAIA-GOUBA, a gulf of Russia in Asia, in the district of Okotak and N part of the see of that name. It is 185 m. in length from E to W, and 60 m. in breadth. Its principal affluent is the Tain, which descends from the Stanovoi mountains, and flows into the NW part of the gulf.

TAUNTON, a town and parl. borough in the co. of Somerset, on the navigable river Tone, and in the line of the Bridgewater canal, and the Bristol and Exeter railway, on which there is here a principal station 45 m. SW of Bristol, and 22 m. SSW of Bridgewater. The two parishes of Taunton St. James, and Taunton St. Mary Magdalene, contain 2,755 acres. Pop. in 1801, 5,794; in 1831, 11,139; in 1851, 13,519.—The town, which has extended beyond the old borough limits, into the parishes of Bishops-Hull and Wilton, is a large well-built place. The main streets are spacious, well-paved, and lighted with gas. There are various smaller streets, lanes, and courts, inhabited by the poorer classes, and here popularly called 'colleges;' but on the whole the town is considered both airy and salubrious. The country around, in the large and fertile vale of Taunton, abounds with pleasant orchards and villages, and renders the situation of this town one of peculiar beauty. T. returns 2 members to parliament. Pop. of parl. borough in 1851, 14,176. The number of electors registered in 1837, was 864; in 1852, 790. T. is also the principal place of election for the western division of the county. The principal manufacture of T. has been that of silk, in which about 1,800 hands have been at one time employed; but this manufacture has been on the decline of late years. There was formerly a considerable woollen manufacture, which has also gradually declined.—T. was the residence of some of the West Saxon kings, especially of their lawgiver, Ina, who held in it the great council of his kingdom.

TAUNTON, a township and one of the capitals of Bristol co., Massachusetts, U. S., on the river Taunton, 33 m. S of Boston, in N lat. $41^{\circ} 54' 11''$, W long. $71^{\circ} 06' 55''$. It is a pleasant and handsome town, and contains a court-house, a town-house, and ten churches. It has paper-mills, nail manufactories, rolling and slitting mills, and cotton manufactories, and several cloth-printing works. Pop. in 1820, 4,520; in 1850, 10,431.

TAUNTON, a river of the United States, which empties into Narraganset bay, at Tiverton, opposite the N end of Rhode Island. It is formed by several streams which rise in Plymouth co., Massachusetts.

Its course is about 50 m. from NE to SW, and it is navigable for small vessels to Taunton, about 20 m.

TAUNTON-DEAN, a district of England, in the co. of Somerset, extending about 30 m. along the course of the river Tone, and noted for its remarkable fertility and produce.

TAUNUS, a mountain-ridge of W. Germany, in the duchy of Nassau, which extends SW to the borders of the Rhine, and on the NE is attached to the Vogelsgebirge. It forms the water-stead between the Lahn and the Rhine. Its highest point, the Feldberg, has an alt. of 2,605 ft. above sea-level.

TAUPONT, a village of France, in the dep. of Morbihan, cant. and 1 m. NW of Ploermel. Pop. 2,300.

TAURANO, a town of Naples, in the prov. of Terra-de-Lavoro, 6 m. ESE of Nola. Pop. 1,280.

TAURASI, a town of Naples, in the prov. of Principato-Ultra, 12 m. NW of Santo-Angelo, near the r. bank of the Calore.

TAURAT, a settlement in the island of Cuba, 38 m. NNE of St. Jago.

TAURICASTRO, or **TAURO-CASTRO**, a town of Greece, in Livadia, opposite to Negroponte, 20 m. NNE of Athens.

TAURIDA, a government in the south of European Russia, between the parallels of 44° 26', and 47° 48' N; bounded on the N by the govs. of Kherson and Yekaterinoslav; on the E by the sea of Azof and the strait of Jenikale; on the S and W by the Black sea. It is composed of the following territories: 1st, The peninsula of the Crimea; 2d, a considerable tract to the N of that peninsula, between the Dnieper and the Berda; 3d, the island of Taman or Tmutarakan; 4th, the land of the Tschernomorski or Black Sea Cossacks, lying to the E of the Crimea. All these, except the second, are described under their respective articles in the course of the present work. They are combined into one government, which takes the name of Taurida, from its principal part called by the ancients the *Taurica Chersonesus*. The superficial area of this prov. is 56,280 sq. versts, or 1163·38 German sq. m. of 15 to a degree; but the inhabitants are thinly scattered, their number being returned at 572,200 in 1846. This gov. contains some fertile tracts, particularly in the Crimea, but has also in its N part immense steppes extending to the Dnieper, the Kaskaia, and the Berda, many of them almost entirely unproductive, and all deficient in water, though others are covered with the finest grass. The summer is mild, but the winter, though short, is very severe. The mountains of Taurida, a high range of limestone mountains, precipitous on the S face, but sinking gradually into the plain on the N, divide the Crimea into two parts, remarkable for difference of climate; the northern, by much the larger, being neither pleasant nor healthy, while the southern, which is properly a stripe, may be said to resemble in its degree of heat, and in its vegetable products, the most favoured parts of Asia Minor. The highest points are the Tchatyr-Dagh, 4,700 ft., and the Babugan-Jaila, of about equal height. Between these a cross valley runs with a pass at an elevation of 2,000 ft. "The tract lying between the steep side of the mountains and the low sandy sea shore of the Crimea is peculiarly circumstanced. It is entirely protected from all the rough winds of the N, while it is quite open to all the warm breezes blowing from the S shores of the Black sea. It consequently enjoys an exceedingly mild climate, which allows the vine, olive, pomegranate, and all the south European fruits, to come to perfection. The principal culture is that of the vine. The vine-

yards extend at present into a number of the northern valleys of the Tauric chain, but the wine is much poorer than that of the south coast. Fruit is, however, largely cultivated in the northern valleys, with an exclusive privilege of supplying Moscow and St. Petersburg. The southern declivity of the ridge is covered with forests of the Corsican pine, the region extending from 600 to 3,000 ft.; on the N side, which is much colder, they are replaced by beech. *Arbutus Andrachne* occurs only on the S side, from the coast up to 1,200 ft., but usually solitary, and is supposed to have been derived from seeds brought by birds-of-passage from Anatolia." [Hensley.] Situated between the Black sea and the sea of Azof, that is to say, between the Danube on the W, the Dnieper on the N, and the Kuban on the E, all grand commercial affluents of the eastern portion of the European continent, and of Southern Russia, as likewise of the Caspian basin, this region holds a most favourable position for commerce and trade. The Crimean district is specially favoured in its interior by the mildness of its climate and by the fertility of a large portion of its territory, which is susceptible of every culture. Corn, wine, cattle, wool, pelts and furs, hides, hemp, honey, oil, salt, and fisheries, constitute the chief elements composing the wealth of the country, and a transit-trade also exists in corn and grain, oleaginous seeds, tallow and grease, tobacco, and silk tapestry, which are brought for barter with the stuffs, sugar, hardware, and other articles wrought in Europe, more especially in Russia itself. Corn constitutes the bulk of the exports from the Crimean harbours—these harbours being adjuncts and almost dependents on the harbour of Odessa, that granary of the Levant, or rather of Southern Europe. According to the official reports for 1851 from the government of Taurida, the corn-harvest had increased to 2,568,497 hectolitres: 10 years before it was hardly 1,000,000 h. It is particularly in the district of Berdiansk, peopled in part by foreign settlers, that the culture of the cereals is most developed, and, it is thought, that the entire region of the Crimea, with that of the sea of Azof, may supply commerce annually with 5,000,000 or 6,000,000 hectolitres of corn. Moreover, the Crimea, in 1851, was found to possess nearly 2,000,000 sheep, half of which were fine-wooled, 248,260 head of horned cattle, and 85,700 horses. The salt-mines of Perekop and Eupatoria have some celebrity, and although inadequately worked, are a valuable source of wealth to the country. The entire vintage of the Crimea—the greater part of which is consumed in the country, and the remainder of which is sold to customers in the provinces of Southern Russia—may amount, it is said, to about 160,000 hectolitres. The wines exported from Taurida are in general of secondary quality, and are chiefly used, like those from the Caucasus, for mixing with other wines or with other preparations. M. Tegoborski says, that Taurida possessed, in 1848, 35,577,000 vines, a number six times larger than what grew there sixteen years before. The Russian government has at all times made great efforts to develop the culture of the vine in the Crimea, and to say the truth, it is almost the only culture which has acquired there any importance. Manufactures are at the lowest ebb. Two or three factories for the weaving of common cloth, a few tanneries, and a few yards for making morocco leather seem to constitute the amount of manufacturing means possessed by this gov. As for the value of the exchanges carried on in the entire basin of the Crimea and the sea of Azof, the *Annales du Commerce Extérieur* reports, that in 1841 the imports and exports were as follow:—

	Imports.	Exports.	Total.
Ports in the Crimea.	780,000 <i>f</i> .	2,308,000 <i>f</i> .	3,088,000 <i>f</i> .
Ports in the sea of Azof.	5,208,000 <i>f</i> .	21,088,000 <i>f</i> .	27,296,000 <i>f</i> .

Ten years later, in 1851, the value of the traffic of the Crimea was only 1,747,000*f*, a result showing a great diminution, and for the ports in the sea of Azof, 24,084,000*f*., showing a great increase. Kertch, placed at the straits separating the Crimea from the Transcaucasian provinces, and Taganrok, situated quite at the bottom of the sea of Azof, conduct much of this commerce. They alone exported in 1851, corn to the value of 7,564,000*f*.,—a sum almost equal to the aggregate amount from all the other ports. We must not, however, measure the commercial activity in the ports of the Crimea and the sea of Azof simply by the results of the foreign trade: the coasting trade, which is there extremely active, would give almost an equal value of exchanges. The home trade is also of some importance in the Crimea, and it may be judged of by remarking that there are 79 fairs held in this district every year. Goods to the value of 2,494,000 rubles, or £75,000, were brought to them in 1851; and what is remarkable is the fact, that, with the exception of the two fairs at Simpheropol, all of them are held in the northern districts, which are almost exclusively peopled with Christian agriculturists. To sum up, the foreign trade of the two seas, in 1851, employed 1,561 ships, carrying 400,000 tons; and the coasting-trade may well have been three times larger. The coasts of the Crimea offer a large number of harbours that in all times have been eminently useful to ships frequenting these difficult and sometimes dangerous seas. The chief harbours are Eupatoria, Theodosia, or Kaffa, Kertch, and Sebastopol, to which we must add, as belonging to the same sphere of commercial activity, the ports in the sea of Azof, viz. Berdiansk, Mariopol, Rostoff, and Taganrok.—The Genoese thoroughly understood the importance of such a line of coast when, towards the end of the 13th century, they purchased, or rather took, from the Mongol-Tartars the ancient *Theodosia*, spread their colonies over all *Taurida*, covered with their ships the shores of the Euxine, and founded Kaffa, which soon became the principal centre of Europe's commerce with Asia Minor, Persia, and the Indies. Two centuries later the Crimea was for a long time blighted, as it were, with sloth and sterility; its cultures, its commerce pined away more and more through atrophy, and the yoke imposed on it by the Muscovites in 1740 was little calculated to restore it; but by the franchise granted by the Empress Catherine to its ports subsequently, the peninsula saw its prosperity rapidly return. Unfortunately, the Czar Paul thought he ought to protect the commerce of *Taurida* by cancelling this franchise, and replacing it by an oppressive system of customs, with all their restrictive regulations. The inhabitants are Tartars of three or four different tribes, Cossacks, Russians, Armenians, Jews, Gypsies, and foreign colonists, chiefly of German descent. Schnitzler, in 1835, estimated the Tartar pop. at only 100,000, and reported it to be rapidly decreasing. The prov. is divided into 6 circles, besides the isle of Taman, and the land of the Tchernomorski Cossacks. See articles AZOF (SEA OF), CRIMEA, ODESSA, and SEBASTOPOL.

TAURINES, a village of France, in the dep. of Aveyron, 15 m. SSW of Rhodes, near the Seor, an affluent of the Viour.

TAURION, or **THORION**, a river of France, which rises in the dep. of Creuse, cant. and 1 m. S of Pailhier, and flows into the Vienne, on the r. bank, at St. Priest, 7 m. NE of Limoges, after a course of 52 m.

TAURIS. See **TARRIS**.

TAURISANO, a town of Naples, in the Terra-d'Otranto, 15 m. SE of Gallipoli. Pop. 1,300.

TAUROGEN, a large town of Russia in Europe, in the gov. and 135 m. W of Vilna, and district of Rossiena, on a small affluent of the Niemen.

TAUROGINA, a town of Russia in Europe, in the gov. and 60 m. NNE of Vilna and district of Vidzoni, on a small lake.

TAURUS, a lofty chain of mountains, situated in the eastern part of Asia Minor, where it borders on Syria. It commences on the r. bank of the Euphrates, and runs from E to W through the pash. of Marash; then turns SW, separating Caramania from the pash. of Itchil; then turns NW to the source of the Nabis, near which it forks into two branches, one of which runs NW towards the straits of Constantinople; the other SW, terminating at Cape Arhora, a little S of the embouchure of the Buyuk-Menderes. The chain is very lofty, and approaches so near to the Mediterranean as in some places to leave only narrow passes, the most celebrated of which is that of Issus, where the battle was fought between Darius and Alexander. These mountains are in many places covered with vast pine forests. They are traversed in summer by Turcoman shepherds, who in winter descend and take up their residence in the towns. See article ASIA MINOR.

TAUSHAN, or **RABBIT ISLANDS**, a group of small islands in the Archipelago, 6 m. N of Tenedos, near the coast of Turkey in Asia. They are mountainous and rocky, but well-wooded.

TAUSS, or **DRASTOW**, a town of Bohemia, 15 m. W of Klatau. Pop. 4,000. It is surrounded with a wall, and has large manufactures of thread and linen.

TAUSTE, a town of Spain, in the prov. and 27 m. NW of Saragossa, on the small river Riguel, near its influx into the Ebro. Pop. 3,500. It is situated in a fruitful district. A canal from this place forms the great canal of Aragon, and promotes the internal trade of the country.

TAUTENBURG, a village in the grand-duchy of Saxe-Weimar, 1 m. ESE of Dornburg.

TAUTEREN, an island on the coast of Norway, in N lat. 22° 41'.

TAUVES, a town of France, in the dep. of Puy-de-Dome, on the small river Mourgagne, 25 m. SW of Clermont. Pop. 1,200.

TAUXIGNY, a village of France, in the dep. of Indre-et-Loire, cant. and 9 m. NW of Loches, on the Echandon. Pop. 1,400.

TAVAI. See **TAVOY**.

TAVAI-POENAMMON. See **NEW ZEALAND**.

TAVALY, one of the Molucca group, to the SW of Gilolo, in S lat. 0° 30'.

TAVANDA, a river of Bohera, in the prov. of Ibarra, which rises in the desert of Cayamburu, and passing through the town of Ibarra, turns E, and enters the Mira.

TAVANNES, a village of Switzerland, in the cant. and 21 m. NW of Berne, and 1 m. NNE of the Pierre-Pertuis passage. Pop. in 1851, 672.

TAVARA, a village of Spain, in the prov. and 27 m. NNW of Zamora. Pop. 2,000. There is a fine palace here of the Dukes de l'Infantado.

TAVASTEIUS, or **TAVASTLAND**, a district of Russian Finland, bounded by E. Bothnia on the N, and by the gulf of Finland on the S. Its length from N to S is about 180 m.; its breadth from E to W varies from 35 to 100 m. Pop. about 350,000, chiefly Fins. The N part is hilly, and covered with wood, but the rest is a level country, diversified with arable and meadow land, and well-watered with rivers and lakes. The exports comprise barley,

pease, beans, flax, hemp, dried fish, cattle, leather, tallow, butter, lime, and bark. Its capital is Helsingfors.

TAVASTEUS, or **KRONSBORG**, a small town of Russian Finland, formerly the capital of the district of the same name, 80 m. ENE of Abo, in N lat. $61^{\circ} 3'$. It is situated among marshes, and built of wood, but its streets are broad and irregular. It has a castle, with an arsenal and magazines.

TAVDA. See **TAUDA**.

TAVE, a river of Carmarthenshire, which runs into the Severn at St. Clear, near Laugharn.

TAVE. See **TAF**.

TAVEL, a village of France, in the dep. of Gard, 15 m. E of Uzes. Pop. 800.

TAVENNA, a town of Naples, in the prov. of Sannio, 9 m. NW of Larino. Pop. 1,500, speaking an Illyrian dialect.

TAVERHAM, a parish of Norfolk, $5\frac{1}{2}$ m. NW of Norwich, watered by the Wensum. Area 2,099 acres. Pop. in 1831, 191; in 1851, 207.

TAVERNA, a town of Naples, in Calabria-Ultra, 12 m. ENE of Nicastro, near the l. bank of the Alii. Pop. 2,400. It has coarse woollen manufactures. It was greatly devastated by an earthquake in 1788.

TAVERNA, a village of Switzerland, in the cant. of Tessin, in the valley of the Agno, 4 m. NNW of Lugano. Pop. 512.

TAVERNES, a town of France, in the dep. of the Var, 20 m. N of Brignoles. Pop. 1,400.

TAVERNIER KAY, a small island on the N coast of Cuba, one of the Tortugas, 2 m. from the SW end of Kay Largo.

TAVERNILLA, a village of New Granada, in the prov. of Ystmo, on the line of railway from Chagres to Panama, 21 m. from Chagres, and at an alt. of about 50 ft. above the level of the river Chagres.

TAVERNY, a village of France, in the dep. of Seine-et-Oise, cant. and 4 m. NW of Montmorency. Pop. 1,500.

TAVIANO, a town of Naples, in the prov. of Terra-d'Otranto, 9 m. SE of Gallipoli, within 3 m. of the E of the gulf of Toronto. Pop. 1,500.

TAVIGLIANO, a village of the Sardinian states, in the prov. and 6 m. N of Bielle. Pop. 1,200.

TAVIGLIONE, a mountain of Switzerland, in the cant. of Vaud, 6 m. E of Aigle, having an alt. of 7,000 ft. above sea-level.

TAVIGNANO, a river of Corsica, which rises to the W of Monte Rotondo; runs NE, and then SE, and flows into the sea in N lat. $42^{\circ} 13'$, after a winding course of 50 m.

TAVINSK, a town of Russia, in the gov. of Orenburg, 30 m. NNE of Sterlitamak, on the r. bank of the Bielaya.

TAVIRA, or **TAVILA**, a port of Portugal, in Algarva, at the mouth of the river Seca, which divides it into two, and which is here crossed by a bridge of 7 arches, 140 m. SSE of Lisbon, in N lat. $37^{\circ} 7'$. Pop. 8,700. It is surrounded by a wall, and defended by a castle: there are also two small forts at the mouth of the harbour. The palace of the governor of Algarva, who resides here, is an elegant structure, and the town is, on the whole, comparatively well-built. It has two churches, an hospital, and six convents. The entrance of the harbour is obstructed by a sand-bank; but the export trade, in figs, almonds, and other fruit, is considerable.

TAVISTOCK, a parish and parl. borough in the co. of Devon, 34 m. WSW of Exeter, on the river Tavy, which is here crossed by three bridges, and in the line of the Tavistock canal, which unites it with the navigation of the river Tamar. Area of the p. 10,700 acres. Pop. in 1831, 5,602; in 1851,

8,147. The town stands on the NW bank of the Tavy, in a valley surrounded by hills, and possessed of many local attractions. Many of the houses are old, but in general the place is well-built, though the streets are for the most part narrow and indifferently paved. It was formerly of greater note than at the present time, but it still returns 2 members to parliament. Electors registered, in 1837, 329; in 1852, 349. The limits of the borough are now extended so as to coincide with the whole parish. The richest tin and copper mines in Devon are in this vicinity: see article **DEVONSHIRE**. Lead and manganese are also found here, and occasionally the magnetic ore or loadstone. Many of the inhabitants are occupied in these mines; others in the manufacture of serges and coarse linens.

TAVO, an island of the gulf of Bothnia, 30 m. SW of Uleaborg, in N lat. $64^{\circ} 49'$.

TAVOLARA, a small island off the NE coast of Sardinia, in front of the entrance of the harbour of Terra-Nova, in N lat. $40^{\circ} 54'$. The only occupants of this island are wild goats.

TAVORA, a town of Portugal, in the prov. of Beira, 6 m. E of Lamego.

TAVOY, **TAVAY**, or **DHA-WAY**, a town of the Trans-Gangetic British prov. of Tenasserim, situated on the l. bank of a river of the same name, 35 m. above its mouth, but only 8 m. distant from the sea in an E direction, in the midst of a rich alluvial valley, which is bounded on the W, at a distance of about 3 m., by a range of precipitous and densely wooded hills from 200 to 400 ft. in height, and extending along the river to its embouchure, and on the E, at the distance of 7 or 8 m., by another range of similar elevations, above which towers at the distance of 20 m. the lofty chain which intersects the whole peninsula. The town contains 20,000 inhabitants. The town is scattered, most of the houses having a court round them planted with trees. The houses are in general roomy and comfortable; but a few are built of bamboo-matting set on wooden frames and raised several feet from the ground. The Tavoyers are a different people from the Burmans, and may be said to speak a distinct language. They had the reputation under the Burman government of being a riotous and rebellious set, and were kept with a strict hand: when they went to other towns they were obliged to quarter themselves in a particular spot, whence they were not allowed to be absent between sunset and sunrise. Hence a suburb of Maulmein is still called Tavoy-su. This is the only town on the Tenasserim coast that manufactures silk cloths in any quantity. The raw material is brought from China. Coarse cotton-pieces are also woven by the women. The principal trade of T. is carried on by Chinese junks and Burman boats, which carry the staple produce, rice, to Penang; there is also a small trade with Rangoon and Maulmein. T. is only 15 days' journey, partly by water, from Bangkok, the capital of Siam; yet from the jealousy of the Siamese government in excluding foreigners, little or no trade is carried on with that country. A few Siamese, however, yearly bring to T. brass cups, gold leaf, and false hair, which the Burman women wear at the back of the head. T. is celebrated for the manufacture of Burman musical instruments, the chief of which are the harp, the *mee-gyoung*, (an instrument in the shape of a crocodile, with three strings along the back) the *patala*, a sort of harmonicon made of bamboos and played with sticks, and a three-stringed fiddle, precisely the same in form as the European violin, which must have been borrowed from the Portuguese who settled on this coast more than two centuries ago. The hills E of the town contain tin,

which was formerly used for coining by the Burman government; the mines are not now worked. T. formerly belonged to the king of Siam, but was taken by the Birmans in 1785. It was besieged the following year by the Siamese, but was so well defended that it remained in possession of the conquerors till 1790, when bribery caused the gates to be opened, and restored it to the monarch of Siam. It was again taken by the Birmans in 1792, and confirmed to them by the treaty of peace of 1793. In 1826 it came under British sway.

TAVROVKAIA, a town of Russia, in the gov. and 9 m. S of Voronezh. Pop. 1,000.

TAW, a river of Devon, which rises near the centre of the county, about 3 m. SE of Oakhampton; flows to Barnstaple; then turns W, and joins the Torridge, at its mouth, in the Bristol channel.

TAWALLY, one of the Gilolo islands, in 8 lat. 0° 21'. It is 35 m. long from N to S, and 6 m. in average breadth.

TAWI-TAWI, the chief of a cluster of islands, 56 in number, composing part of the Sulu archipelago. It is situated in N lat. 5° 15', and E long. 120° 10'. It is 36 m. in length. The other islands are of various size, some merely rocks; and all have inhabitants, though but thinly peopled.

TAWSTOCK, a parish in Devon, 2 m. S of Barnstaple, on the W bank of the Taw. Area 6,582 acres. Pop. in 1831, 1,348; in 1851, 1,388.

TAWTON (*Rushor's*), a parish in Devon, 2½ m. S by E of Barnstaple, on the E bank of the Taw. Area 4,263 acres. Pop. in 1851, 2,004.

TAWTON (*Nowra*), a parish in Devonshire, 6½ m. NE of Okehampton, watered by the river Taw. Area 5,814 acres. Pop. in 1851, 1,906.

TAWTON (*Sourra*), a parish in Devon, 8½ m. E by S of Okehampton, on the river Taw. Area 10,879 acres. Pop. in 1831, 1,937; in 1851, 2,758.

TAWY, a river of Brecknockshire and Glamorganshire, which runs into the Bristol channel at Swansea.

TAXALL, a parish in the co.-palatine of Chester, 8½ m. NE by E of Macclesfield, on the river Goyt, and crossed by the Cromford railway. Area 3,718 acres. Pop. in 1851, 205.

TAXAMALCA, a town of Mexico, 60 m. S of Mexico.

TAXAMARCA, a town of Mexico, in the prov. and 40 m. E of Mechoacan.

TAXIMAROA, a settlement of Mexico, in the state of Mechoacan, 15 m. S of Valladolid.

TAY, a river chiefly of Perthshire and partly of Fife and Forfar, the largest and the most exquisitely scenic of all the Scottish streams, and one which pours more water into the ocean than any other river of Great Britain. The Tay of common topography is the southern one of two streams which unite 7½ m. above Dunkeld, and includes no more of even that stream than the portion below Loch-Tay; while the Tay of correct geography must either be the northern one of the two great streams, as both the larger and the longer, or must at least include the southern stream up to the source of its remotest head-water. The northern stream has three successive names,—the Gaur, the Rannoch, and the Tummel; and, in its progress, expands itself into three great lakes,—LYDOCH, RANNOCH, and TUMMEL: which see. It rises at a point about 18 or 20 m. NNW of the source of the Fillan, the remotest of the head-waters which find their way into Loch-Tay; and, including its progress through its lakes, but excluding its sinuosities, it performs an entire separate run of about 60 m. The southern of the two great streams, part of which is recognised as the popular Tay, performs, from its

highest source, and measured in straight lines and through lakes, to its junction with the Tummel, a run of about 57 m. Its origin is on the side of Benloy, 7 m. NNW of the head of Loch-Lomond. It expands itself when about third way into Loch-Dochart, and bears respectively before and after this expansion, the names of the Fillan and the Dochart. From the lower end of Loch-Tay, to its junction with the Tummel, is a distance of about 14 or 15 m. From its junction with the Tummel to its junction with the Earn, where it begins to expand into an estuary, it achieves, irrespective of sinuosities, a distance of 32 m., and has on its r. bank Little Dunkeld, Kinclaven, Auchtergaven, Redgorton, Perth, and Rhynd,—and, on its l. bank, Logierait, Dunkeld, Caputh, Cargill, St. Martins, Scone, Kinnoul, Kinfauns, and St. Madoes. As an estuary, it extends 26 m. from the mouth of the Earn to Buddonness, the point where it becomes quite lost in the German ocean; has for 16 m. a breadth of from three-fourths of a mile to 3 m., and the direction of NE by E; has, over the other 10 m., a prolonged contraction of from 2 m. to less than 1 m. in breadth, and then an expansion, down to St. Andrew's-bay, of 9 or 10 m. in breadth, and, in both places, a prevailing easterly direction. Its entire length of course, jointly as a river, and as an estuary, is thus, if measured in straight lines from the head of the Gaur, 118 m.; if measured in the same way from the head of the Fillan, 115 m.; and, if measured along its channel from either of the remote sources, between 160 and 200 m. The chief tributaries of the northern great head-branch are the Erich, which falls into Loch-Rannoch, the Gary, and the Tilt, which falls into the Tummel a little below Killiecrankie. Those of the southern great head-branch are the Lochy and the Lyon. Those of the united stream are the Bran, the Isla, the Erich, the Shochie, the Almond, and the Earn. The estuary in general is shallow, and receives such an amount of debris from the steady and large current of the river, as it has been apprehended, must eventually drive shipping from its waters. Though it cannot compare in spaciousness and some other properties with the Forth, it is at present not a little commodious, and all the way from Buddonness to past the mouth of the Earn, may be considered as a continuous harbour. Vessels of 500 tons can go up to Newburgh; and vessels drawing 9 ft. of water can go up, though with difficulty, and in critical states of tide and freshet, to Perth. The tide from the ocean flows to a point about 1 m. above Perth, and rises at Perth harbour to a height of 10 ft. above the bed of the stream. The extent of surface drained by the Tay and its tributaries is variously computed at 2,396, and 2,750 sq. m.; that of the Spey, the entirely Scottish river next to it in size, at 1,800 and 1,298½ sq. m. The geographic positions and character of the district, whence most of the waters are drawn, being in the case of the two rivers very similar, the Tay may be supposed to discharge about twice as much water as the Spey. Dr. Anderson determined the quantity of water which, in the mean state of the river, flows through a section of it opposite Perth, to be at the rate of 3,640 cubic ft. per second; but it was reduced, in the course of the summer of 1819, to 457 cubic ft., and at the close of the summer of 1835, to a still smaller volume. Much of the country which now forms the sea-board of the estuary, and especially the whole of the cause of Gowrie, and the lower part of Strath-tay, exhibit evidence of having, at a comparatively recent period, lain under the sea, and been gradually raised above its level by depositions from the Tay.

TAY (*Loch*), a magnificent sheet of water, in

Breadalbane, Perthshire, upwards of 15 m. in length, and averaging from 15 to 100 fath. in depth. The united streams of the Dochart and Lochy pour their waters into the head of the loch, a little below the village of Killin; while the noble Tay issues from its lower end at Kenmore. Ben-Lawers rises from the N margin of the lake to the height of 4,015 ft. above the level of the sea. Near the E end of the lake, and 200 yds. from the N shore, is a small island of a circular form, about 400 yds. in circumf. containing the ruins of a priory erected in 1122. The waters of this lake have frequently, without any apparent cause, undergone singular and violent agitations, occasioned, it may be presumed, from some subterraneous impulse.

TAYA, a small island in the Eastern seas, situated off the E coast of Sumatra, in S lat. 0° 48'.

TAYABANNA, a town of Brazil, in the prov. and 52 m. WSW of Parahiba, on the l. bank of the Parahiba.

TAYABO, a town on the E coast of the island of Celebes, on Gunong-Tellu bay, in S lat. 1° 10'.

TA-YAOU, a district and town of China, in the prov. of Yun-nan, and div. of Tsao-heung-fu, in N lat. 25° 46', and E long. 101° 30'.

TA-YAY, a district and town of China, in the prov. of Hu-pih, and div. of Wu-chang-fu, in N lat. 30° 6', and E long. 114° 57'.

TA-YIH-HEEN, a district and town of China, in the prov. of Sze-chuen, and div. of Kung-chu, in N lat. 30° 37', and E long. 103° 33'.

TAYLOR, a county in the W of Iowa, U. S., drained by Modaway and La Platte rivers. Area 522 sq. m. Pop. in 1850, 204.—Also a co. in the central part of Kentucky. Area 208 sq. m. Pop. 7,250. Its cap. is Campbellsville.—Also a co. in the NW of Virginia, watered by the Monongahela. Area 214 m.

TAYLOR'S ISLES, three small islands on the E coast of New Holland, between Thistle island and the shore, from which they are about 2 m. distant.

TAYLORSVILLE, a village in Spencer co., Kentucky, U. S., on the N side of Salt river, 20 m. WSW of Frankfort.—Also a village in Bucks co., in Pennsylvania, 106 m. E of Harrisburg.—Also the cap. of Hanover co., in Virginia, 20 m. N of Richmond.

TAYNULT, a small ill-built village in Argyleshire, on the S coast of Loch-Etive, about 6 m. from Bunawe.

TAYOMAYO, a small island of Spain, in the Mediterranean, off the NE coast of the island of Majorca.

TAZE, a river of Asiatic Russia, which rises from two lakes in the N part of the gov. of Tobolsk, and after a considerable course from S to N, falls into the Tazovskaya gulf, in the Frozen ocean.

TAZEWELL, a county in the SW part of Virginia, U. S. Area 1,056 sq. m. Pop. in 1850, 9,942. Its cap., of the same name, is situated on the S side of the N fork of Clinch river.—Also a co., near the centre of Illinois, U. S. Area 704 sq. m. Pop. in 1850, 12,052. Its cap. is Fremont.

TAZOVSKAIA, a gulf or bay in the Obakaia gulf, on the coasts of the Russian govs. of Tobolsk and Jeniseisk, formed by the waters of several rivers of Siberia, and joined to the Obakaia gulf. It is about 140 m. in length, and 3 m. in breadth.

TAZRI, a village of Persia, in the prov. of Laristan, 15 m. NE of Tarem.

TCHABLAR-SAGHI, CHEBLER-SAGHI, or CHAMOULA (CAPE), a headland of Turkey in Europe, in Bulgaria, in the sanj. of Silistria, 16 m. S of Mangalia, on the Black sea, in N lat. 43° 32' 33", E long. 28° 38' 37". A tower of pyramidal form used as a light-house formerly existed here.

TCHACHNIKI, a town of Russia in Europe, in the gov. of Vitebsk, district and 15 m. E of Novoi-Lepel.

TCHAD. See CHAD (LAKE).

TCHADYR, CHADIR-DAGH, or PALATE-GORA ('Tent Mount'), a mountain of Russia in Europe, in the gov. of the Taurida district, and 18 m. SSE of Simferopol, and 20 m. E of Bakchi-Serai, between 44° 46' and 44° 48' N lat., and between 34° 17' and 34° 18' E long. It has an alt. of 5,135 ft. above sea-level, and is the highest summit of the Crimea. It consists of an immense mass of calcareous rock, rising precipitously, especially on the E and W, and flattened on the top, whence in clear weather nearly the entire peninsula is visible. It presents numerous fissures, some of which, inaccessible to the sun's rays, are filled with perpetual snow. Except here and there, a few alpine plants, and the base which is covered with fine forests of beech, it is almost entirely arid. This mountain gives rise on the E and N to several of the head-streams of the Salghir; on the W, to the Kuise, an affluent of the Alma; and on the S to the Alushta. It was named by the Greeks, *Trapezus*.

TCHADOBETZ, a river of Russia in Asia, in the gov. and district of Jeniseisk, which runs W, and after a course of about 240 m., joins the Verkhniaia-Toungouska on the r. bank, near Tchadobeko.

TCHADOBESKO, a town of Russia in Asia, in the gov. and district and 375 m. ENE of Yeniseisk, on the Verkhniaia-Toungouska, near the confluence of the Tchadobets.

TCHADOSY, a town of Russia in Europe, in the gov. of Vilna, district and 68 m. NNE of Vilkomir.

TCHADRIN, or YADRIN, a town of Russia in Europe, capital of a district, in the gov. and 120 m. W of Kazan, on the l. bank of the Sura. This district is in the E part of the gov., and is populous and well-cultivated.

TCHAGAINY, or SAGAINY, a town of Burmah, in the Mramma, on the r. bank of the Irawady, opposite Amarapura. It occupies the slope of several hills, and contains numerous temples, the greater number of which are adorned with spires and gilt domes, presenting from a distance an imposing effect. On closer inspection, however, it affords very different impressions. The houses are built of wood and covered with tiles. The fort, formerly one of the most important points of defence in the empire, is now in ruins. This town is the great entrepot for the cotton trade with China. In its vicinity are quarries of fine white marble. From 1760 to the death of Namdojy-Pra, in 1764, this town was the capital of the Burman empire.

TCHAGANI, or GLOUKHOI (CAPE), a headland of the Crimea, 8½ m. ESE of Cape Kazantep or Kettle, with which it forms the entrance to a bay of that name.

TCHAGATAI. See TARTARY.

TCHAGHIRKHAN, a village of Turkey in Asia, in Anatolia, in the sanj. of Khodebendkiai, 12 m. NW of Brosissa, near the r. bank of the Ufer-su. It has four thermal baths.

TCHAGHOURI, a fortress of Afghanistan, in the prov. of Bamian, on a mountain of the same name.

TCHAGLAIK, a town of Turkey in Europe, in Rumelia, in the sanj. of Gallipoli, 17 m. NE of Le Cavale, at the foot of a lofty mountain, on the r. bank of the Kara-su.

TCHAGLASA. See TSHIANGLODZIAN.

TCHAGODA, a river of Russia in Europe, which has its source in the gov. of Tver, district and 18 m. E of Bejetsk; runs W through the N part of the district of Kaschin; enters the gov. of Jaroslav; turns N, and joins the Mologa on the r. bank, 21

m. NW of the town of that name. It is navigable by boats of shallow draught.

TCHAGRA, a river of Russia in Europe, in the gov. of Saratov, and district of Khvalinsk, which has its source 45 m. SSW of Samara; runs generally WSW, partly on the confines of the gov. of Simbirsk; and after a sinuous course of upwards of 90 m., throws itself into the Volga on the l. bank, 6 m. SE of Khvalinsk. It flows through an uninhabited though fertile country.

TCHAHAN-SOUBARKAN-KHOTON, a town of Mongolia Proper, about 180 m. NNE of Pe-king, in a fertile valley, to the N of the Great Wall, and to the W of Lan-ho. With the exception of the houses of the mandarins, it consists of miserable cabins, and yet in its vicinity is a fine palace and magnificent park, in which the emperor habitually spends a portion of the summer. This town is connected by a fine road with the capital.

TCHAHASU, a town of China, in Mandahuria, 270 m. NE of Tsitsikar, near the l. bank of the Amour.

TCHAHDARRA, a village of Hindostan, in the prov. and 8 m. N of Lahore, near the r. bank of the Ravi. It contains two fine mausoleums.

TCHAHIDAM, a river of China, in the central plateau of the territory of the Koko-Nor. It has its sources in the Alak-Nor and Toson-Nor; runs NW; receives the Gedargou, Onlan-onssom, Bouloungir; and after a course of about 240 m., throws itself into the Dabsoun-Nor, a lake of the desert which has no outlet.

TCHAI-KING-KOEN, a town of China, in the prov. of Sze-chuen, 100 m. SW of Tching-le.

TCHAINAT. See CHAINAT.

TCHAINITZA, **TCHENITZA**, or **CENITZA**, a town of Turkey in Europe, in Bosnia, in the sanj. of Novi-Basar, 45 m. SE of Bosna-Serai, in a fertile plain, on a torrent, of which a portion of the waters passes under the single arch of a lofty stone-bridge, and the remainder is conducted to supply power to the manufactories of blankets and coarse cloth in the vicinity. It has a castle, rectangular in form, with a tower at each angle, in which the pasha of Bosnia maintains a garrison, and a portion of his household.

TCHARLI-DAGH, a mountain of Turkey in Asia, in Anatolia, in the sanj. of Kodja-Ili, a little to the S of the gulf of Ismid, and to the NE of Lake Isnik.

TCHAISSI, a fortress of Russia in Asia, in Mingrelia, on a lofty mountain, 12 m. NE of Anaklia.

TCHAKA-KHOTON, a town of Mongolia Proper, in N lat. 43° 59', E long. 117° 54'.

TCHAKHARS, or **TSACHARS**, a district in the S part of Mongolia Proper, between the Nishan mountains and China, comprising a tract 800 m. in extent, generally mountainous, and watered by several small rivers. It is in some parts capable of culture, and affords good pasture. It is inhabited by a tribe of the same name. They are divided into eight banners. T. signifies in the Mongol language a border town. Under the Ming dynasty it bore the name of Tsagan or Tohagan. The Tohakars formed one of the 8 corps of the Manchu army, by whom China was conquered in 1644.

TCHAKON-TOWN, a group of islands, eight in number, in the gulf of Saghalien, to the NE of Mandshuria, between the island of Saghalien and the continent.

TCHAKTCHUR, a town of Turkey in Asia, in the pash. and 120 m. NE of Diarbekir.

TCHALA, a town of Russia in Asia, in the gov. of Georgia, in the Kartalinia, to the ESE of Gori. It is enclosed by walls. In the vicinity is the convent of Samtavissi.

TCHALATDERE, **SALATDERE**, or **BOKLU**, a river of Turkey in Asia, in Anatolia, in the sanj. of Biga, which has its source in Kas-dagh, a summit of Mount Ida; runs NNE; receives the Ustvola on the r.; and after a total course of 48 m., throws itself into the sea of Marmara. This river is celebrated in history for the victory of Alexander the Great over the Persians.

TCHALBAH, **TOHEMBACHE**, or **TOHELASI**, a river of Russia in Europe, in the gov. of the Caucasus. It takes its rise in the district and 60 m. NW of Stavropol; runs NW; enters the Cossack territory; turns afterwards W; forms several lakes, amongst others that of Hadkoi; and after a course of upwards of 150 m., throws itself into the gulf of Beisongski, in the sea of Azof.

TCHALBUKHA, a town of Russia in Asia, in the gov. of Irkutsk and district of Nerchinsk, on a river of the same name.

TCHALDIR, or **TOHELDER-DAGH**, a range of mountains in Turkey in Asia, a ramification of the Taurus chain, on the confines of the pash. of Akalzik and Erzerum.

TCHA-LING-CHU, a district and town of China, in the prov. of Hu-nan, dep. and 106 m. SSE of Chan-sha-fu, in N lat. 26° 58' 40", E long. 113° 23'.

TCHALIT, a territory and tribe of Mongolia Proper. The tribe forms a banner of the r. wing of the Kort-shin.—The territory is 120 m. in length from N to S, and 18 m. in breadth.

TCHALKHA, a district of Russia in Europe, in Circassia, on the Shadghir. The sterility of the soil occasioned the emigration of a large portion of its inhabitants to the banks of the Kumbalei, the capital of which, also named Tchalkha, contains about 200 families.

TCHALLITCHAKA, a lake of Little Tibet, near Roudok. It affords borax.

TCHALU, a village of Tibet, in the prov. of Thsang, 39 m. NNW of Tissisudon, between two lakes, one of which is held in high veneration by the Tibetans.

TCHAM-HALEKA-TANDA, a fortress of Sind, district of Rona, 18 m. NE of Hyderabad. It has a considerable suburb.

TCHAN, a river of China, in the prov. of Kiangsi, which flows into the Kan-kiang, on the l. bank, after an easterly course of 120 m.

*. TCHAN and TCHANG. For words with these prefixes, see CHAN and CHANG.

TCHARDAH, a town of Turkey, in the sanj. and 56 m. NW of Sophia, near the Nissara.

TCHARDAKLI, a village of Russia, in the gov. of Yekaterinoslav, 18 m. N of Marionpol, on the river Kalet.

TCHARTORISK, a town of Russia, in the gov. of Volhynia, 36 m. NNE of Lutsk, on the l. bank of the Styr. Pop. 1,600.

TCHARYTCH, a river of Asiatic Russia, which rises in the Little Altai; runs first NW, and then NE; and joins the Obi, on the l. bank at Bijak, after a winding course of about 200 m.

TCHAVDAR (Цаѣ), a low sandy point on the coast of the Black sea, in N lat. 45°, E long. 35° 51'.

TCHEBOKSARI, a town of Russia, in the gov. and 74 m. WNW of Kasan, on the r. bank of the Volga, at the confluence of a river of the same name. Pop. 5,000. It has a traffic in tallow, wine, wax, and honey.

TCHECKMEH, or **TEHISME**, a port of Asiatic Turkey, in the sanj. of Saghala, 42 m. W of Smyrna, in N lat. 38° 24', opposite to the island of Chios. Pop. 5,000. It is defended by a large citadel. In its neighbourhood are hot springs. It occupies the site of the ancient *Cyaeos*.

TCHE-KIANG. See **CHE-KIANG.**

TCHELGA, a town of Abyssinia, in the prov. of Amhara, 18 m. NW of Gondar.

TCHELIABINSK, a town of Asiatic Russia, in the gov. of Orenburg, 52 m. N of Troitskaia, on the Mijas. It is fortified with a wall and palisades, and is generally garrisoned by a few Cossack troops and Bashkirs.

TCHEMBUL. See **CRUMBUL.**

TCHENAB. See **CHENAB.**

TCHEFELOVO, a town of Albania, in the sanj. and 18 m. NNE of Joanina.

TCHEPTZA, a river of Russia, which rises on the E frontier of the gov. of Viatka; flows N, and WNW; passes Glazov; and joins the Viatka on the l., after a course of 250 m.

TCHERDIN, a town of Russia, in the gov. of Perm, on the r. bank of the Kolva, near the confluence of the Vischera. It is a place of considerable antiquity.

TCHEREMSHANE, a river of Russia, which rises about 30 m. SW of Bugulma, in the gov. of Orenburg; flows NW, and then SW; and joins the Volga, on the l. bank, 10 m. SSE of Singlei, after a course of 150 m.

TCHERKASK. See **CHERKASK.**

TCHERKESSES. See **CIRCASSIA.**

TCHERNIGOV, a government in the S of Russia, lying between the parallels of 50° 20' and 58° 10' N; and separated on the W by the Dnieper from the gov. of Minsk and Kiev. It has an area of 48,379 sq. versts, with a pop. in 1846 of 1,430,000. Its principal river is the Desna. Its surface is level and soil fertile.—Its cap. of the same name, situated on the Desna, 80 m. NNE of Kiev, has a pop. of 8,000.

TCHERNOILAR, or **TCHERNOIARSK**, a fortified town of Russia, in the gov. of Astrakhan, on the r. bank of the Volga, 154 m. NW of Astrakhan. It conducts an important traffic in cattle and fish.

TCHIKISLA, a village of Asiatic Turkey, in the sanj. of Konieh, 36 m. SSW of Nigdeh, on the site of the ancient *Nazianzum*.

TCHILKA. See **CHILKA.**

TCHIMBURSK (CAPE), a headland on the coast of the sea of Azoff, 9½ m. S of Cape Otchakof.

*. **TCHIN** For words with this prefix, see **CHIN** or **CHING.**

TCHORLU, a town of Turkey, in the sanj. and 39 m. SW of Viza, near the l. bank of a river of the same name, which flows into the sea of Marmora, 3 m. E of Rodosto, after a course of 45 m. Pop. 4,000.

TCHOUGOUEV, a town of Russia, in the gov. and 27 m. SE of Charkof, on the r. bank of the Sernoi-Donetz. Pop. 10,000. It is celebrated for its extensive trade in tanned sheep-skins and in leather.

TCHUL. See **CHUL.**

TCHUKTSCHES, or **TCHUKTSCHI**, a people of Asiatic Russia, who, according to Wrangell, inhabit the NE part of Asia, extending from Tschann bay to Behring's straits in one direction, and in the other from the Anadyr, and the upper country of the Anik, to the Polar sea. Their neighbours to the S are the Koraki, and to the W the Tschuwanski and Jukahiri of the Anik. "They formerly occupied a more extensive territory, before the Cossacks from the Lena subdued the country through which the Kolyma flows. Though still in great measure a nomadic race, they have less of the characteristics which usually accompany such a mode of life, than the wandering Tungus; they are less cheerful, and more careful; they lay up stores for the future, and in general do not remove their dwellings without an object, but only when it becomes necessary to seek fresh pasture for their reindeer. They are more covetous and more saving than belongs to the character of genuine nomadic races. Their dress differs greatly from that of the Tungus, which is tight and close-fitting, and well-adapted to an active wandering life, whereas the clothing of the Tschuktschi is large, loose, and cumbersome. They wear long wide trousers made of fur, and an ample kuchianka. Formerly all the T. lived on the produce of their reindeer; but those among them who lost their herds by sickness or other causes settled by degrees along the coast, where they kill whales,

seals, and walrus. The walrus is almost as useful to the settled, as the reindeer is to the nomadic T. Their principal weapons are different kinds of spears, and particularly the batum. Iron being scarce, they sometimes employ walrus' tusks instead."

TCHULIM, a river of Asiatic Russia, formed by the confluence of the Great and Little Yuis, to the W of the Sagaitsis mountains. It flows in a winding, but prevaillingly N course to its junction with the Kemptchuga; after which it flows WNW to the Obi, which it joins on the r. bank, 100 m. NNW of Tomsk.

TCHUMBUL. See **CRUMBUL.**

TEA, a river of Spain, in the prov. of Vigo, which has its source on the S side of Monte Taro, 15 m. SE of Pontevreda; runs S; receives several streams; and after a course of about 27 m., joins the Minho on the r. bank, opposite the Portuguese town of Valencia.

TEAKIKI, or **THEAKIKI**, a river which has its source at the N extremity of the state of Indiana, U. S., on the confines of the territory of Michigan; runs WNW through the country of the Pottowato rivers; enters afterwards into the state of Illinois; bathes the counties of Clark and Edgar; and after a course of about 105 m., joins the Plain river on the l. bank, 51 m. SW of Chicago, to form the Illinois.

TEALBY, a parish of Lincolnshire, 4 m. ENE of Market-Raisen. Area 3,050 acres. Pop. 862.

TEALING, a parish in the S part of the Sidlaw district of Forfarshire. Area 4,300 imperial acres. Its kirktown is 5½ m. N of Dundee. Pop. 844.

TEAN, a village of Staffordshire, 2 m. S of Cheadle. Pop. 1,300.

TEANA, a town of Naples, in the prov. of Basilicata, district and 23 m. E of Lagonegro, cant. and 4 m. WNW of Chiaromonte, on the summit of a hill, near the r. bank of the Serapotamo. Pop. 1,200. It has two alms-houses and a fort.

TEANO, a town of Naples, in the prov. of the Terra-di-Lavoro, district and 20 m. NW of Caserta, on a hill. Pop. 6,000. It has a cathedral, designed by Vaccaro, and erected on 16 granite columns, five parish churches, two of which are collegiate, five convents, a seminary, an alms-house, and the ruins of an extensive castle.

TEATH. See **TEATH.**

TEBA, a town of Spain, in the prov. and 39 m. NW of Malaga, in the midst of the Sierra-Camorra. Pop. 4,500. It has an ancient Moorish castle, which was rendered defensible by the French in 1810, a parish-church, two convents, and an hospital. It contains some Roman antiquities. Basket-ware is its chief manufacture.

TEBALEH, a town of Arabia, in Yemen, 180 m. SE of Mecca. It is a large place, and is defended by a castle, situated on a steep rock and well fortified.

TEBAR, a town of Spain, in the prov. and 45 m. S of Cuenca, in a stony but fertile locality, near the r. bank of the Xucar. Pop. 1,560. Wine, oil, and saffron are the chief productions of the environs.

TEBES, a town of Persia, capital of a district in the prov. of Kuhistan, on the road from Herat to Yazd, 285 m. WSW of the former. Pop. 10,000. It possesses, from its situation, an active transit trade.

TEBELHELT, a town of Morocco, on the confines of the Sahara, and in the prov. of Tafilet, to the SW of the lake into which the Ziz discharges itself.

TEBENIATZKAIA, a town of Russia in Asia, in the gov. of Tobolsk and district of Kourgan, 17 m. SE of Rofailova, on the l. bank of the Tebeniak, a small affluent of the Tobol.

TEBESSA, a town of Algeria, 72 m. SE of Constantina. Pop. 9,000.

TEBIQUARIGUAZU, a river of Paraguay, which descends from the S side of the mountains of Villarica, 48 m. ESE of the town of that name; runs first SSW, then W, forming numerous sinuosities; and after a course of about 225 m., throws itself into the Paraguay on the l. bank, 31 m. SSW of Agatape.

TEBRIS. See **TAUREN**.

TEBUA, or **Hood**, an island of the S. Pacific, in the Mindanao archipelago, in 8 lat. 9° 26', W long. 138° 53'. It is small and inhospitable looking, but possesses a considerable population. It was discovered by Cook in 1774.

TEBUK, a village of Arabia, of about 60 houses, on the high road of the Syrian pilgrims, 4 days from Maan, and the like distance from Muweilah. The surrounding plain is one of the most insecure parts of the Desert. There is a small castle here.

TECALI, a town of Mexico, in the state and 18 m. SE of La Puebla. Pop. 1,000.

TECAMACHALCO, a town of Mexico, in the state of that name. Pop. 2,350.

TECAPA, a volcano of Guatemala, in the state of St. Salvador, to the SE of the volcano of Bastian.

TECH, a river of France, in the dep. of the Eastern Pyrenees, on the Spanish frontier, in the cant. and 8 m. W of Prats-de-Mollo; runs first E, then NE, passing Prats-de-Mollo and Arles; and a little to the N of Coret, and after a course of about 48 m., throws itself into the Mediterranean, 8 m. NE of Argeles.

TECHA, **TYOSCHA**, or **TEJE**, a river of Russia in Europe, which has its source in the gov. of Nijnii-Novgorod, in the district and 8 m. SSW of Loukoianov; waters that town and Arzamas; passes a little to the N of Ardatov; enters afterwards into the gov. of Vladimir; and after a total course in a generally WNW direction of about 126 m., joins the Oka on the r. bank, nearly opposite Murom.

TECHADA, a town of Spain, in the prov. and 33 m. WNW of Toledo, now nearly abandoned from the insalubrity of the situation.

TECHE (**Bayou**), a river of the state of Louisiana, U. S., forming a branch of Orocodile Bayou, from which it detaches itself on the r., in the co. and 5 m. NE of Opelousas. It runs SE through the parishes of St. Martin and St. Mary, and joins the Atchafalaya on the r. bank, 15 m. above the embouchure of that river in the gulf of Mexico. It has a very tortuous course of about 165 m., of which 100 are navigable. Martinsville, New Iberia, and Franklin, are the chief places on its banks.

TECHE, a village of France, in the dep. of the Isere, cant. and 4 m. NE of St. Marcellin, on the r. bank of the Vercy. Pop. 800.

TECHEIN, or **TESSAN**, a town of Turkey in Europe, in Bosnia, in the sanj. and 39 m. NE of Travnik, on a mountain torrent.

TECHOU-LOUMBOU, a town of Tibet, in the prov. of Thsang, a little to the W of Jika-dze, and near the r. bank of the Yarou-dzangbo-tchu, in N lat. 29° 4' 20", E long. 84° 27'. It is the ordinary residence of the Techou-Lama, and is in reality a large monastery, consisting of about 400 houses inhabited by *geolongs* or priests, and comprising numerous temples, mausoleums, the pontifical palace, in which all the ecclesiastical and civil officers attached to the court reside, and the interior of which is very handsome. An extensive exchange trade in gold and silver is maintained between this town and Lhasa.

TECKENDORF, **TEKE**, or **TYAKA**, a town of Transylvania, in the lower circle of the comitat of Klausenburg, and 17 m. S of Bistritz, on the r. bank of the Sajó. It has a salt lake.

TECKLENBURG, a town of Prussia, cap. of a

circle in the prov. of Westphalia, regency and 20 m. NNE of Munster, in the midst of the Teutoburgerwald. Pop. 1,300. It has a poor's-house, and the ruins of an old castle. Coal is wrought in the environs.—The circle comprises an area of 99 sq. m.

TECLA (**Santa**), a town of the republic of Monte-Video, in the Banda-Oriental, 129 m. WNW of Villa-Guarda, on the confines of the Brazilian prov. of Rio-Grande-do-Sul, in the midst of the mountains of Cochilla-Grande-de-los-Tapes, and near the source of the Rio-Negro.

TECOANTEPEC. See **TEHUANTEPEC**.

TECOLINE, a parish in Queen's co., 44 m. SSE of Stradbally. Area 1,022 acres. Pop. 289.

TECOLOTLAN, a town of Mexico, in the state of Xalisco, 75 m. SW of Guadalajara.

TECOMACHALCO, a river of Mexico, in the state of that name, which has its source in the mountains to the W of the capital; runs W; and after a short course, throws itself into the lakes of the valley of Mexico.

TECSÓ, **TACOWA**, or **TOSCU**, a town of Hungary, in the comitat of Marmaros, 15 m. WNW of Szigeth, on the r. bank of the Theiss, at the confluence of a small river of the same name.

TECUMSEH, a township in the co. of Lenawee, in the state of Michigan, U. S., 88 m. WNW of Monroe, on the r. bank of Raisin river. Pop. 2,600.

TECUMSETH, a township of Upper Canada, in the Simcoe district, intersected by the Nottawaasaga. Pop. in 1842, 2,491.

TEDAVNET, a parish of co. Monaghan, containing the villages of Bellanode and Scotstown. Area 26,502 acres. Pop. in 1831, 11,852; in 1841, 11,645. The surface descends from the culminating point of the Slieve-Beagh, to within a ½ m. of the town of Monaghan. The western and northern districts are, to a large extent, identical with a portion of the Slieve-Beagh mountains; and their highest ground has an alt. of 1,254 ft. above the level of the sea. The chief of about 19 lakes within the limits are Loughs Meenish, Mullaghmore, North Mullaghshigo, South Mullaghshigo, Carrowhatta, Sheettrim, Lamb, and Slack's-Grove.

TEDBURN (**SAINT MARY**), a parish of Devon, 5 m. SSW of Crediton. Area 4,433 acres. Pop. 861.

TEDDINGTON, a parish and village of Middlesex, 12 m. WSW of London. Area of p. 1,120 acres. Pop. in 1841, 1,199; in 1851, 1,146. Wax-candles are largely made here.

TEDELES (**CAFE**), a headland of Algiers, in the prov. of Constantine, between Rongia and Algiers, in N lat. 36° 54' 30", E long. 4° 14'.

TEDIF, or **TEDER**, a town of Turkey in Asia, in Syria, in the pash. and 21 m. E of Aleppo. It has a synagogue. In an adjacent mountain are several tombs and an aqueduct cut in the rock.

TEDLA. See **TADLA**.

TEDLES. See **DELLYS**.

TEDMENT, a town of Tripoli, in the S part of Fezzan, on the confines of the Sahara. Senna is grown in great quantities in the environs.

TEDNEST, a town of Morocco, 70 m. WNW of Morocco, on an affluent of the Tensift. Pop. 4,000, many of whom are Jews.

TEDSI, a town of Morocco, 25 m. ENE of Tardant, in N lat. 30° 15'. Pop. 12,000. Its vicinity is well cultivated and productive.

TEDSTONE (**DELAWARE**), a parish of Herefordshire, 4 m. NE of Bromyard. Area 1,677 acres. Pop. in 1851, 193.

TEDSTONE (**WAVER**), a parish of Herefordshire, adjoining above. Area 683 acres. Pop. in 1851, 69.

TEDVAN, a town of Turkey in Asia, in the

pash. and 90 m. WNW of Van, and near the NW extremity of the lake of that name.

TEDZEN, or **TEDZEN**, a river which has its source in Persia, in Khorassan, to the NE of Meshed; flows thence into Independent Tartary, where it waters the SW part of the Kharism; and after a total course in a NW direction of about 300 m., throws itself into a marshy gulf, in the E part of the gulf of Balkan, a branch of the Caspian sea.

TEELIN, a small estuarial harbour on the coast of co. Donegal. It opens $1\frac{1}{2}$ m. E of Carrigan-head, and penetrates the land about $1\frac{1}{2}$ m. northward, but has a very inconsiderable width, and is properly the estuary of a rivulet called the Glen river.

TEELIN-HEAD, a sublime cape in the p. of Glencolumbkille, co. Donegal, the most south-western or seaward portion of the series of magnificent cliffs which commences at Carrigan-head.

TEEN-TSIN, or **TIEN-SING**, a city of China, in the prov. of Pe-che-li, at the junction of the Imperial canal and the Pei-ho, 60 m. SE of Peking. It stretches several miles along the Grand canal, and is the seat of an active internal trade in salt. This salt is formed in vats near the sea-shore, and is thence transported to Taku, where it is kept for some time piled up on hillocks of sand. It is finally transported to Teen-tsin, and there again stored for several years before it is fit for sale.

TEES, a river which rises in the mountains of Cumberland and Westmoreland, and pursues a serpentine course along the S margin of the county of Durham, which it separates from Yorkshire throughout its whole extent. After emerging from Milbourn forest, this fine river flows through the romantic vale of Teesdale, where it receives several tributary streams, and after passing Barnard-castle, Sockburn, and Yarm, falls into the German ocean near Stockton. It is tidal to Yarm, and navigable for vessels of 60 tons burden up to Stockton. In its approach to the ocean from Portrack, the river expands into a large bay, about 3 m. across, which is slightly contracted at its mouth by a tongue of land called Seaton-Snook, from which a bar of sand stretches across the estuary to the Cleveland coast. The depth of water on the bar at spring-tides, is about 10 or 12 ft. at low water, and from 26 to 28 ft. at high water. The estuary of the Tees is a place of great safety for vessels in stormy weather. The principal fishery on the river is that of salmon.

TEESTA, a river of Asia, which rises on the N flank of the Himalaya, near the great peak of Chumulari, in several head-streams which unite under the parallel of $27^{\circ} 30'$, and in E long. 88° . The united stream flows S, piercing the Himalaya, and forming the line of demarcation between the territories of Butan and Sikkim, and finally joins the Ganges, under the name of Atri, about 40 m. WNW of Dacca, after a total course of 360 m.

TEFANE, a town of Asiatic Turkey, in the sanj. of Kutahiyah, 30 m. WNW of Estenas, and not far from the l. bank of the Sultanimir-Shah.

TEFFE, or **JERÉ**, a river of Brazil, in the prov. of Para, which running NNE, joins the Amazon, on the r. bank, under the parallel of $3^{\circ} 30'$, after a course of 550 m.—The district which lies between this river and the Amazon, and is bounded by the Coary on the E, is fertile in rice, sugar, manioc, cacao, and honey.

TEFFE, a village of Nubia, on the W bank of the Nile, 30 m. SSW of Assuan.

TEFFONT (ERRAS), a parish of Wilts, 7 m. W of Wilton. Area 742 acres. Pop. in 1851, 177.

TEFFONT (MAGNA), a parish of Wilts, 6 m. E of Hindon. Area 1,460 acres. Pop. in 1851, 281.

TEFLENAZ, a town of Syria, in the pash. and 18 m. SW of Aleppo.

TEFLIS, or **TIFLIS**, [in Georgian, **THILIS-KALAKHI**, i. e. 'the Town of Hot waters'], the capital of Russian Georgia, situated in a narrow valley on the river Kur, in N lat. $41^{\circ} 41'$, E long. $44^{\circ} 50'$. It is composed of an upper and lower town, and a citadel; the whole of which are encompassed by a wall with 6 gates. The lower town, which is situated on the bank of the river, is the principal seat of trade, and is inhabited chiefly by Armenians. Its streets are narrow, irregular, and filthy in the extreme. The upper town, in which are the official buildings and residences of the Russian part of the pop., presents a few broad streets and open squares. This town, says a very recent visitor, "has a peculiar aspect. On the side from which we entered, the quarter inhabited by the Russians, it has a perfectly European look: straight streets, rows of modern houses, elegant shops, milliners, apothecaries, even a bookseller, with caffès, public buildings, a government palace, churches with cupolas and towers, the various Russian military uniforms with French paletots and frock-coats, quite transported us back to Europe. But where this European town ends, one of a perfectly Asiatic character begins, with bazaars, caravansaries, and long streets, in which the various trades are carried on in open shops. In one part is seen a row of smithies, the men all hammering away at their anvils, heedless of the crowds of passers-by. Then follows another row of houses, where tailors are seated at work, in precisely the same fashion, and with the same gesticulations and agility, as with us. After these succeed shoemakers, furriers, &c. The pop. is no less varied and interesting; here Tartars, in the costume from which the so-called Polish dress is evidently derived; in another part, sunburnt Persians, with loose flowing dresses; Kurds, with a bold and enterprising look; Lezgins and Circassians, engaged in their traffic of horses; lastly, the beautiful Georgian women, with long flowing veils and high-heeled slippers; nearly all the population displaying a beauty of varied character, which no other country can exhibit,—an effect heightened by the parti-coloured, picturesque, and beautiful costumes. In no place are both the contrasts and the connecting links between Europe and Asia found in the same immediate juxtaposition as in Tiflis." This city has long been celebrated for its baths, which are situated at one extremity of the bazaar. At this point, a small bridge is thrown over a deep ravine, at the bottom of which flows a mountain-stream, which, pure and cold at its fountain-head, mingles here with the hot springs which take their rise in the adjacent heights, and becomes warm. Over this steaming flood the public baths are erected, which form not only a resource in sickness to the natives, but are the daily resort of both sexes as places of luxury and amusement. On one side of the bridge stand those appropriated to the men; and on the other, immediately below the gloomy walls of the citadel, the range intended for the women. The water which supplies these distinct bath-houses is strongly impregnated with sulphur. Its heat ranges from 15° to 36° of Reaumur in the several basins. At the source of the hot stream it is about 42° . The basins are excavated in the solid rock; and these are divided under one immense vaulted roof, into different apartments, whence the day-light is excluded, and which are merely rescued from total darkness by the faint glimmerings of a few twinkling lamps struggling with the vapours from the stream. The citadel is situated on the summit of a high promontory, which forms the ter-

mination of the mountain that overshadows the town on its SW side. There are several fine churches of different Christian persuasions, in T.; that which is dedicated to the Roman Catholic mode of worship is one of the most beautiful; the cathedral of Holy Sion, the great Armenian church, is more extensive, but does not equal its rival in richness and grace of architecture.—The government of Teflis, under the Russian administrative arrangements organized in 1846, is bounded on the N by Caucasus; on the NE by Derbend; on the E by Shamaki; on the S by the Araxes, forming the boundary with Persia; on the SW and W by Asiatic Turkey; and on the NW by Kutais; and embraces the circles of Elisabetpol, Erwan, Nakshivan, Alexandropol, Sikkash, Telav, Gori, and Teflis.

TEGERNSEE, a village of Bavaria, in the circle of Upper Bavaria, 7 m. SW of Miesbach, finely situated on the E bank of a lake of the same name, at the foot of the Alps, and at the entrance to the valley of Achen. It formerly possessed a rich and ancient abbey, which was secularised in 1802, and converted into a hunting lodge. The town contains about 80 houses. Surrounding it are extensive forests, and the adjacent mountains abound with game. They contain also beds of bituminous lime and quarries of fine marble.—The lake of T. is 6 m. long, and about 1½ m. in breadth. The Mangfall, an affluent of the Inn, issues from its NE extremity.

TEGHERY, or TOGHARA, a town of Tripoli, in Fezzan, 45 m. S of Gatrone, on the road from Murzuk to Kuka, and on the banks of a salt lake. It has a castle, and is surrounded by a double wall, the interior of which is pierced with loop-holes, and within the town are wells of good water. The environs produce excellent dates. The situation of T. is extremely pleasant, and the adjacent salt lakes abound in wild ducks and geese. The inhabitants are black, but differ in features from the Negroes.

TEGLA, a chain of mountains in the E part of Nigritia, to the S of Kordofan. It runs from E to W.

TEGLAS, a town of Hungary, in the com. of Zaboka, near Hedhuz. Pop. 1,500.

TEGNA, a village of Switzerland, in the cant. of Ticino, district of Locarno. Pop. 240.

TEGRA, a village of France, in the dep. of the Lot, cant. and 3 m. NE of Gramat, at the foot of a mountain. Pop. 900.

TEGUANTEPEC. See TEHUANTEPEC.

TEGUAYO, a lake, in the N part of Mexico, to the SSW of Lake Timpanogos, in N lat. 39°. It receives the Rio San Buenaventura, on the NE, and on the E the Rio Salado.

TEGUCIGALPA, a town of Honduras, 60 m. ESE of Comayagua. This town, which is one of the most flourishing in the state, contains a fine church, two convents, and barracks, and in the vicinity are mines of gold and silver. The climate of the locality is mild and salubrious, and the soil productive.

TEGUISE, a town of the Canary islands, the capital of the island of Lancerote, situated near its centre, and at the foot of a mountain, the summit of which is surmounted by the castle of Santa-Barbara. Pop. 2,800. In its vicinity is a large pond, named Mareta, which in winter forms a general reservoir for the inhabitants of the island. The church is one of the finest in the Canaries. The palace of the ancient marquisate is now in ruins.

TEHALLON, or TEHOLLAND, a parish in co. Monaghan, 2½ m. NE by E of Monaghan. Area 5,949 acres. Pop. in 1831, 4,846; in 1841, 4,630.

TEHAMA, a flat tract of land, extending with irregular breadth along the coast of the Red sea, in Arabia, for the distance of about 600 m. between 16°

and 20° N lat. It is generally desert and barren, and its coast is lined with coral reefs.

TEHERAN, a city of Persia, the present capital of the kingdom and of the beglerbeglik of the same name, in the prov. of Irak-Ajemi, 215 m. NNW of Isfahan, and 1,850 ESE of Constantinople, in N lat. 35° 41' 50", and E long. 51° 21'. It lies in a sandy plain possessing little fertility, and exposed in summer to intense heat; bounded on the N and E by the Elburz mountains, and by the peak of Demavend; and on the W by a fertile and well-cultivated plain. Its outline is an oblong square, about 4 m. in circuit, and it is enclosed by thick walls, flanked by towers and preceded by a ditch. The gates, of which there are four in number, are ornamented with figures of tigers and other animals. Within the walls are numerous gardens and vacant spaces, and the general aspect of the houses, bazaars, king's palace, and other edifices suggests the idea of a town of modern erection. The royal palace, situated in the N part of the town, occupies upwards of a fourth part of its entire extent. It is square in form, is well-fortified, and possesses gardens of great extent and beauty. In one of the latter is the seraglio, enclosed by lofty walls, and defended by a guard. The dome of one of the mosques is covered with plates of gold. The distance of T. from the great commercial routes, limits its trade to articles of local consumption. In winter the pop. fluctuates from 50,000 to 60,000. In summer upwards of 7-10ths of the inhabitants, inclusive of the monarch, quit the town on account of its insalubrity, and encamp in the plains of Soltanieh. On an adjacent hill, are a palace and magnificent gardens belonging to the king. This town under the Sophis was not a place of any importance. It was taken by the Afghans after the battle of Salaman-abad, and almost entirely destroyed by them. It was rebuilt by Kerim-Khan, and has been frequently fortified and embellished by his successors. Early in the 18th century it was constituted the capital of the kingdom. Tehran, says Southgate, "appears to have been a place of very little importance until the middle of the last cent., when Agha Mohammed Shah, the founder of the present dynasty, removed the seat of government thither, from Isfahan, in order to be nearer his own tribe, the Kujars of Mezanderan, on whom he chiefly depended for the support of his throne: before this the town seems to have been little known. In the days of the old travellers it was a village, and the great route to the south did not pass through it. It had, from the first, no local advantages, aside from its proximity to Mezanderan, for which it could have been chosen as the seat of royalty, and now, after fifty years, it has hardly any other recommendation. The place presents, in outward appearance, none of the features of a royal city. Its bazaars are extensive, and are roofed with tile, so as to present a succession of small domes; they are filthy, however, and less attractive in every respect than those of Tebriz; they are thronged with beasts as well as men, which makes a walk through them no easy nor pleasant matter. The streets are peculiarly bad, for the most part destitute of pavements, narrow, irregular, encumbered with filth, and full of dangerous holes. The houses are extraordinarily mean, even for an Eastern town; and unsightly ruins, covering, in some instances, extensive areas, frequently meet the eye. There are no magnificent structures or outward marks of grandeur to affect the general meanness of its appearance. The palace of the Russian minister is an extensive range of very plain buildings. The British residency, though unfavourably situated in a low position near the southern wall, is a neat edifice, with an open

piazza, and a range of columns in front. It has also pleasant gardens, with paved walks, both in front and rear, which makes it altogether a delightful spot. But the chief attraction is 'the Ark,' or royal residence. It consists of a great number of buildings, courts, and gardens, covering a large area, and enclosed within a high wall, which separates it from the rest of the city. Just without the wall, on the side where I entered, is a public square, in the centre of which is a large cannon, said to have been used by Nadir Shah. It is now converted into the more pacific and sacred use of a sanctuary for criminals: whoever takes refuge beneath it is safe."

TEHINTCHIEW, a river of Asia, which rises on the S frontiers of Tibet; flows S, passing Tassinden; and joins the Brahmaputra, after a course of about 150 m.

TEHRUT, a town of Persia, in the prov. of Kerman, 54 m. NW of Banim, on the Uchku, in a fertile and richly cultivated locality.

TEHUACAN, a town of Mexico, in the state and 69 m. SE of La Puebla, on the road from that town to Oaxaca, in a rich plain. Pop. 200. It has three convents, and an hospital, and some well-built houses, and carries on an active trade in flour. This was one of the most venerated of the sacred places of the Aztecs.

TEHUANTEPEC, a town of Mexico, in the state and 158 m. ESE of Oaxaca, on a river of the same name, about 11 m. above its mouth. It is a place of considerable trade, and has manufactures of salt, and of coarse cottons. The pop. has recently been estimated at 14,000, mostly Indians, some half-breeds, and a few Castilians. It has 16 churches, and a college was established here in 1850. Its manufactures consist of leather, cotton cloths, silk sashes, shoes, hats, mats, silverware, saddlery, pottery, and soap.

TEHUANTEPEC (ISTHMUS OF), that portion of Mexican territory, comprising the eastern portions of the states of Vera Cruz and Oaxaca, which lies between the gulf of Mexico and the Pacific ocean, where the two seas approach nearest to each other. From the mouth of the Coatzacoalcos, which discharges itself into the gulf, in N lat. 18° 8' 20", and W long. 94° 32' 50", to the harbour of Ventosa, on the Pacific, in N lat. 16° 11' 45", W long. 95° 15' 40", the direct distance is 143½ m. The coast-lines on either side have a general direction nearly E and W. A belt of level country, of some 40 or 50 m. in breadth, lies contiguous to the gulf coast. The chain of the Cordilleras traverses the central portion of the isthmus, but here exhibits a sudden depression or breach of continuity, nearly at a point directly in the line of shortest communication between the two oceans. The plains on the Pacific side average about 20 m. in breadth, from the base of the mountains to the coast, and have a slope varying from 10 to 15 ft. in the mile. The principal river on the Atlantic side of the isthmus, is the Coatzacoalcos, which rises in the sierra to the E of Santa-Maria-Chimalapa, and has a general direction of NNE and SSW. Its mouth has a width of 350 ft., and a depth of 13 ft.; and at 7 m. from the gulf, a depth of 40 ft. The Chicapa and the Tehuantepec are the principal rivers on the Pacific side. In the rainy season the latter river has a depth of 12 ft. In March 1858, a convention was entered into between the United States of America, and the United Mexican States, to facilitate the construction and insure the maintenance of a transit way across this isthmus. The importance of such a work is second only to that noticed under the head MIGUEL (GULF OF SAN), of forming a ship-canal across the isthmus of Darien, of which it is a rival. The latter scheme,

though by far the more important to the mercantile interests and general progress of the world, is just now in abeyance, and its necessity promises to be superseded by the former. The plan proposed by Dr. Cullen and Mr. Gisborne, of making a ship-canal across the isthmus of Darien, is a project of surpassing promise to the commerce of the world; but, in consequence of the large amount of capital required to carry it into execution, its projectors are not likely to bring it speedily to a successful issue. The other undertaking, therefore, that of forming both a plank road and a railroad across the isthmus of T., becomes of more importance to the commercial interests of this and other countries than it at one time appeared probable would be the case. It appears that after much loss of time in negotiation, legislation, and arbitration, all obstacles to the opening of this route have at length been removed. The treaty between the American and Mexican government contains, among other stipulations, the following articles:

Art. 1st. The United Mexican States solemnly engage that the inter-oceanic transit-way across that part of its territory which is denominated the isthmus of Tehuantepec shall be open and free for all the nations of the globe.

Art. 2d. and 3d. The United States of America and the United Mexican States engage to protect the persons engaged and property employed in the construction of the said work, from the commencement thereof to its completion against all confiscation, spoliation or violence of whatever nature. The contracting parties further engage to extend their protection to the transit-way when completed, during the continuance of the contract, and also that they will guarantee the neutrality thereof, so that the conveyance of persons and property thereon shall at all times be uninterrupted, and the capital invested therein entirely secure. Neither passports nor letters of security will be required of persons crossing the isthmus, and not remaining in the country.

Art. 6th. No interest in the said transit-way, nor in the proceeds thereof, shall be sold, or otherwise transferred to any foreign government, corporation or body politic, nor shall its benefits be extended to any other nation, or to its citizens or subjects, on any terms more favourable than those accorded to the United States and its citizens.

Art. 8th. Armed forces not being permitted to pass over the said transit-way, without the express authorisation of the Mexican government, it is agreed that the said government shall either give this permission directly itself, or will empower in proper form the chief military officer of the isthmus, or his substitute, to permit the passage over the said transit-way of the troops which the United States may find it necessary from time to time to transmit from one part of its territory to another lying on opposite sides of the continent, so that the said troops shall meet with no impediment.

A contract has been signed between the Tehuantepec railroad company and Messrs. Sykes and Co., of England, for the construction of a plankroad and a railway across the isthmus. The former is to begin at Suchil, the head of navigation on the Coatzacoalcos, and terminate at Ventosa bay, on the Pacific—a distance of 96 m.—and is to be completed in November 1855. The railway is to begin at Minatilla, only 20 m. from the mouth of the Coatzacoalcos, and terminates also at Ventosa bay. It is to be completed within four years, and will be 166 m. in length. This will be the shortest route between New York and San-Francisco. From New York to San Francisco, *via* the Panama route, the distance is 4,992 m.; *via* Nicaragua, 4,531 m.; *via* Tehuantepec, 3,804 m. From England to San Francisco, *via* Panama, the distance is 7,502 m.; *via* Nicaragua, 7,041, and *via* Tehuantepec, 6,671 m. The distance from New York to San-Francisco, is *via* Tehuantepec, 1,100 m. nearer than Panama, and 727 m. nearer than Nicaragua. The distance from England to San-Francisco, *via* Tehuantepec, is 831 m. less than by Panama, and 370 m. less than by Nicaragua. New Orleans is more favourably located in relation to this route than any port of England, or the port of New York, in the distance saved. From New Orleans to San-Francisco, *via* Tehuantepec, the distance is 1,801 m. less than by

Panama, and 1,063 m. less than by Nicaragua. The geographical position of New Orleans is, therefore, not only more favourable as regards total distance, but as regards distance saved. Whilst the Panama route will monopolise the trade and traffic of the South Pacific, the Tehuantepec route will probably command almost the entire travel and traffic of California and the North Pacific. "Nobody doubts that we shall soon see steamers cross from the W coasts of the British islands to Halifax in less than a week. The Grand Trunk railway from that city to Detroit on Lake Michigan—1,100 m.—is under contract with Jackson, Peto, Brassey and Betts, of European renown, and £11,000,000 cash capital under British management insure the vigorous prosecution and early completion of this stupendous work. This road connects the N and S shores of the river St. Lawrence, at Montreal, by a tubular bridge upwards of 2 m. in length, now constructing under the superintendence of Robert Stephenson. From Detroit—the terminus of the Grand Trunk railway through Canada—the great railroad line to the gulf of Mexico will be shortly completed, much of it being already made. It will, therefore, be but a short time before the English traveller will find himself on the Pacific side of the Tehuantepec isthmus, steaming towards Australia, in 12 days from England, having traversed the Atlantic, the British American provinces, the heart of the American continent through the Mississippi valley, the gulf of Mexico, and the Tehuantepec isthmus, where he looks on the Pacific ocean, and has passed the last obstacle which separated him from a vast and golden hemisphere which his country owns on the other side of the globe. This sounds like fiction, and seems like a Utopian dream; but within five years it will have grown as familiar to us as the nursery tales of good King Alfred, and not half so romantic."

TEHUELS, a tribe of Indians, who inhabit the district of Patagonia, extending between the Andes and desert. They are said to be of great stature, but to be mild and pacific in disposition.

TEHUILOTEPEC, a village of Mexico, in the state and 60 m. S of the town of that name, and on the road thence to Acapulco.

TEICHEL, a town of the principality of Schwarzburg-Rudolstadt, bail. and 6 m. NNW of Rudolstadt, in a fine valley. Pop. 400.

TEICHMANSDORF, a village of the principality of Schwarzburg-Rudolstadt, 4 m. E of Stadt-Ilm. It has a fortress.

TEIFY, or **TIVY**, a river, which, rising in the mountains of Cardiganshire, separates it from the counties of Carmarthen and Pembroke. After flowing S to Tregaron, it enters the plain in which Llanbedr is situated, and, as it approaches Newcastle-in-Emlyn, gradually confines itself within steep banks fringed with wood. Soon afterwards it becomes suddenly engulfed within two piles of high rocks, from which it acquires the rapidity of a cataract. Augmented by the tide, it proceeds in a broad majestic stream, winding between the bases of two lofty ridges, on one of which stand the ruins of Gigeran-castle, till it falls into the sea below Cardigan. It is navigable to Newcastle-in-Emlyn.

TEIGHSHINOD, a parish, $3\frac{1}{2}$ m. N by E of Ballymahon, co. Longford, Leinster. Area 2,718 acres. Pop. in 1831, 2,553; in 1841, 2,533.

TEIGNGRACE, a parish in Devon, $12\frac{1}{2}$ m. S by W of Exeter. Area 1,329 acres. Pop. in 1851, 187.

TEIGNMOUTH (East), a parish in Devon, $12\frac{1}{2}$ m. S by E of Exeter. Area 745 acres. The town has been greatly improved of late years, and is much frequented in the bathing season. Pop. 1,760.

TEIGNMOUTH (West), a parish, sea-port, and market-town, in Exminster hund., Devon, 12 m. S by E of Exeter, at the mouth of the Teign, and separated from East T. by a small rivulet, called the Tame. Area of p., 493 acres. Pop. in 1801, 1,523; in 1831, 2,878; in 1851, 3,389.—The town, though irregularly built, contains many good houses. With its quay and dock-yard, it stands on a curve formed by the sudden expansion of the river. The harbour is safe and capacious, and a new wharf has been erected. Vessels belonging to this port are engaged in the Newfoundland trade. The chief imports are coal and culm; the exports, granite and potters' clay. Of the latter many thousand tons are annually shipped to the Staffordshire and other potteries. A bridge, constructed over the Teign, here, and opened in 1827, consists of 84 arches, and a swing bridge, which opens in two parts, so that vessels of 400 tons may pass.

TEIGNTON (Bishop's), a parish in Devon, 4 m. ENE of Newton-Bushel. Area 4,748 acres. Pop. in 1851, 1,119.

TEIGNTON-DREWS, a parish in Devon, $8\frac{1}{2}$ m. SW of Crediton. Area 6,937 acres. Pop. 1,232.

TEIL (Le), a commune of France, in the dep. of the Ardeche, cant. and 5 m. N of Viviers, on the r. bank of the Rhône. Pop. in 1846, 2,397. It has manufactories of silk fabrics, and several tile and brick-kilns.—Also a village in the dep. of the Ille-et-Vilaine, cant. and 2 m. WNW of Retiers, in a mountainous and marshy locality. Pop. 1,400. It has a ferruginous spring. See also **THIEL (Le)**.

TEILLE, a village of France, in the dep. of the Loire Inferieure, cant. and 5 m. S of Riaillé, near the r. bank of the Havre. Pop. 1,300.—Also a village in the dep. of the Sarthe, cant. and 2 m. W of Ballon, near the l. bank of the Sarthe. Pop. 1,020.

TEILLET, or **TEULET**, a village of France, in the dep. of the Tarn, cant. and 8 m. SW of Alban. Pop. 230.

TEILLEUL (Le), a canton, commune, and town of France, in the dep. of the Manche, and arrond. of Mortain. The cant. comprises 8 com. Pop. in 1831, 8,063; in 1846, 8,350. The town is 8 m. SSE of Mortain, in a marshy plain. Pop. in 1846, 2,566.

TEILLOU, a village of France, in the dep. of the Deux-Sevres, cant. and 5 m. NW of Chef-Boutonne, on a hill near the r. bank of the Somp, a small affluent of the Boutonne. Pop. 536. It has a considerable trade in grain and sheep, and rears large numbers of goats.

TEINITZ, a village of Austria, in Bohemia, in the circle and 26 m. SE of Beraun, on the l. bank of the Sazawa. It has a manufactory of stone vases.

TEINITZ, or **TYNETZ**, a town of Austria, in Moravia, in the circle and 36 m. SE of Brunn, on the r. bank of the March. Pop. 575.

TEINITZ (Bischof), or **HORSSOW TEYN**, a town of Bohemia, in the circle and 18 m. NW of Klattau. Pop. 2,403. It has a fine castle and gardens belonging to the prince of Trautmansdorf.

TEINITZ (Elbe), or **TEGNICE-NAD-LABEM**, a town of Bohemia, in the circle of Chrudim, on the r. bank of the Elbe. Pop. 1,830.

TEINITZ (Hrochow), or **HROCHOWA-TEGNICE**, a town of Bohemia, in the circle and 4 m. E of Chrudim. Pop. 964.

TEIONES (Cape), a headland of Tripoli, on the coast of Barca, to the SW of Benghazi, in N lat. $31^{\circ} 50' 30''$, and E long. $19^{\circ} 52' 20''$.

TEISBACH, a village of Bavaria, 18 m. WSW of Landau, on the r. bank of the Isar. Pop. 480.

TEISENDORF, or **DEISENDORF**, a village of Bavaria, 14 m. WNW of Salzburg, on the Sur. Pop. 640.

TEITH, or **TEATH**, a river of Perthshire, whose

head-sources are not far from a point at which the coos. of Argyle, Perth, and Dumbarton meet, or from another point whence waters are shed respectively to the Tay, the Forth, and the lower Clyde. They rise respectively 1 m. and 2 m. due E of the head of Loch-Lomond. The northern stream, starting from the N side of the height called Mealpalan, runs 6½ m. E by N to Loch-Doine. Issuing from Loch-Doine, it proceeds east, till it is lost for 3½ m. in Loch-Voil. On egressing from the latter lake, it takes the name of the Balvag; sweeps past Balquidder; and flows 3 miles sinuously southward to Loch-Lubnaig. Issuing from Loch-Lubnaig, it begins to tumble along the wild romantic Pass of Leny, and having flowed 1 m. S, and 2 m. E, it unites with its sister stream to form the Teith. Its entire length of course, including its lacustrine expansions, is about 23 m.—The southern stream makes a run of 4 m. from its origin due SE to the head of Loch-Katrine; and is identified for 8 m. with the lake of second rank for scenic brilliance in Scotland. Emerging from its SE extremity, it begins to traverse the bosky, bristling, tumultuously wooded Trossachs; and debouching from among them, is lost for 1½ m. in Loch-Achray; egressing thence, it makes a run of only 1½ m. eastward, till it is ingulphed by Loch-Vennacher. On issuing from the latter lake, it careers 1½ m. ENE to a junction with the other great head-water of the Teith. Its entire length of run, including its course through lakes, is about 22 m.—The Teith, or united stream, wants the grand and boldly romantic features of its head-waters; and subsides as to scenery into simple yet often thrilling beauty. Its entire course is SE; and, measured in a straight line, extends only to between 11 and 12 m. Its tributaries are numerous; but, excepting the Keltie, they are all inconsiderable. The T., if either its volume of water or its length of course had been made the ground of decision, would have been regarded as the parent-stream, and the Forth which joins it as the tributary. The point at which they unite is the bridge of Drip, 2½ m. NW of Stirling. The T. is a clear stream, and, for the most part, rapid. It abounds in salmon and trout; and has some small beds of a peculiar sort of mussels which yielded valuable pearls.

TEIXEIRA, a town of Portugal, in the prov. of Beira, comarca and 11 m. W of Lamego, near the l. bank of the Douro.

TEJA. See **TEZA**.

TEJADA, a town of Spain, in the prov. and 29 m. SSE of Burgos, in a fertile valley, near the r. bank of the Esgueva. Pop. 250.

TEJADO, a town of Spain, in the prov. and 15 m. SE of Soria, near the l. bank of the Rituerto, an affluent of the Duero. Pop. 250.

TEJARES, a town of Spain, in the prov. and 2 m. SW of Salamanca, on the road from that town to Ciudad-Rodrigo, and near the left bank of the Tormes, which is here crossed by a bridge. Pop. 157.

TEJEDA, a town of Spain, in the prov. and 47 m. NNE of Cáceres, near the r. bank of the Tietar. —Also a town in the prov. and 83 m. SSW of Salamanca. Pop. 250. It has a convent.

TEJO. See **TAGUS**.

TEK-DAGH, a range of lofty mountains in Turkey in Asia, in the pash. and to the SE of Erzerum.

TEKE-DEREH, or **KAWAKTI-DIREH**, a river of Turkey in Europe, in Rumelia, in the sanj. of Kirk-Kilissia. It has its source in the E part of the sanj., on the W side of the 8 mountains, 6 m. SSW of Binarihissar, on the confines of the sanj. of Viza; runs

first WNW through a narrow valley, then SSW; passes to the SE of Kirk-Kilissia and Eski-Baba, where it is crossed by a fine stone-bridge; receives soon afterwards the Sarajjala; forms for a short distance the boundary line of the sanj. of Gallipoli; and after a total course of about 75 m. joins the Erkene, on the r. bank, 9 m. WSW of Eski-Baba.

TEKE-ILI, a sanjak of Turkey in Asia, in the 8 part of Anatolia, bounded on the N by the sanj. of Hamid-ili, on the E by Karmania-Itshil, on the W by the sanjaks of Mentesh and Meis, and on the S by the gulf of Satalieh. It is 105 m. in length from E to W, and 81 m. in extreme breadth. It is surrounded by lofty mountains, of which the principal is the Taktalu-dagh on the SW. The Duden-su, an affluent of the Estenas, the Ak-chai and Kapri are its principal streams. Springs of waters are generally scarce. The mountains are covered with fine forests, and in the plains are grown wine, cotton, and other varieties of fruit. This sanj. occupies a large portion of *Pisidia* and *Pamphylia* of the ancients.

TEKES, a river of China, in Sungaria, in the military div. of Ili. It joins the Khotinghes at Kash, and thence the united stream takes the name of Ili.

TEKIR-DAGH, or **TEKIRI-DAGH**, a range of mountains in Turkey in Europe, in Rumelia, in the E part of the sanj. of Gallipoli, between the l. bank of the Maritza and the sea of Marmora, on the shore of which it terminates, 11 m. SSW of Rodosto. It has an extent of about 78 m., runs in a generally ESE direction, and sends forth a ramification in a SW direction into the peninsula of Enos. It gives rise to numerous streams, the greater number of which belong to the basin of the Maritza. Of these the principal are the Kizil-nahar, Ipsala-su, Ainajik, and Kawa-chai—the latter flows into the gulf of Sáros. From the proximity of the sea of Marmora, the streams which it sends thither are mere mountain torrents. See also **RODOSTO**.

TEKIS, a maritime town of Japan, in the island of Kiu-siu, and prov. of Fizen.

TEKIYEH, a town of Turkey in Asia, in the pash. and 99 m. WNW of Erzerum, and 6 m. E by N of Choruan.

TEKMAN, a small town of Turkey in Asia, in the pash. and to the NE of Erzerum.

TEKOA, a village of Turkey in Asia, in the pash. of Damascus, 9 m. S of Bethlehem. It occupies the site of an ancient town.

TEKRIT, a town of Turkey in Asia, in the pash. and 90 m. NNW of Bagdad, on a hill, near the r. bank of the Tigris, in N lat. 34° 35'. Pop. 1,000. It is built of earth; but is a comparatively clean place. The environs are fertile, and have several naphtha springs. This town occupies the site of the ancient *Bertha*, which sustained a long siege against Tamerlane, and which in the 11th century was the residence of a Jacobite primate. The ruins of the ancient town are of great extent.

TEKROVA. See **FIONDA**.

TEKTEK, a mountain of Turkey in Asia, in the pash. of Reha, ENE of the town of that name.

TEKUTSH, a town of Turkey in Europe, capital of a district in Moldavia, 33 m. NNE of Rimnik, and 101 m. S of Jassy, near the r. bank of the Byrtal.

TEL-AKBERIN, a town of Turkey in Asia, in Syria, in the pash. and 30 m. W of Aleppo.

TELAV. See **THELAVI**.

TELDOM-KHOTON, a town of China, in Mandshuria, in the prov. of He-lung-keang, on the Amour, in N lat. 49° 56', and E long. 129° 53'.

TELEGD (Mezo), or **TYLEGOD**, a town of Hun-

gary, in the comitat of Behar, 13 m. E of Gross-Wardein, on the l. bank of the Sebes-körös.

TELEGU, a village of Wallachia, celebrated for its salt mines. The salt is cut out with great regularity. Long parallel lines are first deeply traced with the axe; cross cuts are then made at regular intervals, after which a single stroke of the tool is generally sufficient to raise each block from its bed. The larger mine is worked exclusively by convicts, numbering about 200 in 1854, of whom 60 are condemned for life, and are only brought up to the surface for a few hours once every month: the others come up every evening. The majority of the whole are Gipsies. The crimes of which they have been guilty are mostly petty thefts and robberies with violence; several of those condemned for life to this terrible punishment have committed no greater offence than a violation of the quarantine on the Turkish frontier! "It was well known that the object of Russia was to make the line of separation between the two countries, both commercially and politically, as broad as possible—to destroy the influence of Turkey, by rendering her a *terra incognita*, and attach the principalities more closely than ever to the 'sacred soil of holy Russia.' Russia is likewise the author and promoter of the law which condemns the first poor peasant who, in a moment of impatience, endeavours to escape 96 hours of durance vile, to a life of hard labour in cold and darkness and a poisonous atmosphere." There are three salt mines in Wallachia, all belonging to the government, and all worked mainly by convicts. Their united annual product is 60,000,000 okas, which is delivered at the mouth of the mine at 8 prus the oka, or rather less than one penny English, which will give a total annual revenue at about £250,000. From this, however, has to be deducted the expenses of working and management, which are trifling, and the amount abstracted by the various officials. The whole of these 60,000,000 okas, minus what is needed for home consumption, passes into Turkey and Servia. Wallachian salt is prohibited both in Austria and Russia.

TELEKHANOU, a town of Russia in Europe, in the gov. and 129 m. SW of Minsk, and district of Pinsk, on the Oginskoi canal.

TELEMBI, a river of New Grenada, in the dep. of the Cauca, which has its source in the Andes, near the confines of Ecuador, runs first N; then NW; waters Barbacoas; and after a course of about 90 m., joins the Patia, on the l. bank, a little above the entrance of that river into the Pacific.

TELEMBI (SAN-LUIS-DE), a town of New Granada, in the dep. of the Cauca, prov. and 66 m. WNW of Pasto, on the l. bank of the Telembi.

TELEMSAN. See TREMEZEN.

TELEOUTES, or TELKOUTES, a Tartar people who inhabit the S part of the gov. of Tomsk and Yeniseisk, in Russia in Asia, and called by the Russians, White Kalmucks. They derive their name from lake Telengool in the Altai mountains. They did homage to Russia for the first time in 1609, but did not become incorporated with the empire till about the middle of last century.

TELESE, a village of Naples, in the prov. of Terra-di-Lavoro, 15 m. NE of Caserta, near a small lake of the same name, and on the site, it is supposed, of the ancient *Sommatum*.

TELETSKOE, a lake of Tartary, in the Kirghiz territory, near the r. bank of the Syr-Deria, and to the W of Otrar, into which a stream called the Saran flows, but which has no apparent outlet.

TELFALR, a central county of the state of Georgia, U. S., watered by the Ocmulgee. Area 950 sq. m. Pop. in 1840, 2,763; in 1850, 2,126. Its cap. is Jacksonville.

TELFES, a village of Tyrol, in the circle of Imst, on the l. bank of the Inn.

TELGET, or TELER, a village of Prussia, in the reg. and 6 m. ENE of Munster, on the l. bank of the Ems. Pop. 2,150. It has potteries and flour-mills, and a trade in cattle.

TELGRUE, a village of France, in the dep. of Finistere, cant. and 6 m. ESE of Crozun, near the coast. Pop. of com. 1,750.

TELIGUL, a river of Russia, which rises on the frontier of Podolia, and flows into the Black sea, at a point 25 m. NE of Odessa, after a SSE course of 90 m. It gives name to a small gulf or bay at its embouchure.

TELIFORMAN, a river of Upper Wallachia, which descends from the SE flank of the Arjish range; runs SSE; and joins the Veda, on the l. bank, 16 m. NNE of Sistova, after a course of about 90 m.

TELISKOF, a town of Asiatic Turkey, in the pash. and 80 m. NNW of Mesul, in the centre of a vast plain, extending from the Tigris to the W, to Mount Zagros on the E, on which Alexander won the battle of Arbela, and some centuries afterwards Heraclius quelled the power of Khosru-Perviz. The town has a pop. of about 4,000.

TELKI-BANYA, a village of Hungary, in the com. of Abaujvar, 4 m. ENE of Gönez, on an affluent of the Hernad. There are chalybeate springs in the vicinity.

TELLARNOUGHT, a parish in co. Wexford. Area 1,654 acres. Pop. in 1841, 823.

TELLICHERY, a town and port of Hindostan, on the Malabar coast, in N lat. 11° 44', E long. 75° 36', 6 m. NW of Mahe. Its commerce, especially in the articles of sandal-wood, pepper, and spices, has somewhat declined, but is still considerable.

TELLINGSTEDT, a village of Denmark, in the duchy of Holstein, 18 m. WSW of Rendsburg.

TELLIO, a village of Austrian Lombardy, in the Valtellina, 6 m. SW of Terano, near the r. bank of the Adda. Pop. 1,500.

TELLISFORD, a parish of Somersetshire, 5 m. NNE of Frome. Area 757 acres. Pop. in 1841, 150; 1851, 124.

TELLO, a village on the W coast of Celebes, 30 m. NE of Macassar, in S lat. 5° 5'.

TELLO-DELANO, a port on the S coast of the island of Nias, off the SW coast of Sumatra.

TELLORE, an islet off the SW coast of Sumatra, in N lat. 0° 7', E long. 99° 20'.

TELLTOWN, or KILLALTON, a parish, 8½ m. SE by E of the town of Kells, co. Meath. Area 4,266 acres. Pop. in 1831, 1,808; in 1841, 1,618.

TELMA, a town of Asiatic Russia, in the gov. and 45 m. NW of Irkutsk. It consists of two rows of log houses, erected on the sides of a log-road covered with smooth planks. A stone church, in the Italian style, and spacious barracks, give the place an air of importance. "The workhouse," says M. Ermann, "a fabric of two stories, is no doubt the largest and finest specimen of architecture in North Asia. The front of it has a length of 384 ft., and is adorned with massive columns, between which, in two rows, are windows of the purest plate glass. The lower story is divided into three apartments, in which are carried on the manufacture of cloth. Above dwell the officers who manage the institution for the crown. Stone warehouses, and mills of different kinds, are situated along the banks of the stream which drives the machinery of the workhouse. The advantages of the locality were discovered a century ago, by private speculators, since which time, T. has been famous for its cloth manufactory. More recently, glass, paper, and linen

have been added to its productions. The inhabitants are about 2,000 in number, of whom 800 find employment in the manufactories. They are persons exiled for crimes. They are supplied gratuitously with meal, and receive besides an amount of wages, proportioned in each instance to the value of the labour. The wool required for the manufactory at T. is procured chiefly from the Buraets and Tunguses, who wander with their flocks over the southern borders of Siberia. The machinery for combing and spinning the wool was originally procured from England, and was afterwards made in Siberia, according to the English model. T. produces annually about 50,000 yds. of woollen cloth, and half that quantity of linen. The former is sold at a price not exceeding half-a-crown a yard. Pains are taken to improve the wool; and in 1830 a flock of 480 Spanish sheep were driven from Moscow to Irkutak; and, notwithstanding the length of the journey, and the plagues of the Barabinskian steppes, 800 of them reached their destination in safety."

TELOCHE, a village of France, in the dep. of Sarthe, cant. and 4 m. N of Ecomoy, on a small affluent of the Sarthe. Pop. of com. 1,400.

TELSCOMBE, a parish of Sussex, 3 m. NW of Newhaven. Area 1,349 acres. Pop. in 1851, 176.

TELSHA, a town of Russia, in the gov. and 150 m. NW of Wilna, on the NW bank of a small lake, which discharges itself into the Windau.

TELTOW, or **TELTAW**, a town of Prussia, in the reg. and 9 m. E of Potsdam, on the Dolger-see. Pop. 1,400, chiefly linen-weavers.

TELTSH, a town of Moravia, in the circle and 15 m. SSW of Iglau, on the l. bank of the Thaya-Morava. Pop. 3,500. It has considerable manufactories of fine woollens.

TELU-SAMAVA, a port on the N coast of Sumatra, 150 m. ESE of Achim.

TELYCH, a hamlet in Llandigat p., Carmarthen-shire; adjacent to Llandovery. Pop. 270.

TEMACIN, a town of Northern Africa, in N lat. 33° 20', about 12 m. SSW of Tuggurt, the capital of a small independent district.

TEMASCALTEPEC, a town of Mexico, in the state and 70 m. WSW of Mexico. Pop. 2,500, chiefly miners and cotton-weavers.

TEMBLEQUE, a town of Spain, in the prov. and 21 m. SE of Toledo. Pop. 3,000. It has manufactories of saltpetre and chocolate, and some trade in corn.

TEMBO, or **Pio-de-Neige**, a mountain of Switzerland, in the cant. of the Grisons, in the Rhintal, rising to an alt. of 6,815 Parisian ft. above sea-level. Its summit commands a view embracing Lake Como on the S, and the lake of Constanx on the N.

TEMBUCTU. See **TIMBUCTU**.

TEMBY, a river of Eastern Africa, a branch of English river, which is navigable from Delagoa bay, upwards of 40 m.

TEME, a river rising in the mountains which divide Radnorshire from Montgomeryshire, and flowing eastward by Knighton, through the pleasant vale of Bampton-Bryan, receiving in its course a number of tributaries, as it proceeds, in a placid stream, to Tenbury, where it enters Worcestershire, and, after traversing a romantic glen, falls into the Severn near Powick, about 3 m. from Worcester. It is celebrated for grayling and trout.

TEMENDFUS. See **MATIPU**.

TEMERIN, a town of Hungary, in the com. and 30 m. E of Bacs. Pop. 6,300. It is surrounded by a marshy district.

TEMESH, or **TEMES**, a river of Hungary, which rises on the NE flank of Mount Szemenik, in the

Banat; runs ESE, and then NNW; and passing Karansebes, receives the Sebes on the r.; passes Lugoz; turns SE, and then SSE; and joins the Danube on the l. bank, a little below Pancsova, after a winding course of above 300 m. Its principal tributaries are the Bisztra, the Bega, and the Temessecz on the r.; and the Boganicz on the l.—The comitat of T. is bounded by that of Arad on the N; by Krassova on the E and SE; by the Wallachia-Ilyrian regimental district on the S; by the German banat on the SW; and by the com. of Torantal on the W. The Maros defines its whole northern frontier; the Karash, its SE. It is a level marshy district; fertile in soil, and producing maize, rice, tobacco, saffron, fruit, and wine. Its inhabitants, about 360,000 in number, are chiefly Wallachians and Servians. It is administratively divided into the four marches of St. Andraá, Lippa, Temeswar, and Vershitz.

TEMESVAR, or **TEMESCHWAR**, in Wallachian **TIMISVARA**, a town of Hungary, the cap. of the com. of Temes, situated in a vast marshy plain, on the Bega canal, in N lat. 45° 42', E long. 21° 14', 74 m. NNE of Belgrade. Pop. in 1846, 19,000. It is a well-built place, and is strongly fortified. It has a handsome Gothic cathedral, and several other large public edifices, besides extensive military arsenals and barracks. It has manufactories of woollens, paper, and hardware; and conducts an active trade in grain and the other agricultural produce of the district. In 1551, it was taken by the Turks, from whom, in 1716, Prince Eugene wrested it. In 1849, it resisted the Hungarian insurgents for 107 days, until relieved by Haynau. D'Anville identifies it with the ancient *Thybiacus*. T., with a pop. of 24,000, the capital of Southern Hungary, and the principal seat of its civilization, is of comparatively modern and French aspect. In situation, says a recent writer, it is not much better than Szegedin as regards salubrity, and it was in the time of the Turks entirely surrounded by marshes except to the N. The river Bega, which now forms an ellipse to the S of the town, then flowed through the middle of it, forming numerous islands, and even now fevers abound. If we ascend to the observatory tower a wide champaign prospect of cultivated but far from perfectly drained fields and villages is seen all around; no hills are visible, except on a clear day to the eastward in the direction of Transylvania, where the last spurs of the Carpathians appear like a cloud on the horizon. The town itself, when handed over to Prince Eugene on the 13th of Oct. 1716, consisted of four parts; the inner town of wooden houses—only the mosques and the powder magazine being of stone—surrounded with a wall and a ditch; then the castle of the Hunyady family, a Middle age fortress, connected with the town by a draw-bridge and forming the citadel; and to the N, E, and W, the so called great and small Palanka, not walled but palisaded. The inner town has entirely disappeared. The palaces and symmetrical streets of T. are in the style of Louis Quatorze. Even the mosques which were built of stone have disappeared: two of them, immediately after the conquest reconsecrated as churches, were pulled down, and the modern church of the Franciscans and the Bishops' seminary occupy their place. The principal feature of T. is the great square, in which are the Catholic and Greek cathedrals; the former an extensive edifice, built during the government of our countryman, Count Andrew Hamilton, who was president and commander-in-chief in the Banat between 1734—8, and distinguished himself by great activity in building and other improvements.—At right angles with the

cathedral is the principal edifice of the town—the palace of the government, which occupies the space between two streets. A triple line of fortifications, according to the rules of Vauban, encircles the town. Beyond each curtain is the ravelin; beyond each bastion the contregarde; and an envelope of solid masonry forms the third and outer line of defence. The great defect of the fortifications is, that in the lapse of time they have sunk at various places, on account of the marshy land, so that the relative gradation of the outer to the inner works is, in several places, disturbed to such an extent that the former are not sufficiently dominated by the latter. The principal gates, three in number, are named from the directions in which they lead—Peterwardein, Transylvania, and Vienna. Without the Peterwardein gate, and beyond the rayon of the fortress is the Josephstadt suburb, intersected by the Bega canal, cut in 1745–60, to connect T. with the SW part of the Banat in connexion with the Theiss, Danube, and Save. Here is a crowd of canal craft; here are the large magazines of the Banat wheat, and a constant bustle of loading and unloading. The old castle of Hunyady, which is within the fortifications, and is now the armoury, was built by John Hunyady, Count of Temes, in 1442. It resisted the recent siege-operations better than most of the houses in the town, but its towers, rising high above the bastion, are now quite unroofed. Passing the large infantry barracks—the lower part of which is bomb proof, and forms a section of the fortification—we go out at the gate of Transylvania and come upon the principal suburb of T., called the Fabrik. This suburb received the surname of Fabrik from the manufactures of metals, cloths, paper, hats, &c., which Count Mercy, the first governor of the Banat after the conquest, attempted to establish.

TEMIMEH, or NAHIL, a river of Tripoli, in Barca, which runs NE, and flows into the gulf of Bomba, under the parallel of $47^{\circ} 20'$.

TEMISCAMING, a lake of Canada, which discharges itself by a narrow channel into the Ottawa. It is 30 m. in length from N to S, and 10 m. in medium width, and contains several small islands. Its banks are inhabited by a tribe of Indians of the same name.

TEMISCOUATA, a lake of Lower Canada, 125 m. NE of Quebec. It is 22 m. in length, and from 1 to 2 m. in breadth.

TEMISSA, a town of Tripoli, in Fezzan, 120 m. NE of Marzuk, on a hill. The ruins by which it is surrounded indicate its having formerly been of greater extent. The environs yield large quantities of dates.

TEMEN, TEMA, or TREMINI, a town of Upper Guinea, on the Gold coast, in the state of Inkran, 48 m. WSW of the embouchure of the Volta. It has a Dutch establishment.

TEMNIKOV, a town of Russia in Europe, in the gov. and 156 m. NNE of Tambov, on the right bank of the Moksha. Pop. 3,200. It contains six churches, numerous shops, and some manufactories of sailcloth. A small trade is carried on in corn. The era of the foundation of this town is unknown, but it was rebuilt on its present site in 1536.

TEMNOLESKAIA, a fortified town of Russia in Europe, in the prov. of the Caucasus, district and 54 m. W of Alexandrof, on a mountain, near the r. bank of the Kuban. It makes part of the military line of the Caucasus.

TEMOAL, or TIMOEL (CAPE), a headland of the island of Celebes, in N lat. $0^{\circ} 1'$, and E long. $119^{\circ} 32'$.

TEMOURTU. See Tuz-KUL.

TEMPE, a valley of Turkey in Europe, in the NE part of Thessaly. It lies between the chain of Olympus on the N, and that of Ossa on the S, and is about 6 m. in length. It is traversed by the Selembría, the *Peneus* of the ancients, which, a little below, throws itself into the gulf of Salonica. Between Baba, where it is narrowest, and the point at which it begins to widen, the valley bears the name of the Boghaz or gorge. This valley, so celebrated for its beauty by the ancient poets, is described by some travellers as consisting merely of a deep and narrow gorge, remarkable for the wild sterility of its aspect, while others distinguish its SW part as extremely picturesque and pleasing. See PENEUS.

TEMPELBERG, a town of Prussia, in the prov. of Pomerania, regency and 48 m. S of Köslin, and circle of Neu-Stettin, at the SW extremity of Lake Drazig. Pop. in 1843, 3,368. It is enclosed by walls, and has three gates, two suburbs, and two churches, a Catholic and Lutheran. It has manufactories of cloth, breweries, and several distilleries of brandy. This town was founded in the 12th century by the Templars.

TEMPERANCEVILLE, a settlement of Upper Canada, in the township of Malahide, on Catfish creek or river Barbu, 10 m. E of St. Thomas. Pop. 100.

TEMPIO, a town of Sardinia, in the div. of Cape Sassari, prov. and 27 m. N of Ozieri, on a mountain, a little to the W of the Limbara mountains. Pop. 7,057. It is well-built and fortified, and has a college and three convents. It is noted for salted meats and hams. Wine is cultivated in the environs, and large numbers of cattle are reared, and form an important branch of contraband trade with Corsica.

TEMPLE, a parish in Cornwall, 6 m. NE of Bodmin. Area 843 acres. Pop. in 1851, 24.

TEMPLE, a township of Hillsborough co., in the state of New Hampshire, U. S., 44 m. SSW of Concord, drained by branches of Souhegan river. Pop. in 1840, 567; in 1850, 579.—Also a township of Franklin co., in the state of Maine, 40 m. NNW of Augusta, bordered on the E by Sandy creek. Pop. in 1840, 955; in 1850, 785.

TEMPLE (BAR), a bay of New South Wales, on the NE coast, between $11^{\circ} 58'$ and $12^{\circ} 25'$ S lat., and in $143^{\circ} 5'$. It is enclosed on the N by Cape Granville, and on the SE by Cape Fear, and is 33 m. in length, and 12 m. in breadth. The surrounding coast is generally low and sandy.

TEMPLE (Lx), a village of France, in the dep. of the Loire Inferieure, cant. and 4 m. N of St. Etienne-de-Montluc, on an elevated plateau. Pop. 350.

TEMPLE (Lx), or TEMPLE-SUR-LOT (Lx), a commune and town of France, in the dep. of the Lot-et-Garonne, cant. and 4 m. WSW of Sainte-Livrade, near the l. bank of the Lot. Pop. 551.

TEMPLEBEG, a parish in co. Tipperary, $4\frac{1}{2}$ m. SSW of Borris-o'-leagh. Area 3,427 acres. Pop. in 1831, 1,064; in 1841, 1,207.

TEMPLEBODANE, a parish in co. Cork, 5 m. SE by S of Rathcormack. Area 4,736 acres. Pop. in 1831, 1,337; in 1841, 1,583.

TEMPLEBOY, a parish in co. Sligo, 2 m. E by S of Dunmore-West. Area 9,112 acres. Pop. in 1831, 3,787; in 1841, 3,812.

TEMPLEBREADY, a parish in co. Cork, $5\frac{1}{2}$ m. SSE of Passage. Area 2,654 acres. Pop. 1,613.

TEMPLEBREDEN, a parish in co. Tipperary, $2\frac{1}{2}$ m. N of Emly. Area 2,455 acres. Pop. 1,457.

TEMPLEBRIEN, a parish in the E division of the barony of East Carbery, co. Cork. Area 1,189 acres. Pop. in 1831, 496; in 1841, 776.

TEMPLECARNE, a parish, partly in co. Fermanagh, and partly in co. Donegal, containing part of the town of Pettigoe. Area of the mainland of the Fermanagh section, 7,719 acres, of which 4,399 acres are in Lower Lough Erne, of the Donegal section, 88,149 acres, of which 2,140 acres are in Lough Derg, and 1,072 acres in small lakes. Pop. of the whole, in 1831, 5,461; in 1841, 5,934. Only about one-sixth of the whole land in the p. can be used for tillage; the greater part of the enormous remainder is so upland, moorish, and heathy as to be of no other service than for coarse summer pasturage to black cattle.

TEMPLECORRAN, a parish in co. Antrim, $4\frac{1}{2}$ m. NE of Carrickfergus, containing the village of Ballvcarrv. Area 4,744 acres. Pop. 1,428.

TEMPLECRONE, a parish on the coast of co. Donegal, containing the town of Dunglo. Area 52,921 acres,—of which 4,353 acres are in the island of Arran. Pop. in 1831, 8,198; in 1841, 9,842. The mainland district extends southward from Guidorebay to Travenagh-bay, and is identical over all the N and the centre with the wild and unique tract of country called the Rosses.

TEMPLEDERRY, a parish in co. Tipperary, $6\frac{1}{2}$ m. SE of Nenagh. Area 6,998 acres. Pop. 2,092.

TEMPLEDOWNEY, a parish in co. Tipperary, consisting of two detached districts, the larger one N of Toomavara, and the smaller one S of that place. Area of the whole, 1,850 acres. Pop. 552.

TEMPLE-ERRY, or **TEMPLE-ERR**, a parish in the barony of Ikerrin, co. Tipperary. Area 4,241 acres. Pop. in 1831, 1,415; in 1841, 1,612.

TEMPLEHARRY, a parish in King's co., $2\frac{1}{2}$ m. NNW of Moneygall. Area 4,589 acres. Pop. in 1831, 1,156; in 1841, 1,137.

TEMPLEKELLY, or **TEMPLEJEHALLY**, a parish of co. Tipperary, containing Ballina, or the eastern suburb of Killaloe. Area 10,038 acres,—of which 1,009 acres are in Lough Derg. Pop. in 1831, 4,722; in 1841, 4,259. About one-half of the length extends along Lough Derg; and the remainder along the Shannon.

TEMPLEKIERAN, a parish in co. Meath, $3\frac{1}{2}$ m. SE of Navan. Area 1,067 acres. Pop. 342.

TEMPLEMALEY, a parish in co. Clare, $2\frac{1}{2}$ m. N by E of Ennis. Area 4,648 acres. Pop. 1,634.

TEMPLEMARTIN, a parish in co. Cork, $3\frac{1}{2}$ m. N of Bandon. Area 7,515 acres. Pop. in 1831, 2,730; in 1841, 2,362. The surface is part of the N screens of the valley of the Bandon river.—Also a parish $2\frac{1}{2}$ m. E of Kilkenny. Area 782 acres. Pop. in 1841, 306.

TEMPLEMICHAEL, a parish in co. Longford, containing the whole of the town of Longford. Area of the Ardagh section, 9,115 acres. Pop. of the whole, in 1831, 8,323; in 1841, 8,434.—Also a parish on the E border of co. Tipperary, containing the village of Ninemilshouse. Area 2,869 acres. Pop. in 1831, 796; in 1841, 1,027.—Also a parish in co. Waterford, on the r. bank of the Blackwater, $2\frac{1}{2}$ m. NNW of Youghal. Area 8,215 acres. Pop. in 1831, 2,573; in 1841, 2,994.—Also a parish in co. Wicklow, $2\frac{1}{2}$ m. N of the town of Arklow. Area 1,325 acres. Pop. in 1831, 360.—Also a parish in co. Cork, $2\frac{1}{2}$ m. E by N of Innishannon. Area 2,064 acres. Pop. in 1831, 764; in 1841, 711.

TEMPLEMOLOGGA, a parish in co. Cork, $3\frac{1}{2}$ m. NW of Mitchellstown. Area 4,396 acres. Pop. in 1831, 1,876; in 1841, 1,951.

TEMPLEMORE, a parish, containing the chief part of the city of Londonderry, and identical with the North-west Liberties of the City of Londonderry. Area 12,615 acres. Pop. in 1831, 19,620; in 1841, 20,879. "The parish," says the *Ordnance Memoir*,

"generally presents the appearance of a rich and cultivated country, eminently diversified in its picturesque features, and imposing from the grandeur of its undulating outlines. Its chief beauties are, however, connected with the broad and navigable Foyle."—Also a parish in co. Tipperary, containing the town of Templemore. Area 8,472 acres. Pop. in 1831, 5,218; in 1841, 5,966.—The town stands on the r. bank of the Suir, on the road from Roscrea to Cashel, 9 m. N of Thurles.

TEMPLEMOYLE, a hamlet, and a celebrated agricultural school, in the p. of Faughanvale, co. Londonderry, $1\frac{1}{2}$ m. SW by S of Muff, on the road to Strabane. The agricultural school stands 7 furl. 88W of Muff, and 5 m. ENE of Londonderry, upon a farm of 172 acres. The buildings cost £2,400; and are capable of accommodating not less than 70 boarders. The annual expense of board and instruction amounts to £10 a-year. Parents or landlords pay this for the largest proportion (the parents paying for about one-third), the Drapers' and Grocers' companies, the Irish society, and the Commissioners of the Woods and Forests for the remainder. The lowest age for admission is 14. The school is open to all classes and persuasions, and is frequented from all parts of Ireland. It is divided into two equal divisions; one remains in school, while the other is occupied abroad. The class in school pursue, under the head-master, reading English, English grammar, writing, arithmetic, geography, construction of maps, book-keeping in reference to their special occupations, farmers' accounts, &c. Euclid's elements, trigonometry, in its application to heights and distances, land-surveying, together with the use of the water-level, theodolite, chain, &c. The other division works the farm and garden, under the head-farmer, divided into bands, each superintended by its respective monitor, who is responsible for the conduct of his band. The situation of the establishment is beautiful. The house stands near to the top of a steep hill, looking down upon a wooded glen, and abroad over the rich levels stretching to the lough, and over the lough to the mountains of Donegal and the grand Coleraine rocks. Besides feeding the whole establishment, the produce brings in a yearly increasing profit. Within ten years, there have been additions of new dormitories, an infirmary, washing-rooms, a museum of models of farming implements, an improved cow-house, and an excellent house for sheep, the introduction of which, with all modern improvements in the management of them, is an important new feature in the education given. The land is divided into nine portions, five of which are regularly tilled on the five-shift rotation, and the other on the four-shift. Every part of the work is, sooner or later, done by the hands of each pupil, the only help hired being for the drudgery, which would be mere waste of time when once learned. From the first attempt to plough a furrow or set a fence to the highest skill in judging of stock at fairs and markets, the pupils are exercised in the whole of their art.

TEMPLEMURRIG, a parish in co. Mayo, $2\frac{1}{2}$ m. NNW of Killala. Area 2,340 acres. Pop. 1,291.

TEMPLENECARRIGA, a parish in co. Cork, $4\frac{1}{2}$ m. N by W of Middleton, containing the village of Walshtown. Area 5,208 acres. Pop. 1,574.

TEMPLENEERY, a parish in co. Tipperary, $3\frac{1}{2}$ m. ESE of Tipperary, containing the village of Bansha. Area 12,840 acres. Pop. in 1841, 3,700.

TEMPLE-NEWSHAM, a township in Whitkirk p., Yorkshire, 4 m. E by S of Leeds. Area 3,097 acres. Pop. in 1831, 1,458; in 1851, 1,690.

TEMPLENOE, a parish in co. Kerry, $5\frac{1}{2}$ m. SW by W of Kenmare. Area 32,428 acres. Pop. in 1831, 3,882; in 1841, 4,189.—Also a parish in co. Tipperary, $2\frac{1}{2}$ m. NE of Tipperary. Area 2,729 acres. Pop. in 1831, 1,158; in 1841, 1,154.

TEMPLEOMALUS, a parish in co. Cork, $2\frac{1}{2}$ m. SE by E of Clonakilty. Area 1,931 acres. Pop. in 1831, 1,352; in 1841, 1,612.

TEMPLEORAN, or **FORAN**, a parish in co. Westmeath, $5\frac{1}{2}$ m. NW of Mullingar. Area 5,188 acres. Pop. in 1831, 1,298; in 1841, 1,395.

TEMPLEOUTRAGH, or **UPPERCHURCH**, a parish in co. Tipperary, $6\frac{1}{2}$ m. NW by W of Holycross. Area 12,902 acres. Pop. in 1841, 3,147.

TEMPLEPATRICK, a parish in co. Antrim, containing the village of Templepatrick. Area 14,190 acres. Pop. in 1841, 5,103.

TEMPLEPETER, a parish in co. Carlow, $4\frac{1}{2}$ m. SW of Tullow. Area 1,045 acres. Pop. 317.

TEMPLEPLACE, a village in the p. of Donagh-

cumper, co. Kildare, on the r. bank of the river Liffey, 5 furl. S by W of Celbridge. Pop. 279.

TEMPLEPORT, a parish in co. Cavan, $3\frac{1}{2}$ m. WSW of Ballyconnel. Area 42,171 acres. Pop. in 1831, 10,758; in 1841, 13,100. The summit of Slievenakilla, at the NW extremity, has an alt. above sea-level of 1,793 ft.

TEMPLEQUINLAN, a parish in co. Cork, $2\frac{1}{2}$ m. ENE of Clonakilty. Area 2,270 acres. Pop. in 1831, 1,042; in 1841, 1,247.

TEMPLEROAN, a parish in co. Cork, 3 m. E of Doneraile. Area 3,866 acres. Pop. in 1841, 1,802.

TEMPLEROBIN, a parish in co. Cork, containing the greater part of the town of Cove; and consisting of the islands of Spike and Hawlbowl, and the eastern division of Great Island, all in the upper part of Cork harbour. Area 3,594 acres. Pop. in 1831, 3,220; in 1841, 7,391.

TEMPLESCOBIN, or TEMPLESCORBY, a parish in co. Wexford, $1\frac{1}{2}$ m. WSW of Enniscorthy. Area 1,707 acres. Pop. in 1831, 405; in 1841, 495.

TEMPLESHAMBO, or TEMPLESHAMBOUGH, a parish in co. Wexford, $4\frac{1}{2}$ m. S by W of Newtonbarry. Area 19,516 acres. Pop. in 1831, 4,198; in 1841, 5,178. The summit of Mount Leinster, at the NW extremity of the p., has an alt. above sea-level of 2,610 ft.

TEMPLESHANNON, a parish in co. Wexford, containing part of the town of Enniscorthy. Area 4,962 acres. Pop. in 1831, 2,743; in 1841, 3,232.

TEMPLE-SOWERBY. See SOWERBY.

TEMPLETENNY, a parish of co. Tipperary, 5 m. W of Clogheen, containing the village of Ballyporeen. Area 18,181 acres. Pop. in 1831, 5,786; in 1841, 6,907. The surface extends southward from the summit-line of the Galtee mountains, across the valley of the Tar rivulet and the Mitchellstown Caves, up and over the Knockmeledown mountains to the bottom of the vale or to the stream of the Arraglin.

TEMPLETHAY, or TEMPLE-ETHEY, a parish in co. Tipperary, 4 m. NE by E of Clonmel. Area 6,677 acres. Pop. in 1831, 1,437; in 1841, 1,500. The summits of Slievenaman, Carrickabrock, and another height, all on the N boundary, have altitudes of respectively 2,364, 1,859, and 1,589 ft. above sea-level.

TEMPLETOGHER, a parish 3 $\frac{1}{2}$ m. W by N of the village of Ballymoe, co. Galway. Area 13,705 acres. Pop. in 1831, 4,381; in 1841, 4,976.

TEMPLETON, a parish of Devon, $6\frac{1}{2}$ m. W by N of Tiverton. Area 1,896 acres. Pop. in 1831, 222; in 1851, 218.—Also an ancient village in Narberth p., co. of Pembroke, 2 m. SSE of Narberth.

TEMPLETON, a township of Worcester co., in the state of Massachusetts, U. S., 61 m. WNW of Boston. It has a hilly surface, and is watered by branches of Miller's and Chicapee rivers. Pop. in 1840, 1,776; in 1850, 2,173.

TEMPLETON'S CREEK, a river of Australia Felix, in the district of Murray, an affluent of Goulburn river.

TEMPLETOWN, a parish in co. Wexford, $2\frac{1}{2}$ m. SW by W of Fethard. Area 4,166 acres. Pop. in 1831, 1,387; in 1841, 1,426.—Also a village in the p. of Carlingford, co. Louth, near the extremity of Carlingford peninsula.—Also a locality in co. Antrim, which gives the title of Baron and Viscount in the peerage of Ireland to the noble family of Upton.

TEMPLETRINE, a parish of co. Cork, 5 m. SW of Kinsale. Area 4,784 acres. Pop. in 1841, 2,149.

TEMPLETUOHY, or BALLINSIN, a parish in co. Tipperary, containing the village of Templetuohy. Area 8,460 acres. Pop. in 1841, 3,194.

TEMPLEUDIGAN, or St. PETER'S, a parish in

co. Wexford, 5 m. NNE of New Ross. Area 8,177 acres. Pop. in 1831, 2,434; in 1841, 2,151.

TEMPLEUVE, a department, commune, and town of Belgium, in the prov. of Hainault, arrond. and 6 m. NW of Tournay, on the line of railway to Courtray. Pop. 4,000. It has manufactories of linen, and carries on an active trade in honey, wax, and butter.

TEMPLEUVE - EN - PEWELL, a town of France, in the dep. of the Nord, cant. and 4 m. SSW of Cysoing. Pop. in 1846, 3,180. It has manufactories of furniture stuffs, oil-mills, and sugar factories.

TEMPLEUSQUE, a parish in co. Cork, 5 m. NE of Cork, containing the village of Riverstown. Area 4,603 acres. Pop. in 1831, 1,289; in 1841, 1,429.

TEMPLEUX - LE - GUERARD, a village of France, in the dep. of the Somme, cant. and 3 m. ENE of Roisel. Pop. 650. It has manufactories of embroidered muslin.

TEMPLIN, a circle and town of Prussia, in the prov. of Brandenburg, and regency of Potsdam. The circle comprises an area of 216 sq. m., and contains 38,000 inhabitants.—The town is 23 m. SE of New Strelitz, on Lake Dolgen. Pop. in 1843, 3,352. It is enclosed by walls, and has four gates, an hospital, and four churches. It has manufactories of hosiery, and distilleries, and carries on a considerable trade in wood.

TEMPO, a rivulet of co. Fermanagh, which rises among the mountains on the boundary of coes. Tyrone and Fermanagh, and runs SSW past the village of Tempo, to a confluence with the Colebrook river, at a point $1\frac{1}{2}$ m. S of Maguire's-bridge.—Also a village in the p. of Enniskillen, co. Fermanagh, $4\frac{1}{2}$ m. NE by N of Lisbellaw. Pop. in 1841, 422.

TEMPSFORD, a parish of Bedfordshire, 6 m. NW of Biggleswade. Area 2,350 acres. Pop. 622.

TEMPZIN, a village of the grand-duchy of Mecklenburg-Schwerin, and duchy of Mecklenburg-Güstrow, on a small lake, $1\frac{1}{2}$ m. NNW of Brisel, and 15 m. NE of Schwerin. It has a tile-work.

TEMRIOUK, a fortified town of Russia in Europe, in the prov. of the Caucasus, and territory of the Cossacks of the Black sea, 30 m. N of Anapa, on a narrow tongue of land, extending into a gulf of the same name, in the SE part of the sea of Azof, in N lat. 45° 20'. It makes part of the Kuban line of defence, and contains a new church, and about 120 houses, of which a half are outside the ramparts. Under the Turkish government this place was one of much greater extent and importance.

TEMTHELS, or TEMMELA, a village of Prussia, in the prov. of the Rhine, regency and 10 m. SW of Trèves, and circle of Sarreburg, on the r. bank of the Moselle. Pop. 500.

TENA, a valley of Spain, in the N part of the prov. of Huesca, on the S side of the Pyrenees, and between two ramifications of these mountains. It is 15 m. in length from N to S, and 9 m. in extreme breadth, and is watered by the Gallego and several other streams. This valley, which is one of the finest in Aragon, produces corn, barley, oats, millet, flax, and hemp, and pastures large herds of cattle, and is noted for its mineral wells and baths. In the adjacent mountains are a silver and several iron mines. The valley contains 11 villages, of which Panticosa is the principal.

TENA, a town of New Grenada, in the prov. of Bogota, 24 m. from Santa-Fe-de-Bogota. Pop. 800.

TENAÏLLE (LA), a hamlet of France, in the dep. of Charente-Inferieure and cant. of Mirambeau, 6 m. WNW of Jozac, at the source of the Seudre. It had formerly an abbey.

TENANGO, a town of Mexico, in the intendancy

and 32 m. SW of Mexico. A great annual fair is held here.

TENANT'S BAY, an indentation of the SE coast of Nova Scotia, 12 m. E of the bay of Mascaret. It is about 5 m. in length, and $1\frac{1}{2}$ m. in medium breadth, and is divided into two parts connected by a narrow neck. It affords safe anchorage, but its banks are of the wildest description.

TENASSERIM PROVINCES, a district of Trans-Gangetic India, lying between Siam on the E, and Pegu on the W, formerly a part of the Burmese empire, but ceded to the East India company by the treaty of Yandabu, on the termination of the war in 1826. The provinces, comprising Martaban, Ye, Tavoy, and Mergui, are situated on the eastern shores of the bay of Bengal; and though the boundaries have never been very accurately defined, may be said to extend from 10° to 17° N lat., and from $97\frac{1}{2}^{\circ}$ to 99° E long., forming a narrow strip of territory about 420 m. in length, and from 50 to 70 m. in breadth, except towards the southern extremity, where the breadth diminishes to 10 or 12 m. On the N, this territory is bounded by a lofty range of mountains, branching from the table-land of Yunnan, and clothed with dense forests, which after attaining the height of 5,300 ft., makes a sweep to the southward, and runs in a long continuous chain, but with diminished altitude, between the eastern extremity of the provinces and the kingdom of Siam. The peninsula of Malacca forms the S boundary, while on the W the bay of Bengal extends for the distance of more than 300 m. along the coast, to the embouchure of the Saluen, which river forms the rest of the boundary in that direction, and separates our possessions from the Pegu territories. The entire extent of coast is bordered by islands. The characteristic feature of this extensive territory, particularly in the N province, is that of a vast alluvial plain partially enclosed by the high mountain-range above referred to, and diversified by a double line of hills from 200 to 800 ft. in height, forming in some parts a narrow continuous chain; in others, starting into sharp precipitous eminences which present a most singular and picturesque aspect. These are principally of limestone formation, but along the course of the Saluen, from Maulmein to its embouchure, there runs a ridge of sandstone from 200 to 300 ft. in height. On the sea-coast also, the ground is elevated and rocky, but being densely wooded, and for the most part unexplored, little is known of its geological formation. The space between the hills, as well as between the sea-coast and the mountain-boundary of the interior, consists of a succession of extensive valleys or plains, which though open in some parts for many miles, are more generally covered with dense and almost impenetrable jungle. The whole country is intersected by numerous rivers and streams, which pour an immense volume of water to the sea. On the N the Saluen or Thaluén has a course of nearly 1,000 m., penetrating beyond the confines of China; the Attayén and the Gyné, though of more limited extent, are of very considerable depth, and intersect the N division of the province with numerous windings navigable for boats. Opposite the cantonment of Maulmein, where these three rivers form a junction, the breadth of their united stream is from 1 to 2 m., and the depth sufficient for vessels of several hundred tons burden. To the S, the country is equally well watered by the Ye, the Tavoy, and the Tenasserim, all rivers of considerable magnitude and navigable for many miles. Owing to the level character of the surface too, numerous creeks, branching from these rivers, run through the provinces in various directions, and tend considerably to facilitate the communications. All these

sources of outlet, however, are insufficient to carry off the immense fall of rain during the wet season, when the low grounds are so completely covered as to present the appearance of an extensive lake; and even during the first two months of the dry season, they are left in a very marshy state. It is computed that in the province of Amherst or Martaban alone, at least 3,000 sq. m. of plain are thus regularly inundated, and thereby fertilized like the delta of Egypt by the overflowing of the Nile. As may be supposed, under such circumstances, the soil is almost universally alluvial, and covered in many parts with the remains of decayed vegetation to the depth of more than 3 ft. Beyond the reach of the inundation the surface is clothed with forests of the most stately timber, particularly teak, which grows in great abundance as far S as the parallel of 16° , while long coarse grass or a mass of jungle overspreads the low grounds. The durian, mangosteen, pine-apple, sugar-cane, and various spices and fruits, are abundant; and dye-woods, storax, gamboge, sandalwood, and cajuput are produced in the forests. The banks of the rivers, as far as the influence of the tide extends, give birth to a dense barrier of mangrove bushes and rank weeds. Indeed, the exuberant fertility of the soil produces upon a most gigantic scale every species of tropical vegetation, where-with the whole face of the country is so overrun as to present one of the principal obstacles to its being, for many years to come, completely explored. The animals found in these provinces are elephants, rhinoceroses, tigers, panthers, leopards, buffaloes, and wild hogs.—Coal has been discovered in Mergui, and iron-ore in Ye and Tavoy.

Climate. The principal characteristic of the climate is the extreme length and severity of the wet season, when the quantity of rain is greater than in any British colony except Western Africa. It begins to fall in April, and continues almost incessantly till October, during which upwards of 200 inches have been measured; the quantity, however, varies materially in different years. As in Ceylon, the seasons are principally influenced by the SW and NE winds or monsoons, the former extends from April to Oct., and constitutes the wet season, during which the wind, coming direct from the ocean, is laden with moisture. The other continues during nearly all the rest of the year, and blowing over the immense extent of land to the NE is just as remarkable for its dryness. For about a month of the intervals between the monsoons, the winds are variable, and the setting in of each is always accompanied by terrific storms of thunder and lightning. The seasons on this coast are divided by the natives into the hot, the rainy, and the cold, the first commencing with the full moon in February, the second with the full moon in June, and the third with the full moon in October. The mere range of the thermometer, however, would not lead to the inference that there was any great difference in the degree of heat at these seasons, as will be seen from the following table:—

	1829.		1831.	
	Highest.	Lowest.	Highest.	Lowest.
January.	86°	61°	89°	53°
February.	92°	65	96	71
March.	93°	72	98	72
April.	95	74	102	75
May.	89	74	96	75
June.	88	74½	94	75
July.	85½	74	89	74
August.	88	73½	92	74
September.	86	73	92	75
October.	90½	72	94	71
November.	89	62	92	58
December.	89	60	"	"

The temperature, as shown by this table, will be found much the same as at Colombo, in Ceylon, ex-

cept that it falls about 10° lower in the cold, and rises from 5° to 10° higher in the hot season; the difference between the maximum and minimum is also twice as great throughout the year.

Population. Notwithstanding this amazing fertility, and the variety of its productions, the whole of this immense territory has for many centuries past been almost a desert, the population, at the time it was delivered over to the British government, not having exceeded 30,000 souls on a space comprising 33,000 sq. m.; and with the exception of the inhabitants of the towns of Tavoy and Mergui, these consisted of wandering tribes subsisting chiefly on the produce of the forests, and yielding only a nominal subjection to any government. On the British taking possession, however, many thousands from Rangoon and its vicinity took refuge under our flag, and every succeeding year has brought such accessions to their number that, on the 1. bank of the Saluen alone, the pop. at present exceeds 100,000 souls, and it was computed that altogether there were in 1839 nearly 112,000 throughout the provinces.

The chief towns, when the British took possession, were Tavoy and Mergui, the former about 150, the latter 250 m. S of the nearest part of the existing Burmese frontier. These being at too great a distance to afford effectual protection to the N provinces, it was determined to station most of the troops opposite to the Burmese town of Martaban, on a peninsular piece of ground at the junction of the Attavay, the Gye, and the Saluen, three rivers which afford the principal means of access to the interior. Accordingly, in January, 1827, the cantonment of Maulmein or Moelmyne, now the principal station of the troops, and the chief seat of the pop. in these provinces, was founded on the l. bank of the Saluen, about 30 m. from its embouchure, on a spot said to have been occupied as a military position by the Portuguese several centuries ago. See articles AMHKEST, MERGUI, MAULMEIN, and TAYOT.

TENASSERIM, or TANATHARE, a river of India beyond the Ganges, in the prov. of the same name. It has its source in the mountains to the NE of Tavoy; runs through a narrow valley to the parallel of the town of that name; thence it directs its course to the E till it approaches Mergui, when it turns W, and flows by two branches into the sea. The southern embouchure is open to ships, but the other cannot with safety be navigated. It has a total course of about 240 m.—The prov. of T. forms a narrow tract extending along the E side of the bay of Bengal, between 11° and 19° N lat., between Tavoy on the N, and the isthmus of Kra, by which the peninsula of Malacca is connected with the continent on the S, and separated from Siam on the E by a range of mountains.

TENAY, a commune of France, in the dep. of the Ain, cant. and 4 m. SE of St. Rambert on the Albain. Pop. 1,130. It has manufactories of linen and cashmere, a silk-mill, and bleacheries, and carries on an active trade in linen.

TENBURY, a parish and market-town in Worcestershire, 22 m. NW by W of Worcester, on the S bank of the Teme, near the Leominster canal. The p. comprises the hamlets of Berrington, Sutton, and

Tenbury-Foreign. Area 5,060 acres. Pop. in 1831, 1,768; in 1851, 1,786. The town is indifferently built, but contains some good houses. It occupies a low position, close to the Teme, in consequence of which it is often liable to sudden inundations. The Kyre, a small rapid stream, flows into the Teme at the upper end of the principal street. Both rivers are here crossed by handsome bridges. The trade of the town is chiefly in hops and cider, great quantities of which are produced in the neighbourhood. Tanning and glove-making also employ some hands. In 1839, a spring of strongly impregnated saline water was discovered here. T. is a polling-place in the election of members for the W division of the county.

TENBY, a borough and small sea-port town in the p. of St. Mary, co. of Pembroke, 12 m. E of Pembroke, on one of the bays on the N side of the Bristol channel. Pop. in 1831, 2,128; in 1851, 3,208. T. contributes with Pembroke, Wiston, and Milford, in returning 1 member to parliament. It is also a polling-place for the co. The town is very picturesquely situated on a ridge of mountain limestone, which curving gently towards the E, forms a small bay, which has been converted into a commodious and well-sheltered harbour, skirted by a bold amphitheatre of rocks and houses. The town has been greatly improved of late years. The houses in general are neatly built, and the streets are clean and well-lighted with gas. Besides the ecclesiastical edifices, the public buildings are the town-hall, assembly-rooms, theatre, spacious baths, and a market-house. The trade of the town is inconsiderable. The harbour consists of two piers, which shoot into a corner of the bay, and nearly encircle a small but safe spot for the anchorage of vessels. The imports are chiefly articles of domestic consumption. The exports consist of butter, corn, coal, and culm. Some fishing vessels from Plymouth and Broxham make T. their station during the fishing-season. The oyster-beds here constitute a source of considerable profit to the fisherman. Tenby, however, is important principally as a watering-place, for which it is singularly well adapted, by the great beauty of its situation, and the protection from rough weather which it receives from the headlands close to it. The lodging-houses are numerous and excellent; and the beach is hard and smooth. Steam-packets from Dublin and Bristol touch here in the summer season. The ruins of Tenby-castle are still considerable, though mostly in a very dilapidated state.

TENBY, a town of Van Diemen's Land, in the co. of Pembroke, 49 m. from Hobart Town.

TENCE, a canton, commune, and town of France, in the dep. of the Haute-Loire and arrond. of Yssingaux. The cant. comprises 4 coms. Pop. in 1831, 13,323; in 1846, 14,071.—The town is 9 m. ESE of Yssingaux, on the r. bank of the Lignon, at the confluence of the Serigoul. Pop. in 1846, 6,158. It has an almshouse; and possesses extensive manufactories of black and white lace, and of felt-hats, a silk and a paper-mill.

TENCH'S ISLAND, an island of the S. Pacific, in the archipelago of New Ireland, in 8 lat. $1^{\circ} 39'$, E long. $151^{\circ} 31'$. It is about 2 m. in circumf., is low and entirely covered with trees, of which a large number are cocoa palms. The inhabitants, who are copper coloured, are tall, well-made, and manage their canoes with great dexterity. They are about 1,000 in number. This island was so named by Bale, who visited it in 1790.

TENCIN, a commune of France, in the dep. of the Isère, cant. and 2 m. SSW of Goncelin, on the r. bank of the Theys, near its confluence with the Rhone. Pop. 1,040.

TENCOA, a small town of Honduras, in the dep. and 75 m. NW of Comayagua.

TENDA, a town of Sardinia, capital of a mandemento, in the prov. and 32 m. NE of Nice, and 25 m. NNE of Sospello, on the flank of a steep mountain near the r. bank of the Roya. Pop. 1,500. The houses are ill-built, and the general aspect of the place extremely poor. It gives its name to a pass of the Alps leading from Piedmont to Nice, and is noted as the place from which the family of the Lascaris sprung, one member of which, named Theodore, was emperor of Constantinople.

TENDA, a state of Senegambia, on the banks of the Gambia, in N lat. 13°. It is covered with woody mountains.

TENDA (COL-DE), a pass in the chain of the Maritime Alps, a little to the W of its junction with the Apennines, in Sardinia, on the confines of the divisions of Nice and Coni, in N lat. 44° 8', E long. 7° 42'. It is 6,160 ft. in perpendicular height, and is crossed by a fine road, practicable for carriages, constructed by Victor-Amedeo III. The ascent on the S side occupies three hours, and about two-thirds up is a vast excavation, commenced by order of Anne, duchess of Savoy, with the intention of penetrating the mountain, but remaining still unfinished. The descent on the other side takes about 1½ hour. The summit of the col is covered with snow and exposed to violent storms. It is surrounded on all sides, except the S, in which the Mediterranean opens to view, by mountains of the wildest description. This pass was long infested by the Barbets, a kind of mountain militia, notorious in defiance of their professed character for their depredations upon travellers.

TENDA-MAIE, a district of Southern Senegambia, enclosed by a bend of the Rio-Grande. It is of small extent, and is flat and sandy, but very fertile, and produces in large quantities maize, millet, and rice. It abounds with deer and wild oxen, and is noted for its iron. Its inhabitants are gentle, but indolent, poor, and little disposed to hospitality.

TENDERBAR, a town of Senegambia, in the state of Kaen, on the l. bank of the Gambia, 51 m. E of Bathurst.

TENDILLA, a town of Spain, in the prov. and 15 m. ESE of Guadalajara, in a country covered with vines and olives, and near the l. bank of the Tajuna. Pop. 1,135.

TENDON, a commune of France, in the dep. of the Vosges, cant. and 18 m. NE of Remiremont. Pop. 1,291.

TENDRA, or TENTER, an island of the Black sea, in Russia in Europe, near the NW coast of the gov. of Kherson, and district of Aleshki, near the mouths of the Dnieper, and to the W of the gulf of Odessa, in N lat. 46° 21' 40", E long. 81° 29' 5". It is 26 m. in length from WNW to ESE, but is very narrow, forming a tongue of land, separated from the continent by only a narrow channel. It has a light-house on its N point, 32 m. ESE of Odessa.

TENDRE (MONT), a mountain of Switzerland, in the cant. of Vaud, 10 m. W of Cossonay, above Montricher, in a ramification of the Jura. It has an alt. of 4,080 Parisian feet above the level of the lake of Geneva, and is crossed by a road at the height of 3,860 ft.

TENDRING, a parish in Essex, 5½ m. SSE of Manningtree. Area 2,827 acres. Pop. 953.

TENE. See FATIMA.

TENEBRON (EL), a town of Spain, in the prov. and 48 m. SSW of Salamanca. Pop. 150.

TENEDOS, or BOKHTHA-ADASSIS, an island of Turkey in Asia, in the Grecian archipelago, near the coast of Anatolia, 12 m. SSW of the SW en-

trance to the straits of the Dardanelles, in N lat. 39° 50', E long. 26° 8'. Pop. 7,000. It is about 8 m. in length from E to W, and 3 m. in breadth. Although covered with rocky mountains—of which the principal, St. Elias, appears to have been volcanic—it is generally fertile, and produces in considerable quantities, grain, fruit, cotton, and sesame; but its wealth consists chiefly in the culture of the vine, the annual revenue from which is estimated at 30,000 piastres. It has no port, and vessels are here subjected to all the hazards of an open coast. On its NE coast is a town of the same name, with a pop. of 4,500. It is built semicircularly in a valley, and on the slope of two hills, and is commanded by another pyramidal-shaped hill, which rises to some height above. On the S it is defended by a small fort, and on the N by a citadel. It conducts an active trade with Constantinople. An immense grain magazine was erected here by Justinian, for storing the cargoes of vessels detained here on their route from Egypt, but it long since fell into disuse, and has been suffered to fall to ruins. This island is mentioned by Homer, and its position at the mouth of the Hellespont has rendered it at all times a place of importance. It fell early under Ottoman domination. In 1656, it was taken by the Venetians, but the death of their general the following year again threw it into the hands of the Turks, in whose power it has ever since continued.

TENEMBER, an island of the Molucca sea, in S lat. 6° 30', E long. 132° 45'. It is 12 m. long, and 3 m. broad.

TENEN, a town of Russia in Europe, in the gov. of Vilna, district and 50 m. W of Rossiana.

TENERIFFE, or TENERIFE, the largest island in the group of the Canaries, off the western coast of Africa, situated between the parallels of 28° 0' and 28° 35' N; and intersected by the meridian of 16° 25' W. It is of a triangular form, each side being about 36 m. in length, and has an area of about 1,000 sq. m. The NE extremity of the island bears 15½ leagues NW by W from the NE point of Canaria. It is of volcanic formation, and in the peak of Teyde, of the sloping sides of which the island actually consists, it attains an alt. of 3,706 metres, or 12,158 ft. above sea-level. The height to which it rises, the distance from which it is perceived at sea, and the volcanic eruptions which continually issue from its sides, have long rendered it an object of curiosity to naturalists. The coasts are everywhere cliffy and precipitous; the cliffs being of a dark brown basalt. By the rapidity of its rise, it presents, within a short distance, every variation of temperature, from the colder climates of Europe to those of the equinoctial regions. Humboldt, after having traversed the banks of the Orinoco, the Cordilleras, and the most beautiful valleys of Mexico, declares that he never beheld a landscape more agreeable, more harmonious, and more attractive than that which the Laguna or NE coast of this island offers. There, orange, myrtle, and cypress trees, entwine the chapels reared on the eminences; the declivities are covered with vines, and cultivated like a garden; a perpetual spring prevails, and in the summer evenings the breeze from the sea bears with it delicious coolness. In this part of the island the date-tree, the plantain, the sugar-cane, the Indian fig, the *Arum colocasia*, the root of which furnishes the lower class with a nutritive meal, the olive-tree, all the fruit trees of Europe, the vine, and wheat, maize, pulse, and potatoes, are cultivated. Wheat is reaped from the end of March to the beginning of May; the culture of the bread-fruit tree, of cinnamon, coffee, and cocoa, have been tried with success. Above the fertile level track rises what

is called the region of laurels, forming an extensive border all round the island. These trees are fed by a vast number of springs which rise up amid a turf covered with perpetual verdure. Extensive plantations of chestnut occur in the lower part of this zone, above which several species of laurel, an oak resembling that of Tibet, and other trees flourish. The underwood in the lower part consists of arboreous beech; in the upper part, of ferns. Above this region, we enter a vast forest of fir and pine. The prevailing species of fir has the appearance of the Scotch fir, with long and stiff leaves sprouting by two or oftener by three in one sheath. Passing through this belt, we enter a vast plain, like a sea of sand, covered with yellow pumice dust which continually fills the air, and embellished with tufts of the beautiful *Retama blanca* growing to the height of nine feet, and loaded with odoriferous flowers. On the skirts of this plain the rich verdure of the island terminates, as well as all appearance of habitation; the traveller ascends afterwards through a complete solitude. Above this sandy plain are the *malpays*, a name which the Spaniards, in all their volcanic districts, apply to a ground destitute of vegetable mould, and covered with loose and broken fragments of lava. The ascent here is steep and extremely fatiguing, over blocks of lava which easily roll from beneath the feet. At the extremity of the *malpays* is a small plain called the *Rambleta*, from the centre of which, the *Piton* or sugar-loaf summit of Teyde rises in N lat. $22^{\circ} 16' 24''$, W long. $16^{\circ} 39' 0''$. Here are found those spiracles which are called by the natives 'the Nostrils of the Peak,' consisting of watery and heated vapours, which issue at intervals from crevices in the ground. The *Piton* is of a rugged, conical, truncated form, and 852 ft. in height; its ascent is steep, and rendered still more difficult by the loose ashes with which it is covered. At the top there is scarcely room to stand, and the crater is enclosed by a wall so steep that it could not be entered, were there not a breach in one spot. The sides of the crater slope gently to a depth of about 106 ft. The crater has long ceased to emit flames, but gives vent to aqueous vapours with a peculiar buzzing noise. The view from the top of the peak is characterised by peculiar beauty. The traveller, placed on the summit of such colossal mountains, sees usually only their own barren steeps; while the plains, covered with rich vegetation, appear in the immensity of distance; but the slender form and rapid rise of this mountain causes the cultivated and wooded parts of the island to be seen in very close proximity. From the summit of this solitary region the eye hovers over an inhabited world; the steep and naked declivities above are contrasted by the smiling aspect of the country beneath; the transparent atmosphere enables the spectator to distinguish even the houses, the sails of the vessels, and the trunks of the trees. Beyond all lies a vast extent of ocean studded with the whole archipelago of the Fortunate islands. Prince Adalbert of Prussia thus describes the scene from a point a little way up the black cone. "Looking down on the long violet-coloured ridge of the Cumbre, which with its indentations formed bays and promontories, right and left, in the white sea of fleecy clouds, whilst it descended gently towards the Llano-de-las-Retamas. On the right, a long wall of rock joined these acclivities of the Cumbre,—a continuation of the margin of the pumice-stone plain. Ascending between the obsidians of the cone, I saw at every step this colossal wall, nearly 2,000 ft. high, [?] curving more and more round the base of the peak, whilst its upper contour, quitting the straight line, began to form single cu-

polas. I recognized the Circus—the mighty, semi-circular portion of the elevation-crater, which alone had braved all the later eruptions of the volcano—the Circus, with its horizontal strata, which at times resemble narrow terraces, or rather small steps, whilst high up along its wall is seen the narrow, white, trachytic band, the silver stripe of Angostura. I looked down: my eye glided quickly along the steep declivity on which I was standing, over the huge, black mass of pointed glassy blocks of obsidian scattered deep below in wild confusion, upon two rounded cupolas, which rose close to the base of the peak from the subjacent plain of pumice-stone, passing from yellow into red, and contrasting strongly with the edge of the black obsidian field. This lower surface, the bottom of the elevation-crater, from which the Teyde arose, is covered with black masses and red blocks of lava; on every side rise up ridges and cones, between which wind single streams of lava. Below on the right, close under the highest precipices of the Circus, stand the dark-red waves of a mighty stream, arrested and stiffened in its course, the force of whose current is still perceptible. Above this fearful scene of volcanic action, this gigantic wall, which once rose out of the depths of ocean—high above all these scenes and objects, the giant peak, like a colossal pyramid purpled by the setting sun, flung his shadow over the mists which covered the ocean." The question has been agitated, but seems yet undecided, whether it is possible to perceive from this point Cape Bojador, on the coast of Africa, 90 m. to the NW. The summit of the peak may be considered as a *solfatara* or extinguished volcano, having remained tranquil during many ages, and presenting no symptom threatening a new eruption. From its flanks, however, several violent eruptions have taken place in the course of the present century. In 1704 there occurred one in the district of Guimar, which buried several valleys, and approached within a short distance of the port of Orotava on the NW coast. Two years afterwards the lava, issuing forth in a different quarter, in the space of two hours buried the port of Garachico, then the finest and most frequented harbour in the island. The volcanic power remained dormant for nearly a century, till 1796, when the mountain of Chahorra, to the W of Teyde, which had always been considered as an extinguished volcano, began pouring out vast torrents of lava. It continued in action for three months and six days, but being fortunately in an uncultivated part of the island, no serious injury was done.—The commercial importance of T. depends chiefly on its wine, which, though of an inferior quality to that of Madeira, yet being afforded at a cheaper rate, is in considerable demand. From 20,000 to 30,000 pipes are annually exported. The price on the island runs from £12 to £20 the pipe of 100 gallons. The consumption, we believe, has considerably increased. About 650,000 lbs. of cochineal were exported from the island in 1853. T. exports also orchilla-wood, rose-wood, and a few other trifling articles. The island derives great advantage, in consequence of its capital and port of Santa-Cruz, on the NE coast, in N lat. $28^{\circ} 27' 54''$, W long. $16^{\circ} 15' 18''$, forming a great place of refreshment, or, as Humboldt terms it, a grand caravansery, between Spain and the Indies. For this purpose it affords beef and fish in plenty, and excellent water. A considerable trade is also carried on between this island and the Spanish West Indies.—The pop. is about 85,000.—The climate of Teneriffe is dryer than that of Madeira, though in other respects very similar. In certain pulmonary affections it will, therefore, be found preferable, so far as atmosphere is concerned; but

there are not the accommodations for invalids which Madeira possesses, and a very limited English society. Prices, however, are proportionately low.

TENERIFFE, a town of New Granada, in the prov. and 96 m. SSW of Santa-Marta, founded on the shore of the Magdalena, in 1536. It was formerly a large and commercial town; but is now reduced to a miserable village.

TENES, **TENEZ**, or **TENNIS**, a headland of Algeria, in the prov. of Mascara, on the Mediterranean, NNE of a town of the same name, in N lat. $36^{\circ} 34'$. The town is 105 m. WSW of Algiers, in the prov. of Mascara, on the Mediterranean. It forms the port of the newly founded French town of Orleansville.

TENGALLE. See **TANGALLA**.

TENGGAR, a mountainous district of Java, to the SE of the prov. of Surabaya, and forming the finest and most picturesque portion of the island. The summits and slopes of the mountains are covered with pines, fir, and many plants common to Southern Europe. It contains 40 villages, with about 1,200 inhabitants, who in manners and customs differ remarkably from the Javanese of other portions of the island. They have preserved their independence and maintain strict separation from other tribes. They profess Hinduism. Each village is under the government of a petinggi or chief elected by the inhabitants.

TENGHI, a village of Afghanistan, on the l. bank of the Lundye, 30 m. N of Peshawur.

TENGHISTUN, a town of Persia, in the prov. of Farsistan, 2 m. from the shore of the Persian gulf, on the road from Abu-shehr to Firuzabad. It is enclosed by walls flanked with towers, and by a deep ditch, and is defended at the entrance by two small cannons. It contains about 500 families, and has a considerable trade in grain.

TENGHIZ, or **TENIS**, a lake of Russia in Asia, in the prov. and 105 m. S of Omsk, about 90 m. from the l. bank of the Irtysh.

TENJO, a town of New Granada, in the dep. of Cundinamarca, and prov. of Bogota. Pop. 800.

TENKIRI-NOR, a lake of Tibet, lying under the parallel of $31^{\circ} 15' N$, about 9 days NW of Lhasa. It is a large sheet of water, nearly 60 m. in length, and is bordered on the N by snowy mountains. It receives from the SE the Tarkit-Tsangbo river.

TENNEBERG, a bail. of the duchy of Saxe-Coburg-Gotha, and principality of Gotha. Pop. 6,800. It has a castle of the same name, 9 m. WSW of Gotha.

TENNESSEE, one of the United States of North America, in the basin of the Mississippi, between the parallels of 35° and $36^{\circ} 40' N$; bounded on the N by Kentucky; on the E by N. Carolina and Virginia; on the S by Georgia, Alabama, and Mississippi; and on the W by the Mississippi river, dividing it from the states of Arkansas and Missouri. It has an area of 45,600 sq. m. This state is divided by that section of the Alleghany chain called the Cumberland mountains, into divisions, East Tennessee and West Tennessee; but a third administrative division is known as Central T. It is washed for 160 m. by the great river Mississippi on the W; and the fine rivers Tennessee and Cumberland, both tributaries of the Ohio, pass through it in serpentine courses. The western part is undulating, some of it level; in the middle it is hilly and rolling. East Tennessee abounds in lofty mountains, presenting scenery peculiarly grand and picturesque. Of these the Cumberland or great Laurel ridge is the most remarkable. Stone, Yellow, Iron, Bald, Smoky, and Unika mountains, join each other, and form, in a direction nearly NE and SW, and under the name

of the Kittatiny ridge, the eastern boundary of the state. To the NW of these, and separated from each other by valleys of from 5 to 15 m. wide, are Bay's mountain, Copper-ridge, Clinch-mountain, Powell's-mountain, and Welling's-ridge. The last four terminate N of Tennessee river. None of the summits of these mountains exceed 2,000 ft. in alt. above sea-level.—The geological formation of this state is wholly secondary, except a small portion of the eastern part, which is transition, and numerous spots on the banks of rivers, which are alluvial. A considerable portion of the state lies on limestone. The produce of iron in 1852 was 44,500 tons. Copperas, alum, nitre, and lead, are among the minerals which chiefly occur in the eastern and middle divisions. Copper and silver have been found; and coal is supposed to be plentiful. Saltpetre is so abundant as to form a great article of commerce. There are several mineral springs, and many valuable salt springs.—The principal rivers are the Tennessee, Cumberland, Holston, Clinch, French-Broad, Nolichucky, Hiwassee, Tellico, Duck, Reelfoot, Obian, Forked-Deer, and Wolf. The Cumberland has about 250 m. of its course within T.; the Tennessee, about 200 m.

Climate. The climate is generally mild and genial. In East T. the air is so tempered by the mountain-air on one side, and by refreshing breezes from the gulf of Mexico on the other, that this part of the state has one of the most desirable climates in North America. The middle part resembles Kentucky in climate. The winter in T. resembles the spring in New England. Snow seldom falls to a greater depth than 10 inches, or lies longer than 10 days. Cumberland river has seldom been frozen over since the country was settled. Cattle are rarely sheltered in winter. In the western parts there are some low bottoms on which the inhabitants are subject to bilious fevers, and to fever and ague in the autumn.

Soil and productions. The soil is very various in quality. The western part of the state has a rich black soil; in the middle is a considerable extent of excellent land; in the eastern part of the mountains are many fertile valleys lying on a calcareous soil. Oak of different species, black and white walnut, beech, red cedar, black and honey locust, ash, elm, mulberry, dogwood, sassafras, maple, sugar-tree, papaw, cherry, hornbeam, juniper, and cucumber-tree, are among the forest-trees. In the eastern district there is a species of pitch pine, useful for boards, timber, and tar. Cane, on the low lands, grows to the height of 20 ft. The wild strawberry is of a delicious flavour; and the wild grape vine yields tolerable grapes. Of plants, the following are indigenous in this state: wild hop, ginseng, Virginia and the Seneca snake-root, angelica, ginger, and sweet anise, wild rye, wild oats, clover, and buffalo grass.—The improved farm lands in 1850 were returned at 5,175,172 acres; the unimproved at 13,809,849 acres. The agricultural productions are the same as those of Kentucky, with the exception of cotton, which, in the western parts of T., forms a staple commodity. Wheat, barley, oats, rye, buckwheat, Indian corn, flax, hemp, tobacco, indigo, rice, and cotton, thrive here luxuriantly. The limestone lands, which are well adapted to the culture of cotton, are in many parts deficient in water, which escapes through fissures in the beds of the streams. Lands of the first and second quality produce Indian corn and hemp, but for wheat the soil is too rich, unless reduced by two or three crops of maize, hemp, tobacco, or cotton. The third quality bears every kind of grain which is cultivated on the dry grounds of the Atlantic states. The produce of

wheat in 1840 was 4,569,692 bushels; in 1850, 1,619,386 b.; of Indian corn in 1840, 44,986,188 b.; in 1850, 52,279,223 b. On Cumberland river, the common produce of Indian corn is from 60 to 70 bushels; that of cotton is usually 800 lbs. to the acre. Fruit trees succeed well. The farmers in Upper T. grow little artificial grass, but they have potatoes, carrots, and turnips. They have generally each a herd of pigs, which roves through the woods with the cows; and the latter have a bell strapped round their necks, as a means of finding them. The live stock in 1850 amounted to 270,636 horses, 75,303 asses and mules, 250,546 milk cows, 86,255 working oxen, 414,051 other cattle, 811,591 sheep, 3,114,111 swine. The wool raised in 1840 amounted to 1,060,832 lbs.; in 1850, to 1,864,378 lbs. The animals are such as are generally found in other parts of the United States. The large herds of bison often seen after the first white settlements in T. were formed have now disappeared. The elk and moose still inhabit some of the mountainous parts, but are not numerous; the deer also, constantly pursued by the hunter, have become scarce, except on the mountains. Bears, panthers, wild cats, and wolves, are yet seen in the forests, but seldom visit cultivated places; the beaver, otter, and musk-rat, are still occasionally seen on the upper branches of the Cumberland.

Exports. The exports of this state consist of cotton, tobacco, hemp, horses, live cattle, Indian corn, pork, fowls, potatoes, flour, saltpetre, flax, deer skins, ginseng, lumber, and iron. The great staple productions are saltpetre, tobacco, cotton, hogs, and cattle. The imports chiefly consist of dry goods and groceries imported in waggons to East Tennessee from Philadelphia and Baltimore, and to West Tennessee by land to Pittsburg, and thence down the Ohio and up the Cumberland river. Orleans sugar, and some articles of groceries, are imported thence by the Mississippi. This state also supplies Kentucky, Ohio, &c. with cotton for inland manufactures; and from East T. considerable numbers of cattle are sent to the seaports on the Atlantic. In 1850, the total number of manufacturing establishments was 2,789; the value of the cotton goods produced, 510,644 dollars. New avenues to commerce have been opened by means of roads and railroads. The central points of the railway system in this state are Knoxville and Nashville. T. has no canals; but much of the produce seeks a northern outlet by way of Pittsburg and the lakes.

Population. The pop. and decennial increase of this state have been as follows in the periods under-noted:—

	White.	Coloured.	Total.	Increase per cent.
1790.	32,013	3,778	35,791	
1800.	91,709	13,898	105,602	195.0
1810.	215,875	45,852	261,727	147.8
1820.	339,927	82,886	422,813	61.5
1830.	535,646	146,258	681,904	61.2
1840.	640,627	188,563	829,210	21.6
1850.	756,896	246,732	1,002,725	30.9

Of the coloured pop. in 1850, 239,461 were returned as slaves. The same census returned 5,740 of the inhabitants as of foreign birth. The population, originally consisting chiefly of emigrants from the Carolinas, Virginia, and Georgia, from the New England states, and Europe, has scarcely any uniform character. They are said to be somewhat rough in their manners, but high spirited and hospitable. They are all good horsemen, and expert at the rifle. Their stockings, clothes, and bedding, and even their candles and shoes, are generally of domestic manufacture. The number of paupers in 1850 was 1,005. The number of children attending school in 1843 was 272,000. The number of churches

in 1850 was 1,939, of which 831 were Methodist, 611 Baptist, and 357 Presbyterian.—Nashville is the present seat of government. The other most considerable towns in West Tennessee are Franklin, Fayetteville, Shelbyville, Columbia, Clarksville, Carthage, and Gallatin; in East Tennessee, Knoxville, Jonesborough, Greenville, and Rogersville.

The legislature is composed of a senate of 25 members and a house-of-representatives consisting of 75 members. The members of each, together with the governor, are chosen biennially by every free white male citizen 21 years of age, and resident in the co. in which he votes for 6 months. The judiciary is vested in a supreme court, a court of chancery, and circuit courts. The state returns 10 representatives to congress.—The biennial revenue of the state, in 1850 and 1851, was 1,004,004 dollars. The state debt in 1851 was 3,651,856 d.

History. This country, which formed a part of Carolina, according to the second charter of Charles II. was inhabited by the Cherokee Indians, by whom the first colonists, consisting of above 60 families, in the year 1754, were nearly destroyed. Their settlements were not renewed till 1774, when the Indians, refusing to join the British standard, were attacked and driven towards the Kenhawa. The country then belonged to N. Carolina; and delegates, in 1776, were sent from this district to the convention held for the purpose of forming a state constitution. In 1789, it was ceded by Carolina to the United States, and in 1796, was received into the federal union. The military force consists of a militia, which amounted, in the winter of 1812 to 20,193; in 1840 to 71,282. The inhabitants of this state, active, inured to the chase, familiar with the rifle, and proud of their rights, form a militia which no regular army could long despise.

TENNESSEE, a large and navigable river of the United States, which rises in the mountains of Virginia, in the Holston and Clinch rivers, which unite at Kingston in Tennessee; traverses the western parts of Tennessee; crosses the NE corner of Alabama; bends NW; again enters Tennessee, flowing N; and after flowing 60 m. through Kentucky, joins the Ohio at Paducah, 57 m. from the Mississippi, by an outlet 600 yds. wide. It has a total course of 1,100 m., and drains a basin of 41,600 sq. m. It is navigable for the largest bow-boats as far as the Mussel-shoals, 250 m. from its mouth; and thence to its passage through the Cumberland mountains, about an equal distance, there is depth of water sufficient for boats of 40 or 50 tons. Of the two head branches of this river, the one known by the name of the Clinch or Pelison river, is navigable for boats 200 m. from its outlet, which is 150 yds. in width. The other, called the Holston, runs a course of 200 m., and is navigable for boats of 25 tons upwards of 100 m. It has several branches, the most considerable of which are Watauga and French-Broad river. The Hiwassee, Chickamago, and other streams, run into the T. from the N parts of Georgia. The Elk and other streams flow from the S parts of Tennessee through Alabama, into the Tennessee at the Mussel-shoals. The whole descent of the river is 1,700 ft.

TENNIS, a ruined city of Lower Egypt, situated on an island in Lake Menzaleh, 28 m. SE of Damietta.

TENNIS. See TENIS.

TENNSTADT, a town of Prussia, in the prov. of Saxony, regency and 16 m. NNW of Erfurt, and circle of Langensalza, on the Schambach, in a pleasant locality. Pop. in 1843, 2,984. It has three churches, sulphureous springs and baths, and an hospital; and possesses manufactories of linen and cloth, and a considerable trade in yarn.

TENQUIN (Gros), a commune of France, in the dep. of the Moselle and arrond. of Sarreguemines. The cant. comprises 25 com. Pop. in 1831, 16,863; in 1846, 17,578. The village is 20 m. SW of Sarreguemines. Pop. 1,335.

TENRIU, a river of Japan, in the island of Ni-

fon, which has its source in the prov. of Sinani; traverses that of Tutomi, from N to S; and after a course of about 120 m., throws itself by several branches into the Pacific, a little to the W of Tomotina bay.

TENSA, a town of New Grenada, in the dep. of Boyaca, prov. and 27 m. SE of Tunja, in the midst of the Andes. Pop. 500.

TENSAS, a parish of the state of Louisiana, U. S., in the E district, and comprising an area of 619 sq. m., bounded on the E by the Mississippi, and drained by branches of that river, and by a river of the same name. It has a level surface containing several small lakes, and is generally fertile. Pop. in 1850, 9,040.—Also a river of the same state, which has its source in Chicot co., in the state of Arkansas; flows S by W nearly parallel to the Mississippi, and falls into the Washita river.

TENSAW, a river of the state of Alabama, U. S., forming the E outlet of Mobile river, and flowing S, enters Mobile river by several mouths.

TENSIFT, a river of Morocco, which descends from the NW side of the Great Atlas, from a point about 40 m. E of the city of Morocco; flows at their base, and about 4 m. to the N of the capital; and after a course of about 240 m., in a generally WNW direction, throws itself into the Atlantic, 15 m. SSW of Safi. It is a rapid stream, but fordable in almost all places, except in spring.

TENTER. See **TENZERA**.

TENTERDEN, a borough, parish, and market-town, in the cinque-port liberty of Hastings, Kent, 18 m. SE of Maidstone, and 8 m. S of the line of the South-Eastern railway. Area of p., 8,620 acres. Pop. in 1801, 2,370; in 1831, 3,177; in 1851, 3,901. The ancient limits of the borough are co-extensive with those of the hundred of Tenterden, which comprises the whole of the p. of that name, and part of the p. of Ebony. The town, which occupies a gentle eminence in the midst of a rich agricultural country, consists chiefly of one street about a mile in length. It contains some good houses; but is not remarkable either for the regularity or elegance of its buildings. The inhabitants are principally engaged in agricultural pursuits.

TENT-HILL, a summit of New South Wales, in Laidley Plains, in the co. of Stanley.

TENTOLI, a town of the island of Celebes, on the NW coast, in N lat. $1^{\circ} 20'$, at the head of a roadstead, to which it gives its name.

TENTUGAL, a town of Portugal, in the prov. of Beira, comarca and 12 m. WNW of Coimbra, in a fertile plain, near the r. bank of the Mondego. Pop. 1,788. It has a convent and an alms-house.

TENTYRA. See **DENDERAH**.

TENU. See **ACHENAU**.

TENYAH. See **FALEME**.

TEOCOCUILCO, a town of Mexico, in the state and 87 m. NE of Oaxaca, in the midst of the Andes, in N lat. $17^{\circ} 24'$, and W long. $100^{\circ} 35'$.

TEODO, a small district in Dalmatia, in the circle of Cattaro, extending between the Pettane and Saline, and remarkable for its fertility. Pop. 800. It contains numerous villas, belonging to the inhabitants of Persagno and Cattaro. Its wines are said to rival those of Spain.

TEOFIOL, a town of Russia in Europe, in the gov. of Volhynia, district and 27 m. SSW of Zaslav, and 45 m. NE of Tarnopol.

TEOGE. See **TIOUGH**.

TEOLO, a town of Austrian Lombardy, in the prov. and 11 m. SW of Padua. Pop. 1,630.

TEOMABAL, a small island of the Sulu archipelago, in N lat. $6^{\circ} 15'$, and E long. $120^{\circ} 55'$.

TEOPIXCA, a town of Mexico, in the prov. of

Chiapa, 21 m. SE of Ciudad-Real. It is inhabited by Indians, who are noted for their horsemanship.

TEORA, a town of Naples, in the prov. of the Principato-Ultra, district and 7 m. SSE of San Angelo-de-Lombardi, on a hill, between the Ofanto and Sele. Pop. 3,300. It has a palace remarkable for an ancient round tower.

TEOTITMACON, a village of Mexico, in the state and 27 m. NE of Mexico, near a small river of the same name, which throws itself into lake Texcoco. Pop. 1,000. It has a Franciscan convent. Between this place and San-Bartolomeo are the remains of two ancient pyramids, erected by the Aztecs, and dedicated to the sun and moon.

TEPAN-GUATIMALA, a town of Guatemala, in the state of that name, dep. of Sacatepec and Chimaltenango, and district of Xilotepeque. Pop. 4,958. It was formerly, as its name denotes, the residence of the kings of Guatemala.

TEPEACA, a town of Mexico, in the dep. and 15 m. SE of La Puebla, on a river which winds around it. Pop. 3,000. It is regularly built, and adorned with gardens and terraces. Its public square is spacious, and in its centre is a fort, into which it is said Cortez retired after his retreat from Mexico. In the outskirts is a Franciscan convent, and on the opposite side a fine church. It has manufactories of woollen fabrics, which, with corn and flour, form its chief articles of trade. This town formerly bore the name of Segura-de-la Frontera.

TEPELEN, or **TEPELIN**, a town of Turkey in Europe, in Albania, in the sanj. and 33 m. ESE of Valona, in a valley enclosed by sterile mountains, on the l. bank of the Voioussa. Pop. 2,000. It has a fortress.

TEPEXE, a town of Mexico, in the dep. and 45 m. S of La Puebla. Pop. 2,000.

TEPIC, a town of Mexico, in the state of Xalisco, 134 m. WNW of Guadalajara, and near the l. bank of the Rio Grande or Tololotlan, in N lat. $21^{\circ} 36'$, and W long. $104^{\circ} 45'$. Pop. 10,000. Next to Guadalajara, this town is the largest in the state. It is built with uniformity, and has terraced gardens, fine promenades, a Franciscan convent, and a small theatre. It is the residence during the rainy season of the merchants connected with the unhealthy port of San Blas.

TEPININSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, 78 m. E of Pavlovsk, on the Khoper.

TEPITITAN, a town of the Mexico state of Tabasco, situated on the l. bank of a river of the same name, about 40 leagues above Frontera. Pop. 1,000. Rum is largely distilled here.—The T. river is the upper part of the Chilapa, and is nearly 100 fath. wide opposite the town.

TEPL, **TEPLA**, **TEPEL**, or **TOPEL**, a town of Bohemia, in the circle and 31 m. NW of Pilsen, on a small river of the same name, which after a course in a generally E and N direction of about 86 m. joins the Eger, on the r. bank, 5 m. NE of Elnbogen. Pop. 1,734. It is noted for its abbey; and has manufactories of linen and woollen fabrics, and a considerable trade in corn. In the vicinity are several forges, quarries of millstone and serpentine, and mineral springs, of which the most celebrated are those of Marienbad.

TEPLICA (**KUNOWA**). See **TEPLITZ**.

TEPLICE. See **TOPLITZ**.

TEPLICKA. See **TEPLITZSCHA**.

TEPLICZ, or **TEPLICE**, a village of Hungary, in the comitat and 6 m. ENE of Trentain, in a valley, on the Tepliczka, a small affluent of the Vag.

TEPLIK, a town of Russia in Europe, in the gov. of Podolia, district and 26 m. SE of Gaisin.

TEPLITZSCHA, **TEPLICZ** (**Kis**), or **TEPLICKA**, a

27 63

Digitized by Google

village of Hungary, in the comitat of Lyptau, 20 m. SW of Kaysmark, at the foot of Mount Königsberg.

TEPLITZ. See TOPLITZ.

TEPLITZ, KUN-TAPOLCZA, or KUNOWA-TEPLICA, a village of Hungary, in the comitat and 12 m. NNE of Górnó, on the r. bank of the Csetnek, a small affluent of the Sajó. It has warm baths.

TEPLOVKA, a town of Russia in Europe, in the gov. and 129 m. NW of Poltova, and district of Piatin.

TEPOSOLULA, a town of Mexico, in the state and 60 m. NW of Oaxaca. Pop. 4,405. It has several parish churches, and a fine convent. It possesses manufactories of linen. Cochineal is found in large quantities in the environs.

TEPTIARIS, a people of Russia in Europe, in the gov. of Orenburg, who inhabit the territory of the Bashkirs, at the E base of the Ural mountains. They number upwards of 35,000, who pay in common with the Russian peasantry a capitation tax, in addition to delivering 800,000 pounds of salt, which they are required to convey from the Ilek to the banks of the Belais, whence it is embarked, and to an annual contingent of 400 pioneers for the maintenance of the Orenburg line of fortifications. They are courageous hunters, good labourers, and have adopted from the Bashkirs their excellent method of raising bees. In manners and customs they are similar to that people, but more deficient in cleanliness. They are chiefly Mahomedans, but have introduced into their worship some pagan usages adopted from the Finns. The name of this people signifies, in the Tartar language, a man who is not in a condition to pay the capitation. At the period of the destruction of the kingdom of Kazan, by the Czar Ivan Vasilievich, a great number of Tartars, Tcheremisses, and Tshuvashes, fearing to be forced to adopt the religion of their conquerors, found refuge among the Bashkirs, and thus formed a race remarkable for the admixture of idiom religion and usages still preserved amongst them.

TEQUAMENON, a river of Michigan, U. S., which flows in an E by N course, into a bay of the same name, near the outlet of Lake Superior.

TEQUENDAMA (SAUT DE), a cataract of New Grenada, in the prov. of Bogota, a little to the W of Santa-Fe-de-Bogota. It is formed by the Bogota, which after collecting its waters in the valley of the same name, precipitates itself through a rocky chasm, 650 Parisian ft. in height.

TEQUILA, a town of New Grenada, in the dep. of Boyaca, 120 m. NNE of Tunja.

TEQUILA, a town of Mexico, in the state of Jalisco, 18 m. W of Guadalajara, near the l. bank of the Rio Grande.

TER, a river of Spain, which descends from the S side of the Pyrenees, on the confines of the French dep. of the Pyrenees Orientales, and at the NW extremity of the prov. of Gerona. It flows first S, past Camprodon; enters the prov. of Barcelona; bends abruptly ENE, returns into that of Gerona; passes the town of that name, and a little below Torroella-de-Mongri, and 30 m. E of Gerona, throws itself into the Mediterranean, opposite the Medas islands, and after a course of about 102 m. Except when flooded, it is fordable throughout almost its entire course. A large portion of its waters is employed in irrigation. This river is the *Alba* of the Romans.

TERA, a river of Spain, in the prov. of Zamora. It issues from the E extremity of Lake San-Martin-de-Castaneda; flows ESE, passing near Sanabria; and after a course of 63 m., joins the Esla, on the r. bank, 6 m. SSW of Benavento. In summer it is fordable throughout its entire course.—The lake S. Martin-de-Castaneda, formed amid the Sierra Segundera by several mountain streams, has a circumference of 6,900 yds. Its waters are clear, and abound with excellent trout.

TERABINS, a tribe of Bedouin Arabs, in Egypt. They are governed by a sheik, and number about 150 foot-soldiers.

TERAMO, a district, canton, and town of Naples, in the prov. of Abruzzo-Ultra. The district comprises 10 cants. The town is 15 m. SSE of Ascoli,

on a plateau, at an alt. of 900 ft. above sea-level, and near the confluence of the Tordino and Vezzola. Pop. 9,500. It is about 4 m. in circumf., and has several long, spacious, and well-paved streets, and some fine edifices of medieval architecture. The cathedral is a handsome building. It has numerous convents, an orphan's and two other asylums, a seminary, and a provincial college. With the exception of the manufacture of hats, and of cream of tartar, this town possesses no branches of industrial employment. It was the *Interannia* or *Interrana-Præcutia* of the Romans, and contains the ruins of several ancient edifices.

TERAPEA. See TARAPIA.

TERBORGH, a village of Holland, in the prov. of Guelderland, 18 m. SE of Zutphen. Pop. 600.

TERCEIRA, an island near the coast of Africa, forming the central one of the group of the Azores. In consequence of its central situation, and of the safety of the roadstead at Angra, it has been made the seat of government. Its E extremity is in N lat. 38° 46'. It is about 54 m. in circumf., and is surrounded with steep cliffs, which render it inaccessible, except at a few points which are strongly fortified. The interior, which rises by gentle slopes towards a mountainous centre, is agreeable: the summits of the mountains consisting, for the most part, of beautiful and fertile plains, and being destitute of those craters and conical points which, in St. Michael's and the other islands of the group, visibly mark the operation of volcanic agency. Though abundantly supplied with fine water, it contains no boiling or mineral springs. Vines are cultivated, but the wine—of which about 4,000 pipes are annually produced—is by no means excellent. Oranges and lemons are largely exported; and almost every European and tropical plant may be grown. Agriculture and pasturage are the chief employments, and are carried on with great success; wheat, Indian corn, yams, pulse, and French beans, are raised to such an extent as to afford a surplus for the market of Lisbon. The yearly produce of Indian corn, wheat, and barley, is about 720,000 bushels. The pop. is about 40,000, and is reckoned superior in civilization to those of the other islands; the police is also better enforced, and the manners of Lisbon generally prevail.—The only places of consequence in the island are Angra, Praya, San-Salastio, and New Town. Fine roads lead to every part of the island.

TERCEIRAS. See AZORES.

TERCERO, a river of the La Plata confederation, which rises in the mountains to the SW of the city of Cordova; runs E, collecting the waters of a smaller river called the Saladillo, and enters the river Parana just above the town of Rosario, and 78 m. S of Santa-Fe, after a course of 300 m. It is navigable for barges as high as the pass of Ferreira, about 80 m. below Cordova.

TERCHIZ, a town of Persia, in Khorasan, 90 m. SW of Meshid.

TERDOPPIO, a river of Italy, which rises near the S extremity of Lago-Maggiore, and falls into the Po, 12 m. ESE of Lumello, after a course of 50 m.

TEREBES, or TREBISOW, a town of Hungary, in the com. of Zemplin, 22 m. ESE of Kaschau, on the river Bodrog. Pop. 2,900.—Also a village in the com. of Ugocz, on the river Thur.

TEREBOLI. See TRIPOLI.

TEREK, a river of Asiatic Russia, in the gov. of Caucasus, which rises amid the snow-covered heights of the Kasbek, in the loftiest part of the Caucasian chain, and descending in a rapid course and northerly direction, to the plain, turns eastward, passes Mosdok, flows along the foot of the

mountains in a NE direction, and after passing Kizliar, divides into three branches, and falls into the Caspian. Its banks in the upper part of its course are adorned with fine forests of oak, while the lower produce vines, mulberries, and other fruit trees. It has a total course of 300 m. Its principal affluents are the Suja, Aksai, Baksu, and Malka.

TERENA, a town of Portugal, in the prov. of Alentejo, 26 m. SW of Elvas.

TERERY, a river of Brazil, in the prov. of Mato-Grosso, which descends from the Sierra Amambay, and runs W to the Paraguay, which it joins on the l. bank, after a course of 90 m.

TERESA, a town of Spain, in the prov. of San-Felipe, 10 m. W by N of Segorbe. Pop. 1,800.

TERESA (SANTA), a town of New Granada, at the conflux of the Meta and Orinoco, 300 m. E of Santa-Fe-de-Bogota.—Also a town of New Mexico, in the prov. of Cinaloa, 95 m. NE of Cinaloa.—It is also the name of several other inconsiderable settlements in South America.

TERESHKA, a river of Russia, which rises 20 m. SE of Kusnetz, in the gov. of Saratof; flows ESE, and then turns SW, and joins the Volga, 27 m. NE of Saratof.

TERESPOL, a town of Poland, 8 m. SSW of Brzesc, and 103 m. E by S of Warsaw, on the l. bank of the Bug. Pop. 1,000, chiefly the descendants of German settlers.

TERETTE, a town of Naples, in the prov. of Terra-de-Lavoro, 15 m. SE of Sora, on a lofty mountain. Pop. 1,800.

TERFUA, a village of Tunis, 120 m. S of Tunis.

TERFUI, a watering place in the desert of Nubia, 150 m. S of Syene.

TERGIL, a village of Diyarbekir, in Asiatic Turkey, 70 m. NNE of Diyarbekir.

TERGLU, one of the highest mountains of the Julian Alps, in the NW of Carniola. It has an alt. of 10,855 ft. above sea-level, and is covered with continual snow on its N side.

TERGOVISTE, or TERGOWITZ, a town of Wallachia, in the district of Zara-de-Suss, on the river Jalomnita, 64 m. SE of Hermanstadt. It has several churches, two convents, a number of large but ruinous houses, and a pop. of 5,000.

TERHEYDEN, a town of Holland, in the prov. of N. Brabant, 3 m. N of Breda.

TERI, a town of Beluchistan, in N lat. 29° 51', 70 m. N of Shawal.

TERIM, a village of Arabia, in the prov. of Hadramaut, 230 m. E of Sanaa.

TERKAT, a village of Asiatic Turkey, in the pash. of Sivas, 20 m. NW of Tokat.

TERKI, a fortress of Russia, at the mouth of the Tumenka, which forms one of the branches by which the Staroi-Terek falls into the Caspian. The place bearing this name was formerly of importance; but after the Persian conquests, it ceased to be a frontier-town, and was razed at the peace of 1736. The present fort was afterwards built on a different spot.

TERKUL, a river of Asiatic Russia, which falls into the Ural at Uralak.

TERLING, a parish of Essex, 8½ m. W of Witham. Area 3,205 acres. Pop. in 1851, 900.

TERLIZZI, a town of Naples, in the prov. of Bari, on the high road leading from Bari on the coast, across the Ofanto, 18 m. W of Trani. Pop. 9,000.

TERMIGNON, or THERMIGNON, a town of Savoy, in the district of Maurienne, near the river Arc, 12 m. ENE of St. André. Pop. 1,100. It has iron forges, and a manufacture of anchors.

TERMINATION ISLAND, an island in the S.

Pacific, so named by Vancouver, as being the termination of his researches on the SW coast of New Holland, near which it lies, in S lat. 34° 32'.

TERMINI, a considerable port on the N coast of Sicily, in the Val-di-Mazzara, situated at the mouth of the river Termini, on a rocky eminence, 23 m. ESE of Palermo, with a well cultivated and productive country in its vicinity. It is surrounded by a wall, and has, on the side of the sea, an old but strong castle. The inhabitants, amounting to about 8,500, are employed partly in trade, partly in an active fishery which supplies the market of Palermo. The port is good, and corn, olive oil, and other products are pretty largely exported from it. It has long been celebrated for its hot saline springs, the *Therma Himerenses* of antiquity, which are still much frequented by visitors from Palermo.—The river rises 6 m. NNE of Bivona; flows NNE through the Val-di-Mazzara; and enters the sea a little to the NW of the above port, after a course of 50 m.

TERMINIER, a village of France, in the dep. of Eure-et-Loir, cant. and 5 m. SSE of Orgeres. Pop. 950.

TERMINILLO (MONTE), a mountain of Naples, in Abruzzo-Ultra 2da, 7 m. NNE of Civita-Ducale, having an alt. of 2,143 metres = 7,030 ft. above sea-level.

TERMINOS (LAGUNA-DE), a large inlet of the gulf of Mexico, on the coast of Tabasco and Yucatan, intersected by the parallel of 18° 30', and the meridian of 93° 30', and separated from the sea chiefly by the Isla-del-Carmen. The Rio-Palisado flows into its SW extremity.

TERMOLI, a town of Naples, in the prov. of Sarmio, on the Adriatic, 40 m. SE of Ortona. Pop. 2,000.

TERMONAMUNGAN, a parish in co. Tyrone, 3½ m. SW of Castle-Derg. Area 45,399 acres. Pop. in 1831, 7,253; in 1841, 7,561. It forms the extremity of the W wing of the county, and is pre-eminently wild, rocky, heathy, sterile, and repulsive; diversified principally by the glen of the river Derg.

TERMONCARRA, a village in the p. of Kilmore-Erris, co. Mayo, 5 fur. N of the marine inlet of Portnafranka. Pop. in 1841, 192.

TERMONREENY, a parish in co. Londonderry, 2 m. SE of Maghera. Area 4,773 acres. Pop. 2,539.

TERMONFECKAN, or TORFECKAN, a parish on the coast of co. Louth, containing the villages of Termonfeckan and Baltray. Area 6,382 acres. Pop. in 1831, 4,784; in 1841, 3,344.—The village stands on the Termonfeckan rivulet, 2 m. SSW of Clogher. Pop. in 1831, 470; in 1841, 412.

TERMONMAGUIRK, a parish in co. Tyrone, 4½ m. W of Pomeroy, containing the villages of Six-mile-cross and Termonrock. Area 41,078 acres. Pop. in 1831, 10,307; in 1841, 12,098. About one-third of the area is arable land; about 2,000 acres are reclaimable upland; all the remainder is either deep bog or sheer mountain, partly pastoral but chiefly waste.

TERMONROCK, a village in the p. of Termonmaguirk, co. Tyrone, 3½ m. NE of Six-mile-cross. Pop. in 1841, 118.

TERMONDE. See DENDERMONDE.

TERNA, a small town of Austrian Italy, in the delegation of Como, which gives name to a small lake in the neighbourhood, 30 m. NW of Milan.

TERNANT, a village of France, in the dep. of Rhone, cant. and 3 m. NW of Bois-d'Oingt, on the r. bank of the Oyngue. Pop. 600.

TERNATE, the northernmost of a chain of islands off the W coast of Gilolo, in the Indian archipelago, in N lat. 0° 48', E long. 127° 18', and for

merly the seat of sovereignty over all the adjacent Molucca islands. On the expulsion of the Portuguese from the Molucca isles by the Dutch, in 1607, the princes of T. dwindled away into a state of political insignificance and dependence; the king of T., however, is still the most powerful of the Molucca princes, possessing the N part of Gilolo, with the Bacchan group and part of Papua, whence he receives a tribute of gold, amber, and birds of paradise. T. is of small extent, being only about 10 m. in diam.; but it contains a peak 5,480 ft. in alt., which sometimes discharges flames. At present it produces only a little rice, tobacco, and cotton: though the trade it formerly carried on with New Guinea and the Chinese was very considerable.

TERNAY, a village of France, in the dep. of Isère, cant. and 3 m. SW of Saint-Symphorien-d'Ozon, on the l. bank of the Rhone. Pop. 1,200.

TERNERA, a settlement of New Granada, in the prov. of Carthagena, 6 m. N of Carthagena.

TERNES (Les), a village of France, in the dep. of Cantal, cant. and 5 m. WSW of St. Flour.

TERNEUSE, a town of Holland, in the prov. of Zealand, on the banks of the Hondt or Western Scheldt, 12 m. SE of Flushing.

TERNI, a town of the States of the Church, situated in a valley, between two branches of the river Nera, in the deleg. and 12 m. SSW of Spoleto. Its pop. is about 9,000; and it has a cathedral and several churches, but no other public building of consequence. It is, however, a place of considerable trade, and has large woollen and cotton factories. The cascades of the Velino, called the *Caduta-della-Marmora*, about 4 m. E of T., are considered among the finest in the world. They consist of several streams, which, after running with great impetuosity, precipitate themselves from the brink of a rock into the Nera. "Imagine," says Shelley, "a river 60 ft. in breadth, with a vast volume of waters, the outlet of a great lake among the higher mountains, falling 300 ft. into a sightless gulf of snow-white vapour, which bursts up for ever and for ever from a circle of black crags, and thence leaping downwards, make five or six other cataracts, each 50 or 100 ft. high, which exhibit, on a smaller scale, and with beautiful and sublime variety, the same appearances. But words (and far less could painting) will not express it. Stand upon the brink of the platform of cliff, which is directly opposite. You see the ever-moving water stream down. It comes in thick and tawny folds, flaking off like solid snow gliding down a mountain. It does not seem hollow within, but without it is unequal, like the folding of linen thrown carelessly down; your eye follows it, and it is lost below; not in the black rocks which gird it around, but in its own foam and spray, in the cloud-like vapours boiling up from below, which is not like rain, nor mist, nor spray, nor foam, but water, in a shape wholly unlike anything I ever saw before. It is as white as snow, but thick and impenetrable to the eye. The very imagination is bewildered in it. A thunder comes up from the abyss wonderful to hear; for, though it ever sounds, it is never the same, but modulated by the changing motion, rises and falls intermittingly. The surrounding scenery is, in its kind, the loveliest and most sublime that can be conceived."

TERNOE, a small island in the Baltic, off the coast of Blekingen, in Sweden, near Carlshafen.

TERNOISE, a river of France, in the dep. of Pas-de-Calais, which joins the Canche at Hesdin, after a course of 22 m.

TERNOVA, or **TRINOVA**, an inland town of European Turkey, in Bulgaria, in the sanj. and 52 m. SSW of Rustchuk, on the Jantra. It was formerly

into comparative decay, though its pop. is estimated at 12,000. It lies in a gorge of the Balkan in an extremely picturesque site, the houses rising above one another, in the form of an amphitheatre, from the edge of the river.

TERRA-AUSTRALIS, the ancient name of New Holland, revived by Flinders, who applies it to the strongly fortified, and was the residence of the prince or governor of the country, but is now fallen whole continent, in contradistinction to the names New Holland and New South Wales, which he applies to different divisions of that extensive island.

TERRA-AUSTRALIS-DEL-ESPIRITU SANTO. See **ESPIRITU-SANTO**.

TERRACINA, a town of the States-of-the-Church, situated at the SE extremity of the Pontine marshes, 25 m. SSW of Frosinone. It stands partly on the declivity of a rugged eminence, partly on low ground adjoining the shore, in a picturesque situation. Pop. 5,000. It was anciently a town of note, but is indebted to Pius VI. for its modern improvements. In the prosecution of his grand object, the draining of the Pontine marshes, that pontiff caused an elegant mansion to be erected at T., where he resided during spring and autumn to urge on his works. The cathedral is a dark and gloomy pile, and most of the buildings have a decayed appearance. The ancient castle of Theodorici is in ruins, but holds a commanding situation on the summit of a lofty rock. Traces are still visible of the ancient port of Antoninus Pius, and ruins of the ancient *Ancur* cover a neighbouring eminence.

TERRA-DEL-FUEGO. See **TIERRA-DEL-FUEGO**.

TERRA-DE-LAVORO. See **LAVORO**.

TERRA-FIRMA, a name applied by our older navigators to that portion of South America which comprehends the provinces of Darien, Veragua, and Ystmo or Terra-Firma proper.

TERRANEH, or **TERANEH**, a town of Lower Egypt, in the prov. of Bahaireh, on the l. bank of the principal western branch of the Nile, 6 m. WSW of Menouf, and 36 m. NW of Cairo. It is a small, scantily peopled, earth-built town, its importance being chiefly derived from the natron lakes, 40 m. to the W, for the transit of the produce of which caravans arrive here annually at the commencement of winter. In the vicinity are the ruins of the ancient *Terimuthis*.

TERRANOVA, a town of Naples, in the prov. of Basilicata, district and 33 m. ESE of Lagonegro, and cant. of Noja, at the foot of a mountain, near the l. bank of the Sermento. Pop. 1,100. It has a convent.—Also a town of the prov. of Calabria-Citra, district and 14 m. SSE of Castrovillari, near the l. bank of the Crati, in a plain. Pop. 2,180. It has two parish churches, and four convents.—Also a town of Calabria-Ultra, district and 11 m. ESE of Palmi, and cant. of Casalnuovo, in a salubrious plain. Pop. 450. It has two churches. This town, founded in the 9th century, was one of the finest in the prov. previous to the earthquake of 1783, by which a great portion of it was overthrown.—Also a village of Sardinia, in the div. of Capo-Sassari, prov. and district and 25 m. E of Tempio, at the head of a gulf of the same name, in an unhealthy plain. Pop. 1,600. It has a fine old cathedral. The port, wanting in depth, and consequently practicable by light vessels only, is sheltered from all winds, and has a considerable trade in corn and cattle. In the vicinity are several salt-works. The adjacent coast is uninhabited, but has some good roadsteads by which an active contraband traffic is carried on. T. was originally a Roman colony named *Olbia*. It became a town of some importance about the time of St. Gregory, and then bore the name of *Pausa-*

nias. After its destruction it retained the appellation of Civita.—Also a town of Sicily, capital of a district, in the prov. and 35 m. SSE of Caltanissetta, at the extremity of a desert shore, and near the entrance of a river of the same name into the Mediterranean. Pop. 9,200. It has a fortress, several fine churches, numerous convents, and an hospital. The port is good, and during summer the bay affords excellent anchorage. The trade consists chiefly in corn, wine, fruit, sulphur, and soda. This town was founded towards the end of the 13th century by Frederick of Aragon. The district comprises 4 cantons.

TERRANOVA-FOSSACECA, a town of Naples, in the prov. of the Principato-Ultra, district and 9 m. NNW of Avellino, and cant. of Altavilla, in a pleasant and fertile locality. Pop. 1,120. It has three churches, and an alms-house.

TERRA-NUOVA, a town of Tuscany, in the prov. and 31 m. SE of Florence, and vicariat of S. Giovanni-in-Valdarno, on the slope of a hill, near the r. bank of the Bregna or Ciaffenna, near its junction with the Arno. Pop. in 1846, 6,472. It is enclosed by walls.

TERRA-PILATE, a plain of Sicily, in the prov. and a little to the E of Caltanissetta. It has an area of 73,000 sq. yds. The soil consists of whitish clay, and is covered with the carbonate of lime, and a variety of other substances. In its centre are several boiling springs and jets-d'eau, the latter of which are attended with a loud report.

TERRAQUE, a commune of Belgium, in the prov. of Hainault, and dep. of Wannebecq. Pop. 136.

TERRASSE (La), a commune of France, in the dep. of the Isere, and cant. of Le Touvet, 15 m. NE of Grenoble. Pop. 1,287.—Also a hamlet in the dep. of the Haute-Loire, cant. and 5 m. SSE of Puy, and com. of Coubon. In an adjacent mountain are several curious grottoes.

TERRASSON, a canton, commune, and town of France, in the dep. of the Dordogne, and arrond. of Sarlat. The cant. comprises 17 com. Pop. in 1831, 14,607; in 1846, 15,050.—The town is 18 m. NNE of Sarlat, on the l. bank of the Vezere. Pop. in 1846, 3,137. It has several tanneries, tile and brick-kilns, and extensive quarries of freestone, containing carbonated copper. The coal basin of T. extending into the dep. of the Correze, covers an area of 2,355 hect., and yields an annual produce of

TERRAUBE, a commune and town of France, in the dep. of the Aube, cant. and 4 m. SW of Lectoure, on a mountain. Pop. 1,138.

TERRAZOS, a village of Spain, in the prov. and 24 m. NE of Burgos, and partido of Briviesca.

TERRE (Sainte), a village of France, in the dep. of the Gironde, cant. and 4 m. WSW of Castillon, and near the r. bank of the Dordogne. Pop. 2,040.

TERRE-BONNE, a parish in the 8 part of the state of Louisiana, comprising an area of 1,850 sq. m., bounded on the S by the gulf of Mexico, and drained by Terre-Bonne, Petite, and Grand-Bayou-Cailloux, and Bayou-de-Large rivers. It has a low and level surface, and is to a great extent unfit for cultivation. Its principal productions are sugar, cotton, rice, and Indian corn. Pop. in 1840, 4,410; in 1850, 7,724. Its capital is Houma.

TERRE-COUPER, a village of St. Joseph co., in the state of Indiana, U. S., 135 m. N by W of Indianapolis, and intersected by the Michigan Southern and Northern Indiana railroad.

TERREGLES, a parish of Kirkcudbrightshire, stretching along the Nith, to the W of Dumfries. Area 8 sq. m. Pop. in 1841, 564; in 1851, 566.

TERRE-HAUTE, a town of Vigo co., in the state of Indiana, U. S., on the l. bank of the Wabash

river, 73 m. W of Indianapolis. This is one of the most important places in the state, being situated on the Wabash and Erie canal, and at the point of junction of the Terre-Haute and Richmond, the Atlantic and Mississippi, the Terre-Haute and Alton, and Evansville and Illinois railroads. Pop. in 1840, 2,000; in 1850, 4,900.

TERRE-NAPOLEON, the name given to a tract of coast on the S shore of Australia, comprised between the parallels of 37° 36' and 35° 40', and the meridians of 138° 58' and 140° 10' E, first explored by the French navigator, Baudin.

TERRENEGRE, a fortress of France, in the dep. of the Charente-Inferieure, cant. and 3 m. WNW of Royan, and com. of St. Palais.

TERRESSA, an island of the Nicobar archipelago, in the gulf of Bengal, to the NW of Camorta, in N lat. 8° 20', and E long. 93° 36'. It lies in a SE direction, rises to a considerable height, and is covered with wood. It is scantily inhabited.

TERRIA, or **TELLIA-GURRY**, a village of Hindostan, situated in N lat. 25° 15', in the pass which divides the provinces of Bengal and Bahar, formed by a range of hills, approaching very near the Ganges.

TERRIBLE (Mont), a chain of mountains in what was once the bishopric of Bale, but is now part of the Swiss canton of Bern, which brings the Jura mountains into connection with the Vosges. It gave name for some years to a dep. of France, consisting of the bishopric of Bale, small portions of Switzerland, and the county of Montbelliard.

TERRICCIOLA, a town of Tuscany, 18 m. SE of Pisa, in the Val-d'Era. Pop. 3,000.

TERRIER-ROUGE (Le), a town of the island of Havti, 7 m. SW of Fort-Liberte.

TERRINCHES, a village of Spain, in the prov. and 52 m. SE of Ciudad-Real. Pop. 850.

TERRINGTON, a parish in the N. R. of Yorkshire, 8 m. W by S of New Malton. Area 3,630 acres. Pop. 753.

TERRINGTON (St. CLEMENT's), a parish of Norfolk, 5 m. W by N of Lynn-Regis. Area 34,236 acres. Pop. in 1831, 1,466; in 1851, 2,250.

TERRINGTON (St. JOHN's), a parish in the above county, adjoining T. St. Clements, and included in its area. Pop. in 1851, 784.

TERRIORE, a town and fortress of Hindostan, in the Carnatic, in N lat. 11° 12'.

TERROIG, or **ATERICK**, a lake on the mutual border of cos. Galway and Clare, among the Slieve-Baughta mountains, 6 m. N of Scariff. It has a surface-elevation above sea-level of 450 ft., measures about 1½ m. in length, and sends off its superfluous waters in a head-stream of the Scariff river.

TERROWEH, a town and fortress of Hindostan, in the prov. of Allahabad, district of Bundelcund, 60 m. WNW of Allahabad.

TERRYGLASS, a parish in co. Tipperary, 4½ m. NW of Borris-o'-kane. Area 9,761 acres. Pop. in 1831, 2,573; in 1841, 2,953.

TERSA, a river of Russia, which rises 18 m. ESE of Balachev, in the gov. of Saratov, which joins the Medveditzka, after a winding but prevailing SE course of 130 m.

TERSATZ, a town and fort of Bosnia, 30 m. W of Novi, on the r. bank of the Korana.

TERSCHELLING. See **SCHELLING**.

TERSDORF, a village of the archd. of Austria, 10 m. NNE of Neustadt, on the l. bank of the Triesting.

TERSFENIK, a town of Serbia, in the sanj. and 19 m. W of Kirschovatz, near the Western Morava.

TERTENTIA, a village of Sardinia, in the prov. and 15 m. SSE of Lanusei.

TERTZENA, or **TREZNA**, a town of Greece, in the Morea, 12 m. N of Dimiczana.

TERUEL, a province of Spain, in the S of Aragón; bounded on the N by the provs. of Saragossa and Huesca; on the E and S by Tarragona, Castilian-de-la-Plana, and Valencia; and on the W by Cuenca and Guadalajara. Area 2,363 geog. sq. m. It is traversed by a chain of mountains which give rise to the Guadalaviar, the Guadaloque, and the Xiloco. Pop. in 1849, 250,000.—The cap. of the same name is situated at the confluence of the rivers Guadalaviar and Alhambra, 13 m. ESE of Albarracín. It stands on a hill, and is defended by a citadel. It is a gloomy ill-built place, with narrow streets, but contains a number of churches and convents, and a theatre. The environs are fertile. This town was destroyed by the Moors, and after being a long time deserted, was rebuilt by Alfonso II. in 1171.

TERVAY, a village of France, in the dep. of Jura, cant. and 4 m. NE of Montmiry-le-Château.

TERVERE, or **VKEER**, a town of Holland, in the prov. of Zeland, 4 m. NE of Middleburg, on the N coast of the island of Walcheren. Pop. 1,300.

TERVES, a village of France, in the dep. of Deux-Sèvres, cant. and 3 m. SSW of Bressuire.

TERVISO, a small town of Austrian Illyria, 8 m. W of Mitterburg.

TERVUREN, a town of Belgium, in the prov. of S. Brabant, 6 m. ESE of Brussels, with a fine château. Pop. 1,300.

TERWICH, a parish of Sussex, near Midhurst. Area 718 acres. Pop. in 1851, 97.

TERWOLDE, a village of Holland, in the prov. of Guelderland, 20 m. NNE of Arnheim.

TERZA (La), a town of Naples, in the Terra-d'Otranto, 25 m. W of Taranto.

TESCHEN, a circle of Austrian Silesia, comprehending the eastern part of that province, and separated from Prussia by the Oder and the Vistula. It has an area of 740 sq. m. It is hilly on the S side, where the Carpathian chain commences; but the N is flat and marshy. The inhabitants are mostly of Slavonian origin. The greater part of this circle is formed of the ancient duchy of Teschen, which belonged to the emperors in their quality of kings of Bohemia.—Its cap. of the same name is situated on the r. bank of the river Olza, 62 m. ENE of Olmutz. It has one Lutheran and several Catholic churches, a gymnasium, a high school, two convents, and two ducal castles. Pop. 6,400. It has manufactures on a small scale of broad cloth, kerseymeres, leather, and muskets; also a considerable traffic in leather, wool, cloth, wine from Hungary, honey, and wax. The dispute about the succession to the electorate of Bavaria was terminated by a treaty concluded here in 1779.—Also a town of Bohemia, 59 m. SSE of Prague, and 14 m. SE of Tabor. Pop. 800. In the vicinity are hot springs.

TESCOU, a river of France, in the dep. of Tarn, which joins the Tarn, on the l. bank, after a W and NW course of 30 m.

TESCUCO. See **TESCUCO**.

TESEDELIT, a village of Morocco, situated on a lofty rock, supposed to be impregnable, 20 m. S of Mogador.

TESENI, a village of Asiatic Turkey, 34 m. SE of Dognizli, in a valley in the Taurian chain.

TESORO, a small island near the coast of South America, in N lat. 10° 8'.

TESSAN, a town of Bosnia, in the sanj. and 38 m. NNE of Trawnik, near the r. bank of the Usora.

TESSARAGH, **TISRARA**, or **TAUGHERARA**, a parish

of co. Roscommon, 2 m. SSW of Athleague. Area 8,482 acres. Pop. in 1831, 3,492; in 1841, 3,856.

TESSAURAN, **TISRAN**, or **KILGALLY**, a parish in King's co., 2½ m. NW by W of Cloghan. Area 7,316 acres. Pop. in 1831, 2,032; in 1841, 2,029.

TESSENDERLOO, a village of Belgian Limburg, 15 m. NW of Hasselt.

TESSERMUIT, an island near the SW coast of East Greenland, in N lat. 59° 59'.

TESSIN. See **TICINO**.

TESSIN, a walled town of Mecklenburg-Schwerin, on the Recknitz, 21 m. NNE of Gustrow. Pop. 2,200. Its chief manufactures are linen and nails.

TESSIURSAK, an island near the W coast of W. Greenland, in N lat. 61° 10'.

TESSON, a village of France, in the dep. of Charente-Inferieure, cant. and 4 m. NNE of Gemozac. Pop. 700.

TESSOWA, a considerable town of Fezzan, 100 m. ESE of Murzuk.

TESSY, a town of France, dep. of La Manche, 12 m. S of St. Lo.

TESTACCIO, a town of the Neapolitan island of Ischia, 3 m. SW of Ischia. Pop. 1,200.

TESTERTON, a parish of Norfolk, 2½ m. SE by S of Fakenham. Area 613 acres. Pop. in 1851, 13.

TESTIGOS (Los), a cluster of small islands off the coast of Venezuela, 40 m. NW of Cape Mala-Pascua. They are 7 in number, besides several rocks. The principal island is 2½ m. in length.

TESTON, a parish of Kent, 4 m. W by S of Maidstone. Area 491 acres. Pop. in 1851, 268.

TET, a river of France, which rises in the Pic-de-Prique, in the Pyrenees; runs SE, and then ENE, passing Perpignan; and 8 m. below the latter town, enters the Mediterranean, after a course of 60 m.

TETBURY, a parish and town of Gloucestershire, 17 m. SSE of Gloucester. Area of p. 4,582 acres. Pop. in 1841, 2,982; in 1851, 3,325.—The town, pleasantly situated on a rising ground, near the source of the river Avon, consists of four principal streets meeting in the centre. T. has manufactures of woollen cloth, and is a considerable thoroughfare, the direct road from Bath and Bristol to Cirencester passing through the town, as also the road from Gloucester and Stroud to Bath, Devizes, Salisbury, and Southampton.

TETCOTT, a parish of Devonshire, 5 m. S by W of Holsworthy. Area 2,181 acres. Pop. 289.

TETE, a town of Mozambique, 110 m. NW of Senna, on the Zambese river. The surrounding territory is highly fertile, and the town itself is comparatively healthy, being built on an elevated site, with the river flowing beneath it. Boats ascending from Senna usually employ 6 weeks in surmounting the rapid current of the river.

TETE-HOIRE, a pass in the Swiss cant. of Valais, leading, at an alt. of 4,000 ft., into the Val-d'Orsine.

TETE-DE-BACH (La), a village of France, in the dep. of Gironde, 32 m. WSW of Bordeaux, on the S side of the bay of Arcachon, and connected by railway with Bordeaux. It is now a place of seaside resort in summer.

TETELA, a town of Mexico, in the intendency of Puebla, 60 m. SE of Mexico.—Also a town in the intendency of Mexico, 108 m. N of Mexico.—There are several other small settlements of the same name in Spanish America.

TETENY, a town of Hungary, in the com. and 7 m. SSW of Pest.

TETEREW, a river of Russian Poland, which rises in the SW of Volhynia, and flows NE to a

junction with the Dnieper, after a course of 150 m. It is navigable to Jitomir.

TETEROA, a group of six or seven islets, not many feet above the level of the sea, lying in the S. Pacific, in 8 lat. 17° 1', 24 m. NW of Point Venus, in Tahiti. The inhabitants, originally about 3,000 in number, are chiefly employed in catching fish, which they exchange for bread-fruit.

TETEROW, a town of Germany, in Mecklenburg-Schwerin, 15 m. E of Gastrow. Pop. 3,750.

TETFORD, a parish of Lincolnshire, 6 m. NE by E of Horncastle. Area, 2,210 acres. Pop. in 1851, 799.

TETH, a village of Hungary, 14 m. SSW of Raab.

TETI. See **CHIETI**.

TETIUSCHI, a town of European Russia, in the gov. and 60 m. SSW of Kasan, on the Volga. Pop. 1,700.

TETNANG, a town of Württemberg, 19 m. E of Constanz, on the Mühlenbach. Pop. 1,200. Having been formerly one of the four towns of Suabia entitled to coin money, it was notorious for the quantity of debased pieces issued under its stamp.

TETNEY, a parish of Lincolnshire, 10½ m. N by E of Louth. Area 3,825 acres. Pop. 869.

TETON, a hamlet of Northamptonshire, 8 m. NNW of Northampton.

TETRECHENNE, a village of France, in the dep. of Moselle, cant. and 6 m. NE of Boulay. Pop. 750.

TETSCHEN, **DACHN**, or **WARTA**, a town of Bohemia, on the Elbe, 18 m. N of Leitmeritz, and 48 m. N by E of Prague. It is finely situated at the foot of a lofty sandstone ridge, on which stands an old castle.

TETSHA, a river of Asiatic Russia, which rises on the E flank of the Urals, 30 m. NW of Chebiansk, and flows ENE to a junction with the Isset, after a course of 120 m.

TETSO, a town of Hungary, in the com. of Marmaros, 40 m. N of Nagy-Banya. Pop. 1,350.

TETSWORTH, a parish of Oxfordshire, on the river Thames, 12½ m. ESE of Oxford. Area 1,172 acres. Pop. in 1851, 512.

TETTE. See **TETZ**.

TETTENHALL-REGIS, a parish of Staffordshire, 2 m. NW of Wolverhampton. Area 7,600 acres. Pop. in 1841, 3,143; in 1851, 3,396. Locks, hinges, nails, and bolts are largely manufactured here. The village, situated at the bottom and on the declivities of a lofty eminence which rises above the Smeastall rivulet, contains many good houses, chiefly occupied by genteel families and persons engaged in the trade of Wolverhampton.

TETTENS, a village of Oldenburg, 6 m. N of Jever. Pop. 200.

TETTUA-MOTU, a cape on the E coast of New Zealand, forming the NE point of Poverty bay, in 8 lat. 38° 36'.

TETUAN, a port of Morocco, in the prov. of Fes, on the Mediterranean, immediately within the straits of Gibraltar, in N lat. 35° 57', and 35 m. SE of Tangier, at the mouth of the Martil river. A branch of the Atlas, passing through the province of Todla, approaches within a few miles of the town. The environs are laid out in vineyards and gardens. The inhabitants, about 15,000 in number, consist of Moors and Jews, who, from their intercourse with Spain, almost all speak the language of that country. T. is a purely Moorish town, and is divided into two parts,—the Jews' quarter and the Moors' quarter. A strong gate separates the two quarters; and on certain occasions this gate is kept by Moorish soldiers, and the ordinary Jewish pop. is

not permitted to pass into the Moorish quarter.—The Jew's house is built in the style of the Moors, a fashion of building which always makes a dull-looking street; but in proportion as the house is cold and forbidding in its outside appearance, it is interesting and animating within. Every room opens into the *patio* or court, and it would be possible to traverse the whole of the Jewish quarter of the city on the roofs of the houses. No sooner, however, have we passed the gate and entered the great square of T. than we find a life and bustle that contrast strangely with the lifeless city out of which we have just come. Here in the *fabrics* of swords, guns, and pistols, mats, and devices in coloured woods, slippers, &c., we find abundant evidences of activity and industry. A considerable communication is maintained from this port with Gibraltar, whence ships often repair, when the wind is unfavourable for making Tangier.

TETWORTH, a parish of Huntingdonshire, 6 m. S by E of St. Neot's. Area 1,446 acres. Pop. 221.

TEUCHERN, a town of Prussia, in the prov. of Saxony, regency and 17 m. S of Merseburg, and circle of Weissenfels, on the Rippach. Pop. in 1843, 1,558. It has manufactories of pottery.

TEUDITZ, a village of Prussia, in the prov. of Saxony, regency and circle and 8 m. SE of Merseburg. Pop. 360. It has a salt work.

TEUFELSBERG, a mountain of the chain of the Bohmerwald, in Bohemia, at the SW extremity of the circle of Pilsen. It is of great height, and is crossed by the road from Pilsen into Bavaria.—Also a mountain of Russia in Europe, in the gov. of Livonia, near Laitzen. It has an alt. of 860 Parisian ft. above the level of Riga.

TEUFEN, or **TEUFFEN**, a town of Switzerland, in the cant. and 5 m. N of Appenzell, in the Ausser Rhoden. Pop. 3,867. It has a poor's house and mineral baths. It contains extensive manufactories of calico, muslin, and brocade.

TEUFENBACH, a village of Styria, in the circle and 14 m. SSW of Gräts, near Stanitz.

TEUGMO, a small island of Russia in Europe, in the gulf of Bothnia, near the W coast of Finland, in the gov. and 24 m. NNE of Wassa, in N lat. 63° 19', and E long. 21° 58'.

TEULADA, a town of Spain, in the prov. and 89 m. NE of Alicante, and partido de Denia, in a plain scantily watered, but remarkable for its fertility. Pop. 1,638. It has a parish-church, a customhouse, and a public granary, and the streets are generally spacious and substantially built of stone. Wine and silk are the chief productions of the locality.

TEULADA, a market-town of Sardinia, in the div. of Capo Cagliari, prov. and 26 m. SW of Cagliari and district of Domus-de-Maria, in the midst of mountains, on a small river of the same name, an affluent of the gulf of Teulada. Pop. 2,700. In the vicinity are found white marble and porphyry, and near the coast is a bed of magnetic iron.

TEULADA, or **TOLARO (CAPE)**, a headland of Sardinia, in the div. of Capo Cagliari, and prov. of Iglesias, in N lat. 38° 52', and E long. 18° 36'. It is the most southerly point of the island, and forms, with Cape Spartivento, 12 m. ENE the entrance to the gulf of Teulada. This gulf, which is partly in the prov. of Iglesias, and partly in that of Cagliari, is about 5 m. in depth, and encloses several considerable bays. It contains the small island of Bessa, near which is good anchorage. The traffic from this coast consists chiefly in faggots for Cagliari, Malta, and Marseilles.

TEULET. See **THILLER**.

TEUPITZ, a town of Prussia, in the prov. of Brandenburg, regency and 32 m. SE of Potsdam,

and circle of Teltow-Storkow, on the SE bank of a lake of the same name. Pop. 888. It has an ancient castle. The lake is 8 m. in length from NE to SW.

TEURTEVILLE-AU-BOCAGE, a village of France, in the dep. of the Manche, cant. and 4 m. WNW of Qualtehon, in a fine valley. Pop. 1,800.

TEURTEVILLE-HAGUE, a village of France, in the dep. of the Manche, cant. and 5 m. SW of Octeville, near the l. bank of the Diredette. Pop. 1,200.

TEUSACA, a village of New Granada, in the prov. of Bogota. It was formerly a place of considerable importance.

TEUSCHNITZ, a town of Bavaria, in the circle of Upper Franconia, and 32 m. N of Bayreuth, on a mountain. Pop. 800. It has a castle.

TEUBING. See **THEYING**.

TEUTENWINKEL, a village of the grand-duchy of Mecklenburg-Schwerin, and duchy of Mecklenburg-Gustrow. Pop. 800.

TEUTOTLAN, a town of Mexico, in the state and 60 m. ENE of Oaxaca. Pop. 1,285. Cochineal is abundant in the environs.

TEUTOBURGER-WALD, or **TRUTSCHBURGER-WALD**, a chain of hills in Germany, which extends in a NW direction through Hesse-Cassel, Rhenish Prussia, Lippe, and Hanover, from the vicinity of the source of the Lippe, to the r. bank of the Ems, near the confluence of the Hopster-Aa, a distance of about 120 m. The Ems, its affluent the Haase, and the Worre, an affluent of the Weser, are the principal streams to which it gives rise. It is covered with fine wood. These hills are noted for the defence here made by Arminius against the legions of Varus.

TEVA, a town of Spain, in the prov. and 30 m. NW of Malaga.

TEVAI, an island of the S. Pacific, in the archipelago of Santa-Cruz. It lies in a bay of the same name, on the E side of Vanikoro island. On its NE shore is a village named Vanikoro.

TEVERE. See **TIZZA**.

TEVERONE, a river of the Papal States, which has its source at the N extremity of the deleg. of Frosinone, on the confines of the kingdom of Naples, in Mount Tarino; runs first S, then NW into the comarca of Rome; passes Subiaco; turns afterwards WSW; bathes Vicovano and Tivoli, and at the latter place forms several fine cascades; and after a total course of about 66 m., falls into the Tiber on the l. bank, 3 m. N of Rome. This river, the *Anio* of the Romans, is noted in Roman history. It was here that Tarquin the elder put the Sabines to flight, that Camillus defied the Gauls, 387 B. C., and that Manlius Torquatus, in 861, attacked and killed a gigantic Gaul in single combat.

TEVERSALL, a parish of Nottinghamshire, $3\frac{1}{2}$ m. W by N of Mansfield. Area 2,820 acres. Pop. in 1831, 400; in 1851, 373.

TEVERSHAM, a parish in Cambridgeshire, $2\frac{1}{2}$ m. E of Cambridge. Area 1,200 acres. Pop. 238.

TEVERSAN, a town on the W coast of the island of Celebes, in S lat. $2^{\circ} 2'$, E long. $119^{\circ} 20'$.

TEVIOT, a beautiful river of Roxburghshire, the largest tributary of the Tweed, and a stream of so much importance as popularly to impose its name on the whole of the county in which it flows. It rises in several short head-waters in the S extremity of the parishes of Cavers and Hawick, within a $\frac{1}{2}$ m. of the sources of the Megget and the Stennis, tributaries of the Dumfries-shire and Cumberland Esk. The direction of its course for 30 m., or till it enters the parish of Eckford, is, with the exception of constant but brief distances, uniformly and almost due NE; for $\frac{1}{2}$ m. further, it is N, or N by E; and for

the last $\frac{1}{2}$ m. it is E, and nearly parallel to that of the noble river into which it falls. Its principal tributaries on its l. bank are Hilsop-burn and Borthwick-water in Hawick, and Ale-water in Ancrum; and on its r. bank, Frosty-burn in Upper Cavers, Allan-water between Upper Cavers and Hawick, Slitrig-water at the town of Hawick, Rule-water between Lower Cavers and Bedrule, Jed-water in Jedburgh, Oxnam-water in Crailing, and Kail-water in Eckford.

TEW (GREAT), a parish in Oxfordshire, $5\frac{1}{2}$ m. ENE of Chipping-Norton. Area 3,140 acres. Pop. in 1831, 616; in 1851, 541.

TEW (LITTLE), a chapelry in the above p. Area 1,600 acres. Pop. in 1831, 216; in 1851, 237.

TEWIN, a parish in Hertfordshire, $4\frac{1}{2}$ m. W by N of Hertford. Area 2,615 acres. Pop. in 1851, 532.

TEWKESBURY, a parish and parl. borough in the lower division of the hund. of Tewkesbury, co. of Gloucester, in the vale of Evesham, on the eastern bank of the Avon, near its junction with the Severn, 10 m. NNE of Gloucester, and 2 m. W of the Birmingham and Gloucester railway, with which it is united by a branch line. The parish includes the hamlets of Mythe and Southwick. Area of the p. 2,383 acres. Pop. in 1801, 4,199; in 1831, 5,780; in 1851, 5,878. The town is advantageously situated a little to the S of the Upper Avon, which has been diverted from its natural channel by a cut which meets the Severn lower down. Two other streams, called the Carron and the Swilgate, here flow into the Avon, one just above the town, and the other a short distance below it. The Birmingham and Gloucester branch-railway terminates in the High-street of the town. The town itself consists chiefly of three principal streets with several lanes and alleys. The principal, or High-street, running north and south, is of considerable length, and is spacious and handsome. The abbey church presents an interesting example of early Norman architecture, mixed with specimens of other kinds. It is built in the cruciform cathedral style, and consists of a nave, choir, transept, and massive anglo-Norman or Saxon central tower, with several chapels. —Most of the old buildings have been replaced by houses of more modern form; but a few specimens of the ancient style of building still exist. For the accommodation of the river navigation there are quays on the E side of High-street. The tides in the Severn reach Tewkesbury. The principal manufactures latterly carried on have been the stocking-frame work, knitting in cotton and lambs' wool, but particularly the former; the bobbinet lace manufacture, the manufacture of nails and leather, and the business of malting.—T. returns 2 members to parliament. The parliamentary boundaries have been extended so as to coincide with those of the parish. The number of electors registered in 1837, was 394; in 1851, 370. T. is also a polling-place in the elections for the E division of the county.—The most interesting and important military event in the annals of T. was the last decisive battle between the houses of York and Lancaster, known as the battle of Tewkesbury, which was fought in a field about a $\frac{1}{2}$ m. S of the town, still named the Bloody meadow.

TEWKESBURY, a township of Middlesex co., in the state of Massachusetts, U. S., 21 m. W of Boston. It has a level surface, bounded on the NW by the Merrimac, and by Concord river on the W, and intersected by the Shawshen. It is traversed by the Salem and Lowell, and Lowell and Lawrence railroads. Pop. in 1840, 906; in 1850, 1,048.—Also a township of Hunterdon co., in the state of New Jersey, 14 m. NE of Flemington. It has a hilly

surface, and is drained by Rockaway creek and its branches, and by Lamington river. The soil, consisting chiefly of clay and loam, is fertile and well cultivated. Pop. in 1840, 1,944.

TEXAR (SAN SEBASTIAN DEL), a district and town of Guatemala, in the state of that name, and dep. of Sacatepec and Chimaltenango. Pop. of district 7,280; of town, 1,260.

TEXAS, one of the United States of North America, formerly a province of Mexico, and more recently an independent republic, situated between the 26th and 37th parallels of N lat., and the meridians of 93° 30' and 110° W long.; and bounded on the N by the Red river and the Arkansas, which separate it from the Indian territory; on the E by the Sabine river and a conventional line, which divides it from Louisiana; on the S by the gulf of Mexico; and on the W by the Rio-Grande-del-Norte or Bravo, and by New Mexico. The extreme length of this state from N to S is 700 m.; and the breadth from E to W about 800 m. It has an area of 237,821 sq. m. The boundaries recently claimed by Texas, included portions of New Mexico and a large tract of country between the Nueces and Rio-Grande, which formerly belonged to the Mexican states of Tamaulipas, Nueva-Leon, and Coahuila; but the Texan claim has not been accorded by congress.

Physical features. The face of this country exhibits three essentially different physical regions,—the level, the undulating, and the mountainous. Along the coasts, and inland from 30 to 60 m., the surface is a low level, free from swamps, and composed of excellent arable and pasture lands, and prairies. The soil here is a deep black mould, and of inexhaustible fertility. The bottoms along the rivers are well-wooded, and have a rich red soil of great depth. Over this vast plain immense droves of wild horses and cattle roam, in the enjoyment of liberty, except near the settlements, where they are fast diminishing in number. In the interior and to the N, the lands are considerably elevated, and the surface undulating. The prairies of this section are covered with forests of vast extent. The W and NW section of T. is mountainous, and spanned crosswise with the several ranges of sierras which divide T. from New Mexico. The mountains are clothed with forests of oak, pine, cedar, and a great variety of trees and shrubs, and they enclose extensive alluvial valleys, most of which are susceptible of irrigation and culture. The surface, for the most part, is covered with a fine growth of grasses, comprising, with the common prairie-grass, the *gama*, *musquite*, wild clover, wild rye, &c., and affording excellent pasture. The natural growth of woods comprises many of the most valuable descriptions. Among the remarkable features of the country, the 'Cross-Timbers' of northern T. are conspicuous. These are a continuous series of forests, varying in width from 5 to 50 m., and extending in a direct line about the longitude of 97° W, from the woody region, at the sources of the Trinidad, northward to the Arkansas river. They appear at a distance as an immense wall of wood; and seen from the W, such is their linear regularity, that they look as if planted by the hand of man. Here the western prairies terminate. The country between the Nueces and the Rio-Grande has little soil susceptible of cultivation; and, except on the margins of the streams, and near the gulf of Mexico, is here a barren wilderness, overgrown with cacti and brush-wood. Several lakes, some of which are strongly impregnated with salt, are found in this region. "There is no region in the world," says M. Maillard, "that possesses more fertile land than T., and where Nature has raised so many obstacles

in the way of its cultivation and the development of its fertility. The prairies are swamps for two-thirds of the year, and the timber of the higher regions cannot be obtained without a considerable outlay of capital and labour, the latter of which will at all times be extremely expensive, and more or less difficult to obtain. The surface soil throughout the country is a mixture of lime, sand, and marl, the proportion of the latter being equal to the two former: its colour determines that of the soil, as it appears in different sections. In the elevated tracts to the north-west it is whitish; in the prairies it is black; and in the cane prairies and woodlands it is red. Every where the land is rich, and adapted to the cultivation of different tropical staples. The substratum is still more diversified than the surface soil. In the elevated regions it is a white marl, which, on exposure to the atmosphere, becomes as hard as marble; in the woodlands and cane prairies it is rock sand. In the alluvial country, generally, it is a black greasy clay, interlaid at intervals of about 10 ft. with a stiff bluish marl. The alluvial region extends along the coast from the Sabine river to the Rio-Grande; and is about 80 m. inland. The physical constitution of the atmosphere, and other natural causes, render the prairies in the lower part of T., along the coast, worse than useless for two-thirds of the year, and the prospective productiveness of the upper sections of the country somewhat problematical."

Climate. The climate of T., except in the more northern parts, is essentially tropical. The average temp. is about 80°. A wet and a dry season divide the year. The former lasts from December to March; the latter from March to the end of November. The great heats of summer are tempered by constantly-recurring breezes, which commence soon after sunrise, and last until 3 or 4 o'clock, P.M. The nights throughout the year are cool. From March to October little rain falls, though thunder-storms are frequent: during the rest of the year rain predominates, and the rivers inundate the country. Snow, except on the mountains, is seldom seen. In the river bottoms and along the coasts, intermittent fevers, and in the summer season yellow fever, prevail to an alarming extent. "Nine-tenths of the country," says Mr. Kennedy, "are considered healthier than the most healthy parts of the United States." But M. Maillard says "that the suddenness of the atmospheric changes is most injurious to the health. In the beginning of spring (March), the weather is wet and cold, the therm. seldom rising above 45°; but towards the close of the spring (May), it suddenly becomes sultry, rising to 95°. In summer the therm. ranges from 95° to 105°; and the rapid progress of the vegetation appears almost supernatural, while the air teeming with insects renders life intolerable. This is the season of epidemics, yellow and bilious fevers (in 1839, 65 per cent. of the pop. were carried off by yellow fever). In autumn, the therm. gradually falls to 60°, and the weather becomes more congenial for a short time, when the rainy season sets in, and continues throughout the winter and the greater part of the spring, accompanied by awful thunder, lightning, and northerly winds, which search the frame with an acuteness almost peculiar to themselves. The consequence of the climate on vegetation is, that though the earth is as rich as any in the world, every thing is no sooner above ground than it is matured and vanishes. The flowers are of a single day's creation, showing themselves in all their primitive and exquisite beauty in the evening, but the next day reduces them to a clinder, or they are inundated with water. At the close of the rainy season the waters do not disappear, but on the contrary; for the sun coming forth, thaws the snow off the mountains in the north, and the water which results is kept pent up in the mountain valleys by the strong SSE winds which prevail at this season, till the wind veering to the north permits of their escape, when they pour down in torrents, not unfrequently sweeping every thing before them, but never failing to continue the inundation of the lower country from about the 1st of April to the middle of June."

Rivers. In addition to a coast-line presenting numerous harbours, bays, and inlets, no country is better supplied with rivers than Texas. The principal, proceeding from E to W, are the Sabine or Neches, Trinidad, Brazos, Colorado, Guadalupe, San-Antonio, Nueces, and the Rio-Grande. All these fall into the gulf of Mexico, and they are all navigable for steamboats for 100 or 200 m. from their outlets. The Red river and the Arkansas wind along the northern frontier and must eventually be-

come the commercial highways of that section of the state. Among the minor streams are the Angelina, San-Jacinto, San-Bernard, Navidad, and Nueces. The bays and lagunes are formed by a range of long and narrow islands, which line the coasts. Galveston bay, into which the Trinidad, San-Jacinto, &c., fall, is by far the finest on the coast, being 35 m. long from N to S, and from 12 to 18 m. broad from E to W. Its average depth is from 9 to 10 ft., but in the channel the depth varies from 18 to 80 ft. The entrance, however, is obstructed by bars.

Productions.] In many parts of the rolling-prairie region, coal of a superior quality, and iron ore, exist abundantly; and it has been supposed that beds of these valuable minerals extend over the greater portion of the country. The precious metals are found in the mountains to the NW, and silver mines were worked in these regions until the miners were driven off by the Comanche Indians. The silver mine of San-Saba is one of the richest in the world; and gold has recently been obtained in many localities in Northern T. Saltpetre abounds in the E, and salt is obtained from numerous lakes and springs; and bitumen in several places. Granite, limestone, gypsum, shale, &c., are abundant, except in the low alluvial region.—The rearing of live stock has long been the principal and favourite occupation of the Texan settlers, and many of the prairies are covered with a valuable breed of oxen, which scarcely require, and certainly do not receive much more care or attention than the prairie-deer. These have increased enormously, and a profitable trade in cattle has been opened with New-Orleans and the West-India Islands. The rearing of horses and mules is also pretty extensively pursued. Sheep do not thrive well, except in the northern counties, and even there the wool is inferior and the mutton coarse. Hogs form a considerable item in the economy of the settler, and bees, which are in great numbers, might, with a little care, be made productive, there being an extensive demand for wax and honey for the northern market. The value of the live stock in 1850, was 10,266,880 dollars.—Vast herds of buffaloes and wild horses wander over the prairies, and deer are everywhere abundant. Bears, cougars, panthers, peccaris, wolves, foxes, and raccoons, are common; and most of the farmers are obliged to keep packs of large and powerful dogs, to preserve their stock from destruction. Most of the birds known to the United States are common to T., and the bays and lagunes abound with excellent fish and oysters, and other testacea. Alligators inhabit the Red river and its tributaries; and turtles and tortoises, the estuaries and mouths of the rivers flowing into the gulf. Reptiles and insects, some of the most venomous kinds, are prolific, and alike dangerous and troublesome.—Cotton, the great staple of T., is of a superior quality, producing more largely, and of a finer staple, than the same article in the Atlantic states. The product of 1848 was 89,742 bales. Superior cotton-lands, it is said, produce from 1½ to 2 bales per acre. Its cultivation is principally confined to the rich alluvial soils of the Red river, the Brazos, the Colorado, and Trinidad. The cotton is either shipped to New Orleans from Galveston, or is brought down the Red river and the Mississippi in steam-boats, which ply regularly on those rivers. Planting begins in February, and the cotton is picked in June. The grains chiefly cultivated are maize and wheat. The production of 1847 was as follows:—Wheat, 1,110,000 bushels; Indian corn, 500,000 bushels. The potato crop yielded 200,000 bushels. Rye, barley, oats, &c., are suited for the upper country; rice grows best near the river es-

tuaries. A double crop of Indian corn is frequently obtained within the year. Sugar-cane grows well, and yields heavily throughout the level region. The crop of 1847 was 20,000 lbs. Cane plantations, however, are as yet very limited, and hitherto the culture has been altogether experimental. Tobacco will probably become a staple. The mulberry-tree grows vigorously, and the climate is well-suited for the silk-worm. The vanilla plant grows wild; nopal is abundant; and the *yaupon* is said to furnish a tea little inferior to the common black tea of China. Among fruits, the fig, peach, nectarine, quince, pine-apple, orange, and lemon, ripen well.

Texas has no manufactures except those of ordinary domestic kinds, or those which are made in every family. The tanning of leather, however, and the making of soap, &c., are beginning to create some attention. The value of home-made manufacture in 1850 was 255,719 ds. The direct foreign commerce is scarce; but the coasting-trade is considerable.

Population.] The pop. of T. in 1850 was 212,592, of whom 154,100 were whites, and 58,161 slaves. The provision made for education is much on the same basis as in the new states in the NW. The constitution also provides that one-tenth of the annual revenue of the state derived from taxation, shall be set aside as a permanent fund for the support of free public schools; and that all public lands granted for such schools shall not be alienated in fee, nor be leased for more than twenty years. The Roman Catholics, Methodists, and Baptists are the most numerous religious denominations. The number of periodicals published within the state in 1850 was 37.

Government.] The present constitution was adopted in convention at Austin, 27th August, 1845, and ratified by the people on 13th October of the same year. Every white male inhabitant, 21 years of age, being a citizen of the United States or of T., who has resided in the state one year, and six months in the district, county, city or town where he offers his vote, is invested with suffrage. The General assembly consists of a senate and house-of-representatives. The senate is composed of not less than 17 nor more than 33 members. Senators are elected for four years, one-half going out every two years. They must be qualified voters, at least 30 years of age, and have lived in the state three years, the last year thereof in the district for which they are chosen. Representatives—of whom there shall not be less than 45, nor more than 90—are chosen for two years. They must be qualified voters, having lived in the state two years, and the last year thereof in the place where they are chosen. The legislature meets biennially. The members of the legislature receive each 8 dollars per diem, and 3 d. for every 25 m. of travel to and from the capital. The governor and lieutenant-governor are chosen by a plurality of the popular vote for two years, and are ineligible to serve for more than four years out of any six years. The governor must have the same qualifications as a senator, and receives 2,000 dollars per annum. The lieutenant-governor is *ex-officio* president of the senate. The secretary-of-state is nominated by the governor, and his nomination confirmed by the senate for two years. The state-treasurer and comptroller are chosen biennially by joint vote of both houses. The governor may *veto* a bill, but by a two-thirds vote of both houses in its favour, it becomes law.—The Judiciary consists of a supreme court, with a chief-justice and 2 associate-justices, appointed for six years. There are eight district courts, with one

judge to each district. These courts have original jurisdiction both in civil and criminal suits. In criminal cases, if the punishment be not specifically determined by law, the jury determine it. An attorney-general is appointed for two years by the governor, and confirmed by the senate, and district attorneys are chosen by joint ballot of both houses of the legislature, also for two years. In equity causes, either party may demand a jury. The constitution has several peculiar provisions. It renders duellists ineligible to public offices; forbids grants of money for any purposes than the ordinary expenses of government, except by a two-thirds vote; provides for the revision of the laws, civil and criminal, every ten years; makes a wife's property, real and personal, her separate property, not liable for the husband's debts; protects the homestead to the value of 2,000 d.; forbids the creation or extension of corporations for banking or other purposes; forbids the creation of a debt of more than 100,000 d., except in case of war, insurrection or invasion, &c., &c. The provisions with regard to slavery are similar to those of the other southern states. No law of emancipation shall be passed without the owner's consent, and by paying full compensation for the slaves liberated; nor shall emigrants to T. be prevented from bringing their slaves with them, but bringing them as merchandize is forbidden. Slaves are entitled to a jury in criminal suits.

Finances.] The annexed statement exhibits the amount and condition of the debt of T. according to the official report of the comptroller, dated March, 1846.

Total amount of audited drafts,	156,905 68 d.
" " of promissory notes,	2,674,447 10
" " of 8 per cent. bonds,	811,000 00
" " of funded debt,	1,675,800 00
" " of interest on liabilities,	1,878,804 92
" " of outstanding claims,	822,000 00
Aggregate of domestic debt,	8,012,957 65 d.
Aggregate of foreign debt,	1,984,049 40
Aggregate of indebtedness,	9,997,007 05 d.

The public debt of T., according to this statement, amounted in 1846 to about 10,000,000 dollars, in round numbers.—According to the state-treasurer's report the revenues and expenditures of the state, in available means, from the 31st of October, 1851, to the 31st of October, 1853, were as follows:—

RECEIPT.	
From ordinary sources of revenue, such as taxes, &c.,	156,370 27 d.
From government of the U. S. in 5 per cent. bonds,	5,008,000 00
Premium and interest on the above bonds to 1st Jan. 1853,	510,050 10
Refunded by government of the U. S. on account of the advances of the state,	8,064 12
Means in the treasury on the 31st of Oct. 1851,	28,890 68
Total,	6,701,305 17

EXPENDITURE.	
On account of expenditures of the state,	584,387 51
On account of debt of the late republic,	1,112,144 64
Transferred from state revenue to county revenue,	1,371 06
Amount of state bonds destroyed and United States bonds substituted as per act of Feb. 1852,	36,000 00

Leaving on the 31st of Oct. 1853, a balance of 3,965,301 94

The following was the estimate of receipts and expenditures for the fiscal year ending October 31, 1854:

RECEIPT.	
Amount of taxes, &c., due prior to 1852,	48,900 00
Interest on United States bonds now in the treasury, from Jan. 1853 to Oct. 31, 1854,	337,708 33
	376,708 33
Balance in the treasury on the 31st October, 1853, as above shown,	3,965,301 94

Total estimated means for the support of the government for the year ending October 31, 1854, 4,341,010 27

EXPENDITURE.	
Legislative department,	75,000 00
Executive, "	40,500 00
Judicial, "	37,850 00
Miscellaneous expenses,	25,364 00
	178,714 00

Due on appropriations for support of the state for 1853 and previous years,	98,623 37
Due for the payment of the public debt,	348,685 08
Amount of public debt now audited, including that which will probably be audited up to the 1st of Feb. 1854, under act of Feb. 1853,	100,000 00
	726,022 35

Leaving in the treasury on the 31st of October 1854, an estimated balance of 3,614,987 92 d.

The taxable property throughout the state has increased in value for the last eight years, but more especially for the past three years. The increase in this period has been at a rate seldom known, being almost 100 per cent. The following table presents the aggregate property for each of the last eight consecutive years, commencing with 1846 and terminating with 1853, with the increase per cent. for each year:—

Year.	Aggregate taxable Property.	Increase taxable Property.	Increase each Year.	Per cent.
1846,	34,391,175			
1847,	37,563,505	3,172,330	1847 over 1846	8 1/2
1848,	43,812,537	6,250,032	1848 " 1847	16 1/2
1849,	46,241,589	2,429,052	1849 " 1848	5 1/2

Counties.] The counties into which T. was recently divided are 78 in number, viz.: Anderson, Angelina, Austin, Bastrop, Bexar, Bowie, Brazoria, Brazos, Burleson, Caldwell, Calhoun, Cameron, Cass, Cherokee, Collin, Colorado, Comal, Cook, Dallas, Denton, De Witt, Fannin, Fayette, Fort Bend, Galveston, Gillespie, Goliad, Gonzales, Grayson, Grimes, Guadalupe, Harris, Harrison, Hays, Henderson, Hopkins, Houston, Hunt, Jackson, Jasper, Jefferson, Kaufman, Lamar, Lavaca, Leon, Liberty, Limestone, Matagorda, Medina, Milan, Montgomery, Nacogdoches, Navarro, Newton, Nueces, Pannaola, Polk, Red-River, Refugio, Robertson, Runak, Sabine, San-Angustine, San-Patricio, Shelby, Smith, Starr, Titus, Travis, Tyler, Upshur, Van-Zandt, Victoria, Walker, Washington, Webb, Wharton, and Williamson.

The city of Austin, the capital of the state, is situated on the N bank of the Colorado, in N lat. 30° 24', and W long. 95° 42'. It consists chiefly of frame houses, and a few brick buildings, occupied by the wealthier classes and tradesmen. The country in the neighbourhood is becoming settled, and quite a number of farm houses have been built. Pop. about 5,000. Sabine, at the outlet of the Sabine lake, is a port of entry. Galveston, the chief port in T., situated at the E extremity of the island of the same name, is the depôt of a vast and fertile region watered by the Trinidad and other rivers. The commerce of this port has increased to something considerable, and its prospects are, at the present time, more encouraging than those of any others of the sea-board towns. Galveston, has at the present period about 4,600 inhabitants. Houston, the former capital, is situated at the head of navigation of Buffalo-bayou, a small tributary of Galveston bay, and is a place of little consideration. Velasco, on the N bank of the Brazos, at its mouth, is a pleasant town, and said to be very healthy. Matagorda, at the mouth of the Colorado, near the head of Matagorda bay, is a considerable town. Goliad is an old Spanish town on the N bank of the San Antonio, 40 m. from its mouth. San-Antonio

de-Bexar, also an old Spanish town, is situated higher up the river, and is celebrated in history as the scene of several battles and the gallant defence of the Alamo, by Col. Travis, for two weeks. Zodiack is a new town on the Pedernales and 4 m. from Fredericksburg, the seat of Gillespie county, and 60 m. N of San Antonio. Germans and Mormons are the principal settlers. This is the most northerly settlement in Western T.

[History.] The first settlements in T. were made by the French at Matagorda, but the settlers were soon after expelled by the Spaniards, who, in 1690, extended their cordons from New Spain over the whole territory. Previous to this time, the Indians held undisputed sway over this fine country. Spanish forces were stationed at Goliad, Bexar, Nacogdoches, &c., and held military possession until the revolution which overthrew the Spanish power in Mexico. On the consummation of Mexican independence, T. became, in connection with the adjoining state of Coahuila, a state of the republic. Soon after this period, several colonies of Americans, who had been invited into the territory by the Mexicans, settled in the eastern section, and were for a long time secured from the onerous burdens of Mexico proper. For some time previous to 1835, however, serious complaints against the central government were uttered, and in the following year open rebellion was rife. The Mexican president invaded T. with a large army, and was successively victorious and defeated in a number of skirmishes. The American settlers declared their independence in March, 1836, and the defeat of the Mexicans and the capture of Santa Anna at San-Jacinto (21st April 1836), secured to the 'patriot party' the acknowledgment of their independent position by the Mexican president, and the whole country E of the Rio-Grande was ceded to them. The acts of Santa Anna, however, were never confirmed by the senate, and of course their authority was, to say the least, equivocal. No serious attempt having been made by the Mexicans to regain T. for eight or nine years, the political nationality of the country was considered as consolidated, and in 1845, under this supposition, the United States of America admitted the young republic as a state of the Union. The consequence of this act was war with Mexico—a war which the United States assumed by the annexation of T. at a time when that country was at war with Mexico. Of this transaction, the great statesman, Daniel Webster, thus speaks: "In 1841-2-3, T. was an independent government, so nominally, so practically, so recognised by our own and other governments. Mexico had no ground of complaint in the annexation of T.; we are the party to complain; we did not want T. But she did take offence; she persisted in claiming T. as her province, long as it had been an independent territory, and broke off terms of amity with our government, calling home her ministers, and refusing to receive our own. But this was not war—very far from it. I contend that the precise object of the war was simply this—Paredes became president in March 1845. Santa Anna was exiled to Cuba in June of the same year. Through 1845 this state of things continued; matters between the two governments were unsettled and unsatisfactory. Mexico held back and was warlike in her tone. In January, 1846, the United States army was ordered to advance to the Rio-Grande, in order, says Mr. Buchanan, to act as congress should authorize in case of the rejection of Mr. Sillidell, then in Mexico. At this time came forth rumours that Santa Anna was more favourable to peace, that is, more willing to accommodate on the annexation difficulty, than Paredes; and on that very day in January, a message was sent to Commodore Conner, of the Gulf squadron, saying that if Santa Anna came that way to let him into Mexico. How came it to be supposed that he was likely to come that way? About the same time, Alexander Sillidell, brother to the minister to Mexico, was sent to Cuba by the government. It was a matter of general conversation in Cuba that Santa Anna had been invited to return to Mexico by the United States authorities. The president said Paredes was the obstacle in the way of settling our differences: the inference is plain—strong. On the 11th of May war actually commenced. On the 1st of June a proclamation, prepared at Washington, was sent to General Taylor, to be distributed throughout Mexico as fast as he progressed into the country. This purported to give the causes of the war to the Mexicans. It set forth that we are friends of Mexico; that the war was waged on account of the debts, and the rejection of Mr. Sillidell by the then existing government, and a supposed declaration of Paredes, of which I never heard or could ever learn any other authority. The fact is not stated, intimated, or alluded to, that was in the act of war. It was said that we came as friends, and that we desired to keep the Mexican government from falling into the hands of a European prince, a proposition to which effect, it was thrown out, was on foot. Some time in the same month (June) Santa Anna went to Vera Cruz, passed into the interior, issued his proclamation or pronouncement. This, too, said he came as a friend to put down tyrants and avert the impending monarchy. The ideas and language are strikingly like those set forth through General Taylor. Whether Santa Anna borrowed from Mr. Polk, or Mr. Polk borrowed from Santa Anna, or whether it was an extraordinary coincidence of thought on the part of two great geniuses, I will not attempt to say. Sufficient that they are remarkably similar in language as well as character. General

Salas, under Santa Anna's pronouncement, overthrew Paredes, and he in turn was banished. Santa Anna became the head of the nation. The sequel all know. With equal mortification and regret did I read, in the last message of the president the admission that his object in assisting Santa Anna to return to Mexico was to overthrow the existing government." The history of this war is recent and well known: the arms of the United States were everywhere victorious, and when peace returned, not T. alone, but New Mexico and Upper California, were parcelled off to the Americans, and for ever lost to the Mexican republic. The resolutions of Congress admitting T. into the Union, were signed by the president of the United States, 1st March, 1845, and ratified by the Congress of T. on the 4th of July, 1845. The boundary between New Mexico and T. was adjusted in 1850, as follows: The state of T. agrees that her boundary on the N shall commence at the point at which the meridian of 100° W from Greenwich is intersected by the parallel of 36° 30' N lat., and shall run from said point due W to the meridian of 103°; thence her boundary shall run due S to the 32° N lat.; thence on the said parallel of 32° N lat. to the Rio Bravo-del-Norte; and thence with the channel of said river to the gulf of Mexico. The state of T. cedes to the United States all her territory exterior to her limits and boundaries, which she agrees to establish by the first article of this agreement; and relinquishes all claim upon the United States for liability of the debts of T. and for compensation or indemnity for the surrender to the United States of her ships, forts, arsenals, custom-houses, custom-house revenue, arms, and munitions of war, and public buildings, with their sites, which became the property of the United States at the time of the annexation. The United States, in consideration of said reduction of boundaries, cession of territory, and relinquishment of claims, pay to the state of T. the sum of 10,000,000 of dollars, in a stock bearing 5 per cent interest, and redeemable at the end of 14 years, the interest payable half-yearly at the treasury of the United States.

TEXAS, a county in the S part of the state of Missouri, U. S., comprising an area of 1,247 sq. m., generally undulating, and drained by the head branches of Current river and the Big Piney Fork of Gasconade river. It produces wheat, maize, and tobacco, and abounds with wood. Pop. in 1850, 2,312. Its capital is Houston.—Also a township of Wayne co., in the state of Pennsylvania, drained by Saxawaxen creek. Pop. in 1840, 1,094.—Also a township of Kalamas co., in the state of Michigan. Pop. 294.

TEXEIRA, or TRIXEIRA, a mountain of Brazil, in the prov. of Parahiba. It forms a ramification of the Borborema chain.

TEXEL, an island of the North sea, off the N coast of Holland, in the prov. of North Holland, and arrond. of Alkmaer, of which it forms a canton, at the entrance to the Zuider-zee, 2 m. SSW of the island of Vlieland, and 2 m. N of Helder. Pop. 9,000. It is 14 m. in length from NNE to SSW, and 8 m. in extreme breadth, and of little elevation, but is defended from irruptions of the sea, on the W, by extensive downs, and on the E, which is generally marshy, has a good port, in which vessels often take refuge during their detention by unfavourable winds. The currents and sand banks, however, by which it is surrounded, render approach to its shores at all times difficult. The Texel-stroom, or W inlet to the Zuider-zee, lies between the mainland and the S end of T. island. Kykduin lighthouse, on the S side of the Texel-stroom, is in N lat. 52° 57' 5", E long. 4° 43' 37". The island affords pasturage to large herds of cattle, and produces in considerable quantities butter, cheese, and wool. Little more than an immense sandbank, it is, however, noted for the richness and fineness of the wool produced from the sheep that are grazed upon it. The shepherds who tend these sheep are original and unique specimens of the pastoral character: it is impossible to conceive any thing more primitive than the language, manners, and customs of those poor people. Here, too, on the mainland, and opposite the island, is to be found by far the most remarkable of the 'dykes' now existing in Holland. The sea is here deeper, and the danger of incursion greater than elsewhere, though the tempests are not so severe: accordingly, the dyke is composed of a stronger substance than the

straw-knit materials with which the embankments enclosing the *polders* are formed. It consists of enormous blocks of granite, brought from Norway, and here forming a rampart of 2 leagues in length, and nearly 50 ft. in breadth, and at certain points projecting some hundreds of yards into the sea. Nothing in Holland is more calculated to give one a high idea of the perseverance of the people than this dyke. Large quantities of sea-birds' eggs are found on its N coast, whence its name of Egerland. It contains several villages, of which the principal is also named Texel. The culture of the soil, boat-building, fishing, and the manufacture of woollen and linen fabrics form the chief branches of local industry. A violent storm in 1825 submerged a large portion of this island, and swept great numbers of cattle into the sea. It is noted for the naval engagement which took place near its shores on the 8th August 1658, between the English and Dutch, in which the famous admiral Tromp lost his life; and it was also in the vicinity of this island, that in January 1794, a detachment of French cavalry took possession of an ice-locked Dutch fleet.

TEXERINA, a town of Spain, in the prov. and 33 m. NE of Leon, near one of the sources of the Cea. Pop. 117.

TEXUTLA, or **TEXTLA**, a town of Guatemala, 240 m. NW of the town of that name. Pop. 2,000. It has a manufactory of tobacco.

TEY (GREAT), a parish in Essex, 3½ m. NE of Great Coggeshall. Area 2,508 acres. Pop. 785.

TEY (LITTLE), a parish in Essex, 3 m. E by N of Great Coggeshall, in the line of the Eastern Counties railway. Area 486 acres. Pop. in 1851, 74.

TEYA, a town of Spain, in the prov. and 11 m. NE of Barcelona, near the Mediterranean. Pop. 3,637, engaged chiefly in fishing.

TEYDE (PEAK of). See **TENERIFFE**.

TEY-MARKS, or **TEY-AT-THE ELMS**, a parish in Essex, 4 m. E by N of Great Coggeshall, intersected by the Eastern Counties railway. Area 1,214 acres. Pop. in 1831, 363; in 1851, 478.

TEYNGA, or **TEYNIA**, a small island of the Mindoro sea, near the SW coast of Mindanao, in N lat. 6° 50', and E long. 121° 42'.

TEYNHAM, a parish in Kent, 4 m. WNW of Faversham. Area 2,648 acres. Pop. in 1851, 842.

TEYSING. See **THEYSING**.

TEYSSIEN, a village of France, in the dep. of the Lot, cant. and 6 m. E of Bretenoux, at the foot of a high hill. Pop. 700.

TEYUPURU, or **TAGIROM**, an arm of the Amazon in Brazil, in the prov. and district of Para, which detaches itself from that river on the r., 50 m. ENE of Gurupu; runs first S, then NE, receives the Annapu, Pacajas and Jacundas, and with the Rio-Tocantins, which it joins in W long. 49°, forms the island of Joannes or Maraja. Its bed is obstructed by islands, and is to a great extent unnavigable.

TEZA, a town of Morocco, in the prov. and 90 m. E of Fex, at the foot of the Atlas mountains, on a rock, the base of which is washed by a small stream. It is tolerably well-built, and has a fine mosque, and the environs are adorned with numerous gardens.

TEZA, **TESA**, or **TESSE**, a river of Russia in Europe, which has its source in the gov. of Kostroma, a little to the SSW of Ples; runs S into the gov. of Vladimir; passes Chonia; bends SE; bathes the districts of Kovrov and Viazniki, and after a tortuous course of about 120 m., joins the Kliasma on the l. bank, 23 m. NNW of Viazniki. It was formerly navigable, but a great portion of the volume of its waters is now employed by mills.

TEZANILLOS, a town of Spain, in the prov. of Santander, and partido of Villacurriedo. Pop. 560.

TEZCUCO, a town of Mexico, in the intendency of Mexico, situated on the E bank of a lake of the same name, in N lat. 19° 31', 15 m. ENE of the city of Mexico. When Cortez invaded Mexico, it was the capital of a district rich and populous; it now exhibits numerous remains of Mexican antiquity. The modern town has some handsome edifices, and a pop. of 5,000. It formerly possessed considerable cotton manufactories, which have suffered, however, by the competition of those of Queretaro.—The lake of T. is the largest, and the lowest in elevation, of the five lakes in the valley of Mexico. It is not easy to determine the exact boundaries of this lake, the ground around it being so uniform in level, that the difference of level is not more than 7½ in. in a mile, and in consequence, when the E winds blow with any violence, the water withdraws towards the W bank of the lake, and sometimes leaves an extent of more than a ¼ m. dry on the opposite side. It is not in general more than from 9 to 16 ft. deep; in some parts only 2 ft. Hence the commerce of the small town of T., situated on its banks, suffers much in the dry months of January and February. The water is more brackish than that of the four other lakes in its vicinity. Its extent is about 10 sq. leagues, but it has been gradually diminishing since the conquest of the country by the Europeans. This is ascribed by Humboldt to the thinning of the woods by the Spaniards, who cut down the trees both of the plain and the mountains, and thus exposed the country, without any protection, to the sun's rays: the dry soil imbibes a greater quantity of moisture than before, and a smaller portion remains for the supply of the lakes. The waters of Lake T. are also drawn off by means of a *desague* or drain begun in 1607, in the form of a subterranean tunnel, through the surrounding mountains. This drain has not only reduced within narrower limits the two lakes in the northern part of the valley, viz. the lakes of Zumpango and San Christoval, but it has also prevented their waters in the rainy season from flowing into the lake of T. The bed of the lake is also progressively rising, in consequence of the loose earth carried down by the torrents and deposited in it. If the report of a survey made in the 16th cent. be correct, the great square of Mexico was then elevated 43 ft. above the level of the lake of T., but the latter is now only 47 inches lower than the former. The lakes have therefore decreased both in extent and depth; and the city of Mexico, which in the days of Cortez stood environed by water, is now 3 m. from the lake of T., which receives much less water by infiltration than in the 16th cent.

TEZZUTE, an assemblage of magnificent ruins, in the S part of the prov. of Constantina, in Algiers, in N lat. 35° 24', E long. 5° 58'. *Lambese* being mentioned in 'the Itinerary' as the most considerable city in this quarter, and that name being found on one of the inscriptions, leaves no doubt of its being the original of these noble ruins.

THAGARA, a town and fortress of Hindostan, in the prov. of Aurungabad. The fort is on the summit of a hill, and is surrounded by several stone walls, the lowest of which encloses the town. It is a place of great strength, but has notwithstanding been repeatedly taken by different bodies of Mahomedans. At the beginning of the 14th century, the Afghan emperor Mahammed III., endeavoured to make it his capital, and gave it its present name. It is now comprised in the territory of the Nizam, but since the foundation of Aurungabad, it in common with many other fortified eminences in India, has declined in importance. It is still however considered the key to the Deccan.

THAHO. See **TAJO.**

THAIF. See **TAYEP.**

THAILFINGEN (NECKAR), a town of Württemberg, in the circle of the Schwarzwald, bail. and 9 m. E of Balingen, on the Schmich. Pop. in 1840, 1,129. Hosiery is manufactured here.

THAI-NGUYEN, or **XU-THAI,** a prov. of Annam, in Tonquin, on the confines of China.

THAINI, a town of Tunis, 9 m. SSW of Sfax, on a small stream of the same name, near the sea, in a dry, rocky locality. In its vicinity are the ruins of *Thœna*.

THAI-PING-SHAN, TAFUSAN, or TYPINSAN, the largest and most easterly of the *Madjicosima* islands in the Eastern sea. On its N coast is the temple of *Miako*. It is surrounded by numerous reefs.

THAKEHAM, a parish in Sussex, 6½ m. NW of Steving. Area 2,980 acres. Pop. in 1851, 631.

THAL, a village of Switzerland, in the cant. and 11 m. ENE of St. Gall, and district of Rheintal. Pop. 200.—Also a village of the duchy of Saxe-Coburg-Gotha, to the W of Waltershausen. Pop. 295. It contains the ruins of the castle of Scharfenberg.

THALABA, a parish of New South Wales, in the co. of Gloucester, bounded on the W by William's river.—Also a town in the co. of Durham, at the confluence of the Williams and Wangi, or Thalaba rivers.

THALE, or THAALE, a village of Prussia, in the prov. of Saxony, regency and 89 m. SW of Magdeburg, and circle of Aschersleben, at the foot of the Harz mountains, on the l. bank of the Bode. Pop. 1,250. It has a large iron-work.

THALERN, a village of the archduchy of Austria, in the prov. of Lower Austria, 18 m. NE of St. Pölten, in the midst of hills. It has mines of coal, and manufactures of alum, sulphur, and vitriol.

THALFANG, a village of Prussia, in the prov. of the Rhine, regency and 17 m. E of Treves, and circle of Bernkastel. Pop. 315. It has extensive iron-mines.

THALFINGEN, a village of Bavaria, in the circle of Swabia. Pop. 400.—Also a village of Württemberg, to the NE of Ulm. It has mineral baths.

THALGAN. See **TALGAN.**

THALGUT, a village of Switzerland, in the cant. and 8 m. SE of Bern, bail. of Seftegen, near the l. bank of the Aar.

THALHEIM, a village of Switzerland, in the cant. of Argau, and circle of Beltheim. Pop. 840. It is noted for its wine.—Also a village of Württemberg, in the circle of the Schwarzwald, bail. and 8 m. WNW of Tuttlingen, on a small affluent of the Danube. Pop. 1,125.—Also a village to the SW of Pfullingen. Pop. 1,050.—Also a village in the circle of the Neckar, and bail. of Heilbronn, on the Schotzsch. Pop. 1,330.—Also a town in the circle of the Jaxt, bail. and 8 m. E of Hale, on a small affluent of the Bühler. Pop. 300.

THALITTER, a village of the grand-duchy of Hesse-Darmstadt, and prov. of Upper Hesse, on the lter, 32 m. WSW of Cassel. Pop. 260. It has a copper-mine, and manufactures of copper and tin.

THALMASSING, a town of Bavaria, in the circle of the Upper Pfalz, 9 m. SSE of Hilpoltstein, on the Thallach. Pop. 850. It has three churches.

THALWEIL, a fine village of Switzerland, in the cant. and 8 m. S of Zurich, and bail. of Wädenswil, near the W bank of the lake of Zurich, on a height commanding a fine view of the lake and its environs. Pop. of com. 1,150. It has manufactures of cotton fabrics. The vine is cultivated in the environs.

THALWITZ, a village of Saxony, in the circle and 15 m. NE of Leipzig, and bail. of Wurtzen, on the Lossa.

THAMAN. See **TAMAN.**

THAME, a river of Oxfordshire, rising on the E side of Buckinghamshire, and uniting with the Thames at Dorchester: see **THAMES.**

THAME, or TAME, a parish and market-town in Oxfordshire, 13 m. E by S of Oxford. Area of p., 5,310 acres. Pop. in 1801, 2,293; in 1831, 2,885; in 1851, 3,259. The church is a large and handsome structure in the early English style. The town, which is of Roman origin, stands on the S bank of the river Thame, which is navigable from this place. It consists principally of one long and spacious street, in the centre of which are a market-place and town-hall. The lace-manufacture is carried on to a limited extent in the town.

THAMES, the chief river in Britain, and, in a commercial view, the most important in the world, formed by the junction of the Thame and the Isis near Dorchester in Oxfordshire. The Thame rises from three sources, two of which are near Ivinghoe in Bucks, the other near Tring in Herts. The two principal sources unite to the W of Aylesbury, and the Thame thence runs SW by the town of Thame, where it becomes navigable, to Dorchester. The Isis is the principal source of the Thames, or Thame-Isis, as it was originally named. The principal head of the Isis, or Thames-head, as it is also called, is near Cirencester in Gloucestershire. Thence from an elevation of about 876 ft. above the sea, it runs southwards into Wilts; but afterwards divides these counties, receiving the Churnet from the N of Cirencester, and proceeding eastwardly by Cricklade, above which it is joined by the Swill from the N; and by Lechlade, above which it receives the Colne from the N, the Cole from the S, and the Thames and Severn canal from the W, and becomes navigable. From Lechlade, where its bed is 242 ft. above sea-level, it flows E by N, dividing Oxfordshire from Berkshire, and receiving the waters of the Wainrush and the united waters of the Evenlode and Glynn from the NW; after which it turns SE along the border of Oxfordshire, by Oxford, where it receives the Oxford and Warwick canal, and the united streams of the Charwell and the Bay. Proceeding still south-eastward it deviates by Abingdon, where it receives the Ock, and then accomplishes its junction with the Thame a little below Dorchester. From Dorchester the Thames continues to divide Oxfordshire from Berks, flowing south-eastward by Wallingford and Reading, at the latter of which places it receives the navigable river Kennet, and then turns NNE by Henley, being previously joined by the Loddon. Quitting Oxfordshire, it then divides Berks from Bucks, flowing first E by Marlow, and afterwards SE in a winding course by Windsor to Staines, where it is joined by the Colne from the N, and quits Berks and Bucks to divide Surrey from Middlesex. Still winding in its course, it runs SE by Chertsey, below which it is joined by the Wey from the S; then E by Kingston, above which it is joined by the Mole; and N by Teddington, where it becomes tidal, and by Richmond, to Brentford, where it is joined by the Grand Junction canal with the waters of the Brent. From Brentford it winds, in a more easterly course, by Chelsea and Westminster, through the metropolis, dividing Lambeth from Westminster, and Southwark from London; till, winding round the Isle of Dogs,—on the W side of which it is joined by the Regent's canal, and on the E by the Lea navigation, both on the Middlesex side,—it passes Greenwich, Woolwich, and Gravesend, dividing Kent from Es-

sex, till after a winding course of 215 m., or of 124 m. in direct distance, it opens into its noble estuary at the Nore, previous to which it is joined by the Roding, and other Essex streams on the N, and by the Darent, the Medway, and other Kent streams on the S. The Medway issues into it at Shoerness in the Isle of Sheppey, which the Medway forms, immediately above the expansion of the Thames into its estuary at the Nore.

The Thames, with its tributaries, drains about 6,000 sq. m., with a mean velocity of 2 m. an hour. The fall of the main stream from Oxford to Maidenhead is about 25 ft. in every 10 m.; from Maidenhead to Chertsey-bridge, 22 ft. in every 10 m.; from Chertsey-bridge to Mortlake, 16 ft. in every 10 m.: afterwards the fall diminishes more gradually till the river unites with the sea. At London-bridge, 146½ m. below Lechlade, its height above sea-level is only 4 ft. 3 in., and its fall from this point to the Nore does not exceed 1 inch per mile. Its depth from London-bridge to Greenwich, in the fair way, is from 12 to 13 ft. The mean depth of high water at the entrance of the London docks is 21·3 ft., at spring-tides 22·8 ft. The tides flow up the channel of the T. nearly 80 m.; and occur twice in 24 hours. Occasionally they rise to so great a height as to overflow the banks of the river, and do considerable damage, especially to the metropolis, a grievance of recent as well as of ancient, though by no means of frequent, occurrence, and which has been attributed to such a combination of untoward circumstances, as the swelling by long-continued rains of the numerous rivers flowing into the T., simultaneously with the beating up of the tides through the swollen river by high winds off the sea.

The T. is navigable for vessels of almost any burthen as far as Deptford, although it has been customary for Indiamen to take out a part of their cargoes in Longreach. To the Pool it is navigable for vessels of 400 tons; to London-bridge for those of 200 tons; and to nearly 180 m. above London-bridge for large barges. And as it then communicates with the Severn, through the Thames and Severn canal, the navigation is in fact continued quite across the country from the E coast to the W. Other immense fields of inland navigation, N and S of its course, are opened up by its various navigable tributaries, and by the important and extensive chains of canal navigation with which it communicates.

The T. traverses some of the richest districts of England; but it is one of those rivers which rather derive their peculiar character from the countries through which they flow, than impose distinctive features on the landscape by the boldness and rapidity of their course. Even in the most hilly districts, where its current is naturally strongest, the T. can at no point be properly called a rapid stream; yet it is by no means a sluggish river, and is throughout distinguishable for the majestic progress of its pure and silvery stream, which generally fills its verdant banks, and is rarely discoloured with mud except after great floods. To these, independently of its tidal floods, it is also occasionally liable; and their influence has been very extensive as well as of long continuance in the level parts of its tract, making the whole country appear like a sea, and many of the towns and villages on its banks like islands, when viewed from the several eminences commanding the plain. Till it passes Oxford, the Isis is not a very considerable river; but it increases much in dignity and width after it has formed its junction with the Thame and assumed its proper title of the Thames: it also suffers a manifest enlargement from the accession of the Kennet. That part of its course

which leads from Wallingford to Reading, Henley, Marlow, and Maidenhead-bridge, is most distinguished by romantic scenery and natural beauty leading through valleys bounded by hills richly clothed with beech woods, and finely embellished by the magnificent seats of many of our highest nobility and gentry. For many miles above the metropolitan vicinity, the river is enlivened with a multitude of small commercial craft, and latterly with river steamers running to and from the metropolis; but here it becomes a great and noble tide river, full of vessels of every description in the bold sweeps which it continues to make through increasing marshes to the sea, preserving to the end that air of placid dignity and imposing consequence which so eminently distinguish this monarch of the British rivers. Its breadth at London-bridge is 290 yds. The aspect of the T. in its course through the metropolis, to which it has certainly been the chief source of wealth and greatness, is more particularly noticed under article LONDON: which see. The different bends of the river between London-bridge and the sea are denominated *reaches*, and are 18 in number. As a fishing stream, the T. is much used, both commercially, and by the citizens of the metropolis for amusement. Besides the fish usually found in large rivers, there is one species which is not obtained in many of them, namely, the lamprey; which is supposed to ascend rivers from the sea for the purpose of spawning, as they are only found in the summer months. These fish are highly appreciated by epicures, but produce a better price, it is alleged, when sold to the Dutch fishermen to be used as bait in cod-fishing: they are exported in tanks of fresh-water during the winter. See article LONDON.

THAMES, a river of the state of Connecticut, U. S., formed by the junction of the Shetucket and Yantic rivers, which unite at Norwich; and after a course in a generally S direction of 14 m., fall into Long-Island sound, at New London. Its embouchure forms one of the best harbours in the United States.

THAMES, or LA FRANCOISE, a river of Upper Canada, formed by the confluence of two principal streams, distinguished as the N and E branches, the former of which has its source in Huron district, and the latter in Easthope, and which unite at London; thence the united stream flows SW, and after a sinuous course of 115 m. in a generally SW direction, throws itself by a wide embouchure into Lake St. Clair. Its waters abound with fish, especially trout, and on its banks are numerous mills. It is navigable for steam-boats to Louisville, a distance of 30 m. from its mouth.

THAMES-DITTON. See DITTON-THAMES.

THAMEVILLE, a settlement of Upper Canada, in Camden West, on the Thames, 15 m. E of Chatham. Pop. 50.

THAMISE. See TAMISE.

THAMSBRUCH, or THOMASBRUCKEN, a town of Prussia, in the prov. of Saxony, regency and 21 m. NW of Erfurt, and circle of Langensalza, on the l. bank of the Unstrut. Pop. 1,000. It has manufactures of linen, and has several spinning-mills.

THANA, a town of Hindostan, in the Punjab, on the road from Lahore to Kashmir through the Pir-Panjal pass, at an alt. of 5,000 ft. above sea-level. It is finely situated amid plantations of walnut and mulberry trees, on a height which rises precipitously above the Rajawur river, and is intersected by numerous small streams. It has a large serai. Its inhabitants, about 400 in number, find their chief employment in the manufacture of shawls.

THANASIR, a town of Hindostan, in the prov.

and 93 m. NNW of Delhi. It is of considerable extent, and, on account of the famous temple of Jugsum which it contains, is held in high veneration by the Hindus.

THANATO, a town of Turkey in Europe, in Thessaly, in the district and 6 m. NNE of Hagia, on a mountain, at some distance from the Archipelago. Pop. 1,500. The environs are noted for their wines, and produce also silk, cotton, and grain.

THANET (ISLE OF), a district of Kent, forming the NE angle of the county, from the remainder of which it is isolated, on the S, by the river Stour, and on the W by the water-course called the Nether-gong, while in every other direction it is surrounded by the sea. In ancient times it was divided by a wide estuary, capable of receiving vessels of considerable size, and was actually used as a short cut in the ordinary passage between France and London. The length of the isle is 9 m. from E to W; its breadth, 5 m. from N to S. A balk or strip of unploughed land, named St. Mildred's lynch, divides it into two manors—Minster and Monkton. The soil is fertile, and in a high state of cultivation. The whole isle comprises nearly 23,000 acres of arable land, and 8,500 acres of good pasture and marsh land. At North Foreland, its extreme E point, there is a lighthouse. Between this point and Margate, near Foreness-point, a harbour-of-refuge has been proposed. The Reculvers forms the limit of the Isle of Thanet on the W side. The popular watering-places of MARGATE, RAMSGATE, and BROADSTAIRS, [which see,] are on this island.

THANINGTON, a parish in Kent, 1½ m. SW by W of Canterbury, on the river Stour. Area 1,212 acres. Pop. in 1831, 316; in 1851, 385.

THANN, a canton, commune, and town of France, in the dep. of the Haut-Rhin and arrond. of Belfort. The cant. comprises 12 coms. Pop. in 1831, 13,731; in 1846, 18,177.—The town is 17 m. NE of Belfort, on the r. bank of the Thur, near the foot of the Vosges, at the entrance to the valley of St. Amarin, and at an alt. of 364 yds. above sea-level. Pop. in 1846, 5,872. Its principal objects of interest are the church of St. Theobald, a fine Gothic structure, founded in 1430 and finished in 1516, the tower of which, constructed on the model of the spire of Strasburg cathedral, is 300 ft. in height; the castle of Engelbert, the ruins of which crown the summit of an adjacent mountain; and the promenade of Bonguert. It has several spinning-mills, manufactories of cotton, woollen, and silk fabrics, printed muslins, brocades, hats, and other articles in felt, combs, chemical substances, and starch, several dye-works, tanneries, breweries, &c. The environs are noted for their wine. This town, founded in the 13th century, originally belonged to the house of Austria. It was taken by the Swedes in 1632.—Also a town of Bavaria, in the circle of Lower Bavaria, 9 m. SE of Eggenfelden. Pop. 900. It has an hospital and manufactories of cloth.

THÄNGELSTADT, a village of Saxe-Weimar, on the Schwarz, to the SE of Tanrode. Pop. 250.

THANNHAUSEN, a town of Bavaria, capital of a seignory of the same name, in the circle of Swabia, on the Mindel, 1½ m. NE of Ursberg. Pop. 1,500.

THANNHEIM, a village of the grand-duchy of Baden, in the circle of the See, to the SW of Villingen. Pop. 680.—Also a village of Württemberg, in the circle of the Danube, bail. and 14 m. NNE of Leutkirch, near the l. bank of the Iller. Pop. 600.

THARAND, or **GRANATEN**, a town of Saxony, in the circle of the Erzgebirge and bail. of Grillenberg, 8 m. SW of Dresden, to the N of a forest of the same name, on the Shlosbach, and at an alt. of 646 ft. above sea-level. Pop. in 1843, 1,733. It has a celebrated

agricultural school, library, museum, mineral baths, tanneries, and manufactories of linen. In the vicinity are the ruins of an ancient fortress of the same name.

THARSTON, a parish in Norfolk, 9½ m. S by W of Norwich. Area 1,582 acres. Pop. in 1851, 374.

THASSO, or **TASSO**, a beautiful island of the Archipelago, near the SE coast of Turkey in Europe, E of the gulf of Contessa, and separated from the continent by a channel 5 m. in width, in N lat. 40° 42' 2", E long. 24° 42' 30". It is in form an irregular oval, 19 m. in length from N to S, and 15 m. in breadth, and is covered with mountains clothed with wood, and giving rise to numerous streams. The soil, which is extremely fertile, produces corn, fruit, oil, and wine; and with wax and honey, forming important objects of commerce. It has quarries of marble, and is said to have formerly contained silver mines. It contains a small town, named Volgaro, and three villages, one of which bears the name of the island, and has a good port. The inhabitants are chiefly Greeks. This island was known to the ancients under the appellations, *Thasos*, *Ethria*, and *Aëria*.

THATCHAM, a parish in Berks, 3 m. E by N of Newbury, intersected by the river Kennet, and the Kennet and Avon canal. Area, including the chapelries of Greenham and Midgham, 12,259 acres. Pop. in 1831, 3,912; in 1851, 4,293.

THAU (ETANG DE), a lagoon of France, in the dep. of the Herault, separated from the Mediterranean by a narrow tongue of land, 14 m. in length from SW to NE, and 5 m. in extreme breadth. It receives on the SW the Canal-du-Midi, and communicates on the NE with the Etang-de-Magnolonne. The Canal-de-Cette connects it with the sea. Although salt on the surface, its waters at a certain depth are fresh and salubrious. At the SW extremity is a species of natural jet-d'eau, which is in constant action, and throws the water in large volumes to the height of several feet. This lagoon forms an important medium of communication between localities on the coast. Its waters abound with fish, and in summer its surface is literally covered with water-fowl. The principal places on its banks are Marseillan, Mire, and Balaruc.

THAUBATE. See **TAUBATE**.

THAUHA. See **JOAM-DO-PRINCÍPE**.

THAUMACO, a town of Turkey in Europe, in Thessaly, 19 m. NW of Zeitun, on a mountain.

THAUMIER, a village of France, in the dep. of the Cher, cant. and 7 m. N of Charenton, near the Auron, in the midst of lagunes. Pop. 1,046.

THAUM-PE, a district of the Birman empire, about 25 or 30 days NNE of Tongho, on the borders of Siam, which, when conquered by the Birmans, received from them the appellation of Tongsu. Its chief town, bearing the name of the district, is situated about 40 m. from the hills, in 19° N lat. The prov. is governed by a Birman chief, who resides at the capital, which is stockaded, and contains about 5,000 inhabitants. The face of the country is flat, and tolerably clear. Rice is cultivated to an extent sufficient for the consumption of the district. The inhabitants possess numerous herds of cattle, and a considerable number of small horses; a few buffaloes are employed in agriculture. Several kinds of cotton—one of which appears to be the brown or nankeen cotton—are grown; the tea-plant is also cultivated, and the leaves are pickled. Stick-lac is brought for sale in considerable quantities to Penang from this district; and the silk-worm is reared, being fed on the leaf of a plant called puja. Gold is found in the sands of the mountain-streams. Iron is abundant, and is

smelted and wrought into swords, knives, and other implements. Tin, after disappearing to the north of Tavoy, again presents itself here in considerable quantities, in the beds of rivers, in the form of a fine black sand. The most productive mines, however, are those of lead. The ore is obtained in lumps, but in what state of combination we are not informed. From these sources the annual exports to Rangoon are estimated at 120,000 rupees, and might, no doubt, be much extended. The natives carry back from Rangoon and other ports, salt, areca-nuts, salt fish, broad cloth, woollens, piece goods, crockery, and spices. A commercial intercourse is also maintained between T. and China. Traders from the frontier districts of the latter country bring spices, including the clove and nutmeg, silk, cloth, woollens, paints, papers, cutlery, and other articles, and take back the products of the country. They come annually in a caravan, consisting sometimes of 1,000 persons well-armed; the merchandise is transported by asses and horses.—The Plan, as the inhabitants of this district are called, are a distinct people from both the Siamese and Birmans, and also from the neighbouring tribes, in language, features, and character. They are shorter and less robust than the Birmans, and bear a greater resemblance to the Chinese than to any other people. Their dress partakes also of the Chinese costume. They wear their hair twisted into a knot like the Birmans, and are tattooed like those people and the Laos; like the former also they thrust small cylinders of wood or silver through holes made in the lobes of their ears. Their clothes are usually quilted, which they say is necessary owing to the frigidity of their climate. They are a lively, simple race, addicted to agricultural and commercial pursuits, and have readily been reduced to subjection by the Birmans and Peguers, for whom they, nevertheless, entertain a profound contempt, and from whose rule, whenever it becomes very irksome or oppressive, they withdraw into the thick forests, and the mountains in their vicinity. The Plan profess the faith of Buddha, and, like all Buddhists, burn their dead.

THAXTED, a parish in Essex, 17 m. NNW of Chelmsford, on the high road to Cambridge. Area 6,219 acres. Pop. in 1831, 2,293; in 1851, 2,556. The church, erected in the time of Edward II., presents one of the finest specimens of architecture in the co. The town, which is of great antiquity, is situated on the river Chelmer, near its source. The cutlery business, once carried on here to a great extent, has declined.

THAYA, THEYA, or TAYA, a river of Austria, formed by the junction of the Deutsche Thaya, and Mohrische or Bömische Thaya, the former of which has its source 12 m. ENE of Zwettler, and waters Altensteig, Windischsteig, Waidhofen, Thaya, Dobersberg, and Carlstein; and the latter in the mountains of the Moravian circle of Iglau, and bathes Teltsch and Daschitz, which unite in the archduchy of Austria, a little to the W of Raps. Thence the united stream flows NE past Drosendorf; enters Moravia, and forms to a considerable extent the line of separation between the circle of Znaym and the archduchy of Austria; it then takes first a SE, and afterwards a NE direction; waters Wottau, Frain, Hardeck, Znayn, and Laa; enters the circle of Brunn; passes Dürnholtz and Muschan, where it is joined on the l. by the Iglawa, with its tributary the Schwarza; it then turns SE; and after a total course of about 123 m., throws itself into the Morawa, on the r. bank, 2 m. ENE of Rabensburg. This river, which is remarkable for the number of its fords and bridges, is frequently confined within

lofty hills, while at other parts it divides into numerous branches, forming woody islands. Throughout the greater part of its course, its banks, from their low marshy character, are extremely insalubrious. At the junction of the Iglawa, it has a width of 100 yds., and a depth of upwards of 20 ft. It was crossed near Laa by the French after the battle of Wagram.—Also a town in the upper circle of the Manhartsberg, 3 m. N of Waidhofen, on the bank of the Deutsche Thaya.

THAYINGEN, or TAYGEN, a town of Switzerland, in the cant. and 5 m. NE of Schaffhausen, near the confines of the grand-duchy of Baden. Pop. 1,352. The environs are fertile, and produce corn, hemp, fruit, and wine.

THAZA, a town of Algeria, in the prov. and 90 m. SW of Algiers, near the source of the Oued Dourdour.

THEAKI. See ITHACA.

THEBERTON, a parish in Suffolk, 4 m. NE of Saxmundham. Area 1,954 acres. Pop. 591.

THEBES, a prov. of Upper Egypt, extending along both banks of the Nile; bounded on the N by the prov. of Girgeh, and on the S by Nubia. It is 180 m. in length, and comprises an area of 249 sq. m. Pop. about 90,000. Its chief towns are Gheneh, its capital, Coptos, Ghous, Esneh, Edfu, and Assuan. It is noted for the ruins of the ancient city of the same name, as well as those of Denderah, and other places of less importance.—The ruins of Thebes are situated 30 m. NNE of Esneh, and 300 m. SSE of Cairo, in a valley formed by the Arabian and Libyan mountains. They occupy a space on both banks of the Nile of about 9 m. in length, and 8 m. in breadth, and the circumference of the ancient city must have been about 30 m. The principal ruins are on the E side of the Nile, and of these the most remarkable is the temple of Karnak. It is oblong in form, of great extent, with a double colonnade at either extremity, and covered over the entire surface of its walls and columns with hieroglyphics. See KARNAK. On the same side is the temple of Memnon, and at Luxor is a palace with two fine obelisks of single blocks of red granite. See LUXOR. On the W bank of the Nile are also numerous ruins and avenues lined with rows of sphynxes. Leading from the valley of Thebes to the mountains is the pass of Biban-el-Melek, and at its extremity are the famous caverns supposed to have been the tombs of the Egyptian kings of the 18th and 19th dynasties. The pacha is now making extensive excavations at T.

THEBES, THIVA, or THIBAI, a town of Greece, capital of a district of the same name, 30 m. NW of Athens. Pop. 5,000. It is a poorly-built place, and presents few traces of its ancient magnificence, having been quite ruined in the war of independence. In August 1853, it suffered severely from a series of earthquakes. The locality affected by the shocks was the extent of country terminated on the N by Mount Atlante, on the E by the gulf of Euboea, on the S by the river Asopus, and on the W by Lake Copais. The central point of the impulse, or that at which it was felt with greatest force, was Mount Ptoos; under which is a gulf of Lake Copais.

THEBO, a town of Burmah, in the territory of Cochanchu, 114 m. E of Ava.

THEDINGHAUSEN, a town of the duchy of Brunswick, capital of a bail. enclosed within the kingdom of Hanover, and bounded on the N by the Weser. The town is about 2 m. from the l. bank of the Weser, and 5 m. S of Achim. Pop. 1,680. It has manufactories of linen, and tanneries, and carries on a considerable trade in linen-yarn.

THEDIRAC, a village of France, in the dep. of the Lot, cant. and 6 m. SSE of Salvias, at the foot of a high hill. Pop. 820.

THÉGONÉC (SANT), a canton and commune of France, in the dep. of Finistère and arrond. of Morlaix. The cant. comprises 4 coms. Pop. in 1831, 12,190; in 1846, 12,754. The village is 7 m. SW of Morlaix, on a rising ground. Pop. in 1846, 3,962. It has manufactories of fine linen.

THEIL (LÉ), a commune of France, in the dep. of the Manche, cant. and 5 m. SW of St. Pierre-Eglise, on a hill. Pop. 1,146.—Also a canton and commune in the dep. of the Orne and arrond. of Mortagne. The cant. comprises 10 coms. Pop. in 1831, 12,088; in 1846, 11,629. The town is 26 m. SSE of Mortagne, near the r. bank of the Huisne. Pop. 870.

THEIL (LÉ GROS), a commune of France, in the dep. of the Eure, 15 m. W of Louviers, in the cant. of Amfreville-la-Campagne. Pop. 1,145. It has several lime-kilns.

THEILLAY, or **TILLEY-LE-PAILLEUX**, a village of France, in the dep. of the Loir-et-Cher, cant. and 8 m. S of Salbris. Pop. 1,390.

THEISS, or **TISZA**, a large river of Hungary, which rises under the parallel of 48° 3' N, in the com. of Marmaros, on the NE frontier of the kingdom, in two streams called the Black and the White Theiss, descending from the Carpathians. These soon unite, and after flowing above 100 m. in a W direction, and passing Saigeth, Tecse, and Ujlak, a little above Nemeny, the united stream receives the Szamos, and turns N, and then W to Tokay, where it receives the Bodrog. It then pursues a S course, and flows into the Danube at Sankemen, below Titul, after a course of above 700 m. measured by the windings, but not exceeding 260 m. in direct distance. It receives a great number of rivers, some of them of large size, such as the Szamos, the Bodrog, the Sajó, the Zagyva, the Korosch, the Maros, the Aranka, and the Bega. It flows through so level a country as to be navigable to within a few miles of its source. All along the T. the soil is of the richest quality; in some places, as in the case of the valley of the Nile, the alluvial soil formed by a river traversing a sandy plain is not of great breadth, but in others the fat land extends to many miles on either side of the river. The present state of the valley of the T. is a double evil. Its pestilential atmosphere is fatal to colonization from the more densely populated and more industrious and civilized parts of the empire, while at the same time it creates a military barrier forming a focus for future rebellion. The desiccation of the T. would therefore be attended with a double benefit. Several millions of acres of the richest wheat land could be created by a systematic lateral canalization of the basin of the river; and in a military point of view, while the Carpathian arc of the military position, forming a rampart to the eastward, would remain, the chord separating the regions beyond the T. from the other western parts of the monarchy would in a great measure disappear. No river in Europe is more abundant in fish. It is the *Tibiscus* of Ptolemy, the *Tibis* of Herodotus, and the *Patisius* of Latin writers.

THEIX, a village of France, in the dep. of Morbihan, 6 m. SE of Vannes.

THELBRIDGE, a parish in Devonshire, 7 m. E by S of Chulmleigh. Area 2,240 acres. Pop. 260.

THELNETHAM, a parish in Suffolk, 14 m. NE of Bury St. Edmund's. Area 1,773 acres. Pop. in 1851, 562.

THELO (SAINT), a village of France, in the dep. of Cotes-du-Nord, 4 m. SSW of Uzel.

THELVERTON, or **THELTON**, a parish of Nor-

folk, 1½ m. N by E of Scole. Area 1,050 acres. Pop. in 1851, 154.

THELWALL, a hamlet of Cheshire, 9½ m. NW by N of Nether Knutsford.

THEMAR, a town of the duchy of Saxe-Coburg, on the r. bank of the Werra, 11 m. SE of Meiningen. Pop. 1,200. It is the chief place of a bailiwick, long the common property of the houses of Saxe-Coburg and Saxe-Gotha.

THEMILTHORPE, a parish of Norfolk, 3 m. WNW of Reepham. Area 652 acres. Pop. 93.

THENELLES, a village of France, in the dep. of Aisne, cant. and 8 m. N of Ribemont. Pop. 950.

THENEZAY, a town of France, in the dep. of Deux-Sevres, 14 m. NE of Parthenay. Pop. 1,500.

THENFORD, a parish of Northamptonshire, 5½ m. NW by W of Brackley. Area 890 acres. Pop. in 1851, 132.

THENINGEN, a village of Baden, on the Elz, 10 m. N by W of Freyburg. Pop. 1,300.

THENNENBRONN, a village of Baden, 7 m. SE of Hornberg, on the Schiltach. Pop. 1,200.

THENON, a town of France, in the dep. of the Dordogne, 6 m. NW of Montignac.

THEODORA, an islet off the N coast of Candia, in N lat. 35° 31', E long. 23° 54'.

THEODOSIA. See **KAPPA**.

THEODOSIA (SAINT), a small island in the N. Pacific, in N lat. 62° 20'.

THEODUNA, a town of Albania, in the sanj. and 30 m. SSE of Janina.

THEOG, a small village on the range of the Himalaya, immediately S of the Sutledge, 22 m. E by N of Simla, on the road to Mattiana. Barley ripens here in June at an alt. of 8,000 ft. above sea-level.

THEOPOLIS, a missionary village of S. Africa, on the l. bank of the Kasuga, 10 m. SW of Bathurst.

THEOTSAK, a town of Bosnia, in the sanj. and 65 m. ENE of Trawnik, on an affluent of the Drin.

THERAD, a town of Hindostan, in the prov. of Gujerat, and district of Neyer, 60 m. NW of Patan, in N lat. 24° 37'. It contains nearly 3,000 houses, and is surrounded by a wall and dry ditch. The palace and temple are lofty buildings; but the houses are seldom more than one story high. The district attached to this town contains 32 villages; but water is scarce, and the cultivation is scanty.

THERAIN, a river of France, which rises in the dep. of Seine-Inferieure, 6 m. E of Forges, and joins the Oise, on the r. bank, after a SE course of 50 m.

THERALPHENE, a village of Belgium, in S. Brabant, 12 m. WNW of Brussels.

THERESA (SANTA), a river of Brazil, which descends from the Cordillera-Grande, in the prov. of Goyaz, and joins the Tocantins 30 m. WSW of Natividade, after a course of 180 m.

THERESIENFELD, a town of Lower Austria, 4 m. N of Neustadt.

THERESIENSTADT, or **MARIEN-THERESIENSTADT**, or **THERESIANOPOL**, a town of Hungary, in the palatine of Bacs, 27 m. SW of Debreczin. It is an assemblage of villages, consisting of upwards of 3,000 cottages, inhabited by 22,000 inmates, partly of Servian, partly of Rascian descent, and depending for their support chiefly on the extensive townlands, amounting to 340 sq. m. The town is open, but has large barracks. It has a pretty active traffic in cattle, horses, wool, and hides. There are no collective manufacturing establishments, but a number of individuals work at their own homes, chiefly, if not exclusively, for the use of their townsmen. Of these, weavers and tanners are the most numerous; the women make linen, carpets, and aprons, also soap.

THERESIENSTADT, a town of Bohemia, situate-

ed in the angle formed by the Elbe and the Egra, at their junction, 31 m. NNW of Prague. It is to be considered rather as a fortress than a town, the civil inhabitants, only 1,000 in number, depending chiefly for subsistence on the garrison.

THERESIOPEL, a town of Hungary, in the com. of Temesh, 20 m. N of Temesvar, inhabited by a Bulgarian colony.

THERFIELD, a parish of Hertfordshire, 2½ m. SW by S of Royston. Area 4,761 acres. Pop. 1,335.

THERMEH, a village of Asiatic Turkey, in the pash. of Sivas, 130 m. W by N of Trebizond, on the l. bank of a river of the same name, which falls into the Black sea, 3½ m. W of Cape Tchaldi, after a N course of 120 m.

THERMIA, or *Στῆρος*, an island of European Turkey, in the archipelago of the Cyclades, situated about 40 m. NW of Paros, and 25 m. SSE of Cape Colonna, the S point of Attica, in N lat. 37° 26'. It is 13 m. in length from NNE to SSW, and about 5 m. in breadth. Its surface is less mountainous than that of the surrounding islands, and the cultivated tracts are of considerable fertility, producing silk, cotton, wheat, barley, wine, honey, and wax. Its inhabitants, amounting to 6,000, are Greeks. It takes the name of Thermia from its hot springs, and has a village of the same name.

THERMOPYLÆ, a pass in the NE of Greece, at the N foot of Mount Ceta, on the S side of the gulf of Zeitun, near the embouchure of the Hellada or Sperchius, in N lat. 38° 52'. It consists of a narrow passage between high cliffs on one side, and the sea or an impassable marsh formed by alluvial deposits, on the other. It extends on the whole not less than 5 m.; but the breadth of the passable ground, only 50 or 60 paces in the time of the ancient Greeks, is now nearly doubled, from the retiring of the sea and the deposit of alluvial soil. The cliffs overhanging the pass are in general from 400 to 600 ft. in height, and the situation would be admirable for defence, were it the sole entrance into the N of Greece; but there are paths over the mountains which were used subsequently by the Gauls, the Romans, and even by the Huns. "This passage," says Dr. Wordsworth, "was the scene of numerous struggles at various periods of Greek history. It was defended by the Phocians against the Thessalonians; subsequently, by Leonidas and his 300 Spartans, against Persia; again by the Ætolians against Philip, by Antiochus against the Romans, and by the Greeks against Brennus and the Gauls. In the three latter instances, the same manœuvre—namely, the detachment on the parts of the aggressors of a force which, having scaled the heights of Anopsea or Callidromus, was to fall on the rear of the defenders of the pass—was uniformly resorted to, as it had been employed by the Persians, and with the same success. The pass of T. was never stormed by main force: its conqueror, and its only one, has been Nature. So great is the change which has been effected by her means in the character and features of the place, that it has ceased to be an object of military importance. While the river Spercheius has brought down in its channel a copious supply of alluvial deposit on the coast, the waters of the Malian gulf have retired so far to the NE as to extend what was once a narrow defile of a few yards into a broad and swampy plain. When such a revolution has been wrought in the grander features of this remarkable place—when the rivers which flowed through the pass of T. have formed for themselves new beds—when fields of rice, and salt pits, occupy the place which was once sea, it is agreeable to observe that the smaller objects which were characteristic of the spot in the time of Leoni-

das, are still visible here, to call to the mind of the traveller that he is treading the soil of Thermopylæ. The hot springs which supplied a name to the place, and which are connected with the history both of Hercules and Leonidas, still flow from the earth and expand their streams into pools of the clearest blue, as they did in the ages of the demi-god and of the king, while the broad Spercheius has wandered from its course, and while it is no longer possible to trace upon the spot the ancient coastline of the Malian sea."

THEROUANNE, a town of France, in the dep. of Pas-de-Calais, 7 m. S of St. Omer. It was a fortress so lately as 1553, when it was taken by the Austrians and demolished.

THERY, a village of Hindostan, in the prov. of Malwah, in N lat. 24° 45'.

THESSALONICA. See *SALONICHI*.

THESSALY, or *Τρικαλα*, a province of European Turkey, extending in an oblong form from N to S; and bounded on the N by Macedonia; on the E by that part of the Ægean which forms the gulf of Salonica; on the S by Greece; and on the W by the high Pindus range. It has an area of 5,500 sq. m.; and while mountainous, presents many fertile plains watered by streams descending from the mountains on the W, and flowing to the Ægean. These plains, equally renowned in ancient times for pasture and tillage, still continue highly fertile, producing maize, wheat, rice, vines, silk, cotton, and tobacco, and the cultivation extends a considerable way along the acclivities of the mountains. The chain of Pindus, traversing the W part of the prov., forms the watershed between the Ionian sea and the Archipelago. The high lying tracts nourish large flocks of sheep, and wool forms a considerable article of export. Of the rivers, the most remarkable is the Salembria or *Peneus*, a full and rapid stream flowing from W to E, and traversing towards its mouth the celebrated vale of Tempe. The Aspropotamos or *Achelous* traverses the W part of the prov. The pop. is about 250,000, of whom scarcely one-fifth are Turks, two-fifths are Albanians, and the remainder Greeks and Vlacks. A recent well-informed writer, to whose pen we are mainly indebted for the only accurate details of the recent insurrectionary movement in Epirus and Thessaly, says: "It is not everybody who knows how much the Greek element in Epirus and Thessaly owes to Ali Pasha of Janina. This extraordinary man, who had conceived the idea of creating an empire for himself, saw from the beginning the necessity of severing the ties which connected the provinces under his sway with the Ottoman empire, by raising the subject populations from their degradation and gaining their support. Being himself an Albanian, he knew well enough how unruly the Albanian spirit is, and how difficult to tame; he crushed it, therefore, mercilessly, while he did his utmost to promote Greek nationality in Epirus and T., and finished by making the Greek the official language, which it remains until this day, in these provinces. This latter measure had an incredible influence on the spreading of the Greek language. It has now become the only written language in the country, and even Albanian chiefs and the Turkish authorities use it among themselves. Nobody except the pashas, who have to correspond with other pashalics or with Stambul, have Turkish secretaries; all the rest employ Greek *grammatikoi*. Since the establishment of the kingdom of Greece the opportunity for strengthening the Greek element in Epirus and T. has much increased, owing to the constant communication which was kept up with Greece, to the great number of Greek

subjects established in these provinces for the sake of commerce, and lastly, to the schools in Greece. The Christians of Epirus and T. having but very few and badly organized schools at home, an evil for which their rapacious bishops are more to be blamed than the Turks, send their children, whenever they can afford it, to Greece to study there and learn a handicraft. These youths, when they return, become the most active propagandists of Hellenism, and they had considerable share in preparing their countrymen for the late invasion. In this way the Greek element in Epirus and T. increased daily in strength, and exerted also considerable influence over the Christian populations of other races. The large Slavonic pop. which occupied once a great part of these countries has mostly yielded to this influence; it has been nearly entirely assimilated, and it is only here and there, in more retired spots—for instance, in the mountains of Zagori—that one finds traces of it. The Vlacks and Christian Albanians have escaped this fate, but they could not help being influenced by the movement of the Greek spirit, and being to a certain point carried away by its impulse. These Vlacks, who inhabit the central and upper ranges of the Pindus, form part of the numerous Vlack colonies scattered all over the Turkish empire south of the Danube down into Greece Proper, and designated by the Moldo-Wallacks as *kutzo* or 'lame Vlacks,' a term very likely indicating that they are considered as degenerate scions of the Rumanian race. They themselves disclaim all relationship with the Moldo-Wallacks, and pretend to be the descendants of the Roman garrisons and the natives of the countries they inhabit. They are partly nomade and partly settled, the first occupying the highest chain of the Pindus, the second spreading down through the lower ranges towards the plains of T. and Macedonia. Both speak their own language, similar to that spoken in the principalities, although many Vlacks know Greek too. They have likewise preserved their ancient customs, and are, curiously enough, the only people in those parts who have something like a feeling of their nationality. This is so much the more interesting as they form so small a portion of the population (80,000 to 100,000,) and as the Greeks and Albanians of Epirus and T. have not the slightest feeling of that kind. This feeling of nationality is principally strong among the nomade Vlacks. Occupying the most out-of-the-way plateau of the Pindus, little or not at all frequented even by their lowland neighbours, they have formed there a little world of their own. Every village forms a separate (nearly independent) community, paying a small tribute to the Turkish government, but governed by its own *kodjabashis* or 'elders,' according to its old customs. These nomade Vlacks are for the most part employed as shepherds, cattle breeders, and muleteers, and wander about in those qualities over all the Turkish empire. Many of them settle for a while as merchants in towns, but they retain their affection for their native mountains, and return to them nearly always after having made their fortune, in order to pass there the remainder of their lives."

THETFORD, a chapelry in Stretham p., Cambridgeshire, 2½ m. S by W of Ely. Area 1,630 acres. Pop. in 1831, 257; in 1851, 366.

THETFORD, a borough and market-town, chiefly in the hund. of Shropham, Norfolk, but partly in Suffolk, on the Little Ouse river, which divides the counties, 28½ m. SW by W of Norwich, and 80 m. NNE of London, on the railway from London to Norwich. It comprises three parishes, namely, St. Cuthbert, St. Peter, and St. Mary the Less. Area

8,270 acres. Pop. in 1801, 2,246; in 1831, 3,462 in 1851, 4,075. It is irregularly built and widely spread, the houses being in many parts separated by gardens, small pastures, and other enclosures. The Little Ouse in its course through the town is here joined by the Thet, a small tributary stream, the name of which appears to have been given to the town. The environs and surrounding country are open, and the latter is thinly peopled and divided into immense farms, with sheep-walks and corn-fields. There is a mineral-spring in the neighbourhood of the town, similar to those of Tunbridge and Toplitz, and a suite of baths has been erected. A trade is carried on in barges through the Ouse navigation, by way of Lynn, chiefly in the import of coals, and the export of corn, wool, and other agricultural produce. Coarse woollen cloth, paper, and iron are made, and there are four large breweries. T. at one period had 20 parish churches and 8 monasteries, besides other religious and charitable foundations; in virtue of which it was called in past ages, *Hierapolis* or *Monachopolis*. The borough jail and house-of-correction is of considerable extent. The income of the old corporation, in 1833-4, was £1,054; in 1849, £713. T. has returned 2 members to parliament ever since 1 Edw. VI. The number of electors in 1837, was 155; in 1852, 200.

THEUREN, a village of the duchy of Saxe-Meiningen, bail. and 3 m. NE of Schakan, on the Grümphen. Pop. 135.

THEUX, a département, commune, and town of Belgium, in the prov. of Liege, and arrond. of Verviers. Pop. of dep. 4,472. The town is 6 m. SW of Verviers, in a hollow, on a stream of the same name. Pop. 1,202. It has a fulling and several spinning mills, manufactories of cloth, and iron fineries. It is said that Louis-le-Debonnaire and his son Lothaire had a palace in this locality.

THEVE, a river of France, which issues from a lagoon in the NW extremity of the Seine-et-Marne, a little to the N of Dammarville, runs first N; enters the dep. of the Oise; bends, and after a course of about 18 m., joins the Oise on the l. bank, 4 m. ESE of Beaumont-sur-Oise.

THEVENARD, an island of the Pacific, off the NW coast of Australia, in S lat. 21° 26', and E long. 114° 54'.

THEYS, a commune of France, in the prov. of the Isère, cant. and 4 m. SSE of Goncelin, on a river of the same name, a small affluent of the Isère. Pop. in 1846, 2,518. It has quarries of fine marble.

THEYSING, **THEUSING**, or **TEYSING**, a town of Bohemia, in the circle and 30 m. NW of Pilsen, on the Strzela. It has manufactories of vitriol, alum, and cloth.

THEYSS. See **THEISS**.

THEZAC, a village of France, in the dep. of the Charente Inferieure, cant. and 7 m. NNE of Cozes. Pop. 560. It has a church, now partly in ruins.

THEZAN, a village of France, in the dep. of the Hérault, cant. and 2 m. SE of Murviel, on a mountain. Pop. 1,050.

THEZE, a canton and commune of France, in the dep. of the Basses-Pyrenees, and arrond. of Pau. The cant. comprises 21 com. Pop. in 1831, 7,818; in 1846, 7,707. The village is 13 m. N of Pau, on a mountain, near the r. bank of the Luy-de-France. Pop. 517.

THIAGO-DE-CACEM (SAN), a town of Portugal, in the prov. of Alentejo, comarca and 36 m. NW of Ourique, at the foot of a hill, crowned with a castle, and on the N bank of the Pera lagoon, a gulf of the Atlantic, which forms a small port. Pop. 2,050. It has an hospital, an alms-house, and a Latin school.

THIAGUR, or **TIAGUR**, a fortress of Hindostan, in the prov. of the Carnatic, situated on a mountain, in N lat. $11^{\circ} 45'$, E long. $79^{\circ} 10'$, 52 m. WSW of Pondicherry. It was taken by the French in 1760, and retaken by the British in the following year.

THIAN, a town of the Corea, in the prov. of King-ki-tao, 18 m. NNE of Han-yang.

THIAN-CHAN, a town of the Corea, in the prov. of Hwang-hai, 18 m. SE of the embouchure of the Ya-lu-keang.

THIAN-CHAN-NANLU, or **TEEN-CHAN-NANLU**, See **TURKESTAN**.

THIAN-CHAN-PELU, or **TEEN-CHAN-PELU**. See **SUNGARIA**.

THIAN-CHANG, or **TEEN-CHANG**, a district and town of China, in the prov. of Gan-hwuy, and dep. of Sze-chu, in N lat. $32^{\circ} 41'$, and E long. $118^{\circ} 55'$.

THIAN-CHIN, a district and town of China, in the prov. of Shan-se, div. and 54 m. NE of Tae-tung-fu, near the Great wall, in N lat. $40^{\circ} 28' 30''$, and E long. $114^{\circ} 3'$. It is of considerable extent, and is enclosed by lofty brick walls, but has few inhabitants.—Also a district and town in the prov. of Kwei-chu, and div. of Chin-yuen-fu, in N lat. $26^{\circ} 45'$, and E long. $108^{\circ} 58'$.

THIANETHI, a town of Russia in Asia, in Georgia, in the prov. of Kakhethi, district and 30 m. WNW of Thelavi, on the Jora.

THIANGES, a village of France, in the dep. of the Nievre, cant. and 6 m. NNE of Decize. Pop. 328. It is noted for its coals.

THIAN-HI-CHAN, a mountain of China, in the prov. of Yun-nan, and div. of Chu-ning-fu, on the r. bank of the Lan-sang, in N lat. $23^{\circ} 50'$, and E long. $100^{\circ} 22'$. It is covered with perpetual snow.

THIAN-HO-HEEN, a district and town of China, in the prov. of Kwan-si, div. and 27 m. N of King-yuen-fu, in N lat. $24^{\circ} 48'$, and E long. $108^{\circ} 20'$, on the l. bank of the Lung-keang.

THIAN-KEANG, a district and town of China, in the prov. of Sze-chuen, and div. of Chung-chu, in N lat. $30^{\circ} 30'$, and E long. $107^{\circ} 24'$.

THIAN-KEOU-CHAN, **TEN-HOU-SAN**, or **IGOUCH-KUND**, a mountainous island of China, near the W coast of the Great Lu-chu island, in N lat. $26^{\circ} 43'$, and E long. $128^{\circ} 4'$. It is visible from a distance of 90 m., and presents on all sides the same aspect. It is covered from the base upwards to a third of its height with houses, and resembles a garden placed in the midst of the sea.

THIAN-MEN-CHAN, a mountain of China, in the prov. of Kan-suh, and dep. of Kwang-chung, in N lat. $34^{\circ} 32'$, and E long. $104^{\circ} 32'$. It is covered with perpetual snow.

THIAN-MUN, a district and town of China, in the prov. of Hu-pih, and div. of Gan-luh-fu, in N lat. $30^{\circ} 40'$, and E long. $118^{\circ} 5'$.

THIAN-PAON-HEEN, a district and town of China, in the prov. of Kwan-se, and div. of Chin-gan-fu.

THIAN-PIH, a district and town of China, in the prov. of Kwang-tung, div. and 36 m. SE of Kaou-chu-fu, in N lat. $21^{\circ} 30'$, and E long. $110^{\circ} 22'$, on the China sea. It has a spacious port, well defended by several forts, but barred at the entrance by sand-banks.

THIAN-PO, or **TEM-ro**, a town of China, in the Great Lu-chu island, and prov. of Chung-chan.

THIANS, a commune of France, in the dep. of the Seine, cant. and 2 m. SSE of Villejuif, in a fine plain, surrounded by hills. Pop. 1,035. It is well-built, and is surrounded by numerous country houses.

THIAN - SHAN, **SHU-SHAN**, or **TENGRI - TAGH**, (Snowy mountains), a chain of mountains, in the Chi-

nese empire, on the N confines of Chinese Turkestan, and to the S of Sungaria, and extending E from the meridian of 80° to that of 95° , or the W frontier of the prov. of Kansu. It forms the NW buttress of the great central plateau of Asia. On its N side, in $42^{\circ} 25'$ N lat., between Korgos and Koutche, is the volcano of Pe-shan (White mountain), now said to be dormant. On the same side is the solfatara of Urumtsi, the crater of which is 15 m. in circumference, and is in active operation, and near it is another active volcano. All these afford large quantities of sal-ammoniac. On the S side is the volcano of Turfan or Ho-chu, near which was a town of the same name. The highest portion of this chain consists of three summits covered with perpetual snow, and known as the Bokdaoola or Holy mountain.

THIAN-SING. See **TEEN-TSIN**.

THIAN-SUN, a lofty mountain peak in China, in the prov. of Yun-nan, div. of Ta-le-fu. It is noted for its marble.

THIANT, a village of France, in the dep. of the Nord, cant. and 5 m. SW of Valenciennes, on the l. bank of the Ecaillon. Pop. 933. It has a church adorned with fine bas-reliefs.

THIAN-TAE, a district and town of China, in the prov. of Che-keang, and div. of Tae-chu-fu, in N lat. $29^{\circ} 10'$, and E long. $120^{\circ} 3'$.

THIAN-TSEUEN-CHU, a district and town of China, in the prov. of Sze-chuen, and div. of Ya-chu-fu, in N lat. 30° , and E long. $102^{\circ} 20'$.

THIAUCOURT, a town of France, in the dep. of the Meurthe, on the small river Madive, 25 m. NW of Nancy. Pop. 1,400.

THIBAUD-DE-CUZE (**SAINT**), a village of Savoy, 9 m. NNE of Echelles. Pop. 1,100.

THIBERVILLE, a town of France, in the dep. of the Eure, on the river Arve, 11 m. E of Lisieux. Pop. 1,300.

THIBERY (**SAINT**), a village of France, in the dep. of Herault, cant. and 4 m. S of Pezenas. Pop. 1,600.

THIBET. See **TIBET**.

THICKLEY, a hamlet in the county of Durham, 4 m. SE of Bishops Auckland.

THICOURT, a village of France, in the dep. of the Moselle, cant. and 4 m. SSE of Fauquemont. Pop. 400.

THIECOURT, a village of France, in the dep. of Oise, cant. and 2 m. SE of Lassigny. Pop. 1,250.

THIEL, a town of Holland, in the prov. of Gelderland, situated in a fertile district, near the river Waal, 20 m. SE of Utrecht. It has 4,100 inhabitants, employed partly in manufactures of linen and salt, partly in a traffic in corn, fruit, and provisions.

THIELE, or **ZIHL**, a river of Switzerland, which rises on the E flank of the Jura, and after a SW course of 18 m. enters the lake of Neufchatel, whence it issues at the NE extremity, and soon after expands into the lake of Bienné, a few leagues below which it joins the Aar, on the l. bank, 9 m. NNE of Aarberg, after a course of about 60 m.

THIELRODE, a village of Belgium, in the prov. of E. Flanders, 6 m. NNE of Dendermonde, on the l. bank of the Durme.

THIELT, a town of Belgium, in the prov. of W. Flanders, situated at the foot of an eminence, 18 m. WSW of Ghent. Pop. 12,000. It has considerable manufactures of linen and lace, also of soap, glue, leather, and hats, and numerous distilleries and bleachfields.—Also a village in the prov. of Brabant, 24 m. ENE of Brussels.

THIEMBROUNNE, a village of France, in the dep. of Pas-de-Calais, 3 m. NW of Fauquemont. Pop. 1,200.

THIEMENDORF, a village of Prussian Silesia, 3 m. E of Lauban. Pop. 1,200.

THIENGEN, a town of Baden, formerly the capital of the district called the Clettgau, 18 m. W of Schaffhausen, and 3 m. E of Waldshut, on the r. bank of the Wutach. Pop. 900.

THIENNES, a village of France, in the dep. of Nord, 6 m. SSW of Hazebrouck. Pop. 1,100.

THIERACHEREN, a village of Switzerland, in the cant. and 15 m. SSE of Bern. Pop. 803.

THIERGARTEN, a village of Hungary, in the com. and 30 m. NNW of Gömör, on the Gran near its source.

THIERMAUPTEN, a village of Bavaria, on the r. bank of the Acha, 15 m. N of Augsburg.

THIERS, a town of France, in the dep. of Puy-de-Dôme, on the declivity of a hill, which is skirted by the small river Durole, 23 m. E by N of Clermont. Pop. 8,800. The buildings in the outskirts of the town have a pleasing appearance; but the interior presents dark, crowded, and winding streets, bordered with gloomy and ill-built houses. It is, however, a place of considerable activity, being inhabited entirely by artisans and manufacturers. The principal branch of its industry is hardware, and particularly cutlery, which employs here and in the neighbourhood, upwards of 20,000 workmen. It has likewise extensive tanneries and paper manufactories.

THIERSHEIM, a village of Bavaria, 6 m. NE of Wunsiedel. Pop. 700.

THIERSTEIN, a town of Bavaria, in the principality of Baireuth, 25 m. SSE of Hof.

THIETREVILLE, a village of France, in the dep. of Seine-Inférieure, 12 m. NW of Yvetot.

THIEULAIN, a village of Belgium, in the prov. of Hainaut, 24 m. NW of Mons.

THIL, a village of France, in the dep. of Landes, cant. and 9 m. ESE of Pouillon. Pop. 1,300.

THILEUR, a village of Belgium, in the prov. and 3 m. SW of Liège, on the l. bank of the Meuse. Pop. 600.

THILOUZE, a village of France, in the dep. of Indre-et-Loire, cant. and 6 m. ESE of Azay-le-Rideau. Pop. 1,200.

THIMBDA, a village of Tunis, 8 m. SW of Dersa.

THIMBLEBY, a parish of Lincolnshire, $1\frac{1}{2}$ m. NW of Horncastle. Area 1,770 acres. Pop. 492.

THIMBLE ISLANDS, a group of small islands, near the coast of Connecticut, U. S., in N lat. $41^{\circ} 11'$.

THINGWALL, a township and village of Cheshire, $5\frac{1}{2}$ m. N by W of Great Neston. Area of t., 370 acres. Pop. in 1851, 96.

THINUSTERRE, a town of Belgium, in the prov. and 14 m. E of Liège. Pop. of cant. 2,800.

THIONVILLE, a town of France, the capital of an arrondissement, in the dep. of Moselle, situated on the Moselle, 19 m. N of Metz. Pop. 4,000. It is well-built; and though a small place, is of considerable strength, and has stood several sieges. It has manufactories of stockings, hats, and glass.

THIRD (POINT), a cape on the E coast of Sumatra, in the straits of Banca, in S lat. $2^{\circ} 24'$.

THIRKLEBY, a township in the E. R. of Yorkshire, 10 m. E by S of New Malton. Area 1,343 acres. Pop. in 1851, 50.—Also a parish in the N. R., $4\frac{1}{2}$ m. SE of Thirsk. Area 2,597 acres. Pop. in 1851, 300.

THIRLBY, a township of Felixkirk p., Yorkshire, 5 m. ENE of Thirsk. Area 575 acres. Pop. in 1851, 113.

THIRLEMERE-LAKE, or LEATHES-WATER, a narrow, irregular sheet of water, skirting the immense base of Helvellyn for about 4 miles, and re-

ceiving a variety of torrents from the sides of that huge mountain, in the parish of Crosshwaite, Cumberland. This lake, situated between Keswick and Grasmere, has an elevation of 500 ft. above sea-level. Its shores are indented, and, near the middle, it becomes so contracted that it is spanned by a few rude arches for the convenience of the neighbouring population.

THIRLWALL, a township of Haltwhistle p., Northumberland, near the borders of Cumberland. Area 7,944 acres. Pop. in 1831, 382; in 1851, 425.

THIRNE, or **THORN**, a township of Thornton-Watlas p., Yorkshire, 4 m. SW by W of Bedale. Area 413 acres. Pop. in 1831, 142; in 1851, 127.

THIRSK, a borough and parish in the N. R. of Yorkshire, 23 m. NW by N of York, and within $1\frac{1}{2}$ m. of the Great North of England railway. It is divided by the river Cudbeck into two parts, which are connected by two small but handsome stone-bridges. The p. includes the chapelry of Carlton-Islebeck or Miniott, Sandhutton, and Sowerby, besides the township of T. Area of p. 8,354 acres. Pop. in 1801, 2,916; in 1831, 3,829; in 1851, 4,704.

—The old town is chiefly composed of one long street. The vicinity is entirely agricultural, but the neat village of Sowerby is within $\frac{1}{2}$ m. of the town, while those of Miniott and Sandhutton lie about 1 m. to the W. The manufacture of coarse linen and sacking has been carried on in this parish. This borough returned 2 members to parliament till the passing of the Reform act, when its representation was limited to one. The number of electors registered in 1837, was 302; in 1852, 357. The new borough comprises the p. of Thirsk, the township of S. Kilvington in the p. of that name, and the township of Bagby in the p. of Kirby Knowle. T. is a polling-place at the elections for the north riding of the county.

THIRSTON (East and West), a township in Felton p., Northumberland, $9\frac{1}{2}$ m. S by E of Alnwick, on the S bank of the river Coquet. Area 1,161 acres. Pop. in 1831, 307; in 1851, 281.

THIRSTY-SOUND, a bay on the E coast of Australia, in S lat. $22^{\circ} 6'$.

THISSELT, a town of Belgium, in the prov. and 13 m. S of Antwerp. Pop. 1,740. It has breweries, salt-refineries, and flour-mills.

THISTED, a town of Denmark, in Jutland, on the NW coast of the Lymfjord, 48 m. NW of Viborg. Pop. 2,200. It has a small port, which, in 1842, was entered by 268 vessels.

THISTLE-ISLAND, an island on the S coast of Australia, at the mouth of Spencer's gulf, in S lat. $34^{\circ} 56'$. It is about 12 m. long, and from 1 to 3 m. in breadth.

THISTLETON, a parish in Rutlandshire, $7\frac{1}{2}$ m. NE by N of Oakham. Area 1,420 acres. Pop. 142.

THIVA. See **THERES**.

THIVIERS, a town of France, dep. of the Dordogne, 20 m. NW of Périgueux. Pop. 1,400. It has manufactures of paper, leather, and stone-ware, and a trade in cheese and truffles.

THIXENDALE, a township in Wharram-Percy p., Yorkshire, $8\frac{1}{2}$ m. SE of New Malton. Area 3,697 acres. Pop. in 1831, 207; in 1851, 266.

THIZY, a town of France, dep. of the Rhone, situated on an eminence, 20 m. W by N of Villefranche. Pop. 1,600. It has manufactories of linen and calicoes.

THOARD, a town of France, dep. of Basses-Alpes, near the small river Raduge, 6 m. NW of Digne. Pop. 1,000.

THOCKRINGTON, or **TOCKERINGTON**, a parish in Northumberland, 10 m. N by E of Hexham, including the townships of Little Barrington, Cary

Coats, Sweethope, and T. Area 6,943 acres. Pop. in 1831, 203; in 1851, 173.

THOIRAS, a village of France, in the dep. of Gard, 18 m. ENE of Vigan. Pop. 500.

THOIRE, a village of France, in the dep. of Sarthe, cant. and 4 m. NNE of Chateau-du-Loir. Pop. 1,000.

THOIRY, a village of Savoy, 6 m. ENE of Chambéry. Pop. 1,350.

THOISSEY, a town of France, dep. of Ain, on the small river Chalaronne, 11 m. S of Macon.

THOLEN, or TER THOLEN, a town of Holland, in the prov. of Zeland, on the island of Tholen, 4 m. NW of Bergen-op-Zoom. It contains about 1,900 inhabitants, who are partly employed in the spinning of yarn, a branch of industry carried here to great nicety and perfection. The surrounding country is appropriated to the culture of flax and madder.—The island of T., situated near the mouth of the Scheldt, is about 12 m. long and 6 m. broad. It is separated from Brabant by an arm of the East Scheldt, and is fertile and well cultivated.

THOLEY, a village of Prussia, in the prov. of the Rhine, 26 m. SE of Treves. Pop. 700.

THOLLEMBECQUE, a village of Belgium, in the prov. of S. Brabant, 18 m. SW of Brussels. Pop. 2,530. It has breweries and distilleries.

THOLLON, a town of Savoy, 29 m. ENE of Geneva, at the N foot of the Dent-d'Hoche. Pop. 1,200.

THOLTHORPE, a township in Alne p., Yorkshire, $\frac{1}{2}$ m. SW of Easingwold. Area 1,690 acres. Pop. in 1831, 265; in 1851, 303.

THOLY (L^e), a village of France, in the dep. of Vosges, cant. and 9 m. NE of Remiremont. Pop. 1,200.

THOMAR, a town of Portugal, in Estremadura, near the r. bank of the river Nabão, an affluent of the Zezere, 17 m. NNW of Abrantes. Pop. 3,700. It is regularly built, and has an establishment for spinning cotton, a silk-mill, some soap-works, and a little trade in olive oil.

THOMAS CREEK, a river of S. Carolina, U. S., which runs into the Great Pedee.

THOMAS (SAINT), a considerable island in the gulf of Guinea, off the W coast of Africa, about 100 m. W from the mouth of the Rio-Gabon, in N lat. $0^{\circ} 14' 42''$. It appears to be about 25 m. in length from NNE to SSW; and is entirely of volcanic formation, attaining in one of its peaks an alt. of 7,020 ft. The face of the low country is undulating and adorned with luxuriant verdure. Situated immediately under the line, the excess both of heat and moisture renders it extremely pernicious to the health of European residents. The Dutch took possession of it in 1641; but were soon induced by its unhealthiness to abandon it. The soil is clayey, frequently coarse, and mixed with chalk. Such is its fertility, that a plantation, when once abandoned, is almost entirely overgrown with luxuriant vegetation. Rice and millet are successfully cultivated, though yams, sweet cassava, and other roots are chiefly used by the inhabitants. Fish, turtle, poultry, hogs, sheep, and goats are abundant. The only important article raised for exportation is sugar, for which the soil is extremely well fitted. The inhabitants, from 15,000 to 20,000 in number, consist partly of Portuguese, the descendants chiefly of outlaws and banished persons, sent hither on the first discovery of the island; and partly of Negroes, either native or brought over from the coast of Angola. On the E part of the island, facing the continent, is built the town of Povoacon or Saint T., consisting of 700 houses, and defended by several forts. The safest anchorage is in Man-of-War

bay, on the NE side of the island.—Off the SW end of the island is a small islet named Ilha-das-Rolas.

THOMAS (SAINT), the principal of the Virgin islands, in the West Indies, in N lat. $18^{\circ} 20'$, W long. $64^{\circ} 55'$, belonging to Denmark. It is 12 m. in length from E to W, and about 3 m. in average breadth. Its surface is rugged and elevated. The soil is sandy. It produces potatoes, millet, manioc, fruits, sugar, and tobacco, but is extremely infested with mosquitoes and other troublesome vermin. About one-half of the cultivation is sugar-cane. It has been adopted as a principal station of the West India mail-steamers from Southampton. Most of the houses of its capital, Charlotte-Amalie, are of brick, and built and tiled in the Dutch fashion. The streets of the town are clean and well regulated, and though Negroes are to be met with on all sides, they are decently dressed, respectful in their demeanour, and all seem to have some honest method of earning their daily bread. The harbour is defended by several fortifications of ancient date, and rather defective construction. The military, however, preserve admirable order in the town. If two people quarrel, they are immediately taken to the fort, which is prison as well as fortification. Every offence seems to be punished by fine, and this method touching the inhabitants in the tenderest spot of all—the pocket—is found the most effectual. Fighting, thieving, and other minor offences are all punished in this way, and in consequence there is but little crime.—St. T. is a free port, and a depot for all vessels visiting these seas. In 1688, the Danish factory here was attacked and plundered by the French buccaneers. In March 1801, it was taken by the British. It was given up at the peace of Amiens; but was again taken in the course of the subsequent war, and was restored to Denmark at the peace of Paris in 1814. The pop. is about 14,000.—St. T. is 3,622 m. sailing distance from Southampton; 1,031 m. from Havanna; 151 m. from St. Kitts; and 860 m. from Nassau.

THOMAS (SAINT), a village of Lower Canada, on the S bank of the St. Lawrence, where it is joined by the Riviere-du-Sud.

THOMAS (SAINT), a parish in Devon, a $\frac{1}{2}$ m. S by W of Exeter, containing the town of St. Thomas, which is united with Exeter by a bridge across the Exe, and within the boundaries of the borough of Exeter. Area 3,700 acres. Pop. in 1831, 4,203; in 1851, 4,577.—Also a parish adjoining Launceston borough, in Cornwall. Area 1,817 acres. Pop. in 1831, 626; in 1851, 1,005.

THOMASTON, a township of Lincoln co., in the state of Maine, U. S., on the E side of George's river, and 36 m. SE of Augusta. Pop. in 1840, 6,227; in 1850, 2,732.—Also a village of Upton co., in the state of Georgia, 69 m. W by S of Milledgeville. Pop. in 1840, 150; in 1850, 180.

THOMASTOWN, a parish in co. Kildare, 2 m. SE of Rathangan. Area 853 $\frac{1}{2}$ acres. Pop. in 1831, 139; in 1841, 119.—Also a hamlet in the p. of Relickmurry, co. Tipperary, 2 m. W by S of Golden-Bridge. Pop. in 1841, 139.—Also a parish and town in co. Kilkenny. Area of p. 2,041 acres. Pop. in 1831, 3,182; in 1841, 2,744.—The town, formerly a parl. borough, stands on the river Nore, $\frac{3}{4}$ m. NW of Innistogue. The river Nore divides it into two sections, placing the larger section on the l. bank. A handsome stone-bridge of 5 arches connects the two sections of the town. Pop. in 1841, 2,348.

THOMASVILLE, a village of Thomas co., in the state of Georgia, U. S., 169 m. S by W of Milledgeville.

THOME (SAINT), a village of France, in the dep.

of the Ardeche, cant. and 4 m. WNW of Viviers, at the confluence of the Escontay and Negue. Pop. 472.

THOME (SAINT), or **MAILAPORAM**, a town of Hindoostan, in the presidency and 6 m. S of Madras, in the Karnatic, on a small bay at the extremity of a fine plain. It consists of about 100 detached houses, intermingled with numerous ruins, and has two Roman Catholic churches. Its inhabitants are chiefly Portuguese, Hindus, and Mussulmans. It has some calico manufactures. This town was built amid the ruins of Mailaporam, which was taken by the Portuguese in 1545, and their chief establishment on the Coromandel coast. It fell successively into the hands of the French and Dutch, and ultimately into those of the English, in 1749.

THOME (SAO). See **THOMAS (SAINT)**.

THOME (SAO), or **AKNA-DE-CHAVES**. See **THOMAS (SAINT)**.

THOME-DE-LA-GUAYANA (SAN). See **ANGOSTURA**.

THOMERY, a commune of France, in the dep. of the Seine-et-Marne, cant. and 3 m. NNW of Moret, on the l. bank of the Seine. Pop. 782. It has two fine castles, and is noted for its fruit, and especially for a fine species of grape.

THOMOND—originally **TUAIDE-MUIN**, or **NORTH MURTERA**—an ancient district of Ireland, of fluctuating extent and changeful political character, identical, in a general view, with the present NW of the prov. of Munster. In 1800, Murrough, fifth Earl of Inchiquin, was created Marquis of Thomond, in the peerage of Ireland. In 1826, the second Marquis of Thomond was created Baron Tadcaster, in the peerage of Great Britain.

THOMPSON, a township of Wyndham co., in the state of Connecticut, U. S., 46 m. ENE of Hartford, drained by French, Quinnebaug, and Five-Mile rivers, and intersected by the Norwich and Worcester railroad. Pop. in 1840, 3,536; in 1850, 4,638.—Also a township of Susquehanna co., in the state of Pennsylvania, 184 m. NNE of Harrisburg. Pop. in 1840, 325; in 1850, 400.—Also a township of Geauga co., in the state of Ohio, 190 m. NE of Columbus. Pop. in 1840, 1,028; in 1850, 1,211.—Also a township of Seneca co., in the same state, 84 m. N of Columbus, and intersected by the Mad river and Sandusky railroad. Pop. in 1840, 1,404; in 1850, 1,668.—Also a township of Delaware co., in the same state, on the W side of Scioto river. Pop. in 1840, 660.—Also a village of Warren co., in the state of Georgia, 38 m. W of Augusta, on the Georgia railroad.—Also a township of Pike co., in the state of Arkansas. Pop. in 1840, 390.

THOMPSON, a river of Australia Felix, in the district of Gipp's Land, an affluent of Lake King.—Also a mountain of New South Wales, in the co. of Stanley, to the E of Mount Hallen.

THOMPSON, or **TOMROX**, a parish in Norfolk, 2½ m. S by E of Watton. Area 2,890 acres. Pop. 496.

THOMPSONTOWN, a village of Juniata co., in the state of Pennsylvania, U. S., 36 m. NW of Harrisburg, on the Juniata river and Pennsylvania canal. Pop. in 1840, 350.

THOMPSONVILLE, a village of Hartford co., in the state of Connecticut, U. S., 20 m. N of Hartford, at the junction of Freshwater and Connecticut rivers. Pop. in 1840, 800.—Also a village of Thompson township, Sullivan co., in the state of New York, 105 m. SSW of Albany. Pop. in 1840, 150.

THON, a department and commune of Belgium, in the prov. of Namur, on the Meuse. Pop. of dep. 695; of com. 515. It has several iron works and quarries of stone.

THONANCE-LES-JOINVILLE, a village of France, in the dep. of the Haute-Marne, cant. and 2 m. NE of Joinville, on the Montreuil, a little above its junction with the Marne. Pop. 1,000. It has a blast furnace.

THONES, a town of Sardinia, capital of a mandamento, in the prov. of Guergio, 7 m. ESE of Anecy, near the confluence of the Fier and Nom, and at the junction of three great valleys. Pop. 2,500. It is triangular in form, and has three gates. The houses are built on low arcades. The public square is spacious, and in its centre is the church. It has extensive manufactories of agricultural implements, and of kirchwasser and saffron; several silk-mills and tanneries; and carries on an active trade with the adjacent valleys.

THONG (NETHER), a chapelry in Almondbury p., in Yorkshire, 4½ m. S of Huddersfield. Area 850 acres. Pop. in 1851, 1,207.

THONG (UPPER), a township and village in Almondbury p., in Yorkshire, 5 m. S of Huddersfield. Area of t. 710 acres. Pop. in 1831, 1,648; in 1851, 2,463. The village is well-built, and has several woollen mills.

THONHAUSEN, a town of the duchy of Saxe-Altenburg, 8 m. SE of Ronneburg. Pop. 680.

THONIN BAY, an indentation of the E coast of Van Diemen's land, on the E side of Freycinet's peninsula, in the co. of Glamorgan.

THONIS. See **TONIS**.

THONISBERG. See **ANTONISBERG (St.)**.

THONLAGEE, or **TONLAGEE**, a mountain in co. Wicklow, 2½ m. N of Wicklow-Gap, with an alt. above sea-level of 2,307 ft.

THONNE-LE-THIL, a village of France, in the dep. of the Meuse, cant. and 4 m. N of Montmedy, on the l. bank of the Thonne, a small affluent of the Chiers. Pop. 540. In the vicinity are several iron mines.—At the distance of 3 m. ESE is the village of Thonne-la-Long.

THONNELLES, a village of France, in the dep. of the Meuse, cant. and 2 m. N of Montmedy, on the Thonne. Pop. 320. It has iron-works.

THONON, a town of Sardinia, capital of the prov. of Chablais, 14 m. SW of Lausanne, and 21 m. NE of Geneva, on the S bank of the lake of that name, which here forms a bay also named Thonon, and at an alt. of 482 yds. above sea-level. Pop. 4,000. It is irregularly built, and consists of two parts distinguished as the upper and lower town. In the former, which is the larger, is the principal church, the college, and town-house. The lower town consists of only two streets, one of which terminating at the lake, crosses the other at right angles. A small esplanade, planted with trees and adorned with a fountain surmounted by an obelisk of grey marble, occupies the site of a fortress destroyed in the 14th century, by the Bernese and Vallaisans, and affords a fine view of the town, lake, and cant. of Vaud. It has manufactories of pottery, and carries on an active trade. The environs are fertile and well-cultivated. About 2 m. SW is a mineral spring, and a little to the NNE is the castle of Ripaille, an ancient Augustine convent, founded by Amedeus, eighth Duke of Savoy. Thonon is of great antiquity. It was destroyed by the Burgundians in the 5th cent., and a portion of the town and the castle were destroyed in the 14th cent. by the Bernese. It was the cap. of the French dep. of the Leman.

THOORA, a town of Sind, on the road from Cutch to Hyderabad, and 55 m. S of the latter place.

THOR (DAS HOHE), a mountain of Upper Austria, in the circle of Salzburg, having an alt. of 7,720 ft. above the level of the sea.

THOR (Lx), a commune of France, in the dep. of

Vaulcuse, cant. and 3 m. WNW of L'Isle, on the Sorgue. Pop. in 1846, 3,881. It has manufactures of madder, and a considerable trade in grain and hay. Silk is cultivated in the environs.

THORAISE, a village of France, in the dep. of the Doubs, cant. and 1 m. N of Roussieres, on the l. bank of the Doubs, and at the foot of a hill. Pop. 228.

THORAS, a village of France, in the dep. of the Haute-Loire, cant. and 7 m. S of Saugues, on the l. bank of a stream of the same name, an affluent of the Ance. Pop. 1,100.

THORDA, or THORENBURG, a county of Transylvania, nearly in the centre of the principality, having the co. of Clausenburg to the N, and that of Weissenburg to the S. Its area of 1,600 sq. m. is very hilly, but presents many pleasant valleys, and is watered by the Maros, the G6rgeny, the Lucz, and the Aranyos. It has productive mines of salt and of iron, and extensive forests. The pop. in 1841 was 68,000.—Its capital of the same name is a considerable town, 17 m. SSE of Clausenburg, situated near the river Aranyos, and divided by a smaller stream called the Salzbach, into an old and new town. It contains about 8,000 inhabitants, whose chief source of subsistence is the salt trade, there being rich salt-mines in the neighbourhood. These mines were wrought in the time of the Romans, who had here a town called *Salina*, the ruins of which are still visible on an eminence close by the town. The Hungarian language is spoken here in great purity.

THORE, a river of France, which rises 6 m. SW of Saint-Pons-de-Thomières, in the dep. of Hérault, and after a WNW course of 30 m., falls into the Agout on the l. bank.—Also a village of France, in the dep. of Loir-et-Cher, cant. and 4 m. W of Vendome, near the l. bank of the Loir.

THORENS-SALES, a town of Savoy, 16 m. SSE of Geneva, on the Fillieve. Pop. 2,500. It has large glass-works.

THORESBY (NORTH), a parish of Lincolnshire, 9 m. N by W of Louth. Area 2,485 acres. Pop. in 1851, 733.

THORESBY (SOUTH), a parish of Lincolnshire, 3½ m. W by N of Alford. Area 933 acres. Pop. in 1851, 156.

THORESWAY, a parish of Lincolnshire, 4 m. SE of Caistor. Area 2,730 acres. Pop. 135.

THORGANBY, a parish of Lincolnshire, 6 m. ESE of Caistor. Area 1,568 acres. Pop. in 1851, 120.—Also a parish in the E. R. of Yorkshire, 10 m. SE by S of York. Area 3,190 acres. Pop. in 1851, 388.

THORIGNY, a town of France, dep. of La Manche, near the river Vire, 9 m. SE of St. L6. Pop. 2,200.—Also a village of France, in the dep. of Yonne, 9 m. NE of Sens. Pop. 700.—Also a village in the dep. of Seine-et-Marne, 1 m. NE of Lagny.

THORINGTON, a parish of Suffolk, 8 m. SE of Halesworth. Area 1,800 acres. Pop. in 1851, 157.

THORLEY, or THORNLEY, parish of Hertfordshire, 2 m. SW by S of Bishop's Stortford. Area 1,516 acres. Pop. in 1851, 402.—Also a parish in the Isle of Wight, 1 m. ESE of Yarmouth. Area 1,574 acres. Pop. in 1851, 154.

THORMANBY, a parish of the N. R. of Yorkshire, 4 m. NW by N of Easingwold. Area 958 acres. Pop. in 1851, 154.

THORN, a town of West Prussia, in the gov. and 50 m. SSW of Marienwerder, pleasantly situated on the r. bank of the Vistula, about 90 m. from the mouth of that river, over which it has a wooden bridge of nearly a ¼ m. in length. It consists of an old and new town, which are separated from each other by a wall and ditch, but are both

surrounded by one mound and moat. It was formerly considered a place of great strength. Its population in 1846 was 12,687, partly Protestants, partly Catholics. It has manufactories of woollens, linen, hats, soap, leather, gloves, and starch; and exports corn and wood, but the extent of its trade is less considerable than formerly, the Vistula having here become more shallow, so that vessels of burden can no longer come up to the town. Its best edifices are of old date. It enjoyed a considerable share of prosperity until the 18th cent.; but in 1708 and 1710 it was ravaged by the plague. In 1793 it was taken possession of by a Prussian garrison. In the end of 1806 it suffered from the invasion of the French, and remained in their hands until 1812. The well known Copernicus was born at Thorn in 1742.

THORN, a small town of Dutch Limburg, 7 m. SSW of Ruremonde, formerly the seat of a richly endowed abbey. Pop. 1,162.

THORN, a township of Perry co., in the state of Ohio, U. S. Pop. in 1840, 2,007.

THORNABY, a chapelry in Stainton p., Yorkshire, 3½ m. N by E of Yarm, on the E bank of the Tees. Area 1,230 acres. Pop. in 1851, 1,759.

THORNAGE, a parish in Norfolk, 2½ m. WSW of Holt. Area 1,266 acres. Pop. in 1851, 349.

THORNBOROUGH, a parish in Bucks, 3½ m. E by S of Buckingham. Area 2,530 acres. Pop. 754.

THORNBURG, a village of Spottsylvania co., in the state of Virginia, U. S., 76 m. NNW of Richmond, on both sides of Ta river.

THORNBURY, a township of Chester co., in the state of Pennsylvania, U. S., 20 m. SW of Philadelphia. It has a level surface, and is drained by Chester creek and Brandywine river. The soil is chiefly sandy loam. Pop. in 1840, 230.—Also a township of Delaware co., in the same state, 20 m. W of Philadelphia. It has a hilly surface, and is drained by Chester creek. The soil consists of sandy loam. Pop. in 1840, 675.

THORNBURY, a parish in Devon, 5 m. NE of Holsworthy, on the river Waldon. Area 2,772 acres. Pop. in 1831, 546; in 1851, 489.

THORNBURY, a parish and market-town in the co. of Gloucester, on the banks of a small rivulet in Berkeley vale, 24 m. SW by S of Gloucester, and 3½ m. E of the mouth of the Severn. The p. comprises the chapelrys of Falfield, Oldbury-upon-Severn, and Rangeworthy, with the tythings of Kington and Moorton, and has an area of 15,732 acres. Pop. in 1801, 2,488; in 1831, 4,375; in 1851, 4,614. The church is a spacious and handsome structure in the cathedral form, with a lofty tower. The town consists principally of three streets, disposed in the form of the letter Y; or, "having one longe street," as Leland remarks, "and two hornes goyne out of it." The principal object of notice in this place is the remains of a magnificent palatial castle, begun by Stafford, Duke of Buckingham; but, in consequence of his attainder and death, in the reign of Henry VIII., never finished.—Also a parish in Herefordshire, 4 m. NNW of Bromyard. Area 2,130 acres. Pop. in 1851, 196.

THORNBURY, or THURNBY, a parish in Northamptonshire, 10 m. NW of Northampton. Area 1,212 acres. Pop. in 1831, 198; in 1851, 220.

THORNCOMBE, a parish in Devon, 5½ m. NE by E of Axminster. Area 4,896 acres. Pop. 1,317.

THORNCOTE, a hamlet in Northill p., Bedfordshire, 3½ m. W by N of Biggleswade. Pop. 208.

THORNDON, a parish in Suffolk, 2½ m. S by W of Eye, and within the parliamentary boundaries of the borough of Eye. Area 2,680 acres. Pop. 725.

THORNDYKE, a township of Waldo co., in the

state of Maine, U. S., 42 m. NE of Augusta. It has a finely diversified surface, and is drained by a branch of Sebasticook river. The soil is generally fertile. Pop. in 1840, 897.

THORNE, a parish and market-town in the W. R. of Yorkshire, 26 m. S by E of York, and intersected by the river Don, and the Stainforth and Keadby canal. Area of p. 11,900 acres. Pop. in 1831, 3,779; in 1851, 3,484. The town is tolerably well-built, and consists principally of three nearly parallel streets. The rivers Don, Aire, and Ouse, communicating with each other, and with the Stainforth and Keadby canal, have greatly contributed to the increase of the carrying trade of this place. Coasting-vessels are built here and floated to Hull.

THORNE-COFFIN, a parish in Somerset, 2½ m. NW by W of Yeovil. Area 410 acres. Pop. in 1831, 101; in 1851, 102.

THORNE-FALCON, a parish in Somersetshire, 3½ m. E by S of Taunton. Area 814 acres. Pop. in 1831, 273; in 1851, 229.

THORNE-GRAFTON, a township in Haltwhistle p., Northumberland, 10 m. W by N of Hexham.

THORNE-ST.-MARGARET, a parish in Somersetshire, 3 m. W by N of Wellington, crossed by the Western canal, and near the Bristol and Exeter railway. Area 805 acres. Pop. in 1851, 143.

THORNER, a parish and village in the W. R. of Yorkshire, 5½ m. S by W of Wetherby, comprising the townships of Scarcroft, Shadwell, and T. The village consists of one long street. Area 4,380 acres. Pop. in 1831, 1,220; in 1851, 1,530.

THORNES, a chapelry in Wakefield p., Yorkshire, ½ m. S by W of Wakefield. The village of T. is included within the boundaries of the par. borough of Wakefield.

THORNEY, a parish and market-town in the Isle of Ely, co. of Cambridge, 10 m. NW by W of Marsh. Area of p. 17,590 acres. Pop. in 1831, 2,055; in 1851, 2,174. The church consists of part of a celebrated abbey of Anchorites founded here in 972. Many of the inhabitants are descendants of French Protestants.—Also a parish in Notts, 8 m. E by N of Tuxford, comprising the hamlets of Broadholme and Wigglesley. Area 4,140 acres. Pop. in 1831, 308; in 1851, 412.

THORNEY (WEST), or **THORNEY ISLAND**, a parish in Sussex, 6½ m. W by S of Chichester, near the centre of the estuary called Chichester harbour. Area 3,005 acres. Pop. in 1851, 111.

THORNEYBURN, a parish in Northumberland, 4½ m. NW by W of Bellingham. Area 20,133 acres. Pop. in 1831, 334; in 1851, 340.

THORNFORD, a parish in Dorset, 3½ m. SW by S of Sherborne. Area 1,407 acres. Pop. 410.

THORN-GUMBALD, a chapelry in Paul p., Yorkshire, 10 m. E by S of Kingston-upon-Hull. Area 1,450 acres. Pop. in 1831, 266; in 1851, 278.

THORNHAM, or **THURNHAM**, a parish in Kent, 3½ m. N by E of Maidstone. Area 3,319 acres. Pop. in 1831, 571; in 1851, 511.—Also a township in Middleton p., Lancashire, 3½ m. S by W of Rochdale. Area 1,998 acres. Pop. in 1831, 1,455; in 1851, 1,510.—Also a parish in Norfolk, 6½ m. W by N of Burnham-Westgate. Area 2,934 acres. Pop. in 1831, 668; in 1851, 792.

THORNHAM (GREAT), a parish in Suffolk, 3½ m. WSW of Eye. Area 1,324 acres. Pop. 322.

THORNHAM (LITTLE), a parish in Suffolk, 2½ m. W by S of Eye. Area 676 acres. Pop. 155.

THORNHAUGH, a parish in Northamptonshire, 9 m. WNW of Peterborough. Area 1,796 acres. Pop. in 1831, 271; in 1851, 266.

THORNHILL, a township in Hope p., co. of Derby, 5½ m. NE by N of Tideswell. Area 589

acres. Pop. in 1831, 135; in 1851, 131.—Also a tything in Stalbridge p., Dorset, 2 m. S of Stalbridge. Pop. in 1831, 257; in 1851, 266.—Also a parish in the W. R. of Yorkshire, 5½ m. W by S of Wakefield, on the S bank of the Calder, and crossed by the Manchester and Leeds railway. It comprises the chapelry of Flockton, and the townships of Shildington, Lower Witley, and T. Area 7,997 acres. Pop. in 1831, 6,271; in 1851, 6,858. The church consists of a nave, chancel, and side aisles, with a tower. Manufactures of woollens, chemical and glass-works, and large collieries, exist in this p. The v. was formerly a place of importance, and adorned by a magnificent castellated mansion, belonging to the Thornhills and Savilles, which was demolished by the parliamentarians in the civil wars.

THORNHILL, a village in the p. of Morton, Dumfriesshire, on the post-road between Glasgow and Dumfries, 8 m. ENE of Minnyhive, and 12 m. SE by S of Sanquhar, on the summit of a terrace-formed rising ground, between 200 and 300 ft. high, and from 2½ to 5 f. E of the Nith. Its streets are spacious, and the houses are, for the most part, uniform one-story cottages. An extensive manufacture of hosiery was, for a series of years, conducted in workshops; but has declined. A tannery, a brewery, and a few remaining stocking-loomers alone prevent its manufactures from being entirely domestic. The village is wholly under the superiority of the dukes of Buccleuch, and, since 1827, has been very greatly and liberally improved by the present duke. Pop. in 1817, 750; in 1831, 1,373; in 1851, 1,658.

THORNHILL, a village of Upper Canada, 11 m. from Toronto, on a branch of the river Don. Pop. 700.

THORNHOLME, a township in Burton-Agnes p., Yorkshire, 5 m. SW by W of Bridlington. Area 1,324 acres. Pop. in 1831, 93; in 1851, 100.

THORNLEY-WITH-WHEATLEY, a township in Chipping p., co.-palatine of Lancaster, 8 m. W by S of Clitheroe. Area 3,179 acres. Pop. 491.

THORNLIEBANK, a village in the p. of Eastwood, Renfrewshire, about 1½ m. S of Pollockshaws, upon the rivulet called Auldhouse-burn. It originated in manufactories and other works established here about the end of the 18th cent. Calico-printing, cotton-spinning, weaving by power and hand-loom, and bleaching, are carried on. The pop. amounts to about 1,600.

THORNSETT, a township in Glossop p., Derby, 5 m. NW of Chapel-in-le-Frith. Pop. in 1851, 869.

THORNTHWAITE, a chapelry and township in Crosthwaite p., Cumberland, 4 m. NW by W of Keswick. Pop. in 1831, 174; in 1851, 275.

THORNTHWAITE-WITH-PADSIDE, a chapelry and township in Hampthwaite p., Yorkshire, 12 m. W by N of Knaresborough. Area 1,960 acres. Pop. in 1831, 304; in 1851, 308.

THORNTON, a parish in Bucks, 4 m. ENE of Buckingham, crossed by the river Ouse, and the Buckingham canal. Area 1,332 acres. Pop. in 1831, 94; in 1851, 103.—Also a township in Northamptonshire, 4½ m. SW of Berwick-upon-Tweed. Area 1,390 acres. Pop. in 1831, 190; in 1851, 169.—Also a township in Poulton p., co.-palatine of Lancaster, 1½ m. N of Poulton, on the Wyre and Preston railway. Pop. in 1831, 842; in 1851, 1,013.—Also a township in Septon p., co.-palatine of Lancaster, 6½ m. N of Liverpool. Area 773 acres. Pop. in 1831, 342; in 1851, 298.—Also a parish and village in the co. of Leicester, 4½ m. NE by E of Market-Bosworth, intersected by the Leicester and Swannington railway, and containing the chapelry of Bagworth, and the township of Stanton-under-Bardon with Horsepool. Area 3,930 acres. Pop. in 1831, 1,078; in 1851, 1,350.—Also

a parish in Lincolnshire, $1\frac{1}{2}$ m. SW of Horncastle. Area 1,755 acres. Pop. in 1831, 216; in 1851, 240. —Also a parish in the E. R. of Yorkshire, 4 m. SW of Pocklington, including the townships of Melbourn and Storwood. Area 6,540 acres. Pop. in 1831, 791; in 1851, 816. —Also a chapelry and township in Bradford p., W. R. of Yorkshire, $3\frac{1}{4}$ m. W of Bradford. Area 4,390 acres. Pop. in 1831, 2,246; in 1851, 8,051. The woollen manufacture is extensively carried on here.

THORNTON, a township of Grafton co., in the state of New York, U. S., 52 m. N by W of Concord. It has a hilly surface, and is watered by Pemigewasset river and its affluent Mad river. Pop. in 1840, 1,012; in 1850, 1,045. —Also a township of Cook co., in the state of Illinois, 192 m. NNE of Springfield, on Thorn creek. Pop. in 1850, 400.

THORNTON-LE-BEANS, a township in North Otterton p., Yorkshire, $3\frac{1}{4}$ m. SE of North Allerton. Area 1,351 acres. Pop. in 1831, 219; in 1851, 247. —Also a chapelry and township in Ripon p., Yorkshire, $5\frac{1}{4}$ m. SW by S of Ripon. Area 3,027 acres. Pop. in 1831, 614; in 1851, 691.

THORNTON-CHILDER, a township in Eastham p., co.-palatine of Chester, 8 m. NNW of Chester. Area 723 acres. Pop. in 1831, 296; in 1851, 319.

THORNTON-LE-CLAY, a township in Foston p., Yorkshire, $11\frac{1}{4}$ m. NNE of York. Area 1,270 acres. Pop. in 1831, 205; in 1851, 266.

THORNTON-IN-CRAVEN, a parish in the W. R. of Yorkshire, 6 m. WSW of Skipton, crossed by the Leeds and Liverpool canal. Area 6,710 acres. Pop. in 1831, 2,246; in 1851, 2,202. Thornton-force is a picturesque cataract, issuing from an aperture in a high rock, and having a fall of about 90 ft. in one sheet of water 12 ft. wide.

THORNTON-CURTIS, or **THORNTON-UPON-HUMBER**, a parish in the co. of Lincoln, 5 m. SE by E of Barton-upon-Humber. Area 4,610 acres. Pop. in 1831, 362; in 1851, 497.

THORNTON-DALE, a parish in the N. R. of Yorkshire, $2\frac{1}{2}$ m. E by S of Pickering, comprising the townships of Farmanby and T. Area 1,066 acres. Pop. in 1831, 1,368; in 1851, 927.

THORNTON-HOUGH, a township in Neston p., co.-palatine of Chester, $2\frac{1}{4}$ m. NNE of Great Neston. Area 1,481 acres. Pop. in 1831, 144; in 1851, 164.

THORNTON-IN-LONSDALE, a parish in the W. R. of Yorkshire, $11\frac{1}{4}$ m. NW by W of Settle, comprising the chapelry of Black-Burton and the township of T. Area 11,432 acres. Pop. 1,130.

THORNTON-LE-MOOR, a township in North Otterington p., Yorkshire, $4\frac{1}{4}$ m. NW by N of Thirsk. Area 1,492 acres. Pop. in 1831, 337; in 1851, 339. —Also a parish in the co.-palatine of Chester, $5\frac{1}{4}$ m. WSW of Frodsham, containing the townships of Dunham, Elton, Hapsford, T., and Wimbolds-Trafford. Area 4,866 acres. Pop. in 1831, 914; in 1851, 942. —Also a parish in Lincolnshire, 6 m. SW of Caistor. Area 1,503 acres. Pop. in 1831, 99; in 1851, 108.

THORNTON-RUST, a township in Aysgarth p., Yorkshire, 9 m. W of Middleham. Area 1,923 acres. Pop. in 1831 and 1851, 158.

THORNTON-STEWARD, a parish in the N. R. of Yorkshire, $3\frac{1}{4}$ m. E by S of Middleham. Area 2,079 acres. Pop. in 1831, 310; in 1851, 304.

THORNTON-LE-STREET, a parish in the N. R. of Yorkshire, 3 m. NNW of Thirsk, comprising the townships of North Kilvington and T. Area 2,750 acres. Pop. in 1831, 226; in 1851, 234.

THORNTON-WATLAS, a parish in the N. R. of Yorkshire, 3 m. SW of Bedale, comprising the townships of Clifton-upon-Ure, Rookwith, Thirn, and T. Area 3,783 acres. Pop. in 1831, 448; in 1851, 421.

THORNTOWN, a village of Boone co., in the state of Indiana, U. S., on the N side of Prairie creek, and on the Lafayette and Indianapolis railroad, 37 m. NW of Indianapolis. Pop. 550.

THORNVILLE, a village of Perry co., in the state of Ohio, U. S., 35 m. E by S of Columbus, on the Scioto and Hocking Valley railroad. Pop. 200.

THOROE, a small island and parish of Denmark, in the Great Belt, bail. and 3 m. ESE of Svendborg, to the NE of the island of Taasing. Pop. 450. It is 3 m. in length, and 2 m. broad.

THOROLD, a township of Upper Canada, separated by Welland river, on the south from the township of Crowland, and intersected by the Welland canal. Pop. in 1840, 2,284. It has a village of the same name, situated on a mountain, 4 m. from St. Catharines, and near the Welland canal. Pop. in 1826, 1,000.

THORON, an island of the Baltic, near the E. coast of Sweden, in N lat. $58^{\circ} 49'$, E long. $17^{\circ} 48'$.

THOROTON, a parish in Notts, $7\frac{1}{4}$ m. SSW of Newark. Area 730 acres. Pop. in 1851, 177.

THOROUGHFARE, a village of Prince William co., in the state of Virginia, U. S., 88 m. W by N of Richmond, and intersected by the Manassasgap railroad.

THORPE, a parish in Derbyshire, 3 m. NW by N of Ashborne, on the E bank of the Dove. Area 1,400 acres. Pop. in 1831, 189; in 1851, 188. In this vicinity is the celebrated rocky vale called Dovedale. —Also a parish in Notts, $3\frac{1}{4}$ m. SW of Newark. Area 698 acres. Pop. in 1831, 39; in 1851, 115. —Also a parish in Surrey, 2 m. NW by W of Chertsey. Area 1,495 acres. Pop. in 1851, 555.

THORPE-ABBOTS, a parish in Norfolk, $4\frac{1}{4}$ m. NNE of Eye. Area 1,122 acres. Pop. in 1851, 258.

THORPE-ACHURCH, a parish in Northamptonshire, $4\frac{1}{4}$ m. NNE of Thrapstone, on the river Nene. Area 1,580 acres. Pop. in 1831, 240; in 1851, 242.

THORPE-ACRE-WITH-DISHLEY, a parish in Leicestershire, $1\frac{1}{2}$ m. WNW of Loughborough. Area 890 acres. Pop. in 1831, 366; in 1851, 260. The hamlet of Dishley was the residence of the celebrated agriculturist Bakewell, and is still in high repute for its breed of cattle and sheep.

THORPE-ARCH, a parish in Yorkshire, $2\frac{1}{2}$ m. SE by E of Wetherby, on the river Wharfe, which is here crossed by a handsome bridge of 4 arches. Area 1,607 acres. Pop. in 1831, 316; in 1851, 315.

THORPE-ARNOLD, a parish in Leicestershire, $1\frac{1}{4}$ m. ENE of Melton-Mowbray. Area 1,742 acres. Pop. in 1831, 117; in 1851, 122.

THORPE-AUDLING, a township in Badsworth p., Yorkshire, 4 m. SSE of Pontefract. Area 1,260 acres. Pop. in 1831, 355; in 1851, 315.

THORPE-IN-BALNE, a township in Barnby-upon-Don p., Yorkshire, 5 m. N by E of Doncaster. Area 1,507 acres. Pop. in 1831, 121; in 1851, 130.

THORPE-BASSET, a parish in the E. R. of Yorkshire, 4 m. E by N of New Malton. Area 1,792 acres. Pop. in 1831, 206; in 1851, 207.

THORPE-BOCHART, a parish in Nottinghamshire, 10 m. S by E of Nottingham. Area 930 acres. Pop. in 1831, 39; in 1851, 33.

THORPE-CONSTANTINE, a parish in the co. of Stafford, 4 m. NE by E of Tamworth. Area 953 acres. Pop. in 1831, 49; in 1851, 58.

THORPE-MALZOR, or **MALSOVERES**, a parish in Northamptonshire, $2\frac{1}{4}$ m. W by N of Kettering. Area 680 acres. Pop. in 1831, 297; in 1851, 287.

THORPE-MANDEVILLE, a parish in Northamptonshire, 7 m. NW by N of Brackley. Area 1,230 acres. Pop. in 1831, 175; in 1851, 151.

THORPE-MARKET, a parish in Norfolk, $4\frac{1}{4}$ m. NW by N of North Walsham. Area 1,309 acres.

Pop. in 1831, 254; in 1851, 221. The village is small, but handsome and picturesque.

THORPE-MORIEUX, a parish in Suffolk, 17 m. WNW of Ipswich. Area 2,457 acres. Pop. 414.

THORPE-NEXT-NORWICH, a parish in Norfolk, 2½ m. E of Norwich, comprising the hamlets of T. and Pockthorpe. Area 2,525 acres. Pop. in 1831, 2,151; in 1851, 3,000. The village is situated on the declivity of a hill which overlooks the city of Norwich on the opposite or W side of the Yare, which is here enlivened by the frequent passage of steam-packets, pleasure-boats, and wherries. The natural beauty of the vicinity has led to the erection of several elegant mansions or villas.

THORPE-SALVIN, a parish in the W. R. of Yorkshire, 13 m. SW of Bawtry, crossed by the Chesterfield canal. Area 2,180 acres. Pop. 513.

THORPE-SATCHVILLE, a chapelry and township in Twyford p., Leicestershire, 5½ m. S by W of Melton-Mowbray. Pop. in 1851, 159.

THORPE-LE-SOKEN, a parish in Essex, 8 m. SE by S of Manningtree. Area 3,203 acres. Pop. in 1831, 1,173; in 1851, 1,294.

THORPE-SUPER-MONTEM, a parish in Lincolnshire, 6 m. SW by W of Lincoln. Area 1,820 acres. Pop. in 1831, 273; in 1851, 379.

THORPE-UNDERWOODS, a township in Little Ouseburn p., Yorkshire, 6½ m. SE of Aldborough. Area 2,185 acres. Pop. in 1831, 144; in 1851, 163.

THORPE (West), or **THORPE-IN-THE-FALLOWS**, a parish in Lincolnshire, 7½ m. NW by N of Lincoln. Area 640 acres. Pop. in 1831, 62; in 1851, 56.

THORPE-WILLOUGHBY, a township in Brayton p., Yorkshire, 2½ m. WSW of Selby, intersected by the Leeds and Selby railway. Area 850 acres. Pop. in 1831, 148; in 1851, 161.

THORSENGE. See **TAASING**.

THORSHALLA, a village of Sweden, in the laen of Nyköping, near the SW shore of Lake Mälär. Pop. 500.

THORSHAVN, a town of the Faroe islands, on the SE coast of Stromoe. Pop. 500. It is the chief place in the archipelago, and has a Latin school and an hospital. It has a good port defended by fortifications, and possessing an active trade. The houses, about 100 in number, are small and built of wood.

THORVERTON, a parish in Devon, 6 m. E by N of Crediton. Area 4,036 acres. Pop. 1,511.

THOSOE, an island of the North sea, near the W coast of Norway, in the dio. of Drontheim and bail. of North Drontheim, and a little to the S of the island of Hotteren, in N lat. 63° 37', E long. 8° 27'.

THOSTE, a village of France, in the dep. of the Cote-d'Or, cant. and 6 m. NW of Precy-sous-Thil, on a height, near the l. bank of the Serain. Pop. 400.

THOU, a village of France, in the dep. of the Loiret, cant. and 9 m. SE of Briare. Pop. 390.

THOU (Ls), a village of France, in the dep. of the Charente-Inferieure, cant. and 3 m. SSE of Aigrefeuille. Pop. 700. It has the remains of the ancient castle of Sigogne.

THOUARCE, a canton and commune of France, in the dep. of the Maine-et-Loire and arrond. of Angers. The cant. comprises 20 coms. Pop. in 1831, 18,957; in 1846, 19,244.—The village is 15 m. S of Angers, on the r. bank of the Leyon. Pop. 1,671. The locality affords good wine.

THOUARE, a town of France, in the dep. of the Loire-Inferieure, cant. and 4 m. SE of Carquefou, in a marshy locality, near the r. bank of the Loire. Pop. 800.

THOUARS, a canton, commune, and town of France, in the dep. of the Deux-Sevres and arrond. of Bressuire. The cant. comprises 24 coms. Pop.

in 1831, 15,355; in 1846, 15,460.—The town is 17 m. NE of Bressuire, on the slope of a hill, near the r. bank of the Thoue. Pop. in 1846, 2,397. It is enclosed by walls partly in ruins, and has two fine churches, a communal college, two hospitals, fine promenades, one of which is in the centre of the town, and a castle. It possesses manufactories of woollen fabrics, linen, hats, cutlery, and tanneries; and carries on an active trade in corn, horses, mules, cattle, goats, fowls, hemp, nuts, almonds, and brandy. This town is of great antiquity. It was taken and fortified by Pepin in 758, and at a later period was ceded to the English, and rendered by them one of the places in Poitou; but in 1372, was taken by capitulation by Duguesclin. Towards the end of the 16th cent., it was erected into a duchy in favour of the lords of La Tremouille. The revocation of the edict of Nantes proved fatal to its prosperity. In 1793, it fell into the hands of the Vendéens.

THOUARSAIS, a village of France, in the dep. of La Vendee, cant. and 8 m. SW of Chataigneraye. Pop. 1,100.

THOUCHETHI, a canton of Russian Georgia, watered by the Upper Alasan. Its mountains are inhabited by the Tchouchi, a pastoral people, who profess the Greek religion.

THOUE, or **THOUET**, a river of France, which has its source in the dep. of the Deux-Sevres, at the village of La Pointerie; waters Secondigny, Parthenay, St. Loup, Airvault and Thouars; enters the dep. of the Maine-et-Loire; passes Montreuil-Bellay, and adjacent to Saumur, and a little below the latter town, throws itself into the Loire, on the l. bank at St. Hilaire, and after a course first in a NE direction, then N, and afterwards NNW direction of about 81 m. Its transports consist chiefly in grain, brandy, wine, and forage. Its principal affluents on the l. are the Cebron, Thouaret, and Argenton, and on the r. the Dive.

THOUIN, a village of Military Croatia, in the generalat and 21 m. SW of Cronstadt.

THOULOURENC, a river of France, which has its source in the mountain of Peyre-Belle, in the dep. of the Drôme; runs first S, then WNW; enters the dep. of the Vaucluse; flows through a narrow valley, at the foot of Mont Ventoux, and after a course of about 24 m. joins the Ouvèze, on the l. bank, 4 m. E of Vaison.

THOUNE. See **THUN**.

THOUNY, a nomadic Arab tribe, who inhabit the S part of the Persian prov. of Khorassan. They number about 16,000.

THOUNZA, a town of Burmah, in the territory of Cochanpri, 75 m. E of Ava, near the Myinguyammyt.

THOUR. See **TOA**.

THOURIE, a commune of France, in the dep. of the Ille-et-Vilaine, and cant. of Rhetiers. Pop. 1,047.

THOUROUT, a department, commune, and town of Belgium, in the prov. of West Flanders, and arrond. of Bruges. Pop. of dep. 8,204. The town is 11 m. SSW of Bruges. Pop. 2,505. It has manufactories of hats, linen, carding machines, earthenware, and chicory, and several oil-mills. It returns a deputy to the provincial states. This town is of great antiquity. An abbey is said to have been founded here by Dagobert I., which was given in 830 by Louis-le-Debonnaire to the bishop of Ham-bourg, and ultimately destroyed by the Normans.

THOURY, a village of France, in the dep. of the Eure-et-Loir, cant. and 2 m. E of Janville. Pop. 1,232. It has manufactories of beet-root sugar, and hosiery, has a considerable trade in horses, asses, mules, and cattle.—Also a village in the dep. of the

Ille-et-Vilaine, cant. and 6 m. SW of Retiers. Pop. 1,059.

THOURY-FEROLLES, a village of France, in the dep. of the Seine-et-Marne, cant. and 5 m. NNE of Lorrez-le-Bocage, on the slope of a hill, near the l. bank of the Oroanne. Pop. 570.

THOURY-SUR-ABRON, a village of France, in the dep. of the Nièvre, cant. and 4 m. ENE of Dorne. Pop. 326.

THOUSAND ISLANDS, a numerous group of islands in the St. Lawrence river, which is here from 2 to 9 m. broad, a little below Lake Ontario. The American portion of them belong to Jefferson co., in the state of New York, and the remainder to Canada. They are rocky, and generally covered with cedar and hemlock to the water's edge. Their number is estimated at 1,500, within an area of 27 m., and in many instances so close together as scarcely to allow passage to a canoe. The largest belonging to Canada are Grand and Howe islands, and to the United States, Carlton, Grindstone, and Wells. See *St. Lawrence*.

THOYDON-BOIS, a parish in Essex, 3 m. S by W of Epping. Area 2,176 acres. Pop. in 1851, 591.

THOYDON-GARNON, or **COOPERSHALL**, a parish in Essex, 2 m. SE by S of Epping. Area 3,161 acres. Pop. in 1831, 841; in 1851, 1,237.

THOYDON-MOUNT, a parish in Essex, 3 m. SE by E of Epping. Area 1,560 acres. Pop. 194.

THRACE. See *ROMELIA*.

THRANDESTON, a parish in Suffolk, 2½ m. NW of Eye. Area 1,375 acres. Pop. in 1851, 397.

THRAPSTON, a parish and market-town in Northamptonshire, 20 m. NNE of Northampton, on the river Nen, over which there is here a good stone-bridge. Area of p. 990 acres. Pop. in 1801, 675; in 1831, 1,014; in 1851, 1,183. The town, which consists of four streets disposed in the form of a cross, is in general well-built, and occupies a cultivated valley on the E banks of the Nen, which is navigable from Lynn to Northampton, and has greatly facilitated the trade of this place.

THRECKINGHAM, a parish in Lincolnshire, 2½ m. N by E of Folkingham. Area 2,270 acres. Pop. in 1831, 191; in 1851, 180.

THREE-BROTHERS, a group of mountains in New South Wales, in the co. of Macquarie. The most northerly is in S lat. 31° 43', and E long. 152° 45', and is visible at the distance sea-ward of about 60 m.

THREE-HILLS ISLAND, one of the New Hebrides, in the S. Pacific ocean, in S. lat. 17° 6'. It is about 12 m. in circumf.

THREE-HUMMOCK ISLAND, an island in the W part of Bass strait, in the group of Hunter Isles, between King's Island and the N extremity of Van Diemen's Land. It was discovered in 1798 by Flinders.

THREE-ISLANDS, small islands in the Eastern seas, near the E coast of Bintang, in S lat. 1° 10'.

THREE-ISLAND HARBOUR, a bay on the coast of Patagonia, in the straits of Magalhaen, 8 m. NNW of Bachelor's river.

THREE-ISLES, a group off the NE coast of Australia, in S lat. 15°.

THREE-KINGS, three small islands in the S. Pacific, in S lat. 34° 13'. They are all uninhabited, but the largest is said to have both pigs and goats running wild upon it.

THREE-POINTS CAPE, the N head of the entrance into Broken bay, on the E coast of Australia, in S lat. 33° 32½'.—Also a cape on the E coast of America, in the bay of Honduras, in N lat. 15° 56'.—Also a cape on the E coast of Patagonia, in S lat. 46° 50', forming the S extreme of St. George's gulf.

THREE-RIVERS, a village of St. Joseph's co., in the state of Michigan, U. S., on St. Joseph's river, near the junction of Portage river and Rocky creek.—Also a village of Palmer township, Hampden co., in the state of Massachusetts, 76 m. WSW of Boston, on Chicapee river, near the junction of Ware and Swift rivers, and intersected by the Amherst and Belcherton railway. Pop. in 1840, 100.

THREE-RIVERS, a town of Lower Canada, situated on the NW side of the river St. Maurice, at its confluence with the St. Lawrence, 90 m. from Quebec. It derives its name from the entrance into the former river being here separated by two islands lying in its mouth, into three channels. The town stands on a light and sandy soil, which extends also over the environs. Towards the St. Maurice the ground rises considerably, but in the opposite direction it sinks almost to a level with the river. The principal public buildings are the Ursuline convent, the Protestant and Catholic churches, the court-house, jail, and barracks. The major part of the private dwelling-houses are built of wood, the oldest of them only one story high, having small gardens about them; those of more recent date are in a better style. The trade carried on here is chiefly in British manufactured goods, which from hence are distributed through the middle district of the province. The exports consist of wheat, timber, and its iron foundry, and a small quantity of peltry. Several pot and pearl ash manufactories, and two or three breweries, and brick manufactories, considerably increase the general trade of the place. As a shipping port it is conveniently situated, there being a sufficient depth of water for ships of large tonnage to lie close to the wharfs, and receive or discharge their cargoes by a temporary stage from their gangways. The pop. in 1854 was 6,500.

THREE-RIVERS HARBOUR, a bay of Nova Scotia, on the E coast of Prince Edward's Island, in the gulf of St. Lawrence, in N lat. 46° 8', and W long. 66° 50'.

THRELKELD, a chapelry and township in Grey-stock p., Cumberland, 4 m. ENE of Keswick. Area 4,710 acres. Pop. in 1831, 320; in 1851, 387.

THRESHFIELD, a township in Linton p., Yorkshire, 8 m. N of Skipton. Area 2,644 acres. Pop. in 1831, 212; in 1851, 271.

THREXTON, a parish in Norfolk, 2½ m. W by S of Watton. Area 1,097 acres. Pop. in 1851, 61.

THRIALETHI, a district of Russia in Europe, in the gov. of Georgia. Its chief town is Tsalki.

THRICKBY, or **THROBY**, a parish in Norfolk, 6 m. WNW of Yarmouth. Area 575 acres. Pop. 49.

THRINGSTONE, a township in Whitwick p., co. of Leicester, 5 m. E by N of Ashby-de-la-Zouch. Pop. in 1831, 1,267; in 1851, 1,298.

THRINTOFT, a township in Ainderby-Steeple p., Yorkshire, 2½ m. W by S of Northallerton. Area 1,183 acres. Pop. in 1831, 170; in 1851, 160.

THRIPOW, a parish in Cambridgeshire, 7½ m. S of Cambridge. Area 2,489 acres. Pop. 521.

THROCKING, or **THORRING**, a parish in Hertfordshire, 1½ m. WNW of Buntingford. Area 903 acres. Pop. in 1831, 83; in 1851, 35.

THROCKLEY, a township in Newburn p., Northumberland, 6 m. NNW of Newcastle-upon-Tyne. Area 1,268 acres. Pop. in 1831, 208; in 1851, 159.

THROCKMORTON, a township and chapelry in Fladbury p., Worcestershire, 3½ m. NE of Pershore. Area 1,560 acres. Pop. in 1831, 159; in 1851, 153.

THROG'S POINT, a headland of Westchester township and co., in the state and 16 m. NE of New York. It has a fort erected for the defence of the entrance to Long Island Sound.

THRONSE, **TROENSES**, or **TROUSES**, a town of Den-

Figured by F. Fisher.

U. W. N.

A. F. Burton & Co. London, & Edinburgh.

mark, in the diocese of Tyen, bail. and 2 m. SSE of Svendborg, on the NE coast of the island of Taa-singe, of which it is the capital, and opposite the island of Thoroë. Pop. 1,000. It has a marine school, a well organised alms-house, building-docks, &c., and possesses an active trade in fruit, fuel, &c.

THROOPSVILLE, a village of Mentz township, Cavuga co., in the state of New York, U. S., 3 m. NW of Auburn, on Owasco inlet. Pop. 150.

THROPTON, a township in Rothbury p., Northumberland, 13 m. SW of Alnwick, near the confluence of the Snitter-burn and the Coquet. Area 827 acres. Pop. in 1831, 218; in 1851, 248.

THROWLEY, a parish in Devon, 6 m. ESE of Oakhampton. Area 1,943 acres. Pop. in 1831, 460; in 1851, 395.—Also a parish in Kent, 4 m. SW by S of Faversham. Area 3,180 acres. Pop. 614.

THRUMPTON, a parish in Notts, 7 m. SW of Nottingham. Area 1,080 acres. Pop. in 1851, 133.

THRUSHELTON, a parish in Devon, 10 m. SW by W of Oakhampton. Area 3,714 acres. Pop. 535.

THRUSSEINGTON, a parish in Leicestershire, 8½ m. NNE of Leicester, on the river Wreak, and in the line of the Melton canal and the Roman Foss road. Area 2,200 acres. Pop. in 1851, 544.

THRUXTON, a parish in Herefordshire, 6 m. SW of Hereford. Area 437 acres. Pop. in 1831, 59; in 1851, 71.—Also a parish in Hants, 5½ m. W of Andover. Area 1,865 acres. Pop. in 1851, 267.

THRYBERGH, or **THRYBERG**, a parish in the W. R. of Yorkshire, 8½ m. NE of Rotherham. Area 1,624 acres. Pop. in 1831, 332; in 1851, 331.

THSANG. See **TIBET**.

THSIANGABRANG, a town of Tibet, in the prov. of Thsang, at some distance from the l. bank of the Yaru-dzang, 24 m. WSW of Thsianglodzin.

THSIANGAMRING, a town of Tibet, in the prov. of Thsang, on the Chang, 180 m. WSW of Lhasa.

THSIANGLODZIN, a town of Tibet, in the prov. of Thsang, on the r. bank of the Yaru-dzangbo, and 240 m. WSW of Lhasa.

THUBCEUF, or **TUBOZUF**, a commune of France, in the dep. of the Mayenne, cant. and 5 m. NE of Mayev. Pop. 1,197.

THUEYT'S, a canton, commune, and town of France, in the dep. of the Ardeche and arrond. of Largentiere. The cant. comprises 9 coms. Pop. in 1831, 14,220; in 1846, 15,225.—The town is 18 m. N of Largentiere. Pop. in 1846, 2,376.

THUILE-ST.-BERNARD (La), a village of Sardinia, in the div. and prov. and 19 m. W of Aosta, and mand. of Morgex, at the foot of Little St. Bernard, surrounded by meadows which are irrigated by a rivulet that bears its name. Hence the road leads up to a col and plain on which are evidences of the encampment of Hannibal, and a circle of stones round the most elevated part of the plain is called *Cirque d'Annibal*. The circle is 260 paces in circumference, and the rude blocks of stone which mark it are rather more than three paces apart, and somewhat buried in the soil.

THUILLES, a department and commune of Belgium, in the prov. of Hainault and arrond. of Charleroi. Pop. of dep. 1,270; and of village, 855. It has manufactories of soap.

THUILLEY-AUX-GROSEILLES, a village of France, in the dep. of the Meurthe, cant. and 7 m. NE of Colombey, in a gorge. Pop. 300. It has a castle, and on a plateau of an adjacent village are the ruins of the royal residence of Tussey. This village, which was once an important place, was ruined in the wars of the 17th cent., and by the pestilence of 1709.

THUIN, a department, commune, and town of Belgium, in the prov. of Hainault and arrond. of Charleroi. Pop. of dep. 3,865. The town is 10 m. SW of Charleroi, in a deep hollow on the r. bank of the Sambre, a little below the confluence of the Biemelle. It has a college, and possesses manufactories of woollen and linen fabrics, iron-ware, and leather. It returns a deputy to the provincial states. In the vicinity are the important iron-mines of Hourbes. This town owes its origin to a fortress which belonged to the adjacent abbey of Lobbes. It was erected into a town and fortified in 972. In 1058, it was destroyed by Baudouin V. count of Flanders. In 1466, it was taken by Charles-le-Hardi, duke of Burgundy.

THUIR, a canton, commune, and town of France, in the dep. of the Pyrenees and arrond. of Perpignan. The cant. comprises 20 coms. Pop. in 1831, 8,564; in 1846, 9,400.—The town is 9 m. SW of Perpignan, on a canal which issues from the r. bank of the Tet. It has manufactories of pottery, a tannery, oil and paper mills, and distilleries of brandy. Bees are extensively reared in the locality.

THUIT-SIGNOL (Le), a village of France, in the dep. of the Eure, cant. and 3 m. NNE of Tourville-la-Campagne, in a valley. Pop. 1,060.

THULIN, a department, commune, and town of Belgium, in the prov. of Hainault and arrond. of Mons. Pop. of dep. 2,050. The town is 10 m. WSW of Mons, on the Haine. Pop. 1,485. It has a spinning mill, and is noted as the scene of an engagement between the French and Austrians, in 1792.

THULLADA, a village of the Punjab, on the road from Ferozpur to Multan.

THUM, a town of Saxony, in the circle of the Erzgebirge, bail. and 6 m. WNW of Wolkenstein. Pop. in 1848, 2,095. It has manufactories of hosiery, parchment, and lace; and in the vicinity are mines of silver, tin, and cobalt.

THUMA. See **TUMA**.

THUMAIDE, a department and commune of Belgium, in the prov. of Hainault, and dep. of Tournai. Pop. of dep. 788.

THUMERIES, a village of France, in the dep. of the Nord, cant. and 4 m. SW of Pont-a-Marcq. Pop. 765. It has manufactories of beet-root sugar, a tannery, and fine nursery gardens.

THUN, a village of France, in the dep. of the Nord, cant. and 3 m. NNE of St. Amand, on the l. bank of the Scarpe. Pop. 900. It formerly had a fine abbey. Hay is its chief article of trade.

THUN, or **THOUNE**, a town of Switzerland, in the cant. and 17 m. S of Berne, in a picturesque situation, near the NW extremity of the Thuner-see, on the Aar, which here divides into two branches, one of which runs through the town. Pop. 3,379. It has a fine parish-church in a commanding situation, an hospital, several good schools, an orphan's asylum, a public library, a federal military school, and on an adjacent mountain, a castle. It has a considerable trade in linen and in cheese.—The Thuner-see or Lake Thun, which is 12 m. in length, and 2 m. in extreme breadth, is formed by the Aar, which enters its SW extremity and issues from it on the NW. It is enclosed by lofty rocky eminences, amongst which the most remarkable are the Niesen, Stockhorn, and Morgenberghorn, and has a level of 606 yds. above that of the Mediterranean. It has a depth in some places of 720 ft.; and its waters abound with excellent fish.

THUNDER-BAY, an indentation of the Canadian coast, formed by Lake Huron, between the bay of Saganaw and the strait of Michilimakinak. It receives a river, and contains several small islands of

the same name. It derives its name from the frequency of thunder in the locality.

THUNDERIDGE, a parish in Hertfordshire, 2 m. N by E of Ware. Area 2,200 acres. Pop. 572.

THUNDERSLEY, a parish in Essex, $2\frac{1}{2}$ m. SW of Rayleigh, including the hamlet of Thundersley. Area 2,499 acres. Pop. in 1831, 526; in 1851, 492.

THUNGEN, a market-town of Bavaria, in the circle of Lower Franconia, 5 m. ESE of Carlstadt, on the Werrin. Pop. 880. It has two castles.

THUNGERSHEIM, a village of Bavaria, in the circle of Lower Franconia, 9 m. NNW of Wurtzburg, on the r. bank of the Main. Pop. 1,300. The locality affords good wine.

THUNOE, an island of Denmark, in the dio. of Sieland and bail. of Holbek, in the Cattegat, 3 m. from the NW coast of the island of Samsøe, in N lat. $55^{\circ} 58'$, E long. $10^{\circ} 17'$. It is 2 m. in length from WNW to ESE, and $1\frac{1}{2}$ m. in breadth, and is to a great extent covered with furze. It forms a small parish.

THUN-SAINT-MARTIN, a village of France, in the dep. of the Nord, cant. and 5 m. NNE of Cambray, on the r. bank of the Schelde. Pop. 859. It has a manufactory of beet-root sugar.

THUNSTETTIN, a village of Switzerland, in the cant. of Berne and bail. of Aarwangen. Pop. 1,774. It has a fine castle.

THUR, a river of Switzerland, which has its source in the cant. of St. Gall, in the district of Haut-Tockenbourg, near Wildhausen, 12 m. SSW of Appenzel; runs first NNW, then NE; enters the cant. of Thurgovia; passes Bischofszell, where it is joined by the Sitter on the r.; turns afterwards WNW; receives the Murg on the l.; waters the N part of the cant. of Zurich; and after a course of 72 m., throws itself into the Rhine on the l. bank, 7 m. SSW of Schaffhausen. It is navigable only a short distance.

THUR, or **TUR**, a river of Hungary, which has its source at the NE extremity of the comitat of Szathmar, 5 m. W of Visk; runs first S, then WNW; waters the S part of the comitat of Ugocz; re-enters that of Szathmar; traverses extensive marshes; and after a sinuous course of about 84 m., joins the Theiss on the l. bank, a little above the confluence of the Szamos.

THURCASTON, a parish and village in Leicestershire, $3\frac{1}{2}$ m. S by W of Mount-Sorrell, comprising the chapelry of Anstey and the township of Cropston. Area of p. 2,960 acres. Pop. in 1831, 1,241; in 1851, 1,102. The inhabitants are chiefly employed in framework-knitting.

THURDA. See **THORENBURG**.

THURE, a river of France, in the dep. of the Haut-Rhin, which descends from the Grand-Ventron in the Vosges, on the confines of the dep. of that name; runs first SE through the fine valley and town of St. Amarin, Thun and Cernay; directs its course afterwards NE, then N; bathes the cantons of Ensisheim, Sultz, Rouffach, Wintzenheim, and Colmar; and 2 m. S of the latter town, joins the Lauch on the r. bank, and after a total course of about 45 m.—Also a commune in the dep. of the Vienne, cant. and 5 m. WNW of Chatellerault, at the foot of hills. Pop. 1,631.

THUREN, a village of Prussia, in the prov. of W. Prussia, regency and circle and 3 m. SW of Gumbinnen. Pop. 100. It has a mineral spring.

THURET, a commune of France, in the dep. of the Pny-de-Dome, cant. and 5 m. SE of Aigueperse. Pop. 1,884.

THURGARTON, a parish in Norfolk, $4\frac{1}{2}$ m. SW by S of Cromer. Area 961 acres. Pop. in 1831, 247; in 1851, 272.—Also a parish in Notts, $9\frac{1}{2}$ m.

NE of Nottingham, and 2 m. W of the Trent. Area 2,770 acres. Pop. in 1831, 329; in 1851, 885.

THURGAU, or **THUSGOVIA**, a canton in the NE of Switzerland, bounded on the N by the Rhine, which separates it from Baden and Schaffhausen; on the E by the lake of Constanx, separating it from Bavaria, Wurtemberg, and Baden; on the S by the cant. of St. Gall; and on the W by Zurich and Schaffhausen. Its area is 270 sq. m.; its pop. in 1850, 88,908, of whom one-fourth only are Catholics. The surface is comparatively level, the hills, where they occur, not exceeding a height of 1,400 ft. above the lake of Constanx. They run NE and divide the cant. into three valleys, of which the central and largest is traversed by the Thur. The productions of this cant. are wheat, barley, oats, rye, flax, potatoes, hemp, and vines; the pastures are extensive; and there are numerous and large orchards. Cotton and silk goods are manufactured here; but the staple article is linen. The cant. is divided into eight bailiwicks, and is governed by two *landammans* chosen annually, and a council of 100 members chosen by all citizens above 25 years of age.

THURGOLAND, a township in Silkstone p., Yorkshire, 5 m. SW of Barnesley. Area 2,080 acres. Pop. in 1831, 1,147; in 1851, 1,548.

THURINGERWALD, a hilly and woody tract of country in the centre of Germany, extending from the sources of the Werra, NW to near Eisenach. It is a part of the ancient Hercynian forest, and has a length of about 70 m., with a breadth of from 9 to 16 m. It is thinly peopled, but is rich in metals, particularly iron and cobalt. Its highest peaks vary in height from 2,000 to 3,200 ft. It is covered with wood in almost every direction, and is traversed by only two great roads. It gives rise to a number of streams which flow into the adjacent plain, and eventually into the Main, the Weser, and the Elbe.

THURINGIA, the name formerly borne by an extensive tract of country in the central part of Germany, having Francoenia on the W, and the country of Meissen on the E. It long gave the title of landgrave to the elector of Saxony, though, from its extent, it was subdivided among a number of petty princes. The name occurs in history so early as the 6th cent., and became gradually disused after the incorporation of the territory with other states. Its capital was Erfurt.

THURLASTON, a hamlet in Dunchurch p., Warwickshire, 1 m. W of Dunchurch. Pop. in 1831, 281; in 1851, 287.—Also a parish in Leicestershire, 6 m. NE by E of Hinckley, including the liberty of Newparks, with the hamlet of Normanton-Turville. Area 2,980 acres. Pop. in 1851, 797.

THURLBY, a parish in Lincolnshire, 8 m. SW of Lincoln, on the river Witham. Area 1,802 acres. Pop. in 1831, 145; in 1851, 156.

THURLBY-WITH-NORTHOPE, a parish in Lincolnshire, $5\frac{1}{2}$ m. NNW of Market-Deeping. Area 5,070 acres. Pop. in 1831, 632; in 1851, 799.

THURLEBERE, a parish in Somersetshire, $3\frac{1}{2}$ m. SE of Taunton. Area 949 acres. Pop. in 1851, 212.

THURLEIGH, or **THURLEY**, a parish in Bedfordshire, 6 m. N of Bedford. Area 3,480 acres. Pop. in 1831, 538; in 1851, 498.

THURLES, a parish, containing a town of the same name, in co. Tipperary. Area of p. 8,268 acres. Pop. in 1831, 10,459; in 1841, 10,284. The surface is watered southward through the centre by the river Suir, and consists wholly of a section of the rich valley of that river.—The town stands on the Suir, at the intersection of the road from Clonmel to Roscrea, 3 m. NE by N of Holycross. The ruins of several ecclesiastical and castellated build-

ings are objects of interest in themselves, and monuments of the town's antiquity and comparative early importance. Among the modern public edifices are a neat church, an infantry barrack, a bridge, a bridewell, a court-house, a market-house, a fever-hospital, and a poor-law union workhouse. But Thurles derives its distinguishing character, both architectural and social, from its being the seat of the Roman Catholic archb. of Cashel, and, with the exception of Galway, the most decidedly Roman Catholic town in Ireland. The archbishop's residence is a beautiful and commodious dwelling. The cathedral is a simple structure, large enough to accommodate from 7,000 to 8,000 persons, with a magnificent altar. At either side of the cathedral stands a convent, one of Ursuline, and the other of Presentation nuns. T. is the market for the sale of the agricultural produce of an extensive circumjacent district of country; and the depot for the supply of that district with all the innumerable goods of a general retail trade. Pop. in 1841, 7,523.

THURLESTONE, a parish in Devon, $4\frac{1}{2}$ m. W by S of Kingsbridge. Area 1,898 acres. Pop. 460.

THURLOW (Great), a parish in Suffolk, $6\frac{1}{2}$ m. NW by W of Clare. Area 2,023 acres. Pop. 431.

THURLOW (Little), a parish in Suffolk, 7 m. NW by W of Clare. Area 1,470 acres. Pop. 449.

THURLOW'S ISLAND, an island of the N. Pacific, near the coast of N. America, in N lat. $50^{\circ} 24'$. It is about 24 m. in length from E to W.

THURLOXTON, a parish in Somersetshire, 5 m. SSW of Bridgewater. Area 551 acres. Pop. in 1831, 229; in 1851, 192.

THURLSTON, a township and village in Penistone p., Yorkshire, $9\frac{1}{2}$ m. W by S of Barnesley. Area 7,740 acres. Pop. in 1831, 1,599; in 1851, 2,018.

THURLTON, a parish in Norfolk, 10 m. SSW of Great Yarmouth. Area 1,170 acres. Pop. 445.

THURM, a village of Saxony, on a small affluent of the Mulda, 5 m. NNE of Zwickau. Pop. 1,100.

THURMASTON (North and South), a chapelry and village, partly in the p. of Barkby and partly in that of Belgrave, Leicestershire, $3\frac{1}{2}$ m. NNE of Leicester, on the E bank of the Soar, and in the line of the Midland Counties railway. Area of South T. 1,220 acres. Pop. of both in 1851, 1,251.

THURNAU, a town of Bavarian Franconia, 6 m. SW of Culmbach, the chief place of the lordship of Giech, of 84 sq. m. Pop. 1,425. The town has a lyceum, a castle, and two churches.

THURNBY. See **THORNBY**.

THURNBY, a parish of Leicestershire, 4 m. E by S of Leicester. Area 2,740 acres. Pop. 374.

THURNE, a parish of Norfolk, $8\frac{1}{2}$ m. N by E of Acle. Area 660 acres. Pop. in 1851, 330.

THURNEN, a village of Switzerland, in the cant. and 12 m. SE of Berne. Pop. in 1850, 284.

THURNHAM, a township of Lancashire, in the p. and 5 m. SSW of Lancaster. Area 1,470 acres. Pop. in 1831, 526; in 1851, 748.

THURNING, a parish of Huntingdon and Northampton shires, $7\frac{1}{2}$ m. SW by W of Stilton. Area 1,000 acres. Pop. in 1851, 211.—Also a parish of Norfolk, $4\frac{1}{2}$ m. N by W of Reepham. Area 1,584 acres. Pop. in 1851, 212.

THURNSCOE, a parish of the W. R. of Yorkshire, 8 m. E of Barnesley. Area 1,665 acres. Pop. in 1831, 223; in 1851, 298.

THUROTZ, or **THUROCZ-VAR-MEGYE**, a palatinate in the NW of Hungary, lying between those of Trentsin, on the NW, and Sohl on the SE. It has a territorial extent of 450 sq. m., with 45,000 inhabitants, chiefly Slovaks. It is very hilly, being traversed by ridges of the Carpathians. The principal grain raised is buckwheat. Much of the surface is

covered with forests. The Waag crosses the N part, and is joined by the Thurocz from the S. The chief town is Szent-Martony.

THURROCK (Gray's), a town and parish of Essex, situated on a small creek of the Thames, which is here navigable for hoys and vessels of 300 tons burden, 4 m. NW of Gravesend. The p. has an area of 1,634 acres. Pop. in 1831, 1,248; in 1851, 1,713. The town consists principally of one street.

THURROCK (Little), a parish of Essex, 1 m. E by S of Gray's Thurrock. Area 1,495 acres. Pop. in 1831, 302; in 1851, 308.

THURROCK (West), a parish of Essex, 1 m. W of Gray's Thurrock. Area 3,607 acres. Pop. 754.

THURSBY, or **THOR'S TOWN**, a parish and village of Cumberland, $6\frac{1}{2}$ m. SW of Carlisle. Area 2,984 acres. Pop. in 1831, 564; in 1851, 591. The p. is said to derive its name from the god Thor. At Woodrigs, a $\frac{1}{2}$ m. NW of the church, stood a building supposed to have been a temple dedicated to that god, the foundation of which was dug up about 80 years since.

THURSCROSS, a township of Fewston p., Yorkshire, 14 m. W by N of Knaresborough. Area 6,340 acres. Pop. in 1831, 601; in 1851, 339, a decrease attributed to the stoppage of factories.

THURSFORD, a parish of Norfolk, $3\frac{1}{2}$ m. SE by E of Little Walsingham. Area 1,350 acres. Pop. in 1831, 392; in 1851, 346.

THURSLEY, a parish of Surrey, $5\frac{1}{2}$ m. SW by W of Godalming. Area 4,348 acres. Pop. 756.

THURSO, a river of Caithness-shire, which rises among the mountains in the SW corner of Halkirk, near the boundary with Sutherlandshire, and flows $12\frac{1}{2}$ m. NE, and 14 m. N to the head of its cognominal bay, at the town of Thurso. Its tributaries are neither numerous nor large; and its greatest breadth is about 300 ft. Its banks are almost everywhere destitute of wood.—Also a parish on the N coast of Caithness-shire, having an area of about 35 sq. m. The surface gently rises from the shore, and is throughout a slightly inclined plane. The headland of Brimsness flanks the estuary of the Forss; and the magnificent promontory of Holbornhead runs out on the W side of Thurso-bay, forming a twin object to Dunnet-head, 7 m. to the NE. The soil is principally clay and loam lying on rock. The arable and the untillied lands bear the proportion to each other of 6 to 5. Pop. in 1851, 5,096.

THURSO, a town at the mouth of Thurso-water, in the above parish, 20 m. W by S of John-o'-Groat's-house, and $20\frac{1}{2}$ m. NW of Wick. It consists of an old and a new town: the latter occupying a pleasant and elevated situation on the SW; and, if completed on the plan on which it was originally designed, would be a very handsome place. The pop. in 1851 was 2,908. Linen, woollen, leather, and herring-net manufactures employ about 230 persons; and the manufacture of straw-plait employs about 60 females. The fisheries in the bay are extensive; and, along with the dressing of flags in the neighbouring quarries, afford the chief employment.—The harbour, when a bar at its entrance has been crossed, is abundantly safe.—The bay of Thurso lies exactly at the W entrance of the Pentland firth, and is in the direct course of the North Sea trade with our American possessions. It is a capacious and secure roadstead in all weathers, and naturally adapted for the construction of a complete and convenient harbour.

THURSTANTON, a parish of Cheshire, 5 m. NW by N of Great Neston. Area 2,762 acres. Pop. in 1831, 92; in 1851, 98.

THURSTON, a parish of Suffolk, $5\frac{1}{2}$ m. E by N of St. Edmund's Bury. Area 2,200 acres. Pop. 759.

THURSTONLAND, a township and village of Yorkshire, 5 m. S by E of Huddersfield. Pop. in 1851, 1,820.

THURSTON-MERE, a river of Cumberland and Lancashire, which runs into the Fosse near Crakeford.

THURTON, a parish of Norfolk, $8\frac{1}{2}$ m. SE of Norwich. Area 771 acres. Pop. in 1851, 242.

THURWASTON, a township of Derbyshire, $7\frac{1}{2}$ m. WNW of Derby.

THURY, a village of France, in the dep. of Cote-d'Or, 15 m. W of Beaune. Pop. of com. 1,800.—Also a village in the dep. of Yonne, 5 m. SE of Saint-Sauveur.

THURY-HARCOURT. See **HARCOURT**.

THUSIS, or **TOSSANA**, a town of the Swiss cant. of the Grisons, in the valley of the Domleschg, near the confluence of the Albula and the Hinter Rhine, 10 m. SSW of Coire. Pop. in 1850, 769. It has cattle and grain markets, and is the centre of transit trade between Italy and Germany.

THUXTON, or **THURSTON**, a parish of Norfolk, $5\frac{1}{2}$ m. SE by S of East Dereham. Area 1,102 acres. Pop. in 1831, 83; in 1851, 133.

THWAITE, a parish of Norfolk, $4\frac{1}{2}$ m. N by E of Aylesham. Area 676 acres. Pop. in 1851, 138.—Also a parish in the same co., 12 m. SE by S of Norwich. Area 500 acres. Pop. 130.—Also a parish of Suffolk, $4\frac{1}{2}$ m. SW by S of Eye. Area 832 acres. Pop. 179.

THWAITES, a township of Cumberland, 10 m. SE of Ravenglass. Pop. in 1851, 374.

THWING, a parish in the E. R. of Yorkshire, $8\frac{1}{2}$ m. WNW of Bridlington. Area 4,040 acres. Pop. in 1831, 350; in 1851, 444.

TIAGER, a town and fortress of Hindostan, in the Carnatic, in N lat. $11^{\circ} 45'$.

TIAHUANACU, or **TIAGUANUCO**, a village of Bolivia, 38 m. WNW of La Paz, and to the E of Lake Titicaca. It is celebrated for the remains of edifices supposed to have been the palaces of the Peruvian emperors, which still excite astonishment by the immensity of their stones.

TIAMUCHU, a river of Bolivia, in the prov. of Moxos, which runs from SW to NE, and enters the Marmore, in S lat. $14^{\circ} 13'$, by two branches.

TIANA, a village of Spain, in the prov. and 9 m. NE of Barcelona, near the coast. Pop. 1,600. About 1 m. to the W of this v. stood the beautiful monastery of Montalegre, which was sacked in the civil commotions of 1835.

TIASMIN, a river of Russia, which rises in the rov. of Kherson, 27 m. NNW of Elizabetgrad; flows ENE, and then SSE, and joins the Don on r. bank near Krilov.

TIBACUI, a settlement of New Granada, 30 m. W of Santa-Fé.

TIBAGY, a river of Brazil, which rises on the W flank of the Serra-do-Espinhaço; runs NNW; and joins the Parana-pamena, on the l. bank after a course of 330 m.

TIBBERAGHNY. See **TIPPERAGHNEY**.

TIBBERMORE, or **TIPPERMUIR**, a parish in the SE division of Perthshire, with a superficial extent of about 4,670 acres. Pop. in 1851, 1,495.

TIBBERTON, a parish of Gloucestershire, $3\frac{1}{2}$ m. SE of Newent. Area 1,400 acres. Pop. in 1831, 307; in 1851, 362.—Also a parish of Worcestershire, 4 m. ENE of Worcester. Area 1,920 acres. Pop. in 1831, 337; in 1851, 329.—Also a parish of Herefordshire, 10 m. W of Hereford. Area 1,111 acres. Pop. in 1831, 118; in 1851, 141.—Also a hamlet of Salop, $4\frac{1}{2}$ m. W by N of Newport.

TIBBUS, a native African people of the Berber race, inhabiting the vast desert tract which extends along the S frontier of Fez-

zan, thence eastward towards Egypt, and along the N of Bornu. They are small in stature, have quick eyes, thick lips, a small turned-up nose, and well-shaped limbs. Their complexion is not perfectly black, and their hair is long and less curled than that of the Negroes. Sheep-skins form their usual dress, but the more opulent wear large blue shirts, wrapping their heads so closely in dark blue cloth as to leave nothing visible but the eyes. Their language derives a peculiar sound from the frequency of the consonants / and z, and from the rapidity with which it is pronounced, whence both ancients and moderns have compared it to the whistling of birds. The Rock Tibbus, who inhabit a mountainous district situated on the SE of Fezzan, are peculiarly rude and ferocious, and harass their neighbours with frequent hostilities. Though they carry on a trade with Fezzan for senna and camels, they frequently molest the caravans of that country in their journey to Bornu. The Tibbus of Bilma, inhabiting the tract between Fezzan and Bornu, are a milder race, and carry on most of the trade between the two countries.

TIBENHAM, a parish of Norfolk, 5 m. WSW of St. Mary Stratton. Area 3,286 acres. Pop. 727.

TIBER, a celebrated river of Italy, which rises in the Apennines, in the Tuscan prov. of Florence; flows first S, and then SSE; receives a number of smaller streams; passes by Rome, and falls into the Mediterranean, about 15 m. below that city, by two branches, the Fiumicino and the Fiumare. The length of its course is about 250 m., but it is navigable only for small vessels, and little more than 90 m. It has considerable depth and rapidity of current. See article **ROME**.

TIBERIAS. See **TABARIAH**.

TIBERON, or **TIBURON**, a village on the SW coast of the island of Hayti, on a bay formed by a cape of the same name on the NW, and by Point-Burgau on the SE. The cape is in N lat. $18^{\circ} 20' 30''$.

TIBESTY, a district in the Sahara of Africa, to the SE of Fezzan, belonging to the Rock Tibbus. It is represented as a mountainous country, which, though suffering from the want of rain, abounds in springs and excellent pasturage. Senna of superior quality is raised here for the market of Fezzan, and the camels are highly esteemed. The huts of the natives are of a circular form, and composed of stakes covered with brush-wood.

TIBET, or **THIBET**, a region of Central Asia, lying between the parallels of 27° and 37° N, and the meridians of 72° and 105° E, or from the E frontiers of Badakshan on the NW to the W frontiers of the Chinese prov. of Sech-wen on the SE. The name, however, is generally confined by geographers to that portion of this region extending from the sources of the Indus and Sutledge to the W frontier of Sech-wen. This tract has the Gobi or Great desert on the N, separating it from the eastern part of Chinese Turkestan; the territory of the Eluths of Kokonor on the NE; the Sifan or Tufan, and the Chinese prov. of Sech-wen on the E; the prov. of Yun-nan on the SE; the Burman dominions, the valley of Assam, Butan, Nepal, and British India on the S; and Little Tibet on the W. These are its boundaries generally speaking, but its particular limits we cannot accurately determine for want of materials. Until within these few years, we had almost nothing but Chinese information, communicated through the channel of the Jesuits to guide us on the subject of the geography of this region, in addition to a few gleanings from Marco Polo, and such Romish missionaries as have visited it for the purpose of converting the natives to the Roman Catholic faith, as Fathers Andrafa, Desideri, Horace-de-la-Peuna, and the monk Cassiano. Horace spent 18 years in Lassa, and might consequently be supposed qualified to give us a tolerable account of Tibet; his account of the mission to T. was printed at Rome in 1742. A long and curious account of T., in 900 4to pages by Father Giorgi, was printed at Rome in 1762, under the title *Alphabetum Tibetanum*; but Cassiano is the real author of this book. All these productions, how-

ever, throw little light upon the geography of T., the attention of its missionaries being naturally much more engrossed by the religion than the geography of the country. Not above 19 or 20 pages are devoted in Giorgi's large work, to the latter subject, but an itinerary from Katmandu to Lassa is given by him, which slightly illustrates the geography of the intervening space. We have, in addition to these, an account of two embassies from the British East India Company to the Grand Lama in 1774 and 1783, the former by Mr. George Bogle is given in the Philosophical Transactions; the latter by Captain Turner, was published in 4to, 1800. But these concern only that part of T. which lies between Butan and Lassa. We have preserved in Kircher a short itinerary of Fathers Grober and D'Orville from Sining to Lassa and from thence to Katmandu in Nepal; but it is so meagre that little satisfaction is got from the perusal. A Chinese account of T. was published at St. Petersburg in 1828, in 2 vols. 8vo, by Father Hyacinth, long resident with the Russian mission at Pekin. The first of these vols. contains the geography of T.; the second its history and conquests, religion, manners, and customs. In this publication is inserted a chart of the road from Tschendu, or Chingtu in Sech-wen to H'lassa or Lassa. The orthography of the names of places, as given in this work, is so different from what has been usually employed in Du Halde's maps and other works as to render it a very difficult business to identify them. These, in conjunction with the Lama's map of T. were all our materials for a description of the country until within these twenty years. Klapproth has observed that the maps of the Chinese empire, made by the missionaries under Kanghi, were very imperfect extracts of the Chinese and Manshu originals, and that the proper names had been translated by a person but little versed in the Chinese language; and these materials were put into D'Anville's hands in order that he might reduce and superintend their publication. The maps made by order of Kienlung, he remarks, differ materially from those of the missionaries under Kanghi, so far as respects T. both in the longitudes and the latitudes, as in the case of the exit of the Sanpu from Tibet. He remarks farther that the greater the distance from the meridian of Pekin, the more erroneous are the longitudes in the Jesuits' maps of T. Of late years considerable information has been obtained respecting that portion of T. which borders on the NE confines of British India; and the French missionaries Hue and Gabet have made us somewhat acquainted with Eastern T.

Names and Divisions. Among the natives, *Bhodt* and *Bhodti*, or *Bodyal*, i. e. 'the kingdom of Bhodt or Boodh,' are the most ordinary denominations of that portion of this region with which Europeans are most familiar; and the most usual designation of the people is *Bhotiya*. The name *Thebeth*, *Tibet*, or *Tobdhot*, known to the Arabians and Persians as early as the 10th cent., is not used by the natives themselves. According to father Giorgi, Tibet [pronounced *Tubet* in Bengal] is a corruption of the Tibetan appellation *Tebud*, or 'kingdom of Boodh.' According to Hyacinth and Klapproth, the Tibetians add the word *ba*, signifying 'man,' to the word *bod*, and call themselves and their country *Bodba* and *Bodbas*. The Mongols use the term *tu* in place of *ba*, and call *Bhotba*, *Tubet*, of which Europeans have made Tibet. According to this etymon, the name *Tibet* is originally Mongolian, and passed from the Mongols to the Persians and Arabs, and there can be no doubt that Marco Polo got the name from the Mongols when residing at the court of Kublai-Khan. It is also called *Poy*, or *Put-Koachin*, i. e. 'the region of snow.' The Chinese sometimes call it *St-fan*, or 'Western Fan,' though that name is now restricted to the region between the Tibetan prov. of Amdoa and Sech-wen. They also occasionally denominate Tibet by the name of *Chlassa*, and at other times by *Shan*, or *St-shan*, i. e. 'the western part of Shan.' The name *Shan*—or as Klapproth writes it, *Daang*—is also given to the city of Lassa. *Tangut* is a Mongolian word, by which is designated all the region which touches the western frontier of China, and which is inhabited by Tibetians; but the Tangut,

conquered by Jenghis-Khan, was distinct from T., and seems to have comprehended the Sifaun or Tufan, the region of Kokonor to the W of Shen-si, the district of Kansu, part of Shen-si, and the territory of the Orta-Mongols. Tangut is known in the Chinese annals under the names of the kingdom of *St-asp* and *Hya*, and *St-Hya*, or 'Hya of the west.' *Oui Daang*, or *Shan*, an ancient name of T., is compounded of the two words, *oui* and *daang*. The Chinese transcribe this name by *Ou-aru-shang*; and the Mongols render it by *Barohn-diao*, i. e. 'the right side,' or 'the West.'

The geographical divisions of T. are involved in obscurity, and the terms High, Middle, and Lower Tibet, are very vague. Marco Polo found it divided into eight kingdoms or provinces. Father Giorgi gives it twelve provinces: viz. Latak, now known to be a distinct sovereignty from T.; Nagari, which seems to correspond to the NW part of T.; Hor, with the lake of Terkiri; Klang, Danm, and the principality of Kahang, in the N; Amdoa on the E; Bredlong or Bramaslong on the S; together with Takbo and Congbo, and in the centre the provinces of On and Chang, the Oul and Dzang of Klapproth. Of these, Bramaslong seems to be to the N of Assam, and near the source of the Brahmaputra. On inspection of the Lama's map, we find the tract traversed by the Sanpu, E and SE of Lassa, to be divided into *poy*s or *poos*,—a term signifying a province, region, or district. Thus the tract to the S and SW of the Sanpu, betwixt it and the Om-chu, is called Tak-poy or Tak-pool, i. e. 'the prov. of Tak,' which comprehends a considerable number of inferior divisions, and which does not correspond to the Butan on the side of Bengal, as Malte Brun imagined, but is clearly the Tac-po of Giorgi. On the opposite, or NE side of the San-pu is a prov. called Konk-pool in the same map, also subdivided into a number of districts: this is clearly the Congbo of Giorgi; and to the SE of this is the prov. of Ken-pu-l, between the Sanpu and the Nu-kiang. Further E of this, is the country or district of Daendo, between the Lat-san-kiang and the Kin-sha-kiang. Amdoa is considered by Malte Brun to correspond to the Ardandam of Marco Polo; but this is merely putting the difficulty a little out of sight; for a reader will ask, where is Ardandam? Malte Brun indeed tells us that Ardandam is the SE part of Tibet, and the same with the Amdoa of Father Giorgi; Amdoa consequently is the SE part of T. Unfortunately for this conjecture, both Maraden in his notes on Marco Polo, and after him Klapproth, have shown that the Ardandam of that noted traveller makes no part of T., but corresponds to the SW part of the province of Yun-nan in China, of which Yong-chang, called Uchian by Marco Polo, is the capital. The name of this district, besides, is not Ardandam, or Arcladam, as Malte Brun has written it, after Muller's edition of Marco Polo; nor is it Kardandam, as Maraden has it; but Zar-dandan, a Persian appellation, signifying 'teeth of gold,' because in that district gold is abundant. Malte Brun has also identified Carid, as he writes it, with Ardandam, but the proper reading is Carazan, a corruption of Karadjang, or, 'the Black country,' the NW part of Yun-nan, so called from the colour of the people, called On-man, or 'Black barbarians,' by the Chinese. The capital of this district is the modern Tai-li-fu, the Dai-leon of the Chinese, and the capital of an independent state till destroyed by the Mongols in 1255, subsequent to the conquest of T. Marco Polo says, he took five days' journey on horseback W from Tai-li-fu to the prov. of Zardandan. The Caralam of Marco Polo was certainly not Assam, as Malte Brun imagined, but lay to the W and N of Karadjang, and was called Karayan by the Mohammedan writers, and Thsonman by the Chinese, who call the people Caraina. The large lake of Eul-hai, or Tall, separates Karayan from Karazan or Karadjang. Klapproth places Caralam to the SE of Karazan, and makes it the S part of Yun-nan, but Caralam extended N and W as far as Calndhu of Marco Polo, on the Brui, or Kin-sha-kiang—nor the Sanpu, as Klapproth dreams, or his Irrawaddy,—but the genuine Kin-sha-kiang of Tibet, and the NW part of Yun-nan. From what we have been able to gather from these confused and imperfect accounts of the divisions of T. proper are the following: 1st, Nagari, Nari, or Dzang, towards the chain that divides the sources of the Indus and Sutledge from Upper Tibet, and which contains the sources of the Yaru-Sanpu, the Klang-ku, and other large rivers; 2d, Kam, probably the Kahang of Giorgi, called by him a principality, SW of Amdoa; 3d, Karra-Tobet, on the Yarkia-Sanpu; 4th, Hor, on the N; 5th, Kongbo, on the I. of the Sanpu; 6th, Tac-po, on the W of that river, and both SE of Lassa; 7th, Bregiong, to the R of Kongbo; 8th and 9th, Oul or Wel, and Chang or Tsang, both comprehended, according to Hyacinth, in the province of Chlassa or Lassa, and called Uchang; 10th, Jiamdo; 11th, Zamba, or Tishulumbu; and 12th, Amdoa, on the borders of Sech-wen. The district of Klang lies to the N of Wel.

Physical features. On an inspection of the Lama's map, T. presents a confused assemblage of mountains, valleys, lakes, and rivers, resembling a piece of net-work, of which to attempt a verbal description would be to make confusion worse confounded; and as no triangulation of this vast region was ever made, we cannot depend on the accuracy of the relative positions, or the directions of the interior chains. The declination of Eastern T., as indicated by the courses of the rivers, seems to be chiefly

to the SE. From China to the E and N frontiers T. is a very sensible ascent the whole way. The mountains, which are very numerous, are represented as being higher above the horizon on the side towards China than on that towards T.; but when once they are passed, the climate becomes more mild, and the country less wild and savage, than it is on the borders of the Chinese provs. of Sech-wen and Yun-nan. According to the account of a Chinese officer, who served in the war of 1792 against Nepal, the army took 72 days to march from the frontiers of China to the vicinity of Lassa, 12 days more to Upper Tibet, and 15 days more to the W range which separates T. from Nepal. The passes, in his account, are spoken of with horror, some of them requiring a whole day to cross, and being totally impervious to cavalry. On the side of Hindostan the descent is much more rapid than on that of China, as being much shorter. When once the pass of Phari is passed, the contrast between Butan and T. is striking: the latter region appears to the eye as one of the least favoured countries under heaven, and seems in a great measure incapable of cultivation, exhibiting only low rocky hills, without any visible vegetation, or extensive arid plains of the most stern and stubborn aspect, promising fully as little as they produce. The very gradual descent of 70 m., from this pass to the Sanpo, was all that Turner saw of Tibet. The following description is given of the oriental plateau, or tableland, of T., by an eminent physical geographer. "The table land of T. is only 4,000 ft. above the sea towards the N, but it rises in Little T. to between 11,000 and 12,000 ft. According to Moorcroft the sacred lake Manasarowar, in Great T., and the surrounding country is 17,000 ft. above the sea, which is 1,270 ft. higher than Mont Blanc. In this elevated region the sheltered valleys and the borders of the streams alone are available for agriculture; and as the summer sun is powerful, wheat and barley grow and many of the fruits of Southern Europe ripen. There are no trees in this country, and the ground in cultivation bears a small proportion to the grassy steppes which extend in endless monotony grazed by thousands of the short wool goats, sheep, and cattle."

Mountains.] The mountain ranges in the SW and S of T., towards Hindostan, are the only ranges which have been geographically described to us by such of our travellers and surveyors as have reached them,—as Bogle, Turner, Webb, Colebrooke, Crawford, Hooker, Thomson, Strachey, and others; and the elevations of some of the passes and peaks towards India have been ascertained. The mountains, on the side of Kumaon, Nepal, and Butan, correspond to the *Emodus* of the ancients, or the Sanacrit Himadri. There are, properly speaking, three district ranges, the Northern, Central, and Southern Emodus; the first of which, invisible from the plains of Hindostan, and which bounds the valley of the Sanpo to the S, is not perforated by rivers. The central range is that immediately to the N of Nepal, and is perforated by several rivers, as the Gogra, the Gandak, the Arun, and the Tista—all branches of the Ganges; but amidst such tremendous precipices, and by such narrow gaps, as to render their openings generally totally impracticable. It was through the pass of the Arun, by Lungercote, that the Nepalese army retreated from Tishulumbu; but another division, which took the pass of Kuti, to the W, lost 2,000 men amidst the snow. The pass of Langur, or Lungercote, is represented by the Jesuit fathers as the most tremendous and precipitous they had encountered all the way from Sining in Shen-si. This central range is

upwards of 40 m. in horizontal depth, and at the source of the Tista it is denominated *Khaaa Kar-pola*, or 'the Mountain white with snow.' The southern range is that called by Kirkpatrick the Kuchar Alps, immediately N of Katmandu; and there its summits are not, as he imagined, covered only with patches of snow, but with perennial snow to a great extent. The distance from Katmandu to Lassa is 536 British, or 462 geog. m., by the road, according to Father Giorgi, but not above 300 geog. m. in direct distance, supposing Lassa to be in $29^{\circ} 35'$ N lat., as in the Lama's map; so that more than one-half the space traversed is occupied by the windings of the mountain-road. According to Giorgi, Mount Langur is 50 m. beyond Mount Rimola, in the southern Himalaya, and abounds in suffocating exhalations, which increase as it is ascended by the pass; but 25 m. beyond it lies the beautiful alpine valley of Tingri,—an earthly paradise in every respect but the sharpness of the air. At the S foot of Mount Langur lies the fortress and town of Tankya, the first place recognised in the Lama's map; and 90 m. beyond this is Zuenga on the Bontsu. From hence two roads lead to Lassa,—the most northern by Sgigatche and Ringbu,—and the other by Kiangtsi. Kiangtsi is a fine city and fortress, with a convent so very extensive and magnificent as to seem another city of itself. About 50 m. beyond this, to the NE, and within three days' journey of Lassa, is the famous lake of Palti or Jangso, said to be so large by the natives as to be 18 days' journey in circumf.; but in the Lama's map its circumf. is only 150 m. The road from Kiangsi to Lassa lies along the N side of this lake, a day and a half's journey. Between this lake and the Sanpo is a very lofty range called Kambala, which travellers must cross in the way to Lassa. From the summit of this elevated range is seen, towards the N, a still higher range covered with during snow. At 7 m. beyond the base of Kambala the Sanpo is struck, and 12 m. further on is crossed by a bridge of iron chains stretched from side to side, with planks or logs laid across. This chain bridge, composed of 500 links each a foot long, is laid across the narrowest part of the stream, which here is deep and rapid. To the NE of this crossing-place of the Sanpo is the famed city of Lassa, 24 m. distant by the road. So far Giorgi's itinerary of the route from Katmandu to Lassa is correct in its details. Turner, in his journey to Tishulumbu, entered Tibet at the pass of Phari, called Paridrong and Paridsong in the Lama's map, which was ascertained to be placed a full degree too far S in the Lama's map, as Rennel justly suspected, being in $27^{\circ} 58'$ N lat., and $89^{\circ} 1'$ E long. of Greenwich. The pass ascends steep for 12 m. up the S face of the dreary Sumunang till the summit is scaled, which is found to bear a long row of small flags, fixed in rude cairns of stones, and fluttering in the wind, marking the boundary between T. and Butan. To the NE of this, a few miles, is the noted peak of Chumulari, visible at a direct distance of 232 m. At the foot of the pass is the sterile vale and fortress of Phari. E of the Langtang mountain range, which separate Assam from the valley of the Sori-Serbit, the mountains run all the way to the frontiers of Yun-nan, a distance of 100 m. at least, nearly in the parallel of $27^{\circ} 30'$ in an unbroken course of tremendous elevation, skirted at its base by a large tract of rugged subalpine country, impracticable even for the hardy mountaineers themselves, and barring all communication with the N. The range of Koiran seen from the summit of Mount Kambala is esteemed the highest in T., and runs to the S of the lake of Terkir or Tengri-nor; but the only reason assigned for its superiority of ele-

vation to the other chains is merely the circumstance of its central position; no conclusive proof. The range to the W communicating with the Muz-Taugler to the N and the Himalaya to the S, is called Kantsai or Kantsai-han. The Sanscrit Rimola, applied to the dividing range between T. and India, has been corrupted into Morial, in the geographical maps of the 17th cent. Respecting the interior ranges, we cannot say whether they are groups or ranges.

Lakes.] This very mountainous region contains a host of lakes, a great number of which have no outlet, especially in the N part. The Terkiri or Tengri is 70 m. long and 25 m. broad, and contains a superficies of 2,300 sq. m. Malte Brun observes, that if a line be drawn from the Terkiri lake 220 m. N, and another W of the same 470 m., we shall find 23 other lakes which have no outlet or which flow the one into the other. These masses of stagnant water are the result of the configuration of the Tibetan plateau, which is itself a collection as it were of smaller plateaus encircled by mountains, or so many concave basins, whose waters, having no outlets, descend to the bottoms of their respective hollows, where they either form lakes, or find them already prepared for the reception of their waters. Fifteen days' journey from Tishulumbu is a lake 20 m. in circumf., in which *linal*, or crude borax, is formed or deposited in its bed near the bank; from the deeper parts rock-salt is procured; and during one-half of the year this expanse of saline fluid is covered with a smooth sheet of ice.

Rivers.] Though many of the streams which arise on this most elevated of all terrestrial convexities are lost in the numerous lakes which here and there occupy the hollows of the circular depressions of the mountainous surface, yet several of the longest and largest rivers of the Eastern hemisphere originate in this region. The Tachok-Sangpo has been identified with the main trunk of the Brahmaputra; and the Sangi-Sangpo, with the chief source of the Indus. The edict of the emperor Kanghi, published in 1721, and given by Klaproth in his memoir on the sources of the Brahmaputra and Irrawaddy, published at Paris in 1828, affords a curious and particular description of the Tibetan rivers, according to accurate data furnished by the superior lamas. The origin of the Whang-ho or Hoang-ho is, in this document, said to be without the frontier of Sining. The real name of the incipient stream is Aktun-kol, or 'the Golden river,' as it is denominated by the Mongols. It is about 3 ft. deep, and rises 3° W of the Tsing-su-hai lakes. Its source is placed in 35° N lat. and 21° W of Pekin. The tract watered by its upper course is called Moma in Tibetan, and Thokan in Chinese. The Hoang-ho enters Shen-si, near Ho-chu, 10 days' journey from its source in direct distance, by a narrow pass between two vast steep rocks.—The next river of T. mentioned by Kanghi is the Min-kiang; but it is a Chinese river, its course being almost wholly within Sech-wen.—The Yalong-kiang forms, for 400 m. in a SE course, the SW frontier of the Sifan, and for 140 m. more, the W frontier of Sech-wen, dividing it from T. After a course of 160 m. more, through the SW angle of Sech-wen, it finally joins the Kincha-kiang, coming NE from Yun-nan, thus accomplishing a comparative course of 700 m., and receiving in its broad and deep channel the waters of the Sifan on the W of Sech-wen. From its source to its entrance into Sech-wen, in 29° 54' N lat., it bears the appellation of the Sechu-Tsitsirhana, and then of the Yalong.—The Kiaung-ku, according to the emperor's memoir, rises in the NE of the states of the Dalailama, runs SE into T., and then enters Sech-wen.

Farther on, the Kiang passes Kwei-chu-fu, enters Hu-kwang, waters King-chu-fu, and joins the Han-kiang before Wu-chang-fu.—The Han-kiang comes from the Po-chung-shan, a mountain of Shen-si, in the district of Nin-kiang-chu, and bears at its source the name of Shih-yang-shwi. It runs to the eastward, and at Nan-ching-hun enters Hu-kwang, and joins the Great Kiang near Han-yang-hun. In the map of the Lamas, the Kincha-kiang rises in Ngari, or Upper T., [not in the Sifan] in 35° N lat., and 90° 27' E long. from a lake called Pahaton-kol. It runs E to a place called Hurha, where it is joined by a stream from the S. At 2° E of its source it receives the Piti-Muran, a large stream from the S, and a little beyond a still larger called the Aktam. At 44° E of its source, where it is separated by Mount-Kulkun from the parent-stream of the Hoang-ho, it turns to the S and SE, passing by Tsitsirhana, a ruined city. It is called in this part of its course the Porsic-ho. In 31° N lat. it enters the country of Laton, and runs almost due S till at Tachinquan, in 27° 32' N lat., and 16° 40' W long. of Pekin, it enters Yun-nan, after a comparative course of 1,000 m. through T. Its course through China is at least double that distance. Its volume of water is the largest of any river in the Eastern hemisphere, discharging, it is calculated, 464,400 cubical ft. per second of time into the sea. Including sinuities, its length of course is to that of the Thames as 21½ to 1, or as 3,780 to 180 m.; and its basin to that of the Thames as 138 to 1, or 760,000 sq. m., as it comprehends all the central part of China and the eastern part of T., including the Sifan.—The Lantsan-kiang rises in 34° 30' N lat., and 22° W long. of Pekin, according to the Lama's map, and enters Yun-nan under the name of the Lak-chu, whence it proceeds to the country of the Northern Laos. To the W of this river runs another called Karanusu, the modern Lu-kiang of Yun-nan; and to the W of this is the Long-chuen-kiang. We are not exactly of the opinion of Klaproth with respect to the geographical merits of the edict on which some of these details appear to rest. He appears to have used it mainly for the purpose of contradicting our learned countrymen of Calcutta, and the German journalists of Weimar, who happened to coincide with them in their opinion, that the Seri-Serhit of the Bor-Khampti country is the genuine Irrawaddy of Ava; whilst the Sanpo of T. on the one hand, and the Nu-kiang of Yun-nan on the other, are both denied to be the Irrawaddy.

Climate.] In respect of climate—to reason analogically—Eastern T. must bear a great resemblance to Western T.; our actual knowledge of its climate is confined to that part which lies to the S of the Sanpo. In the temp. of the seasons a remarkable uniformity prevails in T., both in their periodical duration and return: the same division of these takes place as in Bengal. The spring is from March to May, with a variable atmosphere and heat, thunder-storms, and occasional showers. From June to September is the humid season, when heavy and continued rains swell the rivers. From October to March a clear and uniform sky succeeds, seldom obscured by fogs or clouds. For three months of this season a degree of cold, far greater than is known in Europe, prevails. M. Huc, in travelling from the Koko-Nor to Lassa, had the little cakes of barley which he carried with him, close to his person and under three robes of skin, continually frozen. On the confines of T. its extreme severity has been felt by such as have crossed its mountainous frontier, whether to Tishulumbu or Lassa. On this rest eternal snows and permanent congelation; and its vicinity is at all times remark-

able for the violence and dryness of the winds. "In summer the sun is powerful at mid-day, the air is of the purest transparency, and the azure of the sky so deep that it seems black as in the darkest night. The rising moon does not enlighten the atmosphere; no warming radiance announces her approach till her limb touches the horizon; and the stars shine with the distinctness and brilliancy of suns. In Southern T. the verdure is confined to the favoured spots—the black mountains and high plains are sternly gloomy—a scene of barrenness not to be conceived: solitude reigns in those dreary wastes, where there is not a tree nor even a shrub to be seen of more than a few inches high. The scanty short-lived verdure vanishes in October; the country looks as if fire had passed over it, and cutting dry winds blow with irresistible fury, howling in the bare mountains, whirling the snow through the air, and freezing to death the unfortunate traveller benighted in their defiles." It is remarkable that the snow-line is considerably higher in T. than on the S declivity of the Himalaya. Barley is grown in T. at an alt. of 14,700 ft.; wheat at 12,000 ft.; and small shrubs are found vegetating at 17,000 ft. above sea-level in Southern T. Strachey fixes the snow-line on the S side of the Himalayas at 15,500 ft.; but at from 19,000 to 20,000 ft. on the great plateau of T.

Soil and productions. In such a lofty region, in a climate where the inhabitants are obliged to seek refuge from the intensity of the cold in the valleys and hollows, and where, from the glare of light reflected from the snow, they are subjected to ophthalmia and blindness, we cannot expect much fertility of soil, or abundance of vegetable and farinaceous produce. Yet in some of the valleys grain is abundant, and numerous clusters of villages meet the eye. *Ua* or black barley is the grain chiefly cultivated; little wheat is raised. Beans, turnips, and cabbage, are among the vegetables raised. Large herds of sheep and cattle are reared in Eastern T. The musk-deer is found in great numbers on the mountains of T. These animals are about the size of a moderately sized hog, which they resemble in figure. They have a small head, a thick and round hind quarter, no scut, and extremely delicate limbs. The greatest singularity in this animal is the sort of hair with which it is covered, which is prodigiously copious, and grows erect all over the body, between two and three inches long, lying smooth only where it is short, on the head, legs, and ears. Upon examination, it partakes in its texture, less of the nature of hair than feathers; or rather, it resembles the porcupine's quill, at the same time it is thin, flexible, and not straight, but undulated. The colour at the base is white, in the middle black, and brown at the points. The musk is a secretion formed in a little bag or tumor, resembling a wen, situated at the navel, and found only in the male. Among the valuable and useful animals of T., the breed of sheep merits a distinguished rank. A peculiar species is marked almost invariably by black heads and legs. They are of small size; their wool is soft, and their flesh the finest mutton in the world. They are fed principally upon the short herbage peculiar to the sides of eminences, and bleak, exposed plains. They are occasionally employed as beasts of burden; and numerous flocks of them may be seen in motion, laden with salt and grain, each carrying from 12 to 20 pounds. Their wool is usually fabricated into a narrow cloth resembling frieze, or a thick coarse blanket. When slaughtered, their skins are most commonly cured with the wool on, and form a most excellent winter garment for the peasant and the traveller. The skins of lambs are cured also with the wool on, and

constitute a valuable article of traffic. The autumn being clear and serene, the farmer spreads his corn on the ground to dry, and then employs oxen to tread it. The variety and quantity of wild fowl, game, and beasts of prey, are astonishing. Deer, antelopes, wild asses, wild goats, lynxes, ounces, and bears, are numerous. Turner met with no wild animal in Butan but the monkey, and amid all his travels through it, he saw no game except a few pheasants near Chuka. It is not till near the source of the Patchien, at the foot of Somunang, that wild animals begin to appear. Herons, ducks, geese, gulls, and tern frequent the great lakes. Lizards, grasshoppers, crickets, spiders, and bees occur.—Gold, rock-salt, and *lapis lazuli*, are among the mineral productions.

Inhabitants. This large and mountainous region contains a number of distinct tribes all classed under the common name of Tibetans, and branches of the great Mongolian family. Besides the aborigines of the country, we know of two other classes of pop. in T., the Thorpo and the Hor. The former of these tribes dwell to the N, between the Yarkes-Sampo on the S, and the Gobi on the N, and to the W of the sources of the Kiang-Ku, between the eastern frontier of Khotan and the tract through which the road passes from Lassa to Sining. They speak a distinct language both from the Kalmuks and the Tibetans. Moorcroft confounded them with the Eluths who are themselves Kalmuks, though at the same time he distinguishes them from the Hor or Sogho, who are an Eluth tribe. They are the descendants of the Ugur tribes, who dwell in the same tract during the time of the Yuen dynasty, and who then bore the name of Kara-Uigur. They are the undoubted representatives of the Ugurs who made such a figure in the history of Jenghis-Khan, and who seemed to have vanished quite out of sight, like their ancient neighbours the Hyongna. Their country is called Kara-Tibet, and they are divided into Upper and Lower Ugurs. They were subdivided in 1573 by one of the Mongolian chiefs, to the N of the Great wall. The Hor are a branch of the Eluth stem, who roam to the N of the Kara-Nor. Hor or Hor-pa is the Tibetan name for the Mongolian race generally, who are called by the appellation Ghila-Hor, or 'the people of Hor,' whilst the name of this tribe in Mongolian is Siraigol or Karagol. They are also called by the Tibetans Sogh-po or wanderer, and Ghila Sogh or 'the people of the prairies,' because they wander in the steppes. In Carey's Tibetan lexicon the names Hor and Sogh-po are rendered by the word Tartars, and their country, Sogh-tal, is rendered Tartary. We know of no other distinct tribes in T., though doubtless there are more, as several languages or at least dialects are spoken. Whether the priesthood are a different stock from the shepherds and goatherds it is impossible to determine, but there is ground to suspect so, and that they are of Hindu origin; that they came from Hindostan, and importing hither the system of Budh, by means of it, and their superior learning and science, obtained a complete ascendancy over the simple and ignorant aborigines. Although the age of Budha himself, or of the author of the system which bears his name, was at least ten centuries anterior to our era, yet his system was not introduced into T. until a period comparatively modern, although it is impossible to fix the date of its introduction. It seems certain, however, that the present Tibetan language and literature are of Hindu origin. The priesthood—who are possessed of whatever literature exists in T.—point to Benares as the source whence all their learning has been derived; and Moorcroft, in a communication from Cashmere, in 1823, to the Asiatic society of Calcutta, gives a sketch of the language of T. illustrated by drawings of the various alphabets used there. According to this account, not less than 10 varieties of character are employed in that country for familiar and religious purposes.—T. is the chief seat of Buddhism and of its incarnate head, the Grand lama. The influence of this spiritual lord extends over the whole of Central Asia, and he formerly united in his own person the regal as well as the sacerdotal character. The latter he still preserves in its fullest extent, in his own name and by means of spiritual vicars, who reside in different parts of his vast spiritual domain; but his regal power has of late been exercised by the emperor of China, who acts in his name, and has got military possession of all T. The Tibetans assemble in chapels, and unite together in prodigious numbers, to perform their religious service, which they chant in alternate recitative and chorus, accompanied by an extensive band of loud and powerful instruments; so that it is mentioned by Turner, when he heard these congregations at worship, they forcibly recalled to his recollection the solemnity and sound of the Roman Catholic masses. The instruments made use of were all of an enormous size; trumpets above six feet long; drums stretched over a copper cauldron, such as are termed *bowbats* in Hindostan; the *gong*, a circular Chinese instrument of thin hammered bell-metal, capable of producing a surprising sound; cymbals, *hauboyas*, and a double drum, shallow, but of great circumference, mounted upon a tall, slender pedestal, which the performer turns with great facility, striking either side with a long curved iron, as the piece requires a higher or a lower tone. These, together with the

human tibia and sea conch, compose, for the most part, their religious band. Harsh as these instruments, individually taken, might sound to a musical ear, when joined together in unison, with the voices of two or three hundred boys and men, managed with varying modulation, from the lowest and softest cadence to the loudest swell, they produce an effect extremely grand.

Commerce and Manufactures.] Hair and woollen stuffs, velvets of remarkable beauty of colour, elegant tobacco pipes and bowls, and jewellery of considerable taste, are manufactured by the Tibetians. The principal commerce is with China, to which T. exports gold-dust, incense, woollens, wax, fleeces, and European goods. Formerly a considerable commerce was carried on with Bengal through Nepal, but since 1792 the timid jealousy of the celestial court has greatly impeded the development of this traffic. To Cashmere, T. sends shawl-wool, rock salt, turquoises, musk, tea, and borax. No money is coined in T., being forbidden by the principles of their religion, and a very adulterated coin is the common medium of exchange.

Government.] The administration of affairs is managed by four *ghylongs*, or priests, each of whom has the administration of one-fourth of T. Under these functionaries, the civil and military affairs of T. are conducted by the Chinese who dwell at Lassa, and whose nomination must be approved by the Dalai lama. The Tibetan army is composed, according to father Hyacinth's Chinese author, of 60,000 men, of whom 15,000 are cavalry. The levy is said to be made with great impartiality, one man out of 10 is ordinarily taken. This, if correct, would give 600,000 men fit to bear arms; and this number, if reckoned as representing one-fourth of the pop., would give 2,400,000 as the pop. of T.; but to this must be added all those who belong to the religious orders, whether male or female, so that the pop. may perhaps amount to 3,000,000.

Manners and Customs.] The houses of the peasantry resemble brick-kilns, being built of rough stones heaped on each other, with a few apertures to admit light, and a flat terrace for the roof surrounded with a small parapet. In their food, the Tibetians prefer raw undressed meat; and at their feasts the table is seen spread with joints of raw fresh mutton as well as boiled, the former being most esteemed. They have no occasion to salt their meat during winter, as it will remain fresh during the whole season, from the coldness and dryness of the air. Tea is a favourite beverage amongst them. The milk of the yak is much used as food. This most useful animal gives abundance of lacteal fluid, rich, and yielding excellent butter, which is easily preserved in skins or bladders excluding the air. It keeps in this climate during all the year, so that after some time tending their flocks, when a sufficient stock is accumulated, they have only to load the yaks and drive them to market with their own produce, which constitutes, to the utmost verge of Tartary, a material article of merchandise.—“The yak,” says Lieut. Wood, “is to the inhabitants of T. and Pamir, what the reindeer is to the Laplander in Northern Europe. Where a man can walk a kash-gow may be ridden. Like the elephant he possesses a wonderful knowledge of what will bear his weight. If travellers are at fault, one of these animals is driven before them, and it is said that he avoids the hidden depths and chasms with admirable sagacity. His footing is sure. Should a fall of snow close a mountain pass to man and horse, a score of yaks driven a-head answer the purpose of pioneers, and make, as my informant expresses it, “a king's highway.” In this case, however, the snow must have recently fallen; for when once its surface is frozen, and its depth considerable, no animal can force its way through it. Other cattle require the provident care of man to subside them through the winter. The most hardy sheep would fare but badly without its human protection, but the kash-gow is left entirely to itself. He frequents the mountain-slopes and their level summits. Wherever the mercury does not rise above zero, is a climate for the yak. If the snow on the elevated flats lie too deep for him to crop the herbage, he rolls himself down the slopes and eats his way up again. When arrived at the top, he performs a second summer, and completes his meal as he displaces another groove of snow in his second ascent. The heat of the summer sends the animal to what is termed the old ice, that is to the regions of eternal snow; the calf being retained below as a pledge for the mother's returning, in which she never fails. In the summer, the women, like the pastoral inhabitants of the Alps, encamp in the higher valleys, which are interspersed among the snowy mountains, and devote their whole time to the dairy. The men remain on the plain, and attend to the agricultural part of the establishment, but occasionally visit the upper stations, and all speak in rapture of these summer wanderings.

The kash-gows are gregarious, and set the wolves, which here abound, at defiance. Their hair is clipped once a-year in the spring. The tall is the well-known *Chowry* of Hindostan; but in this country, its strong, wiry, and pliant hair is made into ropes, which, for strength, do not yield to those manufactured from hemp. The hair of the body is woven into mats, and also into a strong fabric which makes excellent riding trousers. The milk of the yak is richer than that of the common cow, though the quantity it yields be less. The *kurut* made from it is considered to be first-rate, even superior to the produce of the Kohistan of Kabul, which has great celebrity in Afghanistan. The Kirghiz never extract the butter.”—The Tibetians are said to be polyandrist; one woman having several husbands. The eldest brother of the family has the privilege of choosing his wife, but she becomes the common property of all the brothers however numerous. The general mode of disposing of the dead is like that of the Persians of Bombay: they are exposed in the open air, and left to be devoured by carnivorous birds. A place set apart for this purpose was seen by Turner and his suite, when descending into the plain of Phari. But a fate far different is reserved for the body of the sovereign lamas, the Dalai lama, and the Tshu lama. As soon as the soul of Budha has left the body of the grand lama, it is placed upright in an attitude of devotion, the legs being folded under the body, with each thigh resting on the instep, and the soles of the feet turned upwards; in this posture they are deposited in shrines. The inferior lamas have their remains usually burned, and their ashes deposited in small metallic idols. Over the shrines of the deceased sovereign lamas, splendid pyramidal mausoleums are built. Sunk as the Tibetians are in the most abject subjection, they are comparatively an amiable, mild, humane race, and free from many of the cruel and sanguinary customs of the Hindus. There is no selling of female infants in T.; no putting them to death or exposure on trees or on the banks of rivers; nor funeral piles whereon widows are burnt to accompany the manes of their deceased husbands.

Cities.] The greater number of places marked on the map of T., as given by the lamas, seem, as Malte Brun very justly remarks, to be nothing more than villages or groups of cabins, each surrounding some temple. According to the Dai-Syn-toundchi, there are but 16 cities in all T. Of these LASSA, the capital of Wei-tsang or Eastern T., and TSHULUMBU, the capital of Western T., are the principal. See these articles.

Historical notices.] Like many other pagan countries of Asia, Hindostan not excepted, T. has no historical annals, at least none have yet been discovered: we only know its history by its connection with and vicinity to China. Beyond 790 of the Christian era, we have nothing but tradition—a most uncertain and precarious guide; but according to it, T. was peopled 1340 years before Christ, by Prasinpo and Prasimmo. Some 300 years later, Budha or Sacyo, was born of a virgin, having descended from the skies to restore a purer system of faith. The first king of T. was Gulathrits Bengo, son of Macchabala, a Hindu sovereign. His capital was Jarlon, and he died 1102 years before our era. The people, weary of anarchy, voluntarily submitted to China in 790, A.D. From this period some light begins to dawn on Tibetan history. From the Chinese writers we learn that the Tibetians were a powerful people in the 8th cent., and possessed of all the country from the sources of the Sampo to the mountains of Cashmere, and the frontiers of Tokharistan to the W of the Belur. Jenghiz-Khan and Timur successively conquered T. In 1727 the supremacy of China was finally submitted to.

TIBET (LITTLE). See BULRI.

TIBET (MIDDLE). See LADAK.

TIBI, a town of Spain, in the prov. and 18 m. NW of Alicante, and partido of Jijona, on the l. bank of the Ibi, in a fertile locality. Pop. 1,571. It has a parish church, and a custom-house, and in the environs is a fine reservoir.

TIBITINGA. See TABATINGA.

TIBOHINE, or **TAUGHBOYNE**, a parish in co. Roscommon, containing the town of Frenchpark and the village of Loughglynn. Area 44,092 acres. Pop. in 1831, 16,460; in 1841, 17,804.

TIBSHELF, a parish in Derbyshire, 4½ m. NE by N of Alfreton. Area 2,280 acres. Pop. in 1801, 661; in 1831, 759; in 1851, 806.

TIBTHORPE, a township in Kirk-Burn p., Yorkshire, 5½ m. WSW of Great Driffield. Area 2,780 acres. Pop. in 1831, 227; in 1851, 271.

TIBURON. See TIBERON.

TIBURON, an uninhabited island of the gulf of California, near the coast of the Mexican prov. of Sonora. It is about 54 miles in length from NNW to SSE, and 24 m. in medium breadth. A little to

the N of this island is a pearl fishery.—Also a headland of New Granada, in the dep. of Ystmo, and prov. of Panama, on the W coast of the gulf of Darien.

TIBURONES, a group of islands, two in number, surrounded by rocks, near the Mosquitia coast, in N lat. 15° 10', and W long. 82° 8'.

TICAO, an island of the Philippine archipelago, a little to the NE of the island of Masbate, and to the S of the SE peninsula of the island of Luzon, in N lat. 12° 30', and E long. 123° 35'. It is 33 m. in length, and nearly 9 m. in medium breadth. It is generally mountainous. On its E coast is Port S. Jacinto, and on the NW that of S. Miguel. It is well-watered and very productive, and is frequently touched at for provisions by Spanish vessels on their voyages to Acapulco.

TICEHURST, a parish in Sussex, 3 m. ESE of Wadhurst. Area 3,202 acres. Pop. in 1851, 2,850. The village occupies a gentle eminence surrounded by hills and valleys of great beauty and fertility.

TICHANSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, 75 m. ENE of Bogotchar, on the Khoper.

TICHAU, a village of Prussia, in the prov. of Silesia, regency and 63 m. SE of Oppeln, and circle of Pless. Pop. 1,650.

TICHBORNE, or **TITCHBOURNE**, a parish in Hants, 2½ m. SW of New Alresford. Area 3,060 acres. Pop. in 1831, 363; in 1851, 378.

TICHET, or **TAGAZA**, a town in the SW part of the Sahara, about 600 m. E of St. Louis-de-Senegal. The houses are constructed of rock-salt, and covered with camels' skins. The surrounding district is completely desert. It contains mines of fine salt, remarkable for the uniformity of its crystals. T. is inhabited by Moors.

TICHFIELD, a parish and market-town in Hants, 2½ m. W of Fareham, and 9 m. ESE of Southampton, on a small stream falling into Southampton water, with which it communicates by a navigable cut, and near the Gosport branch of the South-Western railway. Area of p. 17,512 acres. Pop. in 1831, 3,712; in 1851, 3,956.—The town consists principally of one good street running nearly N and S. It has breweries and corn-mills.

TICHITHOCKTHNOCK, a small island of the Atlantic, near the E coast of Labrador, in N lat. 55° 50', and W long. 59° 42'.

TICHMARSH, a parish in Northamptonshire, 1½ m. NNE of Thrapston. Area 4,480 acres. Pop. in 1831, 843; in 1851, 308.

TICINETTO, a town of Sardinia, in the div. of Alexandria, prov. and 7 m. SE of Casale, and mand. of Frassinetto-di-Po, in a fine plain. Pop. 1,000.

TICINO, or **Tessin**, a considerable river of Italy, which has its source in Switzerland, on Mount St. Gothard, and after traversing the Val-Levantina, in the cant. of Ticino, turns SW, and flows into the Lago-Maggiore. Issuing from that lake, at its southern extremity, it flows SSE, and forms the boundary between Austrian Italy and the Sardinian states, until its junction with the Po below Pavia, after a course of 120 m., of which 45 m. are above the Lago-Maggiore. It becomes navigable at its efflux from the lake.

TICINO, or **Tessin**, a canton in the S of Switzerland, situated between the central cantons and the frontier of Lombardy; and bounded on the N by the Grisons and Uri; on the E and S by Lombardy; on the W and SW by Piedmont. It was formerly called the Italian balliwics, and is a tract of mountainous territory acquired long since by the Swiss, but inhabited by Italians, and governed by temporary deputies from the respective cantons until

1815, when it was formed into an independent canton, divided into the 8 following districts:—

	Pop. in 1815.	Pop. in 1850.
Mendrisio.	12,000	17,372
Lugano or Lania.	26,700	36,473
Valmaggia or Mayenthal.	6,000	7,482
Locarno or Lugarus.	17,400	22,363
Bellinzona or Bellens.	8,000	11,623
Riviera.	2,000	4,445
Blegno or Blenk.	6,300	7,687
Levantina.	9,600	10,331
	89,000	117,760

The area of the whole, 1,030 sq. m., is equal to a middle-sized English county. It is watered in all its extent by the Ticino, and is extremely mountainous, the ramifications of the Alps dividing it into more than 20 distinct valleys. On its N frontier rise the Splügen, Mount St. Gothard, and Mount St. Bernard. The whole cant. belongs to the basin of the Po. The soil is fertile, and the climate mild. Figs, almonds, oranges, citrons, the myrtle, the pomegranate, and the olive flourish in the S part. The inhabitants, however, are represented as comparatively ignorant, indolent, and unacquainted with manufactures, the men generally emigrating, like the Savoyards, to large towns in Italy or France, and leaving to the women the care, not only of the cattle, but of tillage. Wine is cultivated and exported in small quantities; and the quantity of silk made is large. The exports take place chiefly to Italy, and though small in amount, comprise a diversity of articles, viz. silk, fruits, cheese, skins, marble, crystals, and timber; also the only manufacture of the country, straw hats. The government is vested in a grand council, chosen by all citizens 25 years of age, and possessing property to the value of £12 in life-rent.

TICKARRY, a town of Hindostan, in the prov. and district of Bahar, and 51 m. WSW of the town of that name. It is advantageously situated at the junction of 7 roads, and was formerly fortified.

TICKENCOTE, a parish in Rutlandshire, 9 m. E of Oakham. Area 1,256 acres. Pop. in 1851, 98.

TICKENHAM, a parish in Somersetshire, 9 m. W by S of Bristol. Area 1,627 acres. Pop. 424.

TICKHILL, a parish in the W. R. of Yorkshire, 4½ m. W of Bawtry, comprising the townships of T. and Stancill with Wellingley and Wilsick. Area 6,514 acres. Pop. in 1831, 2,084; in 1851, 2,159. The church, built in the reign of Richard II., is a very perfect specimen of the 14th century.—The town is straggling, and covers a large space of ground. An extensive trade in malt was formerly carried on at this place, but it has much decreased.

TICKILLEN, a parish in co. Wexford, 3½ m. NW of Wexford. Area 2,866 acres. Pop. in 1841, 1,260.

TICKMACREVAN, a parish in co. Antrim, containing the town of Glenarm, and part of the village of Carnlough. Area 20,506 acres. Pop. in 1831, 3,859; in 1841, 4,443. The summit of Collin-Top, a little beyond the NW extremity of the p. has an alt. above sea-level of 1,419 ft. The hamlet of Straidkelly, on the coast between Glenarm and Carnlough, had, in 1831, a pop. of 172.

TICKNALL, a parish in Derbyshire, 8½ m. S of Derby, and in the line of a railway connected with the Ashby-de-la-Zouch canal. Area 1,867 acres. Pop. in 1831, 1,278; in 1851, 1,241.

TICONDEROGA, a township and village of Essex co., in the state of New York, U. S., on both sides of the outlet of Lake George, and 87 m. N by E of Albany. It has a hilly surface, but near the lakes is very fertile. Pop. in 1840, 2,169; in 1850, 2,669.

TICON, or **Toku**, a group of islets in the Indian ocean, near the W coast of Sumatra, in S lat. 0° 6'.

and E long. $99^{\circ} 50'$. The nearest of the group is not more than $1\frac{1}{2}$ m. from the coast. They are well-wooded, and inhabited. Establishments were formed here by the English and Dutch for the pepper trade, but were abandoned in 1621.

TIGUNAS, a tribe of Indians who inhabit the tract of Ecuador, extending between the Tutumayo or Ica and Amazon.

TIDAN, a river of Sweden, in the prefecture of Skaraborg, which issues from the N extremity of a small lake, on the confines of the prefecture of Joenköping, 15 m. NW of the town of that name; runs first N, then W; forms Lake Osten; takes afterwards a NNW direction; and after a sinuous course of about 51 m. throws itself near Lake Mariestad into Lake Wener.

TIDCOMBE, a parish in Wilts, $5\frac{1}{2}$ m. NNE of Ludgershall. Area 2,321 acres. Pop. in 1851, 218.

TIDDINGTON, a hamlet in Albury p., Oxfordshire, 3 m. NW of Tetsworth. Pop. in 1851, 174.

TIDDY, a town of New South Wales, in the district of Darling Downs, on the Condamine, near Peel Plains.

TIDENHAM, a parish in Gloucestershire, 14 m. SW by S of Newnham, situated between the rivers Severn and Wye. Area 9,527 acres. Pop. 1,753.

TIDESWELL, a parish and market-town in Derbyshire, 32 m. NNW of Derby. The parish comprises the township of T., the chapelry of Wormhill, and the hamlets of Litton and Whetstone. Area 10,350 acres. Pop. in 1831, 2,807; in 1851, 3,411. —The town is but indifferently built, but appears to have once been a place of more consequence than it is at present.

TIDI, a river of Cornwall, which rises near Liskeard, and, uniting with the Lynher, falls into the Tamar.

TIDMARSH, a parish in Berks, 6 m. WNW of Reading, on a branch of the Thames. Area 779 acres. Pop. in 1831, 143; in 1851, 145.

TIDMINGTON, a parish in Worcestershire, but located in the co. of Warwick, $1\frac{1}{2}$ m. S of Shipston-upon-Stour. Area 754 acres. Pop. in 1851, 53.

TIDONE, a river which has its source in the div. of Genoa, and prov. of Bobbio, 7 m. E of Varzi; runs first N, then NW; passes Zavatarello; turns afterwards NE; enters the state of Parma, in which it waters the W part of the duchy of Piacentia; and after a course of about 39 m., joins the Po, on the r. bank, 7 m. NW of Piacentia. It is noted for a victory over the Sardo-German forces by a French and Spanish army in 1746.

TIDONG, or **WAPEN-VAN-HOORN**, a small island of the Sunda archipelago, in the Java sea, at the E entrance to the Sunda strait, in S lat. $5^{\circ} 44'$, and E long. $106^{\circ} 24'$.

TIDOR, an island of the Asiatic archipelago, in the group of the Molucca islands, in N lat. 45° , and E long. $127^{\circ} 25'$, near the W coast of the island of Gilolo, and 9 m. S of that of Ternate, from which it is separated by a channel affording good and safe anchorage. This island is about 21 m. in circumference, and is well-watered by several streams, which descend from the lofty mountains by which a great part of its surface is covered, and one of which is an active volcano. Spices form its chief productions. Its inhabitants are Mahomedans, and are subject to a sovereign, under the protection of the Dutch. This island was discovered by the Spanish navigator, Magalhaen, and a factory was established by him on its shores. In 1527 it was taken by the Portuguese, and in 1607 by the Dutch.

TIDWORTH (North), a parish in Wilts, 2 m. SW by W of Ludgershall. Area 3,069 acres. Pop. in 1831, 392; in 1851, 385.

TIDWORTH (South), a parish in Hants, $7\frac{1}{2}$ m. WNW of Andover. Area 2,175 acres. Pop. 230.

TIEB. See **DIZARE**.

TIECHOBUS, a village of Austria, in Bohemia, in the circle and 15 m. NE of Tabor. It has a glass-work.

TIEDRA-VIEGA, a town of Spain, in the prov. of Valladolid, and partido of Rioseca, in a valley of the Sacada, on a steep height. Pop. 1,695. It has an old castle, four parish churches, a priory depending upon the Bernardine convent, and an hospital.

TIEFENBACH, a village of Württemberg, in the circle of the Neckar, NE of Maulbronn. Pop. 420.

TIEFENBRONN, a village of the grand-duchy of Baden, in the circle of the Middle Rhine, on the Würm, SW of Pforzheim. Pop. 850.

TIEFENDORF, a village of Saxony, in the circle of Lusatia. It has several mineral springs.

TIEFENGRUBEN, a village of the grand-duchy of Saxe-Weimar, in the circle of Weimar-Sena and bail. of Berka. Pop. 200. In its vicinity are extensive beds of gypsum, alabaster, potter's clay, fuller's earth, and rock crystal.

TIEFENKASTEN, a village of Switzerland, in the cant. of the Grisons, on the l. bank of the Albul, on the road into Italy by the Septim pass. Pop. 200.

TIEFENORT, a market-town of the duchy of Saxe-Weimar, in the circle and 13 m. SW of Eisenach, on the Werra. Pop. 1,264. It has manufactories of woollen fabrics. In its vicinity are the ruins of the castle of Craynberg.

TIEFFURTH, a village of the grand-duchy of Saxe-Weimar, in the circle of Weimar-Sena, 4 m. NE of Weimar, on the Ilm. Pop. 261. It has a ducal castle and an agricultural school.

TIEFHARTMANSDORF, a village of Prussia, in the prov. of Silesia, regency and 23 m. SW of Liegnitz and circle of Schonau. Pop. 1,270. It has manufactories of linen damask.

TIEGENHOF, a town of Prussia, in the prov. of W. Prussia, regency and 24 m. SE of Danzig, and circle of Marienburg, on the Tiege. Pop. 1,800. It has manufactories of linen and of printed calico, several dye-works, a brewery, and a vinegar manufactory.

TIEGHEM, a department and commune of Belgium, in the prov. of W. Flanders and arrond. of Courtrai. Pop. of dep. 2,567. The village is 11 m. E of Courtrai and cant. of Avelghem, on a hill. It has several flax mills.

TIEHELERY, a commune of Belgium, in the prov. of Limburg and dep. of Nienwerkerken. Pop. 224.

TIELMES, a town of Spain, in the prov. and 27 m. SE of Madrid and partido of Chinchon, on the r. bank of the Tajuna. Pop. 830.

TIEMBLO (El), a town of Spain, in the prov. and 21 m. SSE of Avila and partido of Cebreros, in a marshy and woody locality, near the r. bank of the Alberche. Pop. 1,373. It has a parish-church, a convent, a custom-house, and a public granary, and possesses manufactories of woollen and linen fabrics.

TIENE, a town of Austrian Lombardy, in the prov. and 12 m. NNW of Vicenza, in a fertile and salubrious plain. Pop. 5,000. It has an hospital, and possesses manufactories of cloth, hats, linen, and silk.

TIERACHE, a commune of Belgium, in the prov. of Hainault and dep. of Momignies. Pop. 350.

TIERE'E, a commune of France, in the dep. of the Maine-et-Loire, cant. and 4 m. NNE of Briollay, near the l. bank of the Sarthe. Pop. 2,023. It has quarries of slate and free-stone.

TIERMAS, a town of Spain, in the prov. and 72 m. N of Zaragoza and partido of Sos, on a pine-covered mountain, and near the r. bank of the Aragon. Pop. 570. It has numerous thermal springs.

TIERNEY, a parish and town of Van Diemen's Land, in the co. of Somerset. The p. is bounded on the W by the Lake river, and on the E by the Isis. The town is on the Lake river.

TIERPS, or **TIERP**, a village and parish of Sweden, in the prefecture and 83 m. NNW of Upsala, on the l. bank of a river of the same name. The p. comprises the island of Saertsoe, formed by the Dalf, and contains numerous iron forges.—The river T. has its source in Lake Skersloen, at the NE extremity of the prefecture of Westeras; runs first ESE, then NNE; forms Lake Tennaren; waters the N part of the prefecture of Upsala; and after a tortuous course of about 60 m., falls into the gulf of Bothnia, near Karlholm.

TIERRA-AUSTRAL-DEL-ESPIRITU-SANTO. See **ESPIRITU-SANTO**.

TIERRA-BOMBA, an island of the Caribbean sea, near the N coast of New Grenada, in the dep. and 5 m. SSW of Cartagena, at the entrance to a bay formed on the S by the island of Bara. It is about 6 m. in length, and 9 m. in breadth, and near its S extremity are two forts for the defence of the Boca-Chica, the entrance to the bay.

TIERRA-DEL-FUEGO. See **FUEGO**.

TIERRA-WETTE, **TERA-WITTE**, or **POLIWERO (CAPE)**, a headland of New Zealand, forming the SW extremity of the island of Ekeinomauwe or New Ulster, in Cook's strait, in S lat. 41° 21', E long. 175° 48'. It was discovered by Cook in 1769.

TIERS, a commune of Belgium, in the prov. of Liege and dep. of Chenece. Pop. 145.

TIERSHANAGHAN, a village in the p. of Ballyheigue, co. Kerry. Pop. in 1841, 222.

TIESCHTIN, or **TUSCHTIN**, a town of Moravia, in the circle of Olmütz, 11 m. SSW of Tobitschan.

TIESI, a village of Sardinia, in the div. of Cape Sassari, prov. and 18 m. ESE of Alghero, in an unhealthy plain, near the source of the Turritano. Pop. 2,120. The environs, which are partly level, afford grain and pasture in great abundance.

TIETAR, a river of Spain, which has its source on the W side of Mount Pinos, in the prov. of Toledo, 12 m. N of Talavera-de-la-Reina; runs first W; enters the prov. of Caceres; turns SW; and after a course of about 90 m., joins the Tagus on the r. bank, 24 m. NNE of Caceres. In the upper part of its course it flows through a sandy district of little fertility, but forms afterwards high and nearly inaccessible banks.

TIETE, or **ANHEMBI**, a river of Brazil, which has its source in the Serra-Cubitao, in the district and 80 m. E of São-Paulo; runs first W, then NW; and after a total course of about 450 m., joins the Parana on the l. bank, in S lat. 20° 36', W long. 51° 50'. Its principal affluents are on the r., the Jundiáhi, Capibari, Piracicaba, Jacarepipira-Mirim, Jacarepipira-Açu or Pipira; and on the l. the Sorocaba and Lancões. Near the junction of the Jundiáhi, the T. forms a magnificent cataract, and throughout all the lower part of its course its navigation is obstructed by numerous cataracts.

TIETZ, **TUETZ**, or **TUCKNO**, a town of Prussia, in the prov. of W. Prussia, regency of Marienwerder, circle and 15 m. SW of Deutsch-Krone, in the midst of a group of lakes. Pop. 1,000. It has a manufactory of cloth and a saw-mill.

TIEUDENBERG, a commune of Belgium, in the prov. of W. Flanders and dep. of Westroosebeke. Pop. 340.

TIEVAS, a town of Spain, in the prov. of Navar-

ra and partido of Aoiz, 9 m. SE of Pamplona, at the foot of the Alais mountains. Pop. 238. It has a fortress in which the most important state documents were kept by Philippe-le-Beau, and which was destroyed in 1378.

TIEWINKEL, a commune of Belgium, in the prov. of Limburg and dep. of Lummen. Pop. 475.

TIFEH, or **TIFZACH**, a town of Algiers, in the prov. and 85 m. E of Constantine, on the Hamiz. It is of small extent, and possesses little strength. It occupies the site of the *Theveste* of the Romans.

TIFERNO, or **BIFERNO**, a river of Naples, in the prov. of Sannio, which has its source in the district of Isernia, a little to the W of Bojano; runs first E, then N; enters the district of Campobasso; bends NE; traverses the district of Larino; and after a course of about 63 m., throws itself into the Adriatic, 2 m. SSE of Termoli. Its waters abound with trout and eels.

TIFESCH, or **TIFESSAD**, a town of Algiers, in the prov. and 40 m. WSW of the town of that name, in a fertile locality. It is the *Tifasa* of the Romans, and contains numerous ruins.

TIFFANGES, a commune and town of France, in the dep. of La Vendee, cant. and 8 m. WNW of Mortagne-sur-Sevre, on the l. bank of the Sevre-Nantaise. Pop. 847. It has a paper-mill. This town is said to have been the capital of the Teiphaliens, a people of Scythian origin, brought by the Romans to garrison the towns of Poictou.

TIFFIELD, a parish in Northamptonshire, 2 m. N of Towcester. Area 2,580 acres. Pop. 154.

TIFFIN, a village of Seneca co., in the state of New York, U. S., 76 m. N of Columbus, on Sandusky river, and intersected by the Mad river and Lake Erie railway. Pop. in 1840, 600; in 1850, 2,728.—Also a township of Adams co., in the state of Ohio. Pop. in 1840, 1,540.—Also a township of Williams co., in the same state. Pop. 322.

TIFFINS, a river which has its source in the state of Michigan, U. S., flows thence into the state of Ohio, and joins the Maumee river.

TIFLIS. See **TEPLIS**.

TIFLISKOI, a fortress of Russia in Europe, in the prov. of the Caucasus, district and 93 m. WNW of Stavropol, on the r. bank of the Kouban.

TIFORE, a small low island of the Molucca sea, 90 m. W of that of Gilolo, in N lat. 1° 6', E long. 126° 8'.

TIGA, a small island in the Eastern seas, near the NW coast of Borneo, in N lat. 6° 25'.—Also an islet in Lampong bay, on the coast of Sumatra.

TIGAON, an island in the Indian sea, near the NW coast of Borneo, in N lat. 6° 10'.

TIGER, an island of Guayana, at the mouth of the river Essequibo. It is in a high state of cultivation, and produces excellent coffee and sugar.

TIGER, a small island in the Spanish Main, near the coast of Darien, in N lat. 8° 35', W long. 77° 30'.

TIGITAS, a small river of Venezuela, which rises to the S of Concepcion-de-Pao, and unites itself with the Galamotal.

TIGLAGANTI, a river of New Granada, in the prov. of Darien, which enters the sea in the gulf of Atrato.

TIGLIOLE, a town of Piedmont, 9 m. W by N of Asti. Pop. 2,500.

TIGNALE, a village of Lombardy, in the prov. of Brescia, near the W side of the Lago-de-Garda. Pop. 1,150.

TIGNES, a village of Savoy, 12 m. SE of St. Maurice, on the Isère.

TIGRE, a river of Ecuador, which rises in the prov. of Quixos; flows SE; and having been joined

by the Nahuapo, after a course of 800 m., falls into the Amazon, in 8 lat. 4° 58'.

TIGRE, a province of Abyssinia, which has given name to almost all the NE districts of that country. It lies between the parallels of 12° and 15° 30' N, and is composed in great measure of an elevated plateau supported by steep and lofty mountains, and intersected with fertile valleys and plains. The Tacasse, which intersects it in a N and W course, receives nearly all its streams. On the E it reaches in part to the sea, from which, however, it is to a great extent separated by a salt and sandy plain. Its principal subdivisions are Serch, T. Proper, Temben, Enderata, Wojerat, Adana, Agami, Serawi, Samen, Sulo, Woggam, Waldabba, and Walkayt. See article **ABYSSINIA**.

TIGRE, or **AMAPALLA**, a small island of the Pacific, in the gulf of Fonseca, on the S coast of Honduras. It is considered one of the best anchoring-places in the Pacific, and would be of considerable value as an intermediate coaling-station for steamers on their route to and from San Francisco, and also as a depot for merchandise, for the markets of Central America. See **FONSECA**.

TIGRILLO-BAY, a bay on the coast of Venezuela, between Punta-de-Tigrillo and Punta-Gorda. At its farther extremity is a canal communicating with the harbour of Mochima.

TIGRIS, a large and celebrated river of Western Asia, which rises in two head-streams in Central Armenia, on the southern slope of the Anti-Taurus, near the source of the Euphrates. These two great rivers flow parallel, but at a varying distance from each other to their point of junction at Kornah, in N lat. 31°, about 100 m. above the Persian gulf, and after a course of 1,150 m. See article **EUPHRATES**. The western branch of the T. rises under the mountain of Hagar-Baha, 10 m. S of the beautiful little lake of Ghuljik, near the southern limits of the Taurus. The little torrent having passed through the wild scenery of the mountain, emerges, increased by numerous rivulets and springs, into the high plain of Diyarbekir, through which it flows in a SSE direction, and sweeps under the city of that name, a shallow stream, but 250 yds. wide when flooded. At Osman-Keui the western branch, after a course of 150 m., is joined by the eastern branch of the T., whose head-streams rise on the sides of Ali-Tagh, the ancient *Niphates*, and which has had a course of 100 m. to this point. For nearly 100 m. it bends to the E, through an open, undulating country, bare of wood in the vicinity of the river, and possessing little to attract attention or admiration. The stream runs slowly here, and frequent shallows and little rapids show the impossibility of any but the lightest barks being borne on the waters of this branch of the T. No remains of interest are to be found on this part of its course. After the junction of the Batman-su, or Sert river, that flows into the T. from the N, the river becomes more deep and rapid; the banks change to steep cliffs, on one hand, and a rich sloping country on the other, alternately, until after a few miles, it is winding in short turns between high cliffs in a SE direction. The romantic beauty of numerous Christian villages pitched on the cliffs, and the dark ravines here and there admitting a passage from the river to the open country, have a fine effect, and add much to the scenery of this part of the river. Numerous shallows and rapids occur in every part of its course, rendering it unfit for the purposes of communication, except downwards. About 40 m. below the Batman-su, is the noble bridge, and on the r. bank of the river the fine old ruins of Hussain-Keif. About 15 m. further on the Ridgwan river falls into it on the l. bank; at 20 m.

further on, the Tigris receives the Buhtan-chai, from the E; it then turns ESE and flows through a beautiful country about 50 m. to Jezireh, and passes through the Jebel-Judi, the "overhanging cliffs" of Xenophon. The country between Hussain-Keif and Jezireh is thronged with Christian villages, spread over a high uneven rocky plain, which produces the finest grapes in abundance. About 4 m. above Jezireh the river emerges into a more open country. The Khabur, or Zuchu river, flows into the Tigris 23 m. below Jezireh, from the eastward, at a point which must have been that where the Greeks turned from the banks of the T. to seek a passage over the Carduchian mountains by the road that now leads across the plain of Zuchu, and over the Jebel-Judi. The Khabur is not fordable near where it joins the T.; but it carries into the T. a much smaller body of water than the great stream bearing the same name which joins the Euphrates below Deir. At Jezireh, a fine old castle commands the river, and the bridge of boats that now crosses it. The remains of a splendid stone bridge cross it about 2 m. below the castle. The river below Jezireh, as far as Mosul runs through a high undulating plain; on both banks, hills are seen in the vicinity of the river, those on the l. bank converging towards it until they nearly touch, just below the confluence of the Khabur. The road along the l. bank lies over this high plain about 7 m. from the river, crossing the hills into the Zuchu plain, through which the Khabur runs. Its course is SE to Eski-Mosul, but it curves round so as to approach Mosul in a SSE direction. Capt. Lynch looked with much attention for a ford over the Tigris above Mosul, where Alexander might have crossed before the battle of Arbil, but no such ford exists at the present day. On the l. bank, both above and below Mosul are the ruins of Nineveh. See article **MOSUL**. Below Mosul about 28 m. by the river occurs the first *bund* or dyke of solid masonry called Zikru-Pahwas; and 12½ m. below this point the Zab enters the T. Flowing in a course to the E of S, the T. passes Tekrit, below which it gives off a canal which rejoins it near Bagdad. After receiving the Adhim, the T. bends SSE, and then S by W to Bagdad, between which city and Mosul, it has run with an average current of 4½ m. per hour, and a breadth of 200 yds. At 5 m. below Bagdad, the canal of Saklawiyah or Isa brings during the season of floods, a portion of the waters of the Euphrates into the Tigris, from a spot 6 m. below Felujah. At 21 m. below the Saklawiyah, the Diala or Diyalah brings into the T. a vast body of water. Below the confluence of this stream, the T. pursues a very winding course, with an inclination westward, until its waters and its name are lost in those of the Euphrates at Kornah, 282 m. from Kut-el-Amrah by the windings of the stream, and 144½ m. in direct distance.—Mr. Rich, while consul at Bagdad, obtained information from the natives that where the Eastern Tigris rises, it bursts at once from a cavern in the mountain, and in its earliest course is a much more considerable river than the Diyarbekir branch. The distinguished traveller and archaeologist, Mr. Layard, thus describes that part of his journey which refers to the country between Lake Wan and the caverned sources of the Eastern T. in 1850:—"We had now left the lake of Wan, and our track led up a deep ravine, which gradually became more narrow as we drew nigh to the high mountains that separated us from the unexplored districts of Mukus and Buhtan. On both sides of the ravine were villages and ruined castles. Numerous streams from the hill sides irrigated plots of cultivated ground. After climbing up a steep declivity of loose stones,

like the moraine of a Swiss glacier, and dragging our horses with much difficulty after us, we found ourselves amidst eternal snow, over which we toiled for nearly two hours, until we reached the crest of the mountain, and looked down into the deep valley of Mukus. This is considered one of the highest passes in Kurdistan. At the foot of the pass is a small Armenian church, called Khurus-Kilissa, or "the Church of the Cock," because a black cock is said to warn the traveller when the snowdrifts hide the mountain tracks. There was no other pathway down the rocky ravine than the dry bed of the torrent. Leaving the laden horses to find their way over the stones and through the torrent, we passed soon after a natural cavern, from which burst, white with foam and struggling through a bed of pink flowers, a most abundant spring. This was one of the principal sources of the eastern branch of the T." It is supposed by Mr. Ainsworth that this subterranean source of the Eastern T. is lower than Lake Wan, and that it is not at all improbable that its waters may be derived from that lake, and that thus the Lake Wan is in reality the source of the Eastern Tigris. He remarked that there is nothing in the elevation of the Buhtan-Chai—the ancient *Centrives*—or of its tributaries, and no tradition of waterfalls in the course of the Mukus river, to discountenance the fact of a much diminished elevation in the bed of the T. and its feeders, and the upland lake of Wan, which, it is estimated by the editor of the *Journal of the Royal Geographical Society* in 1888, has an alt. of 5,000 ft. above the level of the sea. The T. begins to rise in November, but its permanent rise does not usually begin till the middle of March, nor does it reach its greatest height till the middle of May, when it has a mean velocity of 7.33 ft. per second.

TIGRIS. See BOCCA-TIGRIS.

TIGUA, a river of Ecuador, in the prov. of Esmeraldas, which runs NW, and enters the Toachi, in S lat. 19°.

TIGUIL, a river of Kamtschatka, which rises in the district of Nizni-Kamtschatka, and falls into the Penjinskala gulf. On its banks, about 20 m. from its mouth, is built the fort of Tiguilskoi, the strongest in Kamtschatka, where a garrison is maintained, to keep in awe the Koriaks and the Tchutski.

TIHANG, or TIHOXY, a town of Hungary, in the com. of Szalas, 23 m. E of Tapoleza, on the E bank of a peninsula extending into the N part of Lake Balaton.

TIHANGE, a department and commune of Belgium, in the prov. of Liege, and arrond. of Huy. Pop. 872. It has a distillery and several breweries.

TIHARUH, a town of Hindostan, in the prov. of Delhi, 66 m. WNW of Sirhind.

TIH-CHU, a district and town of China, in the prov. of Shan-tung, div. and 75 m. NW of Tse-nan-fu, on the Imperial canal, in N lat. 37° 32' 20", and E long. 116° 24' 54". It has numerous shops, and has manufactories of straw bonnets. It is well-peopled. The locality is noted for its horses.

TIH-GAN, a district and town of China, in the prov. of Keang-se, and div. of Kew-keang-fu, 54 m. NNW of Nan-chang-fu, in N lat. 29° 19', and E long. 115° 43'. In its vicinity is a fine pagoda, consecrated to Fo.

TIH-GAN-FU, a division and town of China, in the prov. of Hu-pih. The div. comprises 5 districts. The town is 66 m. NW of Wu-chang-fu, in a fertile locality, on an affluent of the Yang-tse-keang, in N lat. 31° 18', and E long. 118° 37' 40". It has manufactories of wax-candles.

TIH-HING-HEEN, a district and town of China,

in the prov. of Keang-se, and div. of Faou-chu-fu, in N lat. 28° 54' 50", and E long. 117° 42' 8".

TIH-HWA-HEEN, a district and town of China, in the prov. of Keang-se, and div. of Kew-keang-fu.—Also a district and town in the prov. of Fokeen, div. of Yung-chun-chu, and 90 m. SW of Fuh-chu-fu, in N lat. 25° 26', and E long. 118° 16'.

TIH-KING-CHU, a district and town of China, in the prov. of Kwang-tung, div. of Chaou-king-fu, and 106 m. W of Canton, in N lat. 23° 13' 42", and E long. 111° 18' 10".

TIH-LING, a district and town of China, in the prov. of Leaou-tung, or Shing-king, in N lat. 42° 25', and E long. 123° 45'.

TIH-PING, a district and town of China, in the prov. of Shan-tung, and div. of Tse-nan-fu, in N lat. 37° 34', and E long. 117° 4'.

TIH-TAOU-TING, a district and town of China, in the prov. of Kan-suh, and div. of Lan-chu-fu.

TIH-TSIN, a district and town of China, in the prov. of Che-keang, and div. of Hu-chu-fu, in N lat. 30° 37', and E long. 119° 56'. This place is remarkable for the art of pearl-making, which is here practised. In the month of May or June large quantities of the pearl-mussel [*Mytilus cygnus*] are brought in baskets from the Táihú, a lake in Kiang-sú, about 80 m. distant, the largest amongst the full grown being specially selected. The shell is gently opened, and the free portion of the mollusc is carefully separated from one surface of the shell with an iron probe; the foreign bodies are then successively introduced at the point of a bifurcated bamboo stick, and placed in two parallel rows upon the mantle or fleshy surface of the animal; a sufficient number having been placed on one side, the operation is repeated on the other; stimulated by the irritating bodies, the suffering animal spasmodically presses against both sides of its testaceous skeleton, keeping the matrices in place. This being done the mussels are deposited one by one in canals, or streams, or pools connected therewith, five or six inches apart, at depths of from two to five feet, in lots of from 5,000 to 50,000.

TI-HWA, THOUA, or OUROUNTAI, a division and town of Mongolia, in the prov. of Kan-suh. The div. comprises three districts. The town is 320 m. E of Ele, at the foot of a ramification of the Thiai-Chan chain, in a fertile and well-watered locality. Its streets are spacious, and from the activity of its commerce, it presents a generally animated aspect. The circumjacent mountains contain coal, and are in some parts volcanic. A plain 83 m. in circumf. is covered with light cinders, which, whenever disturbed, emit a flame, and produce rapid combustion.

TIH-YANG-HEEN, a district and town of China, in the prov. of Sze-chuen, and div. of Moon-chu, in N lat. 31° 10', and E long. 104° 22'.

TIIS-SOE, a lake of Denmark, in the diocese and W part of the island of Sieland, bail. and 19 m. SW of Holbeck. It is nearly oval in form, and is 4 m. in length from N to S, and 3 m. in breadth. It is traversed by the Hallebye-ase, which issues from it on the W, and flows into the Great Belt.

TIJARAFE, a village of the Canary islands, in the N part of the island of Palma, and partido of Santa-Cruz-de-la-Palma, on a hill which is ascended by a flight of steps cut in the rock. Pop. 2,216. It has a parish-church and a customhouse.

TIJELENKING, or CHILLINGCHING, a Malay village, on the N coast of the island of Java, 10 m. E of Batavia. It is traversed by a river which affords good fishing, and has several salines. The English landed here in 1811.

TIJOLA, a town of Spain, in the prov. and 83 m. N of Almeria, and partido of Purchena, in a fine

plain, watered by the Seron and Bacares. Pop. 1,690. It has an hospital, and flax and oil mills.

TIJUCO (SANTO-ANTONIO-DA), a town of Brazil, in the prov. of Minas-Geraes, district of Serro-do-Frio, and 24 m. NNE of Villa-do-Principe, in the centre of the diamond district, of which it is the chief depot. It rises amphitheatrically, on a mountain of the Serra-Espinhaço, near the source of the Jequitinhonha, and is a large and flourishing place. Some of the houses are built of stone or of mud; but the greater number of wood. It has a church, five chapels, several convents, three hospitals, an almshouse, and commodious barracks. It is well supplied with good water, and the climate, although cold, is salubrious. The working of diamonds in this locality was at first a private speculation, but in 1772 was committed to royal administration.

TIKHAIA-SOSNA, a river of Russia in Europe, in the gov. of Voronej, which has its source 12 m. W of Livenak, in the district of Biriouth, the capital of which it waters; flows thence through the district, and bathes the town of Astrogojak; and after a course, in a generally NE direction, of about 105 m., joins the Don on the r. bank, 8 m. E of Korotvjak.

TIKHINETZ, a town of Russia in Europe, in the gov. and 54 m. SSW of Mohilev, and district of Rogatchev, near the r. bank of the Dvoutz.

TIKHVIN, a town of Russia in Europe, in the gov. and 57 m. NE of Novgorod, on the l. bank of the Tikhvina. Pop. 5,000. It has eight churches, two convents, extensive magazines for grain, salt, and brandy, tallow founderies, and tanneries.

TIKHVINA, or **TIKHVINKA**, a river of Russia in Europe, in the gov. of Novgorod, and district of Tikhvin, which issues from Lake Ozerskole, 33 m. E of the town of that name; runs first ESE, then S, and afterwards WNW; passes Tikhvin, when it becomes navigable for small boats, and 15 m. WNW of that town, joins the Sias, on the r. bank, and after a total course of about 90 m.

TIKOPIA. See TUOPIA.

TIKSA, a lake of Russia in Europe, in the gov. of Arkhangel, in N lat. 66° 26', and E long. 81° 30'. It is 14 m. in extent from NW to SE, and presents an extremely irregular outline. It discharges itself into Lake Pija, by the Chadra, which issues from its NW extremity. It contains several islands.

TIKVESH, a town of Turkey in Europe, in Rumelia, in the sanj. and 84 m. SW of Ghiustendil, on the Vetitcha, an affluent of the Vardar.

TILAFAR, a town of Asiatic Turkey, in the pash. and 36 m. W of Mosul. Pop. 1,000.

TILBOEG, a town of Holland, in the prov. of N. Brabant, cap. of a cant., in the arrond. and 15 m. SW of Bois-le-Duc, near the l. bank of the Ley. Pop. 14,000. It has three churches, a chapel, and a fine castle, and contains extensive manufactories of cloth and other woollen fabrics. It returns three deputies to the provincial states.

TILBROOK, a parish in Bedfordshire, 14 m. N by E of Bedford. Area 1,680 acres. Pop. 350.

TILBURY-JUXTA-CLARE, a parish in Essex, 2½ m. S of Clare. Area 946 acres. Pop. 401.

TILBURY (EAST), a parish in Essex, 13 m. ESE of Romford, on a creek near the Thames. Area 3,237 acres. Pop. in 1831, 245; in 1851, 401. This is believed to have been the place where the emperor Claudius crossed the Thames in pursuit of the Britons, as related by Dion Cassius.

TILBURY (EAST), a township of Upper Canada, in the Western district, bounded on the N by the Thames, by several branches of which it is intersected, and on the SE by Lake Erie. Pop. in 1844, 540, of whom nearly a half are French Canadians.

TILBURY (WEST), a parish in Essex, 26 m. E of London, on the N side of the Thames. Area 2,086 acres. Pop. in 1831, 276; in 1851, 519. Here are still some traces of Queen Elizabeth's camp, formed in 1588, when the kingdom was threatened by the Spanish Armada.—T. fort stands on the bank of the Thames, opposite Gravesend. It was originally erected by Henry VIII., as a blockhouse; but was enlarged and made a regular fortification by Charles II. after the Dutch fleet had sailed up the river, in the year 1667, and burnt 8 English man-of-war ships at Chatham. The esplanade is large, and the bastions are faced with brick and surrounded with a double ditch or moat. On the land side are two small redoubts of brick; but on this side the chief strength of the fort consists in its being able to lay the whole level under water. On the river side is a strong curtain, with a ditch.

TILBURY (WEST), a township of Upper Canada, in the co. of Kent, bounded on the N by Lake St. Clair. It is to a great extent marshy and unfit for cultivation. Pop. in 1844, 437, of whom two-thirds are French Canadians.

TIL-CHATEL, a commune and town of France, in the dep. of the Cote-d'Or, and cant. of Is-sur-Tille, at the confluence of the Tille and Ignon. Pop. 916. It has a blast furnace and several forgeries.

TILDIZ-DAGH, a mountain of Asiatic Turkey, 10 m. S of Tokat.

TILEHURST, or **TYLEHURST**, a parish in Berks, 2½ m. W of Reading. Area 5,164 acres. Pop. 519.

TILESWORTH, a parish in Bedfordshire, 8½ m. NW by W of Dunstable. Area 1,510 acres. Pop. 1831, 275; in 1851, 337.

TILFF, a village of Belgium, in the prov. and 3 m. S of Liege.

TILGEN, a village of Saxony, 4 m. ESE of Glaucha, on an affluent of the Mulda.

TILGMAN'S ISLAND, an island of Maryland, U. S., at the mouth of the Choptank, containing about 1,720 acres.

TILGUN, a village of Asiatic Turkey, 36 m. ENE of Akshehr.

TILHAC, a village of France, in the dep. of Gers, 7 m. SE of Marciac. Pop. 650.

TILKERODE, a village of the principality of Anhalt-Bernburg, in the bail. of Harzgerode, with large iron-works.

TILL, a river of Northumberland, which rises among the Cheviot-hills; runs S to Chillingham; thence NW to the Tweed, 4 m. below Coldstream.

TILL, a town of Prussia, in the reg. of Düsseldorf, 5 m. SE of Cleves. Pop. 1,680.

TILLANCHONG, one of the Nicobar islands, in the gulf of Bengal, in N lat. 8° 30'. It is high and rugged.

TILLE, a river of France, in the dep. of Cote-d'Or, which rises 8 m. W of Grancey, and running SE, falls into the Saone, on the r. bank, after a course of 40 m.—Also a town of France, in the dep. of Oise, 3 m. NNE of Beauvais. It has iron-works.

TILLEDA, a village of Prussian Saxony, 8 m. WSW of Sangerhausen, at the E base of the Kyffhausen. Pop. 960.

TILLENDOFF, a village of Prussian Silesia, 1 m. W of Bunzlan, on the opposite side of the Bobar.

TILLICOUNTRY, a parish in Clackmannanshire, marching over one-half of its boundary with Perthshire. Its superficial extent is upwards of 6,000 Scottish acres. About two-thirds of this area lies among the Ochil hills, and includes some of their highest summits. Bencleuch, the loftiest of the heights, rises 2,300 ft. above sea-level. A rich variety of ironstone, and veins of iron-ore of the

kidney kind, are in sufficient quantity to be an object of attention to the Devon company. The village of T. is situated on the r. bank of the Devon, 2 m. E of Alva. It has considerable manufactories of shawls, plaidings, and other woollen fabrics, and, seated at the foot of the Ochils, with a plentiful supply of coals and pure water, has facilities for conducting them. Pop. of p. in 1851, 3,217.

TILLIÈRES, a town of France, in the dep. of Eure, on the river Arve, 5 m. NE of Verneuil.

TILLIERS, a village of France, in the dep. of Maine-et-Loire, 4 m. NW of Montfaucon. Pop. of com. 1,150.

TILLINGHAM, a parish in Essex, 18 m. E by S of Chelmsford. Area 7,235 acres. Pop. 1,048.

TILLINGTON, a township in Burghill p., Herefordshire, 5 m. NW of Hereford. Pop. 509. —Also a parish in Sussex, 1 m. W by N of Petworth. Area 3,766 acres. Pop. in 1851, 982.

TILLOUTA, a town of Hindostan, in the prov. of Bahar, district of Rotas, pleasantly situated on the N or l. bank of the Sone, in N lat. 24° 48'.

TILLY, a seignior of Lower Canada, in the co. of Buckingham, on the S side of the St. Lawrence.

TILLY-SUR-SEULE, a village of France, in the dep. of Calvados, 7 m. SSE of Bayeux. Pop. 900.

TILMANSTONE, a parish in Kent, 5 m. W by S of Deal. Area 1,124 acres. Pop. in 1851, 447.

TILNEY-WITH-ISLINGTON, a parish in Norfolk, 3 m. WSW of Lynn-Regis. Area, including that of the following p., 7,511 acres. Pop. 273.

TILNEY-ALL-SAINTS, a parish in Norfolk, 4 m. W by S of Lynn-Regis. Pop. in 1851, 575.

TILNEY-ST.-LAWRENCE, a parish in Norfolk, 6 m. SW of Lynn-Regis. Pop. in 1851, 573.

TILSHEAD, a parish in Wilts, 14 m. NNW of Salisbury. Area 3,990 acres. Pop. in 1851, 523.

TILSIT, a town of Prussian Lithuania, in the reg. of Gumbinnen, 56 m. ENE of Königsberg, at the confluence of the Little Tilsa, a small stream separating the town from the castle, and the Niemen, which flows past the town on the N, and over which is a bridge of boats. The inhabitants, 13,271 in number in 1846, are partly Catholics, but chiefly Protestants. They carry on a trade, by means of the Niemen, with Königsberg on the one side, and the interior of Poland on the other, of which the chief articles are corn, wax, salt, salted provisions, hats, and leather. T. gives name to a district which extends to the great maritime inlet of the Curische-haff, a level and fertile tract, noted for its produce of barley, butter, and cheese. The castle of T. is said to have been built in 1289. A treaty of peace was concluded here on 1st July 1807, between France, Russia, and Prussia.

TILSTON, a parish in Cheshire, 12½ m. SSE of Chester, comprising the townships of Carden, Gratton, Horton, Stretton, and T. Area 3,644 acres. Pop. in 1831, 873; in 1851, 887.

TILSTON-FERNHALL, a township in Bunbury p., Cheshire, 2½ m. SE of Tarporley. Area 864 acres. Pop. in 1831, 170; in 1851, 155.

TILT, a romantic stream in Blair-Athole, Perthshire, which issues from Loch-Tilt, on the boundary with Aberdeenshire; and after running 2 m. S, receives from the E Glenmore-water, and from the W Tarf-water, each of which greatly excels it both in volume and in length of run. Thus augmented, it flows 9 m. SW, and 4 m. S to the Garry, a little below the village of Blair-Athole. The glen through which it flows is distinguished from every other in the Highlands at once by its extreme depth, narrowness, and prolongation, and by the bold contrast of excessive wildness at the upper end, and ornamental beauty at the other.

TILTON-ON-THE-HILL, a parish in Leicestershire, 10½ m. E by N of Leicester, comprising the townships of Halstead and Marefield, with part of the chapelry of Wharborough. Area 3,112 acres. Pop. in 1831, 842; in 1851, 410.

TILTY, a parish in Essex, 3 m. S by W of Thaxted, watered by the Chelmer. Area 1,040 acres. Pop. in 1831, 82; in 1851, 101.

TILWARA, a town of Hindostan, in the state of Jodpur, on the l. bank of the Loni, here a ½ m. wide when in flood. Immediately opposite to T. is Mulinathka-Thana, the site of a celebrated shrine, which has all the privileges of a sanctuary. A large cattle fair is held here annually, commencing 12 days after the *hols*, and lasting for half-a-month, during which time 80,000 people are said to be collected with large quantities of camels, horses, and bullocks, upon the sale of which fees of 5 rupees, 3 rupees, and 8 annas per head, respectively, are paid to the hakim of Sewanna, who attends the fair on the part of the Jodpur government. The prices of the best horses and mares sold at this fair are from 400 to 600 rupees; riding camels bring 120 r., and baggage camels 60 r. The Loni is here passed.

TIM, a town of Russia, in the gov. of Kursk, on the river Tim, 39 m. E of Kursk.—The river runs about 6 m. W of the town, and flows into the Soana after a winding course of 80 m.

TIMA, or **AL-ABLAH**, a town of Nedjed, in Arabia, 180 m. NNE of Medina.

TIMAAN, or **TIMOAN**, a small island, high and woody, off the E coast of the Malay peninsula, in N lat. 2° 52'. It has several others still smaller lying off it to the westward.

TIMAHOE, a parish in co. Kildare, 3½ m. N by W of Robertstown. Area 9,896 acres. Pop. 1,680.

—Also a village in the p. of Fossy or Timahoe, Queen's co., 4 m. SSW of Stradbally. Pop. 96.

TIMANA, a town of New Granada, in the prov. and 81 m. E of Popayan. Pop. 2,000, chiefly cultivators of cocoa.

TIMANOVKA, a town of Russia, in the gov. of Podolia, 21 m. S of Bratslav.

TIMAVO, a river of Italy, which rises on the confines of Istria, 8 m. S of Goritz, and after a short course, falls into the bay of Trieste, 1 m. NW of Diuno.

TIMBERLAND, a parish in Lincolnshire, 8 m. NE by N of Sleaford, comprising the hamlet of Martin, with the township of Thorpe-Tinby. Area 9,190 acres. Pop. in 1831, 1,278; in 1851, 1,638.

TIMBERSCOMBE, a parish in Somersetshire, 3 m. WSW of Dunster. Area 1,902 acres. Pop. 442.

TIMBO, a town of Senegambia, the capital of Futa-Jallon, in N lat. 10° 35'. Pop. about 19,000. It stands on a rolling plain. N. of it a lofty mountain range rises at the distance of 10 or 15 m. and sweeps eastwardly to the horizon. The landscape which declines from these slopes to the S, is in many places bare: yet fields of plentiful cultivation, groves of cotton-wood, tamarind, and oak, thickets of shrubbery, and frequent villages, stud its surface, and impart an air of rural comfort to the picturesque scene. The town presents narrow streets, low houses, mud walls, cul-de-sacs, and a few mosques. It has no fine bazaars, market-places, or shops. The chief wants of life are here supplied by pedlars. Platters, jars, and baskets of fruit, vegetables, and meat, are borne around twice or thrice daily. "Horsemen," says a French traveller, who has recently given an account of a visit to this place, "dashed about on beautiful steeds towards the fields in the morning, or came home at night-fall at a slower pace. I never saw man or woman hask lazily in the sun. Females were constantly busy

over their cotton and spinning-wheels when not engaged in household occupations; and often I have seen an elderly dame quietly crouched in her hovel at sunset, reading the Koran. Nor are the men of T. less thrifty. They weave cotton, work in leather, fabricate iron from the bar, engage diligently in agriculture, and, whenever not laboriously employed, devote themselves to reading and writing, of which they are excessively fond." One cannot but hope that our author who writes anonymously, but calls himself 'a World-wide Tourist,' describes what he has really seen, not merely imagined. "The native villages through which I passed on this excursion," he continues, "manifested the great comfort in which these Africans live throughout their prolific land, when unassailed by the desolating wars that are kept up for the slave-trade. It was the height of the dry season, when everything was parched by the sun, yet I could trace the outlines of fine plantations, gardens, and rice-fields. Everywhere I found abundance of peppers, onions, garlic, tomatoes, sweet potatoes, and cassava, while tasteful fences were garlanded with immense vines and flowers. Fowls, goats, sheep, and oxen, stalked about in innumerable flocks, and from every domicile depended a paper, inscribed with a charm from the Koran to keep off thieves and witches. My walks through T. were promoted by the constant efforts of my entertainers to shield me from intrusive curiosity. Whenever I sallied forth, two townfolk in authority were sent forward to warn the public that the Furtu desired to promenade without a mob at his heels. These lusty oriers stationed themselves at the corners with an iron triangle, which they rattled to call attention to the king's command; and in a short time the highways were so clear of people, who feared a *bastinado*, that I found my loneliness rather disagreeable than otherwise. Every person I saw shunned me. When I called the children or little girls, they fled from me. My reputation as a slaver in the villages, and the fear of a lash in the town, furnished me much more solitude than is generally agreeable to a sensitive traveller."

TIMBUCTU, a town of Central Africa, on the skirts of the Sahara, the geographical position of which, as ascertained by Dr. Barth, is nearly 18° 4' N lat., and 1° 45' W long. The existence of this great city in the interior of Africa was long known; but, although it had been approached from the W, the N, and the S, within a few days' journey, by different European travellers, no authentic account of it reached Europe until M. Caillié gave the result of his travels to the world. That enterprising traveller, on having disembarked from the Joliba or Niger, at Cabra, set out from this point at post 3, and reached T. just as the sun was touching the horizon. Of the place itself, he says it presents at first sight nothing but a mass of ill-looking houses built of earth; that it is surrounded on all sides by immense plains of quicksand, of a yellowish-white colour, where not even the warbling of a bird could be heard; and that he thinks "the river formerly flowed close to T., though at present it is 8 m. to the N of that city, and 5 m. from Cabra, in the same direction." This last paragraph appears to make the distance between T. and Cabra far less than a day's journey, independent of its being at issue with every previous account, which concur in placing T. to the N of the river, instead of having the river on its N side. The inhabitants are said by Caillié to be negroes of the Kissur nation, but zealous Mahomedans, and their king a negro of the name of Osman; he adds, "many Moors also reside there." According to the same authority, the government is mild and patriarchal, and the

slaves are kindly treated. The city he represents as in outline a sort of triangle, about 8 m. in circuit; as having 7 mosques, 2 of which are large, and each surmounted by a brick tower; and as not closed by any barrier, but open on all sides, and containing at most about 10,000 or 12,000 inhabitants. He also represents the water used there as being brought from deep reservoirs dug in the sands. Leo Africanus, who was himself at T., states that the branch river of T. flows to the W, and joins the Niger at the port of Cabra, 12 m. distant. Sidi Hamet says, that the river which runs by T. is a small one, which occasionally dries up; so that the natives are then obliged to go to the southward, two hours distant, where there is a large river called Zolbib. This Sidi Hamet describes a much larger city, called Wassanah, on the Niger, 60 days to the S of T. Our late traveller, Richardson, while at Ghat, was informed that T. is situated upon the N flats of the Niger, at about a half-day's distance from it in summer, but only 8 hours in winter, the difference arising from the increase of the water of the river. When Dr. Barth, in September 1852, says his zealous friend Mr. Petermann—whose details we follow—lost his only companion, Dr. Overweg, and saw himself reluctantly compelled to abandon, for the time, his contemplated journey across the continent towards the Indian ocean, he resolved to undertake alone a journey to T., which, though greatly less in magnitude than a journey to the Indian ocean, yet was looked on as a most difficult and dangerous attempt. "As the sole survivor of the mission," so wrote Dr. Barth before his departure from Kuka, "the completion of its objects now devolving entirely on me, I feel my powers doubled, and my mind all the more determined single-handed to follow up the results already obtained. My means consist of a tolerable supply of presents, in addition to 200 dollars, four camels, and four horses; my health is in the best condition; and with five trustworthy long-tried servants, well-armed and having plenty of powder and shot with us, I shall with fresh and redoubled courage, and with full confidence of success, start on my journey to Timbuktu." He left Kuka about the end of November, 1852, and proceeded first to Sakatu, by way of Zinder and Kashna, the route by Kano being impracticable on account of the war in that region between the Bornuese and Fellatas. It appears that the general direction of his route from Sakatu to T. was at first WNW, and that he crossed the Kowara, Quorra, or Niger, at Say, an important place situated in about 14° N lat. and 3° 45' E long. from Greenwich, 180 geog. m. WNW from Sakatu. Both from this place and Libtako he despatched letters to Europe by way of Sakatu. From Libtako in about N lat. 14° 10', and 0° 39' E long., the general direction of Dr. Barth's course was NW, till he reached Saraiyamo, a large town 60 m. S of T., and situated on a tributary or branch of the Kowara or Quorra, running towards the latter place. On the former river he embarked on the 1st of September. At first it presented a fine sheet of water 300 yds. in width, but afterwards a most intricate system of narrow meandering channels, partly overgrown with reeds and grass. At a distance of 40 m., in a straight line, from Saraiyamo, after a very tedious winding navigation, he entered the main stream, the Kowara, on the 4th of Sept., and arrived at Kabara or Cabra on the following day. Kabara he describes as a small town of 400 houses and huts, but it has attained great celebrity as the port of T. It scarcely, however, he thinks, deserves that distinction, as it is only approachable by water during four months of the year at an average, and at most during five months, when the floods are un-

usually high. The creek on which it is situated is of so inconsiderable a size and depth that even at the time of Dr. Barth's visit, which was during the rainy season, the boat with himself and his effects had to be dragged up to the place with great difficulty. The creek measured about 15 ft. across, and the water scarcely reached up to the boatmen's knees. The docks of Kabara—as an artificial large handsome basin, close to the town, may be called—contained but a few boats at the time of Dr. Barth's arrival. Koromeh, a place situated at the junction of the creek of Kabara with the main stream, and the islands of Day, between it and Kabara, have greater claims to be considered the port of Timbuktu. There the Kowara presented a magnificent aspect, covered as it was with a numerous fleet of vessels and boats of various sizes. On the 7th September, 1858, Dr. Barth entered T. in grand style, escorted by the brother of the Sheikh-el-Bakay, the ruling chief of that city, and by a splendid suite on horseback, on camels, and on foot, welcomed and saluted by the festive multitudes of the inhabitants. The latter had been made to believe that the stranger was a messenger from the Great sultan of Stambul! the real character of Dr. Barth being only known to the sheikh himself, whose protection and goodwill the intrepid traveller had been fortunate enough to obtain, and who considered it advisable that he should assume that character on account of the very fanatical disposition of the people; but even under this character Dr. Barth considered himself not entirely free from danger, owing to the complicated character of the political powers which exercise sovereign sway over T.—the inhabitants being composed of various nationalities. There are, first, the Sonray, forming the great bulk of the people; then Arabs of various tribes, Fellatas and Tuaricks, together with a few tribes of Bambara and Mandingo. The accomplishment of the journey from Lake Tèd to T., which in linear extent—taking into account the windings of the road—amounts to at least 2,000 m., might well be a trying task for the physical powers of any man, from its extent only; but when to this are added a preceding three years' travel and toil, the difficulties arising from the rainy season, with its swollen rivers, floods and inundations, during which, partly at least, the journey to T. was accomplished, together with the harassing difficulties and dangers arising from the fanatical character of the inhabitants he had to pass through, it will scarcely be wondered at that Dr. Barth should have reached Timbuktu in a rather exhausted condition. Such were the exertions of the journey that out of six camels two had died on the road, and the remainder were rendered unfit for further use. Dr. Barth describes T. as being closely built of houses mostly of clay and stone, many with handsome and tasteful fronts, the arrangement of the interior being similar to that of Agades. The pop. he estimated at 20,000. He found the market, which is celebrated as the centre of the North African caravan-trade, to be of less extent than that of Kano, but the merchandise of a superior quality and greater value. He has obtained a complete *manana* from the Sheikh for any English traders that may wish to visit Timbuktu. The Tuaricks and their neighbours had expressed their anxious desire to see English trade extended up the Kowara as far as T., for which all possible advantages and protection were held out. If but the navigation of the river to T. be found practicable, these people, who are masters of the middle course of the Kowara, would, in Dr. Barth's opinion, be sure to protect any English vessel that might proceed in that direction. At present, the market of T. is supplied by two very tedious chan-

nels, one coming from the N, from the Barbary states, importing European manufactures, such as guns and cutlery; the other from Nufi and other Kousa states lying near the lower course of the Kowara, not going up the river, but by a circuitous northerly route, also through the desert. The merchandise supplied by the latter channel consists mostly of fine black woollen and silk robes, chiefly manufactured in Nufi (or Nyffi), of which alone 2,000 camel-loads, to the value of 800,000 or 400,000 dollars, are brought to T. annually, and disposed of at a great profit. Sugar is extremely in request. The common medium for trading is salt, which is brought from Taodeani, a place in the desert N of T., and without which article the latter city would not exist. Provisions are very cheap at T., particularly poultry and other animal food; 100 pigeons, for example, may be bought for about 8s. Dr. Barth while in T. found that the river did not attain its *maximum* before the middle of December, so that the river may be presumed to be high during a great portion of the year, the rise in the lower course of the Kowara commencing as early as July. He estimated the rise of the river at T. to exceed greatly that of the Nile.

Historical notice. Leo Africanus, who visited T. in 1500, was the first traveller who gave to Europe any account of this city, though it was known long before his time as one of the grand emporiums of the interior trade of the African continent. According to him, T. was founded in the year of the Hegira 610 [1215 A. D.], by a king called Mense-Sulman. Under his successor, named Ischia, T. extended its dominion over all the neighbouring states, of which the principal were Ghinea or Gennal, Cassina, Gaber, Zanfara, and Cano; in his time also it seems to have acquired that commercial prosperity for which it has ever since been distinguished. The city, when visited by Leo Africanus, contained many shops of artisans and merchants, and numerous manufacturers of cotton cloth. There were in it many persons of great opulence, particularly foreign merchants, two of whom were reckoned so considerable by their wealth, that the king had given them his daughters in marriage. The surrounding country abounded both in grain and in pasture; yet neither garden nor orchard, he says, was cultivated round the city. Salt was brought from Tsgassa, a distance of 500 m., and sold at an enormous price. The king possessed an ample treasure, and held a splendid and well-regulated court. Great care was taken to keep his stud in good condition. The army consisted of 3,000 cavalry, and a numerous infantry, many of whom used poisoned arrows. The houses of the ordinary inhabitants appear to have been built in a somewhat humble style, in the form of bells; the walls being composed of stakes or hurdles, and the roofs of interwoven reeds; stone, however, had been used in the construction of the principal mosque and of the royal palace, the latter of which, according to our traveller, had been designed by an artist from Granada. The city was extremely exposed to fire; Leo, in one of his visits, had seen half of it consumed by a single conflagration. Water was supplied from numerous wells; besides which, the waters of the Niger, when they overflowed, were conveyed through the town by sluices. Such is the description given of T. during the period probably of its greatest glory; for the wide dominion which it then appears to have possessed over the surrounding states, has now ceased; yet it continues still to be an emporium of Central Africa, and a medium of communication with the northern parts of that continent. In this character it attracted the notice of the Portuguese, when they carried their career of discovery along the western coast of Asia. It is described by De Barros, as situated three leagues to the N of the Niger; as a great mart for gold; and as being resorted to by merchants from Cairo, Tunis, Morocco, Fez, and all the kingdoms of Northern Africa. The nation who, after the Portuguese, chiefly directed their exertions to penetrate into the interior of Africa, were the French, who, from their settlements on the Senegal, then generally believed to be the same river with the Niger, entertained sanguine hopes of penetrating to T. From the native merchants who came through Bambara, they learned the existence of the lake Dibia, under the name of Maberia; and of the well-watered territory of Ghingala or Jinhala; and the position also of T. on the river beyond it. A large caravan of white men, with firearms, justly conjectured to be Moors from Barbary, were stated to arrive annually at T. for the purposes of trade. It was added, that large barks with masts had been seen in the river near T.; these were erroneously supposed to belong to the Tripoli merchants; but no French mission ever extended beyond the banks of the Senegal, or attained the frontier of Bambara; and the earliest efforts of the English, made by the Gambia, then supposed to be also a branch of the Niger, were productive of still less important results than those made by the rival nation. Jobson and Stibbe could not reach higher than the neighbourhood of Tenda; and their reports went only to discourage the idea of penetrating

into the interior by this channel. Park, under the auspices of the African association, penetrated nearly a thousand miles beyond all the former limits of French or English discovery; but the pressure of disastrous circumstances compelled him to stop considerably short of T. He, however, learned that the kingdom of T. lay beyond that of Masina, which extended along Lake Dibia, and bordered on the E frontier of Bambarra. The city, Park was informed, lay about a day's journey to the N of the Niger; while its port, Cabra, was situated at the point of junction between two branches of that river which issues out of Lake Dibia. The government was said to be in the hands of the Moors. It is stated that some years after Park's journey, the king of Bambarra conquered T., and established there a Negro government; the Moors, however, were not only permitted to reside and carry on their trade, but the internal police of the city was left in their hands. The report of Adams, an American sailor, who described himself as having been shipwrecked near Cape Blanco, carried as a slave to T., and detained there during six months, describes this city as standing on nearly the same extent of ground as Lisbon, though the pop. was probably much less, as the houses were built in a very scattered manner. The king and all his principal officers were Negro. No Moors were allowed to reside in, or even to enter the city, unless in small parties. This circumstance, which contrasts singularly with Park's account, may, however, be connected with the frequent revolutions which have taken place in the political destinies of T. Adams does not describe T. in very lofty terms. The king's palace, called the *Zuaba*, consisted merely of a square space enclosed by a mud wall, and containing eight small apartments on the ground floor; the houses of the chief citizens were built of wooden cases filled with clay and sand; while the huts of the poorer class consisted merely of branches of trees bent in a circle, covered with a matting of palm-leaf, and overlaid with earth. The king and queen wore dresses of blue nankeen, profusely ornamented with gold and ivory. Adams describes T. as situated immediately upon a river called the Mar Zarrah, about 8 m. wide, and flowing, as he believed, to the SW. About 3 m. S of the town it passes between high mountains, where its breadth is contracted to a ½ m.—A still more recent account of T., though not that of an eye-witness, is contained in the narrative of Riley, an American captain, who in 1815 suffered shipwreck on the coast of the Sahara. His information, however, was entirely derived from Sidi Hamet, an African merchant, by whom he was purchased and brought to Mogador. According to him T. is a large town, six times as populous as Mogador. The pop. is entirely Negro. He states, however, what seems to have entirely escaped the notice of Adams, that there was a distinct town, derived from the other by a strong partition wall, which formed the residences of those Mussulmans who were permitted to remain at T. Captain Lyon during his residence in Fezzan, was informed by the merchants, that T. was not so large a town as had been supposed; some represented it as not more extensive than Murzuk. The immense pop. which some have ascribed to it, is accounted for by supposing that they included the kasbas, who arrived there in great numbers, and being often obliged to remain during the rainy season, erected temporary huts. The first European traveller who succeeded in penetrating to this mysterious city, was Major Laing, who reached it in 1826, but was barbarously murdered on his return homewards. An enterprising Frenchman, M. Caillie, was more fortunate. Setting out on the 19th of April, 1827, from Kakody, the tomb of Peddle and Campbell, he crossed the Senegal at Bafila, and after passing Lake Debo, the Debbie of former writers, he arrived at Cabra on the Joliba, and disembarked at a point 13 m. distant from Timbuctu, which he says lies to the S of the river. Of the city, he says, "I found it neither so large nor so populous as I had expected. Its commerce is not so considerable as fame has reported. There was not, as at Jenné, a concourse of strangers from all parts of the Sudan. I saw in the streets of T. only the camels which had arrived from Cabra laden with the merchandise of the fottila, a few groups of the inhabitants sitting on mats conversing together, and Moors lying asleep in the shade before their doors: in a word, everything had a dull appearance. I was surprised at the inactivity, I may even say indolence, displayed in the city. Some colat-nut vendors were crying their wares in the streets as at Jenné. About 4 in the afternoon, when the heat had diminished, I saw several Negro traders, all well-dressed, and mounted on good horses, richly harnessed, go out to ride. Prudence forbids them to venture far from the city, for fear of the Tuarika, who would make them pay dearly for their excursions. In consequence of the oppressive heat, the market is not held until 8 in the afternoon. There were few strangers to be seen except the Moors of the neighbouring tribe of Zawât, who often come hither; but in comparison with Jenné, the market is a desert. At T. it is very unusual to see any other merchandise except what is brought by the vessels, and a few articles from Europe, such as glass wares, amber, coral, sulphur, paper, &c. I saw three shops kept in small rooms, well-stored with stuffs of European manufacture. The merchants put out at their doors cakes of salt for sale, but they never exhibit them in the market. Such as do business at the market have stalls made of stakes, covered with mats, to protect them against the heat of the sun. My host, Sidi-Abdallah, was obliging enough to show me over one of his magazines, in which he stored his European merchandise. I observed there many double-barrelled guns, with the mark of Saint Etienne, and other manufactures. In general French muskets are much prized, and sell at a higher

rate than those of other nations. I also saw some beautiful elephants' teeth. My host told me that he procured some from Jenné, but the larger ones had been bought at T. They are brought hither by the Tuarika or Sargua, the Kissara, and the Dirimana, who inhabit the banks of the river." There are, he says, "many Moors in T., and they occupy the finest houses in the city. They soon become rich in trade, and receive consignments of merchandise from Adrar, Tafilat, Tawât, Ardamas, Tripoli, Tunis, and Algiers. They receive from Europe, tobacco and other articles, which they send by caravans to Jenné and elsewhere. T. may be regarded as the principal entrepôt of this part of Africa. All the salt obtained from the mines of Toudeny is brought hither on camels. The Moors of Morocco and other countries who travel to the Sudan, remain six or eight months at T. to sell their goods and get their camels re-laden." T., he says, "contains 7 mosques, two of which are large; each is surmounted by a brick tower. This mysterious city, which has been an object of curiosity for so many ages, and of whose population, civilization, and trade with the Sudan, such exaggerated notions have prevailed, is situated in an immense plain of white sand, having no vegetation but stunted trees and shrubs, such as the *Mimosa ferruginea* which grows no higher than three or four ft. The city is not closed by any barrier, and may be entered on any side. Within the town are seen some of the *Balanitis Egyptiaca*, and in the centre is a palm-tree. T. may contain at most about 10,000 or 12,000 inhabitants; all are engaged in trade. The pop. is at times augmented by the Arabs, who come with the caravans, and remain a while in the city. In the plain, several species of grass and thistles afford food for the camels. Fire-wood is very scarce, being all brought from the neighbourhood of Cabra; it is an article of trade, and the women sell it in the market-place: it is only burnt by the rich; the poor use camel dung for fuel. Water is also sold in the market-place; the women give a measure containing about half a pint for a cowrie. T., though one of the largest cities I have seen in Africa, possesses no other resources but its trade in salt, the soil being totally unfit for cultivation. The inhabitants procure from Jenné every thing requisite for the supply of their wants, such as millet, rice, vegetable butter, honey, cotton, Sudan cloth, preserved provisions, candles, soap, allspice, onions, dried fish, pistachios, &c. If the vessels from Cabra should chance to be stopped by the Tuarika, the inhabitants of T. would be reduced to famine: to obviate this misfortune, they take care to have their warehouses always amply stored with every kind of provision. I saw the magazines of Sidi-Abdallah full of great sacks of rice, which keeps better than millet. For these reasons the vessels which come down the river to Cabra are deterred from making any resistance to the Tuarika, notwithstanding the burden of their exactions. Sidi-Abdallah informed me that there was no traffic or communication by water between T. and the country of Houssa; because, said he, the navigation of the river ceases at Cabra. The Negroes and Moors devote their attention exclusively to trade; they possess but limited ideas of geography. All to whom I applied for information respecting the course of the river, to the E and ESE of T., agreed in stating that it runs to Houssa, and empties itself into the Nile. I was unable to obtain any more accurate information on this point; and the great problem of the issue of the Dholiba into the ocean will thus be left to the demonstration of some more fortunate traveller; but if I may be permitted to hazard an opinion as to the course of the river, I should say that it probably empties itself by several mouths into the gulf of Benin." The people of T. are gentle and complaisant to strangers; in trade they are industrious and intelligent; and the traders are, generally, wealthy, and have many slaves. The men are of the ordinary size, well-made, upright, and walk with a firm step. Their colour is a fine deep black. Their noses are a little more aquiline than those of the Mandingoes, and, like them, they have thin lips and large eyes. I saw some women who might be considered pretty. They are all well-fed: their meals, of which they take two a-day, consist of rice, and ooccoosoo made of small millet, dressed with meat or dried fish. Those Negroes who are in easy circumstances, like the Moors, breakfast on wheaten bread, tea, and butter made from cows' milk. Those of inferior condition use vegetable butter. They are exceedingly neat in their dress and in the interior of their dwellings. Their domestic articles consist of calabashes and wooden platters. Their furniture merely consists of mats for sitting on; their beds are made by fixing four stakes in the ground at one end of the room, and stretching over them a few mats or a cow-hide. The women of the richer class have always a great number of glass beads about their necks and in their ears. Like the women of Jenné, they wear nose-rings; and the female who is not rich enough to procure a ring substitutes a bit of red silk for it; they wear silver bracelets, and ankle-rings of plated steel, the latter of which are made in the country. The amount of this traveller's information regarding the mysterious Niger is much less ample than his details respecting T. All that we can gather from him is that the Niger at its source is called the Tomba, or the Ba, and afterwards, until it reaches Sego, the Joliba. To the N of Sego, it divides into two branches, which, according to one authority, bear the names of Ba-nion and Ba-leo, or, as they have been interpreted, 'the White river,' and 'the Black river.' These two branches unite at Isaca, and from that town to Cabra, the Joliba—which is there known by the name of Coasra only—proceeds due N to Cabra. At Cabra it turns E, and soon after is again divided into two branches, one of which the Yeou is supposed to run eastward into Lake Chad; the other and larger was

traced by Park as far as Boussa, whence, it has now been ascertained, it proceeds to the bight of Benin.

TIME', a town of Nigritia, 300 m. ESE of Timbo on the W side of the Granite Peaks. Pop., chiefly Mandingoes, 600.

TIMELKAM, a town of Upper Austria, on the river Ager, 8 m. W of Vocklabruck.

TIMELKAMIN, a town of the archduchy of Austria, in the prov. of Upper Austria, and circle of Hansruck, 2 m. W of Wöcklabruck, on the r. bank of the Wöckla.

TIMERYCOTTA, a town and fortress of Hindostan, in the Carnatic, in N lat. 16° 35'. Six miles distant from this place is a cataract 60 ft. high, from which the water falls into a basin 120 ft. in breadth, on the banks of which are a number of small temples.

TIMIMUN, a town of the Sahara of Africa, in the oasis of Touat, in N lat. 27° 50', consisting of between 500 and 600 houses, and surrounded by a wall and ditch.

TIMISCOUATA. See **TEMISCOUTA**.

TIMKOVITCHI, a town of Russia in Europe, in the gov. and 69 m. SSW of Minsk, and district of Sloutzk.

TIMMERINGUE, or **TIMRINGUE**, a village of France, in the dep. of the Bas-Rhin, cant. and 5 m. N of Drulingue, on the slope of a hill. Pop. 950. It has manufactures of hosiery, cordage, earthenware and tiles. In the environs are several salines and quarries.

TIMOAN (**PULO**), or **TIOMAN**, an island of the China sea, near the E coast of the peninsula of Malacca, in N lat. 2° 52'. It is high and woody, abounds with the cabbage palm, and produces considerable quantities of rice. This island lies a little to the E of the bent route towards China, during the strength of the monsoon. It is common with the adjacent islands is inhabited by Malays.

TIMOCHI, **RIOCHERY**, or **PIC-DE-LANGLE**, an island of the sea of Japan, to the NW of the island of Jesso, in N lat. 45° 10', and E long. 141°. It is circular in form, and rises to the height of 7,000 Parisian ft. above sea-level.

TIMOFIEEVKA, a town of Russia in Europe, in the gov. and 71 m. NW of Kharkov, and district of Soumoui.

TIMOQUE, a parish in Queen's co., 2 m. SSW of Stradally. Area 2,490 acres. Pop. in 1841, 367.

TIMOK, a river of Turkey in Europe, which descends from the S side of mount Haiduchki, in the Balkan chain, in Servia, sanj. of Semendria, and 5 m. W of a town of the same name; runs first ESE, then NNE to the confines of Bulgaria; runs along these till it reaches the Danube, which it joins on the r. bank, 20 m. NW of Widdin, and after a sinuous course of about 120 m. Its principal affluents are the Kutchuk-Timok on the r., and on the l. the Krivivir, Tukhovatz and Kreszno.—The town of Timok, 84 m. SE of Semendria, is the capital of a jurisdiction. It lies in a narrow valley, at the E base of mount Haiduchki, on a small affluent of the river of the same name.

TIMOLEAGUE, a parish in co. Cork, Munster. Area 2,873 acres. Pop. in 1831, 1,824; in 1841, 1,686.—The ancient and once important but now decayed town of T. stands on the r. bank of the Arigadeen estuary, 3 m. above its expansion into Courtmacsherry bay, and 4 m. ENE of Clonakilty. Pop. in 1831, 720; in 1841, 635.

TIMOLIN, a parish of co. Kildare, containing the villages of Ballytore and Timolin. Area 2,289 acres. Pop. in 1831, 2,941; in 1841, 1,611. The village of T. is 1½ m. S of Ballytore. Pop. in 1841, 172.

TIMONHA, a mountain of Brazil, in the prov. of Ceara, to the N of the Serra-Araripe. It runs

from N to S, a distance of several leagues, and is said to contain considerable quantities of gold.

TIMOR, the southernmost and largest of the Molucca islands, in the Eastern seas. Its extent in a NE and SW direction, is nearly 300 m.; its breadth from 30 to 60 m. Its S extremity is in S lat. 10° 24', E long. 123° 32'; its NE, in S lat. 8° 20', E long. 127° 10'. The interior is intersected, in the direction of the island's length, by a chain of mountains, some of which nearly equal the peak of Teneriffe in elevation; and various ranges of hills of limestone formation occur in different parts of the island. Its mountains exhibit sea-shells at an elevation of 800 ft.; they frequently present a conical shape. It is not known whether any volcanoes exist among them; but the whole island is subject to frequent earthquakes. The valleys are generally narrow with steep sides, but in a few instances open into plains of considerable extent. The enthusiasm of navigators, who have visited this island immediately after leaving the monotonous shores of New Holland, has probably created some exaggeration in their descriptions of the fertility of this island; yet it is certainly a pleasing region. The shores on the SE side are low, and overrun with mangroves. The streams are generally of short course, and few of them continue to flow during the dry season. Maize, cotton, tobacco, sago, indigo, pine-apples, and a variety of fruit, sandal-wood, honey, and wax, are among the productions of the island. Maize is the principal article of food, but the natives depend for a great part of their food on the sugar of the lontar-palm, and the produce of the sago-palm. The use of the plough is unknown; a wooden hoe and sharp-pointed stick are the only implements used in the hill-cultivation. The average annual crop of paddy is 70 fold. Cocos and areca palms are scarce; but the lontar is abundant, and small quantities of sugar-cane are raised. Fish can scarcely be considered as an article of subsistence, as there are scarcely any of the natives who will trust themselves in a canoe. The bee is not domesticated here, nor indeed in any of the islands in this quarter; but the vegetation supports myriads of wild bees. An article of export is *beche-de-mer*, which is partly procured near the island, and partly fished on the coast of Australia, and brought here for sale. The bread-fruit tree grows in great luxuriance, and seems to thrive as well here as in Otahelto. Sandal-wood, bees-wax, honey, and slaves, are exported; and rice, arrack, sugar, tea, coffee, betel-nut, and the manufactures of China, with some from India and Europe, received in return. The original inhabitants, who are black, but whose hair is not woolly, inhabit the mountainous parts, to which they appear to have been driven by the Malays who are mostly in possession of the sea-coast. There were formerly several Portuguese establishments on the N side of the island, of which Dielli, in S lat. 8° 34', and E long. 125° 37', Godeh in S lat. 8° 57', and E long. 124° 55', and Liefouw, in S lat. 9° 12', and E long. 124° 24', still remain. The principal Dutch settlement, that of Koepang, is on the W side of the river, in S lat. 10° 10', E long. 123° 35'. The Dutch have made some attempts to establish Christianity, but with little success, the natives mostly remaining in their original ignorance. The Dutch and Portuguese claim between them the entire sovereignty of this island: Fort Concordia being the seat of the government of the former, and Dielli of the latter. But the power of both is so much decreased at the present day, that their authority is only acknowledged by such of the native chiefs as need their

assistance against their more powerful neighbours. The nominal boundary of the two governments cannot be formed by a line drawn in any direction, as some of the petty states near Dielli are under Dutch protection, while others, near Koepang, are under the Portuguese. It is, however, considered that the whole of the country to the E of Dielli belongs to the Portuguese; and the whole of the S coast to the Dutch. Along the NW coast the two governments are completely mixed. It is impossible to form any correct estimate of the pop. The inhabitants are said to be numerous in the interior and along the S coast; but very few villages are to be seen on the N coast, and these consist only of a few huts. It appears, however, the general custom of the island not to form themselves into large communities. The natives are generally of a dark colour, with frizzled bushy hair, but less inclining in appearance to the Papuans than those of Ende. They are below the middle size, and rather slight in their figure. In countenance they more nearly resemble the South-sea islanders than any of the Malay tribes. The peasants of both sexes wear only a cloth wrapped round their loins; the rajahs generally wear *bajus* of silk or chints, with five or six handkerchiefs of different colours wrapped loosely round their heads. Their ornaments chiefly consist of arm-rings of gold, silver, or ivory; the women wear arm and ankle-rings of earthenware. There does not appear to be any system of laws amongst them; the will of the sovereign being in all cases supreme. The religion of the island is pagan; most of the princes indeed profess Christianity, but are entirely guided by their pagan priests and customs. The feudal system seems to exist throughout the island; for every man capable of bearing arms is obliged to attend the call of his feudal lord.

TIMOR-LAUT, an island in the Eastern seas, about 70 m. long, by 25 m. in average breadth, situated between the 7th and 8th parallels of S lat. and the 132d and 133d meridians of E long.

TIMPERLEY, a township in Bowden p., co. palatine of Chester, 8 m. NNE of Nether Knutsford. Area 1,628 acres. Pop. in 1831, 752; in 1851, 1,008.

TIMSBURY, a parish in Somersetshire, 6½ m. SW by W of Bath. Area 1,148 acres. Pop. in 1831, 1,367; in 1851, 1,639.—Also a parish in Hants, 2 m. N by W of Romsey; crossed by the Anter or Test river. Area 1,411 acres. Pop. in 1851, 194.

TIMUR-HISSAR. See **DEMIR-HISSAR**.

TIMWORTH, a parish in Suffolk, 3½ m. N of St. Edmunds-Bury. Area 1,358 acres. Pop. 251.

TINACO, a river of Venezuela, which enters the Portuguesa. It has a settlement of the same name on its banks, 45 m. SW of Valencia.

TINACORO, a volcanic islet of the S. Pacific, in S lat. 10° 23', E long. 165° 49'.

TINAJAS, a village of Spain, in the prov. and 24 m. NW of Cuenca. Pop. 650.

TINAKUILLO, a settlement of Venezuela, situated on the river Caxede, to the S of Valencia.

TINCHEBRAY, a town of France, in the dep. of the Orne, on the river Noireau, 14 m. N of Domfront. Pop. 1,916. It has manufactories of linen and thread, also tanneries, and nail-works. A battle was fought here between the English and Normans in 1106.

TINCULEN, or **TINULEX**, a village of Morocco, in the prov. and 120 m. SW of Tefilet.

TINDARO (CAVE), a headland on the N coast of Sicily, in N lat. 38° 7', 4 m. NE of Patti. The ruins of the ancient *Tyndaris* lie near it.

TINFIELD, a mountain range of Norway, under the 60th parallel, connected on the NW with

the Hardanger-field, and stretching SE about 45 m.

TINDSICE, a lake of Norway, in N lat. 59° 45', E long. 8° 50'. It is 21 m. in length from NNW to SSE, and discharges itself into the Nordsea.

TINEH, or **THINNA**, a ruined city of Lower Egypt, situated upon the Pelusiac branch of the Nile, in N lat. 30° 55'.

TINEH, a small town of Tripoli, situated on a river which falls into the gulf of Sidra or Syrtis, in N lat. 30° 5'.

TINEHELY, a village in the p. of Kilcommon, co. Wicklow, on the rivulet Derry, 5½ m. N by E of Carnew. It occupies a romantic site among the broken grounds skirting the base of the mountains, which extend from Glen-Aughrim to the vicinity of Newtownbarry; and it is overhung on the W, by a summit which has an alt. of 1,312 ft. above the level of the sea. Pop. in 1831, 575; in 1841, 640.

TING-CHU, a division and town of China, in the prov. of Chih-le. The div. comprises two districts. The town is 38 m. SW of Paou-ting-fu, near the r. bank of the Tam-ho, in N lat. 38° 32' 30', and E long. 115° 9'.

TING-CHU-FU, a division and town of China, in the prov. of Shan-tung. The div. comprises 10 districts. The town is 240 m. ENE of Tse-nan-fu, on the Yellow sea, in N lat. 37° 48' 26', and E long. 121° 4' 30'. It has a commodious port, defended by a numerous garrison, and by several vessels of war.—Also a division and town in the prov. of Fo-keen. The div. comprises 7 districts. The town is 195 m. W of Fuh-chu-fu, in N lat. 25° 44' 54', and E long. 116° 29' 35'. It is enclosed by mountains of considerable height, and containing mines of silver. The environs are fertile, but extremely unhealthy.

TINGEWICK, a parish in Bucks, 2 m. W by S of Buckingham. Area 2,290 acres. Pop. 877.

TING-FAN-CHU, a district and town of China, in the prov. of Kwei-chu, div. and 33 m. SSW of Kwei-yang-fu, on the r. bank of the Leen-keang, in N lat. 26° 6', and E long. 106° 32'.

TING-GAN, a district and town of China, in the prov. of Kwang-tung and div. of Keun-che-fu, island of Hai-nan. The town is near the r. bank of the Li-mu-keang or Keen-keang, 23 m. S of Kiung-chu. Pop. in 1819, 54,955. It is enclosed by substantial walls, and is of considerable extent. Its streets are straight and well-paved, and it has an extensive library founded in 1736.

TING-HAE, a district and town of China, in the prov. of Chi-keang, and div. of Ning-po-fu. The town is 39 m. E of Ning-po-fu, in N lat. 30° 0' 24', and E long. 122° 6' 35". Pop. 35,000. It lies on the S coast of the island of Chusan, in the Yellow sea. The walls by which it is surrounded are 18 ft. in height, and 15 ft. thick, and are surmounted by another wall 14 ft. 16 in. high, and 2 ft. thick. It is traversed by numerous canals, across which are thrown lofty bridges connecting the streets, which are narrow and paved with flag-stones. The houses are generally only a single story in height. The general aspect of the town is that of activity and industry. It was taken by the British in 1841.

TING-HING, a district and town of China, in the prov. of Chih-le, div. and 33 m. NNE of Paou-ting-fu, in N lat. 39° 17', and E long. 115° 56'.

TING-JANG-HEEN, a district and town of China, in the prov. of Shan-se and div. of Hin-chu, in N lat. 38° 32', and E long. 112° 59'.

TING-KE-HEEN, a district and town of China, in the prov. of Kwei-chu and div. of Sze-chu-fu.

TING-NAN-TING, a district and town of China, in the prov. of Keang-se, and div. of Kan-chu-fu, in N lat. 24° 45', and E long. 114° 45'.

TING-PEEN, a district and town of China, in the prov. of Shen-se, and div. of Yen-gan-fu.—Also a district and town in the prov. of Fo-keen, and div. of Tsu-heung-fu, on the r. bank of the Ta-shan, in N lat. 25° 6', and E long. 100° 48'.

TING-PWAN-CHU, a district and town of China, in the prov. of Kwei-chu, and div. of Kwei-yang-fu.

TINGRITH, or **TINGRAVE**, a parish in Bedfordshire, 4½ m. E by S of Woburn. Area 946 acres. Pop. in 1831, 162; in 1851, 196.

TING-TAOU, a district and town of China, in the prov. of Shan-tung, div. and 15 m. SE of Tsau-ohu-fu, in N lat. 35° 11' 18", and E long. 115° 44' 30".

TING-YUEN, a district and town of China, in the prov. of Sze-chuen, div. and 82 m. SSE of Chungting-fu, on the r. bank of the Kia-cing-keang, in N lat. 30° 25', and E long. 106° 20'.

TING-YUEN-CHU, a district and town of China, in the prov. of Shen-se, and div. of Han-chung-fu.

TING-YUEN-HEEN, a district and town of China, in the prov. and 27 m. S of Fung-yang-fu, in N lat. 32° 32' 46", and E long. 117° 32' 47". It contains numerous shops of mediocre quality, and has two triumphal arches.—Also a district and town in the prov. of Yun-nan, div. and 18 m. N of Tsu-heung-fu, on a small affluent of the Lang-ohuen-ho, in N lat. 25° 22', and E long. 101° 44'.

TINGWALL, **WHITENESS**, and **WEESDALE**, a united parish a little S of the centre of the mainland of Shetland. Its greatest length is between 18 and 20 m., and its greatest breadth is 10 m.; but it is so much indented with voes, that no part of it is more than 2 m. from the sea. Several small islands belong to it; the chief of which are Oxnor, Trousa, Hildessie, and Linga, all inhabited. The principal voes or harbours are those of Wadbaster, Laxforth, and Deal, on the E, and Weesdale, Stromness, Ustanes, and Scalloway, on the W. Pop. 2,874.

TINHOSA, an island in the China sea, in N lat. 18° 40'.

TINISCHT, a town of Bohemia, 73 m. E of Prague, on the r. bank of the Adler. Pop. 1,000.

TINJULIEN, a town of Morocco, on the Wad-Drah, 105 m. SE of Morocco.

TINKLETON, a parish in Dorset, 5½ m. E by N of Dorchester. Area 885 acres. Pop. in 1851, 176.

TINLEYSVILLE, a village of Goodland co., Virginia, U. S., 45 m. WNW of Richmond.

TINMOUTH, a township of Rutland co., Vermont, U. S., watered by Otter creek, 10 m. S of Rutland. Pop. 1,000.

TINNEHINCH, a hamlet in the p. of Rearymore, Queen's co., on the rivulet Barrow, 2 m. E by S of Clonaslee, at an elevation above sea-level of 352 ft.—Also a village in the p. of St. Mullins, co. Carlow, on the l. bank of the Barrow, directly opposite to Graigueanamanagh, so as to form a suburb of that town, 5 m. S by W of Borris. Pop. in 1841, 221.

TINNEVELLY, an extensive district of Hindostan, in the Southern Carnatic, occupying the SE extremity of the peninsula, between the parallels of 8° and 10° N, and separated from Ceylon by the gulf of Manaar. Generally speaking, this district, the area of which is 5,700 sq. m., may be called an open and level country, with large tracts of waste and jungle, although it contains some woods and several hills. It does not contain any river of magnitude, but is watered by numerous streams flowing from the western mountains; and in favourable seasons, yields abundant crops of rice and cotton. The banks of the Tamburapurni are very fertile. Towards the S and E extremities are numerous salt marshes. Its principal towns are Palamcottah, Manapur, and Tinnevely; and its best seaports, Tutacurin and Coilpatam. The pop., about 860,000

in number, consists chiefly of Hindus, who retain much of their primitive customs and manners. During the first wars in which the British were engaged in this country, from 1740 to 1760, it was in the hands of a number of petty chiefs called *polygars*, who were constantly quarrelling with each other, and plundering the country. In this disorderly state the district continued till 1799, when the British reduced to obedience a number of these chieftains. During the war with Tipu Sultan, the polygars took advantage of the absence of the army, and broke into rebellion; but as soon as a sufficient number of troops could be spared, a large force was sent against them; and in 1801, they were all subdued. The revenue, amounting to 70,000 pagodas or about £23,000 per annum, in 1804, is now 24 lacs, or £240,000. Cotton, silks, and iron wares are manufactured.—The capital, of the same name, stands in N lat. 8° 48', about 25 m. E of a range of mountains, and is large and populous. On three sides it is surrounded by extensive rice-fields; and on the W by rocky ground.

TINNIS, a rivulet of Liddesdale, Roxburghshire, which rises between the heights of Tinnis and Locknowe, and runs SE to the Liddel at Burnmouth.

TINOS, an island of the Grecian archipelago, to the SE of Andros, from which it is separated by a narrow channel. It is about 60 m. in circuit. It is very mountainous, but fertile, producing wheat, barley, silk, olives, figs, wine, racki, wax and unrivalled honey, hares, wild pigeons, and doves, sheep, pigs, and poultry. It has two or three small rivers, countless fountains of excellent water, valuable marble and stone quarries, three or four towns, nearly 70 villages, innumerable convents and churches, millions of snakes, a few jackalls, and about 30,000 inhabitants. Strong gloves, stockings, and stuffs, are manufactured in the island, and small marble figures are occasionally sculptured here in a manner that would do credit to Italy. Its trade in wine, oil, and brandy is considerable.

TINOSO (CAPE), a cape of Spain, on the coast of Murcia, in N lat. 37° 30'.

TINBLEY, a chapelry in Rotherham p., Yorkshire, 2½ m. SW by W of Rotherham. Area 1,623 acres. Pop. in 1831, 368; in 1851, 619.

TINTAGELL-AND-BOSSINEY, a parish and disfranchised borough in Cornwall, 5½ m. NW of Camelford. Area 4,350 acres. Pop. in 1831, 1,006; in 1851, 1,084. It returned 2 members to parliament from the 7th of Edward VI. till 1832, when it was disfranchised by the Reform act. T. is the reputed birth-place of King Arthur.

TINTERN, or **KINWAZER**, a parish in co. Wexford, 3 m. N of Fethard, containing the village of Saltmills. Area 6,863 acres. Pop. in 1841, 2,680.

TINTERNE-ABBEY, a celebrated ruin in Chapel-hill p., co. of Monmouth, 4½ m. N of Chepstow, on the W bank of the river Wye. It was a Cistercian abbey, founded in 1131. Its ruins are justly esteemed the most beautiful and picturesque objects on the Wye.

TINTERNE-PARVA, a parish in Monmouthshire, 5 m. N of Chepstow. Area 827 acres. Pop. in 1831, 313; in 1851, 370.

TINTINHULL, a parish in Somersetshire, 2 m. SW of Ilchester. Area 1,828 acres. Pop. 529.

TINTO, a river of Spain, in the prov. of Seville, which rises in Huelva; flows SE; and runs into the Atlantic, to the W of the Guadalquivir, near the town of Moguer, after a total course of 65 m. It derives its name from the colour of its water, which in the early part of its course is a yellowish green, and so bitter that no animal except goats will drink

of it. This arises probably from a metallic infusion received at or near its source; for it disappears after its stream has been increased by other rivers; and at the town of Niebla it has hardly any properties distinct from those of common water. At its mouth it forms a considerable bay, about 7 m. in breadth; and large vessels sail up as far as San-Juan-del-Fuerto, about 12 m. inland.

TINTO, a lofty mountain at the head of Clydesdale, in Lanarkshire, stretching above 2 m. from E to W, and elevated 2,312 ft. above the level of the sea, and 1,740 ft. above the Clyde. The upper part of this mountain consists of a flesh-coloured felspar, resting on conglomerate.

TINTO, a river of Central America, which flows into the bay of Honduras, 20 leagues E of Cape Honduras, after a course of about 120 m.

TINTWISTLE, or **TINGETWISSEL**, a chapelry in Mottram p., Cheshire, $9\frac{1}{2}$ m. NE by E of Stockport, on the N bank of the Etherow, and in the line of the Manchester and Sheffield railway, which here enters a tunnel 3 m. in length, by which it is conducted to the Yorkshire side of the ridge: the elevation of the SW entrance of the tunnel above sea-level is 875 ft. Area 14,120 acres. Pop. 3,027.

TINWALD, a parish lying between Nithsdale and Annandale, but belonging mainly to Dumfriesshire. Its superficial extent is about 15 sq. m. Pop. in 1831, 1,220; in 1851, 1,080.

TINWELL-AND-INGTHORP, a parish in Rutlandshire, $10\frac{1}{2}$ m. ENE of Uppingham. Area 1,651 acres. Pop. in 1831, 262; in 1851, 287.

TIOGA, a county on the N side of the state of Pennsylvania, U. S. Area 1,056 sq. m. Pop. in 1840, 15,498; in 1850, 23,987. Chief town, Wellborough.—Also a central co. in New York. Area 456 sq. m. The surface is considerably broken and hilly. Pop. in 1840, 20,527; in 1850, 24,880. Its cap. is Owego.—Also a post township of Tioga co., Pennsylvania, 110 m. N by W of Harrisburg.—Also a river of the United States, which rises among the Alleghany mountains, Pennsylvania; runs N, entering the state of New York; after which it turns to the E, and joins the Conhocton.

TIONE, a small town of the Tyrol, on the river Sarca, 19 m. W of Trent. Pop. 1,000.

TIORN, an island of Sweden, 18 m. N of Gottenburg. It is about 30 m. in circumf., and has good pasturage. The inhabitants export butter, cheese, and hops.

TIOUGHE, or **TZOEX**, a recently discovered river of S. Africa, the principal feeder of Lake Ngami, into the NW extremity of which it falls. It has recently been ascended by Mr. Anderson for 13 days in a NNW direction; but so strangely tortuous is its course that he only made one degree of northing in all that time. Here he reached a large village, to which he had been directed by the chief of Lake Ngami, with the assurance that fresh boats and men should be supplied from it for his further progress. However, on his arrival, he found that the whole male population had decamped with their canoes, professedly on a seacow hunt, but in reality to deprive him of all means of further progress. He waited a week, when, as matters continued the same, and as the sickly season was approaching, he had no alternative but to return. The T., in that portion reached by Mr. Anderson, does not exceed 40 yds. across; it is deep and full of reeds, and runs at about $2\frac{1}{2}$ m. per hour. Its banks are low and reedy, and are flooded for many miles during the rainy season. Here and there they rise somewhat higher; and then clumps of fine trees entwined with parasitical plants, and presenting a varied and luxuriant vegetation, cover them. Seacows are

numerous in the river, and much dreaded by the natives, frequently attacking their canoes. A party of Griquas, in 1852-3, had travelled in waggons to the lake, and thence to the NNW for 19 days, when they succeeded in reaching the town Libébe, which is the cap. of the Bavicko country, and situated high up on the T. It is the centre of a great inland traffic, and the Mambari, the Ovapangari, and the Ovahanyama are among the nations that visit it. The Griquas returned by a different route, and then fell in with the *taetse* fly, which committed such sad havoc with their cattle that they were but just able to get back to the lake before the very last of their horses and oxen died. Half of the Griquas themselves had perished during this short excursion of malignant fever. Strong evidence is adduced by Mr. Anderson to prove that an important branch of the great Cunene river, which runs towards the W coast, rises near to where the T. falls into the lake. The dry upper part of this branch was crossed by the above-mentioned Griquas. See article **NGAMI**.

TIOUGHNIOGA, a river of New York, U. S., which rises in the S part of Onondaga co., and flows into the Chenango, in the SE part of Broome co.

TIPERAH, an extensive district of Bengal, situated on the E side of the Brahmaputra or Megna, between the 22d and 24th parallels of N lat. On the E it is divided from Ava by a range of mountains and impervious woods, abounding with wild elephants and other ferocious animals. On the S it is bounded by Chittagong. The district is supposed to contain nearly 5,000 sq. m.; but of this space a considerable portion is wild and uncultivated, and inhabited only by a scanty population. The W division is productive, and yields abundant crops of rice and cotton. A quantity of salt is also manufactured near the coast, on account of government. It is so celebrated for the growth of betel-nut, that the Birman merchants often make advances to the growers, in order to secure the whole crop. Its principal manufacture is that of coarse cotton cloth, denominated *baftah*, and some *cossas*. Its cap. is Comillah. Its other towns are Odeypore, the ancient capital, Luckipore, Doudcandy, and Colinda.—This district appears to have been long the seat of an independent Hindu principality. In our old maps it is described as the kingdom of Tipra. It retained its independence till the last cent., although frequently invaded by the Mahommedans, after they had gained possession of the rest of Bengal. By Mahommedan historians it is denominated the country of Jagenagur, which was probably the name of its principal port, subsequently known as Alumgeernagur. It was invaded in 1279, by Toghril, the Afghan governor of Bengal. During the government of Sultan Shuja, about the middle of the 17th cent., it was invaded, and some of the lands near the river Megna annexed to Bengal. Along with the rest of Bengal, it devolved to the British in 1765. The pop. has been estimated at 1,400,000, in a nearly equal proportion of Hindus and Mahommedans.

TIPITAPA, a river of Nicaragua, which flows from the SW extremity of the lake of Leon into the NW extremity of the lake of Nicaragua. See article **NICARAGUA** (LAKE OF).

TIPPAH, a county in the N of the state of Mississippi, U. S. Area 1,037 sq. m. Pop. 20,741.

TIPPECANOE, a river of Indiana, U. S., which joins the Wabash, about 420 m. from its mouth, after a course of about 170 m. Several of its branches issue from lakes, swamps, and ponds, some of which have double outlets running into the St. Joseph's, a branch of the Miami of the Lakes.—It

gives name to a county of Indiana. Area 504 sq. m. Pop. in 1850, 19,877. Capital, La Fayette.

TIPPER, a parish in co. Kildare, $1\frac{1}{2}$ m. E by S of the town of Naas. Area 3,288 acres. Pop. 661.

TIPPERAGHNEY, or **TYRUBOUGHNEY**, a parish in co. Kilkenny, $1\frac{1}{2}$ m. WSW of Piltown. Area 1,147 acres. Pop. in 1881, 283; in 1841, 278.

TIPPERARY, an inland county of the prov. of Munster, in Ireland, constituting all the NE and the middle-eastern portion of that prov., and ranking with Cork and Galway as one of the three greatest counties of Ireland. It is bounded on the NW by co. Galway; on the N by King's co.; on the E by Queen's co. and the co. of Kilkenny; on the S by co. Waterford; on the SW by co. Cork; and on the W by cos. Limerick and Clare. Its greatest length, southward from the mouth of the Little Brosna to the Knockmeledown mountains at the junction point with the counties of Waterford and Cork, is 50 m.; its greatest breadth westward is $29\frac{1}{2}$ m.; but its breadth over 10 m. at the N extremity nowhere exceeds $9\frac{1}{2}$ m. Its area comprises 843,887 acres of arable land, 178,183 of uncultivated land, 28,779 of continuous plantations, 2,359 of towns, and 13,523 of water,—in all, 1,061,731 acres. In proportion to its extent, this co. contains less unimproved land than any other in the S of Ireland.

Surface. The SE termination of the Slievebloom mountains slightly touches the extremity of the wing of the co. situated on the E side of the King's co. indentation. The magnificently grand mountain-range of the Galtees come in from the SW extremity of the co. of Limerick, and extend, within Tipperary, 9 m. E to the valley of the Suir. They have their culminating-point in Galteemore, 3,015 ft. of alt. above sea-level, on the boundary with Limerick; they possess within Tipperary an extreme basis-breadth of $5\frac{1}{2}$ m., and everywhere a basis-breadth of considerable expansion. The Knockmeledown mountains extend strictly parallel with the Galtees, and belong rather more to Waterford than to T., and partially also, under the name of the Kilworth mountains, to Cork. The portion or rather side of these mountains within Tipperary has a basis-breadth of from $1\frac{1}{2}$ m. to $3\frac{1}{2}$ m. Various groups and ridges, and congeries of mountains, impart strength and brilliance to the landscapes of all parts of the co. The broad, spreading, fertile, and luscious valley of the Suir flanks all the E side of the Devil's Bit and the Bilboa mountains; the broad, beautiful, and most fructiferous dingle, called the Golden Vale, extends from the valley of the Suir E to the Slievenaman mountains. The district which constitutes the NE and the E borders, from the vicinity of Roscrea S to the vicinity of the Slievenaman mountains, are first a sheet of sheer bog about $23\frac{1}{2}$ m. in length, and next an expanse of low, spreading, moorish hills, whose loftiest summits acquire an alt. of from 300 to 600 ft. above the level of the adjacent plain.

Waters. All the lakes of the co. of T., excepting its portion of Lough Derg, are small and unimportant. The principal are Loughs Curra, Diheen, and Boheen. Excepting these lakes, all the 18,600 acres of water exhibited in the Ordnance survey as belonging to T., are in Lough Derg, and the rivers Suir and Shannon. All the district W of the summit-line of the Devil's Bit and the Bilboa mountains, and also a small portion of the Golden Vale around Emly, belong to the basin of the Shannon, and are drained to that river, or to its great expansion of Lough Derg, by a number of inconsiderable rivulets, the chief of which are the Brosna, the Nenagh, the Kilmastrulla, and the Mulkern. Of the remainder of the co. nearly all belongs to the basin of the Suir.

The only navigations of the co. are that of the Shannon along all the boundary with Clare and Galway, and that of the Suir up the S boundary of the co. to Clonmel.

Minerals. A formation of clay slate, greywacke, and greywacke slate, constitutes the greater portion of the Keeper mountains, the Bilboa mountains, and the Lough Derg mountains, a small part of the Knockmeledown mountains, and a considerable part of the Galtees mountains, the Devil's Bit mountains, and the Slievenamuck mountains. A formation of old conglomerate, with red, purple, and grey clay slate, constitutes most of the Knockmeledown mountains, rather more than one-half of the Galtees, and a considerable portion of the Slievenamuck group. A formation of yellow sandstone and sandstone conglomerate constitutes the northern part of the Devil's Bit range, a broad belt round the Keeper and Bilboa congeries, and narrow belts round the Lough Derg mountains, the Galtees, the Knockmeledown mountains, and the Slievenamuck mountains. A formation of old red sandstone and sandstone conglomerate, constitutes a portion of the centre of the Keeper mountains, the western declivities of these mountains, the district around Newport-Tip, and thence to the Shannon, a narrow belt between the clay slate and the yellow sandstone of the Lough Derg mountains, and the central and eastern portions of the Slievenamuck range. A coal formation, partially containing workable seams of coal, constitutes the district of moorish hill on the eastern border of the county, the district westward thence till within a few miles of Cashel, a tiny district closely adjacent to Cashel, and another tiny district a little NNW of Clonmel. Wings and ramifications of the great central flooz limestone plain of Ireland coalesce nearly all the remainder of the co.

Agriculture. In the barony of Middlethird, which was selected by the Irish Poor Commissioners as the field of inquiry into the agricultural and economical condition of T., and which may probably be regarded as a fair average specimen of the co., about one-third or one-fourth of the surface was pasturage, and most of the remainder in tillage. Leases were much less in use than at a recent period; and such as still existed were usually for 31 years or three lives in the case of farms, and for 21 years in the case of cottage and glebe lands. Competition for small holdings was so great that, on occasion of almost every vacancy, persons offered more than the land was worth, and entered on its possession on terms quite incompatible with their obtaining more from it than the most miserable subsistence. This competition had been a prolific source of crime. Potatoes, wheat, and oats, formed the series, which was repeated if the land would bear it. After this rotation of crops had been taken once or twice, or on some of the best lands three or four times, the ground was left to grass for 6 or 8 years. The con-acre system was prevalent; and the quantity of land usually taken by a family was from a rood to an acre. Very little cheese was made; and even butter was not produced in large quantity. In 1841, there were within the civic districts of the co., 230 farms of from 1 acre to 5 acres, 110 of from 5 to 15 acres, 22 of from 15 to 30 acres, and 21 of upwards of 30 acres; and within the rural districts, 18,032 of from 1 acre to 5 acres, 12,787 of from 5 to 15 acres, 4,938 of from 15 to 30 acres, and 2,960 of upwards of 30 acres. In 1851, wheat occupied 55,110 acres; oats 98,088; barley and rye 22,764; potatoes 43,348; and turnips 30,208 acres.—The Limerick or common Irish breed of black cattle are the most common, in consequence of being thought the most hardy. In 1841, there were within the co. 38,215 horses and mules, £265,720; 7,076 asses, £7,076; 87,162 cattle, £556,553; 129,848 sheep, £142,833; 105,333 pigs, £131,666; and 586,783 poultry, £14,669.—The plantations within the co. in 1841, occupied 29,602 acres.

Divisions and Towns. The county was recently divided into two ridings, N and S. Its baronies are Lower Ormond, in the N part upon the Shannon; Upper Ormond, in the central part upon the Shannon; Owey and Arra, in the S part upon the Shannon; Ikerrin, in the NE; Eliogurty, in the N

part of the central E; Slieveardagh, in the S part of the central E; East Iffa and Offa, in the SE; West Iffa and Offa, in the SW; Clanwilliam, in the S part of the central W; Lower Kilnemanagh, in the N part of the central W; Upper Kilnemanagh, in the NW centre, between Lower Kilnemanagh and Upper Ormond; and Middlethrid, in the SE centre, between Slieveardagh and Clanwilliam. The towns and chief villages are Borris-o'-kane, Goatstown, Puskawn, Lorrha, Ballyloughnane, CloghJordan, and part of Nenagh, in Lower Ormond; Toomavarra, Silvermines, and part of Nenagh, in Upper Ormond; Portroe, Newport, and Ballina, in Owney and Arra; Roscrea and Templetuohy, in Ikerrin; Thurles, Moyne, Loughmoe, Templemore, Littleton, and Two-mile-Borris, in Eliogurty; Mullinahone, Killenale, Ballingarry, New Birmingham, Nine-mile-house, and Maradvyke, in Slieveardagh; Carrick-on-Suir, Abbey, Ballyclarahan, Kilsash, Tobberaheena, Kilsheelan, and the chief part of Clonmel, in East Iffa and Offa; Cahir, Clogheen, Ardinnan, Ballyporeen, Newcastle, and Burncourt, in West Iffa and Offa; Tipperary, Emly, Cullen, Golden, Thomastown, and Banahaw, in Clanwilliam; Ballagh, in Lower Kilnemanagh; Borris-o'-leagh and Cappaghwhite, in Upper Kilnemanagh; and Cashel, Fethard, Drangan, Holycross, and New-Inn, in Middlethrid.

Statistics. In 1824, according to Protestant returns, the number of schools within the co. of T. was 657, of scholars 33,676. At the close of 1843, the National board had in full operation within the co. 118 schools, conducted by 95 male and 47 female teachers, and attended by 9,288 male and 7,129 female scholars. The cost of maintaining the entire constabulary force of the co. during 1843, amounted to £39,577. The number of electors registered Feb. 1, 1844, was 2,674; of whom 814 were 250 freeholders; the number in 1851 was 6,760. The pop. of the co. in 1792 was 169,000; in 1821, 346,896; in 1831, 402,363; in 1841, 435,553; in 1851, 331,487. The following statistics are all of the year 1841:—Males, 216,650; females, 218,903; families, 74,670. Inhabited houses, 66,384. First-class inhabited houses, 1,722; second-class, 13,653. Families residing in first-class houses, 21,123; in second-class houses, 16,699. Families employed chiefly in agriculture, 52,805; in manufactures and trade, 18,512; in other pursuits, 8,253. Families dependent chiefly on property and professions, 1,607; on the directing of labour, 25,978; on their own manual labour, 45,034.

History.] The *Coronadi* and the *Udici* or *Uodici* of Ptolemy are supposed to have occupied the country which now constitutes the co. of Tipperary, and the counties adjoining it in the W and SW. In the settlement which followed the Anglo-Norman conquest, a principal part of the territory which now constitutes co. T. seems to have continued as a tributary toparchy, in the possession of Donald O'Brien, the native prince of Thomond and Ormond. In 1210, T. was erected into a county by King John, during his expedition to Ireland. Almost at the first blush of the great rebellion of 1642, Cashel, Clonmel, Fethard, Carrick-on-Suir, and all the other towns of T. were seized by the insurgents. In 1648, after Lord Inchiquin had made common cause with the Earl of Ormond, when Cromwell invaded Ireland, he found himself opposed by both royalists and confederates in this co. At the period of the Restoration, Clonmel was one of the towns in possession of the royalists. In the war of the Revolution, and after the battle of the Boyne, Clonmel was abandoned by the Jacobites on the advance of William; and it formed the retreat and asylum of the latter's army, on occasion of his relinquishing the siege of Limerick, and embarking at Duncannon for England. The county of T. was not involved in the rebellion of 1798; but it has figured with painful and ignominious prominence in many an atrocious disturbance.

TIPPERARY, a parish in co. Tipperary, containing part of the town of the same name. Area 4,362 acres. Pop. in 1831, 7,996; in 1841, 7,811.—Also a town in the parishes of Tipperary, Cordan-gan, and Corroge, co. Tipperary, on the rivulet

Arra, 10 m. W by S of Cashel, and 87 m. SW of Dublin. It is what a mercantile traveller would call 'a good little town.' There is no town westward nearer than Limerick, and there is consequently a busy retail trade, the result of country wants. Pop. in 1831, 6,972; in 1841, 7,370.

TIPPERKEVIN, a parish of co. Kildare, 2 m. N by E of Ballymore-Eustace. Area 3,751 acres. Pop. in 1841, 744.

TIPSA, or **TIRISA**, a village of Algiers, in the prov. and 126 m. SE of Constantina, on the Megerdah, and near the confines of Tunis.

TIPTON, a central co. of the state of Indiana, U. S., comprising an area of 264 sq. m., drained by Cicero and Duok creeks, and intersected by the Indianapolis and Peru, and the Newcastle and Logansport railroads. It is level and well-timbered. Pop. in 1850, 3,532. It has a village of the same name.

—Also a county in the W part of the state of Tennessee, comprising an area of 682 sq. m., drained by branches of Big Hatchee and Loosahatchee rivers, affluents of the Mississippi. Pop. in 1840, 6,800; in 1850, 8,887. Its capital is Covington. It has a generally level surface, and is fertile in cotton and tobacco.—Also a village of Cedar co., in the state of Indiana, $1\frac{1}{2}$ m. W of Sugar creek, and 20 m. E by S of Iowa city. Pop. in 1840, 50.

TIPUNA, a town and port of New Zealand, near the NE extremity of Ekehinomauwe or North Island, and on the N side of the Bay of Islands.

TIPUTINI, a river of Ecuador, in the prov. of Imbambura, which runs E., and joins the Napo, on the r. bank, in S lat. $1^{\circ} 30'$.

TIQUE, a river of Venezuela, in the prov. of Cumana, which has its source on the confines of Barcelona; runs ENE; expands into a lake; issues thence by 3 outlets, which conjoin about 30 m. below, and thence taking the name of Caripe, flow into Cayo-Manamao, the most westerly arm of the Orinoco, and a little above its entrance into the gulf of Paria. The T. is connected in its course with the Marichal on the S, and the Cayo-Cacao on the N.

TIQUIRA, or **TIQUIMA**, a river of Brazil, which has its source in a mountain of the same name, and joins the Pequiri, an affluent of the São Lourenço.

TIRA, or **SHAH JEHANPUR**, a town and stronghold of Hindostan, in the NE part of the Punjab, on a rocky plateau, at an alt. of about 100 ft. above the Beas, which runs at its base. Pop. 5,000.

TIRANA. See **TERRAN**.

TIRANGES, a village of France, in the dep. of the Haute-Loire, cant. and 6 m. W of Bas, at the foot of a mountain near the l. bank of the Ance, here crossed by two old stone-bridges. Pop. 1,680.

TIRANO, a town of Austrian Lombardy, in the gov. of Milan, delegation and 17 m. ENE of Sondrio, on the l. bank of the Adda. Pop. 4,000. Adjacent is the village of Madonna-di-Tirano, noted for a magnificent church dedicated to the Virgin.

TIRASPOL, a district and town of Turkey in Europe, in the gov. of Kherson. The town is 6 m. E of Bender, on the l. bank of the Dniester, by which it is separated from Bessarabia. Pop. 5,100. Its streets are straight and spacious, and the houses regularly built. It has two churches, and in its vicinity is a mud fortress well garrisoned, designed to defend the passage of the river. This town was fortified in 1793, when, after the taking of Otokakov, the Russians formed a line of fortified ports along the Dniester.

TIRAXANA, or **TIRAJANA** (**SAN-BARTOLEME**), a town of the Canary islands, in the island of Gran Canaria, and partido of Las Palmas. Pop. 3,656. It has a parish church, three convents, and a custom-house. Its industry is chiefly agricultural.

TIREE, one of the Inner Hebrides, 15 m. W of Mull, in N lat. 56° 20', W long. 6° 53'. It is about 13 m. in length, from SW to NE, and from 1 to 5 m. in breadth. It consists chiefly of gneiss. Its surface is low, and in few places fertile. Pop. in 1851, 3,709.

TIREH, **TIRRA**, or **TYRIA**, a town of Turkey in Asia, in the sanjak of Aidin, 36 m. SE of Smyrna, at the N base of a lofty mountain of the Kestane-dagh, and 3 m. from the l. bank of the Kutchuk-Mendere, which is here crossed by a stone bridge. Pop. 20,000. It has 14 mosques, two Greek churches, numerous houses intermingled with gardens and plantations, and a suburb, and possesses manufactories of carpets and calico. About 36 m. to the W are the ruins of Ephesus.

TIRGO, a town of Spain, in the prov. and 30 m. WNW of Logrono, and partido of Haro-y-sus-Barrios, on a flat but fertile locality, on the r. bank of the Tiron. Pop. 400.

TIRGOSCHYL, a town of Turkey in Europe, in Little Wallachia, capital of the district of the Upper Schyl, and 42 m. NE of Tchernetz, on the slope of a mountain, near the l. bank of the Schyl.

TIRGU-FORMOS, a town of Turkey in Europe, in Moldavia, in the district and 24 m. NW of Jassy, in a valley, on the l. bank of the Baglinez.

TIRGUSHINA, or **EREZA**, a town of Turkey in Europe, in Albania, in the sanj. of Scutari, pash. and 50 m. NNW of Prisvend, at the base of the Djamus Dag.

TIRHUT, an extensive district of Hindostan, in the prov. of Bahar, situated principally between the 25th and 27th parallels of N lat., and bounded by Nepal on the N; the district of Purneah on the E; Bhagulpore on the SE; the Ganges on the S; and Sarum on the W. Area 7,400 sq. m. Although not hilly, the surface of this district is more elevated, the soil drier, and the climate healthier, than in Bengal. It is, generally speaking, well cultivated, and productive of cotton, grain, sugar, indigo, tobacco, opium, and saltpetre; of late years the breeding of horses and cattle has received encouragement here from government. Towards the N frontier are extensive forests, abounding with valuable timber, but unfortunately the rivers are not of sufficient depth to float it into the Ganges. Its principal towns are Mozufferpur, Durbungah, Nagorbussay, Jeajapur, and Turki. Its chief rivers are the Little Gunduck, the Gogary, and the Bhagmutty. In the remote eras of Hindu antiquity, this region formed a part of the kingdom of Maithila, the boundaries of which were the Gunduck and Cosa rivers. Within these territories a peculiar language was spoken, still named the Maithila or Tirhuty: it also gave name to a division of Brahmins, who pride themselves on their purity. It appears to have continued an independent principality until 1237, when it was invaded by Toghan-Khan, the Afghan governor of Bengal. It was finally subdued by the Mahommedans about 1325, by the emperor Ala-Addin, who annexed it to the throne of Delhi. Along with the rest of the prov., it came into possession of the British in 1765. The pop. is estimated at 2,400,000, in the proportion of three Hindus to one Mahommedan.

TIRIOLO, a town of Naples, in the prov. of Calabria-Ultra, and district of Catanzaro, on a summit of the Apennines, between the Corace and Lamato. Pop. 2,500. It has two parish churches, and a convent. The environs, which are extremely fertile, are noted for their medicinal plants, and contain mines of iron and of coal. T. is of great antiquity, and contains numerous ancient remains.

TIRIX, a town of Spain, in the prov. and 27 m.

N of Castellon-de-la-Plana, and partido of Albocacer, amid mountains. Pop. 677.

TIRKCHLE, a town of Russia in Europe, in the gov. of Vilna, district and 26 m. NNE of Telch.

TIRLEMONT, a department, commune, and town of Belgium, in the prov. of Brabant, and arrond. of Louvain. Pop. of dep. 8,160. The town is 12 m. SE of Louvain, on the Ghete. It is enclosed by a wall, 5 m. in circuit, comprising numerous gardens, orchards, &c. Pop. 7,221. It has a large square, in which are the town-house, and the principal church, a college, an academy and a savings' bank, and possesses manufactories of cotton and woollen fabrics, hosiery, soap, oil, pottery, several salt refineries, distilleries and breweries. Its trade consists chiefly in grain, wool, cattle, and pigs. It returns two deputies to the provincial states. This town was formerly one of the most important in the Brabant, but has frequently suffered much from war. During the revolt of the Netherlands it was taken by the Spaniards, in 1685 by the French and Dutch, and again in 1792 by the French. The following year it fell into the hands of the Austrians, but in 1794 was regained by the French.

TIRMEZ, or **TERMEZ**, a town of Independent Tartary, in the khanat and 250 m. SE of Bokara, on the r. bank of the Jihun, which here becomes navigable.

TIRON, a river of Spain, which has its source in the mountains of San Antonio, on the confines of the provinces of Logrono and Burgos; flowing N for some distance between these provs., it passes Belorado; thence taking a NE course, it enters Logrono, waters Angunciana and Haro, and a little below the latter town joins the Ebro, on the r. bank, and after a total course of 39 m.

TIRON, or **TIRAN**, an island of the Arabian gulf, near the coast of Hedjaz, in Arabia, and at the entrance to the gulf of Akaba, in N lat. 27° 55'. It is surrounded by sand banks.

TIROON, a district of Borneo, on the E coast, extending between the 3d and 4th degrees of N lat. It is generally flat, and is watered by numerous streams, the principal of which is the Solowang. It abounds with sago trees and birds' nests, and produces also sugar, wax, honey, beche-de-mer, rattans, &c. Gold is found in some parts. The inhabitants who are supposed to be a subdivision of the Ilaan, or Horaforas, are said to be addicted to cannibalism.

TIRPIED, a village of France, in the dep. of the Manche, cant. and 5 m. W of Brecey, on the r. bank of the See. Pop. 1,350.

TIRRE. See **TIREH**.

TIRSCHENREUTH, a presidial and town of Bavaria, in the circle of the Upper Pfalz. Pop. of presidial, 13,350. The town is 17 m. S of Eger, on the Waldnab. Pop. 2,300. It is enclosed by walls, and has three churches. It has manufactories of cloth and linen, and productive fisheries.

TIRSCHTIEGEL, or **TRZCIEL**, a town of Prussia, in the prov. and regency and 45 m. W of Posen, and circle of Meseritz, between two lakes, on the Obra, by which it is divided into two parts distinguished as the Old and New town. Pop. in 1843, 2,398. It has a Lutheran and two Catholic churches, and possesses manufactories of cloth and tobacco, and distilleries of brandy.

TIRSI. See **ORISTANO**.

TIRSO (SAN), a village of Portugal, in the prov. of Minho, comarca and 15 m. N of Oporto, near the l. bank of the Ave. Pop. 300. There is a superb convent here.

TIRTAPURI, a town of Tibet, in the prov. of Ndzang, to the S of the Cailas mountains, near the source of the Sutlej, and 50 m. SSE of Gortope. It stands on a plateau 200 ft. in height, and is over-

hung by lofty limestone crags. It is the residence of a lama and of several gynogs. It contains numerous *sauks* or diminutive temples, and nearly opposite the lama's house is a wall 450 ft. in length, and 12 in breadth, covered with stones, on which prayers have been inscribed by pilgrims who have visited the locality. About 2 m. to the W of T. are two hot springs.

TIRUPMEN, a town of Burmah, in the prov. of Pegu, near the l. bank of the Irawaddy, 80 m. SSE of Prome.

TIRVIA, a town of Spain, in the prov. and 81 m. NNE of Lerida, and partido of Sort, in a mountainous locality, near a small affluent of the Noguera-Pallaresa. Pop. 420.

TIRWAN-ANGADY, or **TIRAVANA-ANGADI**, a town of Hindostan, in the prov. of Malabar, 21 m. SSE of Calicut, between an affluent of the Irnada and a lagoon. It is inhabited chiefly by a Mahomedan tribe named Moplays. A decisive victory was here gained by the English over the Sultan Tippu in 1790.

TISBURY, a parish and village of Wilts, $3\frac{1}{4}$ m. SE of Hindon. The church is a spacious building of great antiquity. Area 7,355 acres. Pop. of East T. 945; of West T. 680. Various members of the Arundel family have monuments here.

TISBURY, a township of Duke's co., Massachusetts, U. S., on the N side of Martha's Vineyard, 8 m. W of Edgartown, and 85 m. S of Boston. Pop. including that of the Elizabeth islands, 1,520.

TISCHINGEN, a town of Württemberg, 10 m. NNE of Dillingen. Pop. 1,000. In the neighbourhood is the castle of Trugenhofen, the residence of the prince of Tour and Taxis, to whom the town also belongs.

TISCHNOWITZ, a town of Moravia, 15 m. NW of Brunn, on the l. bank of the Schwarzwawa. Pop. 1,200. It has a woollen manufactory.

TISQUI, a river of Ecuador, in the prov. of Esmeraldas, which runs NW into the Blanco, opposite the mountain of Quindiu, in N lat. $21^{\circ} 30'$.

TISSINGTON, a parish of Derbyshire, $4\frac{1}{4}$ m. N of Ashborne. Area 2,316 acres. Pop. in 1851, 344.

TISTED (EAST), a parish of Southamptonshire, 5 m. S by W of Alton. Area 2,602 acres. Pop. 229.

TISTED (WEST), a parish in the same co., 5 m. SE by E of New Alresford. Area 2,268 acres. Pop. in 1851, 268.

TISZA. See **THEISS**.

TITA (SAINT), a small island in the N. Pacific, in N lat. $63^{\circ} 51'$.

TITAN, a small island of France, in the Mediterranean, on the coast of Provence, the most eastern of the Hyeres group.

TITCHFIELD. See **TICHFIELD**.

TITCHWELL, a parish of Norfolk, 5 m. W by N of Burnham Westgate. Area 4,480 acres. Pop. in 1851, 163.

TITEL, a village of Hungary, in the com. of Bacs, at the confluence of the Theiss and the Danube, 22 m. ESE of Peterwardein. Pop. 2,840.

TITICACA, a lake of South America, on the NW frontiers of Bolivia, situated in the great alpine valley, between the two cordilleras of the Andes, between the parallels of $15^{\circ} 15'$, and $16^{\circ} 35' S$. It is the most considerable of all the lakes of South America. Its figure is irregular, but inclining to oval, with its principal line of direction lying NNW and SSE 170 m. Its greatest breadth is 70 m. The great chain of the Andes, which forms a single and continuous ridge from the most southern extremity of the American continent to the neighbourhood of the tropic of Capricorn, separates into two great ridges near the city of Potosi, in S lat. $19^{\circ} 35'$.

These, after enclosing a vast alpine plain raised 12,000 to 13,000 ft. above the level of the sea, reunite in about $14^{\circ} 8' S$ lat., where they form the Andes of Vilcanote and Cusco. The western of these ridges runs parallel to the shores of the Pacific, and is called the Cordillera of the Coast; the eastern, or that of the interior, is called the Cordillera Real. The intermediate plain is the basin of the celebrated lake T., the physical features of which are scarcely less extraordinary than its history is interesting. The lake is of vast size, having an area, according to Mr. Pentland, of above 5,000 sq. m.; and its depth is not less remarkable, having been sounded to 120 fath., and probably greatly exceeding this depth. It has only one outlet, the Desaguadero, which, after running about 150 m. towards the SW, is lost in a small lake. The heights in the Western Cordillera are chiefly dome or bell-shaped; those in the Eastern are peaked, giving the range generally a serrated form. The descent of both, E and W, is rapid; but that of the Western into the basin of T., is less so than that of the Eastern. The breadth of the former is about 100 m.; that of the latter it is less easy to determine, in consequence of its throwing out many lateral chains on its eastern side, the length of which may be considered portions of the breadth of the main ridge. Excluding these, however, this may be estimated at from 85 m. where narrowest, or under the parallel of $17^{\circ} 58' S$ to above 70 m. where widest, under the parallel of $16^{\circ} 50'$. The entire width of the two ridges, including that also of the basin of Lake T., varies from 200 to 300 m., exclusive of the projecting chains: including them it approaches 500 m.; and the length of this portion of the Andean chain, bounded, as we have already stated, by the 14th and 20th parallels, is nearly 400 m. All the waters from the E face of the Western Cordillera, and all those from the W face of the Eastern one, up to the height of 14,000 ft., flow into Titicaca, and its outlet, the Desaguadero, whence they are carried off by absorption and evaporation, there being no visible outlet for them on either side. But above 14,000 ft. on the Eastern Cordillera, the waters are turned aside by some low ridges of hills, not improbably alluvial deposits, being only a few hundred feet high, and are directed by them to the S; whence they issue to the E in about $16^{\circ} S$ lat., constituting the Mapiri, one of the largest affluents of the great river Beni, itself, with the Mamore, forming the Madera, one of the most considerable affluents of the Amazon. The drainage of a portion of the W face of the Cordillera-Real, is thus to the eastward. On the E shore of the lake, Mr. Pentland found a large agricultural pop. almost exclusively composed of Indians speaking the Aymara language. The lake is navigated by ships; but is subject to storms and tremendous gusts of wind descending from the lofty mountains by which it is surrounded. Ten or twelve rivers, the chief of which are the Asangaro and the Laganillas, and a number of small streams, empty themselves into it; but its only outlet is the Desaguadero already mentioned. Its water, though neither bitter nor brackish, is turbid, and, from its nauseous taste, not drinkable: yet it abounds with fish, particularly two kinds, one large and palatable, called *suehis*, and the other small, insipid, and bony, termed *boyas*. Immense flocks of water-fowl frequent it; and its shores are covered with flags and rushes which serve many purposes of domestic manufacture. On the shores of this inland sea Mango-Capac first appeared to the Peruvians; and, on a few islands near its SE extremity, were accumulated the richest and most sacred objects of the superstition on which he founded his powerful and highly civilized empire.

At the Spanish conquest the greater part of these were thrown into the lake by the despairing but still hostile Peruvians; and Garcilasso de la Vega, himself a descendant of the Incas, gives an astonishing, but not, perhaps, altogether an improbable account of the treasures thus sacrificed.

TITLEY, a parish of Herefordshire, 3 m. NE by E of Kington. Area 1,876 acres. Pop. 375.

TITLINGTON, a hamlet of Northumberland, 6½ m. W by N of Alnwick.

TITLIRBERG, a mountain-range of Switzerland, in the cant. of Unterwalden, on the frontiers of Uri, which attains an alt. of 11,414 ft. above sea-level.

TITMANING, or **DITMANING**, a town of Bavaria, on the Salza, 23 m. NNW of Salzburg. Pop. 1,200.

TITSCHEN, or **NEU-TITSCHEN**, a town of Moravia, 12 m. ENE of Weiskirchen, near an affluent of the Oder. It is a comparatively well-built place, with active manufactures of woollens. Pop. 5,600. —About 8 m. to the SW of it is the village of Alt-Titschein.

TITSEY, a parish of Surrey, 5 m. NE by E of Godstone. Area 1,936 acres. Pop. in 1851, 154.

TITTENHANGER, a hamlet of Hertfordshire, 2½ m. SE by E of St. Alban's.

TITTENSOR, a hamlet of Staffordshire, 4 m. NW by N of Stone.

TITTERIE, the central province of the kingdom of Algiers, under the regime of the dey. It is about 60 m. long by 40 m. broad, extending from the coast of the Mediterranean to the plain of the Bled-el-Jerid, which separates it from the Sahara, and from the river Massafra on the W, to the river Bubarak on the E.

TITTESWORTH, a township in the p. of Leek, Staffordshire. Pop. in 1851, 606.

TITTING, or **DIETTING**, a town of Bavaria, 8 m. N of Eichstadt.

TITTLESHALL, or **TITLESHALL**, a parish of Norfolk, 6 m. SSW of Fakenham. Area 3,364 acres. Pop. in 1851, 615.

TITUL. See **TITEL**.

TIUMEN, a town of Asiatic Russia, in the gov. and 100 m. SW of Tobolsk. Pop. 8,000, chiefly Tartars. It is a place of considerable trade.

TIVDIJA, a small river of European Russia, which flows into Lake Onega on the W side.

TIVERNO. See **BIFERNO**.

TIVERTON, a parish and parliamentary borough of Devonshire, situated at the confluence of the Axe and the Loman rivers, from which circumstance it was anciently called Twyfordtown, or Twofordtown. It stands on the slope of a hill, rising gently towards the N, and consists of four principal streets, which form a quadrangle, enclosing an area of gardens, in the centre of which is a bowling-green. The principal public buildings are the church, the townhouse, assembly-rooms, and the free grammar-school. The ancient ruined castle stands on the W side of the town, on an eminence well adapted for defence. It appears to have been nearly of a quadrangular form, enclosing an area of about an acre. The manufacture of bobinet-lace, serges, druggets, and other woollen goods, employs a large proportion of the pop. Area of p. 17,650 acres. Pop. in 1801, 6,505; in 1831, 9,766; in 1851, 11,144. The burgh returns 2 members to parliament. Registered electors in 1837, 496; in 1852, 651.

TIVERTON, a township of Cheshire, 2 m. S of Tarporley. Area 1,657 acres. Pop. in 1851, 747.

TIVERTON, a township of Newport co., Rhode island, U. S., 1,000 ft. long, on the mainland, opposite to Portsmouth, with which it is connected by

a bridge, 18 m. SE by S of Providence. Pop. in 1850, 3,183; 1840, 4,699.

TIVETSHALL, **St. MARGARET**, and **St. MARY**, two adjacent parishes of Norfolk, 5½ m. NE of Diss. Area of St. Margaret, 1,668 acres. Pop. in 1851, 355. Area of St. Mary, 1,125 acres. Pop. 352.

TIVIOT. See **CHEVIOT**.

TIVISSA, a town of Spain, in the prov. and 28 m. W of Tarragona. Pop. 3,787. It has manufactures of oil, linen, charcoal, wax-candles, and rush-work.

TIVOKEA, an island in the S. Pacific ocean, in 8 lat. 14° 28', W long. 144° 56'. It is low and sandy, of an elliptic form, 18 m. in its longest diameter. A lagoon in the centre is entered from the SW end of the island. The inhabitants are stout made, and of a dark brown colour, and tattoo themselves with the figures of fishes. Their language approaches the Otaheitan dialect, but is more guttural.

TIVOLI, the *Tibur* of the ancients, a considerable town of the Papal states, about 18 m. E by N of Rome, delightfully situated on an eminence sheltered on one side by Monte-Castelli and a circular range of the Sabine mountains, and on the other commanding an extensive prospect over the Campagna-di-Roma. It has a population of nearly 17,000, and, without being in general well-built, contains a good cathedral and several other churches. The neighbourhood affords quarries of excellent stone, of which several of the public edifices of Rome are built; and the waters of the Teverone form by their deposit a kind of stone of no slight interest in the eyes of the naturalist. Not far distant is the small but remarkable lake of Solfatara. The great attraction of the town now, as in former ages, consists in the falls of the Teverone, the ancient *Anio*, which glides gently through the town, till reaching the brink of a rock over which it precipitates itself nearly 100 ft. in one mass, and after boiling up in its narrow channel, rushes through a chasm of the rock into a cavern below. On the summit of the steep bank of the Teverone stands a temple of the Corinthian order, supposed to have been dedicated to Vesta. The remains of several Roman villas, in particular of the *Villa Adriana*, remarkable for its extent and magnificence, attract the antiquary in visiting this place.

TIVY, or **TOWY**. See **TEIFY**.

TIXALL, a parish of Staffordshire, 3½ m. E by S of Stafford. Area 2,352 acres. Pop. in 1851, 221.

TIXOVER, a parish of Rutlandshire, 7½ m. E by N of Uppingham. Area 1,080 acres. Pop. 115.

TIZE, or **TIZ**, a port of Mekran, in Beluchistan, supposed to represent the *Tiza* of Ptolemy. It lies in a valley, 10 m. S of Chinbar, surrounded with steep hills, except on the S, where it is open to the sea.

TIZOIRAS, a river of Brazil, which descends from the W flank of the Cordillera-Grande, and running WNW, flows into the Araguay, on the r. bank, after a course of 180 m.

TIZZANA, a commune and town of Tuscany, in the prov. and 18 m. WNW of Florence, near the r. bank of the Ombrone. Pop. 7,700. It has a trade in silk and wine, the produce of the surrounding fertile district.

TIZZANO, a town of the duchy and 24 m. S of Parma.

TJANJOR, a town of the island of Java, 52 m. SE of Batavia. The surrounding territory is fertile and picturesque.

TJERINGKUN, a considerable fishing village of Java, on the W coast, 102 m. W of Batavia. Pop. 1,800. It is situated at the mouth of a river which is navigable a long way up for small prows. It

was formerly a military post, with a block-house, which was burnt by the British.

TJIDOVEAN, a river of Java, which runs a N course, and falls into the Java sea, in the bay of Bantam. During the rains it is rapid, and scarcely passable.

TKASHIKA, a village of Austrian Galicia, 45 m. S of Chennowitz.

TLACOTALPAN, a town of Mexico, 60 m. SE of Vera Cruz, on an island formed by the Alvarado.

TLAJOMULCO, a town of Mexico, in the state and 9 leagues S of Guadalupe.

TLALPUJAGUA, or **TLAPUKAHUA**, a town of Mexico, in the state of Mechoacan, 52 m. ENE of Valladolid. It is the place where the mine duties of the district are paid, and is inhabited by 600 families of Spaniards, Mestizoes, and Mulattoes, with many families of Indians who labour in the mines.

TLAMANALCO, a settlement of Mexico, in the state of Mexico, 6 m. E of Chalco.

TLAMATH, a river of Oregon and California, which rises in a lake of the same name, and flows W into the Pacific.

TLAPA, a settlement of Mexico, in the state of La Puebla, 138 m. SSE of Mexico.

TLAXCALLA, or **TLASCALLA**, a district and town of the Mexican confederacy. The district, now embraced in the state of La Puebla, is bounded on the N by the state of Vera Cruz; on the E by Oaxaca or Guaxaca; on the S by the Pacific; and on the W by the state of Mexico; and is about 354 m. in length, and from 40 to 150 m. in breadth. It is so fertile in maize, that it received its name from that produce of the soil, *Tlaxcalla* signifying 'The Land of bread.'—The town is situated on the side of a high mountain, 64 m. E of Mexico, on the banks of a small river which runs into the Pacific, in N lat. 19° 19'. When the Spaniards first arrived here, it is said to have contained 300,000 inhabitants; and Acosta affirms that it had a market-place large enough to hold 30,000 buyers and sellers, and that in the shambles were seldom less than 15,000 sheep, 4,000 oxen, and 2,000 hogs. But Gemelli, who visited T. in 1698, says, it was then become an ordinary village, with a parish-church in which hung a picture of the ship which brought Cortes to Vera Cruz. It is now so much reduced that it scarcely contains 5,000 inhabitants, among whom there are not more than 900 Indians of pure extraction.

TLAZASALCA, a town of Mexico, the capital of a jurisdiction of the same name, in the intendency of Valladolid, 70 m. W by N of Mexico.

TLEMSSEN, **TLEMSAN**, or **TREMECHEN**, the most westerly of the three provinces into which the kingdom of Algiers was divided under its deys. On the N it had the Mediterranean; on the E the prov. of Titterie; on the S the Atlas chain; on the W the river Mulavia separating it from Fex. Besides the capital of the same name, it contained the important sea-port of Oran.—The city of T. is situated in the modern prov. and 60 m. SSW of Oran. It was once an important place, and the metropolis of a kingdom; but in 1670, on occasion of a revolt of the inhabitants, Hassan, dey of Algiers, laid it in ruins. It is placed on a rising ground, below some rocky precipices whence issue a number of springs. Its streets are narrow, and the houses seldom of more than one story. It forms an entrepot between Morocco and Fex, and has considerable traffic in consequence. The pop. in 1850 was returned at 9,443. The citadel is a large building. The town still presents remains which can be traced to a Roman origin. In the western part is a large square basin of Moorish workmanship, 200 yds. long, and about half as broad.

TLETCH, a town of Asiatic Russia, on the Ir-tish, 72 m. ESE of Tobolsk.

TLUMASCHAU, or **TLUMASSOW**, a small town of Moravia, on the river March, 12 m. E of Hradisch, and 39 m. E of Brunn. Pop. 1,100.

TMAJE, or **TMI-EL-EMDID**, a village of Lower Egypt, 12 m. SE of Mansura.

TMLAIA, a river of Russia, which rises in N lat. 48° 30', and flows into the Donetz, on the l. bank, after a course of 120 m.

TMULGA, a village of Algiers, 10 m. E of Sinab.

TMUTORAKAN. See TAMAN.

TOA, a river of the island of Porto-Rico, which runs into the harbour of Porto-Rico.

TOBA, a small island in the Eastern seas, near the W coast of Aru, in S lat. 5° 8'.

TOBA (La), a village of Spain, in the prov. and 24 m. S of Guadalupe. Pop. 600.

TOBACCO KEY, a small island in the bay of Honduras, near the coast of Yucatan, in N lat. 16° 45'.

TOBACCO (Point), a cape on the coast of Maryland, U. S., in the river Potomack, 37 m. SSW of Annapolis.

TOBACCO-PORT, a village of Stewart co., in the state of Tennessee, U. S., 60 m. WNW of Nashville.

TOBAGO, one of the British West India islands, in the Windward group. It is about 30 m. in length from SE to NW, and about 12 m. in its greatest breadth; and has its N point in N lat. 11° 25', W long. 60° 32'.

Physical features. The surface of the island is agreeably diversified; no part of it is rugged or impassable, though its NW extremity is mountainous. The prevailing slope is towards the SW. The highest ground has an alt. of 900 ft. above sea-level. The hills are not broken and rugged, as those of St. Vincent's, but regular though steep in ascent and descent. "The scene of nature is on an extensive scale, and gives the idea of a continent rather than an island. It is not alone its vicinity to the Spanish main that suggests this idea. The appearance of the island fully warrants this assumption; and the contiguity of South America only more fully marks its being torn therefrom, and of its being in old times the southern point, or bold promontory of the vast bay of Mexico." Its soil is of different kinds, but in general the mould is rich and black, and fit for producing whatever crops are raised in other parts of the West Indies. The abundance of springs upon the island contributes to its healthfulness, and its bays and creeks are so disposed as to be commodious for all kinds of shipping. Man-of-War bay, Courland bay, Sandy-point, and King's bay, are calculated for vessels of the largest size. Tyrrel's bay, Bloody bay, Mangrove bay, Englishman's bay, Castera's bay, and La Guira's bay, have good anchorage for vessels of 150 tons and under. Halifax bay is fit for ships of 250 tons.—The climate of T. is more temperate than could be expected in an island that is but 11° N of the equator. Another favourable circumstance in its position is, that it lies out of the tract of those hurricanes which so often prove destructive in the other West India islands. Besides producing the different kinds of wood that are to be found in the other West India islands, the Dutch affirm, that both the true nutmeg-tree and the cinnamon-tree, with that which produces the real gum copal, grows upon this island. Indian corn, Guinea corn, pease, beans, French beans, figs, pine-apples, pomegranates, oranges, lemons, limes, plantains, bananas, grapes, guavas, tamarinds, prickly pears, papaws, and a variety of other fruits which are not to be found in Europe, are freely grown. The cocoa-tree

attains great perfection; and musk-melons, water-melons, gourds, cucumbers, and pumpions, are abundantly raised. Wild hogs at one time so greatly abounded upon T., that at least 20,000 of them were annually killed without their number being sensibly diminished. Horses, cows, asses, sheep, deer, goats, and rabbits, probably introduced by the Dutch, have multiplied exceedingly. The birds indigenous to T., or which frequent the coasts, are wild ducks, water-hens, wood-pigeons, turtle and Virginian doves, three varieties of humming birds, blackbirds of yellow and black colours, thrushes, white woodcocks, herons, the pouched pelican, and flamingoes. The sea is stored with excellent fish, particularly turtle of every kind, and mullet.

Commerce, &c.] The principal articles of export from T. are sugar, molasses, and rum. The exports in 1810 were returned at £70,787; in 1845, at £83,412; in 1847, at £119,691; and in 1849, at £53,051. The imports in 1845 were £36,966; in 1847, £34,856; in 1849, £22,925. Nearly the whole trade is with the United Kingdom; but the Azores and Madeira, the United States of America, and the northern states of South America, conduct some commerce with it. In cultivating the soil, the *metayer* system has recently been adopted, and with success, on several estates.—T. is governed by a lieut.-governor, assisted by a legislative council and a house-of-assembly of 16 members. The pop. in 1812 was returned at 470 whites, 250 free coloured persons, and 17,000 slaves; in 1852, it was 13,027.

History.] This island was first discovered by Columbus, in 1498. William, Earl of Pembroke, in 1628, obtained a grant of this island, with that of Barbuda. About 1632, some Zealanders trading with the West India islands, made such a favourable report of T. in particular, that a company of merchants undertook to settle it, and gave it the name of New Walcheren, from one of the islands of their prov. The Spaniards exterminated the new colony. James, duke of Courland, sent a colony to T. who settled upon Great Courland bay, and erected a small fort, with a town. The duke's title was confirmed by a grant from Charles II., but disputed by the Dutch. Upon the extinction of the Kettler family, dukes of Courland, the fief of the island reverted to the crown of England in 1737, and by the treaty concluded at Paris in 1763, it was ceded in full right to Great Britain. In May 1781, a small squadron of ships from Martinique appeared before this island with 1,200 troops, under the command of M. Blanchelande, governor of St. Vincent's, and the island was surrendered on favourable terms. In 1793 it was retaken by the British, by whom it was retained at the peace of Amiens.

TOBAGO (LITTLE), a small island near the NE coast of Tobago. It is about 2 m. long, and 1 m. broad.

TOBAK, a town of Russia, in Bessarabia, 34 m. NNW of Ismail. In 1789 the Russians were defeated here by the Turks, and the place was almost entirely destroyed.

TOBALINILLA, a village of Spain, in the prov. of Burgos and partido of Villarcayo, 39 m. WSW of Vitoria, in the valley of Tobalina, on the r. bank of the Ebro. Pop. 30.

TOBAR, a town of Spain, in the prov. and 15 m. NW of Burgos, near the l. bank of the Hormazuela. Pop. 280. It consists of two parts, distant about 500 paces from one another, and has a parish-church and a priory.

TOBARUELA, a town of Spain, in the prov. and 21 m. NNE of Jaen, and partido of Baeza, in a vast plain covered with vineyards and olive groves. Pop. 105.

TOBAS, an Indian tribe of La Plata, who inhabit the mountains of Tocoora, in the SE part of the prov. of Chaco, between the Pilcomayo, Vermejo, and Paraguay.

TOBAT, a district of the island of Sumatra, in the Battas country. Near its centre is a large lake.

TOBATI, a settlement of Paraguay, 30 m. E of Assumption.

TOBBER, a parish of co. Dublin, 1½ m. NE of

Dunlavin. Area 1,422 acres.—Also a village in the p. of Kilkeroan, co. Galway, 1 m. W of the river Suck. Pop. in 1841, 149.

TOBBERAHEENA, a village in the p. of Abbey, co. Tipperary, near the river Suir, 2½ m. SW of Clonmel. Pop. in 1841, 453.

TOBBERCURRY, a small town in the p. of Achonry, co. Sligo, 3 m. ENE of Banada. Pop. 783.

TOBBERDONY, or **TOBBEREENDONEY**, a village in the p. of Beagh, co. Galway, 4½ m. SSW of Gort. Pop. in 1841, 167.

TOBBERMORE, a village in the p. of Kilkerronaghan, co. Londonderry, 2½ m. SSW of Maghera. Pop. in 1831, 672; in 1841, 525.

TOBBERSCANAVAN, a village in the p. of Ballysadere, co. Sligo, 1½ m. SSE of Collooney. Pop. in 1841, 259.

TOBEL, a bailiwick, parish, and village of Switzerland, in the cant. of Thurgau, 7 m. SE of Frauenfeld. Pop. (Cath.) 1,279. It has a house-of-correction, formerly a rich commandery of Malta.

TOBERMORY, a port on the NE coast of the island of Mull, in N lat. 56° 38', at the head of a sheltered bay, 3½ m. SW of Auliston-point, where Loch-Sunart forks off from the sound of Mull, and 9 m. SE of Ardnamurchan-point. It was built in 1788, at the same time as Ullapool, by the British fishing company, as the site of a fishing establishment, and the rendezvous of the herring-vessels. The harbour or bay is spacious, and almost completely landlocked; and is covered across the entrance, and at a brief distance, by Calve island. There are two excellent quays. As the only town in Mull, and in a large circumjacent district, both Hebridean and continental, it possesses much provincial importance, and is the seat of a considerable domestic trade. Pop. in 1851, 1,547.

TOBI. See **SCOMB**.

TOBIA, a town of Spain, in the prov. and 24 m. SW of Logrono, and partido of Najera, on the l. bank of a small river of the same name, an affluent of the Najarrilla. Pop. 187. It has manufactories of common woollen and linen fabrics.

TOBITSCHAU, or **TOWACOW**, a town of Austria, in Moravia, in the circle of Olmutz, 8 m. WSW of Prerau, on a mountain, near the r. bank of the March. Pop. 1,100, of whom about 100 are Jews.

TOBLACH, or **DOBBIACO**, a town of Austria, in the Tyrol, in the circle of Pusterthal, 11 m. ESE of Prunecken, a little to the N of a small lake of the same name, on the Rienz.

TOBOL, a river of Russia in Asia, which has its source on the frontier of Independent Tartary, on the E side of the S branch of the Ural chain, in the gov. of Orenburg; runs NE; enters the gov. of Tobolok; and after a course of 600 m., joins the Irtysh on the l. bank, near Tobolok. Its principal affluents are the Abouga on the r.; and on the l. the Wei, at the confluence of which it becomes navigable, the Isot, Toura, and Tavda. Its waters near its head are saltish.

TOBOLSK, one of the governments into which Asiatic Russia is divided, forming the western part of Siberia. On the NW the chain of the Urals separates this gov. from European Russia; on the N it is bounded by a vast extent of the Northern ocean, broken into deep bays; on the E the gov. of Yeniseisk and Tomsk; on the S it has the gov. of Omak. This gov., which includes the most of the cultivated part of Asiatic Russia, except along the frontiers, consists almost entirely of a vast and uniform plain, which, however, varies greatly in point of fertility. From the shores of the Frozen ocean, as far south as the parallel of 58°, the surface presents an aspect of dismal sterility: a few

pinces and stunted shrubs are the only produce of the soil, which as we proceed N is found at length to yield nothing but bare moss. Fishing, and the chase of fur-bearing animals, afford the only sources of subsistence or profit. A great portion, on the other hand, of the southerly districts, consists of steppes covered with saline lakes and marshes. The only truly agricultural districts are those on the Tobol and its tributaries, in the lower part of their course, which yield luxuriant crops, and supply with grain not only the tracts to the north, but the govys. of Perm and Orenburg. In respect of mineral wealth, few regions rival the mountains of its western frontier. See article **URAL**. The area of this gov. as now defined is nearly 425,000 geog. sq. m. By the enumeration of 1801, its fixed inhabitants did not exceed 622,422. Of these, 2,017 were returned as Mongols, 17,286 Ostiaks, 273 Tchuwasches, 2,936 Bokharians, 1,993 Tunguses, 2,581 Yakuts, 3,302 Samoyedes, 308 Yakagirs. Besides these were the Cossacks, who were reckoned at about 22,000, and several tribes of wandering Tartars. In 1850 the pop. was estimated at 600,000. The gov. is administratively divided into the 9 circles of T. Beresov, Jalutorovsk, Juhnun, Kurgansk, Tarsk, Tuimen, Tkalinsk, and Turinsk. See article **SIBERIA**.

TOBOLSK, the capital of the above government, and of Asiatic Russia in general, is situated on the river Irtysh, close to its junction with the Tobol, in N lat. 56° 12', E long. 68° 20'. Pop. 20,000. The Russians, when they first took possession of this country in 1587, built here a mere *ostrog* or wooden fort, with the view of keeping the natives in subjection. In 1643, this was burnt to the ground, and they began to erect the present city. It is composed of two parts, the high and the low town. The former is built on an elevated plateau, running parallel to the Irtysh, and at a little distance from it; the latter fills the level space between it and the river. The high town, which occupies the site of the ancient fort, and forms what is properly called the city, contains the residence of the governor, the tribunals, public offices, seminaries, hospital, and the magazines of foreign merchandise. These, with the churches and convents, are all the edifices composed of stone; the rest are of wood. This part of the city is exempt from the danger of inundation; but its inhabitants have to procure water by going to the foot of the hill. The low town, on the contrary, is plentifully supplied with water, but seldom a year passes without its being overflowed. Connected with the lower town is a large suburb, inhabited by Tartars, who are described as in general a quiet orderly race, honest in their dealings, courteous to strangers, and free from those habits of intoxication which form the prevailing vice of the Russian inhabitants. The other residents are in a great measure the descendants of exiles sent hither by the Russian government. The largest colony ever transported hither consisted of the Swedish officers made prisoners at the battle of Pultawa. The most important branch of trade of the city arises from the immense extent of land and river carriage, between European Russia and the frontier of China, which annually concentrates here. The merchants from Europe arrive in spring, with their commodities destined for that distant market; and at the end of summer, the boats return with their cargoes to be transported to Moscow and Petersburg. Merchants from Tartary and Bokhara arrive in the beginning of winter, spend that season at T., and return in spring. The manufactures consist of linens, silk ribbons, reindeer and otter skin dresses, soap, candles, and glass.

TOBOSO (El), a town of Spain, in the prov. and 63 m. SE of Toledo, on a plateau slightly elevated above surrounding marshes. Pop. 2,817. Its insalubrity, and the indolence of its inhabitants have reduced this place, rendered famous by the genius of Cervantes, to one of the most miserable descriptions. It has manufactories of vases for wine, and some wind-mills; but the environs possess little cultivation, and with the exception of a little grain, wine, saffron and barilla are altogether unproductive.

TOBOUAI-MANOU, or **TOUBAI**, an island of the South Pacific, in the group of Society islands, in 8 lat. 17° 28', and W long. 150° 40'. It is about 6 m. in length, and rises in the centre to a considerable height. It appears fertile, but is scantily populated. It was discovered by Wallis in 1797.

TOCA, a town of New Granada, in the dep. of Boyaca, prov. and 9 m. SSW of Tunja, on the road from that town to Santa-Fe-de-Bogota. Pop. 2,500, of whom a large proportion are Indians.

TOCACHI. See **TOACHI**.

TOCAHUNOS. See **TACAHUNAS**.

TOCAIGH, or **TOWAIIHAE**, a bay of the W coast of the island of Hawai-i or Owhyhee, Sandwich islands, in N lat. 20°, and W long. 156°. It is exposed to NW winds, which strike with great violence upon the rocks and reefs by which its banks are surrounded.

TOCALON, a town of New Granada, in the dep. of the Magdalena, and prov. of Carthagena, on the Magdalena.

TOCANCIPA, a town of New Granada, in the dep. of Cundinamarca, and prov. of Bogota, 21 m. N of Santa-Fe-de-Bogota. Pop. 1,100.

TOCANTINS, a large river of Brazil, formed by the confluence of the Almas with its affluent the Maranhão and the Paranatinga, which descend from the Sierra Escalvada and Pyrenees respectively, and unite in 8 lat. 12°. The united stream directs its course first NNE, then NW, and afterwards N, through the district of Paranna; and between those of Tocantins and Nova Beira, at São-João-das-duas-Barras, it enters the prov. of Para, and separates the districts of Xinjutanía and Para; passes Villa-Vicosa; receives the Rio-dos-Bocas; and swelling into a wide estuary, runs between the island of Marajo and the continent, into the Atlantic, which it enters to the E of the embouchure of the Amazon, and between Capes Maguari and Tijioeca, by a mouth upwards of 35 m. in width, and after a total course of about 1,050 m. On reaching Para, 75 m. above its junction with the ocean, it takes the name of that town. Its principal affluents besides those already named are the Manoel, Alvez, and Capim on the r.; and on the l. the Uruguay, and Taracuna.—Also a modern town in the prov. of Goyaz, on the l. bank of the Bacalhao.—Also a town in the prov. of Para, recently erected with the view of promoting the civilization of the Indians.

TOCANTINS-PEQUENO, a river of Brazil, in the prov. of Goyaz, which has its source in the Serra-dos-Viadeiros, and joins the Maranhão.

TOCAYMA, a town of New Granada, in the dep. of Cundinamarca, and prov. of Bogota, 45 m. WSW of Santa-Fe-de-Bogota, and near the r. bank of the Magdalena. Pop. 1,000. It is noted for its thermal springs.

TOCCIA, or **Tosa**, a river of Sardinia, in the div. of Novare, which has its source in Monte Griesio, on the confines of the Swiss cant. of Tecino, and N extremity of the prov. of Ossola; runs S through the valleys of Formazza, Antigorio, and Ossola; passes Domo-d'Ossola; directs its course afterwards SE, enters the prov. of Pallanza; and 4 m. WNW of the

town of that name, throws itself into Lago-Maggiore, on the W bank at the head of a bay which bears the same name. It has a course of about 48 geog. m., and forms several fine cascades. It is crossed several times by the road from Geneva to Milan by the Simplon. At the entrance to the bay of T. are the Borromean islands. Many smaller torrents, on either hand, join it in its course. On the r., the Diveria, descending from Monte-Sempio, and bordered by the Val-di-Vedro, swells it with its waters near to Crevola; at Domo-d'Ossola it receives the Bogna, issuing from the valley of Bugnanco; next, the Ovesca or Mezzavalle, flowing through the valley of Antrona; and finally, the Anza, which has its origin in a small lake on the N side of Monte-Rosa, and descends through the wild and picturesque valley of Anzasca. On the l., the Isorno, rising in Orana-Rossa, forms the valley which bears its name, and issues in the T. at Crevola; and the Trontano, watering the rich valley of Veguzzo, falls into it at Masero. From the lake of Maggiore the royal post-road from Turin and Milan, leading to the pass of the Simplon, ascends the valley of the T., parallel with the river, till it has crossed a fine bridge over the Diveria, near to Crevola; when it turns to the left through the wild scenes of Val-Vedro. From this point an inferior road continues, in line with the T., directly N to Monte Griesio, and a branch also to San-Gottardo. In the descent from Monte-Griesio, the T. forms one of the finest cataracts in all the Alpine regions of Italy. If it fell direct, the perpendicular height would exceed 600 ft.; but its descent is by several leaps, in almost instantaneous succession, from precipice to precipice, until it finally plunges into a deep rocky abyss; its whole course forming one continuous foaming volume, to the extent, probably, of 1,000 ft. The body of water is immense; and, in still weather, its roar is echoed afar, from rock to rock, and from mountain to mountain. At the head of the fall, the embouchure of the torrent is 76 ft. wide; but the gigantic masses that oppose its downward race expand its frantic volume; and looking from below, it presents a triangular form, the width of its base being vastly increased.

TOCCO, a town of Naples, in the prov. of Abruzzo-Citra, district and 18 m. SW of Chieti, and cant. of S. Valentino, near the r. bank of the Pescara, on the slope, and at the foot of a hill. Pop. 8,040. It has five convents, and an hospital.—Also a town in the prov. of the Principato-Ultra, district and 19 m. NW of Avellino, and cant. of Vitulano, on a rock, at the N base of Mount Taburno. Pop. 1,200.

TOCINA, a town of Spain, in the prov. and 15 m. NNE of Seville, and partido of Lora-del-Rio, on the l. bank of the Guadalquivir. Pop. 1,610. It has manufactories of woollen fabrics.

TOCKENBURG. See **TOGGENBURG**.

TOCKHOLES, a chapelry and township in Blackburn p., co.-palatine of Lancaster, 4 m. SSW of Blackburn. Area 2,050 acres. Pop. in 1851, 989.

TOCKINGTON (Lowes), a tything in Almondsbury p., Gloucestershire, $\frac{3}{4}$ m. S by E of Thornbury. Pop. in 1831, 327; in 1851, 448.

TOCKINGTON (Urras), a tything in Olveston p., Gloucestershire, 3 m. S by W of Thornbury. Pop. in 1831, 729; in 1851, 880.

TOCKWITH, a village in Bilton p., Yorkshire, 9 m. W of York. Area 1,610 acres. Pop. 506.

TOCOIOS, a village of Brazil, in the prov. of Minas-Geraes, on the r. bank of the Jequitinhonha, about 100 m. N of Minas-Novas.

TOCONOA, a village of Bolivia, in S lat. 23° 20', W long. 68° 10', 10 leagues SE of Atacama.

TOCQUEVILLE, a village of France, in the

dep. of the Manche, cant. and 3 m. E of St. Pierre-Eglise. Pop. 800.

TOCUJUS, a large uninhabited island of Brazil, near the coast of the prov. of Para.

TOCUYO, a river of Venezuela, which has its source in the Sierra-Rosas, in the S part of the dep. of Barquisimeto; flows NNW to the junction of the Corora, when it takes a NE direction, and after a tortuous course of about 240 m., flows into the Caribbean sea, 20 m. NW of the gulf of Triste. It becomes navigable at the confluence of the Baragua, a distance of 120 m. from its embouchure. Its banks are covered with fine timber.—Also a town in the dep. and 60 m. SW of Barquisimeto, pleasantly situated in a fine plain, enclosed on all sides by lofty mountains, and bathed by the river of the same name. Pop. 7,000. It has two churches, a Franciscan and a Dominican convent, and a college, and straight and spacious streets. It possesses manufactories of woollen fabrics and tanneries, and carries on an active trade in salt, grain, and flour. It is also noted for its bread and fruit. The locality is salubrious, the intensity of the sun's rays being modified by the clouds which frequently overcast its sky.

TODBERE, a parish in Dorset, 5 m. SW by W of Shaftesbury. Area 384 acres. Pop. in 1851, 119.

TODD, a county in the SW part of the state of Kentucky, U. S., comprising an area of 362 sq. m., drained by Elk fork of Red river, and by tributaries of Green river. Pop. in 1840, 9,991; in 1850, 12,268. Its capital is Elkton.—Also a township of Huntington co., in the state of Pennsylvania, 56 m. W of Harrisburg. Pop. in 1850 about 900.

TODDENHAM, a parish in Gloucestershire, 3 m. SSW of Shipston-on-Stour. Area 2,477 acres. Pop. in 1831, 481; in 1851, 462.

TODDIN, a village of the grand-duchy of Mecklenburg-Schwerin, SW of Hagenau.

TODDINGTON, a parish in Gloucestershire, $\frac{2}{3}$ m. N by E of Winchcombe. Area 1,857 acres. Pop. in 1831, 290; in 1851, 189.—Also a parish and market-town in Bedfordshire, 5 m. N by W of Dunstable, including the hamlet of Chalton. Area 5,390 acres. Pop. in 1831, 1,926; in 1851, 2,438. The manufacture of straw-plait affords employment to a considerable number of the inhabitants.

TODES. See **DORIS**.

TODI, a town of the Papal states, capital of a district, in the delegation and 24 m. S of Perugia, on an isolated mountain between a small river of the same name and the Naja, a little above its confluence with the Tiber. Pop. 2,410. It has a cathedral, 12 parish churches and 8 convents. It is the *Tudertum* of the ancients, in the neighbourhood of which Naisies defeated and slew Totila, king of the Goths.

TODMOOS, or **TODRMOOS**, a village of the grand-duchy of Baden, in the circle of the Upper Rhine, to the NE of Schopfheim. Pop. 1,684. It has manufactories of vitriol and alum.

TODMORDEN, a chapelry and market-town in Rochdale p., co.-palatine of Lancaster, 7 m. NNE of Rochdale, including the township of Walsden. The chapelry is intersected by the Rochdale canal, and by the Manchester and Leeds railway, which passes here through the celebrated Summit tunnel. Pop. in 1831, 6,054; in 1851, 7,699. The town, which contains some good houses, is situated in one of the most picturesque valleys in the north of England, surrounded by lofty and precipitous mountains, and watered by the river Calder, which rises on the margin of the forest of Rossendale, at the NW extremity of the township. The houses are irregularly built, being scattered up and down the valley

in a straggling manner. The cotton manufacture is extensively carried on at this place, which possesses, in an eminent degree, the three great requisites for manufacturing prosperity—building materials, coal, and water-communication.

TODOROVO, a town and fort of Turkey in Europe, in Bosnia, in Croatia, 23 m. W of Novi, on a mountain.

TODOS-OS-SANTOS, a river of Brazil, in the prov. of Minas-Geraes, and comarca of Serro, which has its sources in the Serra-das-Safiras, and joins the Mucuri on the r. bank.

TODOS-OS-SANTOS. See **BAHIA**.

TODOS-SANTOS, a bay of California, on the Pacific, in N lat. $31^{\circ} 47'$, W long. $116^{\circ} 27'$, and enclosed on the S by Cape Grajaro.

TODTENHAUSEN, a village of Prussia, in the prov. of Westphalia, regency and circle and 4 m. N of Minden, near the l. bank of the Weser.

TODTNAU, or **TODNAU**, a village of the grand-duchy of Baden, in the circle of the Upper Rhine, 5 m. NE of Schonsau, in the midst of the Schwarzwald, on the Wiesen. Pop. 1,480. It has manufactures of wooden ware, matches, straw-hats, and paper, and carries on a considerable trade. In the environs are mines of silver and lead.

TODWICK, a parish in the W. R. of Yorkshire, $7\frac{1}{2}$ m. SE by S of Rotherham. Area 1,860 acres. Pop. in 1831, 224; in 1851, 660.

TOE, a small river of Afghanistan, which has its source in the mountains near Kohat; flows SW, and after a rapid course of about 40 m., falls into the Indus, on the r. side, opposite the Soheila rocks.

TOE-HEAD, a cape on the SW coast of Lewis, 42 m. SW of Stornoway, in N lat. $57^{\circ} 50'$.

TOE-HEAD, a cape in Co. Cork, projecting southward from the W side of the entrance of Castlehaven, $11\frac{1}{2}$ m. NE of Cape Clear.

TOEJO ISLANDS, a group of 7 high and woody islands off the N shore of Banca, in the Eastern sea, in S lat. $1^{\circ} 6'$.

TOEPLITZ. See **TOPLITZ**.

TOFFALA, an island in the Baltic, off the SW coast of Finland, in N lat. $60^{\circ} 35'$.

TOFT, a parish in Cambridgeshire, 4 m. E by S of Carlton. Area 1,242 acres. Pop. in 1831, 279; in 1851, 360.—Also a township in Knutsford parish, co. palatine of Chester, 2 m. S by E of Nether Knutsford. Area 1,298 acres. Pop. in 1831, 200; in 1851, 241.—Also a hamlet in the p. of Witham-on-the-Hill, Lincolnshire, 8 m. SSW of Bourne. Pop. in 1831, 194; in 1851, 231.

TOFT-MONK'S, a parish in Norfolk, 11 m. SW of Great Yarmouth. Area 2,288 acres. Pop. 421.

TOFT-NEXT-NEWTON, a parish in Lincolnshire, $4\frac{1}{2}$ m. W by S of Market-Raisen. Area 1,298 acres. Pop. in 1831, 74; in 1851, 77.

TOFTES, or **TORT-REES**, a parish in Norfolk, $2\frac{1}{2}$ m. SW of Fakenham. Area 1,184 acres. Pop. 68.

TOFTS (Wesr), a parish in Norfolk, $6\frac{1}{2}$ m. NNW of Thetford. Area 3,051 acres. Pop. in 1851, 191.

TOGA, a village of Spain, in the prov. and 21 m. WNW of Castellon-de-la-Plana, on the r. bank of the Millares.

TOGDA, or **TODGA**, a town and district of Western Africa, 50 m. W of Sigilmessa.

TOGEBAT, a village of Persia, in the prov. of Irak-Arabi, 81 m. N of Isfahan.

TOGGENBURG (Unter and Ober), a long valley in the N of Switzerland, lying between the cantons of Appenzel and Zurich. In length it exceeds 50 m., and is traversed by the river Thur, from which it sometimes takes the name of the Thur-thal. The population, above 50,000 in number, are all

Protestants, and employ themselves partly in agriculture and pasturage, partly in weaving linen and muslin, and spinning cotton for the larger establishments in the towns. The cap. of this district is the small town of Lichtensteig. See **THUR**.

TOGHER, a village in the p. of Clonmore, co. Louth, $4\frac{1}{2}$ m. E by N of Dunleer.

TOGING, a village of Bavaria, on the l. bank of the Altmuhl, 1 m. W of Dietfurt.

TOGOMI, a town of Nifon, in Japan, 80 m. NW of Meaco.

TOHOTCHIE-HOTUN, a town of Chinese Tartary, in the country of Hami, 80 m. NW of Hami-Hotun.

TOIKO, a town of Nifon, in Japan, 80 m. ESE of Yedo.

TOIRAC, a village of France, in the dep. of Lot, 7 m. NE of Cajara.

TOIRAN, or **DOIRAN**, a town of Turkey, in the sanj. and 72 m. S of Ghinestendil.

TOIRANO, a town of the Sardinian states, in the prov. and 5 m. N of Albenga. Pop. 1,416.

TOIROS, a port of Brazil, in the prov. of Rio-Grande-do-Norte, 16 m. N of Natal. Salt, hides, and leather are largely exported from this place.

TOK, a river of Russia, which rises in the Obsh-tshi-syrt, 46 m. NNW of Orenburg; and flowing first NW, and then SW, falls into the Samara, on the r. bank, after a course of 135 m.

TOKA, a town of Hindostan, in the prov. of Aurungabad, in N lat. $19^{\circ} 25'$, at the confluence of the Pera with the Godavery.

TOKAT, a large and commercial city of Asiatic Turkey, situated in the interior of Asia Minor, in the pash. of Sivas, in N lat. $40^{\circ} 7'$. It rises in the form of an amphitheatre, in a deep valley on the banks of the Kizil-Irmak, the ancient *Iris*, flanked by high limestone hills. The streets, though frequently steep, from the unevenness of the ground, are well-paved, but the houses are poor, and chiefly built of mud-dried bricks. The surrounding territory is mountainous, and covered with forests of fir and pine. The chief employment of the place consists in the manufacture of vessels of copper, kettles, candlesticks, &c. with which it supplies the neighbouring provinces; a considerable quantity of blue morocco and silk stuffs is also manufactured here, and there are dyeing and calico-printing establishments. T. is, or rather was, the centre of a very extensive inland trade to and from all parts of Asia Minor. Caravans from Diarbekir arrive in 18 days; from Sinope in 6; from Brusah in 20; from Smyrna in 27. The pop. is stated by Kinneir at 60,000; by some other travellers it has been estimated at 100,000. The majority are Turks, a considerable number Armenians, who have seven churches, and a few Greeks, who have only one church.—The port of T. is Eunieh, 9 m. W by N of Cape Karajik, in N lat. $41^{\circ} 8'$, E long. $37^{\circ} 18'$.

TOKAY, a town of Hungary, in the com. of Theiss, 114 m. ENE of Pest, in N lat. $48^{\circ} 7'$, at the confluence of the rivers Bodrog and Theiss. Pop. 5,700. This town has attained great celebrity for its wine, which is the finest and most expensive in Europe. The vines are raised on a range of low hills called the Hegyallya, about 20 m. in extent. Throughout this district, the grapes are plucked one by one, after they are perfectly ripe, instead of being gathered green, ripe, and rotten, without distinction, and thrown into the press with the stalks, as in most other parts of Hungary. The wine is of three sorts: the essence, or that which runs from the grapes when put into a cask, without artificial pressure. The second sort, called *Ausbruch*, is obtained by applying a slight pressure to the same

grapes; lastly comes the *Maslas*, obtained by greater pressure, but still superior to common wine.

TOKEN-BESSEYS, or **TOUCAMBARO ISLANDS**, a cluster of small rocky islands, lying off the E coast of the island of Bouton, in the Eastern seas, in about 5° 17' 8 lat. They are all of them either connected with, or surrounded by rocky shoals, between which rapid currents set strongly to the eastward, and render the navigation hazardous.

TOKIS, a town of Nifon, in Japan, 40 m. NNE of Meaco.

TOKMAK, a town of Russia, in the gov. of Taurida, 21 m. S of Oriskhov.

TOKOZ, an insular district in the Hungarian com. of Raab, formed by the Raab on the S, and the Rabiniz on the N, commencing to the W of the town of Raab. It is 18 m. in length from E to W.

TOKTONAI, a river of Mongolia, which joins the Murai-Ussu after a course from W to E of 180 m.

TOLA, or **TULA**, a river of Mongolia, which rises on the W flank of the Little-Kental chain; flows WSW, and then NW; and joins the Orkhon on the r. bank, after a course of 240 m.

TOLAGO-BAY, a bay on the NE coast of the N island of New Zealand, in 8 lat. 38° 22', discovered by Cook in 1769. It has from 7 to 13 fath., with a clean sandy bottom and good anchorage, and is sheltered from all winds except the NE.

TOLATOLA, a town on the N coast of the island of Celebes, near Cape Donda. It is a considerable place, with a fine harbour.

TOLBANOS, a village of Spain, in the prov. and 42 m. SE of Burgos.

TOLCSVA, a village of Hungary, in the com. of Zemplin, 12 m. NNE of Tokay.

TOLEDO, a central province of Spain, in New Castile, situated chiefly to the S of the Tagus, between the parallels of 39° 3', and 40° 54'. It is bounded on the N by the provs. of Madrid and Avila; on the E by Cuenca; on the S by Ciudad-Real; on the W by Cáceres. It has an area of 4,215 geog. sq. m. Pop. in 1849, 830,000. Its surface consists partly of mountain-tracts, and partly, towards the centre, of elevated and extensive plains, the soil of which, however, is frequently sandy or chalky, so that water is scarce, and few trees enliven the prospect. Like the rest of Castile, this prov. is mountainous. The Tagus traverses the prov., and the Guadiana approaches its S part. Pease, lentiles, kidney-beans, potatoes, flax, saffron, melons, and oranges, are abundantly grown. Sheep are not numerous, but their wool is of the best quality. Vines, silk, honey, wax, and fruits, are the chief products of this prov. Gold, silver, lead, iron, and copper are mined. The manufactures are trifling, though some articles, such as woollens, silks, soap, earthenware, and sword-blades, are exported.

TOLEDO, an ancient city of Spain, the chief town of the preceding prov., and the see of an archbishop, is situated on the sides and top of a steep hill, bathed by the Tagus, on the E, S, and W sides, in a narrow valley surrounded by lofty mountains, 37 m. WSW of Madrid, and at an alt. of 2,400 ft. above sea-level. Pop. 14,000. The environs are unproductive, and the surrounding hills, by concentrating the sun's rays, render the heat in summer excessive. The houses are generally massive and lofty structures, but crowded; the streets are narrow and steep. The Alcázar is a large structure built with solidity, and decorated with statues. Its central gate, vestibule, court, and subterranean apartments, are entitled to admiration; but being no longer wanted as a princely residence, it has been converted into a factory or working establishment. The cathedral is of great antiquity. It is a Gothic building,

which, from its magnitude, would be magnificent, were not its front too low, and its interior so much divided and subdivided. Its painted windows are of great beauty; and a valuable library is attached to it. There are upwards of 20 churches, besides hospitals, monasteries, and convents in T. The hospital of St. Cruz is an elegant building of the 15th cent., that of St. John, built in the 16th, is equally rich. Among the educational establishments is a military school attended by about 600 cadets, and an ecclesiastical seminary. The university of T., formerly in great repute, had long lost its estimation, and was entirely suppressed in 1807.—The Tagus is said to have been navigable as far as T. in times when the exports of the town were of importance. These chiefly consisted of woollens, stockings, and sword-blades. Woollens, linen, silks, serges, taffeta, church-ropes, oil, chocolate, and leather, are still manufactured; and the sword-blades, so noted throughout Spain, till excluded a century ago from fashionable dress by French swords, are now made in a large building on the banks of the Tagus, 2 m. SW of the city. The secret of tempering them is said to have been recovered, and they still fetch a high price.—T. is a place of great antiquity, and was successively the seat of government under the Goths, the Moors, and the kings of Castile. The Gothic kings fixed their residence here in 567. In 711 it was taken by the Moors, and became the abode, first of a viceroy, and eventually of an independent prince. In 1085 it fell into the hands of the Christians, and became anew the residence of their kings. It was besieged by the Moors in 1109, 1114, and 1127, but without success; at a subsequent date it was less fortunate, having been besieged and taken in 1467 and in 1641. Great part of the town was burned on each occasion, which, with the removal of the government to Madrid, has been the main cause of its decline. T. was formerly the seat of several meetings of the Cortes, and of a number of national church councils.

TOLEDO, a port-of-entry of Lucas co., in the state of Ohio, U. S., on the W bank of the Maumee, 5 m. above its entrance into Maumee bay, and 117 m. N by W of Columbus. Pop. in 1840, 1,222; in 1853, 6,512. The rapid growth of this place has been chiefly owing to its connection with the Wabash and Erie canal, which extends from a point 4 m. below Toledo, to Evansville on the Ohio river, in the state of Indiana, 467 m. The total tonnage arriving at and departing from T. by this canal in 1851, was 250,000 tons, chiefly wheat, flour, and iron.

TOLEGNÓ, a village of the Sardinian states, in the prov. and 2 m. NNW of Bielle. Pop. 1,050.

TOLENTINO, a town of the Papal states, situated on a rising ground bathed by the river Chienti, 12 m. SW of Macerata. Pop. of district 9,500. It is remarkable for a treaty of peace concluded here between Bonaparte and Pius VI. in February, 1797; also for some actions between the Austrians and Neapolitans in the beginning of May 1815.

TOLETHORPE, a hamlet of Rutlandshire, 12½ m. E of Oakham.

TOLFA, a town of the Papal states, 10 m. ENE of Civita-Vecchia. Pop. 1,100. Alum is extensively wrought in the vicinity.

TOLGEN, a village and parish of Norway, in the bail. of Hedemarken, 15 m. SW of Roraas, on the r. bank of the Glommen-elv.

TOLJAPUR, a town of Hindostan, in the district of Aunruggabad, in N lat. 18° 17'.

TOLKA, a village in the p. of Finglass, co. Dublin, on the Tolka rivulet, ½ m. SSE of the village of Finglass. Pop. in 1841, 275.

TOLKEMIT, a town of W. Prussia, near the

Frische-haff, 12 m. NE of Elbing, and 44 m. SW of Königsberg. Pop. 2,300.

TOLLAND, a parish of Somersetshire, 3 m. NNE of Wiveliscombe. Area 824 acres. Pop. 147.

TOLLAND, a county in the N of Connecticut, U. S. Area 337 sq. m. Pop. in 1840, 17,980; in 1850, 19,946. Its cap., of the same name, 18 m. NE by E of Hartford, had a pop. of 1,410 in 1850.—Also a post-town of Hampden co., Massachusetts, 104 m. WSW of Boston. Pop. 600.

TOLLARD-ROYAL, a parish of Wiltshire, 11½ m. S by E of Hindon. Area 2,807 acres. Pop. 574.

TOLLEN-SEE, a lake in the grand-duchy of Mecklenburg-Strelitz, formed by a river of the same name, which rises 6 m. NNW of New-Strelitz, and after its issue from the lake, flows N and NW, by New Brandenburg and Treptow, and falls into the Peene near Demmin, after a course of 50 m. The lake or expansion of the river is 7 m. in length from NNE to SSW.

TOLLER-FRATRUM, a parish in Dorset, 8 m. E by S of Beaminster. Area 500 acres. Pop. 54.

TOLLER-PORCOURUM, a parish in Dorset, 7 m. SE by E of Beaminster. Area 3,143 acres. Pop. 527.

TOLLERTON, a parish in Notts, 4 m. SE of Nottingham. Area 1,240 acres. Pop. in 1831, 149; in 1851, 157.—Also a township in Alne p., Yorkshire, 4½ m. SSW of Easingwold, crossed by the Great North of England railway. Area 2,340 acres. Pop. in 1831, 529; in 1851, 551.

TOLLESBURY, a parish in Essex, 7½ m. ENE of Maldon. Area 10,638 acres. Pop. in 1851, 1,193.

TOLLESHUNT-DARCY, a parish in Essex, 6 m. NE by E of Maldon. Area 3,371 acres. Pop. 792.

TOLLESHUNT-KNIGHTS, a parish in Essex, 7 m. NE of Maldon. Area 2,079 acres. Pop. 871.

TOLLESHUNT-MAJOR, or BACKINGHAM, a parish in Essex, 5 m. NE by E of Maldon. Area 2,344 acres. Pop. in 1831, 428; in 1851, 479.

TOLLO, a town of Naples, in the prov. of Abruzzo-Citra, 8 m. E of Chieti. Pop. 2,000.

TOLMEIN, a town of Illyria, 40 m. N of Trieste, near the l. bank of the Isonzo. Pop. 500.

TOLMEZZO, a town of Austrian Italy, in the deleg. and 25 m. NNW of Udina. Pop. 2,000. It has considerable manufactures of linen, and a cotton-spinning mill.

TOLNA, a comitat or county of Hungary, lying to the W of the Danube, between the parallels of 46° 7' and 46° 50', between the coms. of Veszprim and Stuhlweissenburg on the N; and Baranya on the S. It has an area of nearly 1,400 sq. m., with 180,000 inhabitants, descended from Magyars, Rascians, Bohemian Slavonians, and Germans. With the exception of a few low ridges or hills chiefly in the S, it consists entirely of level ground, and is traversed by the Sarvis, and the canal of that name. Its chief products are corn, wine, tobacco, and fruit; and it is in general fertile. The chief town of the co. has for some time been Simontornya.—Its former cap. of the same name, is situated on the r. bank of the Danube, 139 m. SE of Presburg, and 73 m. S of Buda. Pop. 3,000.

TOLO-BAY, a large bay on the E coast of the island of Celebes, between the parallels of 1° 30' and 3° 5' S, very broad at its entrance, but growing narrower towards the bottom.

TOLOZYN, or TOLOZIN, a town of Russia, in the gov. and 42 m. NW of Mohilev, near the l. bank of the Dneux.

TOLOMETA, a village of Tripoli, on the coast of Barcah, in N lat. 32° 48', 72 m. NE of Bengazi, the representative of the ancient *Ptolemeta*.

TOLOSA, a town of Spain, the chief place of

Guipuzcoa, in the prov. and 15 m. S of San-Sebastian. Pop. 8,000. It is situated in a pleasant valley at the confluence of the rivers Oria and Arages. Its streets are tolerably wide and well-paved, and its houses large and comparatively well-built. It has manufactures of nails, horse-shoes, kitchen-utensils, agricultural implements, and sword-blades; also some tanneries.—Also a village of Portugal, in the prov. of Alemtejo, 12 m. NNW of Crato.

TOLOX, a town of Spain, in the prov. and 30 m. W of Malaga, at the foot of the Sierra-Nieve.

TOLPUDDLE, a parish in Dorset, 7 m. ENE of Dorchester. Area 2,039 acres. Pop. in 1851, 354.

TOLSTONOSKOI, a fort of Asiatic Russia, in the gov. of Tobolsk, on the Yenisei, 280 m. NNW of Turuchansk.

TOLTEN, a river of Chili, which has its rise in a lake at the W base of the volcano of Villarrica; runs N, and then W; and enters the Pacific, after collecting the waters of several other rivers, 7 leagues W of Port Imperial, in S lat. 39° 11'.

TOLU, a town of New Granada, in the prov. and 60 m. S of Cartagena, on the E coast of the gulf of Morosquillo. It has a good harbour; and the country around abounds in grain, and in the tree from which is extracted the celebrated balsam of Tolu.

TOLUCA, a town of Mexico, situated at the foot of the Nevado-de-Toluca, in N lat. 19° 16' 19", 28 m. SW of Mexico, in a valley 8,800 ft. above the level of the sea.—The Nevado has an alt. of 2,370 toises = 5,051½ yds.

TOLVA, a village of Spain, in the prov. and 45 m. ESE of Huesca. Pop. 790.

TOLVE, a town of Naples, in the prov. of Basilicata, 8 m. NE of Potenza. Pop. 3,400.

TOLZ, a town of Bavaria, on the Isar, 26 m. S of Munich. Pop. 3,100. It has iron and saltpetre works, and a considerable trade in agricultural produce.

TOM, a river of Russia in Asia, in the gov. of Tomsk, which has its source in the district of Kouznetz; runs NW; passes Kuznetz and Tomak; and after a course of upwards of 800 m., joins the Obi on the l. bank, 27 m. from Tomak. Its waters abound with fish.

TOMAC, a creek of Australia Felix, in the district of Western Port, which flows into the Great Swamp.

TOMACHPOL, a town of Russia in Europe, in the gov. of Podolia, district and 27 m. NNE of Tzekinovka, on the r. bank of the Rouzava.

TOMAGAN, a town of New South Wales, in the co. of St. Vincent, on a creek of the same name, an affluent of Broulee harbour.

TOMAH, a mountain of New South Wales, in the co. of Cork, in the Carmarthen chain. It is visible from the Sydney lighthouse.

TOMAHAWK, an island near the N coast of Van Diemen's Land, in Ringaroom bay, co. of Dorset.

TOMAKOVKA, a town of Russia in Europe, in the gov. and 51 m. SSW of Yekaterinoslav, and district of Alexandrovsk, on a river of the same name, which, after a course in a generally SSW direction of 45 m., joins the Dnieper, on the r. bank.

TOMALPIN, a mountain of New South Wales, in the co. of Northumberland.

TOMANISI, a district and town of Japan, in the island of Nifon, and prov. of Mimasaka.

TOMARES, a village of Spain, in the prov. and 3 m. NW of Sevilla, on the r. bank of the Guadalquivir. Pop. 172.

TOMARI, a headland of New South Wales, in the co. of Gloucester. It consists of a line of lofty cliffs, and forms the SE point of Port-Stephens.

TOMARIN, a town of Japan, in the island of Ku-siu, and the prov. of Satsuma.

TOMAS, a town of Nubia, in the Barabras territory, on the l. bank of the Nile, opposite Derr. It consists of an assemblage of detached houses, intermingled with plantations of date-palms.

TOMASZOW, a town of Poland, in the gov. and 69 m. SE of Lublin, and obwod of Hrubieszow. Pop. 2,900. It has extensive manufactories of porcelain and earthenware, and carries on an extensive trade in wisniak and matinnik liqueurs, prepared from honey and fruit.—Also a town in the gov. of Masovie, obwod and 28 m. SSW of Rawa, on an elevated and salubrious plateau, in the midst of extensive forests, and to the l. of the Pitica, a navigable river which forms a communication between the Vistula and Baltic, and at the confluence of the Wolborka. Pop. 5,000. It is small, but well-built, and has two churches, a Catholic and a Protestant, and a synagogue. It possesses manufactories of calico and fine cloth, yarn-mills, dye-works, printing-mills, extensive iron-works, &c., and carries on an active trade. In the environs are mines of iron, and quarries of lime and free-stone. The advantageous situation of this town renders it one of rapidly increasing importance.

TOMB, or **TOOM**, a parish $5\frac{1}{2}$ m. SW of Gorey, in co. Wexford. Area 6,979 acres. Pop. 2,087.

TOMBARO. See **NEW IRELAND**.

TOMBE (LA), a commune of Belgium, in the prov. of Hainaut and dep. of Kain. Pop. 550.

TOMBECEUF, a village of France, in the dep. of the Lot-et-Garonne, cant. and 6 m. NNW of Monclar, on a mountain. Pop. 2,900.

TOMBEBOUE, a village of France, in the dep. of the Lot-et-Garonne, cant. and 8 m. SSE of Ste. Livrade. Pop. 1,455.

TOMBEL, a commune of Belgium, in the prov. of Hainaut and dep. of Ellezelles. Pop. 127.

TOMBERGEN, a commune of Belgium, in the prov. of Brabant and dep. of Lennich-Saint-Marlin. Pop. 415.

TOMBES, a commune of Belgium, in the prov. of Namur and dep. of Moset. Pop. 366.

TOMBIGBEE, a river of the United States, formed by the confluence of several streams in Tishamingo co., in the state of Mississippi; flows S through Lowndes co.; enters the state of Alabama, and, after a course of 80 m., is joined by the Black Warrior, a river of nearly equal size; thence it pursues a meandering course to the S, and joins the Alabama, when the united stream takes the name of Mobile. It has a total course of nearly 500 m., and for 9 months in the year is navigable for steam-boats to Columbus.

TOMBLAINE, a village of France, in the dep. of the Meurthe, cant. and 2 m. ESE of Nancy, on the r. bank of the Meurthe, which is here crossed by a ferry. Pop. 534. It has a cotton-spinning, and a fulling-mill, a manufactory of cloth, and tile and lime-kilns.

TOMBORO, a volcano of the island of Sumbava, in the Sunda archipelago. A terrible eruption of this mountain occurred in 1815, when 12,000 persons were destroyed. The report of its outbreak was audible at the distance of nearly 900 m.

TOMBOS, an island of the Nile, in the Mahas territory, a little to the SE of Hannek. It is well-cultivated. On the r. bank of the river opposite are several ruins.

TOMBROUK, a commune of Belgium, in the prov. of West Flanders and dep. of Limogne. Pop. 487.—Also a commune in the prov. of West Flanders and dep. of Monscron. Pop. 414.

TOMBUCTOO. See **TIMBUCTU**.

TOME-DO-MAR (SAN), a town of Spain, in the prov. and 11 m. WNW of Pontevedra, at the entrance of the Uria into the bay of Arosa. Pop. 865.

TOME-DEL-PIE-DEL-PUERTO (CONCAJO-DE-SANTO), a town of Spain, in the prov. of Segovia, and partido of Sepulveda. Pop. 567. It has a parish-church and a customhouse.

TOMELLOSA, a village of Spain, in the prov. and 18 m. E of Guadalajara, and partido of Brihuega, on the l. bank of the Tajuna. It is well-built, and has a fine public square. Pop. 650. It has manufactories of linen, and an oil-mill.

TOMELLOSO, a town of Spain, in the prov. and 54 m. ENE of Ciudad-Real, and partido of Alcazar-de-San-Juan, in an arid plain. Pop. 1,020. It is well-built, but depends upon wells for its supply of water. Baskets are its chief article of manufacture.

TOMEPEÑA, a settlement of Ecuador, in the prov. of Jaen-de-Braconoros, on the l. bank of the Tunguragua. The environs are fertile in tobacco and cotton.

TOMFINLOUGH, a parish in co. Clare, containing the town of Newmarket-on-Fergus, and the village of Boherroan. Area 6,736 acres. Pop. in 1831, 4,053; in 1841, 4,401.

TOMGRANEY, or **TOMEREN**, a parish in co. Clare, containing the villages of Scariff and Tomgraney. Area 14,181 acres. Pop. in 1831, 5,568; in 1841, 6,113. The greater part of Lough O'Grady lies within the p.; and the surface-elevation of this lake has a height of 122 ft. above the level of the sea.

TOMHAGGARD, a parish of co. Wexford, $4\frac{1}{2}$ m. W by S of Broadway. Area 2,180 acres. Pop. in 1831, 723; in 1841, 774.

TOM-HO, a river of China, which rises on the frontier of Shen-si, and flows SSW through Sechen to the Kia-ling, which it joins on the l. bank, after a course of 100 m.

TOMIEH, a small town of Upper Egypt, 15 m. S of Siut.

TOMINA, a district of Bolivia, in the dep. of Charcas, bordering eastward on the Chiriguano, a nation of independent Indians. It is a mountainous country, in the valleys of which are some sugar plantations; its higher parts afford pasturage to cattle and horses. The rivers which water the district flow into the Cochabamba, and it is separated from Santa-Cruz-de-la-Sierra by the Rio-Grande, which joins the Mamore.—Its capital, of the same name, is an inconsiderable place, 55 m. E of Chuquisaca.

TOMISCANING. See **TEMISCAMING**.

TOMISVAR, a small port of European Turkey, in the sanj. of Silistria, situated on an inlet of the Black sea. It is supposed to be the representative of the ancient *Tomi*, the scene of Ovid's exile.

TOMLUK, a town of Hindostan, on the r. bank of the Rupnar, 42 m. SW of Calcutta. In the vicinity are large salt-works.

TOMOGUY, an island in the Eastern seas, in 8 lat. $0^{\circ} 15'$, E long. $127^{\circ} 4'$. It is shaped like a horse-shoe, the hollow forming a bay; and is about $2\frac{1}{2}$ m. in circuit.

TOMOR, or **TOMOROS**, a mountain of Albania, in the sanj. of Avlona, in N lat. $40^{\circ} 37'$.

TOMORINDSHA, a town of European Turkey, situated in the mountains between the towns of Prespa and Elbasan. It is inhabited by Albanians.

TOMOS, a village and pass of the Carpathians, between Transylvania and Wallachia, 6 m. S of Cronstadt. It is defended by a redoubt, and is watered by a small rivulet, an affluent of the Wiedenbach.

TOMPKINS, a central town of the state of New York, U. S., comprising an area of 580 sq. m.,

watered by Fall and Six-mile creeks and Cayuga inlet, affluents of Cayuga lake, and intersected by the Cayuga and Ithaca railroad. The surface is hilly, but fertile in grain and grass. Pop. in 1840, 37,948; in 1850, 38,738. Its cap. is Ithaca.—Also a township of Jackson co. in the state of Michigan, 24 m. S of Lansing, drained by Grand river and Sandstone creek. Pop. in 1840, 209; in 1850, 623.—Also a township of Delaware co., in the state of New York, 22 m. SW of Delaware. It has a hilly surface, is drained by Mohawk and W branch of Delaware river and its tributaries, and by tributaries of the Popacton branch of the Delaware, and intersected by the New York and Erie railroad. Pop. in 1840, 2,035.

TOMPKINSVILLE, a village of Castleton township, Richmond co., U. S., in the state and 6 m. S of New York, on the SE part of Staten island. It is noted as the quarantine station of New York, and contains an extensive lazaretto. Pop. in 1840, 1,400.—Also a village of Monroe co., in the state of Kentucky, 153 m. SSW of Frankfort, on a branch of Big Barren river. Pop. in 1850, 240.

TOMREGAN, a parish of co. Cavan. Area 10,677 acres. Pop. in 1831, 4,118; in 1841, 4,212. The summit of Legavrag in this p. has an alt. above sea-level of 1,279 ft. The considerable lakes Annagh and Kilwilly lie on the E boundary of the Cavan section; Lough Togher lies on the S.

TOMSEH, a village of Asiatic Turkey, on the Euphrates, 70 m. W of Diyarbekir.

TOMSK, a government of Asiatic Russia, lying between the parallels of 49° and 60°; and bounded on the NW and N by Tobolsk; on the NE and E by Yeniseisk; on the S by China; and on the W by the gov. of Omsk. The Little Altai chain and its ramifications cover the S part of this gov., which is wholly within the basin of the Obi, and is watered by the Biia, the Alei, the Tom, the Shulym, the Chany, and the Sumy. The N part of this gov. is altogether a wild and desolate region; towards the S cultivation commences. The pop. is about 350,000, Russians, Cossacks, Tartars, and Ostiaks.

TOMSK, the capital, is situated on the r. bank of the Tom, about 25 m. from its junction with the Obi, in N lat. 56° 29' 39". Nothing can be more irregularly constructed than the old and lower part of the town; but the upper and more modern section contains some good houses. The kremlin, a fortress constructed in the 17th cent., is now almost in ruins; within its circuit, however, are the cathedral church, the tribunals, the treasury, and the magazines. There are nine churches, two monasteries, and several mosques. The greater part of the inhabitants, about 10,000 in number, subsist by commerce, for which the place is very advantageously situated, being on the great line of rivers which connect Tobolsk with the Chinese frontier and the eastern part of Siberia. It is the centre also of the trade in brandy, which is brought hither from distilleries on the Tobol and the Iset, and thence distributed to the countries to the eastward. Besides Russians, the place contains a great number of Tartar, Bucharian, and Kalmuck merchants.

TOMU, a port of Nifon, in Japan, 115 m. SW of Meaco.

TOMYSL (Nau), a village of Prussia, in the reg. and 34 m. WSW of Posen.

TON, or **Tox-shun**, a city of China, of the second rank, in Yan-nan, in N lat. 26° 39'.

TONALE, a mountain at the NE extremity of the Austro-Italian, prov. of Bergamo, on the frontiers of Tyrol, in N lat. 46° 5'. A new road was commenced in 1853, which is to connect Lombardy with the Tyrol, through the defile of Tonale, sit-

uated at 6,250 ft. above the level of the sea. It is to supersede the old road over the Stills, which is upwards of 8,000 ft. above the level of the sea, and is often impassable for months together on account of the snows.

TONAMY, a town of Nifon, in Japan, 155 m. NW of Jedo.

TONARA, a town of the Sardinian states, 12 m. E of Busachi. Pop. 2,240.

TONAWANDA, a village of New York, U. S., 12 m. N of Buffalo.

TONCO, a village of the Sardinian states, in the division and 22 m. WNW of Alessandria, near the l. bank of the Versa. Pop. 2,000.

TONDA, or **TONRA**, an ancient town of Bengal, situated opposite to the ruins of Gour, but divided from them by the Ganges, in N lat. 24° 49', E long. 88° 15'. In 1564, Soliman-Shah, of the Shere-Shah dynasty, fearing the unhealthy situation of Gour, made this place the cap. of his united kingdom of Bengal and Bahar. It retained this dignity till 1592, when Man-Sing transferred the seat of government to Rajmahal. It has now dwindled to a mere village, frequently confounded with Taunda, a manufacturing town of Oude.

TONDELLA, or **BASTREIROS**, a town of Portugal, in the prov. of Beira, comarca and 12 m. SW of Viseu. Pop. 2,400.

TONDER, or **TONDERN**, a town of Denmark, in the duchy of Sleswig, 30 m. S of Ribe, in a low territory on the Widaa, which is here crossed by a bridge. Pop. 2,800. It is enclosed by old walls. There are here several schools, an hospital, and a house-of-detention. The principal manufacture is that of lace; bonnets, hosiery, woollen and linen fabrics, and tobacco are also manufactured.

TONDI, a town and port of Hindostan, in the Carnatic and district of Dindigul and Madura, at the mouth of the Valgam and opposite the NW coast of Ceylon.

TONDIMAN, a zemindary of Hindostan, in the presidency of Madras, and prov. of the Carnatic, bounded on the N by the prov. of Tanjore, and on the E by the bay of Bengal. It is to a great extent covered with jungle, and, except towards the S, possesses little fertility. It is governed by a chief, who takes the name of Tondiman, and has at all times maintained the strictest adherence to the British government. Its chief place is Podocatta.

TONDJA, a river of Turkey in Europe, in Rumelia, which has its source in the sanj. of Sophia, 44 m. N of Philippopoli, on the S side of the Balkan chain, and near the confines of Bulgaria; runs first E, then SSE, through the sanj. of Tchirmen; and after a course of about 165 m., joins the Maritza, on the l. bank, a little below Adrianople. The principal places on its banks, besides Adrianople, are Kezanlik, Janboli, and Jenidge-Kizilaghadj.

TONDO, a town of the Philippine island of Luçon, on the Pasig, nearly opposite to Manila. Pop. 15,000.

TONDON, a town of Mandahuria, in the prov. and 510 m. ESE of Sagalin-Oola, on the r. bank of the Amour, at the confluence of a river of the same name.

TONG, a chapelry and village of Yorkshire, 6 m. WSW of Leeds. Pop. in 1851, 511.—Also a township of Birstall p., Yorkshire. Area 2,644 acres. Pop. in 1851, 2,797.

TONGA. See **FRIENDLY ISLANDS**.

TONGATABU, an island in the S. Pacific, one of the southern group of the Friendly islands, in S lat. 21° 4', W long. 175° 28'. It is 20 m. in length, by 10 m. wide at its broadest part, and is very low in surface; the only part which can be seen from a ship in the offing, is the NE point; and it is only

60 ft. above the level of the sea. The soil is prolific, and consists of a fine rich mould, free from stones, except near the beach where coral rocks appear above the surface. At a distance the surface seems entirely clothed with trees, amongst which the tall cocoa-palms raise their tufted heads above all the rest. Of cultivated fruits, the principal are plantains, of which there are fifteen varieties. Several plants grow here which are not known at Otaheite, especially shaddock. The only quadrupeds, besides hogs, are a few rats and dogs. The pop. was reported to be about 9,000 in 1850, of whom 5,000 were Protestants, and 600 Roman Catholics. In 1844, on the death of the king of the Tonga group, George, king of the Haabai or Haval group, became king of the three groups composing the Friendly islands. This island was discovered in 1643, by Tasman, a Dutch navigator. It has since been visited by different navigators; by Cook in 1773, and in 1777 by Prowse; in 1787, by Edwards; in 1791, by Messrs. D'Entrecasteaux and Huon; by the missionary ship, Duff, in 1797; by the *Favourite*, in 1840; and by *Meander*, in 1850.

TONGATAVA, an island of the S. Pacific, in the group of Friendly islands. It is the principal of a cluster of islands to the S of the island of Pylstaert. It is low and surrounded by coral reefs. It was discovered by Deppes.

TONGE, a parish and village of Kent, $1\frac{1}{2}$ m. E of Milton. Area 1,883 acres. Pop. in 1831, 226; in 1851, 242.—Also a hamlet of Lancashire, 2 m. NE of Great Bolton. Pop. in 1811, 1,226; in 1851, 3,881.—Also a township of Lancashire, $5\frac{1}{2}$ m. NNE of Manchester. Area 367 acres. Pop. in 1851, 3,831.—Also a hamlet of Leicestershire, $5\frac{1}{2}$ m. NE of Ashby-de-la-Zouch.—Also a parish of Salop, 4 m. E by S of Shiffnall. Area 3,464 acres. Pop. 511.

TONGE (OUDE), a village of Holland, in the prov. of South Holland, cant. and 14 m. SE of Goedereede, in the island of Over-Flakke. Pop. 1,500. About 3 m. NW is the village of Nieuwe Tonge. Pop. 1,200.

TONGERLOO, a department and commune of Belgium, in the prov. and 26 m. ESE of Antwerp, and arrond. of Turnhout, watered by the Wimpe. Pop. of dep. 1,558. It has distilleries and breweries.—Also a department and commune in the prov. of Limburg and arrond. of Tongres. Pop. 585.

TONGORA, a small port of Peru, in the dep. of Truxillo, 15 m. WSW of Sechura, in S lat. $5^{\circ} 41'$.

TONGOUZLEK. See *DRENZEL*.

TONGOY. See *TANGUY*.

TONGRE-NOTRE-DAME, a department and commune of Belgium, in the prov. of Hainault, and arrond. of Mons, watered by the Hunelle. Pop. of dep. 808; of com. 606.

TONGRES, or **TONGEREN**, a department, commune, and town of Belgium, in the prov. of Limburg, and arrond. of the same name. Pop. of dep. 5,981. The town is 12 m. SW of Maestricht, on the *Jaar*. It was formerly enclosed by walls, of which some remains still exist; and has a college and several tanneries. The trade consists chiefly in pigs and grain. In the vicinity is a mineral spring noted by Pliny. This town returns two deputies. T. is supposed to have derived its origin from an ancient fortress in the territory of the Eburii, named by Augustus, *Tongri*. After rising to a place of considerable importance, it was ruined by Attila in 498. It was subsequently devastated by the Normans in 881, and after numerous changes of masters, fell finally into the hands of the French, in 1677.

TONGRES-SAINT-MARTIN, a department and

commune of Belgium, in the prov. of Hainault, and arrond. of Mons; on the *Blanche*. Pop. 172.

TONGRINNE, a department and commune of Belgium, in the prov. and arrond. of Namur. Pop. of dep. 1,011. The village is 7 m. WNW of Namur, near the l. bank of the *Ligne*. Pop. 400.

TONG-SEU. See *PLAU*.

TONGUE, a parish on the north coast of Sutherlandshire; bounded on the N by the North sea; on the E, SE, and S, by Farr; on the SW by Edderachy, having a length from NNE to SSW of 20 m., and an area of about 120 sq. m. The coast, measured in a straight line, extends 10 m., and is in general high and rocky. The *Kyle-of-Tongue* strikes off from the sea at Eilean-na-roan, and penetrates the parish $8\frac{1}{2}$ m. SSW, with a mean breadth of about $1\frac{1}{2}$ m. A lofty semicircular range of hills rises boldly and suddenly from the ocean, and sweeps quite round the *Kyle-of-Tongue*, forming the enclosed valley into a stupendous amphitheatre. On its W side it commences with Ben-Hutig, 1,845 ft. above sea-level; runs along in the rugged, trackless, boggy, mountain waste of the *Moin*; and terminates not far from the head of the *Kyle*, in the sublime Ben-Hope. Wood, natural and planted, covers about 700 acres. The lands in tillage comprise only about 1,000 acres. The village of Tongue or Kirkiboll is pleasantly situated on the slope of a hill, about 1 m. S of Tongue-house, and 44 m. from Thurso. Pop. of p. in 1801, 1,348; in 1821, 1,736; in 1851, 2,041. Houses in 1851, 872.

TONIAK, a river of Japan, in the island of Nifon, and prov. of Musasi, which runs S, and after a course of about 90 m., throws itself into the bay of Yedo, at the town of that name.

TONIKAKI, an island of the N. Pacific, near the N coast of the island of Celebes, in N lat. $5^{\circ} 31'$, E long. $117^{\circ} 17'$.

TONK, a town of Hindostan, in the prov. of Ajmir, 64 m. S of Jeypur. It stands in a triangular hollow, of which two sides are formed by hills, and the third by a substantial wall. It is of considerable extent, and is well-built of stone.

TONKER, or **DOUNGAR-DZOUNG**, a town of Tibet, in the prov. of Kam, near the E bank of Lake Napatu, near its outlet into the *Kin-cha-keang*.

TONKIN. See *TONGKIN*.

TONMARUP, a parish of Sweden, in the prefecture of Christianstad, and haerad of Jaeresta. It has quarries of black marble.

TONNA, or **GRAVENTONNA**, an amt or bailiwick and market-town of the duchy of Saxe-Coburg-Gotha, principality and 11 m. N of Gotha, on a river of the same name, near the Unstrut. Pop. 1,300. It has two castles, an old and a new, and possesses manufactories of tobacco, and a mineral spring. Pop. of amt 4,130.

TONNAY-BOUTONNE, a canton, commune, and town of France, in the dep. of the Charente-Inferieure, and arrond. of St. Jean-d'Angely. The cant. comprises 9 coms. Pop. in 1831, 4,456; in 1846, 4,759.—The town is 9 m. WNW of St. Jean-d'Angely, on the r. bank of the Boutonne. Pop. 1,142. It has an active trade in grain, wine, and brandy. On an adjacent hill are the ruins of an ancient fortress.

TONNAY-CHARENTE, or **CHARENTE**, a canton, commune, and town of France, in the dep. of the Charente-Inferieure, and arrond. of Rochefort. The cant. comprises 10 coms. Pop. in 1831, 9,714; in 1846, 10,624.—The town is 3 m. E of Rochefort, pleasantly situated on the r. bank of the Charente, which is here crossed by a ferry. Pop. in 1846, 3,304. It is the residence of several foreign consuls, and has an exchange, and a well-frequented port.

It possesses manufactories of home-grown sugar, and several tile and brick kilns. Its trade consists chiefly in brandy, wine, grain and seeds, flax, salt, timber, tartar, minium, iron, coal, coal-tar, wax, &c. Its principal imports from England are coal, wrought steel, sharpening stones, and fine wool. The port is capable of affording safe harbourage, even at low water, to 200 vessels of the large size.

TONNDORF, a village of Saxe-Weimar, 3 m. W of Berka. Pop. 540.

TONNEINS, a town of France, in the dep. of Lot-et-Garonne, situated on the Garonne, which is here crossed by a suspension-bridge, 10 m. SE of Marmande. Pop. 4,468. It is a well-built place, with a few handsome public buildings. Its manufactures are of snuff and tobacco, and articles of woollens and cordage. It has a considerable transit trade by the river in hemp, corn, wine, and brandy.

TONNERRE (MONT), or DOMMARSBERG, a mountain of Bavaria, on the l. bank of the Rhine, at the N extremity of the Vosges chain, 12 m. NE of Kaiserslautern. It has an alt. of 682 metres = 745 yds. above the level of the Rhine. The French gave the name of this mountain to a department which comprehended the greater part of the electorate of Mentz, the Lower palatinate, the bishoprics of Spire and Worms, and several counties and lordships. At the congress of Vienna, it was divided between Austria and Hesse-Darmstadt; the latter receiving the N part, the former the southern or larger division, which was afterwards ceded to Bavaria.

TONNERRE, a town of France, in the dep. of the Yonne, situated on the Armançon, 20 m. E by N of Auxerre. It is well-built, and contains a magnificent hospital. Its manufactures consist of glass, pottery, and hats; and it has a traffic in the wine of the vicinity, known by the name of Vin-de-Tonnerre.

TONNING, or TONNINGS, a town of Denmark, in the duchy of Sleswick, on the r. bank of the Eyder, 30 m. SW of Sleswick, and 11 m. from the mouth of the river, in N lat. 45° 19'. Pop. 2,700. It has become, since the opening of the canal of Kiel, a place of activity: many vessels from the Baltic are also laid up here for the winter. The depth of water in the harbour is only 10 ft. at high water. The town has also an active traffic in corn, and other country-produce raised in the surrounding district called the Eiderstedt. In August, 1854, a railway was completed between this port and Flensburg, a distance of about 40 m. By this line, T., situated in the extreme W of Denmark, is brought into connexion with the Baltic. The line runs past Husum, containing about 5,000 inhabitants, principally occupied in cattle-feeding. From Husum a branch extends to Rendsburg, formerly a border-fortress between Holstein and Sleswick, where it forms a junction with the Kiel and Altona line, thus becoming the direct route to Hamburg. Until lately, Denmark and Northern Europe could only be reached from London by the long rail and sea route *via* Hamburg, or the still longer one *via* Hull to Copenhagen, a distance of 785 m., the voyage alone occupying 8½ days at least; while to reach Hamburg, the traveller being then distant from Copenhagen nearly 800 m., usually takes about 55 hours. On the other hand, from London to T. can be accomplished in from 30 to 34 hours; and from thence to Hamburg in six hours; while to Copenhagen it will be reduced to not more than 150 m.

TONNOMALA, one of the smaller Friendly islands, 11 m. S of Annamuka.

TONNOY, a village of France, in the dep. of Meurthe, 12 m. SSE of Nancy. Pop. 600.

TONQUIN, TUNQUIN, or TUNQUIN, an extensive region of South-Eastern Asia, at present comprehended in the Cochinchinese empire. According to the best authorities, it lies between the parallels of 17° and 23° N lat. and the meridians of 101° and 108° E long.; and is 420 m. from N to S, and from 400 to 450 m. from E to W. It is bounded by Laos on the W; by China on the N; on the E by the Chinese sea; and on the S by Cochinchina. The name *Tonquin* signifies 'the Court of the east.' The country known in Europe by the name of Tonquin, is properly named Nuoc Annam. Cochinchina is sometimes named *Dangtrung*, which signifies 'the Internal kingdom;' while Tonquin is called *Dangnay*, or 'the External kingdom.' The region properly called Tonquin anciently formed part of the Chinese empire; but on the Mogul invasion of China in the 18th cent., the Chinese governors of the south took the opportunity of setting up the standard of independence, and in this manner several distinct kingdoms were created, the sovereigns of which, however, continued to acknowledge a nominal vassalage to the throne of China. Among these, the Tonquinese princes gradually assumed a greater degree of independence; and about 1553, are said to have subdued Cochinchina. For some time before and after the above era, the sovereigns of T. were assisted by a succession of hereditary prime-ministers named *chovas*, similar to the Mahratta peshwas, or 'the Mayors of the Palace' in France under the second dynasty. T. was finally conquered by the Cochinchinese sovereign, about 1800, and has ever since been ruled by a viceroy delegated from the seat of government.—It is divided into 11 provinces, four of which are named provinces of the east, west, north, and south, according to their bearings from the capital, which is situated in the middle of them. The others are Hu-Tien-Kuong, Hu-Huong-Hoa, which border on China; Hu-Then, Hu-Kasbang, Hu-Thank, Hu-Nghe, one part of which forms the frontier to Cochinchina, and another to Laos, and the province of Jen-Quang, which, properly speaking, is only a part of the province of the east under a different name. The province of Xunam forms the centre of the kingdom, and is situated in the middle of those named after the four cardinal points. Ba-king or Ki-ho, the capital, is situated about 40 leagues from the sea, upon the banks of the great river, San-Koy, in 21° N lat., and is said to contain about 40,000 inhabitants. Among the other towns are Hanring, Tranhane, Causang, Vihoang, and Hunnam, in which latter town the Dutch had formerly a factorv.

Physical features.] On the N and NW this country is mountainous. On the side next China, a ridge of high mountains runs along the frontiers of Kang-su and Yun-nan, in a winding course of more than 500 m., forming a natural boundary, and presenting only one pass which is fortified with a high wall. On the frontiers of Cochinchina and Laos, the country is also hilly, but not so much so as in other quarters. The lower part of T. is a level country,—so much so that the principal part of the maritime provinces have been gained from the sea. The land still continues to gain upon the sea in this quarter, which may be accounted for by the immense quantities of mud and other substances brought down by the inundations from the mountainous districts, where the heavy rains carry off the soil. The western provinces are watered by seven large rivers, which unite their waters about 40 m. above the capital, and form a large lake or inland sea, whence the water again issues in numerous branches, and enters the bay of Tonquin by

several mouths. The parent-stream of this vast body of water is the Hoti-Kiang or Song-koï of the Tonquinese, which rises in the NW part of Yunnan, and which, after running a S course of more than 500 m., falls into the gulf of T., forming a delta of which the Domea is the chief branch.

Climate and productions.] Although T. is situated within the tropics, yet its vicinity to the sea on the one hand, and being surrounded on the N and E with high mountains, render the temperature comparatively cool and pleasant. During the months of January and February, the cold is very perceptible; for then the winds blow from the northward, and, issuing from the frozen deserts of Siberia, bear the cold of the frigid zone into regions within the tropics. From September to March the air is pure and healthy; from March to September it is less so, particularly in the months of April, May, June, and July. During this part of the year the monsoons blow; though these winds are by no means so regular here as in the more westerly parts of India. The only difference of the seasons is wet and dry. The rains are most violent from May till August, because the sun then approaches the tropic of Cancer, and brings along with him, in his advance, dark clouds which descend in dreadful torrents. The inundations caused by the heavy rains are often sudden and destructive; in the upper and mountainous districts they sweep away rocks, soil, trees, and every thing within the reach of their current; but on the low lands the waters spread, and do no damage beyond covering the country with water, at which time a rich soil is deposited on the ground which greatly fertilizes it. On the low grounds the soil is rich and fertilized by the inundations, which render the cultivation easy; and the return is always such as to reward the husbandman richly for his labour. Where there is a constant supply of water—which is generally the case throughout the low country—two crops are raised in the year; towards the mountainous districts, where the land is poorer, only one crop is obtained. Rice is the chief article of produce, and the principal object of agriculture. This valuable plant, after having been made to shoot in troughs placed in the houses, is sown very thick, in well-watered beds, which are afterwards levelled as exactly as possible. It soon springs up; and, in six weeks, is transplanted stem by stem, into other fields. In about three months from the time it is transplanted, it is ripe, and fit to be cut. Maize is abundant, and different species of yams and leguminous plants. Sugar-cane also attains perfection in this country; but the Tonquinese are not so skilful refiners as the Cochin Chinese. T. produces all the fruits common to the tropical countries of India; bananas, plantains, pine-apples, guavas, passas, and sapadillas. Mulberry-trees are abundant, and are here valuable as they supply food for the silk-worm. The only European fruit-trees that thrive are the plum, the pomegranate, the citron, and the orange. The tea plant is said to be plentiful, but of an inferior quality.—Among the domestic animals are oxen and buffaloes, which are only used for labour; the people never kill or eat them, though not prohibited doing so by religious views. Hogs are very numerous, and poultry is plentiful. In the forests, stags, deer, and wild boars abound; tigers are also numerous, and of great strength, and wild elephants. White termites are very numerous and destructive.—Peacocks, quails, a species of partridge peculiar to the country, and a few others, form the leading members of the ornithological catalogue. Mosquitoes are numerous and troublesome, particularly near the sea-coast; but during the northern monsoons,

the country is in a great measure cleared of these tormentors.

Commerce, &c.] The Chinese at present conduct the principal part of the commerce of T. Formerly the Portuguese and Spaniards, and the Dutch and English, had a considerable share; but the trade of Europeans with this country has long been nearly annihilated. The articles of interior commerce are the nuts and fruit of the areca, fruits, cotton in the pod, spun cotton, linen, and cloth made from bark. The exports are raw or wrought silk, such as gauzes, programs, or strong stuffs, linen made from the bark of trees, which is a very fine and neat material, different works in mother-of-pearl and ratan, all kinds of small furniture, ebony, ivory, tortoise-shell, cinnamon, copper, cotton, and various other valuable articles. Gold and silver occur in this country, and might be extensively wrought if the inhabitants were possessed of knowledge and industry sufficient to explore and conduct the mines. The only coin which they have in circulation, are a few pieces of gold which they obtain from China and Japan, and a copper coin from the former country. They receive in return for their exports from the Chinese, various medicinal drugs, fine tea, porcelain, fine silk stuffs, linen, sugar powdered and candied, wheat and barley flour, iron and copper kitchen utensils, iron, spices, cloves, nutmegs, cinnamon, dried preserves, hemp, flax, silk, wax, and cotton, glass-ware, iron-ware, small looking-glasses, telescopes, white glass bottles, and glass or paste beads. From Europe, or the European settlements in the East, they receive tanned ox-hides, which, as leather is very scarce, is in great demand, woollen stuff cloths, which are in much esteem, painted linens of India, broad linen, and cotton cloths. T. is most advantageously situated for commerce; and might supply a great part of Europe with articles much sought after from the East. It also borders upon the richest provinces of China, by which means it might command some of the finest productions of that vast empire, and in return, the manufactures of Europe might find a wider market.

Population.] The total pop. of T. has been computed by the missionary Bissachere at 18,000,000, but certainly this estimate greatly exceeds the reality, and he furnishes no account of the facts upon which he grounds his opinion. It is calculated, that one-tenth of the inhabitants of Lower T. live constantly on the water. The men are well-made and healthy; but there seems to be a general defect in the eye-sight, which is weak. They bear a strong resemblance, in physical characteristics, to the Chinese, from whom, no doubt, many of them are descended. The inhabitants of many of the mountainous districts are represented as little better than savages. The Tonquinese nation, though subjects of the same empire, are in fact composed of different races of men, whose habits and dispositions are widely dissimilar. The houses of the more civilized are raised about 7 ft. from the ground, and placed on posts; under the floor, which is made of canes, the cattle are lodged. The only fire-place, or kitchen, is a square of about four ft. covered with clay; there is no chimney, nor any other ventiduct to let out the smoke, which the people endure without any inconvenience, and even consider a benefit to their dwellings. Fishermen and those employed in the inland navigation live on the canals and rivers, in a manner similar to the Chinese, in cabins built on boats, and fastened to the shore. Polygamy is tolerated and common in T., but the woman who is first married, or whose parents are of the highest and wealthiest rank, always re-

tains the precedence. Each province has its capital; a city of the first class, named *tow*; one of the second class, or *chow*; and one of the third class, or *huen*. Each burgh with the dignity of *xa*, conveying a certain local jurisdiction, has its limits marked upon a tablet, which is exposed to public view. Each *xa* is divided into villages; each village into quarters; and if the place is considerable, these are again divided into other subdivisions. Three villages compose a *xa*, and three *xa*s a *tong*, the chief of which is elected by a plurality of voices of the *xa*s. Each *xa* may indeed be considered as a kind of popular republic, in which women have no part, nor young men below 20 years of age: after that age the latter have a vote and right of suffrage in the assemblies. Criminal affairs are adjudged by the king only. Sentence of death is seldom passed; and the few executions which take place are always performed in the capital.—The more respectable Tonquinese follow the tenets of Confucius. They acknowledge one supreme deity, who directs, governs, and protects every thing; they believe in the immortality of the soul, and in transmigration. At an early period the Jesuits sent missionaries to T., and had made considerable progress, until being suspected of carrying on a secret political correspondence with the Cochín-Chinese, they were expelled. Missionaries were subsequently sent into T. by Louis XIV. under the character of commercial agents. Numerous obstacles, however, still present themselves to the propagation of the Christian religion in T., among which is the obligation imposed on every subject of contributing to the support and worship of the national idols, and to appear at certain festivals which have both a civil and religious character. The Jesuits tolerated their usages, from which it is not easy to detach the natives, but the court of Rome disapproved of this indulgence. See article ANNAM.

TONS, a village of Spain, in the prov. and 30 m. SW of Valencia, on the l. bank of the Xucar. Pop. 1,200.

TONSBERG, a port of Norway, situated on a bay of the Baltic, in N lat. 59° 15', 43 m. SSW of Christiania. It is a very ancient town, but is ill-built, and consists only of wooden houses. Its harbour, though difficult of access, is capable of receiving large vessels. Its trade consists in the export of timber, and in a retail traffic with the surrounding country. In 1536, it was laid in ashes by the Swedes, and it has never recovered this disaster.

TONSE, or **TONSA**, a river of Hindostan, which rises in the mountains of Bogilcund, and running E and NE, falls into the Ganges, 20 m. below Allahabad, after a course of 100 m.

TONYNS ISLANDS, a cluster of small islands in the Eastern seas, near the SW coast of Celebes, in 8 lat. 5° 31'.

TOOM, or **TOOMVRIE**, a parish of co. Tipperary, 6 m. N by W of Tipperary. Area 12,276 acres. Pop. in 1831, 3,566; in 1841, 4,277.

TOOM, a parish of co. Wexford. Area 5,980 acres. Pop. in 1831, 1,805; in 1841, 2,087.

TOOMAVARRA, a village in the p. of Aghnameadle, co. Tipperary, 8½ m. SW of Moneygall. Pop. in 1831, 790; in 1841, 855.

TOOME, or **TOOME-BRIDGE**, a village in the p. of Dunane, co. Antrim, on the r. bank of the Bann, 5 m. W by N of Randalstown. A noble bridge of 9 arches here, takes the thoroughfare across the Bann, and gives the village its name.

TOOMIES, or **TOMIES**, a mountain in co. Kerry, forming the N part of the western screen of the Lower lake of Killarney. It rises precipitously from the edge of the lake, is clothed over the base

and the lower declivities with noble masses of wood, and shakes down from one of its sides the superb waterfall called O'Sullivan's Cascade.

TOPACURO, a small river of Brazil, in the province of Ceara, which runs N, and enters the Atlantic, between the Josavi and the Iguarasu.

TOPAHOT, a village of Asiatic Turkey, in the pash. of Sivas, 9 m. W of Inzghat.

TOPANFALVA, a town of Transylvania, on the l. bank of the Aranyos, 30 m. NW of Karlsburg.

TOPAS, a village of Spain, in the prov. and 15 m. N of Salamanca.

TOPAYOS. See **TAPAYOS**.

TOPCLIFFE, a parish and village of the N. R. of Yorkshire, situated on the banks of the Swale, 5½ m. SSW of Thirak. Area of p. 15,565 acres. Pop. in 1811, 1,327; in 1851, 473. The church is a large building; and the village lying on the great N road, has, or rather had, several good inns.

TOPCROFT, a parish of Norfolk, 4½ m. E by S of St. Mary-Stratton. Area 1,875 acres. Pop. 477.

TOPDALS-ELV, a river of Norway, which rises in the bail. of Nedenæs; runs SE, and then SSW; and flows into a small bay to the E of Christiansand, after a course of 75 m.

TOPERTZ, **TOPOREZ**, or **TOPOREC**, a village of Hungary, in the comitat of Zips, 2 m. NW of Podolincz, at the foot of the Carpathian chain, on a small affluent of the Poprad.

TOPESFIELD, a parish in Essex, 5 m. S by W of Clare. Area 3,320 acres. Pop. in 1851, 1,051.

TOP-GALLANT ISLANDS, a cluster in Investigator group, South Australia, to the E of Flinder's Island. They are little more than mere rocks.

TOPINO, a river of the Papal states, which descends from Monte Santo in the N part of the delegation of Spoleto; runs first N; enters the delegation of Perugia; turns N; waters Foligno, and after a course of about 36 m. joins the Tiber, on the l. bank, 6 m. SSE of Perugia. It receives the Calcignolo and Chiascio, on the r., and on the l. the Timia.

TOPL, **TOPLA**, **TOPLA**, or **TOPOLYA**, a river of Hungary, which descends from the Carpathian chain on the frontier of Galicia, in the comitat of Saros; runs first E past Bartfeld; then SSE; separates Kurmia from the comitat of Zemplin; traverses the S part of that comitat, divides the comitats of Ujhely and Mihaly; and after a course of about 84 m., throws itself into the Ondeva, on the r. bank, 9 m. N of Zemplin.

TOPLICZA, a village of Transylvania, in the comitat of Hunyad, 7 m. N of Deva, in the midst of mountains, on a small affluent of the Maros.

TOPLIKA, or **TOPLICE**, a town of Civil Croatia, in the comitat and 9 m. SSE of Warasdin, on the l. bank of the Bednya. It has a glass-work. It is noted for its thermal springs, the *Aque-Javae* of the Romans.

TOPLITZ, **TEPLITZ**, or **TEPLICE**, a town of Bohemia, in the circle and 17 m. NW of Leitmeritz, at the foot of the Erzgebirge, in a fine valley, at an alt. of 728 Parisian ft. above sea-level. Pop. 2,750. It has a castle with fine gardens, and possesses manufactories of linen, woollen, and cotton fabrics. It is noted for its mineral baths, varying from 60° to 120° in temp. In the environs are quarries of limestone and coal-mines.

TOPLITZ, or **TOEPLITZ**, a village of Austrian Illyria, in the gov. and 32 m. SE of Laibach, and circle of Neustadt, on a small affluent of the Gurk. It has two thermal springs.

TOPLITZ, or **NEUHAUS**, a village of Styria, in the circle of Cilly, on the San. Pop. 60. It is noted for its thermal springs and baths.

TOPLITZA, a river of Turkey in Europe, in Ser-

via, which has its source in the sanj. of Kruchovatz, on the confines of Albania, 12 m. N of Pristina; passes near Krattovo, and a village of the same name; thence flows NNE through a fertile plain, and in the environs of Kurchumba and Orkup; forms for a short distance the W frontier of Bulgaria; and after a course of 84 m. joins the Eastern Morava, on the l. bank, 9 m. W of Nissa.—Also a town in the sanj. of Semendria, 16 m. E of Valliero.

TOPLYA. See **TEPL.**

TOPOLI, a town of Russia in Europe, in the gov. and 80 m. E of Kharkov, and district of Koupiansk, on the r. bank of the Oskol.

TOPOLIAS. See **COPIAS.**

TOPOLNITZA, a town of Turkey in Europe, in Little Wallachia, in the district of Mehenditzi, 8 m. NE of Neu-Orsova, on a small river of the same name, an affluent of the Danube.

TOPONAR, a town of Hungary, in the comitat of Schimegh, 4 m. NE of Kaposvar, between two small affluents of the Kapos.

TOPOREZ, or **TOPOROZ.** See **TOPERTZ.**

TOPOROW, a town of Galicia, in the circle and 23 m. NNW of Zloczow, on an island of the Styr. It has two churches, a Catholic and a United Greek.

TOPOZERO, a lake of Russia in Europe, in the W part of the gov. of Arkhangel. It is 58 m. in length from NW to SE, and 9 m. in medium breadth. It forms several bays, especially on the NE, where an extensive peninsula runs in a NW direction. It contains several islands.

TOPRA-KALEH, or **TURBA-KALEH,** a town of Armenia, 69 m. ESE of Erzerum, on the slope of a hill, commanded by a rock on which is an earthen fortress, flanked with towers, and armed with several small pieces of cannon. It is ill-built, and contains about 500 families, chiefly Turkish and Armenian.

TOPSFIELD, a township and village of Essex co., in the state of Massachusetts, U. S., 20 m. N by E of Boston. It is hilly, and is watered by the Ipswich river. Pop. in 1840, 1,059; in 1850, 1,171.—Also a township of Washington co., in the state of Maine, 235 m. NE of Augusta, bordered on the N by a large lake. Pop. in 1840, 188; in 1850, 268.

TOPSHAM, a port of Devonshire, 4 m. SE of Exeter, at the head of the estuary of the river Exe, at its junction with the Clyst. Area 1,740 acres. Pop. in 1801, 2,748; in 1831, 3,184; in 1851, 3,377. The town, which consists of one long street of irregular breadth, is almost surrounded by the rivers Clyst and Exe, the latter of which here suddenly widens its bed, and is navigable for ships of several hundred tons. The quays and wharfs are spacious and convenient. A considerable trade is still carried on here, and steamers ply regularly between T. and London; but nearly the whole of the Exeter shipping now proceeds through the canal navigation direct to Exeter. There are bonded warehouses here for all foreign goods except wine and spirits, East India goods, and tobacco. Ship-building and the manufacture of ropes and chain cables are carried on to some extent.

TOPSHAM, a township, and with Wiscasset and Warren, capital of Lincoln co., in the state of Maine, U. S., 28 m. SSW of Augusta, bounded on the E by the Kennebec, and on the S and W by the Androscoggin river, and intersected by the Kennebec and Portland railroad. Pop. in 1840, 1,883; in 1850, 2,010.—Also a township of Orange co., in the state of Vermont, 23 m. SE of Montpelier. It has a diversified surface, with little fertility, and is watered by the head streams of Wait's river. Pop. in 1840, 1,745; in 1850, 1,668.

TOR, or **TUR,** a port of Arabia, situated near the head of the gulf of Suez, in N lat. 28° 14'. E long.

33° 41'. It was in former times a place of great importance, in the trade between Syria and India; but since Suez became the emporium of the Red sea, T. has sunk into a village; and only such vessels as are prevented by strong N winds from reaching Suez, unlade their cargoes at T., whence they are conveyed by land to their destination. The harbour is formed by a reef of coral rocks, and to the northward by a low point of land, on which is placed a beacon. The place is inhabited by Greeks and Bedouin Arabs; and the monks of Sinai have a convent here. This is the nearest point from which a traveller can proceed from the gulf to Mount Sinai, a journey of 2 days on camels. The width of the gulf opposite T. is 17 m. The best water on the coast of the Red sea is obtained here.

TOR, a village of Spain, in the prov. and 90 m. NE of Lerida.

TORA, a village of Egypt, on the Nile, 8 m. S of Cairo.—Also a village of Spain, in the prov. and 50 m. NE of Lerida. Pop. 900.—Also a town of Naples, in the prov. of Terra-di-Lavoro, 24 m. NE of Gaeta. Pop. 1,200.

TORAK, a town, or rather two contiguous villages of Hungary, in the com. of Torontal, on the Bega.

TORAL-DE-LOS-GUZMALA, a village of Spain, in the prov. and 27 m. S of Leon, on the r. bank of the Esla. Pop. of partido, 2,000.

TORANO, a village of Naples, in Calabria-Citra, 15 m. NNE of Cosenza.—Also a village of Abruzzo-Ultra Ima., 12 m. NNE of Teramo.

TORBALA, a town of Hindostan, in the prov. of Lahore, on the l. bank of the Dur river, near its junction with the Indus, in N lat. 84° 12'.

TORBALI, a town of Asiatic Turkey, in the sanj. and 52 m. SW of Boli, situated in a valley between two high mountains, on the Terekli-su. Pop. 2,800.

TORBAY, a bay on the E coast of Newfoundland, in N lat. 47° 48'.—Also a town and bay on the SE coast of Nova Scotia, in N lat. 45° 8'.—Also a bay on the coast of W Australia, in S lat. 35° 5'.

TOR-BAY, a picturesque and commodious bay on the coast of Devon, 5 m. NE of Dartmouth. It is about 12 m. round, and is formed by two capes, about 4 m. apart. An almost semicircular recess, it is a secure and general rendezvous for vessels in westerly winds. Berry-head, the W part of the bay, is in N lat. 50° 44', W long. 28° 14'. Along the W and SW coast, the shores are composed of red sandstone, the strata of which have been much disturbed and hollowed out by the action of the sea. On the E side this rock is covered by argillaceous shale, containing fragments of encrinurites. The hills immediately around the N shores are composed of transition limestone, varying in colour, and containing numerous remains of shells and madrepores. From the variety of its tints, and the high polish of which it is susceptible, this marble is much used for ornamental purposes. In the bay the Prince of Orange and Marshal Schomberg landed in 1688.

TORBEC, a town of Hayti, in the dep.-du-Sud, 5 m. WSW of Cayes.

TORBOCK, or **TARBOCK,** a township in Huyton p., co.-palatine of Lancaster, 3½ m. S by W of Prescot. Area 2,447 acres. Pop. in 1851, 681.

TORBOLE, a village of Austrian Lombardy, in the prov. and 6 m. SW of Brescia.—Also a village of the Tyrol, 7 m. SW of Roveredo.

TOR-BRYAN, a parish of Devonshire, 4 m. SW by S of Abbot's Newton. Area 2,010 acres. Pop. in 1831, 257; in 1851, 229.

TORCAZ, a village of Spain, in the prov. and 24 m. E of Madrid. Pop. 700.

TORCE, a village of France, in the dep. of May-

sone, 4 m. E of Sainte-Suzanne.—Also a village in the dep. of Sarthe, 6 m. N of Montfort-le-Rotrou.

TORCE, a town of Hindostan, in the prov. of Behar, the capital of a small district of the same name, in N lat. 23° 42'.

TORCELLO, a town of Austrian Lombardy, in the prov. of Venice, situated on an island of the same name, in the marshy district called the Lagunes, 6 m. NE of Venice. Pop. 9,000. It is extremely unhealthy, and many of the inhabitants leave the town during the summer season. It is the see of a bishop, whose cathedral is the only building of consequence in the place.

TORCHIARA, a village of Naples, in Principato-Citra, 12 m. NW of Il Vallo. Pop. 580.

TORCOLA, an island of the Adriatic, near the S coast of Lesina, in N lat. 43° 4'. It is about 8 m. in length, low in surface, and occupied by a few shepherds whose flocks find scanty herbage upon it.

TORCY-LE-GRAND, a village of France, in the dep. of Seine-Inferieure, 3 m. E of Longueville, on the Arques. Pop. 700.

TORCZYN, a town of Russia, in the gov. of Volhynia, 41 m. N by W of Brody in Galicia.

TORDEHUMOS, a town of Spain, in the prov. and 21 m. WNW of Valladolid. Pop. 1,200.

TORDERA, a town of Spain, in the prov. and 27 m. S of Gerona. Pop. 1,440.

TORDESILLAS, a town of Spain, in the prov. and 18 m. SW of Valladolid, on the r. bank of the Douro, over which there is a fine bridge of 10 arches. Pop. 3,500. It is pleasantly situated, and for a Spanish town, well built. Its chief articles of manufacture are leather and coarse woollens.

TORDOMAR, a village of Spain, in the prov. and 27 m. SSW of Burgos, on the r. bank of the Arlanza. Pop. 570.

TORDOUE, a village of France, in the dep. of Calvados, 4 m. NW of Orbec. Pop. 1,200.

TORELLA, a town of Naples, in the Principato-Ultra, 3 m. WNW of San-Angelo. Pop. 3,800.—Also a town in the prov. of Sannio, 9 m. NW of Campobasso.

TORELLO (SAN-FELIU-DE), a town of Spain, in the prov. and 39 m. NNW of Barcelona, at the confluence of the Ges and the Ter. Pop. 2,000. It has manufactories of woollens and cottons, paper, turnery-ware, and combs.

TORENO, a village of Spain, in the prov. and 21 m. NE of Villafraanca, on the Sil. Pop. 400.

TORGAU, a town of Prussian Saxony, in the reg. of Merseburg, on the l. bank of the Elbe, 46 m. NW of Dresden, and 66 m. S by W of Berlin. Pop. 9,000. Its fortifications, formerly limited to a castle called Hastenfels, have been extended of late years, and now embrace the town itself. It has manufactories of woollens, leather, and soap; and a considerable traffic in wood and grain. 'T. has been the scene of several sanguinary conflicts, the most remarkable of which was the victory obtained here on the 11th November, 1760, over the Austrians, by Frederick II. of Prussia.

TORGEISKOL, a village of Asiatic Russia, in the gov. of Irkutsk, 24 m. NNW of Merohinsk.

TORGELOW, a town of Prussian Pomerania, on the river Ucker, 9 m. N of Pasewalk. Pop. 1,000.

TORGET, a small island of Norway, in N lat. 65° 30'. Its cliffs attain an alt. of 2,000 ft.

TORGOVITZA, a town of Russia, in the gov. of Kiev, 45 m. N of Olviopol.—Also a town in the gov. of Volhynia, 18 m. SSW of Doubno, on the r. bank of the Ikva.

TOR-HEAD, a headland of co. Antrim, on the S side of Murlough bay, 5 m. N of Cushendun. It is the point of the Irish mainland nearest to Scotland,

being directly opposite the Mull of Kintyre. It consists of mica slate, with subordinate beds of limestone, sienite, and felspar porphyry, and may be regarded as a projection of the cliffs of Cushleak, being immediately overhung by the hill of Carnlea, whose summit has an alt. above sea-level of 1,250 ft. The scenery of the headland itself and of the bay which it screens, is singularly grand.

TORIESDALE HEAD, a cape on the N coast of Scotland, in N lat. 58° 30'.

TORLJA, a village of Spain, in the prov. and 15 m. NE of Guadaluza. Pop. 760.

TORITTO, a town of Naples, in the Terra-di-Bari, 15 m. NNE of Altamura. Pop. 2,550.

TORJOK, a considerable town of Russia, in the gov. and 42 m. WNW of Twer, on the r. bank of the Tvertza. Pop. 15,000. It is a neat and regularly built place, with active manufactories chiefly of leather and leather articles, and a considerable trade in the agricultural produce of the surrounding district. A recent traveller describes the appearance of the country between T. and the city of St. Petersburg, as being dreary and monotonous in the extreme. After the first 10 or 12 versts beyond the capital, he says, "we entered a tract of forest which stretched with few intervals for more than 100 m. The whole distance indeed exhibits little but a succession of bleak open country, and thick forest. The road runs generally in a straight line, and one proceeds for miles together along a dead flat, without a human habitation; on each side, a boggy space of 50 or 100 yds. wide is kept clear of trees, beyond that lies an impenetrable mass of birch and fir wood growing up so thickly that the production of fine timber is impossible. The only part of the country through which we passed where the view is at all attractive, is in the immediate neighbourhood of Valдай, a small town about 200 versts from T."

TORKALI, a town of Russian Georgia, in Daghestan, 15 m. NW of Tarki, on a stream of the same name.

TORKINGTON, a township in Stockport p., co. palatine of Cheshire, 8½ m. SE of Stockport. Area 820 acres. Pop. in 1831, 284; in 1851, 358.

TORKSEY, a parish in Lincolnshire, 7 m. S by E of Gainsborough, on the E bank of the Trent, including the township of Brampton. Area 5,170 acres. Pop. in 1831, 484; in 1851, 438.

TORLA, a village of Spain, in the prov. and 39 m. NNE of Huesca.

TORMANTOS, a village of Spain, in the prov. and 86 m. WNW of Logrono. Pop. 600.

TORMARTON, a parish in Gloucestershire, 4 m. SE by E of Chipping-Sodbury. Area 2,645 acres. Pop. in 1831, 402; in 1851, 463.

TORMENTOS, a volcanic mountain of Guatemala, in the district of Amatitlan, the highest of a group of three volcanoes. It is about 2 leagues distant from the village of Apacaga.

TORMES, a river of Spain, which rises among the mountains in the S of the prov. of Salamanca; crosses Leon; and falls into the Douro on the borders of Portugal, after a course of 105 m. The first half of its course is from S to N; the latter, from E to W. Its banks were the scene of the battle of Salamanca, fought on the 22d of July, 1812.

TOR-MOHAM, a parish of Devonshire, 2½ m. W of Torbay. Area 1,560 acres. Pop. in 1851, 11,474.

TORMORE, an island of co. Donegal, situated within 3 furl. of the nearest part of the mainland, 1 m. NE of Toralaydan. It lifts its summit to the alt. above sea-level of about 500 ft.

TORNA, a palatinate in the NW of Hungary, situated between the com. of Zips and Aba-Ujvar,

and watered by the Bodva. It is hilly almost throughout, so that its wealth is nearly limited to its iron mines and pasturage. It has an area of 172 geog. sq. m., and about 30,000 inhabitants.—Its capital, of the same name, is a small place situated on the river Torna, 19 m. SW of Kaschau. Pop. 2,200.

TORNAVACAS, a town of Spain, in the prov. and 22 m. NNE of Cáceres. Pop. 1,400. It gives name to a mountain-range, which extends N, from the Tagus, along the borders of Portugal, till it joins the Sierra-de-Guadarrama.

TORNEA, a small but remarkable port of Russian Finland, at the N extremity of the gulf of Bothnia, in N lat. 65° 50' 50", E long. 24° 6' 15", 1,735 versts from St. Petersburg. It stands on a small island in the river Tornea, and having been built by order of government, is regular in its streets; but the few wooden houses are widely separated. The pop. does not exceed 700. It is a central spot for the exports and imports into a wild and thinly peopled country. Its exports consist of timber, fish, rein-deer, hides, furs, and tar; the imports of salt, snuff, tobacco, groceries, and spirits. On the opposite side of the river is the thriving little Swedish town of Happaranda. In June the sun is here visible above the horizon at midnight. About the 23d of this month it is seen to decline to the NW, and verge more and more to the exact N, until midnight, after which it commences an ascending course to the NE. In 1736 and 1737, T. was honoured with a visit from Maupertius and other French savans, who, in company with the Swedish astronomer Celsius, made many observations to ascertain the exact figure of the earth. Remote as it is, this place has not always escaped the ravages of war, having been taken by the Russians in 1715, and in 1809; and by the English in 1854.

TORNEA, a river of Sweden, which issues from Lake Kiöpis, in N lat. 69°; flows SE; forms the boundary between Russian and Swedish Lapland, and falls into the gulf of Bothnia, below Tornea, after a rapid course of 250 m. Its principal affluents are the Lainio and the Muonio.

TORNEA-LAPPMARK, the most northern of the six provinces of Swedish Lapland, lying between the river Tornea, Lulea Lappmark, and Norwegian Lapland. The part of it to the E of Tornea was ceded to Russia in 1809.

TORNESE (CAPE), a headland of Greece, at the NW extremity of the Morea, opposite the island of Zante, in N lat. 37° 56'.

TORNIMPARTE, a town of Naples, in Abruzzo-Ultra 2da, 7 m. SW of Aquila. Pop. 1,500.

TORNYA, a village of Hungary, in the com. of Csanad, 12 m. NW of Arad, on the Vena-Szaraz.

TORO, a town of Naples, in the prov. of Sannio, 15 m. SE of Molise. Pop. 2,400.—Also a city of Spain, in the prov. and 15 m. E of Zamora, situated on the Douro, over which it has a bridge of 22 arches. Its bishopric, one of the most ancient in the kingdom, has been for some time transferred to Zamora. It is regularly built, with wide but dirty streets, and contains several churches and convents, a theatre, and barracks. Pop. 9,500, whose chief employment is cultivating wine and corn, and linen-weaving.—Also a small island in the Mediterranean, near the SW coast of Sardinia, in N lat. 38° 52'.

TORO (MONT), a mountain in the centre of the island of Minorca, 9 m. NW of Mahon.

TORO (SAN-ANTONIO-DEL), a city of New Granada, in the prov. of Popayan, 80 m. N of Cartago.

TOROCZKO, a town of Transylvania, in the com. and 14 m. SW of Thorenburg. Pop. 1,900.

TOROGAY, an Hebridean islet of probably 2 m. in circumf., between N. Uist and Bernera.

TOROK-BECSE, a town of Hungary, in the com. of Torontal, 25 m. NNE of Peterwardein, on the l. bank of the Theiss. It has a quay extending along the bank of the river, and affording facilities for shipping corn, timber, tobacco, and other produce.

TOROK-SANKT-MIKLOS, a town of Hungary, in the com. and 30 m. S of Heves. Pop. 8,600.

TORON, a town of European Turkey, situated on a neck of land which projects into the Archipelago, between the gulfs of Monte-Santo and Cassandro, 70 m. SE of Saloniki.

TORONTAL, a comitat or county in the S of Hungary, including the western part of the Banat of Temesvar, lying along the E bank of the Theiss, and intersected by the Bega. It has an area of 2,800 sq. m., and a pop. of 343,000. About 660 sq. m. are occupied by marshes; the rest of the surface is also level, and of great fertility. Maize, rice, wine, melons, fruit, flax, and silk are raised.—The cap. is Nagy-Beoskerék.

TORONTO, formerly *Yox*, the capital of Upper Canada, or Canada-West, in the township and co. of the same name, on the NW coast of Lake Ontario, 315 m. WSW of Montreal, in N lat. 43° 49', W long. 79° 21', at an alt. of 342 ft. above sea-level. It is regularly laid out, with streets running at right angles, and generally spacious. It has been much improved within the last few years, yet it still possesses only one really handsome street lined with well-filled shops and stores. The site extends about 1½ m. along the harbour. The public edifices are an Episcopalian and a Roman Catholic cathedral, a college, an assemblage of red-brick buildings called the government-house, the legislative chambers, a sessions-house, two gaols, numerous stores and buildings for the purposes of government, normal schools, a university, an observatory, and public markets. The barracks are situated to the W of the town. A battery and two blockhouses protect the entrance of the harbour. The harbour is nearly circular, and formed by a narrow peninsula, stretching W in an oblique direction for about 6 m., and terminating in a curved point nearly opposite the garrison, thus enclosing a beautiful basin about 1½ m. in diameter, capable of containing a great number of vessels, and at the entrance of which ships may lie in safety during the winter. The peninsula is in several places not more than 60 yds. in breadth, but widens towards its extremity to nearly 1 m. It is principally a bank of sand, with little grass upon it; and is so low in surface, that the expanse of Lake Ontario is seen over it. The termination of the peninsula is called Gibraltar-point, where a block-house has been erected. The E part of the harbour is bounded by an extensive marsh, through part of which the river Don runs, before it discharges itself into the basin.—In 1793, the spot on which T. stands presented only one solitary Indian wigwam. In the ensuing spring, the ground for the future metropolis of Upper Canada was fixed upon, and the buildings commenced under the superintendence of General Simcoe, then lieutenant-governor. In the space of five or six years it became a respectable place, and rapidly increased in importance. In 1817 the pop. was 1,200; in 1830, 2,860; in 1842, 15,336; in 1852, 30,763. The adjacent country for several miles round is in a high state of cultivation. T. was captured by the American army on the 27th April 1813. They held it, however, but a few days; but in that time the government-house, and all the public buildings and stores, were burnt. On the union of the two pro-

vinces, the seat of government was removed to Kingston. It suffered severely from fire in 1849.—A railway is now in progress between T. and Montreal, 345 m. in length, at an estimated cost of £3,000,000; and between T. and Tarnia, 172 m. in length, at an estimated cost of £1,376,000. These great lines are component parts of the Grand Trunk railway of Canada.—The mean temp. of the year at T. is 44° 4'; of winter, 26° 4'; of summer, 63° 8'. Recent investigations have led to the inference that opposite conditions of weather prevail simultaneously in the same parallels of latitude under different meridians; that Europe and America, in particular, usually present such an opposition, so that a severe winter here corresponds to a mild one there, and *vice versa*; and recent theories of the distribution of heat on the surface of the globe profess to furnish the explanation. From a series of twelve years' observations Colonel Sabine has shown that, after allowance has been made for the elevation of T. above the sea, every month of the year there is colder than the normal temperature of the same month in the same parallels; that the cold reaches its extreme in February, when it exceeds 10° of Fahr.; and that on the average of the whole year it is little less than 6°.

TOROPA, a river of Russia, in the gov. of Pskov, which rises in Lake Loosno, 18 m. NE of Toropetz; runs NW, and then SSW, passing through Lake Solomino; and flows into the Duno, on the r. bank, 30 m. S of Toropetz, after a course of 80 m.

TOROPALCA, a settlement of Bolivia, 56 m. SSW of Potosi.

TOROPETZ, a town of Russia, in the gov. of Pskov, situated on the river Toropa, at the point where it issues from Lake Solomino, 245 m. S of St. Petersburg. It has a cathedral and several churches and monasteries. Pop. 10,000. The principal employment of the inhabitants is the tanning of leather, and the forwarding of merchandise partly to Poland, partly to the interior of the empire, and to Riga by the Toropa, and the Dwina or Duna.

TOR-ORSAIA, a town of Naples, in the prov. of Principato-Citra, 15 m. ESE of Il Vallo. Pop. 2,500.

TOROS, a town, or group of hamlets, in Tartary, on a stream of the same name, an affluent of the Syr-derra, in N lat. 66° 22'.

TOROSAY, a parish on the E coast of the island of Mull, Argyleshire. Pop. in 1851, 1,361.

TOROX, a town of Spain, on the coast of Granada, 25 m. E of Malaga.

TORPENHOW, a parish in Cumberland, 8 m. NE by N of Cockermouth, comprising the townships of Bewaldeth-with-Snittlegarth, Blennerhasset-with-Kirkland, Bothel-with-Threapland, and Torpenhow-with-Whitrigg. Area 9,670 acres. Pop. in 1831, 1,032; in 1851, 1,175.

TORPES, a village of France, in the dep. of Doubs, 9 m. SW of Besançon, on the r. bank of the Doubs.—Also a village of the dep. of Saône-et-Loire, 4 m. SE of Pierre.

TORPHICHEN, a parish of Linlithgowshire, 4½ m. SSW of Linlithgow. Pop. in 1851, 1,356.

TORPOINT, a chapelry in St. Anthony p., co. Cornwall, 3 m. W of Devonport.

TOR-QUAY, a picturesque watering-place and chapelry, in Tor-Moham p., Devon, 21 m. S of Exeter. It is situated in the most northerly cove of Torbay, and is sheltered on three sides by lofty hills on the declivity of which are numerous detached villas and terraces of houses. The greater part of the town, however, is built on the strand, and consists chiefly of lodging-houses for the accommodation of visitors in the bathing season. The town is open to the S, and is at the same time protected

from the N and NE winds by the hills encompassing it. From the extreme salubrity and mildness of the climate, together with the picturesque scenery around it, this place is fast rising into estimation even as a winter residence. The mean temp. of the six winter months, from November to April inclusive, during the seasons 1829-30, 1830-31, and 1831-32, was 46° 43'. The mean monthly range of temp. 26° 1'; the mean daily range about 4°. The variation between the minimum of the night and the temp. of the following morning at 8 o'clock, during the entire season, is 3° 15'; and during the three winter months only 2° 29'. The prevailing winds are W and SW. Among the tender exotics which are hardy in the gardens at Tor-quay are the *Agave Americana*, *Cassia Capensis*, *Citrus Medicus*, *Laurus Camphora*, *Yucca Aloifolia*, *Y. gloriosa*, &c. The citron has produced fruit in the open air at Tor-quay measuring 2½ inch. in circumference. The myrtle flourishes luxuriantly throughout the entire district: it attains a large size, and is proverbial for its longevity. T. was formerly but an insignificant fishing-town: the first great improvement was the erection of a pier, commenced in 1804 and finished in 1807, after which another was constructed, forming a basin 500 ft. long and 800 ft. broad. T. maintains coasting-vessels between the great ports; and has a regular communication with Portsmouth and Plymouth, by steam-boats, and with the southern watering-places by daily stages and by railway. There are here two Episcopalian chapels, a Roman Catholic, Wesleyan, Baptist, and two Independent chapels.

TORQUEMADA, a town of Spain, in the prov. and 15 m. NE of Palencia, on the r. bank of the river Pisnerga. Pop. 2,300. It was the birth-place of the infamous inquisitor, Torquemada.

TORQUILLA, a river of South America, in the province of Darien, which enters Tarena just before the latter enters the sea.

TORRA, a village of Zanguebar, 120 m. SW of Magadoxo, on the coast.

TORRALBA, a town of Spain, in the prov. and partido and 15 m. NW of Cuenca, in low ground, commanded by a mountain, on which are the remains of a fort. Pop. 800.—Also a town in the prov. of Navarra, and partido of Estillo, 39 m. SW of Pamplona, between two streams. Pop. 395.—Also a town in the prov. of Soria, partido and 9 m. NE of Burgo-de-Osma, in a fine valley, watered by the Abion. Pop. 800. It has carding-mills.

TORRALBA-DE-CALATRAVA, a town of Spain, in the prov. and partido and 11 m. NE of Ciudad-Real. Pop. 3,016. It has a custom-house, a public granary, and a parish church, and is generally well-built. Blond and lace are its chief articles of manufacture.

TORRALBA-DE-OROPESA, a town of Spain, in the prov. and 69 m. W of Toledo, and partido of Puente-del-Arzbispo, on a plateau commanding a magnificent view of the Oropesa mountains. Pop. 800. It has an hospital.

TORRANCE, a village in the p. of Campsie, Stirlingshire. Pop. 672.

TORRAO, a town of Portugal, in the prov. of Estremadura, comarca and 48 m. ESE of Setubal, in a flat and fertile country, watered by an affluent of the Caldão. Pop. 1,800. It has two hospitals, and two convents.

TORRE, a river, or rather torrent, which has its source in Austrian Lombardy, in the prov. of Usino, on the S side of Monte Musi; runs first W to the hamlet of Musi, where it receives the Rio Branco, then SSE to the junction of the Cornapo, Mattina, and Natisone; enters Illyria; and after a total course of

about 42 m., throws itself into the Isonzo on the r. bank, a little above the hamlet of Turriaco, and 6 m. SSW of Gradiſca.—Also a town of Naples, in the prov. of Calabria-Ultra, district and 22 m. SSW of Catanzaro, at the foot of a mountain, near the l. bank of the Ancinale, in an unhealthy locality. Pop. 1,600. It suffered severely from an earthquake in 1783.

TORRE-ALHAQUIME, a town of Spain, in the prov. and 69 m. NE of Cadiz, and partido of Olvera, on the r. bank of the Guadalete. Pop. 373.

TORRE-BLANCA, a town of Spain, in the prov. and 24 m. NE of Castellon-de-la-Plana, and partido of Albocacer, near the Mediterranean. Pop. 1,556.

TORRE-BLASCO-PEDRO, a town of Spain, in the prov. and 15 m. NNE of Jaen, and partido of Baeza, in a delightful plain, at the confluence of the Guadalquivir and Guadalimar. Pop. 480. It has several oil-mills, a soap manufactory, and a tile-work. Its oil is noted as the best in Andalusia. About $\frac{3}{4}$ of a mile to the N on the r. bank of the Guadalimar, are the ruins of the ancient *Castulani*.

TORRE-BRUNA, a town of Naples, in the prov. of Abruzzo-Citra, district and 20 m. SSW of Il Vasto, and cant. of Gelsenza, on a high hill. Pop. 720. The environs are fertile.

TORRE-CAMPO, a town of Spain, in the prov. and 80 m. N of Cordoba, and partido of Pozoblanco, in a plain, near the l. bank of the Guadalmez. Pop. 2,518. It has a parish church, a custom-house, a public granary, and several convents.—Also a town in the prov. and partido and 5 m. SW of Jaen, in a plain. Pop. 3,748. It has a large square in which is an ancient fortress, and contains a parish church, a custom-house, two hospitals, and several elementary schools.

TORRE-CHICA, a fortress of Algiers, on a peninsula projecting into the bay of Sidi-Ferush, and to the W of Algiers.

TORRECILLA-DE-ALCANIZ, a town of Spain, in the prov. of Teruel, and partido of Alcaniz. Pop. 1,296. It has a parish church, a custom-house, and a public granary.

TORRECILLA-DE-LA-ABADESA, a town of Spain, in the prov. and 24 m. SW of Valladolid, and partido of Mola-del-Margues, near the r. bank of the Duero. Pop. 850. It has a tile-kiln.

TORRECILLA-DE-LA-ORDEN, a town of Spain, in the prov. and 39 m. SSW of Valladolid, and partido of Nava-del-Rey, on an elevated and arid tract. Pop. 1,315. It has manufactories of blankets, and other woollen fabrics.

TORRECILLA-DE-LOS-ANGELES, a town of Spain, in the prov. and 54 m. NNW of Caceres, on the S side of the Sierra-de-Gata. Pop. 428.

TORRECILLA-DE-LOS-CAMEROS, a judicial partido and town of Spain, in the prov. of Logrono. The partido comprises 51 pueblos. The town is 18 m. SSW of Logrono, on the slope of Monte Sarrada, on the Iruega, which is here crossed by a fine bridge. Pop. 2,027. It is well-built, and has four abundant fountains, three parish churches, one of which is surrounded by a lofty tower, a convent, and an alms-house. It possesses manufactories of cloth. In its vicinity are several thermal springs. The Iruega abounds with fish. The adjacent mountains are said to contain silver and Armenian bell.

TORRECILLAS-DE-LA-TIESA, a town of Spain, in the prov. and 86 m. E of Caceres, and partido of Trajillo, in a level locality. Pop. 583. The climate in summer is dry, and the soil arid.

TORRECILLA-SOBRE-ALESANCO, a town of Spain, in the prov. and 24 m. WSW of Logrono, and partido of Najera. Pop. 279.

TORRECUSO, a town of Naples, in the prov. of

the Principato-Ultra, district and 23 m. NNW of Avellino, and cant. of Vitulano, on a hill. Pop. 1,700. It has two churches, an hospital, and an alms-house.

TORRE-DE-DONA-CHAMA, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 42 m. N of Torre-de-Moncorvo, on a plateau, near the base of a hill on which are the remains of an old tower.

TORRE-DE-DON-MIGUEL (La), a town of Spain, in the prov. and 54 m. NNW of Caceres, at the foot of the Sierra-de-Gata, on a height. Pop. 1,616. It has a healthy climate, and is well supplied with good water. Wine and oil are cultivated in the environs.

TORRE-DE-EMBESORA, a town of Spain, in the prov. and 24 m. NNW of Castellon-de-la-Plana, and partido of Albocacer, in a mountainous locality.

TORRE-DE-ERGAZ, or **TORRE ORGAZ**, a town of Spain, in the prov. and partido and 9 m. S of Caceres, near the r. bank of the Solor. Pop. 880.

TORRE-DE-ESTEBAN-AMBRAN (La), a town of Spain, in the prov. and 80 m. NW of Toledo, and partido of Escalona, on the r. bank of a small affluent of the Alberche. Pop. 1,257. It has a fine church, five chapels, and a convent. The environs are noted for their grapes.

TORRE-DE-JUAN-ABAD, a town of Spain, in the prov. and 45 m. SE of Ciudad-Real, and partido of Villanueva-de-los-Infantes, a little to the N of the Sierra-Morena. Pop. 1,377. In the environs are mines of lead and antimony.

TORRE-DE-LA-META, a village of Spain, in the prov. and 30 m. SSW of Alicante, and partido of Orchueta, on the Mediterranean. Pop. 176. It has a roadstead defended by a tower. A little to the W is an extensive salt lake.

TORRE-DE-LAS-GUARDAS, a fortress of Spain, in the prov. and 24 m. SE of Almeria, on the Mediterranean, near Cape Gata. It has a jasper quarry.

TORRE-DEL-COMTE, a town of Spain, in the prov. and 75 m. SE of Zaragoza, and partido of Valderobres, on a height, the base of which is washed by the Matarrank. Pop. 566. It has several oil and silk-mills.

TORRE-DE-LES-MANSANES, or **TORREMANZANES**, a town of Spain, in the prov. and 24 m. N of Alicante, and partido of Jijona. Pop. 1,029.

TORRE-DEL-GRECO, a town of Naples, in the prov. and district and 8 m. SE of Naples, on the E coast of the gulf of Naples, and near the SW base of Vesuvius. Pop. 17,502. It has two churches, both of modern structure, three convents, and a large hospital, and numerous houses of elegant architecture. The inhabitants employ themselves in fishing. The environs are noted for their fruit and wine. This town derives its name from an ancient tower in its vicinity, and from the quality of the wines of the locality, resembling those grown in the Greek islands. It was almost entirely destroyed by an eruption of Vesuvius in 1794.

TORRE-DELL'ANUNZIATA, a town of Naples, in the prov. and 13 m. SE of Naples, district and 5 m. NNW of Castel-a-Mare, near the S base of Vesuvius, in a plain, on the E side of the gulf of Naples. Pop. 12,045. It has two churches, a convent, and a port. It possesses a royal factory of arms, and a paper-mill. The trade consists chiefly in corn. This town derives its name from a tower, erected for the defence of the coast by Alphonso I.

TORRE-DELLA-PADULA, a town of Naples, in the prov. of Torre-Otranto, district and 19 m. ESE of Gallipoli, and cant. of Ruffano, at the foot of a hill. Pop. 570. It has a convent.

TORRE-DELLE-NOCELLE, a town of Naples,

in the prov. of the Principato-Ultra, and district of Avellino, 5 m. from Montefusco, on a hill. Pop. 1,375. It has a convent, and an alms-house.

TORRE-DEL-MANGANO, a town of Austrian Lombardy, in the prov. and district and 5 m. NNW of Pavia, in a fertile locality. Pop. 450.

TORRE-DEL-VULGO (La), a village of Spain, in the prov. and 15 m. NNE of Guadalajara, near as affluent of the Henares. Pop. 259.

TORRE-DEMBARRA, a town of Spain, in the prov. and 9 m. ENE of Tarragona, and partido of Vendrell, 3 m. from the shore of the Mediterranean. Pop. 1,868. It has manufactories of fishing-tackle, cordage, and soap, and distilleries of brandy.

TORRE-DE-MIGUEL-SESMERO, a town of Spain, in the prov. of Badajoz, and partido of Olivenza, in a flat locality. Pop. 1,378.

TORRE-DE-MONCORVO, a town of Portugal, in the prov. of Trás-os-Montes, 15 m. E of S. João-da-Pesqueira, on the slope of Mont-Roberto, between the Sabor and Duero. Pop. 1,629. It has bastioned ramparts, and is defended by a square fortress. Its principal public buildings are a fine church, a convent, an alms-house, and a Latin school. Silk fabrics are woven here; and the environs are noted for their flax and hemp. This town was peopled in 1216 by Sancho II.

TORRE-DE-MORMOJON (La), a town of Spain, in the prov. and partido of Palencia, at the foot of a mountain on which is a ruinous fortress. Pop. 708. It has an active trade in wine and in wool.

TORRE-DE-PASSERI, a town of Naples, in the prov. of Abruzzo-Ultra, district and 14 m. S of Civita-di-Penne, on the l. bank of the Pescara. Pop. 1,150. It has three churches, and contains manufactories of pottery and of dye-stuffs.

TORRE-DE-PENAFIEL, a village of Spain, in the prov. of Valladolid, partido and 8 m. SE of Penafiel, near the l. bank of the Duraton, in a woody and insalubrious locality.

TORRE-DE-VALANA (La), a town of Spain, in the prov. and 24 m. N of Guadalajara, and partido of Tamajon, at the entrance to a valley, $1\frac{1}{2}$ m. from the Rio-Sorbel. Pop. 508.

TORRE-DI-ANNIBALE, a small port of Naples, on the E coast of the prov. of Calabria-Citra. It is supposed to mark the spot at which Hannibal embarked on his return to Africa.

TORRE-DI-BELVICINO, a village of Austrian Lombardy, in the prov. of Vicenza, and district of Schio. Pop. 1,940. It has a tile-kiln.

TORRE-DI-LUSERNA, a village of Sardinia, in the div. of Turin, prov. and 13 m. SW of Pignerol, at the foot of a hill crowned by fort St. Maria, in the angle formed by the confluence of the Angrogna and Felica. Pop. 2,100. It has manufactories of silk fabrics.

TORRE-DI-MARE, a village of Naples, in the prov. of the Basilicata, district and 31 m. SSE of Matera, and cant. of Pisticoio, in an insalubrious plain, near the entrance of the Basento into the gulf of Tarento. In its vicinity are the remains of the ancient *Metaponto*, founded by Nestor, in 1280 a.c., sacked by Spartacus, 76 years before the Christian era; rebuilt afterwards by the Romans; and ultimately destroyed by the Moors. It is noted as the last residence of Pythagoras.

TORRE-DI-MONDOVI, a town of Sardinia, in the div. of Coni, prov. and 5 m. SE of Mondovì, and mand. of Vico-di-Mondovì, on the slope of a hill, between the Casotto and Consaglia, and near the confluence. Pop. 1,600.

TORRE-DI-TAGLIA, a town of Naples, in the prov. of Abruzzo-Ultra, district and 18 m. SE of

Civita-Ducale, and cant. of Borgo-Colle-Fegato, on a hill near the r. bank of the Imele. Pop. 500.

TORRE-DON-JIMEINO, a town of Spain, in the prov. and 8 m. W of Jaen. Pop. 7,000. It is partly enclosed by walls, and is bathed on the W by the Salado-de-Arjona. In the centre is a large square, with a fountain and a castle, the ramparts of which form a fine promenade. It contains two parish-churches, two convents, and an hospital; and possesses extensive manufactories of linen, oil, and wine. In the vicinity is an extensive salt-work.

TORRE-FRANCA, a town of Spain, in the prov. and 33 m. NNE of Cordova, near the r. bank of the Milano, a little above its junction with the Ciguenuela, in a valley at the foot of the Sierra-Morena. Pop. 2,428. It has a church, two chapels, a convent, and an hospital. On the SSE, and separated by only the breadth of a street, is the town of Torremilano. The trade consists chiefly in pigs, sheep, and wool.—Torre-Franca is the capital of a large seigniorial territory which comprises three other towns. To the S, extending to the vicinity of Cordova, are fine fertile plains. The N part of the T. comprises a portion of the Sierra-Morena.

TORRE-FUENBILLIDA, a village of Spain, in the prov. and 15 m. SE of Palencia, near the r. bank of the Esgueva. Pop. 880.

TORRE-GALINDO, a village of Spain, in the prov. and 45 m. NNE of Segovia, at the foot of a hill on the r. bank of the Riasa. Pop. 182. It has a castle in ruins, manufactories of woollen fabrics, and a fulling mill.

TORRE-GENTILE, a village of Naples, in the prov. of Abruzzo-Citra, and district of Chieti, in a fertile plain. Pop. 725.

TORRE-HERMOSA, a village of Spain, in the prov. and 24 m. SW of Calatayud. Pop. 292.

TORREILLES, a commune of France, in the dep. of the Pyrenees-Orientales, and cant. of Rivesaltes, 9 m. N of Perpignan. Pop. 1,814.

TORREJONCILLO-DEL-REY, a town of Spain, in the prov. and 24 m. SW of Cuenca. Pop. 1,889. It has a convent and an hospital; and manufactories of woollen fabrics. The trade consists chiefly in articles of agricultural produce.

TORREJON-DE-ARDOZ, a town of Spain, in the prov. and 11 m. ENE of Madrid, in a fine plain near the l. bank of the Jarama. Pop. 1,500. It has two hospitals. The manufacture of soap, and rearing of sheep form the chief objects of local industry.

TORREJON-DEL-REY, a village of Spain, in the prov. and 14 m. WNW of Guadalajara, near two streams, in a fertile locality. Pop. 484.

TORREJON-DE-VALASCO, a town of Spain, in the prov. and 18 m. S of Madrid, in a flat but fertile locality. Pop. 1,385.

TORREJON-EL-RUBIO, a village of Spain, in the prov. and 26 m. NE of Caceres, in a fertile locality. Pop. 400.

TORRELAGUNA, a judicial partido and town of Spain, in the prov. of Madrid. The town is 33 m. NNE of Madrid, in a fertile plain, at the foot of a chain of hills near the r. bank of the Jarama. Pop. 2,800. It has a parish-church of fine Gothic architecture, containing several marble mausolea, and a fine Magdalene by Carmona. It has also two convents and an hospital; and possesses a pottery manufactory and three oil mills. The environs afford considerable quantities of wine. In the vicinity is an aqueduct now much dilapidated, erected by Cardinal Ximenes.

TORRE-LAS-ARCAS, a village of Spain, in the prov. of Teruel, and partido of Segura, 21 m. S of Alcaniz. Pop. 444.

TORRE-LA-VEGA, a judicial partido and village of Spain, in the prov. and 15 m. SW of Santander, in a delicious valley. Pop. 700. It is well-built, and has a ducal palace and a convent. Its industry consists chiefly in the manufacture of cotton.

TORRELLAS, a village of Spain, in the prov. and 57 m. SE of Logrono, on the l. bank of the Gueilles. Pop. 722.

TORRELOBATON, a town of Spain, in the prov. and 18 m. WSW of Valladolid, and partido of Motadel-Marques. Pop. 1,268.

TORRELODONES (La), a village of Spain, in the prov. and 18 m. NW of Madrid, in a rugged locality, at the terminus of a canal of the same name, a branch of the canal of Castile. Pop. 175.

TORREMAGGIORE, a town of Naples, in the prov. of Capitanata, district and 5 m. W of San-Severo, and cant. of S. Paoli. Pop. 4,500. It stands on a hill, and contains a ducal palace, two churches, and two convents.

TORRE-MALAMBERTI, a village of Austrian Lombardy, in the prov. and 14 m. E of Cremona, and district of Pescarolo. Pop. 435. It consists of two parts, distinguished as Torre-d'Angiolini and Torre-de-Piccinardi, and contains a castle, a massive structure named the Torre-de-Piccinardi, enclosed by a wide ditch with a draw-bridge, and enclosing numerous relics of antiquity.

TORRE MAYOR, a village of Spain, in the prov. and 18 m. E of Badajoz, and partido of Merida, on the r. bank of the Cara, a little above its confluence with the Guadiana. Pop. 659. It has a palace belonging to the Duke de-la Rosa.

TORREMENGA, a village of Spain, in the prov. and 57 m. NNE of Caceres, and partido of Jaramilla. Pop. 180.

TORREMILANO, a town of Spain, in the prov. and 33 m. NNW of Cordova, and partido of Pozoblanco, in a locality possessing little fertility, and near a small stream named the Milano. Pop. 2,754. It has an hospital; and contains manufactories of common woollen fabrics, and is noted for its hams and cheese. Separated from this town by the breadth of a street only, is the town of Torrefranca.

TORREMOCHA, a town of Spain, in the prov. and 12 m. SSE of Caceres, in a flat but fertile locality, on the r. bank of the Solor. Pop. 1,690. It is tolerably well-built, and has a parish-church, a custom-house, several convents, and a public granary. It has manufactories of coarse woollen and linen fabrics.

TORREMOCHA-DEL-CAMPO, a village of Spain, in the prov. and 89 m. NE of Guadalejara, and partido of Sigüenza. Pop. 244.

TORRE-MUNA, a village of Spain, in the prov. and 18 m. SSE of Logrono, on the r. bank of the Vadillo, in a mountainous but fertile locality. Pop. 460. It has several yarn mills.

TORRENS (LAKE), a lake of South Australia, to the N of Spencer's gulf, with which it appears to be connected. It stretches northward, and is supposed to sweep round in a horse-shoe form, enclosing a peninsula intersected by Flinder's range and its ramifications. It has been coasted along a distance of nearly 400 m. Its waters are salt, and are in some parts confined to the centre of the wady.—Also a mountain of New South Wales, in the district of Wellington, near the Yammerinna river.—Also a mountain of South Australia, in Kangaroo island.

TORRENTE, a town of Spain, in the prov. and 5 m. SW of Valencia, on a height commanding an extensive district covered with gardens, orchards, and vineyards. Pop. 5,000. It has numerous villas, a parish-church, a convent, and a custom-house.

The environs are noted for their wine, grapes, melons, legumes, &c.

TORRENUÉVA, a town of Spain, in the prov. and 33 m. SE of Ciudad-Real. Pop. 2,140. It has a church and a fine chapel. The environs are noted for their oil, and a mine of antimony exists here.

TORREPADRE, a village of Spain, in the prov. and 30 m. SSW of Burgos, in a mountainous and woody locality, near the l. bank of the Arlanza. Pop. 230.

TORRE-PERO-GIL (La), a town of Spain, in the prov. and 27 m. NE of Jaen, in a flat but fertile locality, near the r. bank of the Guadalquivir. Pop. 5,787. It has a parish-church, four chapels, an hospital, and a fine promenade planted with trees.

TORREQUADRADA-DE-VALLES, a village of Spain, in the prov. and 45 m. NE of Guadalejara, in a mountainous locality, on a small affluent of the Tajuna. Pop. 189.

TORRES, a town of Spain, in the prov. and 18 m. ESE of Jaen, partly on the slope and partly at the foot of a mountain, in a fertile locality. Pop. 2,292. It has a parish-church, a custom-house, a public granary, and a fulling-mill.—Also a village in the prov. and 17 m. E of Madrid, in a plain, at the foot of a mountain. Pop. 700. It has manufactories of charcoal.—Also a village in the prov. of Navarra, 42 m. SW of Pamplona. Pop. 338.—Also a village in the prov. and 24 m. WNW of Teruel, on the l. bank of the Guadalquivir. Pop. 522. It has productive iron-mines and forges.

TORRES ISLANDS, a group in the Mergui archipelago, in the Indian ocean, in N lat. 11° 40', and E long. 96° 50'.

TORRES STRAITS, a channel which divides Australia from New Guinea. It is about 80 m. in width, but is obstructed by numerous islands and reefs. Of the former the principal are the Prince of Wales islands. Towards the narrowest part the depth never exceeds 14 fathoms, and it is often not more than half as much. In clear weather the bottom is every where seen. The navigation, at all times difficult, is with a contrary wind impracticable. This is advantageous only as a route from New South Wales to China and India, and in the months of April, May, and June when the E monsoon is in its vigour. It was discovered in 1605 by the Spanish navigator Torres.

TORRE-SANDIDO, a village of Spain, in the prov. and 42 m. SSW of Burgos, on the r. bank of the Esgueva. Pop. 562. It has a Carmelite convent, and possesses manufactories of linen and of cheese.

TORRE-SANTA-SUSANNA, a town of Naples, in the prov. of the Torre-d'Otranto, district and 20 m. SW of Brindisi, in a fertile plain. Pop. 1,500. It has a convent, an hospital, and an alms-house.

TORRES-DE-ALBANCHES, a town of Spain, in the prov. and 75 m. NE of Jaen, in a valley, at the foot of a steep mountain. Pop. 396. On a height to the N is a small fort.

TORRES-DE-SEGUR, a town of Spain, in the prov. and 9 m. SSW of Lerida, in a flat locality, near the l. bank of the Segur. Pop. 802. It has a church, a custom-house, and a public granary.

TORRES-NOVAS, a town of Portugal, in the prov. of Estremadura, comarca and 21 m. E of Santarem, in a flat locality, on a small affluent of the Tagus. Pop. 4,300. It is enclosed by walls and defended by a fortress, and has four parish churches, three convents, an alms-house, and a classical school. It has manufactories of calico. This town was taken from the Moors by Alphonso in 1148, but was regained by the former in 1190 and destroyed.

TORRES-TORRES, a town of Spain, in the prov. and 21 m. N of Valencia, in a fertile plain, near a lofty mountain, on which are the ruins of a Moorish fortress. Pop. 797.

TORRES-VEDRAS, a town of Portugal, capital of a comarca of the same name, and 30 m. N of Lisbon, on the l. bank of the Sizandro, which is here crossed by five bridges. Pop. 5,500. It has a portion of its ancient walls, and is commanded by a fortress. It contains four parish-churches, three convents, two hospitals, and a classical school. The environs produce considerable quantities of wine. In the vicinity are an aqueduct of Gothic architecture and a military hospital. This town was taken from the Moors in 1148. It is remarkable for the lines of defence which Wellington erected on the adjacent heights in 1810, and behind which his army lay secure from attack by the French.

TORRETTA, a mountain of Sicily, in the prov. and district and near the town of Palermo. It has an alt. of 2,750 Parisian ft. above sea-level.

TORREVECCIA, a village of Naples, in the prov. of Abruzzo-Citra, 3 m. NE of Chieti, in a fine plain, Pop. 450.

TORRE-VIEJA-Y-LA-MATA, a town of Spain, in the prov. and 38 m. SSW of Alicante, on the Mediterranean, on which it has a port defended by a tower and battery. Pop. 1,940. It is of modern foundation, and is well and tastefully built. It has a custom-house and extensive military and commercial magazines. Fishing, the manufacture of linen, and the adjacent salt-works, form the chief branches of local industry.

TORREZELLO, a town of Portugal, in the prov. of Beira, comarca and 36 m. W of Laguarda, near the source of the Rio-das-Nabeiras, an affluent of the Mondego.

TORRIDON (Loch), a large inlet of the sea, between Gairloch and Applecross, on the W coast of Ross-shire. It consists of three compartments, connected by narrow straits. The outer loch extends $6\frac{1}{2}$ m. SE, with a mean breadth of about $2\frac{1}{2}$ m.; the middle loch is identical with SHIELDAG; and the inner loch extends nearly 5 m. E, with a mean breadth of about $1\frac{1}{2}$ m. The united loch is, as a whole, the most striking in the magnificent and frequently indented coast which it intersects; but though impressive for its grandeur, and imposing for its extent, it is not remarkable for beauty. The herring-fishery in this loch is often highly productive.

TORRINGTON, a township of Litchfield co., Connecticut, U. S., 7 m. N of Litchfield.

TORRINGTON (BLACK), a parish in Devon, 5 m. W by N of Hatherleigh. Area 7,280 acres. Pop. in 1831, 1,083; in 1851, 1,115.

TORRINGTON (EAST), a parish in Lincolnshire, 4 m. NE by N of Wragby. Area 1,498 acres. Pop. in 1831, 87; in 1851, 118.

TORRINGTON (GRANT), a parish, borough, and market-town in Devon, 36 m. NW by W of Exeter, on the NE bank of the river Torridge, the navigation of which is extended to T. by a navigable cut or canal joining the river about 2 m. above the town of Bideford. The parish, including the chapelry of St. Giles-in-the-wood, has an area of 8,456 acres. Pop. in 1831, 8,093; in 1851, 8,308. The town is beautifully situated on the slope and brow of a fine eminence forming the E bank of the Torridge, across which there is here a stone-bridge, uniting the hamlet of Taddy-port with the town. Some trade is carried on with Ireland through the Torridge navigation; but the glove manufacture is the chief employment of the inhabitants. At the Restoration, General Monk was made Earl Tor-

rington. The town gives the title of Viscount to the Byng family.

TORRINGTON (LITTLE), a parish in Devon, $1\frac{1}{2}$ m. S by W of Great Torrington. Area 2,880 acres. Pop. in 1831, 572; in 1851, 628.

TORRINGTON (WEST), a parish in Lincoln, 3 m. N of Wragby. Area 1,109 acres. Pop. 183.

TORRISDALE. See TONGUE.

TORRY, a fishing-village in the p. of Nigg, Kincardineshire, on the r. bank of the Dee, opposite the city of Aberdeen, and $1\frac{1}{2}$ m. W of the point of Girdleness. Pop. 370.

TORRYBURN, a parish in the W extremity of Fifeshire, upon the coast of the frith of Forth. Pop. in 1831, 1,436; in 1851, 1,341.—The village of T., 9 m. W of North Ferry, is situated on the coast, and was once the port of Dunfermline.

TORSA, an island off the coast of Nether-Lorn, Argyshire, separated by only narrow straits, from Seil on the N, the continent on the W, and Luing on the E. It measures about 3 m. by 1 m. Its surface exhibits a smooth green hill, 200 ft. high. The whole of its E side, excepting a few trap rocks, and a little greywacke, consists of the same clay-slate as that for which Luing and Seil are celebrated.

TORSAAS, a town of Sweden, in the prov. of Småland, and 22 m. SSW of Calmar.

TORSAC, a village of France, in the dep. of Charente, 7 m. SSE of Angoulême, on the Charrau. Pop. 850.

TORSAKER, a town of Sweden, in Angermannland, 27 m. N of Hernösand, on the r. bank of the Angermann-elv.

TORSARI, an island in the gulf of Finland, 18 m. S of Viborg, in N lat. $60^{\circ} 21'$.

TORSHELLA, a village of Sweden, on a river which rises in Lake Hielmar, and runs into the Malär lake, 46 m. W of Stockholm.

TORSJOK. See TORJOK.

TORTHORWALD, a parish in Nithsdale and Annandale, Dumfries-shire, having a superficial extent of about 5,600 acres. The sluggish Lochar traces the whole W boundary. The amount of the area under cultivation is about 2,600 acres. It is an irregular cluster of cottages, with scarcely 200 inhabitants. Collin is a larger village, on the margin of Lochar-moss, $3\frac{1}{2}$ m. E of Dumfries. Pop. of p. in 1831, 1,820; in 1851, 1,313.

TORTOLA, a village of Spain, on the river Henares, in the prov. and 7 m. above Guadalaxara.

TORTOLA, one of the group of the Virgin islands, in the W. Indies, in N lat. $18^{\circ} 24'$, W long. $64^{\circ} 32'$. It is about 12 m. in length from E to W, and $3\frac{1}{2}$ m. broad at its widest part. Its surface is rocky and mountainous, rising to an alt. of 1,600 ft. above sea-level in one or two points, and its shores are deeply indented with bays. It has been in the possession of England since 1666. Its pop. is about 10,000.

TORTOLES, a village of Spain, in the prov. and 42 m. SSW of Burgos, on the r. bank of the Esgueva.

TORTOLI, a town of the island of Sardinia, 9 m. ENE of Lanusei. It has a small port, and some trade in wine and cheese.

TORTONA, a province of the Sardinian states, skirted by the Po on the N, and bounded on the E by the provs. of Voghera and Bobbio; on the S by that of Novi; and on the W by Alessandria. Area 665 sq. kilom. Pop. 53,570. About one-half of the surface is covered with mountains; and 200,000 hectares are cultivated. Its agricultural productions are wheat, barley, rye, maize, and oats, flax, hemp, and silk.—Its capital, of the same name, a bishop's see, and one of the most ancient cities in the N of Italy, is seated at the foot of a hill, an ex-

trinity of one of the Apennine branches, on the Roman road from Placentia to Genoa. Pop. 10,000. Its ancient name was *Dertona*. After the death of Otho II., in 1002, it became a republic, and was besieged by Barbarossa, in 1155, who took and sacked the city. With the aid and under the protection of the Visconti, dukes of Milan, it was rendered a place of great strength. By the Emperor Charles V. and Philip II. its fortifications were further increased. In 1665, it was again placed in the highest state of defence; and finally in 1785, on being ceded to Emanuel III., king of Sardinia, he made it a place of such strength that it was considered impregnable. In later times, however, it surrendered to the French; and Napoleon having ordered the demolition of all its fortifications, scarcely a sign now remains of its ancient military strength, the lines of its fortifications presenting the more pleasing aspect of public walks shaded by beautiful trees. The present cathedral is a plain brick structure, consisting of a nave and two aisles. There are four other parochial churches, two oratories, two convents, an hospital, an asylum for exposed children, and another for orphans, two public schools, and a large seminary for clergy and youths of the higher classes. The streets are generally of very irregular construction. Important fairs are held here yearly for stock and general merchandise.

TORTORA, a town of Naples, in the prov. of Calabria-Citra, 9 m. N of Scalea, near the gulf of Policastro. Pop. 1,600.

TORTORELLA, a town of Naples, in the prov. of Principato-Citra, 6 m. NNE of Bonati, near the L. bank of the Busento. Pop. 1,100.

TORTORETTO, a village of Naples, in Abruzzo-Ultra Ima, 15 m. NE of Teramo.

TORTORICI, a town of Sicily, in the Val-di-Demona, 20 m. SW of Melazzo, on the Fitalia. Pop. 2,800.

TORTOSA, a city of Spain, in the prov. and 48 m. SW of Tarragona, on the l. bank of the Ebro, about 25 m. from its mouth. Pop. of town and district, 20,500. It is divided into an old and a new town, both surrounded with walls of considerable antiquity. It is the see of a very wide bishopric. The Ebro, approaching here to its influx into the sea, is wide and deep, and navigable by vessels of 100 tons; and the trade is not inconsiderable in wheat, timber, charcoal, pitch, and wine. The principal manufactures are soap, leather, cordage, glass, pottery, and coarse linens. Fine marble is quarried in the vicinity. This town, the *Dardosa* of the Romans, was more than once the scene of conflicts between the Spaniards and the Moors. In 1649 and in 1798 this town was taken by the French; in 1810, it experienced the same fate.

TORTOSA, a port of Syria, in the pash. and 32 m. N of Tripoli, opposite the island of Ruad, in N lat. 34° 50'. It is no longer a place of any importance, but it represents the ancient *Orthosia* supposed to have been built about the 5th cent., and frequently mentioned by the historians of the Crusades, as a place of great strength.

TORTOSA (CAPE), a promontory of Spain, on the coast of Catalonia, in N lat. 40° 40'.

TORTSHIN, a town of Russia, in the gov. of Volhynia, 12 m. W of Lutsk.

TORTUE, an island off the N coast of Hayti, in N lat. 20° 8'. It is about 15 m. in length, and 4 m. in breadth. Its surface is mountainous.

TORTUE (LA), a river of Lower Canada, which, running S, falls into the St. Lawrence, about 4 m. above Montreal.

TORTUERA, a village of Spain, in the prov. and 27 m. SSW of Calatayud.

TORTUERO, a village of Spain, in the prov. and 24 m. NNW of Guadalajara.

TORTUGA, an island about 6 m. distant from the NE coast of the island of Cuba, in N lat. 20° 4'. It is about 60 m. in circumf.; it is fertile, and productive of tobacco, palms, sandal-wood, aloes, sugar, indigo, cotton, and fruits. It abounds in wild boars. —Also a small island in the North Atlantic, near the coast of Honduras. —Also a small island in the gulf of California, lying at about an equal distance from the coast of California and that of Mexico, 52 m. SSE of Tiburon.

TORTUGA (PUNTA-DE), a cape on the coast of Brazil, in S lat. 8°.

TORTUGAS (DAS), a group of 10 small keys or islands, off the S point of Florida, extending ENE and WSW 10 or 11 m., under the parallel of N lat. 24° 32'.

TORTUGAS (POINT), a headland on the coast of Chili, in S lat. 29° 37'.

TORTUGA-SALADA, an island in the Caribbean sea, off the coast of Venezuela, in N lat. 11°. It is about 36 m. in circumf. At its SE extremity is an indifferent roadstead frequented by merchantmen which come hither to lade salt, from May to August. Near the SW extremity of the island, is a small harbour, and some fresh water.

TORTURA, a port of Syria, 15 m. S of Acre, supposed to represent the Dor or Nephath of Scripture. It was erected into a bishopric, under the archbishop of Caesarea.

TORVESTAD, a village of Norway, in the bail. and 36 m. NNW of Stavanger, on a small island to the N of Karmoe.

TORVISCON, a town of Spain, in the prov. and 36 m. SE of Granada, near the l. bank of the Cachar.

TORY, TORRY, or TROREN, an island in co. Donegal, situated 4 m. N by W of Innisboffin, and 7 m. WNW of Horn-head. It extends 2½ m. NW, with a maximum breadth of ¾ m., and comprises an area of 785 acres. Its SE end is called Port-Doon; its NW end is surmounted by a lighthouse. The inhabitants are a semi-barbarous race, about 500 or 700 in number, who support themselves by husbandry and by fishing.

TOSA. See **TOOHA**.

TOSA, a town on the S coast of Xicoco, in Japan, in about N lat. 33° 40'.

TOSAGUA, a river of Ecuador, in the prov. of Esmeraldas, which runs SSW, and unites itself with the Chones, in S lat. 32° 30'.

TOSANLU, a river of Asia Minor, the ancient *Lycus*, which rises in the mountains of Armenia, and after running about 200 m. almost due W, falls into the Jekil-Irmak, about 80 m. N of Amasia.

TOSCANELLA, a town of the States-of-the-Church, 20 m. N of Civita-Vecchia, on the r. bank of the Marta. Pop. 3,000.

TOSCOLANO, a town of Austrian Italy, in the deleg. of Brescia, near the W shore of Lake Garda. Pop. 2,500. It is a place of considerable antiquity.

TOSELAND, a parish of Huntingdonshire, 4 m. NE by E of St. Neots. Area 1,320 acres. Pop. in 1851, 230.

TOSIA, or **TOSSIA**, a town of Asiatic Turkey, in the sanj. and 30 m. NNE of Kiangari. It is well-built, and consists of about 1,000 houses.

TOSNA, a town of Russia, in the gov. and 36 m. SSE of St. Petersburg, on a river of the same name, which joins the Neva at Pella, in the gov. of Petersburg, after a WNW course of about 60 m.

TOSS, a village and parish of Switzerland, in the cant., and 12 m. NE of Zurich, on a small affluent of the Rhine. Pop. of district, 1,732.

TOSSA, a town of Spain, in the prov. and 20 m.

8 of Gerona, near the coast. Pop. 1,600. It has some coasting trade.

TOSSIA. See TOSIA.

TOSSIAT, a village of France, in the dep. of Ain, cant. and 7 m. NNW of Pont-d'Ain. Pop. 620.

TOST, or TOSCHER, a town of Prussian Silesia, 28 m. SE of Oppeln. Pop. 964.

TOSTA, a river of Nicaragua, which enters the Pacific, in 8 lat. 12° 30', after a 8 course in which it passes near the SW extremity of Lake Leon.

TOSTAK, a river of Asiatic Russia, which flows NNW to the Jana, in the prov. of Yakutsk, which it joins after a course of nearly 400 m.

TOTA, a lake of New Granada, in the prov. and 21 m. E of Tunja, on the top of a mountain. It is of a circular figure, and nearly 6 leagues in circumf.

TOTANA, a town of Spain, in the prov. and 27 m. SW of Murcia, on the great road through Murcia, leading from Andalusia into Valencia. Pop. 8,000. It is a poor inland place, situated in a part of the country little visited by travellers, and the inhabitants are proverbially unenterprising and indolent. The chief article of manufacture is coarse pottery.

TOTES, a village of France, in the dep. of Seine-Inferieure, 18 m. N of Rouen. Pop. 700.

TOTHAM (GREAT and LITTLE), two adjoining parishes of Essex, 3 m. NNE of Maldon. Area of Great T. 5,363 acres. Pop. in 1851, 840. Area of Little T. 1,283 acres. Pop. in 1851, 388.

TOTHILL, a parish in Lincolnshire, 4 m. NW by N of Aford. Area 854 acres. Pop. in 1851, 59.

TOTLEY, a township in Dronfield p., Derbyshire, 8 m. NW by N of Chesterfield. Pop. 403.

TOTMA, a town of Russia, in the gov. and 110 m. NE of Vologda, on the left bank of the Sukhona. Pop. 2,800. There are extensive salt-works here.

TOTNESS, a parish and parliamentary borough in Devonshire, 22½ m. SSW of Exeter, on the river Dart, which is navigable and tidal to the town, a distance of 9 m. Area of p. 1,043 acres. Pop. in 1801, 2,503; in 1831, 3,442; in 1851, 3,828. The borough returns 2 members to parliament. The number of electors registered in 1837 was 297. The town, which has a situation eminent in point of beauty, climbs the steep declivity of a hill, and stretches itself along its brow, commanding a view of the country in its vicinity, but sheltered at the same time by higher grounds on every side. It is one of the most ancient towns in England; the piazzas in front of the houses in some parts of the upper town, and the higher stories projecting over the lower ones, are proofs of its antiquity. A number of the inhabitants are employed in agriculture, and some in fishing. The Dart is navigable for small vessels as high as the bridge. The trade in coal and culm, grain, and cider, forms the principal commerce of the place.

TOTOMINA, a large bay of Japan, on the S coast of the island of Nifon. It is 45 m. in length from N to S, and about 30 m. in breadth.

TOTON, or TOWTON, a hamlet in Attenborough p., Nottinghamshire, 5½ m. SW of Nottingham. Pop. in 1831, 202.

TOTONICAPAN, a town of Guatemala, the cap. of a department of the same name, 90 m. N of Guatemala. Pop. 10,000. There are salt springs in the vicinity.—The dep. is watered by the Chiartan and the Sumasinta.

TOTORAL, a town of the La Plata province of Cordova, 54 m. N of Cordova.—Also a fort of Chili, 18 m. SSW of Copiapo, in 8 lat. 27° 30'.

TOTORKOW, or TUTURKAI, a small town of European Turkey, in Romania, with a small castle on a hill, on the Danube, 24 m. W of Silistria.

TOTSKAIA, a fortified village of Russia, in the gov. of Orenburg, 27 m. SE of Buzuluk, on the l. bank of the Samara, at the confluence of the Soroka. Pop. 600.

TOTTENHAM, a parish and village in Middlesex, 5½ m. N by E of St. Paul's, London, and intersected by the Northern and Eastern Counties railway. Area 8,403 acres. Pop. in 1801, 3,629; in 1831, 6,937; in 1851, 9,120.—The village consists of one long street on the road to Ware and Hertford, and is almost united with the metropolis by other villages, hamlets, and houses, scattered along the road between them.

TOTTENHILL, a parish in Norfolk, 6 m. NNE of Market-Downham. Area 1,599 acres. Pop. 412.

TOTTERIDGE, a parish in Hertfordshire, 1½ m. S of Chipping-Barnet. Area 1,597 acres. Pop. in 1831, 595; in 1851, 595.

TOTTINGTON, a parish in Norfolk, 4 m. SSW of Watton. Area 3,218 acres. Pop. in 1851, 370.

TOTTINGTON (HISHEM), a township in Bury p., co.-palatine of Lancaster, 6 m. NNE of Bury. Area 3,886 acres. Pop. in 1851, 2,958.

TOTTINGTON (LOWME), a chapelry in Bury p., co.-palatine of Lancaster, 3½ m. NNW of Bury. Pop. in 1831, 9,280; in 1851, 10,691.

TOU (CAPE), a promontory on the Caucasian coast of the Black sea, 9 m. S of Chapsougo, in N lat. 44° 10', E long. 38° 55'.

TOUAT. See TUAT.

TOUBANG, a town on the N coast of the island of Java, 470 m. E of Batavia.

TOUCHEA, a village of France, in the dep. of Saone-et-Loire, cant. and 5 m. NNW of Givry. Pop. 1,100.

TOUCHEZ (LES), a village of France, in the dep. of Loire-Inferieure, 3 m. E of Nort.

TOUCQUEZ, a river of France, which rises a little to the NE of Merlerault, in the dep. of Orne; runs N; enters the dep. of Calvados; and falls into the Channel after a course of 60 m.—There is a village of the same name on this stream, about 3 m. above its embouchure.

TOUCY, a town of France, in the dep. of Yonne, 15 m. W by S of Auxerre, on the l. bank of the Ouanne.

TOUGET, a town of France, in the dep. of Gers, 17 m. NE of Auch.

TOUGH, a parish of Aberdeenshire, 22 m. W by N of Aberdeen. Pop. in 1831, 828; in 1851, 891.

TOUGH, TUUGH, or TUORAGH, a parish in co. Limerick, 3½ m. N by E of Pallasgreen, containing the village of Cappamore. Area 6,519 acres. Pop. in 1831, 3,584; in 1841, 3,758.

TOUGHCLUGGIN, or CLUGGIN, a parish in co. Limerick, 2½ m. ENE of Pallasgreen. Area 2,094 acres. Pop. in 1831, 217; in 1841, 322.

TOUILLE, a village of France, in the dep. of Haute-Garonne, cant. and 2 m. SSE of Salies, near the r. bank of the Salat. Pop. 450.

TOUILLON, a village of France, in the dep. of Cote-d'Or, 10 m. WNW of Baigneux-les-Juifs. Pop. 600.—Also a village in the dep. of Doubs, 7 m. S of Pontarlier, near the source of the Doubs.

TOUFVBOV, a town of Russia, in the gov. of Podolia, 24 m. NW of Batslav, near the r. bank of the Bug.

TOUL, a town of France, in the dep. of Meurthe, situated on the Moselle, 12 m. W of Nancy, in a fertile valley, surrounded by a chain of hills covered with vineyards. Pop. 7,400. Its old walls were destroyed in 1700, and the place considerably enlarged and improved by the construction of a new rampart flanked with bastions. The cathedral is a fine edifice of the 17th cent. T. has an hospital, an

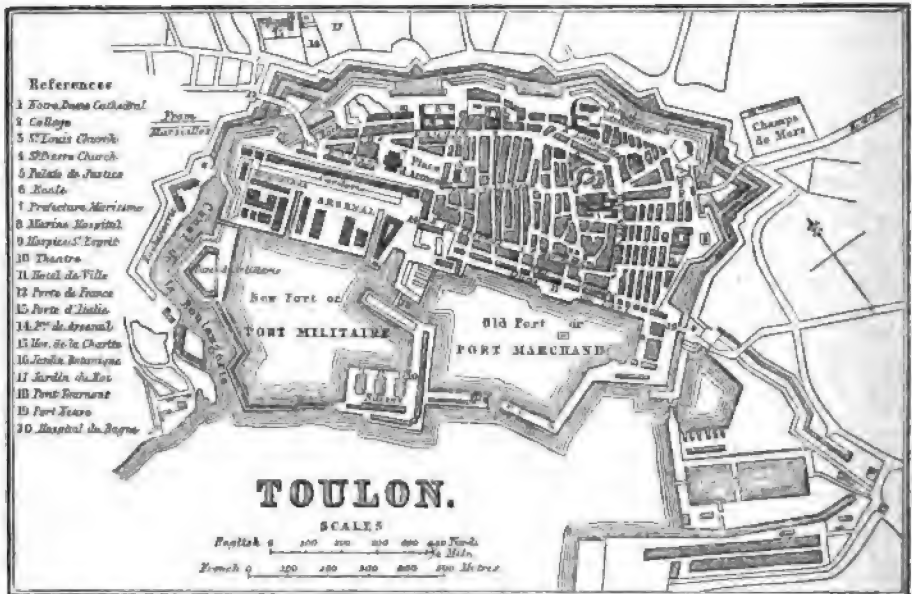

arsenal, and barracks, and a handsome stone bridge over the Moselle. The manufactures chiefly consist of pottery and stockings. This town was a free city of the German empire until 1552.

TOULA. See **TULA**.

TOULON, a town of France, in the dep. of Saône-et-Loire, on the river Arroux, 20 m. W by N of Charolles. Pop. 1,600. It is joined to a village of the same name on the other side of the river, by a bridge of 13 arches.

TOULON-SUR-MER, a seaport and great naval arsenal in the SE of France, situated in the dep. of Var, on a deep double bay of the Mediterranean, in N lat. 48° 7', E long. 5° 56'. It is built on gently rising ground at the foot of a ridge of lofty mountains, which shelter it from the N, and sweeping round on each side, enclose the bay. It is surrounded with ramparts, ditches, and bastions, of great strength; and is further defended by a fine citadel, and a number of forts and batteries distributed on the neighbouring eminences, and along a tongue of land projecting into the bay. The moles which separate the port from the roadstead are hollow, bomb-proof, and lined by batteries. The

town itself is divided into an old and a new town. The former is ill built, but contains one long straight street, called the Rue-aux-Arbres from the trees with which it is shaded. The new town is better built, containing several public structures erected by Louis XIV., a few straight streets, and a Place d'Armes (a), used for exercising the garrison. The hotel-de-ville (b) is a handsome structure facing the harbour. Toulon has no river; but several streams descending from the neighbouring mountains, supply the fountains constructed in different parts of the town. Woollen cloth, hosiery, soap, candles, and leather, form the chief articles of manufacture. There are also ship-building docks, dye-works, and iron-foundries here; but the importance of the place is derived from its having long been one of the chief stations of the French navy, being on the Mediterranean what Brest is on the Atlantic. It has two ports, known as the old and the new ports, but which might more properly be called the commercial and the military ports. The old port or Port Marchand (A), is a basin surrounded with a handsome quay, and lined with good edifices. The new port or Port Militaire (B), immediately to the W of

the old port, has an area of 35 acres, is one of the finest of Europe, and is said to be capable of containing 200 sail-of-the-line. It is surrounded by slips, arsenals, storehouses, and foundries of government. The *corderie* or rope-house (d) is nearly 1,200 ft. in length, and fire-proof. The roadstead is spacious: the sea has here no visible flux or reflux, and is tranquil in almost every wind. The arsenal (e) is a very large edifice, filled with every requisite for the equipment of vessels. The trade of T. is not extensive, being limited to the products of the vicinity, such as wine, oil, silk, and fruit of different kinds; but has increased considerably since the occupation of Algiers. Regular steam communication is maintained from this port with Algiers and Corsica. The tunny fishery is extensive. The pop. is about 29,000, exclusive of the workmen employed in the arsenal, amounting to about 4,000, and of the *forçats* or galley slaves, between 3,000 and 4,000 in number. T., which was made a naval station by Henry IV. and Louis XIV.,

has long been the scene of the equipment of naval expeditions; but the most remarkable event in its history is the occupation of the town and harbour by the British in the autumn of 1793; its subsequent siege by the republican troops of France; and the precipitate abandonment of the place by the British troops, on the 19th of December 1793, after burning 27 vessels, and carrying off 15 of the squadron contained in the port. The republicans, on obtaining possession of the place, which had been surrendered to the English by the royalist portion of the inhabitants, exercised great cruelties towards those who had or were suspected to have participated in delivering it to the English. It was from this port that the military expeditions sailed to Egypt in 1798, to the Morea in 1827, to Algiers in 1830, and to Ancona in 1832.—The arrond. of T. comprises 7 cants. with an area of 129,064 hectares. Pop. in 1846, 127,854.

TOULOS, a lake of Russia, in the gov. of Olonetz, about 120 m. WNW of Poviatnetz, under the paral-

lel of $63^{\circ} 30' N$. It is 24 m. in length from NW to SE, and about 6 m. in breadth.

TOULOUSE, a river of France, which rises 5 m. NNE of Aix; runs first WNW, and then SW; passes Salon; and discharges itself into the Etang-de-Berre, after a course of 24 m.

TOULOUSE, a city of France, formerly the capital of Upper Languedoc, now of the dep. of Haute-Garonne, situated on the r. bank of the Garonne, 132 m. SE of Bordeaux, 478 ft. above sea-level. Pop. in 1789, 55,068; in 1821, 52,328; in 1846, 94,286, of whom 10,747 were seamen. The Garonne is here navigable, and as wide as the Seine at Paris; the situation of T. on its banks, and near the junction of the great canal of Languedoc or Canal-du-Midi, is consequently highly advantageous for trade. It is built chiefly on the r. bank of the river, but part of it stands on an island in the river; and on the l. bank is the suburb of St. Cyprien. The buildings are almost entirely of red brick; even the town walls are of that material; and its streets are narrow, winding, and irregular. The chief embellishments of the place consist in the public promenades, the river, the quays, and the bridge over the Garonne, the last a fine structure, 810 ft. in length, and 72 ft. in breadth, built in the middle of the 17th cent. The cathedral is a handsome though somewhat irregular building. The hotel-de-ville is large, and its façade forms the side of a square called Place-du-Capitole or Place-Royale. The Place-la-Fayette is a handsome circus lined with regular mansions. The building, once the residence of the counts of Toulouse, is now used as a court of justice, though its massy construction conveys to the spectator the idea of a fort. The other buildings most worthy of notice are the old church of St. Sernin, the palace of the archbishop, the hospital, the mint, the exchange, and the theatre. There are also a museum, a public library, a picture gallery, a botanical garden, and an observatory. The manufactures are various, consisting of silks, woollens, linens, leather, vermicelli, porcelain, wax candles, cutlery, and pottery; there are also copper works, tanneries, dye-works, and distilleries, and a cannon foundry.—T. acquired an unfortunate title to notice, by an obstinate battle fought in the vicinity, on 10th April, 1814, between the British under Wellington, and the French under Soult; neither commander having been apprised of the abdication of Napoleon.—The arrond. of T., comprising 9 cant. with an area of 158,570 hectares, had a pop. of 177,329 in 1846.

TOUNG-HU, or **TONGO**, a town of Pegu, on the r. bank of the Sitang, in N lat. 19° . It is surrounded by a high brick wall, with a solid rampart, and a broad wet ditch, each face of which is considerably upwards of a mile in length. The town occupies but a small portion of the enclosure; temples, *kyooms* or monasteries, groves of lofty trees, and extensive fruit-gardens, are interspersed among large open spaces. There is also a large natural tank within the walls. The wall is of very ancient date, and the place is untenable as a fortification, independently of its vast size, from the extensive dilapidation of the wall in many places.

TOUPO, **TOWRO**, or **TAURO**, a lake of New Zealand, in S lat. $39^{\circ} 35'$. It is described as "one of the most superb lakes in the world,—not from its size, although that is considerable, but from the extreme magnificence of the scenery surrounding it." Mr. Chapman considers it to be 35 m. long, and 20 m. broad. Its outline is a sort of irregular triangle, with the two most distant angles forming the N and S ends. The W shore is apparently nearly straight, and the third point of the triangle will be about the

E boundary of the lake. At this E angle is a deep bay about 6 m. long, running SE, which is invisible except almost immediately opposite the entrance.

"The most peculiar feature in the appearance of this lake is the immense height of the surrounding cliffs; they are always perpendicular, although in some instances rising in terraces one behind the other, and vary from 500 to 1,000 ft. high at several parts of the lake, particularly at the NNW and NE sides; these rise perpendicularly from the water to such a height, that, says Mr. Bidwill, "I never saw their tops through the clouds for above five minutes together during the eight days I was on the lake. There are but few places where a canoe can land, and at those the beaches are very short and narrow; they are covered with pumice and black sand, and always indicate the entrance of a small stream of water. There are a number of small waterfalls round the lake, but none of any consequence; the only river or stream of any size which runs into it being the Waikato, which runs in at the only part of the lake (the S end) where the banks for any distance are level and the water shallow. At the N end is a very peculiar mountain, with an outline as regular as if it had been the work of art. At the two extremes of the range are two peaks just alike, and each about one-third the height of the mountain. At about the distance of another third rise two other equal peaks, and in the centre rises a fifth, I suppose about 5,000 ft. high." This romantic region is extremely populous, although comparatively sterile.

TOUE (LA), a village of Piedmont, in the prov. of Pinerolo, on the Peltsie. There is here a large cotton-spinning factory.

TOURATEA, a district and town in the S part of the island of Celebes. The district is bounded by Macassar, Boutain, and the sea. The town is 36 m. S of Macassar. It has manufactories of cotton fabrics, white and coloured, for the Dutch trade in the Molucca and Philippine islands and in India, and has also several silk factories.

TOURAVAKAIRA, a town of Hindostan, in the prov. of Mysore, 60 m. N of Seringapatam. It is well defended by an earthen rampart and a ditch, and has two forts. It contains two Hindu temples of great antiquity, and about 700 houses.

TOURBA (CARA), a headland of Northern Africa, on the coast of Barca, 15 m. W of Derna, in N lat. $32^{\circ} 54' 10''$, E long. $22^{\circ} 2' 45''$.

TOURBALI, or **TOURALI**, a town of Turkey in Asia, in Anatolia, in the sanj. of Aidin, 23 m. SSE of Smyrna, at the E base of a mountain, of which the ancient *Metropolis* occupied the summit.

TOURBET, or **TOORBUT-HYDEREE**, a fortified town of Persia, in the prov. of Khorassan, 75 m. SSW of Meshed. Pop. 18,000.

TOUR-BLANCHE (LA), a commune of France, in the dep. of the Dordogne, cant. and 4 m. ENE of Verteillac, at the foot of a lofty mountain. Pop. 589.

TOURCOING, a canton, commune, and town of France, in the dep. of the Nord, and arrond. of Lille. The cant. comprises 9 coms. Pop. in 1831, 40,078; in 1846, 52,308. The town is 7 m. NE of Lille. Pop. in 1846, 26,834. The streets are well and regularly built, and it contains a large and handsome square in which is the town-house, two churches, the remains of the castle of the dukes of Havre, a college, and an almshouse. The industry of the place consists chiefly in the manufacture of varieties of cotton and woollen fabrics, carpets, yarn, soap, leather, bricks, sugar from beet-root, &c. It has also a salt-refinery, several breweries, and dye-works. The origin of this town is unknown; but so early as the 12th cent. it was noted for its

manufactures. It has repeatedly suffered from fires.

TOUR-D'AIGUES (LA), a commune of France, in the dep. of the Vaucluse, cant. and 4 m. NE of Pertuis, in a valley. Pop. 2,300. It has a manufactory of parchment and several silk-mills.

TOUR-D'AUVERGNE (LA), a town of France, in the dep. of the Puy-de-Dôme, 29 m. W of Issoire, on a lofty basaltic plateau. Pop. 1,830. In the vicinity are the remains of the ancient castle of the Auvergne family.

TOUR-DE-FRANCE (LA), a canton, commune, and town of France, in the dep. of the Pyrénées-Orientales, and arrond. of Perpignan. The cant. comprises 11 coms. Pop. in 1831, 6,205; in 1846, 6,802. The town is 14 m. WNW of Perpignan, near the r. bank of the Gly. Pop. 1,217. It has a tannery and several distilleries of brandy.

TOUR-DE-PEIL (LA), a town of Switzerland, in the cant. of Vaud, district and 1 m. SE of Vevay, from which it is separated by a charming promenade, and on the NE bank of the lake of Geneva. It is enclosed by ancient walls and ditches, and commands, from a terrace which rises from the edge of the lake, one of the finest views in the locality.

TOUR-DE-SALVAGNY (LA), a village of France, in the dep. of the Rhone, cant. and 5 m. ESE of Arbrèle. Pop. 459.

TOUR-DE-TREME (LA), a village of Switzerland, in the cant. and 15 m. SSW of Friburg, near the l. bank of the Sarine. Pop. 450.

TOUR-DU-MEIX (LA), a village of France, in the dep. of the Jura, cant. and 2 m. E of Orgelet, between two mountains, near the r. bank of the Ain, here crossed by a bridge. Pop. 360.

TOUR-DU-PIN (LA), an arrondissement, canton, commune, and town of France, in the dep. of the Isère. The arrond. comprises an area of 132,806 hect., and contains 8 cant. Pop. in 1831, 126,146; in 1841, 132,960; in 1846, 136,627. The cant. comprises 16 com. Pop. in 1831, 18,084; in 1846, 19,429.—The town is 31 m. NNW of Grenoble, on the l. bank of the Bourbre, in a fertile locality. Pop. in 1789, 1,014; in 1821, 2,020; in 1831, 2,334; in 1846, 2,665. It is small and ill-built. With the exception of a sugar factory, an oil-mill, and a tannery, it possesses no industry.

TOURETZ, a town of Russia in Europe, in the gov. of Grodno and district of Novogrodek.

TOURFAN, a volcano of the Thian-shan chain, on the confines of Chinese Turkestan and the Chinese prov. of Kan-su, in N lat. 48° 30', E long. 89° 31'. It constantly emits volumes of flame and smoke, and is noted for its sal ammoniac, which the Kalmuks transport hence to all parts of the country.

TOURFAN, or **TOURPAK**, a district and town of Chinese Turkestan, near the Thian-shan mountains, about 180 m. W of Khamil, between two rivers. The temperature of the locality is in summer very high, and the air is loaded with sand from the adjacent arid mountains. It produces corn, millet, lint, melons, and in considerable quantities cotton and pulse. Some distance to the W are the ruins of Old T. Goes represents T. as a strong well-fortified city. In the Jesuits' map it is placed in 43° 30' N lat., and 89° 36' E long.; but in Sir George Staunton's map, where it is called Tulooan, the Chinese being unable to sound the consonant *r*, it is placed 24° 30' W of Pekin, or 91° 58' E of Greenwich, and in 43° N lat. By the Jesuits it is stated to be 6 days' journey WNW of Hami, over a branch of the Cobi, but 10 days' by the hills to the N, which is reckoned the safer road. The inhabitants of the country of T., says Haitho, the Armenian, in his Oriental history, are called Jogoors.

They abstain rigidly from drinking wine, and eating animal food. They raise much wheat, but have no vines. Their towns are very pleasant and contain many temples sacred to the worship of idols. They cultivate the arts and sciences, but are not at all addicted to war; they have a peculiar mode of writing, [the Oigoorian character,] which has been adopted by all their neighbours [the Mongols]. The inhabitants of T., says Shadi-Khuaja, who visited this district in 1420, are idolaters [Buddhists] who perform the ceremonies of their religion in spacious temples. To the W of T. 8 or 9 leagues, is Hochew, the ancient capital of the Oigoors, still called Pe-tung-tu-hu-fy by the Chinese.

TOURIHEY, or **LAHEHEY**, a town of Caffraria, in the Bichuana territory, 120 m. W of Lettaku. It contains about 100 houses. The inhabitants paint their bodies red, and powder the hair with a blue shining dust. Around are extensive pasturages, on which large herds of sheep are reared.

TOURIIA, a river of Russia in Europe, in the gov. of Volhynia, which has its source in the district and 24 m. ESE of Vladimir; runs first NW, then E, into the district of Kovel; bends NNE; and after a total course of about 114 m., joins the Prepet on the r. bank.

TOURIN, a mountain of Turkey in Europe, in Rumelia, in the sanj. of Gallipoli, 42 m. SSW of Philippopolis. It connects itself on the N with the Despotto-dagh or ancient *Rhodope*.

TOURINNE, a department and commune of Belgium, in the prov. of Liege and arrond. of Huy. Pop. 191.

TOURINNES, a commune of Belgium, in the prov. of Brabant, and dep. of Tourinnes-Beauechain. Pop. 1,107.—Also a com. in the sanj. and dep. of Tourinnes-Saint-Lambert. Pop. 522.

TOURINNES-LA-GROSSE, a department and commune of Belgium, in the prov. of Brabant and arrond. of Nivelles. Pop. 1,174.

TOURINNES-SAINT-LAMBERT, a department and commune of Belgium, in the prov. of Brabant and arrond. of Nivelles. Pop. 1,655.

TOURINSK, a town of Russia in Asia, in the gov. and 380 m. W of Tobolsk, on the Tura. Pop. 4,000, exclusive of the Tartars who reside in the suburbs. It has a suburb, six churches, a convent, and a seminary. In the vicinity are mines of iron. T. occupies the site of an ancient Tartar town named Epantchin.

TOURINSK (NIZNI), a town of Russia in Asia, in the gov. of Perm, on the r. bank of the Tura. It has extensive iron-works.

TOURINSK (VERKHNE), a town of Russia in Europe, in the gov. of Perm, district and 53 m. SSW of Verkhoturie, on the NE bank of a lagoon formed by the Tura. It contains about 315 houses, and has extensive iron-works.

TOURINSKALA, a town of Russia in Asia, in the gov. of Tobolsk, district and 47 m. ESE of Tourinsk, on the r. bank of the Tura.—Also a town in the gov. and district and 150 m. SW of Irkutsk.

TOURISK, a town of Russia in Europe, in the gov. of Volhynia, district and 11 m. SW of Kovel, on the l. bank of the Touria.

TOURJAN, a lofty mountain of Turkey in Europe, in Rumelia, in the sanj. of Sophia, 20 m. NNW of Tatar-Bazardjik, in N lat. 42° 21', E long. 24° 20'. It belongs to the Balkan chain.

TOURJELE, a town of Russia in Europe, in the gov. and district and 18 m. SSE of Vilna.

TOURKA, a small river of Russia in Asia, in the gov. of Irkutsk and district of Verkhne-Oudinsk, an affluent of Lake Baikal.

TOURLA, a col of the Pyrenees, between the

French dep. of the Hautes-Pyrenees and the Spanish prov. of Aragon, near the source of the Gaub, and to the SSW of Casterels.

TOUR-LANDRY (La), a commune and town of France, in the dep. of the Maine-et-Loire, cant. and 5 m. SSE of Chemille. Pop. 1,781.

TOURLAVILLE, a commune and town of France, in the dep. of the Manche, cant. and 4 m. ENE of Océville, at the foot of a fine range of hills, on which are the remains of an ancient Roman camp. Pop. in 1846, 4,549. It has extensive manufactories of glass, pottery, and bricks. In the vicinity are quarries of slate and paving-stones. This village is supposed to occupy the site of the ancient *Corialtum*, mentioned by Ptolemy in the itinerary of Antoninus, and the Theodosian map.

TOURLY, a village of France, in the dep. of the Oise, cant. and 4 m. SE of Chaumont, on the slope of a hill, near the l. bank of the Troene. Pop. 220. It has an ancient castle.

TOURMENTE (Cape), a steep and elevated headland of Lower Canada, in the district of Quebec and county of Northumberland, on the NW coast of the estuary of the St. Lawrence, 8 m. below the island of Orleans. It has an alt. of 1,800 Parisian ft. above sea-level.

TOURMIGNIES, a village of France, in the dep. of the Nord, cant. and 2 m. SW of Pont-a-Marcq, on the Marcq. Pop. 1,015.

TOURNA, a fortress of Turkey in Europe, in Bulgaria, in the sanj. of Rustchuk, 2 m. WNW of Nikopol, on the l. bank of the Danube, a little below the confluence of the Aluta.

TOURNAGHAUT, a celebrated pass of Hindostan, in the prov. of Bujapur, in the Western Ghats, between the state of the rajah of Sattara and the English district of Coucan, in N lat. 17° 47'.

TOURNAI, **TOURNAY**, or **DOORNIK**, an arrondissement, département, commune, and town of Belgium, in the prov. of Hainault. The town is 15 m. ESE of Lille, and 47 m. SW of Brussels, on the railway from Mons to Brussels, and on the Scheldt, by which it is divided into two parts connected by several bridges. It is enclosed by walls, bastioned and defended on the S by a citadel and other fortifications. The streets are straight and well kept, and the houses well-built. The quays, which are spacious, stretch along the banks of the river, and are in some parts lined with trees. Amongst its other edifices may be named the cathedral, a fine Gothic structure with five towers, the church of St. Martin, the Episcopal palace, the town-house, the guardhouse, the belfry, an ancient hospital, and some fine flour-mills. It has besides several churches, commercial chambers, a bank, a theatre, an atheneum, several academies, an orphan's asylum, five hospitals, and fine promenades. The pop. of T. is about 33,000. This town, one of the most commercial in Belgium, possesses manufactories of hats, printed muslin, cotton and woollen fabrics, blankets, hosiery, china and earthenware, paper, tobacco, and soap, several tanneries, dye-works, spinning-mills, limekilns, &c. It is noted for its liqueurs, especially curacao, and for its fruit. Its trade consists chiefly in articles of local manufacture, bronze, marble, chocolate, and fruit. This town returns 5 deputies to the provincial states. T., the *Tornacum* of the middle ages, one of the most ancient and important towns of Belgian Gaul, was, at the period of the conquest by Julius Caesar, capital of the Nervii, and bore the name of *Civitas Nerviorum*. It has suffered much from military operations. It was formerly strongly fortified, and had one of the finest citadels in Europe, which was levelled by the French towards the middle of the 18th cent. In 1792, an action took place here be-

tween the Austrians and the French; and in May 1794, a more serious conflict between the latter and the allied troops under the duke of York. This was soon followed by the evacuation of Flanders, and T. remained in possession of the French until Feb. 1814.

TOURNAISIS, an ancient district of Belgium, in Flanders, now comprised partly in the prov. of Hainault, and partly in that of Western Flanders. Its cap. was Tournai.

TOURNAN, a town of France, dep. of Seine-et-Marne, 14 m. N by E of Melun. Pop. 1,765.

TOURNAY, a town of France, dep. of Hautes-Pyrenees, 12 m. SE of Tarbes, on the Arios. Pop. 1,258.

TOURNEPPE, a commune and village of Belgium, in the prov. of Brabant, 3 m. E of Halle, on a small affluent of the Senna. Pop. of com. 2,746.

TOURNETTE, a mountain of the Alps, in Savoy, near Annecy, having an alt. of nearly 7,200 ft. above the level of the sea.

TOURNEUR (La), a commune and village of France, in the dep. of Calvados, 2 m. NNE of Beny-Bocage. Pop. 1,700.

TOURNON, a town of France, in the dep. of Ardèche, on a declivity near the Rhone, and opposite to Tain with which it communicates by a suspension bridge. Pop. in 1821, 3,706; in 1846, 4,807. It has a traffic in wine, charcoal, wood, silk, and corn; and some manufactures of silk and cotton stuffs, tiles, bricks, potash, and beet-root sugar. On the opposite bank of the Rhone is cultivated the well-known wine called *Hermitage*.—The arrond. of T. comprises 11 cantons, and an area of 184,094 hectares. Pop. in 1846, 143,365.

TOURNON, a town of France, dep. of Lot-et-Garonne, 14 m. E of Villeneuve, and 22 m. NE of Agen. Pop. of com. in 1846, 5,160.

TOURNON-SAINT-MARTIN, a canton and village of France, in the dep. of Indre, arrond. and 9 m. NW of Le Blanc. Pop. of v. in 1846, 1,299; of cant., 8,470.

TOURNUS, a town of France, dep. of Saône-et-Loire, on the r. bank of the Saône, 20 m. NE of Maçon. Pop. 4,216. It carries on a traffic in corn, wine, and wood; and was formerly the seat of a richly endowed abbey.

TOURNY, a village of France, in the dep. of Eure, cant. and 3 m. NW of Ecos. Pop. 1,050.

TOURO, a village of Portugal, in the prov. of Beira, comarca and 30 m. NE of Castello-Branco.

TOUROGEN, a town of Russia, in the gov. of Wilna, 21 m. NE of Tilsit.

TOUROUVRE, a town of France, dep. of Orne, 7 m. NE of Mortagne. Pop. 1,700. Iron is wrought in the vicinity.

TOURPES, a commune and village of Belgium, in the prov. of Hainault, on the Dendre, 18 m. NW of Mons. Pop. 1,350.

TOURRETTE-DE-LEVENZO (La), a village of the Sardinian states, in the prov. and 6 m. N of Nice, in a valley watered by an affluent of the Paglion. Pop. 1,200.

TOURRETTES (Les), a village of France, in the dep. of Var, cant. and 3 m. NNE of Bar. Pop. 1,146.

TOURS, a city of France, the capital of the dep. of Indre-et-Loire, situated in a delightful plain, on the S or l. bank of the Loire, a little above the spot where that river is joined by the Cher, in N lat. 47° 25' 47", 120 m. SSW of Paris. The city is of an oblong form, and lies parallel to the course of the Loire, across which is here thrown a magnificent bridge of 15 arches, each of 264 yds. space, 1,400 ft. in total length, and 75 ft. in width. Including its five suburbs, it had a pop. of 81,772 in 1789; 26,669 in 1836; and 30,766 in 1846, a number by no

means proportioned to the large extent of ground enclosed by the walls; but many of the houses are small and low in structure. The Rue-Neuve or Rue-Royale, is a street of great elegance, built on a uniform plan, and traversing the city throughout its whole length in a line with the bridge over the Loire. In the same line is the Avenue-de-Grammont, leading to the bridge over the Cher; and the great walk called the Mail extends in a line with the bridges and the Rue-Neuve. The length of the whole avenues, street, and bridges, is not short of 6 m. The smaller streets to the r. and l. of the Rue Neuve, are as narrow and gloomy as in other French towns. T. is, and has long been, the seat of an archbishop. Its cathedral is remarked for its lofty spires, its huge western window, its ingenious clock, and its library. The interior is 256 ft. in length, and 85 ft. in height. The hotel-de-ville, which contains a public library of 40,000 vols., and the theatre are good provincial buildings; and the public residence of the archbishop is a very fine structure; T. has a race-course, a botanical garden, and a museum.—Of the manufactures of T. the principal is silk, which was introduced here earlier than in any other town of France, by workmen brought from Italy in the 15th cent. Their number increased in the course of the 16th to 20,000; but the competition of Lyons, situated in a climate more favourable to the silk worm, has reduced this manufacture in T. and its neighbourhood. The other manufactures of the place are woollens, woolen yarn, carpets, starch, wax-candles, and leather; some wine and brandy is made from the vines of the neighbourhood, but altogether the trade of the town, notwithstanding the vicinity of two navigable rivers, is inconsiderable. It is now connected by railway with Paris, Bordeaux, and Nantes. The great advantage of T. is its attraction to travellers, as well from the elegance of the town as the beauty of the surrounding country. It has consequently been a favourite place of resort for our countrymen since 1814. The climate is considerably warmer than in Britain during summer; and the winters are not long. T., the ancient *Cesaromagus*, has been a place of note since the early ages of the French monarchy. It was the scene of the repulse of the Saracens by Charles Martel in 739; and in subsequent ages, its castle, built on a rock, served more than once as a place of refuge for the royal family in times of commotion.—The arrond. of T., comprising an area of 265,712 hectares, and 9 cantons, had a pop. of 157,062 in 1846; the cant., comprising 23 coms., had a pop. of 55,482.

TOURS, a commune and town of France, in the dep. of the Puy-de-Dôme, cant. and 5 m. E of St. Dier, at the foot of a high hill. Pop. in 1846, 2,620.—Also a com. in the dep. of the Somme, cant. and 4 m. SW of Moyenneville. Pop. 1,158.—Also a village of Sardinia, in the div. of Savoy and prov. of Upper Savoy, 2 m. SE of Confians, on the slope of a hill, near the r. bank of the Isère. Pop. 500.

TOUR-SAINT-GELIN (SAINT), a village of France, in the dep. of the Indre-et-Loire, cant. and 6 m. from Richelieu. Pop. 820.

TOURS-SUR-MARNE, a village of France, in the dep. of the Marne, cant. and 6 m. E of Ay, on the r. bank of the Marne. Pop. 796. It has a considerable trade in wine.

TOURTASKA, a town of Russia in Europe, in the gov. and district and 90 m. NE of Tobolsk, on the r. bank of the Ob.

TOURTENAY, a village of France, in the dep. of the Deux-Sevres, cant. and 7 m. NNE of Thouars, near the l. bank of the Dive. Pop. 600. It has a

distillery of brandy, and in the vicinity are quarries of free-stone.

TOURTERON, a canton, commune, and town of France, in the dep. of the Ardennes, and arrond. of Vouziers. The cant. comprises 10 coms. Pop. in 1831, 5,561; in 1846, 5,648.—The village is 11 m. NNW of Vouziers, on a small affluent of the Aisne. It has a distillery and a tannery.

TOURTOIRAC, a commune of France, in the dep. of the Dordogne, cant. and 5 m. WNW of Haute fort, on the l. bank of the Haute-Vézère. Pop. 1,406.

TOURTOUSE, a village of France, in the dep. of the Ariège, cant. and 4 m. SW of St.-Croix-de-Volvestre, on the r. bank of the Lons. Pop. 1,275.

TOURVES, a commune and town of France, in the dep. of the Var, cant. and 7 m. W of Brignolles, in a fertile plain. Pop. in 1846, 2,548. It has distilleries of brandy, manufactories of soap, and tanneries. Marble is quarried in the vicinity.

TOURVILLE, a commune of France, in the dep. of the Manche, cant. and 2 m. S of St. Malo-de-la-Lande, on a hill, near the shore of the English channel. Pop. 1,026.

TOURVILLE-LA-CAMPAGNE, a town of France, in the dep. of the Eure, 13 m. W of Louviers, on a plateau. Pop. 1,060.

TOURY, a town of France, in the dep. of the Eure-et-Loire and cant. of Janville. Pop. 1,35. It has manufactories of beet-root sugar.

TOUS, a village of Spain, in the prov. of Valencia, 21 m. NNW of San-Felipe-de-Jativa, near the l. bank of the Jucar, on a hilly locality. Pop. 1,025. It has two public schools, and manufactories of basket-ware and of charcoal.

TOUSKAR, a river of Russia in Europe, in the gov. of Kurak, which has its source on the confines of the gov. of Orel, 21 m. NE of Fatej; flows through the W part of the district of Catchigri into that of Kurak; passes the town of that name; and a little below joins the Seim on the r. bank, after a sinuous course in a generally S direction of about 90 m.

TOUS-LES-SAINTS, or TODOS-OS-SANTOS, an island of the Japan archipelago, in the N. Pacific, to the SE of Nifon, in N lat. 30° 10', E long. 141° 20'.

TOUSSON, a village of France, in the dep. of the Seine-et-Marne, cant. and 6 m. WNW of La Chapelle-la-Reine. Pop. 456.

TOUSSOUL, a small lake of Independent Tartary, in Badakshan, to the SE of Vushgird. It receives on the SE a considerable river, but has no apparent outlet.

TOUSTE, a town of Galicia, in the circle and 33 m. SE of Tarnopol, on the l. bank of the Gnila, which here forms a lagoon.

TOUTENCOURT, a village of France, in the dep. of the Somme, 5 m. SW of Acheux. Pop. 1,140.

TOUTES-VOYES-SUR-OISE, a hamlet of France, in the dep. of the Oise and cant. of Creil, 9 m. W of Senlis, on the l. bank of the Oise. It has manufactories of iron and of tin wares.

TOUTSCHKOV, a town of Russia in Europe, in the gov. of Bessarabia and district of Ismail, on the Danube. Pop. 12,000. It is of modern foundation.

TOUVANT, a town of Algiers, in the prov. of Mascara, a little to the SW of Cape Hone, on the Mediterranean.

TOUVET (LA), a canton, commune, and town of France, in the dep. of the Isère and arrond. of Grenoble. The cant. comprises 15 coms. Pop. in 1831, 13,263; in 1846, 13,471. The town is 18 m. NE of Grenoble, in the valley of Gressivaudan, near the r. bank of the Isère. Pop. 1,796.

TOUVOIS, a village of France, in the dep. of the Loire-Inferieure, 5 m. NW of Legé. Pop. 700.

TOUVRE, a river of France, in the dep. of the Charente, which has its source 5 m. ENE of Angouleme, in a narrow basin enclosed by steep banks. Issuing thence with a breadth of 260 ft., it runs W past Touvre, Magnac, and Ruelle; and after a course of about 6 m., throws itself into the Charente on the l. bank, $1\frac{1}{2}$ m. N of Angouleme. Its waters abound with fish.—The village of T. is 5 m. E of Angouleme. Pop. 230.

TOUZAC, a village of France, in the dep. of the Charente, cant. and 6 m. SW of Chateaufort, on the slope of a hill, near the r. bank of the Né. Pop. 796. It has distilleries of brandy.

TOUZ-CASSRI, or **RUSO-CASTRO**, a town of Turkey in Europe, in Bulgaria, in the sanj. of Silistria, 15 m. W of Burgas, on the l. bank of the Ruso-Castro, an affluent of the gulf of Burgas.

TOUZER, or **TORER**, a town of the beylik of Tunis, 150 m. WSW of Caba, on the r. bank of Lake Loudeah. It has an active trade in dates.

TOUZ-GHIEUL, **TUKLA**, or **SALATO**, a lake of Asia Minor, in Caramania, partly in the sanj. of Ak-Serai, and partly in that of Konieh. It is about 42 m. in length from NE to SW, and 6 m. in breadth, and appears to be several lakes conjoined. Its waters are salt, and it has no apparent outlet, except in the rainy season, when they flow off on the NE to the Kizil-Irmak. This lake is the *Tat-tas Pulse* of antiquity.

TOUZ-KOUL, **Isir-Koul**, **TEMOURTON-NOR**, or **Jz-Hai**, a lake of the Chinese empire, in the SW part of Sungaria, and div. of Eli, between the Khaisaglim-daban on the NW, and the Mussurdagh on the SE, and to the S of Balkash-Nor. It is 120 m. in length from E to W, and 45 m. in breadth. It receives numerous tributaries from the surrounding mountains, and discharges itself on the NW into the Tsien, an affluent of the Sir.

TOUZKOURMATI, a large village of Turkey in Asia, in the pash. and 120 m. N of Bagdad, at the foot of a chain of mountains, in a plain watered by a large stream. It comprises about 400 houses, and is surrounded by numerous gardens. It derives its name from the dates and salt which abound in the locality.

TOUZLA (CAPE), a low sandy point on the coast of Anatolia, in the sanj. of Kodja-Ili, on the E side of the sea of Marmara, $3\frac{1}{2}$ m. N by W of Cape Panghia, and 21 m. SE of Constantinople. From this point the coast bends round to the E.—Also a river of Armenia, in the pash. of Erzerum, which has its source in the Ak-dagh; runs SE; and joins the Mourad-chai, between Melez-Ghird and Lyssa, and after a total course of about 60 m. On its banks is a town of the same name.

TOUZLA, or **TUKLA**, a town of Turkey in Asia, in Caramania, in the sanj. and 60 m. N of Konieh, in an elevated plain, at the SW extremity of Touz-Ghieu or Lake Touzla.

TOUZLA (LOWER), a town of Turkey in Europe, in Bosnia, in the sanj. and 60 m. ENE of Trawnik, on the Idalla, an affluent of the Spritzra. It has a wooden enclosure, an abundant salt-spring, and a remarkable grotto. The inhabitants are chiefly Christians. The environs abound with grain and fruit, and afford excellent pasturage.

TOUZLA (UPPER), a town of Turkey in Europe, in Bosnia, in the sanj. of Trawnik, 3 m. ESE of Lower Touzla, on the r. bank of the Idalla.

TOUZLA-CHAI, a river of Turkey in Asia, in Anatolia, in the sanj. of Bijia, which descends from the W side of the Kaz-dagh, a summit of the Ida chain; runs first SW, then NW; and after a course

of about 51 m., throws itself by two embouchures into the Archipelago, 12 m. N of Baba. The ancient *Pedacus* and *Smynthium* were situated on the banks of this stream.

TOVA, a small island of Patagonia, in the N part of the gulf of St. George, on the E coast, in S lat. $45^{\circ} 12'$, W long. $66^{\circ} 10'$.

TOVARRA, a town of Spain, in the prov. of Albacete, 27 m. SSE of Chinchilla, between two mountains, on each of which are a chapel, a convent, and an hospital. Pop. 6,490. It has manufactories of linen and coarse woollen fabrics.

TOVIANY, a town of Russia in Europe, in the gov. of Vilna, district and 12 m. NNW of Vilkomir, near the r. bank of the Moucha.

TOW, or **TOVS**, a small stream which crosses the S part of Northamptonshire, and falls into the Ouse at Cosgrove, near Stony-Stratford, Bucks.

TOWAGHTY, or **TOWAGHTY**, a parish in co. Mayo, 6 m. NNW of Hollymount. Area 3,067 acres. Pop. in 1881, 1,258; in 1841, 1,297.

TOWAHNAHIOOKS, a river of N. America, which falls into the Columbia, about 275 m. above its mouth. It is 200 yds. wide at its confluence, has a rapid current, and contributes about one-fourth as much water as the Columbia possesses before the junction. Its banks are chiefly inhabited by Snake Indians, who live principally on the salmon with which this river abounds.

TOWANDA, a township and village, the cap. of Bradford co., in Pennsylvania, U. S., 100 m. N by E of Harrisburg. Pop. 1,171.

TOWARD-POINT, a cape at the S end of the co. of Argyle, on the Clyde, 24 m. S of Inverary, in N lat. $55^{\circ} 51' 45''$, W long. $4^{\circ} 59' 42''$.

TOWCESTER, a parish and market-town in the co. of Northampton, 8 m. SW by S of Northampton, on the small river Tow. The parish comprises the hamlets of Caldicott, Handley, and Wood-Burcott. Area 2,790 acres. Pop. in 1881, 2,671; in 1851, 2,625.—The town, which consists chiefly of one long street of well-built houses, is a thoroughfare on the road from London to Holyhead. The inhabitants are chiefly employed in the manufacture of boots, shoes, silks, and bobbin-lace.

TOWEDNACK, a parish in Cornwall, $2\frac{1}{2}$ m. SW by S of St. Ives. Area 2,794 acres. Pop. 1,057.

TOWER-ISLAND, or **TORER**, a small island in the Eastern seas, near the SW coast of the island of Flores, in S lat. $8^{\circ} 52' 30''$, E long. $120^{\circ} 13' 30''$. It has a sugar-loaf shaped peak near its W extremity.

TOWERSEY, a parish of Buckinghamshire, 9 m. SW of Aylesbury. Area 1,200 acres. Pop. 448.

TOWIE, or **TOWIE-KINBATTOCK**, a parish in the NW of Aberdeenshire, intersected by the Don. Pop. in 1831, 728; in 1851, 758.

TOWMORE, **TOOMORE**, or **TUOMORE**, a parish in co. Mayo, containing the town of Foxford. Area 6,787 acres. Pop. in 1881, 3,576; in 1841, 3,744.

TOWNSBURY, a village of Warren co., in New Jersey, U. S., 44 m. NW of Trenton.

TOWNSEND, a township of Middlesex co., 40 m. NW of Boston. Pop. in 1840, 1,892; in 1850, 1,947.—Also a township of Windham co., Vermont, 40 m. SSW of Windsor, intersected by West river. Pop. in 1840, 1,315; in 1850, 1,354.—Also a township of Sandusky co., in Ohio, 96 m. N of Columbus. Pop. in 1840, 692; in 1850, 969.

TOWNSEND-HARBOUR, a village of Middlesex co., in Massachusetts, U. S., 37 m. NW by W of Boston.

TOWNSHEND, an island off the E coast of Australia, in S lat. $22^{\circ} 13'$, E long. $159^{\circ} 29'$.

TOWNSHEND (CAPE), a cape on the NE coast of Australia, in S lat. $22^{\circ} 15'$.

TOWNSHEND (Point), a cape on the SE coast of Admiralty island, in the N. Pacific, in N lat. 57° 7'.

TOWNSTALL, a parish of Devonshire, near Dartmouth. Area 1,758 acres. Pop. in 1851, 1,303.

TOWN-YETHOLM, a village in the p. of Yetholm, Roxburghshire, on the l. bank of Beannmont-water, directly opposite to Kirk-Yetholm. Jointly with the latter village it has about 1,000 inhabitants. A neat bridge connects the two villages.

TOWRIDGE, or **TORRIDGE**, a river of Devon, which rises about 4 m. from Hartland-point, near the source of the Tamar; thence runs in a SE course to Iddlesly, where it is joined by the Oke; and passing by Torrington and Bidford, enters the Severn at Barnstaple bay, about 2 m. below Appledore, where it is joined by the Taw.

TOWTON, a village of the W. R. of Yorkshire, 3 m. SE of Tadcaster, famous for a sanguinary battle fought here between the forces of the houses of York and Lancaster, on Palm Sunday 1461. Pop. in 1851, 123.

TOWY. See **TEIFY**.

TOWYN, a parish of Merionethshire, situated on the river Towynny, 11 m. S by W of Barmouth. Area 26,372 acres. Pop. in 1831, 2,694; in 1851, 2,769. The village commands a fine view of the sea, and has of late years been much frequented as a bathing-place.

TOWYNMY, a river of Montgomeryshire, which runs into the Dowy, 5 m. NE of Machynleth.

TOXTETH-PARK, a township in the p. of Walton, Lancashire, 3 m. SE of Liverpool. Area 8,768 acres. Pop. in 1801, 2,069; in 1831, 24,067; in 1851, 61,384. It forms a suburb of Liverpool.

TOYNTON (High and Low), two adjoining parishes of Lincolnshire, 2 m. E of Horncastle. Area of High T. 1,210 acres. Pop. in 1851, 212. Area of Low T. 950 acres. Pop. 133.

TOYNTON-ALL-SAINTS and **ST.-PETER'S**, two adjoining parishes in Lincolnshire, 2½ m. S of Spilsby. Area of T.-All-Saints, 3,120 acres. Pop. in 1851, 515. Area of T.-St.-Peter's, 2,530 acres. Pop. 486.

TOZER, a village of the Bilad-el-Jerid, 250 m. S of Tunis. It is a place of some manufacturing industry, and is the principal market for dates in the neighbourhood, and is said to carry on a considerable trade with the Niger. It is supposed to represent the ancient *Tisurus*.

TOZO, a river of Spain, which rises near Truxillo; runs S, and then WNW; and after a tortuous course of 30 m., joins the Rio-del-Monte on the l. bank.

TRABEN, a town of Prussia, in the gov. and 39 m. SW of Coblenz, on the l. bank of the Moselle, opposite to Trarbach. Pop. 1,350.

TRABI, a town of Russia, in the gov. of Wilna, 21 m. SSW of Ochmiana.

TRACHENBERG, a town of Prussian Silesia, 24 m. N of Breslau, on the Barth, the chief place of a principality belonging to the family of Hatzfeld. Pop. 2,450.

TRACHSELWALD, a village of Switzerland, in the cant. and 16 m. ENE of Berne. Pop. 1,717.

TRACHT, a village of Moravia, 21 m. S of Brunn, on the l. bank of the Thaya. Pop. 600.

TRACKEHNEN, a village of Prussian Lithuania, 15 m. SSW of Gumbinnen.

TRACTON, a parish in co. Cork, 3 m. S of Carrigaline, containing the villages of Minane and Tracton. Area 5,862 acres. Pop. in 1831, 2,838; in 1841, 2,959. A vein of galena intermixed with quartz and pyrites was at one time worked here; and the remarkable mineral substance called wavelite or hydragillite has been found in the vicinity of

Minane-bridge. It occurs in a hill of flinty slate, both adhering to that rock and in detached nodules. The nodules vary in size from the diameter of a pea to nearly 2 inches. The lustre is splendid; the colour, bluish green, passing into yellow.

TRACUNHAEN, a town of Brazil, in the prov. of Pernambuco, 40 m. W of Goyanna, on a river of the same name, which flows into the Atlantic near Point Pedras.

TRACY, a village of France, in the dep. of Nievre, cant. and 4 m. NW of Pouilly, on the r. bank of the Loire. Pop. 1,000.

TRACY-LE-MONT, a village of France, in the dep. of the Oise, cant. and 5 m. NW of Attichy. Pop. 1,500.

TRACY'S LANDING, a village of Ann Arundel co., in Maryland, U. S., 13 m. S by W of Annapolis.

TRADATE, a town of Austrian Italy, in the Milanese, 20 m. NW of Milan, near the l. bank of the Olona. Pop. 2,146. It has some trade in the wines of the district.

TRADE-TOWN, a village of Liberia, on the Grain coast of Western Africa, 15 m. SE of Great Bassam.

TRADEWATER, a river of Ohio, U. S., which has its rise in Christian co., and, running NW, falls into the Ohio, 200 m. below the mouth of Green river. It is about 70 yds. wide at its mouth, and has a course of 80 m.

TRADOK, a village on the W coast of Borneo, in the state and 21 m. SW of Sambas.

TRAETH-BICHAN, a bay of the Irish sea, on the W coast of the co. of Merioneth, 3 m. N of Harlech.

TRAETH-MAWR, a bay of the Irish sea, on the W coast of Wales, between the cos. of Merioneth and Caernarvon, 4 m. N of Harlech.

TRAFALGAR (Cape), a low sandy point on the SW coast of Spain, on the coast of Andalusia, at the NW entrance of the straits of Gibraltar, opposite to Cape Esparte on the coast of Africa, in N lat. 36° 10', W long. 6° 1'. On the 21st October 1805, the British fleet, commanded by Nelson, obtained a complete victory over the combined fleets of France and Spain under Villeneuve and Gravina, off this cape.

TRAFAYACH, a village of Styria, 12 m. W of Bruck, on an affluent of the Muhr. Pop. 610.

TRAFFORD-BRIDGE, a township of Plemond-stall p., Cheshire, 4½ m. NE by E of Chester. Area 401 acres. Pop. in 1831, 58.

TRAFFORD-WIMBOLDS, a township of Thorn-ton-in-the-Moors p., in Cheshire, 6 m. NE by N of Chester. Area 574 acres. Pop. in 1851, 106.

TRAGACETE, a village of Spain, in the prov. and 27 m. NE of Cuenca. Pop. 1,000.

TRAGARTH, a river of Brecknockshire, which runs into the Melta, above Istradwelthy.

TRAGEIN, or **TRAGWEIN**, a village of the archd. of Austria, 12 m. SE of Freystadt, near the r. bank of the Zellerbach.

TRAGHAN, a town of Fezzan, 80 m. E of Murzuk, once considerable, but now reduced to 500 or 600 inhabitants. The vicinity is well cultivated.

TRAGONISI, or **DRACONISI**, a small uninhabited island in the Grecian archipelago, 2 m. E of Myconi. It affords secure anchorage to vessels, but produces nothing beyond a little pasturage.

TRAHIGUERA, a town of Spain, in the prov. of Castellon-de-la-Plana, 16 m. NW of Peniscola, near the l. bank of the Senol. Pop. 1,900. It has manufactures of earthenware.

TRAHIRAS, a town of Brazil, in the prov. and 210 m. NNE of Goyaz, on a river of the same name, an affluent of the Rio-das-Almas.

TRAHONA, a town of Austrian Italy, in the

Valteline, in a valley, to which it gives name, 12 m. S of Chiavenna.

TRAIAN, a town of Turkey, in the sanj. of Ruzschak, 30 m. W of Kabrova, on the l. bank of the Oama.

TRAILINSKAIA, a town of Russia, in the territory of the Don-Cossacks, 24 m. SE of Kundimchevskaja, on the r. bank of the Don.

TRAINA, a town of Sicily, in the Val-di-Demona, on the river Traina, 30 m. NW of Catania. It contains a pop. of 7,000; but, like most of the inland towns of Sicily, it offers little of interest to travellers.

TRAINEL, a town of France, in the dep. of Aube, 6 m. SSW of Nogent-sur-Seine, on the Orvin.

TRAISKIRCHEN, or **DRASKIRCHEN**, a village of the archd. of Austria, 14 m. SW of Vienna.

TRAITORS' COVE, a harbour on the W side of the island of Revilla-Gigedo, in the N. Pacific, in N lat. 55° 40', so called by Vancouver, from his having here been exposed to an attack of the natives, who resisted all his efforts to conciliate them.

TRAITORS' HEAD, the NE point of Erromango, one of the New Hebrides, in S lat. 16° 43', so called by Cook in 1774, from the treacherous conduct of its inhabitants.

TRAITORS' ISLANDS, a cluster of small islands in a bay off the coast of New Guinea, in S lat. 1° 12'.

TRAITORS' ISLAND, an island in the Pacific, in S lat. 15° 55', W long. 178° 48', discovered by Le Maire and Schouten, in 1616, and so called from an attempt made by the natives to seize the vessel. It is low, with a hill in the centre, and divided by a channel 300 yds. wide, from the island of Kootahe. Both these islands were visited by Wallis in 1767, who called them Keppel's and Boscawen's islands; and afterwards by Perouse in 1787.

TRAJANOPOLI, or **ORIKHOVA**, a town of European Turkey, in Rometia, situated at the foot of the Despot-dagh, on the r. bank of the Maritza, the ancient *Hebrus*, about 30 m. from its mouth, in N lat. 41° 7' 30". It is the see of a Greek archbishop, and contains about 15,000 inhabitants; but being at some distance from the most frequented roads, is little visited by travellers. It is a place of considerable antiquity, and took its name from Trajan, to whom it was indebted for considerable improvements.

TRAJETTO, a town of Naples, in the Terra-di-Lavoro, 9 m. NE of Gaeta, on the r. bank of the Ansoeto, on the site of the ancient *Misturnæ*.

TRAKEMBURG, a town of Styria, 19 m. SE of Gilly.

TRAKOSKIN, a small town of Austrian Croatia, 19 m. W by S of Warasdin.

TRAKTOMEROV, a town of Russia, 52 m. SE of Kiev, on the r. bank of the Dnieper.

TRALEE, a parish and town in co. Kerry. Area of p. 4,606 acres. Pop. in 1831, 11,021; in 1841, 12,534. The parish comprises a small part of the Stackes mountains, and a prominent part of the strath or valley of the little river Lee.—The town, which is also a sea-port and a parl. borough, and the assize town and capital of co. Kerry, stands on the rivulet Lee, at the intersection of the road from Ardara to Milltown with that from Dingle to Limerick, 1½ m. ENE of the head of Tralee-harbour, and 142½ m. SW by W of Dublin. The site and the immediate environs of the town are low, flat, and subject to inundations from freshets of the Lee; but the middle grounds and the back grounds of the scenery around it are so composed as to form a panorama at once brilliant, beautiful, and comparatively unique. In front of the town, the vast expanse of waters and accompanying range of mountains which rise boldly from the shores of the bay,

and run W to Brandon, where they dip into the ocean; and on the other side, the broad fertile valley stretching E to Castle-Island, which is bounded on the N by the Stack-hills, and on the S by the higher range of Slieve-Mish. Several of the streets are spacious, well-built, regularly laid out, and aggregately neat or even handsome; the southern outskirts embrace a large expanse of demesne-grounds disposed in public promenades. The rivulet Lee runs through the middle of the town; and is spanned in its progress by several small bridges. T. is one of the most thriving towns in the S of Ireland; and has, for a number of years past, experienced great increase of trade, both as a market-town and as a sea-port. The borough sent two members to the Irish parliament; and continues to send one to the imperial parliament. Constituency in 1841, 258; in 1851, 228. Pop. of the town and borough in 1831, 9,568; in 1841, 11,863; in 1851, 12,649.

TRALEE-BAY, a bay on the coast of co. Kerry. It consists of an outer portion, called Tralee-bay, and an inner portion, usually called Tralee-harbour. The bay, or outer portion, is screened on the W by the low and flat peninsula which runs N as a partition between it and Brandon bay. Tralee-harbour or the inner bay, opens at the Samphire islands with a width of rather more than 1½ m., contracts to a width of ¾ m., re-expands to a width of 1½ m., thence gradually contracts to the embouchure of the river Lee, and altogether penetrates the land eastward to the extent of 4½ m.

TRALEE-SPA, a village, and a celebrated medicinal well, in co. Kerry, on the N shore of Tralee-harbour, 2½ W by N of Tralee.

TRALLEBORG, or **TRELLEBORG**, a small port of Sweden, on the Baltic, 12 m. E of Falsterbo. Its roadstead is open, excepting to N and NW.

TRALLONG, a parish of Breconshire, 5 m. W by N of Brecon. Area 3,384 acres. Pop. 319.

TRAMACASTIEL, a village of Spain, in the prov. and 24 m. WNW of Teruel. Pop. 300.

TRAMAYE, or **TRAMEYES**, a town of France, dep. of Saone-et-Loire, 9 m. W of Macon, at the source of the Valouze. Pop. 1,600.

TRAMAZZA, a village of Sardinia, in the prov. and 15 m. WSW of Busachi.

TRAMBLY, a village of France, in the dep. of Saone-et-Loire, 15 m. W of Macon. Pop. 750.

TRAMELAN, a parish and village of Switzerland, in the cant. and 27 m. W of Berne, on the Birse. Pop. 551.

TRAMIN, a village of the Tyrol, 9 m. SSW of Botzen. Pop. 600.

TRAMONTI, a town of Naples, in the Principato-Citra, 7 m. W of Salerno. Pop. 3,300.

TRAMORE, an open and dangerous bay, on the coast of co. Waterford. It opens between Great Newtown-head on the W, and Brownstown-head on the E,—the latter situated 6 m. W of Hook Head, or the E side of the entrance of Waterford. The open part of the bay has an almost uniform width of nearly 2½ m., and penetrates the land to the extent of 1½ m. The lagoon or closed part of the bay called the Back-strand, communicates with the open part only by a very narrow channel in the extreme E, is separated from all the remainder of the head of the open bay by a narrow and prolonged spit of sand-hills, alternately receives and empties through the connecting channel all the waters which occupy its area at full tide, and expands with a length of about 2 m. from E to W, and a varying breadth of from 6 furl. to 1½ m.—Also a small town, and a sea-bathing resort, in the p. of Drummannon, co. Waterford, at the NW extremity of the open bay of Tramore, 6 m. S by W of Waterford. It is protected from the pre-

vailing winds, commands a magnificent view of the sea, enjoys the advantages of a great extent of hard and level strand, and possesses all the other appliances which can recommend it as a sea-bathing resort. It has good markets, and commodious lodging-houses and hotels. Its strand is about 3 m. in length, and everywhere quite consolidated and smooth. Pop. in 1831, 2,224; in 1841, 1,120.

TRAMUTOLA, a town of Naples, in the Basilicata, 28 m. NE of Policastro. Pop. 4,000.

TRANA, a village of the Sardinian states, in the prov. and 20 m. ESE of Sussa, on the l. bank of the Sangone.

TRANBY, a village of Norway, in the bail. of Baskerud, 4 m. NE of Bragernaes.

TRANCOSO, a town of Portugal, in the prov. of Beira, 9 m. W of Pinhel. Pop. 2,000. It is surrounded by old walls, and has a castle.

TRANCOSO, a town of Brazil, in the prov. and 12 m. S of Porto-Seguro, in S lat. 16° 44' 40".

TRANEKIAR, an ancient fortress of Denmark, on the E side of the island of Langeland, 9 m. from Rudkioping.

TRANENT, a parish in the NW of Haddingtonshire; bounded on the S by Edinburghshire, and on the NW by the p. of Prestonpans. Area 5,415 acres. The coal-formation, with its attendant strata, but dislocated and intersected by trap-dikes, lies beneath a large portion of the parish. Coal has been worked in it in 5 seams, aggregately from 23 to 26 ft. thick, and possibly exists in other and lower seams which have never yet been explored. The battle of *Prestonpans* [see that article] was partly fought within this p. Pop. in 1801, 3,046; in 1831, 3,620; in 1851, 4,158.—The village of T. is situated on the mail-road between Edinburgh and London, 1½ m. SE of Prestonpans, and 9½ m. E of Edinburgh. It consists principally of a street which extends about ½ m., from E to W, along the public road; and of a cross street which goes off from the former near its middle, and runs about a ½ m. down the declivity to the N; but it is built on no regular plan, and has a large aggregate of decayed and mean-looking houses.

TRANFRANT, a small port of Algiers, 30 m. SW of Oran.

TRANI, a town of Naples, situated on the Adriatic, in the prov. and 24 m. W by N of Bari. Pop. 14,000. It is better built than most towns in this part of Italy; its streets being broad, and its houses constructed of stone of a yellow tint, which gives a lively and pleasant appearance to the buildings. Its walls, in circuit about 2½ m., are built of the same materials, and most of the public edifices. The cathedral is adorned with marble pillars, and has a magnificent tower. There are 20 other churches. The principal square is handsome, and the castle has a claim to the notice of the traveller, on account both of its strength and antiquity. The harbour is tolerably secure; and fruit, corn, and oil are exported from it.

TRANMORE, a township of Bebbington p., in Cheshire, 7 m. N by E of Great Neston. Area 730 acres. Pop. in 1831, 314; in 1851, 6,519, an increase occasioned by the extension of Birkenhead.

TRANQUE, an island off the coast of Chili, separated from Quelan-point in the island of Chiloe by a channel about 1 m. wide. Its N shore is well-wooded, and it rises to 800 ft. above sea-level.

TRANQUEBAR, a port of Hindostan, in the Carnatic, and district of Tanjore, on one of the mouths of the Caveri, 20 m. N of Negapatam, in N lat. 11° 1'. It was formerly a village belonging to the rajah of Tanjore, and was purchased from him by the Danes in 1616. Its trade is chiefly carried on with

Denmark, the Isle-of-France, Ceylon, Bengal, and Prince of Wales island. Coarse cotton, oil, soap, and leather are manufactured here. The pop. of the town and of the ancient territory belonging to Denmark, and which has an area of about 15 sq. m., is about 25,000. The fort, which is called *Danaborg*, is kept in neat order. It was taken by the British in 1787, but restored at the peace.

TRANS-CAUCASIA. See *CAUCASUS*.

TRANSYLVANIA, a principality in the SE of Austria, comprehending part of ancient *Dacia*, and called by the natives, *Erdely Ormag*, that is, 'the Woody and mountainous country;' by the Germans, *Siebenbürgen*, from seven celebrated forts or castles which it contains; and deriving its name *Transylvania*, from its lying beyond the forests of the Carpathian mountains which divide it from Hungary. It is bounded on the N by Upper Hungary; on the NE by the Bukowina; on the E by Moldavia; on the SE and S by Wallachia; and on the W by Hungary. It lies between the parallels of 45° 25' and 48° N; and the meridians of 22° 30' and 27° E. Its greatest extent from N to S, or from the mountains of Hagymas on the N, to the point where the confluent stream of the Old and Maciar-Syl forces its way through the gorge of Mount-Mararat in the Lesser Wallachia, is 180 m. Its greatest extent from E to W, or from the frontier of Moldavia, to the western range of mountains dividing it from Upper Hungary, where the river Koros rushes through a narrow defile into the Hungarian plains, is 150 m. Blumenbach estimates the superficial extent of this principality at 1,118.70 German square miles; Liechtenstern assigns to it only 1,047.8; and Rohrer, 1,100.8. Deducting the Military frontiers included in these admeasurements, and which may be estimated at 253.30 German sq. m., these admeasurements respectively offer us 865.40, 794.5, and 856.5 German sq. m., as the probable surface of T. Stein assigns it 842.3 German, or nearly 18,103 British sq. m. The pop. in 1840 was 2,079,000; in 1850, 2,073,787, exclusive of the Military frontiers.

Physical features, &c.] In general outline T. resembles Bohemia, being nearly oval, and like it surrounded on all sides by ranges of lofty mountains, some of which are covered with perpetual snow. But though resembling Bohemia in these respects, it differs in this, that while the latter resembles a vast basin, or concavity,—the former is woody and mountainous throughout, the surrounding ranges sending out lateral ridges or branches from different points of their immense circumference, which terminate towards the centre of the country in hills covered with vineyards and rich in minerals. Owing to its superior elevation, its climate is more temperate and wholesome than that of Hungary; but the water in many places is strongly impregnated with minerals, and apt to produce colics and other dangerous distempers; even the very wine produced in the country is affected in a similar way. Environed and intersected by mountains, it contains many delightful valleys, watered by innumerable streams, which, descending from the mountains on the NE and E, disembody themselves into the Maros and the Alauta, the two main rivers of the country; the former of which—the *Maros* of Strabo—running SW through the whole of T., enters Hungary and joins the Theiss; the latter, after watering the E division of the country, runs S through Wallachia to the Danube. N of the Carpathians the country is drained by the Szamos, the Krasna, and the Koros. There are several lakes and marshes.

Productions.] T. produces abundance of excellent wheat, and its rich pastures feed vast numbers

of black cattle. Many extensive forests occur, in which are found buffaloes, bears, lynxes, elks, wild boars, chamois, ermines, and beavers. Agriculture, in all its branches, is the principal occupation of the inhabitants of this country; but it is still carried on in a very primitive manner. Nevertheless, the fertile soil yields more than supplies the home-consumption. The vine, too, is grown on a very extensive scale, and, under good management, a considerable quantity of wine might be produced for exportation. The quantity of salt in this country is enormous; the whole of Europe might be provided with salt from hence. There are no manufactures of any importance in T. The principal articles are woollen cloths, linens, paper, glass, and iron.—The commerce of the country is in the hands of the Greeks and Armenians. The transit from the Austrian provinces to Hungary and Germany is considerable.—The mines of T. and the Bannat of Temeswar, are very numerous and valuable. Those of Najiag, 12 m. to the NE of Deva, produce gray gold ore, or that precious metal mixed with antimony, arsenic, lead, iron, and sometimes with manganese and zinc. They are the richest in all T., and are conducted with great care. At Ofenbanya, 25 m. to the N of Carlsburg, is found white gold ore, which also occurs in the hills of Fatzebay in the same quarter. To the W of Carlsburg, the country presents numerous gold mines near Zalathna. In the N are the gold mines of Kapnick, Rodna, Felsobanya, and others. Oraviza, in the Bannat of Temeswar, is the chief mining town in that quarter. Towards the S of Oraviza are found mines of copper; and gold and silver mines exist at Dognaska. At Ohlapan, near Zalathna, the finest gold in T. is found, mixed with gravel and sand.

Population, &c. According to Hassel, there were in 1816, about 380,000 Catholics and United Greeks, 917,000 Greeks or Eastern Church, 210,000 Calvinists, 168,000 Lutherans, 45,000 Unitarians, 5,500 Armenians, and 2,500 Jews, in T.; besides about 70,000 Gipsies, who cannot with propriety be placed under any religious denomination. In 1850, it was estimated that the pop. of T. comprised 725,700 Schismatic Greeks; 805,800 Greek Catholics; 223,400 Roman Catholics; 358,800 Reformed Protestants; 220,400 Protestants of the Augsburg Confession; 44,600 Unitarians, and 7,000 Jews. The Magyars and Saxons have the best schools; those of the Vlaki are utterly miserable. The modern inhabitants of T. are a very mixed race, the descendants of various and distinct tribes. But the principal nations are the Szeckhelyi, or Scythuli, corruptly termed Siculi; the Madshars, Magyars, or modern Hungarians; the Vlakes, and the Saxons. Liechtenstern gives the following enumeration of the different races in T.:—Magyars and Szeckhelyi, 460,000; Saxons, 420,000; Vlakes or Wallachians, 800,000; Zigeunes or Gypsies, 70,000; Slavi or Slavonians, 7,000; Armenians, 5,500; Jews, 2,500; Italians, 2,000. The Szeckhelyi, or descendants of the ancient Huns, use a dialect of the Hunno-Scythian language; and it is believed, that several manuscripts written in the Hunno-Scythian character, and of great antiquity, are still preserved in T. The Hungarians use the same language with their brethren to the W and N, which is also spoken by the Bulgarians and Armenians. The Saxons speak the same language with the inhabitants of Lower Saxony, but so intermixed with Hungarian as makes it seem quite different from the German or High Dutch; but in the district of Burckland, on the frontiers of Wallachia, where the Saxons live unmixed with any other races, their peculiar language is spoken with the greatest purity. The language

of the Vlaki—which is also spoken by the Greeks—is a dialect of the Slavonic, mixed with a great deal of bad Latin.

Government.] The constitution of T. is, or was until recently, a limited monarchy, in many respects resembling that of Hungary; but the prince enjoys here more extensive rights, and his influence in the diet is greater. The executive power belongs entirely to him, and no law can be enacted without his sanction. The deputies to the assembly of the states are elected by the three principal nations, among whom the Magyars hold the first place. The magnates consist of the great officers of state, the counts, and barons. The gentry are Magyars and Szeckhelyi, but the royal towns Saxons only. The principality is governed in the name of the prince and nobility, by the diet, the officers of state, the royal government, the exchequer, the assembly of the nobles, the tribunals of justice, and the magistrates of the Szeckhelyi and Saxons. The diets meet upon summons from the prince, now the statthalter, at Hermannstadt. The Vienna bureaucracy wish to introduce the Austrian code of laws. The Saxons wish to preserve their municipal institutions as intact as possible. The Daco-Romans wish the Austrian administration introduced, and the Saxon privileges abolished, but maintain that they ought to enjoy emoluments and offices in T. in the proportion of their pop., their numbers being nearly 1,100,000 in a population of 2,000,000; but their intelligence and capacity for employment, instead of being on a par with their numbers, are in a miserable minority. In order to render the Daco-Roman fit for employment, the government intends to carry out a system of elementary instruction, the secular part of which will be the same as that in the hereditary provs., and only the spiritual part of it left in the hands of the Daco clergy, who are of the Greek church; but the clergy are not likely to take to it more heartily than our own Catholic clergy in Ireland to the mixed system in that kingdom. The Daco clergy have also an antipathy to the use of Roman letters instead of the Cyrillian alphabet, which, with some slight variations, is the same as that of the Daco-Romans.—The revenues arise from the contributions, customs, metals, minerals, rock-salt, royal demesnes, escheats, and confiscations, and are levied by the treasury. They amount to from four to five million of florins.—The present administrative division is into the 10 circles of Hermannstadt, Kronstadt, Udvarhely, Maros-Vasarehely, Bistritz, Dees, Szilagy, Klausenburg, Karlsburg, and Broosch or Broos.

History.] The ancient inhabitants of T., in the days of Herodotus, were the *Agathyræi*, a people of effeminate manners, "abounding in gold," and bordering on Western Scythia. About the commencement of the Christian era, T. was occupied by the warlike Daci, a Scythian tribe, of Gothic origin, according to Jornandes. The Jazyges, a Sarmatic tribe, migrated from the neighbourhood of the Palus Mæotis, or sea of Azof, and settled in T., in the neighbourhood of the Dacians, and in the country between the Theiss and Danube, a short time prior to the Roman conquest of Dacia by Trajan. Other tribes, as the Anarti and Taurisci, were dispersed round the sources of the Theiss, Marosch, and Alauta; the Carpi settled at the S foot of the Carpathian mountains, and gave their name to that range. Of these various tribes, the Daci were the most powerful; for besides T., they possessed Wallachia and part of Moldavia; but their last monarch, Decebalus, being compelled to bend before the superior power of Trajan, after a hard contested war of five years, the whole nation was transplanted into the Roman provinces S of the Danube, and their own country was taken possession of by Roman colonists from Italy, and other parts of the empire. The country thus planted with the conquered Dacians, was called *Nova Dacia*, and subdivided into the districts of *Dacia Ripensis*, *Dacia Mediterranea*, and *Dacia Prævalitana*, comprehending the present provinces of Servia and Bulgaria. The Jazyges and Carpi, notwithstanding the destruction of the Dacians, still preserved their independence, and proved very troublesome neighbours to the Roman colonists settled on the Danube. At last the whole nation of the Carpi were transplanted by

Dioclesian, into the Roman territories and Pannonia. Some remnants of the Jazyges still remain in Hungary. In the middle of the 4th cent., the Goths seized T., after defeating the Sarmatians on the Marosch, where king Visimar, with the flower of the Sarmatian nobility, perished. The Goths remained in possession of Dacia, and all the countries from the Baltic to the Black sea, till the year 375, when they were alarmed by the approach of an innumerable host of Scythians who seemed to issue from the frozen regions of Sarmatia. Re-enforced by the Alans, the Roxolani, and the rest of the numerous Sarmatian tribes whom they had subdued, the Huns fell upon the Goths with irresistible fury. The warlike Ermanaric, a conqueror of many nations, unable to survive the awful calamities that now befell his nation, laid violent hands upon himself. His son, Vitthimir, a more resolute prince, for some time made a vigorous resistance, but was finally slain, with the greatest part of the Ostrogothic nation, who retreated to the plains of Podolia. The Huns next attacked the Visigoths, who possessed Dacia, and completely defeated them, though they had constructed a strong wall extending from the Pruth to the Danube, to protect themselves from these dreadful barbarians. At last the whole nation of the Goths, unable to withstand the Huns, abandoned T. and the whole country to the N of the Danube, to their voracious invaders, who thus became masters of all the country from the Don to the Danube. Transylvania was seized by the *Gepidas*, after the vast empire of the Huns had terminated with the death of Attila; but some tribes of the Huns still remained in the country, whose descendants are supposed to have been the *Siculi*, in the NE. The *Gepidas* were almost wholly extirpated by the Lombards, aided by the *Avars*, another Scythian tribe, in the year 566; but some of their descendants still remain in Hungary and Transylvania. The *Madashars*, who conquered Hungary in the 9th cent., added T. to their dominions, in 997. In the Middle ages, T. was peopled by the Hungarians, or *Madashars*, in the western quarter; the *Szeckholyt*, erroneously named *Siculi*, and believed to be the real descendants of the once formidable Huns, on the NE; a numerous colony of Saxons who penetrated into Transylvania in the 12th cent., and settled on the frontier of Wallachia, between the rivers Alauta and Maros; and the *Vlaks* who possessed the S, on the borders of Wallachia. T., from its conquest by Stephen, king of Hungary, in 1004, continued subject to that kingdom, and was governed by *Walvodes*, or governors of provinces. After the fatal battle of 1526, John *Szepcsu*, *Walvode* of Transylvania, married the widow of the unfortunate Louis, and became king of Hungary, under the protection of *Solyman* the magnificent, holding it and T. as fiefs of the Porte. Upon the death of John, Hungary was converted into a separate kingdom, by *Sultan Solyman*, and T. was given to his widow and her infant son; but after his death, T. was divided between two rival factions, one of which was supported by the house of Austria, and the other by the Porte, in consequence of which, the country was a scene of intestine warfare for many years. The papal party were supported by the power of Austria; and the Protestant party, headed by the celebrated *Botskay*, were aided by the Turks; when the successes of the latter obliged the court of Vienna, in 1606, to acknowledge the independence of T. *Botskay* was succeeded by *Bethlen Gabor*, a determined enemy of the Catholics and house of Austria, and a firm friend of the Porte, whose vassal he became in order to secure himself against the Catholic faction. He was succeeded by his son Stephen, between whom, and the family of *Ragotski*, a contest arose for the principality, in which the *Ragotski* family finally prevailed. Upon the death of *Ragotski*, a civil war again commenced; but the balance turned in favour of *Michael Abaffi*, who, aided by the Turks, under the famous vizir *Coprugli*, completely defeated the Imperialists, at the battle of *Glausenburg*, and drove them out of T. *Abaffi* continued in possession of T., as a vassal of the Porte, till his death, in 1690. At his death, the family of *Ragotski* contended for the principality with the victorious Austrians—who had by this time reconquered Turkish Hungary—but without success. *Tekeli*, who had married *Abaffi's* widow and inherited his claims, was equally unsuccessful, and was compelled to live as an exile for the remainder of his life in the Turkish dominions, where he died at *Nicomedia*. T. was ceded to the Austrians, by the treaty of *Carlowitz*, in 1699, and has ever since continued subject to the house of Austria, though an attempt was made, in 1738, by the *Ragotski* family, to recover their influence under the protection of the Porte, but the matter was settled by the peace of *Belgrade*, in 1740.

TRAONA, a village of Austrian Lombardy, in the prov. of *Valtellina*, 14 m. W of *Sondrio*, in a valley of the same name, near the r. bank of the *Adda*. Pop. 1,015.

TRAPANI, an administrative province, district, and town of Sicily. The valle or prov. is bounded on the E by the prov. of *Palermo*; on the SE by that of *Girgenti*; and on all other sides by the sea. Pop. in 1845, 182,809. It is 51 m. in length from N to S, and 42 m. in breadth. It presents great irregularity of coast line. On the N is the long peninsula, enclosing the gulf of *Castel-a-Mare* on the W, and terminating in the N, in *Cape S. Vito*,

and on the W are the peninsulas of *Trapani* and *Marsala*, the extremity of the former of which, *Cape Boco*, forms the most westerly point of Sicily. Stretching along the W coast are several islands, the principal of which are *Favignana*, *Levanza*, and *Maredimo*. The chain of mountains which traverses the island, in its entire length, terminates in this prov., and gives rise to numerous streams, of which the chief are the *S. Bartolomeo*, the *Vitaloca*, and the *Fogia* on the N; the *Brigi* and *Marsala* on the W; the *Mazzara*, *Arena*, and *Modima* on the S; and the *Belici*, which forms the continuous boundary with the prov. of *Girgenti*. The prov. of T. comprises three districts and 21 communes. The town is 53 m. W of *Palermo*, at the W extremity of the island. Pop. 24,000. It is built on a tongue of land, which advances into the Mediterranean, and which, with a low promontory to the S, forms a good port. It is enclosed by bastioned walls, and defended by other works. The streets are regular, and are paved with blocks of a shining species of stone. Many of the houses are handsome, and the churches and convents, which are numerous, and other public buildings, are of fine architecture. It has also a college, and several hospitals. The harbour is capable of giving accommodation to vessels of large size, and at the entrance is an island on which a lighthouse has been erected. The trade, which is extremely active, consists chiefly in salt from the adjacent works, alabaster and coral, in the natural state and wrought, soda, wine, fish, &c. At the distance of about 5 m. ENE is *Mount S. Giuliano*, the ancient *Eryx*, whence water is conveyed by an aqueduct to the town. T. occupies the site of the ancient *Drepanum*, noted as the theatre of frequent combats between the Romans and Carthaginians. With the exception of a single temple it contains no antiquities.

TRAPANO, **DRAPANO**, or **MUSSA**, a headland of Turkey in Europe, on the N coast of the island of *Candia*, 17 m. E of *Canea*, in N lat. 35° 38', and E long. 24° 16'. It forms the extremity of the elevated promontory which advances between the gulfs of *Sudah* and *Armyro*.

TRAPE (LA), a village of France, in the dep. of the *Dordogne*, cant. and 6 m. NNW of *Villefranche* on an elevated plateau. Pop. 100.

TRAPOHNEN, a village of Prussia, in the re-gency of *Gumbinnen*, on the *Memel*. Pop. 450.

TRAPPA, a town of Portugal, in the prov. of *Beira*, comarca and 18 m. NNW of *Viseu*, in a bleak mountainous locality. Pop. 300.

TRAPPE (LA). See *SOLIGNY*.

TRAPPE, a village of France, in the dep. of the *Seine-et-Oise*, cant. and 6 m. WSW of *Versailles*, near a *lagune*. Pop. 640. It has a sugar factory.

TRAPSTADT, a village of Bavaria, in the circle of *Lower Franconia*, 5 m. ENE of *Königshofen*. Pop. 750.

TRAQUAIR, a parish in the SE border of *Peebles-shire*, bounded on the N by the *Tweed*. Area 17,200 acres. Except at the indentations, the boundary all round with *Selkirkshire* is high mountain water-shed, among whose summits are *Gumcleuch* and *Minchmoor*, as well as several others of an alt. exceeding 2,000 ft. above sea-level. *Quair-water* is the principal interior stream. The village of T. stands in the vale of the *Quair*, $\frac{1}{2}$ m. S of the *Tweed*, and $\frac{1}{2}$ m. S of *Innerleithen*. Pop. 643.

TEARBACH, a town of Prussia, in the prov. of the *Rhine*, re-gency and 87 m. SW of *Coblenz*, on a mountain, near the r. bank of the *Moselle*, opposite *Traben*, with which it is connected by a bridge. Pop. in 1848, 1,494. It has a saw-mill. In the

vicinity are the remains of a Roman way. T. was taken by the French in 1794.

TRAZAHS, a Moorish tribe who inhabit the W part of the Sahara and NW of Senegambia, comprising a district extending inland a distance of about 140 m. They are extensively engaged in the gum trade.

TRASACCO, a town of Naples, in the prov. of Abruzzo-Ultra, 81 m. SE of Avezzano, near the S bank of Lake Fucino, in a fertile plain. Pop. 760. It has a collegiate church. This town is said to have been founded by the emperor Nero.

TRASEN, a river of Austria, in the prov. of Lower Austria, which descends from the N side of the Traisenberg, near the Styrian frontier; runs NNE past Durnitz, Wilhelmsburg, St.-Polten, Herzogenburg, and Trasmauer; and a little below the latter place throws itself into an arm of the Danube, on the r. bank, and after a sinuous but rapid course of about 57 m. In the lower part it divides into numerous branches, and from the mountains which enclose its bed it receives numerous affluents. Its banks and islands are well wooded.

TRASMENE. See **PERUGIA**.

TRASMAUER, a town of Austria, in the prov. of Lower Austria, circle and 13 m. NNE of St. Polten, on the r. bank of the Traisen, near its confluence with the Danube. Pop. 545. It has a fortified castle, and manufactories of fine woollen fabrics.

TRASOBARES, a town of Spain, in the prov. and 45 m. W of Zaragoza, in a fertile locality. Pop. 1,147. It has a convent, and a manufactory of common cloth.

TRAS-OS-MONTES, a province of Portugal, bounded on the N and E by Spain, on the S by the prov. of Beira, and on the W by that of Minho, extending between 40° 48' and 41° 50' N lat., and between 6° 10' and 8° W long., and comprising an area 84 m. in length from E to W, and 60 m. in breadth, and a superficies of 1,020 sq. m. Pop. in 1841, 300,840, or 77,079 families. This prov., although generally mountainous and arid, has several fine plains, watered by the Tamaga, Corgo, Sabor, and Tua, affluents of the Duero, and producing in great abundance corn, rye, maize, and fruit of all kinds; and in localities sheltered from the N, olives and silk. On the rivers, and especially the Duero, the species of grape is cultivated which produces the celebrated port wine. Cattle, horses, sheep, pigs, and bees are reared in great numbers, and game is abundant. Silk factories are numerous, and there are also numerous flax mills. The prov. comprises 2 districts, 11 comarcas, 48 concelhos, and 535 parishes. Its cap. is Braganza.

TRASPADERNE, a town of Spain, in the prov. and 36 m. NNE of Burgos, on the l. bank of the Nela, a little above its confluence with the Ebro. Pop. 356. It has two churches and a convent.

TRASPINEDO, a town of Spain, in the prov. and 15 m. SE of Valladolid, in a rugged and ill-cultivated valley, near the l. bank of the Duero. Pop. 585. It has a hospital.

TRASTE, a port of Dalmatia, in the circle and 8 m. W of Cattaro, formed by the Adriatic, in N lat. 41° 46', E long. 18° 35'. Its entrance does not exceed 1½ m. in breadth, but it has within an extent of 5 m. from N to S, and a depth of about 8 m.

TRAU (**CHANNEL OF**), a strait of Dalmatia, in the circle of Spalatro, formed by the Adriatic between the island of Bua and the mainland. It runs between the channel of Solta on the NW, and the gulf of Salona on the SE; and has a total length of 20 m., with an extreme breadth of 5 m. Towards the N, in one of its narrowest parts, is a small island on which the town from which it takes its name is situated.

TRAU, or **TRASHU**, a town of Austrian Dalmatia, with a small harbour on the coast of the Adriatic, in the circle and 20 m. NW of Spalatro, in N lat. 43° 40'. Pop. 3,500. It stands on an islet, having on the N side the mainland, and on the S the island of Bua. With the main it is connected by a bridge, and with the island by a mole having a draw-bridge to admit the passage of vessels, which are numerous, coasters preferring this inland channel to the open sea. The vicinity is pleasant, abounding with vines and olives. The trade of T. is considerable in wine, oil, and fruit, although its harbour is small; but the island of Bua offers a very commodious harbour.

TRAUCHBURG, or **TRAUBENBURG**, a town of Bavaria, 12 m. WSW of Kempfen.

TRAUN, a navigable river of Upper Austria, which rises in the NW extremity of Styria; runs W, and then NNW; and after flowing through the lakes of Hallstadt and Traun, joins the Danube on the r. bank, 8 m. below Linz, after a course of 100 m.—The lake of T., sometimes also called the lake of Gemunden, is 9 m. long, and 4 m. broad. It lies under the parallel of 47° 48' N, and at an alt. of 495 metres=541 yds. above sea-level.—There is another river called Traun, in Bavaria, near the borders of the circle of Salzburg.

TRAUNKIRCHEN, a small town of Upper Austria, on the W side of the lake of Traun, 11 m. SSE of Vocklabruck.

TRAUNSTEIN, a walled town of Bavaria, 50 m. ESE of Munich, on the l. bank of the Traun, an affluent of the Alza. Pop. 2,200.—Also a village of the archd. of Austria, 12 m. SSW of Zwettel. It has extensive salt-works, which serve to evaporate the brine of springs at this place, and a part of those of Reichenhall, which is conveyed hither.—Also a mountain of the archd. of Austria, on the E shore of the lake of Traun, having an alt. of 1,578 metres=1,725 yds. above sea-level.

TRAUNVIERTEL, a district of Upper Austria, lying along the river Traun, from the Danube on the N, to the borders of Styria on the S. It has an area of 1,955 sq. m. The N part is level and fertile, but the S is full of lofty mountains, branches of the Alps. In this part, especially along the Ens, there is a number of iron works and hardware manufactories. This quarter also abounds with salt-mines. The richest salt-mines, which form the wealth of the country, lie in the romantic district called the Salzkammergut, where 500,000 quintals of salt are produced every year, and above 1,000,000 could be produced if there was a market for it. The crownlands belonging to the emperor, and containing the salt-mines, lie in the SW angle of the archd. of Upper Austria, which is wedged in between the frontier of Salzburg and Styria, and is traversed through its whole extent by the river Traun. The vales here have that pastoral beauty and constant verdure which is so familiar in England, with similar enclosures and hedgerows, and fruit and forest trees; but the chief picturesque beauty of the Salzkammergut lies in its numerous lakes, forming a chain strung together as it were by the Traun, the main artery of the district, passing through them in succession. They are commonly bordered with lofty mountains, whose precipices, rising abruptly from the very water's edge, without the smallest ledge or foreland, impart an extremely sublime character to these Alp-locked reservoirs. The falls of the Traun resemble those of the Rhine at Schaffhausen, though they are much inferior to them. The chief town of the T. is Steyer. In 1809, the western part of this district was ceded to Bavaria, but it was restored to Austria in 1815.

TRAVAGLIATO, an inland town of Austrian Italy, 4 m. WSW of Brescia. Pop. 3,000.

TRAVALLA, a small port on the W coast of the island of Celebes, situated on a small creek at the head of a little inlet, 9 m. S of Dungally, in S lat. 1° 10'. The neighbouring country abounds with cocoanuts and Indian corn.

TRAVANCORE, a province in the SW extremity of Hindostan, between the 8th and 10th parallels of N lat., and the meridians of 76° 20' and 77° 30' E. On the N it is bounded by the territories of the Cochin rajah; on the E by a range of woody mountains which divide it from the district of Tinnevely; on the S and the W by the sea. Its length from N to S may be estimated at 140 m., by an average breadth of 36 m. Its area is 4,722 sq. m. Towards the E side rises a range of lofty mountains. The principal rivers are the Peraur and the Pullayur. The soil is fertile, producing grain, sago, sugar, salt, pepper, cardomums, cocoa-nuts, cassia, frankincense, and other aromatic drugs, plantains, coffee, tobacco, and silk. The wild buffalo, tiger, cheetah, and elephant are found in the forests, which are extensive, and form a valuable source of revenue. There are no fortresses of any importance in this prov.; but against hostility from Mysore and Tinnevely a double line of works has been raised, consisting of a thick plantation, supported by a rampart with bastions and a deep ditch; while the range of mountains extending to Cape Comorin forms a natural defence on the SE. Strong currents prevail along the coast. The pop. was last returned at 1,011,824, of whom about 60,000 are Mahommedan Moplays of Arab descent, and 170,000 are Roman Catholics and Syrian Christians. This prov. having been originally one of the subdivisions of Malabar, retains many of its customs. It appears that the Tamburetties of Attingara possessed the sovereignty in this region at an early period, and that the government was always in the hands of a female, till the early part of the 18th cent., when one of these ladies not only resigned the power to her son, but enacted that in future the sovereignty should descend to the son of the senior Tamburetty, as in Malabar. The rajah thus chosen proved an ambitious and able chief. He employed an European officer to discipline his troops; and having turned his arms against the neighbouring states, subdued six of the petty rajahs, and annexed their territories to his own. He also conquered part of Cochin, and compelled the rani or queen of that country to adopt him as her successor. From this period the rajahs of T., by intrigue or force, gradually acquired possession of the estates of all the remaining petty chiefs; and in 1789, entered into treaty with the Dutch, for the purchase of the town and fortress of Cranganore. This circumstance, however, drew on him the hostility of Tippu Sultan, who, in April 1790, attacked the lines before described, and having succeeded in storming them, advanced as far as Virappelly, when the interference of the British alone prevented T. from becoming a prov. of Mysore. In November 1795, a treaty of alliance was concluded between the rajah and the British, by which the former agreed to subsidize 3 battalions of native infantry, to be maintained for the defence of his dominions against all enemies, and, in the event of war, to assist the British with his own forces. In 1809, the British troops took possession of the country with little opposition; and the resident, Colonel Munro, assumed the office of prime minister to the rajah, and retained it with great advantage to the state till 1813, when the office was again delivered over to the rajah upon his attaining his 16th year. The revenue of the country was at this juncture

estimated at 80 lacks of rupees, or about £45,000; and £15,000 was paid to the British for their protection and the expenses of the resident. At present the revenue is 41,58,075 r., and the subsidy or tribute amounts to 7,98,430 r. The principal towns are Travancore, Trivanderam, Anjengo, Coulan or Quilon, Alibacca, and Coleshy.—Travancore, the ancient capital of the prov., formerly an extensive place, but much decayed, is situated in N lat. 8° 25', E long. 77° 22', 21 m. E of Trivanderam.

TRAVE, a river of Denmark, in the duchy of Holstein, which rises near Sarau, between Eutin and Ahrensbock; flows SW, and expands into Lake Warder; passes Segeberg, Oldesloe, and Lubeck; and falls into the Baltic near the small town of Travemünde, after a course of about 60 m. It is narrow, but up to the city of Lubeck is navigable for vessels drawing not above 7½ ft. A passage of 11 or 12 ft. in depth is usually kept open across its flat sandy bar. Near its mouth stands a lighthouse, in N lat. 53° 57' 39", E long. 10° 52' 53"; and a lively trade is kept up from it with all the ports on the Baltic, and steam communication with Copenhagen, Stockholm, Riga, and Cronstadt.

TRAVECY, a village of France, in the dep. of Aisne, cant. and 2 m. N of La-Fere, on the r. bank of the Oise.

TRAVEMÜNDE, a small town at the mouth of the Trave, 8 m. NE of Lubeck, and belonging to that city, to which it serves as a port. It is fortified towards the land, and towards the sea is defended by a small fort. The harbour is capable of containing 60 vessels, and is deep enough for those of 200 tons; but its prosperity is controlled by a monopolized corporation in Lubeck. Men-of-war lie at anchor in the road.

TRAVENDAHL, a castle and bailiwick of Denmark, in the duchy of Holstein, 15 m. W of Lubeck, and 2 m. SW of Segeberg, near the l. bank of the Trave, noted in Danish history for the treaty negotiated here in 1700, between the king of Denmark and duke of Holstein.

TRAVENSALZA, a hamlet of Denmark, near the r. bank of the Trave, 1 m. SW of Oldesloe, famous for its salt works.

TRAVERS (VAL-DE), a district in the SW of the Swiss cant. of Neuchâtel, consisting of a romantic valley running SW and NE among the Jura mountains, and watered by the Reuse. It contains six villages, with about 1,500 inhabitants, many of whom are lace-knitters, watchmakers, or stocking weavers. The chief place, the village of Travers, is 11 m. W of Neuchâtel.

TRAVERSE, a lake in the Minnesota territory, U. S., under the parallel of 46°, occupying a depression in an elevated plateau, and giving rise to a head-branch of Red river.

TRAVERSE BAY (GRAND), a bay on the E side of Lake Michigan, in N lat. 44° 15'.

TRAVERSE ISLANDS, a chain of islands at the E end of Noquet's bay, in Lake Michigan, in N lat. 45° 15'.

TRAVNICK, a town of European Turkey, in Bosnia, at the foot of a chain of mountains, on the r. bank of the Lashva, 70 m. W of Isvornik. It has a pop. of 8,000, and is a place of considerable importance, being the point where several roads meet.

TRAWDEN-Forest, a township and village in Whalley p., co.-palatine of Lancaster, 1½ m. SE of Colne. Area 2,510 acres. Pop. in 1831, 2,853; in 1851, 2,601.

TRAWENAGH, or **TRYENAGH**, a bay or lagune on the coast of co. Donegal. It opens off the NE corner of Guibarra-bay, penetrates the land 3 m.

eastward, has an entrance-width of only 3 furl., and expands in the interior to a width of $1\frac{1}{2}$ m.

TRAWS-FYNDD, a parish in Merionethshire, on the post-road between Dolgelly and Maentwrog. Area 21,960 acres. Pop. in 1851, 1,498.

TRAYAN-GLAS, a hamlet in Llywell p., co. Brecon, 7 m. W of Brecon. Pop. in 1851, 648.

TRAYAN-MAWR, a hamlet in Llywell p., co. Brecon, $6\frac{1}{2}$ m. W of Brecon. Pop. in 1851, 378.

TREZEGNIES, a commune and village of Belgium, in the prov. of Hainault, 20 m. E by N of Mons.

TREAZ-OS-MONTES. **TRAS-OS-MONTES**.

TREADINGSTOWN, a parish in co. Kilkenny, 4 m. SSE of Kilkenny. Pop. in 1841, 423.

TREAL, a village of France, in the dep. of Morbihan, cant. and 3 m. NNW of Carantoir. Pop. 1,000.

TREALS-AND-WHARLES, a township in Kirkham p., co.-palatine of Lancaster, $1\frac{1}{2}$ m. NE of Kirkham. Area 4,015 acres. Pop. in 1851, 696.

TREASURY ISLANDS, a group, forming part of Solomon's islands in the S. Pacific. They are low, and covered with trees. The most northern is in S lat. $7^{\circ} 23'$, E long. $155^{\circ} 29'$. The group occupies a circuit of about 10 leagues.

TREAUVILLE, a village of France, in the dep. of La Manche, cant. and 2 m. NNW of Pieux. Pop. 1,100.

TREBBIN, a town of the Prussian prov. of Brandenburg, on the river Nutha, 22 m. S by W of Berlin. Pop. 1,200.

TREBEL, a river of Prussia on the confines of Mecklenburg and Pomerania, which runs W, and falls into the Peene, 1 m. NW of Demmin, after a course of 45 m.

TREBES, a town of France, dep. of Aude, near the canal of Languedoc, 6 m. SE of Carcassonne. Pop. 1,300.—Also a village of Bavaria, in the presidia and 3 m. SSE of Tresswitz.

TREBIA, or **TRASNIA**, a river of Italy, which rises among the Apennines, 10 m. NE of Genoa; runs NE; and after a course of 60 m. falls into the Po, 3 m. above Piacenza. Though not large, it is an impetuous stream. It gave name to the second victory which signalised Hannibal's invasion of Italy, and which is supposed to have been fought between the embouchure of the Trebia and Piacenza. Its banks were the scene also of sanguinary fighting in June 1799, between the French under Macdonald, and the Russians under Suwarrow, in which the latter were victorious.

TREBIGNÉ, a town of Turkey in Bosnia, 15 m. NE of Ragusa, on the r. bank of the Trebignitza. Pop. 1,000.

TREBISACCIA, a town of Naples, in Calabria-Citra, 18 m. ENE of Castrovillari near the coast. Pop. 1,200.

TREBITSCH, or **ТРЕБИЦКЪ**, a town of Moravia, on the Iglawa, 20 m. ESE of Iglau. Pop. 5,000, of whom a number are Jews. It has considerable woollen manufactures.

TREBIZOND, a considerable city of Asiatic Turkey, on the S coast of the Black sea, in N lat. $41^{\circ} 1' 0''$, E long. $39^{\circ} 44' 36''$, 136 m. SE of Erzerum. The city, of an oblong shape, occupies a slope gently rising from the sea. On the E and W it is defended by two deep ravines filled with trees and gardens, and crossed by long bridges. These ravines are connected by a ditch cut in the rock behind the castle, and along the skirts of which run the ancient ramparts of the city, which are built of stone of remarkable thickness, and in general lofty. The trapezoidal form, from which the city is said to have derived its name, may it is said be still traced in

the arrangement of the walls. The houses for the most part are built of stone and lime, and roofed with small red tiles; like the common Turkish dwellings, they are mean in their outward appearance, and comfortless within; but all having a garden with a few fruit-trees, scarcely a house is visible from the sea. The most curious edifice in the city is the *besestein*, a huge square structure, with two small windows on each face, probably erected by the Genoese as a powder magazine. At the S extremity of the town is the citadel, which commands a full view of the city and environs. A battery of heavy guns is erected on an eminence to the left of the city. Mountains rise behind T., but of less elevation than along the rest of the neighbouring coast of Asia Minor. They are in a high state of cultivation, producing maize, barley, flax, tobacco, honey, wax, and wine. The anchorage is bad, and only available in summer, being a small open bay at the E extremity of the town. After the autumnal equinox, vessels resort to Platena, a roadstead about 7 m. to the W. T. has a pop. of 68,000, of whom about one-third are Christians; the rest are a heterogeneous mixture of Turks, Jews, Georgians, Mingrelians, Circassians, and Tartars. Its trade is very considerable with Armenia and the N of Persia. Formerly the goods manufactured in Europe and intended for Georgia and Persia were transported in Turkish vessels from Constantinople to Redut-Kaleh and to Pati, small forts in Mingrelia, near the mouth of the Rion. Armenian and Georgian caravans transported them thence to Tiflis, the cap. of Georgia, then the great commercial storehouse for a great part of Western Asia. Numerous caravans arrived from Talriz, Astrakhan, and Baku, at Tiflis, to purchase European merchandise, by which means the Armenian merchants of that town gained immense profits, and the peasants of the Trans-Caucasus received liberal payment for the hire of their beasts of burden engaged in the conveyance of that merchandise. This flourishing state of trade in the Russian provs. beyond the Caucasus ceased suddenly when M. de Cancrin, Russian minister of finance, unfortunately proposed to the Emperor to introduce the Russian tariff into those provinces, and to extend his system of prohibition to the extreme frontier of this vast empire. The motive of this measure was to exclude British manufactures from the Trans-Caucasian market, in the hope of creating there an extensive market for the manufactures of Moscow. But the ukase of the Emperor, which placed Mingrelia and Georgia under the system of the Russian tariff, did not produce the advantage to the manufacturers of Moscow which they expected from it: the importation of British and German articles continued, but it took another direction. The ships of Constantinople conveyed them to T., where a great commerce of caravans was organized to convey the merchandise to Tabriz through Erzerum. A smuggling trade was commenced all along the Russo-Persian frontier, and assumed colossal dimensions. British cloths and German hardware entered Georgia as hitherto; but, in place of the merchants of Tiflis, it was the Persian smugglers who, passing the Araxes at night with their well-laden mules, obtained the profit. In vain did the Russian government establish on that frontier a strict military guard. The smugglers arranged with the Cossacks by means of trifling presents, so that they now pass the Araxes in full day without being molested either by the Cossacks or by the Russian custom-house officers, who are all bribed. Steam-navigation and the establishment of four wealthy commercial houses at Tabriz, by Greeks from Constantinople,

principally contributed to the increase of this commercial movement. England supplies about 6,000 bales of cotton per annum, with sugar, indigo, and spices; Germany contributes hardware and Bohemian glass, which is much esteemed in Persia; France sends wine; Southern Russia, wheat and barley; Belgium, fire-arms. The exports are valued at from £300,000 to £400,000 annually in merchandise, and the remainder in Russian silver. The principal articles of export are Persian silk, Cashmere shawls, saffron, carpets, camels' skins, and cotton. All these articles come from Persia, and timber for building, fruits, wax, fish oil, and tobacco, from Anatolia. In 1845 the number of ships which entered the port amounted to 181: viz. 27 British, 90 Turkish, 38 Austrian, 19 Russian, 4 Greek, 2 Sardinian, and 1 Ionian, with a freight of 41,878 tons. The number of sailing vessels engaged in the commerce of the port during 1849 was 87, of which 10 were English, 48 Turkish, and 22 Greek; but a large portion of the trade was carried on by means of steamers, of which class 30 English, 30 Turkish, and 24 Austrian touched at the port in the course of that year. The entire value of the imports in 1849 was estimated at 58,409,215 francs, or about £2,186,000; and the exports were calculated to have amounted to 14,251,406 frs., or about £570,000. The former showed a decrease as compared with 1848; but the export trade, on the other hand, had largely increased, the total amount in 1848 being 6,239,790 frs. This large augmentation was principally owing to the greatly increased exports of copper and other produce of the Turkish territories, and also to the increased degree of favour that articles of Persian produce, such as silks, gall nuts, &c., have enjoyed in the European markets. In 1851 the value of merchandise imported into T. amounted to 182,000,000 piastres, or about £1,500,000. Although a project has been proposed by the Turkish government to construct a road from T. to Erzerum, a town of importance near the frontier of Persia, it is stated that the influence of Russia has always prevented it from being carried into execution, that power being desirous to secure the transit-trade of Persia through Georgia. The amount of shipping engaged in the trade of T. in 1851 consisted of—

Ottoman sailing vessels, steamers,	71½	58,860 tons.
Austrian steamers (7,800-horse power),	30½	26,300 "
British sailing vessels, steamers,	6½	15,742 "
Greek,	17½	1,698 "
Danubian,	9	1,004 "
Ionian,	7	296 "
Russian,	8	282 "
French,	2	350 "

The following were the amount of imports and exports:

	Imports.	Exports.
In British steamers, &c.,	£331,558	£114,556
Ditto, Austrian,	414,416	101,065
Native steamers and other craft,	1,396,168	424,024
Russian ditto,	6,122	8,077
Total,	£2,148,265	£647,712
Value of specie exported (chiefly in Russian coin, and for Persian account),		£331,503
Ditto for local account,		85,997
Number of passengers,	18,180	

The transit of merchandise and passengers from Constantinople to T. is now entirely in the hands of the English and Austrian steam-packet companies. The freights are almost entirely composed of English manufactured goods, part of which remain here, and are smuggled into the Russian province of Georgia; the remainder, consisting chiefly of white calicoes, are sent into Persia, where they are printed, and then introduced into Russia as of Persian

manufacture. This accounts for the exportation of Russian coin for Persian account. Large quantities of silks, raw silk, tobacco, and valuable shawls, are exported by the Persian merchants. T. is a very ancient place, and is mentioned by Xenophon, under the appellation of *Trapezus*, as forming the termination of the retreat of the 10,000 Greeks after the defeat of Cyrus at Cunaxa in Mesopotamia. It is then stated to have been a colony of the Sinopians, populous, and situated in the country of the Colchians. It continued a free and independent city, till it fell under the dominion of the kings of Pontus. At the period of the Roman dominion over Asia Minor, their trade with India is supposed to have passed through this city. After the capture of Constantinople by the Latins in 1208, T. became, under Alexis Comnenus, the seat of an empire extending from the mouth of the Phasis to that of the Halys. On its surrender to Mahomet II., its commercial relations with Europe ceased entirely, and the Euxine became closed to the navigation of the Christian powers.

TREBNITZ, a town of Prussian Silesia, in the principality of Oels, 14 m. N of Breslau. Pop. 4,000. It has woollen factories, and a trade in agricultural produce and fruit.

TREBUEUF, a village of France, in the dep. of Ille-et-Vilaine, 3 m. ESE of Sel. Pop. 1,500.

TREBOROUGH, a parish of Somersetshire, 5 m. S by E of Dunster. Area 1,798 acres. Pop. in 1931, 135; in 1851, 142.

TREBSEN, a village of Saxony, on the Mulde, 18 m. ESE of Leipsic. Pop. 750.

TREBSHEN, a village of Prussia, in the prov. of Brandenburg, reg. and 60 m. SE of Frankfurt.

TREBUR, a town of Hesse-Darmstadt, 11 m. WNW of Darmstadt, near the r. bank of the Rhine. Pop. 1,200.

TREBUXENA, a town of Spain, in the prov. and 23 m. NNE of Cadiz. Pop. 2,900.

TRECASTAGNI, a town of Sicily, 10 m. NNE of Catania, on the S flank of *Ætna*. Pop. 2,500.

TRECATTE, a town of the Sardinian states, 6 m. ESE of Novara, in a fine plain, between the Ticino and Terdoppio rivers.

TRECHINA, a town of Naples, in the prov. of Basilicata, 8 m. S of Lagonegro. Pop. 1,800.

TRECENO, a village of Spain, in the prov. and 80 m. WSW of Santander, on the l. bank of the Escudo.

TRECENTA, a town of Austrian Lombardy, 6 m. S of Badia, near the Tartaro. Pop. 2,000.

TRECENTO, a town of the States-of-the-Church, 12 m. WNW of Ferrara.

TREDARZAC, a town of France, in the dep. of Cotes-du-Nord, cant. and 4 m. W of Lezardrieux. Pop. 1,200.

TREDEGAR, a town and populous district in Bedwelly p., co. of Monmouth, 16 m. NW of Newport. Pop. in 1851, 8,805. T., about 60 years ago an insignificant hamlet, has risen to the importance of a market-town, in consequence of the extensive coal-mines and iron-works which it possesses. The Sironwey railroad, which communicates with Newport, and is almost entirely confined to the conveyance, for shipment on the Monmouthshire canal, of the produce of the T. iron-works, is 28 m. in length.

TREDINGTON, a parish in Gloucestershire, 2½ m. SE by S of Tewkesbury. Area 870 acres. Pop. in 1851, 143.—Also a parish in Worcestershire, 2½ m. N of Shipston-on-Stour, including the hamlets of Armscott, Blackwell, Darlingscott, and Newbold. Area 5,285 acres. Pop. in 1831, 1,086; in 1851, 1,117.

TREDONOCK, or **TREDENOCK**, a parish in Mon-

mouthshire, 4 m. S of Oak. Area 1,393 acres. Pop. in 1831, 158; in 1851, 157.

TREDOZIO, a village of Tuscany, in the prov. and 42 m. N of Florence.

TREENE, a river of Denmark, which rises 3 m. S of Flensburg; flows SSW, and then W; and joins the Eyder, on the r. bank, at Friederichstadt, after a course of 45 m.

TREETON, a parish in the W. R. of Yorkshire, 4 m. S by E of Rotherham, comprising the townships of Brampton-en-le-Morthen, T., and Ullev. Area 3,503 acres. Pop. in 1831, 680; in 1851, 663.

TREFDRAETH, a parish in Anglesey, 5 m. NW of Llangefni. Area 3,135 acres. Pop. in 1851, 994.

TREFECCA, a hamlet in Talgarth p., Brecon, 8 m. SW of Hay. Pop. in 1831, 282; in 1851, 216.

TREFEGLWYS, a parish in Montgomeryshire, 9 m. W by S of Newtown, including the townships of Bod-sioch, Dol-Gwden, Maes-tref-gomer, and Eskiriet with Glyn-tref-nant. Area 18,166 acres. Pop. in 1831, 1,820; in 1851, 1,793.

TREFFANDEL, a village of France, in the dep. of Ille-et-Vilaine, 4 m. NE of Prelan-le-Grand. Pop. 1,100.

TREFFURTH, a town of Prussian Saxony, situated on a hill near the river Werra, 29 m. SSE of Göttingen. Pop. 2,100. It was formerly an independent principality; afterwards it belonged to the princes of Mentz, Saxony, and Hesse conjointly; and was given in 1815 to Prussia by the congress of Vienna.

TREF-GARN, a parish in Pembroke, 5 m. N of Haverford-West. Little-Trefgarn is on the E side of the Cleddau; Great Trefgarn on the W side. Area 1,205 acres. Pop. in 1831, 112; in 1851, 99.

TREF-GARON. See CARON.

TREFILAN, a parish in Cardiganshire, 7 m. SW of Lampeter, including the hamlet of Tal-y-sarn. Area 2,201 acres. Pop. in 1831, 313; in 1851, 308.

TRELLIS, a hamlet in Llangammarch parish, co. of Brecon, South Wales, 8 m. W of Buallt.

TRELLYS, a parish in Carnarvonshire, 2 m. E of Criccieth. Area 999 acres. Pop. in 1851, 108.

TREFORT, a commune and village of France, dep. of the Ain, situated on a mountain called Revermont, 11 m. NE of Bourg. Pop. 2,200.

TREFRHIW, a parish and village in Carnarvonshire, 2 m. NW of Llanrwst, on the W bank of the Conway. Pop. in 1831, 413; in 1851, 428. T. may be styled the port of Llanrwst. A quay has been constructed here, and it has a brisk trade in slates, lead, bark, and oak.

TREGAR, a parish in Monmouth, 6 m. W by S of Monmouth. Area 2,387 acres. Pop. 325.

TREGAYAN, a parish of Anglesey, 2½ m. NW by N of Llangefni. Area 2,066 acres. Pop. 241.

TREGONEY, a disfranchised borough in the p. of Cuby, Cornwall, 40 m. SW of Launceston, and 11 m. NNE of Falmouth, on the river Fal. Pop. in 1831, 1,127; in 1851, 844. It occupies the summit of a hill, and consists chiefly of one long street. By means of the Fal, which is navigable for large boats, some trade is carried on, arising chiefly from the exportation of copper and tin, and the importation of coals and groceries. The borough was formerly of some consequence, but fell into decay when Truro began to flourish. It was incorporated by James I., and returned 2 members to parliament, until disfranchised by the reform act.

TREGOM, a commune of France, in the dep. of the Cotes-du-Nord, cant. and 3 m. ESE of Plouaret, on the r. bank of the Guer. Pop. 1,385.

TREGUENNEC, a village of France, in the dep. of Finistere, cant. and 5 m. NW of Pont-l'Abbe, near the bay of Audierne. Pop. 340.

TREGUIER, a canton, commune, and town of France, in the dep. of the Cotes-du-Nord, and arrond. of Lannion. The cant. comprises 10 com. Pop. in 1831, 16,770; in 1846, 19,145.—The town is 12 m. ENE of Lannion, at the confluence of the Jaudy and Guindy, which unite to form the Treguier, and 6 m. from the shore of the English channel. Pop. in 1846, 3,796. It has a safe and commodious port, and a good roadstead, and carries on an active trade in horses, grain, seed, flour, flax, hemp, honey, butter, and oysters. This town was the seat of a bishopric erected in the 9th century, and was a place of flourishing trade until 1592, when it was burnt by the Spaniards.

TREGUNC, a commune of France, in the dep. of Finistere, cant. and 3 m. SE of Concarneau. Pop. in 1846, 3,462.

TREGYNON, a parish in Montgomeryshire, 5 m. N of Newton. Area 6,760 acres. Pop. 718.

TREHEGNIER, a hamlet of France, in the dep. of Morbihan, cant. of La Roche-Bernard, and com. of Penistin, on the l. bank of the Vilaine, near its mouth. Pop. 100.

TREHOU (Lx), a village of France, in the dep. of Finistere, cant. and 5 m. S of Ploudery. Pop. 1,080.

TREIDER-AA. See AA.

TREIGNAC, a canton, commune, and town of France, in the dep. of the Correze, and arrond. of Tulle. The cant. comprises 11 com. Pop. in 1831, 12,276; in 1846, 13,937.—The town is 20 m. N of Tulle, on the l. bank of the Vezere. Pop. in 1846, 3,246. It has a communal college, and possesses manufactories of fire-arms. The trade consists chiefly in sheep, wool, and fine wax.

TREIGNES, a department and commune of Belgium, in the prov. of Namur. Pop. 640.

TREIGNY, a commune of France, in the dep. of the Yonne, cant. and 5 m. N of St. Sauveur. Pop. in 1846, 2,517.

TREILLIERES, a commune of France, in the dep. of the Loire-Inferieure, cant. and 5 m. NW of La Chapelle-sur-Erdre, on a height. Pop. 1,479. Here are the castle of Gevres, built in 1658, and the chapel of Dons, founded by the dukes of Bretagne.

TREIS, a market-town of Prussia, in the prov. of the Rhine, circle and 8 m. ENE of Kochheim, on the Moselle. Pop. 1,300. It has a castle.

TREISA, a town of Hesse-Cassel, in the prov. of Ober-Hessen, circle and 3 m. from Ziegenhain, on the l. bank of the Schwalm, at the mouth of the Wiera. Pop. in 1840, 2,482. It has manufactories of hosiery, and woollen and linen fabrics, and several dyeworks and tanneries.

TREISAM, or TREYSAM, a river of the grand-duchy of Baden, in the circle of the Upper Rhine, which descends from the mountains of the Schwarzwald, 11 m. SSE of Waldkirch; runs first S, then NW through a narrow valley; passes Friburg; divides into two branches, which, at a distance of 9 m., again unite; thence it takes a N course, waters Eichstetten; and, after a course of about 36 m., joins the Elz, on the l. bank, 4 m. S of Kenzingen. Its principal affluent is the Glotter, which it receives on the r. bank.

TREIS-AN-DER-LUMBDE, a town of Hesse-Cassel, in the prov. of Ober-Hesse, circle and 12 m. from Marburg, on the Lumbde. Pop. 1,107.

TREJUNCOS, or TREJUNCOS, a town of Spain, in the prov. and 42 m. SW of Cuenca. Pop. 929.

TREKHIBENSKAIA, a town of Russia in Europe, in the gov. of Voronej, district and 26 m. S of Starobiatlak, on the l. bank of the Sievernoi-Donetz.

TRELAWNY. See CORNWALL and LOOE.

TRELAWNY, a parish of Jamaica, in the co. of

Cornwall, bounded on the N by the sea, on the E by the co. of Middlesex, on the S by that co. from which it is separated by Hector river and the p. of St. Elizabeth, and on the W by that of St. James. It is intersected in the S by a branch of the Blue mountains. Its principal river is the Martha Beea, which, at its mouth, forms a large harbour, on the W side of which Falmouth the chief town is situated.

TRELAZE, a commune of France, in the dep. of the Maine-et-Loire, cant. and 5 m. ESE of Angers, near the r. bank of the Authion. Pop. in 1846, 3,385. It has extensive slate quarries.

TRELECK, or **TRILLECH**, a parish in Monmouthshire, $4\frac{1}{2}$ m. S by W of Monmouth. Area 7,061 acres. Pop. in 1831, 940; in 1851, 1,136.

TRELECK, or **TRILLECH-GRANGE**, a chapelry in Treleck p., Monmouthshire, 7 m. SW by S of Chepstow. Area 1,774 acres. Pop. in 1851, 148.

TRELECK-AR-BETTWS, a parish in Carmarthenshire, 12 m. NW of Carmarthen. Area 11,492 acres. Pop. in 1831, 1,565; in 1851, 1,532.

TRELLY, a commune of France, in the dep. of the English channel, cant. and 5 m. SE of Montmartin, on a hill. Pop. 1,295.

TRELODY (SAINT), a commune of France, in the dep. of the Gironde, cant. and 1 m. ESE of Lesperre. Pop. 1,589.

TRELON, a canton, commune, and town of France, in the dep. of the Nord and arrond. of Avesnes. The cant. comprises 13 coms. Pop. in 1831, 13,948; in 1846, 16,216.—The town is 9 m. SE of Avesnes, in a woody and marshy locality. It has manufactories of hosiery, crystal, potash, a tannery, several breweries, forges, and blast-furnaces.

TRELOUP, a commune of France, in the dep. of the Aisne, cant. and 5 m. NNE of Conde-en-Brie, on the r. bank of the Marne. Pop. 1,362.

TRELOVONNO, a mountain of Greece, in Livadia, in the nom. of Attica, 6 m. ESE of Athens. This is the *Hymettus* of the ancients, noted for its honey.

TREMADOC, a market-town in Carnarvonshire, $4\frac{1}{2}$ m. E by N of Criccieth, near the sea-coast. It is seated on a level, 3 ft. lower than the surface of the sea, from which it is protected by an embankment. It is regularly built, and many of the erections exhibit a chaste style of architecture. The harbour, or Port Madoc, is well sheltered, and admits vessels of 300 tons.

TREMAEN, or **TREMEIN**, a parish in Cardiganshire, 4 m. ENE of Cardigan. Area 1,658 acres. Pop. in 1831, 241; in 1851, 276.

TREMAINE, a parish in Cornwall, $6\frac{1}{2}$ m. WNW of Launceston. Area 1,045 acres. Pop. in 1851, 95.

TREMBLADE (La), a canton, commune, and town of France, in the dep. of the Charente-Inferieure and arrond. of Marennes. The cant. comprises 6 coms. Pop. in 1831, 7,980; in 1846, 8,094.—The town is 5 m. BSW of Marennes, pleasantly situated on the l. bank of the Seudre, 6 m. from the sea. Pop. in 1846, 2,640. It has a Calvinist consistorial church, a custom-house, and a small port, and carries on a trade in salt, wine, brandy, and oysters.

TREMBLAY, a commune of France, in the dep. of the Ille-et-Vilaine, cant. and 3 m. S of Antrain, on a plateau, near the r. bank of the Couesnon. Pop. in 1846, 2,411. It has several tanneries and paper-mills.

TREMBLAY (La), a town of France, in the dep. of the Eure-et-Loire, cant. and 8 m. E of Chateauf. Pop. 500.—Also a village in the dep. of the Seine-et-Oise, cant. and 5 m. E of Gonesse, in a pleasant and fertile plain, watered by the Rideau. Pop. 1,200. It consists of two parts, distinguished as the Grand and Petit Tremblay. In the former

is the parish-church, and in the latter a fine Gothic castle and several villas.

TREMBLE COURT, a village of France, in the dep. of the Meurthe, cant. and $1\frac{1}{2}$ m. SE of Domèvre, on a height. Pop. 300. It has the remains of an ancient fortress.

TREMBLEUR, a department and commune of Belgium, in the prov. of Liege. Pop. 1,729. It has a manufactory of fire-arms.

TREMBLEVIF, a village of France, in the dep. of the Loir-et-Cher, cant. and 9 m. NW of Salbris, in a mountainous locality. Pop. 1,100.

TREMBOWLA, or **TREBOWLA**, a town of Austrian Poland, 18 m. S of Tarnopol, on the Huksa, an affluent of the Sereb. Pop. 3,000. It is celebrated for the bravery and firmness with which its inhabitants held out when besieged by the Turks in 1675.

TREM-D'USTON, a village of France, in the dep. of the Ariège, cant. of Onst and com. of Ostom. Pop. 1,434.

TREMECEN. See **TLEMSEN**.

TREMENTINE, a town of France, in the dep. of Maine-et-Loire, cant. and 4 m. NE of Chollet. Pop. 1,100. It has manufactures of linen and other stuffs.

TREMERY, a village of France, in the dep. of Moselle, cant. and 4 m. NW of Vigy, near the Moselle. Pop. 400.

TREMEZZO, a village of Austrian Lombardy, 15 m. NNE of Como.

TREMISTIERI, a village of Sicily, in the prov. of Catania, on the S flank of *Ætna*. Pop. 1,200.

TREMITI, the *Diomedes Islands* of the ancients, five small islands in the Adriatic, about 14 m. of the Capitanata coast of Naples, in N lat. $42^{\circ} 10'$. They are rugged and mountainous, but present some small patches of cultivation, and have a few inhabitants. The largest of the group, San-Domenico, is 4 m. in circuit; the others are Caprara, San-Nicola, Cretaccio, and La Vecchia.

TREMLES, or **TREMILKOW**, a town of Bohemia, 71 m. SSE of Prague. Pop. 3,000. There are considerable linen manufactures here.

TREMOLAI, a village of France, in the dep. of Dordogne, cant. and 5 m. S of St. Alvere, near the r. bank of the Dordogne. Pop. 1,000.

TREMOLETO, a town of Tuscany, in the district of Leghorn, 15 m. SSE of Pisa.

TREMONT, a village of Tazewell co., in Illinois, U. S., 50 m. N by E of Springfield.—Also a village of Schuylkill co., in Pennsylvania, 32 m. NE of Harrisburg.

TREMONTI, a village of Naples, in Abruzzo-Ultra 2da, 18 m. SSW of Aquila. Pop. 500.

TREMOREL, a village of France, in the dep. of Cotes-du-Nord, 7 miles E of Merdrignac.

TREMOSINE, a village and district of Lombardy, in the prov. and 30 m. NE of Brescia, on the NW coast of the Lago-di-Garda. Pop. 2,000. There are iron works here.

TREMOUILLE, a town of France, in the dep. of La-Vendee, 32 m. E by S of Poitiers. Pop. 1,300.

TREMOUTH, a haven in the p. of St. Gennys, Cornwall. It was proposed a few years ago to construct a safe and commodious harbour with breakwaters here, to which vessels might run at all times of the tide, and, in connexion with the harbour, to form a railway to Launceston, to be called the Launceston and Victoria railway.

TREMOUZEY, a village of France, in the dep. of Vosges, cant. and 2 m. SSW of Bains. Pop. 800.

TREMP, a town of Spain, in the prov. and 42 m. NNE of Lerida, on the r. bank of the Noguera-Pallaresa. Pop. 1,800. Leather, brandy, and coarse linens are made here.

TREMSBUTTEL, a village of Denmark, in the duchy of Holstein, 18 m. NE of Hamburg.

TRENDELBURG, a village of Hesse, 5 m. SSW of Carlshafen. Pop. 700.

TRENEGLOS, a parish in Cornwall, $7\frac{1}{2}$ m. NE by E of Camelford. Area 2,780 acres. Pop. 193.

TRENEWYDD. See **NEWTOWN**.

TRENT, a river of England, generally accounted the third in respect of length of course, which has its rise in Staffordshire, in three springs to the W of Leek. It soon becomes a pretty large stream, coming down from the hills with a rapid current; and having been augmented by the accession of other rivers, it flows past Trentham, to which it gives name, and thence to Burton in Derbyshire, where it becomes navigable, at a point 117 m. above its junction with the Humber. It soon after enters Nottinghamshire near Radcliffe-upon-Soar, flowing NNE, in a clear stream, and with a bold rapid current; winding round the town of Nottingham, it gives fertility to an immense range of meadows bounded by villas, villages, and luxuriant farms. It then proceeds with rather a tortuous course, through a highly cultivated country towards Newark, where it suddenly bends towards the N and pursues that direction as far as Clifton-upon-Trent, where it becomes the boundary between Nottinghamshire and Lincolnshire, and passes Gainsborough, but does not leave the co. of Nottingham until it reaches Heck-dyke, whence it proceeds to the Humber, which it joins at Trent-falls. At Gainsborough, it loses the influence of the tide, and is no longer navigable for vessels of any great burden; but vessels of a flatter construction sail up as high as Burton. Its navigation is of great importance to the country at large, and every means have been taken to afford it all the facilities possible; among other works a side-cut of 10 m. in length has been formed in order to avoid 21 shoals, which occur in little more than 13 m. of its course between Trent-bridge at the commencement of the Nottingham canal, and Sawley-ferry at the commencement of the Trent and Mersey canal. It has communication by canals with the Mersey, the Severn, and the Thames. Its chief affluents are the Sow, the Tame, the Soar, and the Devon, on the r.; and the Blyth, Dove, and Derwent, on the l. Its length of course is nearly 200 m.; and it drains an area of 4,000 sq. m.

TRENT, a parish of Somersetshire, 3 m. NE by E of Yeovil. Area 1,590 acres. Pop. in 1851, 580.

TRENT, in German **TRIENT**, in Italian **TRIENTA**, a circle of the Austrian states, in the S part of the Tyrol, comprising the eastern part of the Italian confines, and the chief part of the ancient bishopric of Trent. It is skirted by the Adige on the N, and is covered by ramifications of the Rhetian Alps.—Its cap., of the same name, is situated on the l. bank of the Adige, 72 m. NW of Venice, and 84 m. S of Innsbruck. It stands in a delightful valley among the Alps, in N lat. $46^{\circ} 6' 26''$. Though surrounded with walls, it is not capable of sustaining a siege. The streets are wide, well paved, and supplied with running water from a small stream which flows through the city. The chief public buildings are the palace of the archbishop; the cathedral, a structure in the Byzantine style; and the church of Sta Maria-Maggiore. The pop., about 13,000 in number, are employed partly in the manufacture of silk, partly in the culture of vines and tobacco. T. is the seat of a provincial court of justice, of a gymnasium, a lyceum, and several schools. The Romans called it *Tridentum*. Wenceslaus, emperor of Germany, made it over to the church of Rome in 1377. Its bishops

became princes of the empire, and members of the diet of Tyrol. Their bishopric was included among the secularizations of 1802, given at first to the grand duke of Tuscany, and afterwards to Bavaria, but restored after 1815 to Austria. The great feature in the history of T. is its council or assemblage of Catholic prelates from all parts of Europe, opened in 1545, after the Reformation had acquired a considerable degree of consistency, and continued with more or less of interruption during 18 years. The sittings were held partly in the cathedral, more in the church of St. Maria Maggiore, where there still exists a painting representing the council in full assemblage.

TRENT, a river of Upper Canada, which rises out of Rice lake, and is the channel by which a chain of shallow lakes connected with Lake Huron are brought into Lake Ontario.

TRENTENARA, a village of Naples, in the prov. of Principato-Citra, 18 m. S of Campagna. Pop. 900.

TRENTHAM, a parish and village in Stafford, $3\frac{1}{2}$ m. SSE of Newcastle-under-Lyne, watered by the Trent, and in the line of the Grand Trunk canal, comprising the chapelries of Blurton with Lightwood-Forest and Handford, and the townships of Butterton, Clayton-Griffith, Hanchurch, and T. Area 6,900 acres. Pop. in 1831, 2,344; in 1851, 2,747. The church, originally part of a priory re-founded here early in the 12th cent., is a fine old building.—The village stands on the E bank of the Trent, from which it derives its name. The inhabitants are principally employed in the manufacture of bricks and tiles. Trentham-hall, the magnificent seat of the duke of Sutherland, originally erected about a century ago, but which has undergone very considerable improvement, is in this p.

TRENTISHOE, a parish in Devon, $7\frac{1}{2}$ m. E by N of Ilfordcombe, on the coast of the Bristol channel. Area 1,571 acres. Pop. in 1851, 129.

TRENTOLA, a town of Naples, in the Terra-di-Lavoro, 12 m. SW of Caserta.

TRENTON, a township of Oneida co., New York, U. S., 12 m. N of Utica. Pop. in 1840, 3,178; in 1850, 3,540. The celebrated T.-falls are in this co. They are formed by Canada creek, which here falls 312 ft. within a distance of about 2 m.—Also the capital of the state of New Jersey, U. S., in Hunterdon co., on the E bank of the Delaware, opposite the falls, in N lat. $40^{\circ} 14'$, W long. $74^{\circ} 46'$, 58 m. SW of New York. Pop. in 1810, 3,008; in 1840, 4,035; in 1850, 6,766. It is a handsome and flourishing town. The river is navigable as far as this place for sloops; but above the falls it is not navigable, except for boats. This town has extensive railroad and steamboat connections.—Also the capital of Jones co., N. Carolina, on the Trent, 82 m. SE of Raleigh.—Also a township of Butler co., Ohio, 82 m. WSW of Columbus.—Also a village of Gibson co., in Tennessee, 120 m. W of Nashville.

TRENTON, a town of Upper Canada, in Northumberland co., 62 m. W of Kingston, at the entrance of the Trent into the bay of Quinté. Pop. 1,500.

TRENT-PORT, a village of Upper Canada, on a stream of the same name, which falls into the bay of Quinté. Pop. 950.

TRENTSCHIN, or **TRENTAIN**, a palatinate occupying the NW corner of Hungary, and adjacent to Galicia, Silesia, and Moravia. Its area is 1,860 sq. m., and its pop. 812,000, partly of Slawak, partly of Magyar descent. It is traversed by ridges of the Carpathians, and abounds in timber. The largest river is the Waag. The surface is well cultivated.—The capital, of the same name, is situated 54 m. SE of Olmutz, near the Waag. It consists of one

long street and a suburb. Pop. 8,000, partly Catholics, and partly Lutherans. It has manufactories of woollens, oils, and brandy.

TRE'N-TWR, or TARTOWA, a hamlet in the p. of Llanfihangel-cwm-dd, Brecon, 3 m. NW by W of Crickhowel. Pop. in 1831, 318; in 1851, 291.

TRE-OWEN, or TAWWEN, a township in Buckingham p., Montgomeryshire, $\frac{1}{2}$ m. NE of Welshpool. Area 1,860 acres. Pop. in 1851, 389.

TREPORT, a town of France, dep. of Seine-Inférieure, at the mouth of the small river Bresle, 17 m. NE of Dieppe. Pop. 2,914, employed partly in yarn spinning, and partly in fishing.

TREPTOW-AM-TOLLENS, or ALT TARTOW, a town of Prussia, in the prov. of Pomerania, regency of Stettin, circle and 17 m. SSE of Demmin, on the Tollense. Pop. in 1843, 3,852. It is enclosed by walls with three gates, and has two hospitals. It possesses manufactories of cloth and linen, several tanneries and distilleries of brandy.

TREPTOW-AU-DE-RIGA, or NEU-TARTOW, a town of Prussia, in the prov. of Pomerania, regency and 54 m. NE of Stettin, and circle of Greifenberg-Osten, on the l. bank of the Riga. Pop. in 1843, 5,899. It has manufactories of cloth, serge, hosiery, and hats. The harbour at the mouth of the river is now choked with sand.

TREPUZZE, a town of Naples, in the prov. of the Terra-d'Otranto, district and 9 m. NW of Lecce, in a flat but fertile locality. Pop. 2,068. It has a convent.

TREQUANDA, a market-town of the grand-duchy of Tuscany, to the N of Montepulciano. Pop. 2,300.

TRE'R-COED, or TRECOED, a township in Disserth p., Radnor, 5 m. NE of Bualit. Pop. 241.

TRESA, or TAMSA, a river of Austrian Lombardy, which issues from the W extremity of Lake-Lugano; runs W; forms for some distance the line of division between the prov. of Como and the Swiss prov. of Ticino; enters the former prov.; and after a total course of about 11 m., throws itself into Lake Maggiore on the E bank, and 1 m. SW of Luino.

TRES-AMERICANOS, a river of Brazil, in the prov. of Minas-Geraes, which has its sources in the Serra-das-Emeraldas, and falls into the Rio-Breto.

TRES-BARRAS, a town of Brazil, in the prov. of Minas-Geraes, on the r. bank of the Velhas, at the confluence of the Sepo or Paranna.—Also an auriferous river in the prov. of Matto-Grosso, which joins the Tapajos on the r. bank.—Also a river of the prov. of Santa-Catharina, formed by the confluence of three streams, and falling into the bay of Babitonga.

TRESCLEOUX, a village of France, in the dep. of the Hautes-Alpes, cant. and 3 m. N of Orpierre, on the slope of a hill, near the l. bank of the Blaisance. Pop. 480.

TRESCO, or TRESCAW, one of the Scilly islands, to the W of Annet, comprising nearly 800 acres of fertile land. The principal village upon it is Dolphin. Pop. in 1831, 470; in 1851, 430.

TRESCORRE, or TRESCORIO, a town of Austrian Lombardy, in the deleg. and 8 m. E of Bergamo, at the entrance to the Val-Cavalina. Pop. 1,630. It is noted for its thermal springs and baths, and has several forges.—Also a village in the prov. of Lodi and Crema, district and 5 m. NW of Crema. Pop. 900. It has a saltpetre refinery.

TRESEBURG, a hamlet of the duchy of Brunswick, district and circle and 6 m. S of Blankenburg, on the Bode. It has a powder-mill and a quarry of asbestos.

TRESENTA, a small district of Sardinia, in the div. of Capo-Cagliari, prov. and to the N of Cagliari. Pop. 8,800. It is noted for its fertility, especially in corn, wine, and pasturage, and is considered the granary of Cagliari. It contains 12 villages, of which the chief is Guasile.

TRES-FORCAS, a headland of Morocco, in the prov. of Fez, to the N of Mellila, in N lat. $35^{\circ} 27' 55''$, W long. $2^{\circ} 56' 25''$.

TRESHINISH ISLES, a group of Hebridean islets, 5 m. NNW of Staffa, and $\frac{1}{2}$ m. SE of Coll. They are disposed in a chain of between 4 and 5 m. in length from NE to SW; and consist of five principal isles, and some intervening rocks. Their whole coasts, with little exception, present perpendicular cliffs of from 40 to upwards of 60 ft. in height; and as seen from a little distance, possess a singularly interesting appearance. They are mere uninhabited pasture-grounds. They are composed throughout of amygdaloid and basalt,—the latter of perpendicular fracture, but not columnar.

TRESILICO, a town of Naples, in the prov. of Calabria-Ultra, district and 10 m. SE of Palim, in a flat but fertile locality. Pop. 600. It has a collegiate church and a convent. It suffered severely from an earthquake in 1783.

TRESILLIAN, a village in the p. of Merthor, co. of Cornwall, on a stream which falls into one of the creeks of Falmouth harbour, and over which there is a bridge here.

TRES-IRMAOS, a mountain of Brazil, in the prov. of Sergipe, on the r. bank of the Rio-Ipirang or Vaza-Barra, between São-Chistovão and the sea.—Also a headland on the N coast of the prov. of Rio-Grande-do-Norte, 12 m. NW of Natal, in S lat. $5^{\circ} 2'$, W long. $35^{\circ} 58'$.—Also a group of islets, three in number, to the SSE of the S extremity of Santa Catharina.

TRES-ISLAS, a group of islands, three in number, near the coast of English Guayana, opposite the mouth of the Essequibo, in N lat. $6^{\circ} 5'$. They serve to cover the bay, and by a fort and batteries erected by the Dutch form its defence.

TRESKOWITZ. See DRESKOWITZ.

TRESLAOUENAN, a village of France, in the dep. of Finistere, cant. and 2 m. NNE of Plowzevede. Pop. 2,660.

TRESMERE, a parish in Cornwall, 6 m. W by N of Launceston. Area 1,344 acres. Pop. in 1831, 171; in 1841, 175.

TRESNURAGHES, a village of Sardinia, in the div. of Capo Sassari, prov. and 9 m. WNW of Cagliari, in a fertile plain. Pop. 1,800.

TRESORERIE, or TREASURY ISLANDS, a group of islands in the Salomon archipelago, South Pacific. It occupies a circumference of about 30 m., and consists of 6 or 7 islands in close proximity, and generally low and woody. The central island is in S lat. $7^{\circ} 23' 30''$, E long. $155^{\circ} 29' 15''$.

TRES-PIES, a group of islands, 3 in number, on the coast of Peru, and dep. of Arequipa, in S lat. $20^{\circ} 47'$. They are sterile and desert, but abound with seals.

TRES-PRATAS, a town and parish of Brazil, in the prov. of Minas Geraes, between the rivers Grande and des Mortes, about 30 m. E of Lavras-do-Fimil. Pop. 3,000.

TRES-PUNTAS, a headland of Central America, in the state of Honduras, which advances to the NE of the Amatic gulf, in the SW part of Honduras bay.

TRESQUES, a commune of France, in the dep. of the Gard, cant. of Bagnols. Pop. 1,095.

TRES-RIOS-DO-NORTE, a river of Brazil, in the prov. of Rio-de-Janeiro, which has its source in

the Serra-de-San-Salvador, at Tres-Picos, traverses Lake Cima, and joins the Imbe to form the Uru-rabv.

TRESSANGE, a village of France, in the dep. of the Moselle, cant. and 5 m. NE of Audun-le-Roman. Pop. 196. It has an oil-mill.

TRESSIN, a village of France, in the dep. of the Nord, cant. and 4 m. SSW of Lannoy, on the Marcq. Pop. 409. It has a nail-work.

TRESSON, a commune of France, in the dep. of the Sarthe, cant. and 5 m. S of Boullaire. Pop. 1,504. It has a manufactory of linen, and in the vicinity are quarries of limestone.

TRESSWITZ, a village of Bavaria, in the circle of the Regen, 29 m. ENE of Amberg, on the r. bank of the Pfreimt. It has an ancient castle.

TRESTENBURG. See **TASNAD**.

TRESVISO, a village of Spain, in the prov. and 51 m. WSW of Santander, on the l. bank of a small affluent of the Deva. Pop. 124. In the vicinity are mines of lead and antimony.

TRESWELL, or **TRUSWELL**, a parish in Notts, $5\frac{1}{2}$ m. E by S of East Retford. Area 1,561 acres. Pop. in 1831, 224; in 1851, 254.

TRESZTYIA, **TRESZTIE**, or **ROHRBACH**, a village of Transylvania, in the comitat of Zarand, 19 m. N of Vajda-Hunyad, in the midst of mountains, on a small affluent of the Maros.

TRETEAU, a village of France, in the dep. of the Allier, cant. and 4 m. WSW of Jaligny, in a marshy locality. Pop. 720.

TRETIRE, a parish with Michael-Church, in Herefordshire, $5\frac{1}{2}$ m. W of Ross. Area 1,356 acres. Pop. in 1831, 120; in 1851, 138.

TRETS, a canton, commune, and town of France, in the dep. of the Bouches-du-Rhône, and arrond. of Aix. The cant. comprises 8 com. Pop. in 1831, 8,695; in 1846, 8,841.—The town is 14 m. ESE of Aix, on the slope of a mountain named Regaignas, and commanding an extensive plain watered by the Arc. Pop. in 1846, 3,028. It has old ramparts now to a great extent demolished, a small suburb and several promenades. The body of the town has narrow, irregular streets, and the houses are old and many of them dilapidated. It contains four fountains, a large town-house comprising two prisons, and an hospital. It possesses manufactories of soap, salt, wax, and bricks, distilleries of brandy, coal-mines, and quarries of marble. This town is of great antiquity, and appears to have been ceded to the Marseillais by the *Albicos* and *Salluvii* who inhabited the valley of the Arc.

TRETTO, a village of Austrian Lombardy, in the prov. and 19 m. NW of Vicenza, and district of Istria, on a mountain abounding with porcelain-clay which forms its chief article of traffic.

TREUCHTLINGEN, a market-town of Bavaria, in the circle of Middle Franconia, 10 m. SE of Heidenheim, near the r. bank of the Altmühl. Pop. 1,590. It has two castles, and manufactories of galloon and parchment.

TREUEN, **TRUKAN**, **DREWEN**, or **TROEN**, a town of Saxony, in the circle of Viotland, bail. and 7 NE of Plauen. Pop. 4,443. It has manufactories of cloth and linen, several tanneries, breweries, and paper-mills.

TREUENBRIEZEN, a town of Prussia, in the prov. of Brandenburg, regency and 23 m. SSW of Potsdam, and circle of Zancha-Belzig, on the Nieplitz. Pop. in 1843, 4,796. It is enclosed by walls with three gates, and has two churches and an hospital. It has manufactories of linen, cloth, and other woollen fabrics, several tanneries, and paper-mills, breweries and distilleries.

TREURENBERG BAY, a bay of the N coast of

Spitzbergen, in N lat. $79^{\circ} 55'$. It was visited by Captain Parry in 1827.

TREVALGA, a parish in Cornwall, 6 m. N by W of Camelford. Area 1,299 acres. Pop. 126.

TREVALLYN, a town of New South Wales, in the co. of Durham, on Paterson river, 3 m. from Gresford.

TREVANDRUM, a town of Hindostan, in the principality of Travancore, in N lat. $8^{\circ} 30'$, E long. $77^{\circ} 12'$. It consists chiefly of a large quadrangular fort with extensive suburbs. Pop. 12,000.

TREVANION, or **LAGUERTA**, an island of the South Pacific, in the archipelago of Santa Cruz, a little to the NW of the island of that name, at the entrance to Graciosa or Trevanion bay, in S lat. $40^{\circ} 30'$, and E long. $185^{\circ} 45' 35''$. It has a deep bay on the S side, and is very populous. It was discovered in 1767 by Captain Carteret.

TREVE, a village of France, in the dep. of the Cotes-du-Nord, cant. and 3 m. NW of Loudeac, on a small affluent of the Oust. Pop. 2,570.

TREVEJANO, a town of Spain, in the prov. and 15 m. S of Lagrono, amid mountains, in an arid locality, near the l. bank of the Leza. Pop. 350. Wool-spinning is the chief branch of local industry.

TREVEJO (**SAN-MARTIN-DE**), a town of Spain, in the prov. and 51 m. NNW of Caceres, on a mountain. It is commanded by a fortress now unoccupied. Pop. 330.

TREVENNEN. See **UNAPOA**.

TREVENZUOLO, a village of Austrian Lombardy, in the prov. and 13 m. SSW of Verona, and district of Isola-della-Scala, near the l. bank of the Tartaro. Pop. 900.

TREVEREY, a village of France, in the dep. of the Meuse, cant. and 9 m. NW of Gondrecourt, on the l. bank of the Ornain. Pop. 625. It has several forges and blast-furnaces. In the vicinity is a quarry of free stone.

TREVES, a canton and commune of France, in the dep. of the Gard, and arrond. of Vigan. The village is 14 m. NW of Vigan, on the Trevezet, a small affluent of the Dourbie. Pop. 477. In the vicinity are quarries of fine grained marble.—Also a village in the dep. of the Maine-et-Loire, cant. and 2 m. SE of Gennes, on the l. bank of the Loire. Pop. 280. It was formerly a town with the title of barony.

TREVES, or **TRIEBS**, a government of Prussia, comprising the SW part of the old prov. of the Lower Rhine. It consists of part of the old electorate of Treves, a small portion of the duchy of Luxemburg, some petty districts in the co. of Sponheim, the principality of Saarbrück, and the bishopric of Metz. The area of the whole is 2,480 sq. m. Pop. in 1843, 478,338, of whom 374,002 were Catholics, and 58,870 Protestants; in 1849, 492,182. It is divided into the 13 circles of Daun, Bernkastel, Merzig, Saarlouis, Prüm, Treves, Saarbrück, Bittsburg, Country district of Treves, Ottweiler, Wittlich, Saarlouis, and Sanct-Wendel. It is watered by the Moselle, which is here a considerable river running in a WSW course. Its chief tributaries here are the Saar and the Nahe. The surface is hilly, and presents a considerable proportion of forest land. Iron, calamine, copper, and coal are wrought. Manufactures are conducted on a small scale, but comprise leather, linen, glass, porcelain, pottery, and hardware. In sheltered situations on the banks of the Moselle, vines are occasionally reared, and the scenery of that river is here romantic.

TREVES, or **TRIEBS**, one of the most celebrated cities in Germany, the capital formerly of an electorate and archbishopric, and now of the above government, is situated in N lat. $49^{\circ} 47'$, 57 m. SW of Coblenz, and 22 m. ENE of Luxemburg, in the centre

of a large valley lying along the Moselle, and open to the NW and SE, but confined on the other sides by two gentle eminences covered with vines. Pop. in 1843, 19,311; in 1846, 19,639. The chief buildings are the elector's palace, now turned into barracks; the church of Notre Dame, built about 1240, and affording a fine specimen of Gothic architecture; another church, that of St. Simeon, said to occupy the site of a building used by the Gauls for their public meetings, and by the Romans for a capitol or town-house. The cathedral is an irregular structure remarkable only for its altars, its marble gallery, and the size of the stones with which it is built. There are a public library of 60,000 vols., a museum, theatre, and several public schools. The university of T. was founded in 1454, and greatly extended in 1722. After 1794, it was converted by the French into a central school, to which the Prussians have given the name of gymnasium. Its classes are held in a building of great size, in one of the wings of which is a library. The manufactures consist of woollens and linens, porcelain, soap, leather, paper, wax, tobacco, and hats. The inhabitants, when subject to the electors, derived their support chiefly from the great ecclesiastical establishments; but the French abolished the convents and monasteries, and secularised four Benedictine abbeys, with good revenues, situated outside the walls. There is some export of Moselle wine. Few towns are richer in Roman antiquities: coins, medals, and inscriptions, are frequently dug up. The remains of the ancient Roman baths are extensive. The piers of the bridge over the Moselle are the work of either the Romans or Gauls. The Romans found a town on the site of Treves, and the inhabitants, whom they called *Treviri*, somewhat more improved than their rude neighbours. Under the name of *Augusta Treverorum*, it became one of their chief stations, and the capital of *Gallia Belgica*. After the era of Constantine, T. was the residence of the prefect of Gaul, until the repeated inroads of the Germans necessitated the removal of the seat of administration to Arles. It was frequently a royal residence under the Franks, and was subsequently received into the German empire, and continued during many centuries under an ecclesiastical government. It was taken from them by the French between the years 1681 and 1794; and remained in their hands from 1794 to 1815.

TREVETHIN, a parish in Monmouthshire, 6½ m. W by N of Usk, including the township of Pontypool. Area 11,329 acres. Pop. in 1831, 10,280; in 1851, 16,864. The inhabitants are mostly employed in the iron and coal mines which have rapidly increased in this neighbourhood. The woollen manufacture is also carried on.

TREVI, a town of the Papal states, in the comarca, and 41 m. E of Rome, on the S slope of Monte Piaggio, near the r. bank of the Teverone. Pop. 1,025.—Also a town in the deleg. and 11 m. N of Spoleto, on the W side of Monte Sereno. Pop. 3,020. It has a considerable trade in corn.

TREVIANA, a town of Spain, in the prov. and 83 m. WNW of Logrono, on a hill, in a mountainous and infertile locality. Pop. 1,156. It has a parish-church, an hospital, and a customhouse, and several spinning-mills.

TREVICO, a town of Naples, in the prov. of the Principato-Ultra, district and 11 m. SSE of Ariano, in the midst of the Apennines. Pop. 2,000. It has a cathedral and two other churches. The environs produce valuable medicinal plants.

TREVIÈRES, a canton, commune, and town of France, in the dep. of Calvados and arrond. of Bayeux. The cant. comprises 28 com. Pop. in 1831,

12,082; in 1846, 12,156. The town is on the slope of a hill, 10 m. WNW of Bayeux. Pop. in 1846, 1,019. It carries on an active trade in tallow, cattle, and butter.

TREVIGLIO, or **TARVIGLIO**, a town of Austrian Lombardy, in the gov. of Milan, deleg. and 14 m. S of Bergamo, in a fine plain, between the Adda and Sorio. Pop. 6,200. It has an hospital and other charitable institutions. Its industry consists chiefly in the culture of silk.

TREVIGNO. See **ROVIGNO**.

TREVILLERS, a village of France, in the dep. of the Doubs, cant. and 4 m. NE of Meiche. Pop. 640. It has manufactories of pendulums, and has a considerable trade in horses.

TREVINO, a town of Spain, in the prov. of Burgos, 9 m. SSW of Vitoria, on a hill, near the r. bank of the Aynda. Pop. 586. It has an old and now ruinous fortress, and an hospital. This town is the capital of a small county.

TREVISO, a town of Austrian Italy, the capital of a deleg. of the same name, situated on the rivers Sile and Piavesella, at their confluence, 15 m. NW of Venice. It is the see of a bishop, and contains 20,000 inhabitants. It is surrounded with a strong rampart and a wet ditch, and is tolerably well-built, the streets, though irregularly laid out, being wide and well-paved, and most of the houses having colonades or piazzas in front. The city contains an unfinished cathedral, and a great number of churches, monasteries, and convents, several hospitals, two theatres, a library of 80,000 vols. and a botanic garden. The industry consists in manufactures of silk, cotton stuffs, and cutlery; a traffic is carried on in these articles, and in the cattle, corn, fruit, and other productions of the adjacent country. In 1797, T. was taken by the French, who made it the capital of the department of the Tagliamento. The title of Duke of Treviso was conferred by Bonaparte on Marshal Mortier.—The deleg. of T. has an area of 45 German sq. m., with a pop., in 1843, of 279,064. It is a rich and fertile province abounding in corn, wine, wax, and timber.

TREVOIS, a village of Portugal, in the prov. of Beira-Alta, 16 m. SE of Lamego. Pop. 800.

TREVOUX, a town of France, in the dep. of Ain, 14 m. N of Lyons. It is built in the form of an amphitheatre, on the declivity of a small hill on the l. of the Saone. Pop. in 1789, 2,704; in 1846, 2,538. It has manufactures of gold and silver leaf, and jewellery, and several printing-offices. Having been the residence of Jesuits, it was remarkable for a literary journal, entitled *Memoires de Trevoux*, published here, as well as for a well-known Encyclopædia, or *Dictionnaire Universel*, which issued from the same press.—The arrond. comprises an area of 151,760 hectares, and is divided into 7 cantons. Pop. in 1846, 84,423.

TREWEN, a parish in Cornwall, 4½ m. W by S of Launceston. Area 988 acres. Pop. in 1851, 188.

TREWHET, or **TREWHITT** (High and Low), a township in Rothbury p., Northumberland, 13 m. WSW of Alnwick. Area 1,653 acres. Pop. 116.

TREYM, or **TOUR-DE-TREME**, a village of the Swiss cant. of Freyberg, 2 m. N of Gruyeres.

TREYSA, a town of Hesse-Cassel, on the l. bank of the Schwalm, the capital of the co. of Ziegenhayn. Pop. 2,600. The inhabitants are chiefly employed in the manufacture of stockings.

TREZZANO, a village of Austrian Italy, in the prov. of Milan, 2 m. SW of Corsico. Pop. 1,067.

TREZZO, a town of Austrian Italy, in the prov. and 19 m. NE of Milan. Pop. of com. 3,285.

TRIACASTELLA (**SANTIAGO-DE**), a village of Spain, in the prov. and 18 m. SE of Lugo. Pop. 500.

TRIADELPHIA, a township of Montgomery co., Maryland, U. S., 38 m. WNW of Annapolis.—Also a village of Ohio co., in Virginia.

TRIANA (*SANTA-CRUZ-DE*), a village of Chili, 25 m. S of Santiago, on the r. bank of the Rupel, in S lat. 34° 19'.

TRIANGLE ISLAND, one of the smaller Bahama islands, in N lat. 20° 51'.

TRIANGLES (*NORTHERN*), a reef of rocks in the bay of Honduras, in N lat. 18° 50'.

TRIANGLES (*SOUTHERN*), a reef of rocks and islets in the bay of Honduras, in N lat. 17° 5'.

TRIAUCOURT, a village of France, dep. of the Meuse, 17 m. NNW of Bar-sur-Ornain. Pop. 900.

TRIBALDOS, a village of Spain, in the prov. and 39 m. WSW of Cuenca. Pop. 600.

TRIBAU (*BOHEMISCH*), a town of Bohemia, 90 m. E by S of Prague, and 6 m. W of Landskron. Pop. 900.

TRIBAU (*MAHRISCH*), a town of Moravia, on the Trzebowka, 28 m. NW of Olmutz, on the railway to Prague. Pop. 3,100. It has some woollen manufactures.

TRIBESEES, or *TRIBSEES*, a town of Prussian Pomerania, on the r. bank of the Trebel, 12 m. E by S of Rostock. Pop. 1,700.

TRIBOLI, or *TREBOLI*, a town of Asiatic Turkey, on the coast of the Black sea, 5½ m. W by S of Cape Karaburnu. The houses are scattered along the edges of the precipices and sides of three small projecting headlands. Pop. 2,000. The headlands form two small coves in which small vessels may ride. The exports consist of red wine, copper, wax, silk, and dried fruits. The surrounding hills are uncultivated, but afford good pasturage for sheep and goats.

TRIBULATION (*CAPE*), a cape on the NE coast of Australia, in S lat. 16° 6'.

TRIBUR. See *TREBUR*.

TRICALA, or *TRIKALA*, anciently called *Tricca*, a town of European Turkey, the capital of a sanjak comprising a considerable part of Thessaly. It stands on the declivity of a mountain-ridge, about 3 m. N of the Salembria, the ancient *Penese*, in N lat. 39° 31', 30 m. W of Larissa, and 33 m. E by S of Janina. Its pop. has been estimated at 10,000; but being an inland place, its trade is inconsiderable, and much of it is in ruins.

TRICALORE, a town of Hindostan, in the Carnatic, in N lat. 11° 30', near the r. bank of the Pananr.

TRICARICO, a walled town of Naples, in the prov. of Basilicata, on the river Basiento, between the Basiento and the Bradano, 19 m. E of Potenza. Pop. 4,800.

TRICASE, a town of Naples, in the prov. of Terra-d'Otranto, 24 m. SE of Gallipoli. Pop. 2,800. It has manufactories of coarse cottons and of leather.

TRICERO, a walled town of Piedmont, 10 m. WNW of Casale. Pop. 1,200.

TRICESIMO, a town of Austrian Italy, in the deleg. and 7 m. N of Udina.

TRICHINDORE, a town, and a taluk or revenue-district, of Hindostan, on the SE coast of the peninsula. The whole district is flat, sandy, and saline, but has recently attracted attention from its presumed capabilities for cotton-cultivation. To the S this flat and sandy tract extends nearly to Vissia-veetee, within 20 m. of Cape Comorin; and to the N it extends much further, as far as Ramnad, and perhaps nearly to Madras. The breadth of this flat sandy tract, to the NW of Trichindore, is more than 10 m.; and to the northwards it greatly increases. The country around T. may be described as uncultivated. Immense herds of antelopes roam over it,

and flocks of sheep and goats, as well as herds of buffaloes and cows, are led along it for pasturage. Near the villages are some fields of dry grains, as cotton sown with cambu, rapeseed, sesamum, and castor-oil plant. There are also many topes of Palmyra trees near the villages, and likewise near the coast; but even amongst these topes, cotton could be grown, as the trees give little or no shade, and are often far apart. The soil of this sandy district contains a large amount of salt, and in consequence most plants serviceable to man will not flourish in it, and some will not even grow in it.

TRICHINOPOLY, a city and fortress of Hindostan, the cap. of a district of the same name which lies between the parallels of 10° 40' and 11° 25' N. It is advantageously situated on the S bank of the river Cavery, opposite the island of Seringam, in N lat. 10° 50', 30 m. W of Tanjore. Its pop. is about 35,000, exclusive of the troops usually numbering from 3,000 to 4,000. It has manufactories of cotton cloth, saddlery, and jewellery. The fort crowns the summit of an isolated rock 350 ft. in height. It contains the arsenal and military hospital. This city was the capital of a principality, the chief of which was entitled the Naic of Madura, until 1736, when the prime minister of the Nabob of the Carnatic got possession of it by treachery. It was taken by the Mahrattas in 1741, but recovered by the Mahomedans in 1743. From 1751 to 1755, T. being then the principal strong place remaining in possession of the nabob Mahomet Ali, was several times besieged by the French and their allies, but was rescued by the assistance of the British under Lawrence and other gallant officers. With the cession of the prov. it came into possession of the British.—The district of T. has an area of 3,000 sq. m. It is level and fertile where irrigated; but the prevailing soil is sandy and arid.

TRICHKI, a town of Russia, in the gov. of Wilna, 15 m. ENE of Teloch.

TRICIO, a village of Spain, in the prov. and 15 m. WSW of Logrono, near the r. bank of the Neijerilla.

TRICKUR, a town of Hindostan, 50 m. N by W of Cochin. It consists of a group of villages enclosed within a common rampart.

TRICOT, a town of France, in the dep. of the Oise, 15 m. NE of Clermont. Pop. 1,400. Woollen stuffs and various knitted articles in general use in France, and called from this place tricots, are manufactured here.

TRIE, a village of France, dep. of Hautes-Pyrenees, 13 m. ENE of Tarbes.

TRIEBEL, a town of Prussia, in Lower Lusatia, near the river Neisse, 47 m. S of Frankfurt-on-the-Oder. Pop. 1,120.

TRIEBSWITTER, a village of Hungary, in the com. of Torontal, 6 m. from Komlöl.

TRIEL, a town of France, dep. of Seine-et-Oise, 14 m. NNW of Versailles. Pop. 1,900. There are large stone quarries in the neighbourhood.

TRIE-LE-CHATEAU, a village of France, in the dep. of Oise, 16 m. SW of Beauvais, on the r. bank of the Troene.

TRIENGEN, a parish and village of Switzerland, in the cant. and 16 m. NW of Luzern. Pop. 1,917, Catholics.

TRIENT. See *TRENT*.

TRIER. See *TREVES*.

TRIESCH, or *TRYSETE*, a town of Moravia, 6 m. SSW of Iglaui. Pop. 3,200. It has woollen manufactories.

TRIESDORF, a village of Bavaria, in the pre-dial and 9 m. ESE of Herrieden.

TRIESTE, a large and thriving port of the Austrian dominions, the capital of the circle of Adels-

berg, in the Illyrian territory, situated near the NW extremity of the gulf of Venice, in N lat. $45^{\circ} 38' 36''$, E long. $13^{\circ} 46' 30''$, 214 m. SSW of Vienna. Pop. in 1826, 44,234; in 1850, 63,901. It is divided into an old and a new town. The former stands on a hill which is surmounted by a castle; the new town, called also Theresienstadt, is on level ground, intersected by a broad canal, and is built with neatness and regularity. The new city presents some good streets and squares, and a number of commodious buildings, but few that are large or striking, except the cathedral, a church that formerly belonged to the Jesuits, the exchange, and the theatre. Among the public institutions of the place are a gymnasium, a society of arts and sciences, a public library, a large hospital, and a large and well-arranged lazaretto for performing quarantine. Here are also several courts for the administration of justice. The dreary masses of curiously stratified and contorted rock which form the background of T., are relieved at points by the villas of the wealthy citizens, surrounded by gardens in which the Marasca cherry, fig, grape, olive, and melon are cultivated. T. is almost the only seaport for a large tract of country, comprising the S of Germany, the Illyrian part of the Slavonian provinces, and in general the territory extending from Tyrol to Transylvania. Venice does not from its distance materially interfere with the trade of T.; while Fiume is a small place and much less advantageously situated. Among the exports from T. are the produce of the mines of Idria, and even of Hungary; linen, tobacco, and woollens from different parts of the Austrian dominions, and printed cottons from Switzerland. The amount of exports by sea in 1846 was £4,846,800; in 1851, £5,860,000. The amount of imports by sea in 1846 was £6,789,500; in 1851, £9,700,000. The imports consist of cotton, hides, raisins, silks, rice, oil from the Levant, wheat from Odessa, sugar, coffee, and other tropical products from the West Indies and Brazil. In 1844, T. exported to Malta in 22 vessels of 3,286 tons, a value of £25,100, and imported in 15 vessels of 1,846 tons, a value of £33,900. The exports to Malta consisted of flour, potatoes, glasses, tobacco, nails and steel, timber, hemp, Indian corn, sugar, and manufactured goods. The imports from Malta consisted chiefly of cotton, sandal wood, seeds, pitch, tar, &c. In the same year T. sent to Gibraltar 4 vessels of 999 tons, with cargo of £3,500 value in timber, vegetables, glass wares, and tobacco, and received from that emporium in return, £7,000 in value of cottons, lead, &c. in 2 vessels having a tonnage of 290 tons. The trade of the Adriatic is conducted in barks of from 20, 30, or 40 tons. These and vessels of 300 tons enter with ease the canal which leads from the harbour into the new town, and has on each side quays for vessels to load and unload. The number of vessels which arrived in 1850 was 2,057; in 1852, 2,858. The quantity of goods conveyed by land to and from T. is very considerable. The amount of exports by land in 1851 was £2,500,000; of imports £3,740,000.—Ship-building is carried on with activity here. The manufactures of the place are sugar-refining, white lead, soap, leather, paper, and wax. At some distance from the town there are salt-works; and coal is obtained in the vicinity. The environs of T. are stony; the land is unfit for the culture of corn. The fisheries along the coast are abundant.—T. is built on or near the site of the Roman colony of *Tergeste*; and there are some remains of the aqueduct, partly subterranean, which brought water to it from a distance of 6 m. It fell into the possession of Austria in 1822. In the 15th cent. it was a small place, without trade. In 1719 it was made a

free port by the Austrian government. In 1753 the harbour was enlarged, and a mole formed to shelter it from the S; it is open, however, to the *Bora*, an impetuous NE wind, which, did it not blow off the land, would be dangerous to the shipping.

TRIESTE VITZ, a village of Prussia, in the prov. of Saxony, to the E of Torgau. Pop. 300.

TRIESTING, a river of Austria, in the prov. of Lower Austria, which descends from the mountains of the Wienerwald, in the E part of the upper circle of that name; passes Kaumberg; runs through a narrow valley; waters Altenmarkt, Poltenstein, Leobersdorf; and, after a course first in a S, and afterwards in a NE direction, joins the Schwachat, on the r. bank, 9 m. S of Vienna.

TRIEUX, a river of France, in the dep. of the Cotes-du-Nord, which issues from the etang Neuf, in the NE extremity of the cant. of Bothoa; runs N past Guingamp, Pontrieux, and Lezardrieux; and, after a course of about 42 m., throws itself into the British channel, opposite the Isles-à-Bois and Brehat. Its bed below Pontrieux is generally broad and deep, and the harbour which it forms below Lezardrieux is capable of receiving 12 vessels of the line. The Leff is the only affluent of importance.—Also a village in the dep. of the Moselle, cant. and 4 m. SSE of Audun-le-Roman. Pop. 400. It has an oil-mill.

TRIFOGLIETTI, or **VALLE-DEL-BOVE**, a valley of Sicily, in the prov. and district and to the N of Catania, on the E side of Mount *Ætna*, in the upper region, or decouverte of the mountain. It was inundated in 1755 by an aqueous eruption of the volcano.

TRIFTLARN, a market-town of Bavaria, in the circle of Lower Bavaria, to the SW of Passau. Pop. 880. It has manufactories of cloth and of violin strings.

TRIGARDON, or **TRICARDON**, a town of Greece, in the dep. of Acarnania and district of Xeromeros, 18 m. W of Missolonghi, in the midst of a marsh, on the r. bank of the embouchure of the Aspropotamus. It was formerly a flourishing place, but its port is now choked with sand, and its commerce consequently destroyed. This place occupies the site of the ancient *Enida*, of which some remains still exist.

TRIGG, a county in the SW part of the state of Kentucky, U. S., drained by Little river and its branches, and comprising an area of 356 sq. m. The surface is undulating, and the soil fertile. Pop. in 1840, 7,716; in 1850, 10,129. Its cap. is Cadiz.

TRIGIANO, a town of Naples, in the prov. of the Terra-di-Bari, district and 5 m. SSE of Bari, and cant. of Capurso, in a plain near the shore of the Adriatic. Pop. 2,950.

TRIGL, or **TRIGA**, a town of Austria, in Dalmatia, in the circle and 19 m. NE of Spalatro, on the slope of a mountain, near the r. bank of the Cettina.

TRIGLAFF, or **TRIEGLAFF**, a village of Prussia, in the prov. of Pomerania, regency and 89 m. NE of Stettin and circle of Greiffenberg-Osten. Pop. 230.

TRIGLIA, a town of Turkey in Asia, in Anatolia, in the sanj. of Khodavendkiar, 8 m. W of Mondania, on the S side and near the entrance to the gulf of that name. It is noted for its olives.

TRIGNO, a river of Naples, in the prov. of Sannio, formed by the confluence of two streams which unite near Vasto-Girardo; runs first SE, then NE; bathes the districts of Campobasso and Larino, which it separates from the prov. of Abruzzo-Citra; enters afterwards into that prov.; and after a total course of about 66 m., throws itself by two branches into the Adriatic, 6 m. SE of Il-Vasto.

TRIGUEROS, a town of Spain, in the prov. and

11 m. NNE of Huelva, on an inclined plain stretching to the r. bank of the Tinto, and remarkable for its fertility. Pop. 3,534. It has a parish-church, a convent, two hospitals, a Jesuits' college, and a custom-house, and possesses manufactories of pottery and of tiles. The adjacent mountains contain mines which have been wrought successively by the Phœnicians, Carthaginians, Romans, and Arabs.—Also a town in the prov. and 9 m. NNE of Valladolid, in a fertile locality. Pop. 734.

TRIGUIERES, a village of France, in the dep. of the Loiret, cant. and 8 m. E of Chateau-Renard, on the Onanne. Pop. 1,360.

TRIJUEQUE, a town of Spain, in the prov. and 18 m. NE of Guadaluara, on an elevated rock, commanding an extensive prospect. Pop. 825. It has the remains of old walls, a fine church, an hospital, and two oil-mills. In the vicinity are quarries of marble, and a mineral spring.

TRIKALA. See TRICALA.

TRIKERA, a small island of the Archipelago, near the E coast of the Morea, 3 m. SE of Bear cape, and between the islands of Spezzia and Hydra.

TRIKERI, a peninsula, mountain, and town of Turkey in Europe, in the SE part of the sanj. of Tricala. The peninsula extends between the channel of the same name on the S, and the gulf of Volo on the N. The town is at the SW extremity of the peninsula, on a mountain which terminates the Pelion chain, at the entrance to the gulf of Volo, and near Cape Trikeri, 19 m. S of Zagora, and 32 m. ENE of Zeitun. Pop., chiefly Greek, 6,000. The harbour is one of the most frequented on the coast, affords good anchorage, and has several building-docks. About 5 m. ENE of the town is Mount Trikeri.—The channel of T., which washes on the S the island of Negropont, is 24 m. in length from E to W, and 8 m. in average breadth. Its W extremity divides into two parts, the more northerly opening into the gulf of Volo and Port Fetio, the southern into the gulf of Zeitun and the channel of Negropont.

TRIKERI, or ΚΙΚΥΝΘΙΟΣ, an island of Turkey in Europe, in the sanj. of Trikala, in the S part of the gulf of Volo, and near the N coast of the peninsula of Trikeri, from which it is separated by a channel only $\frac{3}{4}$ of a mile in width, in N lat. $39^{\circ} 9' 42''$, and E long. $23^{\circ} 5' 59''$. It is 2 m. in length from NE to SW, and 1 m. in breadth.

TRILBARDON, a village of France, in the dep. of the Seine-et-Marne, cant. and 5 m. E of Claye, pleasantly situated on the r. bank of the Marne, which is here crossed by a ferry, and near the canal d'Oureq. Pop. 450. It has a fine castle. Sheep, of the merino breed, are reared in the environs.

TRILLICK, a village in the p. of Kilskeery, co. Tyrone, 4 m. S of Dromore. Pop. in 1841, 434.

TRILLO, a village of Spain, in the prov. of Guadaluara, on the Tagus, 60 m. ENE of Madrid. Pop. 700. It was once remarkable for the number and construction of its water-mills for sawing timber brought down by the stream. It is celebrated for its medicinal waters.

TRIM, a parish and town in co. Meath. Area of p. 13,426 acres. Pop. in 1831, 5,926; in 1841, 6,314. The town of T., the county-town of Meath, and formerly a parl. borough, stands upon the river Boyne, on the road from Dublin to Enniskillen, 5 m. NNW of Summerhill. The town is very irregular, both in the alignment of its streets and the plan of its buildings, yet contains many good houses. Its castle, though partially dilapidated and destroyed, is still very extensive; and in consequence of the elevation of its site, and the grandeur of its outline, it forms a very imposing object. Pop. in 1841, 2,269.

TRIMBUOK, a fortress of Hindostan, in the prov. of Aurungabad, near the source of the river Godavery, in N lat. $20^{\circ} 1'$.

TRIMDON, a parish in the co. and 8 m. SE of Durham. Area 2,280 acres. Pop. in 1851, 1,598.

TRIMMINGHAM, a parish of Norfolk, 5 m. SE by E of Cromer. Area 680 acres. Pop. in 1851, 243.

TRIMION, a town of Hindostan, in the Carnatic, in N lat. $10^{\circ} 11'$.

TRIMLEY (St. MARTINS), a parish of Suffolk, $8\frac{1}{2}$ m. SE by E of Ipswich. Area 2,388 acres. Pop. 574.

TRIMLEY (St. MARY), a parish adjoining the foregoing. Area 2,208 acres. Pop. in 1851, 804.

TRINCOMALEE, a town, fortress, and harbour of Ceylon, situated on the NE side of the island, in N lat. $8^{\circ} 33'$, E long. $81^{\circ} 14'$. The town is of greater extent than Colombo, but contains fewer houses and less pop. The fortifications are strong, and command the principal bays, particularly the entrance to the harbour. The few native residences which compose the pettah or town, are situated on a narrow neck of land or isthmus separating what is called the inner from two outer harbours. These harbours are defended by two strong forts, called Fort-Frederick and Fort-Ostenburg, where the white troops composing the garrison are quartered. Fort-Frederick, more commonly designated Trincomalee, is the larger and more important of the two, and occupies a rocky promontory, which on the land side, rises gradually to the height of 800 ft. from the extremity of the narrow isthmus before described, and terminates in abrupt cliffs towards the sea, by which it is nearly surrounded. That portion of the isthmus nearest the fort is well cleared, covered with grass, and forms an exercising ground for the troops; beyond it is a small plain partly occupied by the houses and gardens of the pettah, but in every other direction, as far as the eye can reach, the whole country is covered with dense jungle or forest trees. The rock on which Fort-Frederick stands is composed of granite or quartz, in many parts naked, but in others slightly covered with red sand or gravel, so that the rain is either quickly absorbed, or carried off to the sea. Fort-Ostenburg, which is about 2 m. from Fort-Frederick, stands on an elevated peninsula or promontory, at the extremity of a range of hills which bounds the plain on the S. This peninsula forms the E side of the inner harbour, within which lie several small islands covered with dense vegetation. The ground on the W, and also to the S of the harbour, is flat, and for the most part overspread with jungle. There is little cultivation of any kind in the vicinity, and a salt-water lake covers a considerable portion of the surface to the westward. The soil around T. is chiefly composed of disintegrated granite and quartz, with a portion of vegetable mould; but in the low grounds the surface is in many parts covered with a thin layer of sand, under which deep beds of clay are frequently met with. About 5 m. to the S of the forts is the embouchure of the main channel of the Mahawella-Ganga, as well as of several small branches which diverge from it, and intersect the district with tortuous windings. As the country is level, these are generally sluggish in their course, and their embouchures surrounded by much swampy and muddy soil covered with rank vegetation.—The climate of T. differs materially from that of the S or W coast of Ceylon. The SW monsoon, which at Colombo is characterized by extreme moisture, is here experienced as a hot dry land wind, during the continuance of which, from April to September, there are only a few slight showers, and the therm. in the shade is sometimes as high as 95° ; while the NE monsoon, so partial on the W coast,

frequently prevails from October to March, with heavy rains, or occasional showers, and a range of therm. varying from 76° to 84° . Owing to their situation, the forts are much exposed to sudden gusts of wind, from which all the barracks cannot be adequately protected. The reflection of the sun's rays, too, from the buildings and rocky surface of the promontory, sometimes causes an intense heat and glare during the day, which is succeeded by chill damp winds at night.—The harbour is of great consequence; for when the violent monsoons or stormy weather sets in, all vessels on the coast of Coromandel are obliged to put to sea; but in two days ships can reach this harbour from Madras, enter it with ease, and remain in perfect security. Within the bay, the shores are so bold, and the water so deep, that vessels may moor alongside; but unfortunately the tides do not rise sufficiently high to admit of wet docks, and men-of-war are obliged to take out all their guns in order to careen. The expectations that were formed of this place by the British government have not been realized; yet, despite its capacious, sheltered, and safe anchorage, its advantageous and commanding position, overlooking as it were the whole bay of Bengal, and the healthiness of the town and neighbourhood, its capabilities have been neglected. Its situation is such that every vessel sailing to Madras, Calcutta, and all the intermediate ports, might readily find shelter; and as the straits of Malacca lie on the opposite side of the bay, a brisk and advantageous trade might be carried on with the Eastern archipelago, Siam, China, and the Austrian colonies. All down the Coromandel coast there is not a safe harbour; and Madras, as is well known, has but an open roadstead. No delay would occur, as at Colombo, in the shipment of Ceylon produce; and as the country between it and within 20 m. of Kandy is for the most part flat, good roads could be made with great facility, and even a railway would be very feasible.—The first Europeans who possessed themselves of this place were the Portuguese. It was taken from them by the Dutch, with whom it remained till 1782, when it was captured by the British; but a very inadequate garrison having been left to defend it, it was taken by the French under Admiral Suffrein, who restored it to the Dutch. In 1795, it was again taken by the British, after a siege of three weeks; and has ever since remained in their possession.

TRINDELEN, a rock in the Skagerack, almost equally distant from the coasts of Jutland and Norway, 7 m. NNE of the island of Lessee.

TRINESIA, or **TRINASSA**, a town of Greece, in the Morea, at the bottom of the gulf of Kolokythia, 8 m. SW of Barduma. Near it are the ruins of *Gythium*.

TRING, a parish and market-town of Herts, on the borders of Buckinghamshire, 30 m. NW by W of London. The town is neat, and contains several handsome houses. The church is a venerable Gothic structure, with a square tower. At Little Tring, a neighbouring village, rises one of the heads or branches of the Thames, which, leaving the county at Puttenham, runs by Aylesbury to Thame. T. was anciently a considerable town. Area of p. 7,390 acres. Pop. in 1831, 3,488; in 1851, 4,746.

TRINGANU, a state on the E coast of the peninsula of Malacca, between the parallels of $4^{\circ} 35'$ and 6° , between the rajahship of Calantan on the NW, and Pahang on the SE. Its cultivated surface is generally low. Its chief productions are tea, pepper, and gambier. The pop. which is almost purely Malay, has been estimated at 30,000, who are chiefly collected in a town which gives name to the state, situated in N lat. $5^{\circ} 25'$.

TRINIDAD, an island of the Atlantic ocean, lying between the 10th and 11th parallels of S lat. and the 61st and 62d meridians of W long., opposite the coast of Venezuela, from which it is separated by the gulf of Paria on the W. It is the most southern island of the British W. Indies; and at its SW and NW extremities, it approaches, in the straits called the Bocas, to within 7 and 18 m. of the American continent. Its general outline is that of an irregular square, having two elongated points stretching to the W from its N and S angles. Its longest lines of dimension are from Cape-Galere on the NE, to Point-Ycaque or Icaque on the SW, 79 m., and from Cape-Galeota on the SE to Cape-Blanca on the N, 56 m. Its square area is nearly 2,012 sq. m. The N side of the island presents a continued ridge of mountains, rising to an alt. of 3,000 ft., which end at Toco or Point-Galere, and probably in some remote age formed a continuation of the Parian mountains, before the great convulsion, which insulated Trinidad, and forced the passages of the Bocas. From the ridges or summits of these hills, numerous streams issue on both sides, and on the S side contribute to form the Caroni, a river which can be navigated by flats and canoes a distance of 6 leagues into the interior of the island. The S side is also bordered by a ridge of mountains of inferior height. Another ridge of hills, commencing at L'Ebranche, on the E side, and running WSW, is called the Monserrat hills. The streams which descend from this ridge are distinguished by a yellow clayish colour. The N, E, and S coasts are nearly destitute of harbours; but several good ports present themselves in the gulf of Paria, on the W side of the island. The greater part of the interior is still unexplored.

Climate.] The climate is less moist than that of Guayana, and not so dry as that of Cumana. The winter or rainy season begins here in June, and ends in October, as in all the islands of the Caribbean sea; but there is little rain. With November begins the spring, during which E and NE winds blow from the cold regions of North America. During this season the temp. in the daytime is usually 80° ; during the night it falls to 60° , and sometimes even to 50° in elevated spots. The average annual fall of rain is about 65 in. Fevers and dysenteries are the prevailing diseases. T. is happily situated out of the parallel of hurricanes, which have never as yet shifted so far to the S; although, on the 12th of August, 1810, a violent indication happened. Shocks of earthquakes have been felt, but slight, and not of such consequence as to cause alarm.

Productions.] Trinidad is the largest, most fertile, and most beautiful of all the Leeward islands: yet not above a thirtieth part of the surface is under cultivation. The forests are extensive, and abound in the finest timber of large dimensions and fit for ship-building. The red cedar is the prevailing tree, and every variety of the palm class, from the imperial cabbage-tree to the *coccat*, the leaves of which furnish covering for the roofs of houses, and will last for a length of time in such use, though exceedingly light. T. is capable of producing every article for the West India market that is under cultivation in any other of the Windward islands. Its sugar is excellent, and there is here more land of a deep, stiff, tenacious quality applicable for its culture than in Jamaica itself. Cocoa is a principal staple. The greater part of the island is excellently adapted for this tree; and Nature has here furnished a tree, called the *Bois immortelle*, or, by the Spaniards, *La madre del cacao*, which, planted at equal distances amongst the cocoa, in the driest weather collects

the dews, moistens, shades, and nourishes the cocoa tree. In 1838, 21,710 acres were under sugar; 6,910 under cocoa; and 1,095 under coffee. Among the other articles of agricultural produce are rice, maize, arrow-root, and assava. The coffee also is excellent in its quality; and the indigo is equal to that of the Guatemala plant. The grape vines which have been brought from the S of France, or from Spain, are said to equal in flavour their parent-stocks, and all other fruits, or vegetables, congenial to the tropics, and even some European ones grow luxuriantly here.—In many quarters of the island limestone, resembling in some degree marble, abounds. Bricks and articles of pottery are made, clay of a superior quality having been found. On the extensive savannah, immense herds of cattle, horses, and mules, are reared. The woods abound with game of different sorts, and opossums, armadillos, peccaries, bears, and monkeys. The pitch or asphalt lake, called Brea, is a singular natural phenomenon on this island. See article BREA. The gulf and coasts of the island abound with fish of various kinds. Oysters are abundant, particularly the class called mangroves, which fasten and breed on the branches of trees so named. The quantity of produce shipped from T. in 1849 was as follows:—28,080 hogsheads, 2,374 tierces, and 6,429 barrels of sugar; 12,952 puncheons and 229 tierces molasses; 718 puncheons rum, 4,728,186 lbs. cocoa, 28,405 lbs. coffee, 279 bales and 275 serons cotton, and 7 serons indigo. The exports from 1845 to 1849 were as follows:

	To Great Britain.	Total.
1845	£408,219	£430,144
1846	474,859	497,317
1847	488,378	512,288
1848	244,906	206,369
1849	361,984	388,270

Government and Population. This island is governed by a lieutenant-governor, assisted by an executive and a legislative committee of 12 members.—The laws are partly Spanish, partly English.—The public revenue in 1841 was £104,300. The pop. of T. in 1842 was 60,319; in 1852, 68,600; viz., 35,631 males, and 32,969 females. This total of 68,600 was made up of the pop. of the 8 counties into which T. is divided, in the following proportions:—

County of St. George.	38,630
Victoria.	15,940
Caroni.	7,107
St. Patrick.	4,574
Mayaro (Ward of Mayaro).	985
St. David (Wards Toco and Toururo).	913
St. Andrew (Ward of Manzanilla).	257
Nariva (Ward of Nariva).	194
	68,600

As regards the proportions of pop. in town and country, Port-of-Spain had in 1852, 17,563; and San-Fernando, 2,677; making in these two towns a total pop. of 20,440 souls,—an excess of urban to rural pop., in a colony which is entirely an agricultural one, and without manufactures of any description beyond that of baskets, sieves, carved calabashes, and coarse pottery. The total number of the native pop. of the colony in 1852 was 29,913; of Africans 8,000; the remainder are natives of every clime and country under the sun. The chief religious denominations were in 1852 returned at 48,605 Roman Catholics; 16,246 Episcopalians; 2,694 Gentoos; 2,506 Wesleyans, 1,017 Presbyterians; and 1,016 Mahomedans. As regards education, 8,710 persons were returned in 1852 as able to 'read and write,' and 5,019 who could 'read only.'

History. T. was discovered by Columbus on the 31st July 1498. It was not, however, taken possession of by the Spaniards

until 1888. Their establishment on it was preceded by the almost total destruction of the Indian pop. Sir Walter Raleigh, who visited T. in 1595, says that the inhabitants then cultivated excellent tobacco and the sugar-cane. In 1783 an edict was issued, permitting all foreigners professing the Roman Catholic religion to establish themselves in this colony; protecting at the same time, for a period of five years, those new inhabitants from all debts contracted in the countries they had quitted. In consequence of this policy, crowds of colonists crowded to it from Europe, and from the British and French possessions, bringing with them their industry and capitals; and pop. increased so rapidly, that, though in 1783 the whole amounted only to 2,763, it was estimated six years afterwards at 18,918. In 1797 the island capitulated to a British force under the command of Sir Ralph Abercrombie. From this period till the peace of Amiens in 1802, the pop. increased from 18,918 to 24,239; the produce of sugar also greatly increased, being almost doubled. The emigration which took place from St. Domingo and the British colonies, after the peace of Amiens, increased its pop. in 1807 to 31,000, of whom 21,000 were slaves. T. has since this period remained in the hands of the British.

TRINIDAD, a river of Texas, which flows into Galveston bay, after a prevailing SSE course of 300 m.—Also a river of New Granada, in the dep. of Ystmo, which joins the Chagres, 25 m. above its mouth.—Also a town of Costa-Rica, on the river Belen, 3 leagues distant from the sea, and 82 m. ESE of Guatemala.—Also a missionary settlement in Paraguay, on the W bank of Parana, in S lat. 27° 7'.

TRINIDADE, a village of Brazil, in the prov. and 80 m. NE of Rio-de-Janeiro.

TRINITA, a town of Naples, in the prov. of Naples, 4 m. from Sorrento. Pop. 1,250.—Also a town of Piedmont, in the prov. and 12 m. NW of Mondovì. Pop. 2,500.

TRINITA-VITITEREO, a village of the Sardinian states, 5 m. NE of Nice, on the Pagliona.

TRINITE (LA), a port of the island of Martinique, 16 m. NE of Port-Royal, in N lat. 14° 53'. The harbour is formed on the SE side by Point-Caravelle; and on the other by a high hill about 350 or 400 paces in length, which is joined to the mainland by an isthmus not above 200 ft. broad. The town is a thriving place, being the residence of several merchants, and exporting sugar and rum in large quantities. It has, however, been repeatedly devastated by hurricanes.

TRINITY BAY, a large bay on the E coast of Newfoundland, in N lat. 48°, on the N coast of the peninsula of Avalon.—Also a large but not deep bay, on the NE coast of Australia, between Cape Grafton and Cape Tribulation, in S lat. 16° 30'.

TRINITY (CAPE), a low point on the S coast of the islands of Kodiak, in the N. Pacific, in N lat. 56° 45'.

TRINITY-GASK, a parish in Strathearn, Perthshire. It lies on both sides of the Earn, but chiefly on the N. Pop. in 1831, 620; in 1851, 597.

TRINITY INLET, a bay of the N. Pacific, on the W coast of N. America, 30 m. S of Queen Charlotte's sound.

TRINITY ISLAND, an island in the N. Pacific, discovered by Cook. Vancouver, who passed this coast in 1794, says it appeared to be divided into two islands, with several others of inferior size lying to the N, about Cape Trinity. The E point of the easternmost is, according to his observation, situated in N lat. 56° 33'.

TRINITY ISLAND, an islet in Lough Key, co. Roscommon. An abbey on this islet was founded in 1215, and consumed by an accidental fire in 1466.

TRINO, a town of Sardinia, capital of a mandamento in the div. of Navaro, prov. and 13 m. SW of Vercelle, in a fertile plain near the l. bank of the Po. Pop. 5,500. It is well-built, and is divided into two unequal parts by a spacious street bordered with arcades. It has a communal college. The trade, which is considerable, consists chiefly in cat-

tle and in hams. This town was taken in 1704 by the French under Turenne.

TRINOMALEE, a town and fortress of Hindostan, in the presidency of Madras, in the Carnatic, in N lat. $12^{\circ} 11'$, on a mountain, 52 m. NW of Pondicherry. It is noted for a pagoda situated at the base of a craggy mountain, the summit of which is crowned by a small chapel, held also in great veneration by the Hindus. Upwards of 200 Brahmins are constantly employed in the service of the pagoda. This town was the scene of numerous conflicts during the wars of the last century, and the combined forces of the Nizam and of Hyder-Ali were here successfully resisted by the English.

TRIOGE, a rivulet of Queen's co., which rises on the N side of Cullenagh mountain, and pursues a N course of about 12 m. to the river Barrow.

TRIONTO, a headland of Naples, in the prov. of Calabria-Citra, district and 7 m. ENE of Rossano, on the S coast of the gulf of Tarento, between the two embouchures of a river of the same name.—The river or torrent of T. descends from the E side of the Apennines, in the cant. and 5 m. W of Longobuca; runs first E, past that town, then N; and after a course of about 24 m., throws itself by two arms into the gulf of Tarento. On its banks are mines of argentiferous lead.

TRIORA, a village of Sardinia, in the div. of Nice, prov. and 13 m. N of S. Remo, in the midst of the Apennines, on a mountain near the l. bank of the Taggia.

TRIPALDA. See **ATRIPALDA**.

TRIPARNI, a town of Naples, in the prov. of Calabria-Ultra, district and 3 m. WNW of Monteleone, in a fertile plain. Pop. 455. It suffered severely from an earthquake in 1783.

TRIPASSUR, a town of Hindostan, in the presidency and 33 m. WNW of Madras, in the Carnatic. It was taken in 1780 by Hyder-Ali.

TRIPATUR, a town of Hindostan, in the presidency of Madras, in the prov. and district of Barramahé, and 24 m. NE of Caverypatam. It lies in the midst of plantations of fruit trees, and is well-peopled. In the vicinity is an extensive reservoir.—Also a town of the Carnatic, in the district of Tanjore, 48 m. S of Trichinopoly.—Also a town in the district of Chingleput, 84 m. NW of Madras. It is noted for its temple.

TRIPERGOLA, formerly a village of Naples, in the prov. of Naples, district and cant. of Pozzuoli. It was destroyed by an eruption in 1538, and its site is now covered by a hill consisting of lava and bitumen, and bearing the name of Montenuovo.

TRIPETTY, a town of Hindostan, in the presidency and 84 m. NW of Madras, in the Carnatic. It contains a Hindu temple,—the most celebrated S of the Krishna, and enclosing an image of one of the numerous incarnations of Vishnu.

TRIPHON (SAINT), a village of Switzerland, in the cant. of Vaud, district and $1\frac{1}{2}$ m. SSW of Aigle, near the r. bank of the Rhone. It has a quarry of marble and some Roman antiquities.

TRIPOLE, a town of Russia in Europe, in the gov. and district and 32 m. SSE of Kiev, on the r. bank of the Dnieper.

TRIPOLI, a country of Northern Africa, the most easterly of the Barbary states, and politically a pashalik of the Turkish empire. As comprising Barca and Fezzan, it has a line of coast extending from Cape Rasatina to Port-Bomba, a distance of nearly 800 m. Its extent inland is very irregular, owing to the frequent interruption of the Desert. Tripoli Proper lies between the parallels of 28° and $33^{\circ} 30' N$, and the meridians of 10° and $20^{\circ} E$; and is bounded on the E by the desert of Barca; by Fez-

zan on the S; and on the W by Tunis and the Country of dates. This region, as a distinct district or province of the Western empire, appears to have acquired the name of *Tripolis*, from its containing the three cities of *Leptis*, *Oea*, and *Sabrat*, probably about the middle of the 1st cent. Similar appellations were given to districts of country by the ancients: thus we have *Pentapolis* applied to Cyrenaica, and *Decapolis*, a district of Palestine. This portion of Barbary is generally considered as politically comprehending not only Tripoli Proper, but the country or desert of Barca, the kingdom of Fezzan, and the oasis of Ghadames; but the bey's authority in these regions is so weak that they might almost be regarded as independent states. The gulf of Sidra, or the Greater Syrtis, occupies the eastern extremity of the coast-line of T.; that of Gabes, or the Smaller Syrtis, forms the western. The effect of the Greater Syrtis, from Mesurata, is that of a dreary moor,—a wide tract of level waste land,—without any thing to distinguish one part of it from another, but the windings of a marsh, which threads its dark surface, and is lost in different parts of the unbroken horizon. It extends in length, from Mesurata to Saleb, little less than 40 m., and in breadth from 9 to 15 m. At Saleb, its southern limit, some tolerable pasturage occurs, but the marsh, soon after passing this place, expands again and extends southward along the coast as far as Giraff, thus occupying altogether a space of 101 m. The whole of the country between Mesurata and Alexandria is described by Leo Africanus under the title of Barca. The appellation Barca is founded on the existence of this country as the independent kingdom of *Cyrene* governed by a branch of the Ptolemies. The mountains of Gerdobah intersect the southern part of this district. The western parts are the most fertile; the interior is an expanse of sandy desert. Couriers travel from T. to Cairo, across this country, in 25 or 30 days. Along the whole coast, and in many parts of the interior, are found fine specimens of classic architecture,—splendid but melancholy monuments of a civilization, a prosperity, and a glory that have completely passed away. Among the towns on the coast are Bengasi, Cyrene, Teuchera, Barca, and Bonandria,—the five cities which conferred on this district in ancient times the name of *Libya Pentapolis*.—We have sketched the geographical features of that portion of the district of Barca which extends from Alexandria to the gulf of Bomba, in our account of Lower Egypt.—The oasis of Anjela or Audjelah, the *Aufila* of Herodotus, is situated in the route from the oasis of Siwah to Fezzan. Its inhabitants cultivate the soil, and escort the caravans which pass through their territory. The Gerdobah chain, which separates the desert of Barca from that of Libya, terminates at this oasis.—Fezzan, the ancient *Phazania*, *Garamantes*, or *Gomphantes*, is bounded by Tripoli Proper on the N; by the desert of Barca on the E; and by the great desert of Sahara on the W and S. The greatest length of the cultivated country from N to S is about 255 m.; and its greatest breadth from E to W, 200 m. But the mountainous eastern region of *Harudjah* is comprehended in its territory. In the N this country is intersected by three chains of mountains.

Climate and Productions.] The coast-line of this pashalik is indented by the great gulf of Sidra, but presents few bays or headlands. At a distance of from 12 to 20 m. from the coast, the range of the Gharian mountains extends from W to E in a direction nearly parallel to the coast, and with a breadth of from 8 to 12 m. Further inland, the Suara range runs parallel to the Gharian range; and between

them lies an elevated fertile plateau. The soil along the coast is, for a few miles inland, of exuberant fertility, producing every article peculiar to tropical climates in the utmost luxuriance, and the greater part of European vegetables. Indian wheat grows here from 5 to 6 ft. high, and barley yields twice as much as it does in Europe. But for the policy of the government, grain might be exported from T. to a large amount. The export of horses and mules is also prohibited; but the breed of both is cultivated with great care. Bullocks, sheep, and poultry are reared in immense quantities, and, owing to the small quantity of animal food consumed by the natives, afford an ample article of exportation. The fruits of T. generally possess an exquisite flavour. In the interior, which is sandy and barren, dates—which are here of a quality superior to any other to be found in Barbary—form the staple. They are of a yellow, brown, green, black, and red colour. The latter are termed horse-dates, and are given as food to that animal. The date-tree here attains a height of nearly 100 ft., and bears clusters weighing from 20 to 30 pounds. Here also is found the *lotus*, celebrated in antiquity as the food of the *Lotophagi*, a race of savages. The lotus-tree is lofty and umbelliferous. The fruit is contained in a pod not unlike that of a tamarind; and when ripe, it is sweet and nutritious, tasting somewhat like gingerbread. An important article of popular diet is formed of the nutritious flour of the *cassob*, a plant unknown in Europe. It rises in the form of a reed, with a spike on the top containing the seed, which is small and of a lead colour. Cotton has been cultivated successfully, and the mulberry and castor-tree.—Gold-dust is found in the sand on the sea-shore; and veins of this precious metal occur inland as we approach to Fezzan.

Trade and Commerce.] The trade of T. is very considerable, though that with Europe is confined chiefly to Malta and the Levant. The exports are: wool of excellent quality, senna and other drugs, madder-root, barilla, hides, goat and sheep-skins dressed, salt, natron, ostrich-feathers, gold-dust, ivory, gum, dried fruit, lotus-berries, cassob, saffron, bullocks, sheep, and poultry. The imports are: cloths of every quality and colour, Manchester stuffs, sugar, tea, coffee, spices, spirits, wines, gold and silver-tissues, lace and threads, cochineal, indigo, iron, hardware of all kinds, muskets, pistols, sword-blades, &c. with naval stores of every description. The annual caravan from Morocco to Mecca, combining commercial with religious purposes, passes through the city of T.; and caravans from the interior generally arrive twice a year with slaves, gold-dust, &c. which are exchanged for coarse European cloths, silks, baraccas or cloaks of the country, powder, muskets, hardware, glass-bells, toys, looking-glasses, &c. It is this latter branch of commerce with Central Africa, conducted by means of caravans from Fezzan and Ghadames, which forms the foundation of Tripolitan commerce. Murzuk, the capital of the dependent state of Fezzan, is the great depot of merchandise from the interior. In the months of December and January, caravans from Vadal, Bornu, Cadeia, Soccatu, Hanassa, and Timbuctu, arrive at Murzuk, where they exchange their commodities for Genoese paper, real and false corals, imitation pearls, printed cottons, silk stuffs, small mirrors, pistols, fire-arms, needles, razors, turbans, amber, porcelain vases, coffee-cups, copper vessels, caftans, embroidered muslins, white handkerchiefs, striped cotton or white calico cloth, fine white calicoes which are highly prized at Bornu and throughout Nigritia, essence of roses, and spices. The merchandise which the caravans bring to Murzuk from the central countries of Africa chiefly consists of slaves, gold-dust, trona, senna, ostrich-feathers, red alum, and ivory. The total number of slaves thus annually sold was estimated by M. Graeber, the Swedish consul-general at Tripoli—to whose notice of Tripolitan commerce published in the *Antologia* of September 1837, we are indebted for these details—at 2,500. The quantity of gold-dust, exclusive of the tribute, amounts to 10,000 *metralls*, or about 1,500 ounces, of which about one-third is used in T. for the purpose of money, and as ornaments for females; and the rest is exported to the Levant and Europe. Trona, a kind of natural mineral alkali, used in the manufacture of glass and the dyeing of linen, and for several domestic purposes, is annually brought to Tripoli to the amount of 7,000 cantaros. The senna of Fezzan is esteemed next in quality to that from Sidon in Syria; about 8,000 cantaros of this article are annually brought to T. The ostrich-plumes annually imported into T. are valued at from 15,000 to 18,000 piastres. They are usually sold by the skin;

that of a male is reckoned worth double that of a female-ostrich. They pay a duty of 10 per cent. on their estimated value to the government. About 4,000 cantaros of alum are annually consumed in T. The quantity of ivory annually brought to Tripoli seldom exceeds 15 or 20 cantaros. All this merchandise is conveyed to T. on camels, each of which carries from 4 to 5 cantaros weight, and is valued at from 35 to 45 piastres. These animals, especially the m'herri or dromedary, are admirably fitted for the long journeys thus performed. As so much time is necessarily spent on these mercantile expeditions, a great deal is intrusted to the good faith of correspondents and agents, who are seldom found to betray the trust reposed in them. The town of Aujelah, in the oasis of that name, has long conducted a brisk trade of transit with Fezzan, especially since 1814, when, after many unsuccessful attempts to traverse the Libyan desert, a direct communication was opened with Borgu, Vadal, and Baghermi, without passing through Fezzan. The negligence of the government allows the profits of this commercial intercourse to flow into the pockets of the speculators in Grand Cairo; while the same supine indifference or extreme ignorance, has permitted a new commercial route by the way of Gorbil to be opened between Tunis and Murzuk. Although the Fezzan and Ghadames caravans are the most important in respect of commercial wealth, the most considerable in point of numbers are those which pass through this country, from Morocco and Western Barbary to Mecca. These latter caravans are chiefly composed of such persons as are performing that pilgrimage to Mecca, which all true Mahomedans are enjoined to make, at least, once in their lifetime; but mercantile speculations are conjoined by many with their religious motives. The numbers composing these caravans have greatly diminished of late years, as the greater part of the pilgrims from Western Barbary now embark in Christian vessels for the port of Alexandria, and the pasha of T. allows only a few of his own subjects to make this pilgrimage. M. Graeber says, that the only caravan of this kind which he witnessed during four years' residence in T. was one in 1824, which consisted of about 3,000 men, a few hundreds of women and children, and 2,000 camels. It had set out from the city of Fes in Morocco; and journeying by Telonsan, and along the coasts of Algiers and Tunis, had arrived with considerably diminished numbers at T. It was commanded by an Emir-al-hoggias, a native of Kairwan in Tunis. Having rested about a month under the walls of T., the pilgrims resumed their route, part by sea, and the greater part at land; of the latter, one party travelled by way of Alexandria and Cairo, while another took the route of Aujelah, and were joined at that oasis by other pilgrims from Fezzan and the interior of Africa. These Mecca caravans carry with them gold dust, wax, ostrich plumes, silk and cotton *bwaccas* or halques, muslins, morocco leather, perfumes, *khof* a kind of eye-pingent, benna, *swak* a vermilion pigment, and a variety of medicinal drugs. On their arrival at Tripoli the pilgrims exchange a part of these articles of merchandise for European goods. On their return from the E. in about one year after, they bring Indian stuffs, pearls, Mecca balsam, musk, wood of aloes, incense, myrrh, civet, Cashmir shawls, precious stones, coffee, pistachios, naphtha, opium, and in general all the productions of Asia and Europe; but they are in general unwilling to open their packages at T., as their profits are much more considerable in their own countries.

Population.] The population of this state and its dependencies is estimated by Cortambert at 2,500,000; by Stein at only 1,350,000; by Colonel Warrington, in 1843, at 1,500,000. The rural pop. is chiefly Arab; the urban Moors. "There is probably no country on earth," says Mr. Blaquiere, "where the inhabitants are more inclined to be vicious; yet such is the promptitude with which justice is administered, that crimes bear but a small proportion to those of European countries. I have been unable to discover any of those good qualities that can be put in contrast with their well-known attributes of revenge, avarice, treachery, and deceit, which predominate alike in the prince and the peasant." Yet, in no part of Barbary, we are told, has civilization made so great progress; and in no place is so much respect paid to Christians, even their religious ceremonies being here treated with the utmost respect. Nay, Mr. Blaquiere adds, that their sensual passions "are infinitely better regulated than those of any other people on the coast of Barbary;" and upon the whole, it would seem, that T. presents by no means an unfavourable specimen either of the Moorish character or of the Barbary governments.—The pasha of T. is usually appointed by the Porte for four years. He is unfortunately left to raise his revenue by monopolies and taxes imposed at pleasure.

TRIPOLI, the capital, by the natives called TARABOLUS, to the ancients known as *Æa*, is built upon a neck of land projecting into the sea, in N lat. 32° 34', E long. 13° 11'. It is surrounded by a high wall flanked by six bastions, has a formidable line of batteries on the sea-front; and is considered impregnable to Moors and Arabs. It has a number of mosques, caravanseras and bazars. One of the latter is appropriated to the sale of woollens, Levant produce, and slaves from the interior. The police is extremely well-regulated; in point of cleanliness, T. unlike most other Moorish cities, might be a model for the best of those of Europe; acts of violence are never committed in the streets, though wine-houses are public, and intoxication by no means uncommon. The harbour is not very spacious, but is safe throughout the year, and admits frigates not drawing above 18 ft. of water. "Previously to entering the bay," says the author of *Tully's Memoirs*, "the country is rendered picturesque by various tints of beautiful verdure. No object whatever seems to interrupt the evenness of the soil, which is of a light colour, almost white, and interspersed with long avenues of trees; for such is the appearance of the numerous palms, planted in regular rows, and kept in the finest order. Their immense branches, coarse when near, are neat and distinct at a distance. The land lying low and very level, the naked stems of these trees are scarcely seen, and the plantations of dates seem to extend for many miles in luxuriant woods and groves. On a nearer view, they present a more straggling appearance, and afford neither shelter nor shade from the burning atmosphere which surrounds them. The whole town appears in a semicircle, some time before reaching the harbour's mouth. The extreme whiteness of the square, flat buildings, covered with lime, which in this climate encounters the sun's fiercest rays, is very striking. The baths form clusters of cupolas, very large, to the number of 8 or 10, crowded together in different parts of the town. The mosques have in general a small plantation of Indian figs and date-trees growing close to them, which, at a distance, appearing to be so many rich gardens, give the whole city, in the eyes of a European, an aspect truly novel and pleasing. On entering the harbour, the town begins to discover dilapidations from the destructive hand of time, large hills of rubbish appearing in various parts of it. The castle or royal palace in which the pasha resides, is at the E end, within the walls, with a dock-yard adjoining. This castle is very ancient, and is enclosed by a high strong wall: it has lost all symmetry on the inside, from the innumerable additions made to contain the different branches of the royal family; for there is scarcely an instance of any of the blood-royal, as far as the basha's great grandchildren, living without the castle-walls. These buildings have increased it by degrees, to a little irregular town." The town is smaller than either Algiers or Tunis. Its greatest length, Captain Beechey says, may be about 1,360 yds.; its extreme breadth about 1,000 yds. In 1805 the pop. was estimated by Ali Bey at about 15,000; in 1811 Mr. Blaquiere supposed it to amount to 25,000; in 1842, Colonel Warrington estimated it at 12,000 Turks and Moors, 1,500 Christians, and 2,000 Jews. This city has often been ravaged by the plague. The Arabic spoken here is said to be the purest known on the whole coast.

History. After the destruction of Carthage, T. became a Roman province; and as the Roman power declined in Africa, the boundary of civilized manners and cultivated land in this region was insensibly contracted. In the reign of Valentinian, the Getulians appeared at the gates of the Tripolitan cities; and the inhabitants unprotected by their venal prefect, were compelled

to join the rebellious standard of a Moor. In an evil hour Count Boniface invited the assistance of the Vandal king against his rebellious subjects. "On a sudden," says Gibbon, "the seven fruitful provinces, from Tangiers to Tripoli, were overwhelmed by the invasion of the Vandals." A series of desolating wars in the reign of Justinian completed the ruin of Roman Africa. Under the caliph Omar, the Mahomedans, crossing the desert of Barca, first invaded T. Omar's successor, Akbah, marched from Damascus at the head of 10,000 Arabs, traversed the wilderness in which his successors erected the splendid capitals of Fes and Morocco, and at length penetrated to the verge of the Atlantic and the Great Desert. On the dissolution of the caliphate, T. became an independent state. In the 16th cent. it fell into the hands of the emperor Charles V. who had landed in Africa as the ally of the Moorish king of Tania, and who gave it to the knights of Rhodes. The Turkish corsair, Dragut-Rais, expelled the knights from T. in 1551; and after the death of Dragut, the Porte continued to send governors to T., under the titles of sanjak and pasha, till 1713, when it was erected into an independent state by Hamet Pasha, a native of Caramania, who reduced to subjection the turbulent mountaineers of Garlan and Memsrata, and rendered Fezzan a tributary province. He also invited intelligent foreigners to settle under his sway, and greatly exerted himself to improve industry and manufactures. Yusuf Pasha, the late governor of T., who raised himself to that dignity by the murder of his brother, though he administered public affairs with no very gentle hand, seemed to have more liberal views than most of his predecessors. He studiously cultivated the alliance of Britain, and afforded facilities for exploring the interior of his dominions. Captain Beechey, who visited this country in 1822, says that this state was then secure under the protection of an established government; that property was respected and commerce improving; that its markets were well-supplied, its manufactures encouraged, and its population increasing.

TRIPOLI, or TARABOLUS, a pashalic of Syria, comprehending all the coast from Latakia S to the Nahr-el-Kelb, which separates it from the pash. of Acre. It is bounded on the E by the chain of Lebanon which separates it from the valley of Bealbec and the valley of the Orontes; on the N by Cape-Ziarat, which divides it from the district of Antakia; and on the W by the sea. By far the greater portion of this district is mountainous, the only plain being a narrow stripe of land stretching along the coast at the foot of the mountains. It is watered by numberless mountain-streams, but is less highly cultivated than the terraces of Lebanon. The chief productions are wheat, barley, cotton, and tobacco. A great part of Mount Lebanon is included in this pash., which is divided into 14 districts: viz. 1. Jebel-Beshirai, a considerable tract to the E of Tripoli, which contains 12 villages, of which Antura and Canobin are the chief. 2. El-Zawye, a small district in Lower Lebanon. 3. Batrun, a village with a small district on the coast. 4. El-Kura in the lower part of Lebanon divided from El-Zawye by the Nahr-Kadisha. 5. El-Fetuh to the E of Jebail, and bordering on the Kesrawan. 6. Akura, a small district with a village of the same name, the seat of a Maronite bishop. 7. El-Dennye, to the N and NW of Beshirai. 8. Jebail, a district on the coast belonging to the town of that name. 9. Jebel-el-Minitra, a Mutuali district. 10. El-Hermel, on the E declivity of Lebanon towards Bealbec. 11. El-Kataa, E of Batrun. 12. El-Kella. 13. El-Shara. 14. Tortosa, on the coast. To these may be added the mountainous territories of the Ansaries and Ismaelians, extending from the Nahr-el-Kebir to the N of Latakia. The Mutualis formerly possessed several districts in this pash., but they were expelled by Yusuf, emir of the Druses, and they in their turn seized the Bilad-Baalbec, and drove out the inhabitants. The pash. of Tripoli during the last century included all the line of coast from the Orontes southward to the Dog river, that is to say, not only from Suadia to the town of Tripoli, but also the Bilad-Jebel, Botrun, and Kesrawan. Circumscribed as this pash. is, it presents a motley pop. of Moslems, Mutualis, Christians, and Ansaries. The stronghold of the Moslems is the town of Tri-

poli itself and its environs. The Mutualis are principally located in the district of Botrun and Jebail. At the period of the Druse war they assumed the superiority over the Maronites. The Ansaries are now tranquil, and in reality tolerably independent. Before the depreciation of the currency, the rent paid by this pash. to the Porte was 750 purses, which, with the Spanish dollar at 5 piastres, made 75,000 dollars a-year; but out of this the pasha was, by ancient custom, obliged to defray the expenses of the Haji to Mecca. During the Egyptian occupation, the income was about 6,000,000 of piastres, which with the dollar of 22½ piastres made 270,000 dollars. The income of the pash. is now very nearly what it was in the time of the Egyptians, the increase in the customs having made up for the diminution of the ferdeh and the arrears of the miri.—Entering this pash. from the N, Latakia is the first place of consequence we encounter. The district formed part of the ancient *Casiotis*, so called from a range of hills extending N to the Orontes. The city, the ancient *Ladicea ad mare*, built by Seleucus Nicator, who named it in honour of his mother, stands on the NW side of Cape Ziarat, an elevated promontory which advances half-a-league into the sea. To the S of this is Jebilee, the ancient *Gabala*, now a place of no consequence. From Latakia to Tortosa, an almost continuous succession of ruins is encountered scattered along a vast rich plain at the foot of the Ansairi mountains.—Tartus or Tortosa, the ancient *Orthosia*, a place of great consequence during the crusades, has nothing remaining but its castle, which is large and still inhabited. S of this is the iale of *Bwad*, the *Aroad* of Scripture, and the *Ara-dus* of the Greeks.

TRIPOLI, or TIRENBOLI, the capital of this pashalik, is composed of three cities, a furlong distant from each other, but which have been gradually joined together by their respective suburbs. It is built on the declivity of the lowest hills of the Libanus, near the shore, in N lat. 34° 26', E long. 35° 46', about 3 m. to the W of the embouchure of a river which descends from Zogana. It is the neatest town in all Syria, the houses being well-built of stone, and neatly constructed. It is surrounded with luxuriant gardens, producing abundance of oranges and lemons, and extending over the whole triangular space between the town and the sea. The city is divided into two parts by the Wady-Kadesha, which enters the plain through a beautiful narrow valley, and after traversing the town falls into the sea on the N side of the triangle. On the S side, just where the Kadesha enters the town, is the citadel, which commands both the town and the whole plain below, but which is itself commanded by a height on the opposite side of the river, only 150 yds. distant. The vicinity of T. is the most favoured spot in all Syria, as the maritime plain and neighbouring mountains place every variety of clime within a short distance of the inhabitants, and the Wady-Kadesha is the most picturesque of valleys: yet the situation, however beautiful, is not healthy, and from July to September epidemic fevers prevail here, as at Scanderun and Cyprus. The town, moreover, being open only to the west, the air has little circulation, and a constant feeling of lassitude is experienced by strangers visiting it. The pop. is estimated at 16,000, one-third of whom are Greek Christians under a bishop. Of fifteen European commercial establishments that were formerly here, only one French house remains. In the palmy days of Syrian trade, when Aleppo had its seventy English houses, and was the greatest emporium in the East, T. had also its British consul and its British factory: not a single Englishman resides here

now. The principal export is long reel silk, for the Marseilles and Leghorn market; the average quantity exported is 45,000 oke, at £1 per oke. The staple manufacture used to be that of silk girdles, in which there were formerly above 1,000 looms engaged; now there are only 200. These girdles were exported in large quantities to Constantinople, but change of costume has reduced the demand. The leading manufacture at present is soap, and the largest building in the town is the Khan-el-Saboon, or Soap-khan. T. has 12 soap boilers, who manufacture on an average 3,300 cantars of this commodity, the most of which goes to Aleppo. The oil requisite is all procured from the olive-grounds to the east of the town. Candian soap, which contains very little alkali, is imported, but one-fourth of its weight of alkali being here added to it, it is resold to great advantage. Galls from the Ansairi mountains, yellow wax from Lebanon, and madder, form other articles of exportation.

TRIPOLITZA, TRIPOLITZA, or TRIPOLIS, a town of Greece, in the Morea, capital of the department of Arcadia, at the foot of Mount Mænalus, 22 m. SSW of Argos, and 30 m. NNW of the ruins of Sparta. It is said to have been built of the remains of three towns, *Tegea*, *Mantineæ*, and *Pallantium*, without, however, occupying the site of any of these places, which were at a considerable distance from each other. Its situation is bleak, the ground which it occupies is rugged and uneven, and the general plan of the town extremely irregular. Under Turkish regime, it was the capital of the Morea; yet the streets, with the exception of the principal one, were dirty, and paved only in the middle; and the houses reminded an English traveller of those of our poorest villages. The best buildings were the residence of the pasha, a wooden structure in the form of a square with walls and gates, and the khan, or place of accommodation for travellers. There were several mosques for the Turks, and also several churches for the Greeks. The population was computed at 12,000; it does not now exceed 2,600. The trade of the place is inconsiderable, the corn, wool, or other articles exported from it having a land carriage of 24 m., before reaching the port of Lerna in the vicinity of Argos. The fortifications of the place consisted of stone walls erected by the Albanians in the latter part of the 18th cent.; and of a small square fort built by them on an eminence to the SE. It has several schools, and a powder-mill. This town was sacked by the Greeks in 1821, and in 1825 by Mehemet Ali; and has not recovered from these disasters.

TRIPONTARY, a town of Hindostan, in the prov. and 9 m. E of Cochín.

TRIPPSTADT, a village of Bavaria, in the circle of the Pfalz, district and 19 m. ENE of Deux-Ponts, on a hill, in the midst of the Vosges.

TRIPTIS, a town of the grand-duchy of Saxe Weimar, circle and bail. and 5 m. E of Neustadt, on the Orla. Pop. 1,411. It has manufactories of hosiery, cloth, linen, and hats.

TRISOBBIO, a village of Sardinia, in the div. of Alessandria, prov. and 7 m. SE of Acqui, on a mountain. Pop. 1,050.

TRISSINO, a village of Austrian Lombardy, in the prov. of Vicenza, and district of Valdagno. Pop. 2,888.

TRISTAN D'ACUNHA, the largest and most fertile of a group of three islands in the S. Atlantic, situated between the cape of Good Hope and the coast of Brazil. It is a mass of rock 12 m. in circumf., and rising to 5,000 ft. above sea-level, in S lat. 37° 6', W long. 12° 2'. The aspect of the NE side of the island is very striking. At the foot

of an almost perpendicular mountain, thickly covered with brushwood, a fertile plain of considerable extent stretches along the shore. Wild boars, wild goats, and a species of black cock, abound on the island; while in the deep waters among the rocks are fish of almost every description. The cliffs are literally covered with sea-hens, petrels, albatrosses, and other feathered tribes. Captain Denham of her Majesty's ship *Herald*, obtained deep sea soundings about midway between this island and Cape Horn, of 7,706 faths. or 15,412 yards. This sounding was obtained in 8 lat. $86^{\circ} 49'$, W long. $37^{\circ} 6'$, on a calm day, Oct. 30, 1852. The sounding line was 1-10th of an inch in diam., laid into one length, and weighing, when dry, 1 lb. for every hundred faths. The plummet weighed 9 lbs., and was 12 inches long and 1-7 inch in diam. The velocity with which the line ran out was as follows:—

	Hr.	Min.	Sec.
The first 1,000 faths. in	0	27	15
1,000 to 2,000 "	0	39	40
2,000 to 3,000 "	0	48	10
3,000 to 4,000 "	1	13	39
4,000 to 5,000 "	1	27	06
5,000 to 6,000 "	1	45	25
6,000 to 7,000 "	1	49	15
7,000 to 7,706 "	1	14	15
	9	24	45

The whole time, therefore, taken by the plummet in descending to this amazing depth of 7,706 faths., or 7.7 geog. m. of 60 to a degree, was 9 hours 24 minutes and 45 seconds. The highest summits of the Himalaya are little more than 28,000 ft., or 4.7 geog. m. above the sea. The sea-bottom has therefore depths greatly exceeding the elevation of the highest pinnacle above its surface. The strength of the line, tried before the sounding, was found to be equal to bear 72 lbs. in air. The 7,706 fathoms which ran out weighed when dry 77 lbs. exclusive of the plummet. This sounding is the deepest that has ever been made.—The shores of the other islands are so wild and dangerous that it is impossible to approach them, except in the calmest weather: one is called Nightingale island, and the other Inaccessible.

TRISTE, an island of the state of Yucatan. Central America, in the SW part of the bay of Terminos, to the W of Port Royal, from which it is separated by only a narrow channel, in N lat. $18^{\circ} 20'$. It is about 18 m. in circumference, abounds with good water, and produces varieties of valuable wood. It is uninhabited.—Also a gulf of Venezuela, on the N coast, formed by the Caribbean sea, in N lat. $10^{\circ} 30'$ and W long. $68^{\circ} 10'$. It opens between Point Tucacas on the NNW, and Point Cabello on the SSW, and is enclosed by arid mountains. It contains 3 small islands.

TRISTE, MEGO, or ILLE-DU-REOIF, a small uninhabited island of the Indian ocean, near the SW coast of Sumatra, in N lat. 4° , E long. $100^{\circ} 59'$. It is surrounded by a coral reef, and in the centre is a lake. It abounds with cocoa palms, and has large numbers of rats and squirrels.

TRISTOMATO, or SKOMAKO, a port of Turkey in Asia, in the sanj. of Rhodes, at the N extremity of the island of Scarpanto. Its entrance, formed by Cape Bonandrea on the W, and the ancient promontory of *Ephialtium* on the E, is 6 m. in width, and is divided by the island of Scarpathon into two channels. The depth of the bay is about 4 m., and it encloses several considerable branches.

TRISTOMOS, a port of Turkey in Asia, in Anatolia, sanj. of Mentesh, and 21 m. S of Almalu, formed by the Mediterranean, with which it communicates by only a narrow passage, and opposite the island of Kakava. It is nearly 3 m. in length

from ESE to WSW, but is very narrow and opens to the S. The ancient *Andriace* was situated on its N shore.

TRITANI, a town of Naples, in the prov. of Calabria-Ultra, district and 18 m. NE of Palmi, on a hill, in a fertile locality. It suffered severely from an earthquake in 1783.

TRITH-SAINT-LEGER, a commune of France, in the dep. of the Nord, cant. and 4 m. SW of Valenciennes, on the l. bank of the Schelde. Pop. 1,661. It has extensive iron and copper works, manufactories of beet-root sugar, vinegar, &c.

TRITON'S ISLAND, a small island of the Paracels archipelago, in the China sea, in N lat. $15^{\circ} 48'$, E long. $111^{\circ} 12'$. It is nearly surrounded by reefs.

TRITTAU, a village of Denmark, in the duchy of Holstein, 20 m. ENE of Hamburg, on the r. bank of the Bille.

TRIUMFO-DE-LA-CRUZ, a headland, bay, and island of Honduras, Central America, to the E of the Sal. The bay affords good anchorage. On its banks are the ruins of a town of the same name.

TRIUMPHO, a town of Brazil, in the prov. of São-Pedro-do-Rio-Norte, on the l. bank of the Taguari, near the confluence of the Jacuhi. Pop. 3,462, of whom 1,766 are whites.

TRIVANDERAM, or TRIVANDAPATAM, a town of Hindostan, capital of the prov. of Travancore, on a small river, which 6 m. below falls into the Indian ocean, 1,135 m. SE of Cochin. It is the usual summer residence of the rajah, and has a spacious and substantial palace, built in European fashion, and a castle. The town is populous, and has a large garrison.

TRIVENTO, a town of Naples, in the prov. of Sannio, district and 16 m. NNW of Campobasso, on a height near the r. bank of the Trigno. Pop. 3,500. It is enclosed by walls, and has some fine edifices, amongst which are the episcopal palace and cathedral. It has besides four churches, two convents, and a seminary. This town, which is of great antiquity, was one of the most important belonging to the Samnites. It was the *Triventum* or *Treventum* of the Romans.

TRIVERO, a town of Sardinia, in the div. of Turin, prov. and 9 m. NE of Biella, at the foot of a mountain, on a small affluent of the Sessera. Pop. 8,800.

TRIVIEARY, a village of Hindostan, in the prov. of the Carnatic, on the l. bank of the Villenore or Ariancoppan river, 15 m. WNW of Pondicherry. It now consists of only a few scattered huts; but from the number and extent of its ruins it appears to have formerly been a place of considerable importance. Of these remains, the principal are a pagoda, and a tower over the gateway. The environs are noted for their petrifications.

TRIVIER-DE-COURTES, or TRIVIER-DE-COURTOUX (SAINT), a canton, commune, and town of France, in the dep. of the Ain and arrond. of Bourg-en-Busse. The cant. comprises 12 coms. Pop. in 1831, 11,679; in 1846, 12,272.—The town is 18 m. NNW of Bourg, in a pleasant and salubrious situation. Pop. 1,453. It is small, but tolerably well-built, and has a church, built it is said in the 6th cent. by St. Trivier, and an hospital. This town derives from a neighbouring village its surname, which distinguishes it from St. Trivier-en-Dombes, an adjacent village.

TRIVIER-EN-DOBES, or TRIVIER-SUR-MOIGNANS (SAINT), a canton, commune, and town of France, in the dep. of the Ain, and arrond. of Trevoux. The cant. comprises 19 coms. Pop. in 1831, 10,539; in 1841, 10,939. The town is 11 m. NNE of Trevoux, in a humid plain. Pop. 1,536.

TRIVIERES, a commune of Belgium, in the prov. of Hainault, arrond. and 10 m. E. of Mons. Pop. 450. In the vicinity is a coal mine.

TRIVIGNO, a village of Naples, in the prov. of Basilicata, district and 11 m. SE of Potenza, amid lofty mountains, near the r. bank of the Basento. Pop. 2,500. It has a church and four chapels.

TRIZAC, a village of France, in the dep. of the Cantal, cant. and 6 m. SW of Biom-les-Montagnes, on a mountain. Pop. 1,579.

TURNAWA. See **TURNAU**. See also **TYRNAU**.

TROAD, an ancient district of Asia Minor, now comprised in the sanj. of Bigha, in Anatolia. It contained the ancient city of Troy. See **MENDERES-SU**.

TROARN, a canton, commune, and town of France, in the dep. of Calvados and arrond. of Caen. The cant. comprises 32 coms. Pop. in 1831, 13,083; in 1846, 13,292. The town is 9 m. E of Caen, on the Dives. Pop. 892. It has a small hospital, and contains manufactories of lace, linen, sugar from beet-root, bricks, and tiles. The trade, which is considerable, consists chiefly in butter, cheese, cider, fish, and fowls.

TROBRIAND, a group of islands in the S. Pacific, in the Louisiade archipelago. Cape Denis, the N extremity of the group, is in S lat. 8° 24', E long. 151° 8'.

TROCCHIA, a village of Naples, in the prov. and district and 8 m. ENE of Naples, and cant. of Santa-Anastasia, at the NW base of Vesuvius. Pop. 740.

TROCHE, a village of France, in the dep. of the Correze, cant. and 4 m. W of Vigeois, near the r. bank of the Loire. Pop. 1,200.

TROCHTELFINGEN, a town of the principality of Hohenzollern-Sigmaringen, 18 m. N of Sigmaringen. Pop. 800.

TROEDYRAUR, a parish in Cardiganshire, 4 m. N by E of Newcastle-in-Emlyn. Area 4,666 acres. Pop. in 1831, 1,064; in 1851, 1,029.

TROENE, a river of France, in the dep. of the Oise, which has its source a little to the E of Ivry-le-Temple, in the cant. of Meru; flows through the marshes of Tourcey; passes Chaumont and Trie-le-Chateau; and after a course in a generally WNW direction of 17 m., joins the Epte on the l. bank, opposite Gisors.

TROENSES. See **THROUSE**.

TROFA, a town of Portugal, in the prov. of Beira, comarca and 11 m. ENE of Aveiro, on the l. bank of the Vouga.

TROGEN, a town of Switzerland, capital of the cant. of Appenzell-Aussen-Rhoden, 7 m. NE of Appenzell, on the Goldbach, at the foot of the Habris. Pop. 2,395. It is handsomely built,—the dwellings of the more opulent inhabitants being ornamented on the exterior with the most precious marbles,—has a handsome church, mineral baths, a public library, several schools, and an arsenal; and possesses manufactories of linen and cotton fabrics, and two printing presses.

TROGSTAD, or **TRYGSTAD**, a parish of Norway, in the dio. of Aggershuus and bail. of Smaalehnen, 30 m. SW of Christiania, near the SE bank of Lake Ojeren. Pop. 2,900.

TROHBERG, a mountain of Thuringerwald, in the duchy of Saxe-Coburg-Gotha, and principality of Gotha. Alt. above sea-level, 2,150 ft.

TROIANOVKA, a town of Russia in Europe, in the gov. of Volhynia, district and 28 m. ENE of Kovel.

TROIANOVO, a town of Russia in Europe, in the gov. of Volhynia, district and 12 m. SSW of Jitomir, near the r. bank of an affluent of the Teterov.

TROIS-FONTAINES, a village of France, in the

dep. of the Meurthe, cant. and 7 m. SSE of Sarrebourg, on the r. bank of the Bievre. Pop. 425. It has several saw-mills, and a quarry of free-stone.

TROIS-FONTAINES-LA-GRANGE, a village of France, in the dep. of the Marne, cant. and 11 m. ENE of Thieblemont, in a woody marshy valley on the Brussonelle. Pop. 200. It had a Cistercian abbey founded in 1200. Iron is wrought in the environs.

TROIS-FRERES, a group of islets, three in number, in the Indian ocean, in S lat. 6° 10', E long. 73° 88'. Pop. 50. It depends on the English government of the Mauritius. It abounds with cocoa palms, and the coasts with fish.

TROIS-ILETS (LES), a parish and village of Martinique, arrond. and 5 m. SE of Fort Royal, on the S coast of the Royal Cul-de-Sac. It has a church, but consists entirely of wooden houses inhabited by negroes.

TROIS-MOUTIERS (LES), a canton, commune, and town of France, in the dep. of the Vienne and arrond. of Loudun. The cant. comprises 14 coms. Pop. in 1831, 8,710; in 1846, 8,675. The town is 5 m. NW of Loudun. Pop. in 1846, 1,538. The parish, which derives its name from three small islands near the coast, has a good harbour, and at the S extremity, on the islet Aux-Ramiers, is a fort, erected for the defence of the entrance to the Royal Cul-de-Sac. The coasts abound with fish, but the locality, especially near the shore, is unhealthy. The soil, which is argillaceous and marshy, possesses little fertility, but produces in some parts coffee, and in small quantities, grain. Its principal productions are sugar and pottery. Pop. 1,690, of whom 66 are whites.

TROIS-POINTES (CAPE DES), a headland of Upper Guinea, on the Gold coast, in the kingdom of Ashantee, in N lat. 4° 40' 30", and W long. 2° 43' 47". It is so named from its conformation.

TROIS-RIVIERES. See **THREE RIVERS**.

TROIS-RIVIERES (LES), or **SAINT SAUVEUR**, a town of Guadeloupe, on the SE coast of the Cabes-Terre, and 8 m. ENE of the town of Basse-Terre, at the mouth of a small river of the same name which descends from the Terre-Neuve hills, and throws itself into the bay of St. Sauveur. It has a church. It suffered severely from a Negro revolt in 1802. The quarter of Trois-Rivieres is covered with rising grounds terminating abruptly on the coast, and crowned with plateaux, the soil of which is in many parts excellent. Its principal productions are sugar, coffee, cotton, cacao, and manioc. Pop. 2,978, of whom 291 are whites.—Also a river of Hayti, in the dep. of the Nord, which has its source 5 m. NW of Marmelade, and after a sinuous course, in a generally NW direction of about 54 m., throws itself into the Tortuga channel, a little to the W of Port-de-Paix.

TROIS-ROIS. See **THREE-KINGS**.

TROISSEREUX, a village of France, in the dep. of Oise, cant. and 5 m. WNW of Nivillers, near the l. bank of the Therain. Pop. 680.

TROISSY, a village of France, in the dep. of Marne, cant. and 4 m. E of Dormans. Pop. 950.

TROIS-VILLES, a village of France, in the dep. of Nord, cant. and 4 m. W of Chateau-Cambresis. Pop. 1,500. There are cotton-factories here.

TROITSK, a town of Asiatic Russia, in the gov. of Orenburg, 222 m. ESE of Oufa, on the l. bank of the Oui, which here receives the Uvelka. It is surrounded with wooden fortifications forming a square flanked with towers and encompassed by a ditch and glacis. The streets are straight and regular, and the town contains about 1,000 houses. It has large iron-works, and manufactories of fire-arms; but the importance of this place is derived from its being

an emporium for the trade with the Asiatic tribes, particularly the Kirghiz of the Lesser Horde, who are rich in cattle, and with Bokhara and Tashkend. The trade is carried on in a large square, built on the opposite side of the Oui or Ouk. One part of this exchange is allotted to the merchants of the country, another to the Kirghiz, and a third to the Bukharians.—Also a town in the gov. and 79 m. NNW of Penza. Pop. 4,000.

TROITSKO-SASKAI See **KIAKHTA**.

TROITZKOI-SERGHIEVA, a town of Russia, in the gov. and 32 m. SE of Moscow, on the river Kutchura. It contains 6,000 inhabitants, who are chiefly employed in making toys of wood and stone. It is famous for its Greek monastery, commonly called the convent of the Holy Trinity, founded in the 14th cent. This monastery, which is the richest in the empire after that of Petoehersk at Kiev, contains in general above 1,000 monks, and is regularly fortified. It has 7 churches within its walls, a palace, and an ecclesiastical seminary. In times of commotion or danger it has afforded a refuge to the czars, among others to Peter I. when he put an end to the administration of his sister Sophia.

TROJA, a town of Naples, in the Capitanata, 7 m. NNW of Bovino, on the small river Chilare, 33 m. SW of Manfredonia. Pop. 4,000. It forms, along with the town of Biccari, the see of a bishop.—Also a small island of the Mediterranean, off the coast of Tuscany, 13 m. E of Elba, in N lat. 42° 44'.

TROKI, a town of European Russia, in the gov. and 15 m. SW of Wilna, on a small lake. Pop. 4,000. It was built in 1321 by the duke of Lithuania, and was the residence of his successors till they removed to Wilna.

TROKI (STARO), a town of Russian Lithuania, 14 m. WSW of Wilna.

TROLLHATTA, or **TROLLHETTA**, a village of Sweden, in West Gethland, 15 m. ESE of Uddevalla, and 41 m. N by E of Gottenburg. The river Gotha-elf here forms a series of remarkable falls, not far from the place where it issues from Lake Wener. The river, which is very wide before reaching the falls, is here confined by the rocks within a narrow channel, and its course is further impeded by several rocky islands in the middle of the stream. The falls are three in number, and their whole descent is estimated at 100 ft. Their rapidity is very great, and their noise is heard at the distance of a league. Boats avoid the falls by a canal a quarter of a Swedish mile in length, 22 ft. wide, and 7 ft. deep, with 12 locks. See **GOTHA-ELF**.

TROMAUN, a village in the p. of Athleague, co. Roscommon, 3 m. S of Roscommon. Pop. 203.

TROMBETAS, or **ORIXIMENA**, a river of Brazil, which rises on the S flank of the Serra-Tumacumaque; runs S; and enters the Amazon on the l. bank, in S lat. 1° 50', after a course of nearly 400 m.

TROMOE, an island off the S coast of Norway, at the entrance of Arendal bay, in N lat. 58° 14'.

TROMPERWICK (GULF OF), a bay on the E coast of the island of Usedom, in the Baltic, in N lat. 54° 40'.

TROMPIA (VAL-), a valley of Austrian Italy, in the N part of the deleg. of Brescia, traversed by the Mella. It is about 21 m. in length; runs SSW; and has good pasturage, and extensive iron-works. It is divided into 19 communes, and contains above 16,000 inhabitants.

TROMSOE, an island off the NW coast of Norway, in N lat. 69° 39', E long. 18° 57'. It is 4 m. in length from NNE to SSW. The interior is hilly and rocky, and several of its elevations rise above the line of perpetual snow, which in this high lat. is so low as 1,200 ft. above sea-level. Corn does

not succeed here; even for pasturage the only suitable tract is a narrow strip of land along the coast. There is a small town with a good harbour on the E coast, which the Danish government endeavoured, in the course of last century, to render a place of trade, from which vessels proceeding to the whale-fishery, or to the Loffoden isles, might be enabled to sail with their cargoes to the south of Europe, but the attempt did not succeed.—The province of T., comprising the N part of the Norwegian kingdom, and administratively divided into the bailiwicks of Nordland and Finland, has an area of 31,560 geog. sq. m.

TRONA (WADI), a valley of N. Africa, in Fezzan, to the NE of Gherna.

TRONÆS, a village of Norway, 90 m. SW of Tromsø, on the N coast of the island of Hindoen. Pop. 1,200.

TRONCHON, a village of Spain, in the prov. and 36 m. NE of Teruel.

TROND (SAINT), or **TROJEN**, a town of Belgium, in the prov. of Limburg, on the railway from Mechlin to Liege, 10 m. SW of Hasselt. Pop. 9,000.

It has a manufactory of fire-arms, and beet-root sugar-works, distilleries, and soap-works. It was formerly a place of some strength, but its walls were razed in 1675. A sanguinary action took place in the neighbourhood, between the French and Austrians, in March 1793.

TRONDA, or **TRONDRAY**, an island 3½ m. long, and 2 m. broad, off the W coast of Quarf, in the mainland of Shetland.

TRONDHJEIN. See **DRONTHEIM**.

TRONE, or **TROX**, a river of Prussia, in the reg. of Treves, which flows into the Moselle, after a NNW course of 30 m.

TRONEKEN, a village of Prussia, in the Hunsrück, 12 m. SSE of Traarbach.

TRONFIELD, a mountain of Norway, on the l. bank of the Glommen, in N lat. 62° 20', having an alt. of 883 toises = 1,832 yds. above sea-level.

TRONGET, a village of France, in the dep. of Allier, cant. and 1 m. N of Mont-aux-Moines. Pop. 1,000. Coal is wrought in the vicinity.

TRONQUAY (LE), a village of France, dep. of Eure, cant. and 2 m. N of Lions-la-Forêt. Pop. 1,400.

TRONS, or **TROX**, a village of the Swiss cant. of the Grisons, in a beautiful situation, near the l. bank of the Rhine, 18 m. SE of Altorf. Pop. 1,047, Catholics. There are iron-works in the vicinity.

TRONTANO, a village of the Sardinian states, in the div. of Novara, 2 m. ENE of Domo-d'Ossola.

TRONTO, a river of the Papal states, which rises in the Apennines, 6 m. NE of Montereale; runs N; and flowing along the border of the Neapolitan dominions, discharges itself into the Adriatic, in N lat. 42° 54', after a course of 60 m.

TRONZZANO, a town of Piedmont, in the prov. and 12 m. W of Vercelli. Pop. 3,500.

TROO, a town of France, dep. of Loire-et-Cher, 10 m. SW of Vendome. Pop. 1,000, partly employed in the manufacture of woollen stuffs.

TROON, a promontory and a thriving port at the W end of the parish of Dundonald, in Ayrshire. The town, 6 m. N of Ayr, and 9 m. SW of Kilmarnock, is built on a belt of rock, extending 1½ m. into the sea, and so curved as to form a large segment of a circle with the concave side facing the N. The embayed marine space embraced by the bold curvature is by far the best natural harbour in Ayrshire, affording safe anchorage-ground from every quarter except the NW. The merchants of Glasgow, aware of its advantages, made a vain effort, about the year 1700, to purchase the circumjacent property for the erection of a sea-port; and were

obliged to select the very inferior site of Port-Glasgow as the station next in eligibility. The duke of Portland, about the year 1817, constructed a new pier 800 ft. long, nearly at right angles with the rock, where the depth is 19 ft. at low water, and he afterward constructed a wet dock with floodgates, a dry dock for repairing vessels, a lighthouse, and large store-houses. A railway to T. from Kilmarnock was the first public work of its class in Scotland, and brings down vast quantities of coals for shipment to Ireland, Galloway, and other destinations. A communication is maintained likewise with the Glasgow and Ayr railway, the main line of which passes in the vicinity. Many of the inhabitants are employed in a large ship-building yard, a rope and sail manufactory, and some other works; and not a few of them draw an entire or partial maintenance from letting lodgings to families of seabathers. In 1836, the pop. of the town was 1,088, and of the town and a district extending 2 m. from it, 1,600; in 1851, it was 2,404.

TROPEA, a town in Calabria-Ultra 2da., 12 m. W of Monteleone, on a rock overhanging the gulf of Santa-Eufemia. Pop. 4,300. It is surrounded by walls and towers, and from many points has a very picturesque effect. The rock on which it stands rises perpendicularly from the sea, so that the owners of the houses which are built on the edge of the precipice, often fish with considerable success from their windows. It has manufactories of linen and cotton. Porcelain earth is found in the vicinity. Two little streams, the Alafito and the Lamia, fall into the sea between T. and Parghelia. The neighbouring country produces a considerable quantity of cotton, which is worked upon the spot: the plants, compared with those of Egypt, have, however, a very dwarfish and miserable appearance. About 1,000 rotoli of silk are yearly produced in the environs.

TROPEZ (SAINT), a small port of France, in the dep. of Var, 39 m. ENE of Toulon, in N lat. 43° 16'. It has 3,700 inhabitants, who are employed for the most part in the tunny and pilchard fishery, and in the coasting trade.

TROPIC-KEYS, a group of shoals among the Virgin islands, between Great Passage island and the E coast of Porto Rico. They are so named from their abounding in birds called *tropicos*.

TROPPAU, a principality of Silesia, bounded on the N by the principality of Oppeln, on the E by Ratibor and Teschen, and on the S and W by Moravia. It was erected into a principality in 1254. At the peace of Berlin in 1742, the part to the north of the Oppa was ceded to Prussia, but the remainder is still subject to Austria. The whole belongs in property to the princes of Lichtenstein.—Also a circle of Austrian Silesia, containing several lordships, and the parts of the principalities of T., Jagerndorf, and Neisse, that were retained by Austria, when the rest of Silesia was ceded to Frederick II. Its area is 1,080 sq. m.—Its cap. of the same name, and till lately the residence of the regency, stands at the confluence of the Oppa and Mohra, in N lat. 49° 50'. It is still surrounded with a wall, and has two public squares. It contains the ancient palace of the princes, three churches, several convents, a college, and a museum. Pop. in 1846, 12,827, who are partly employed in the manufacture of woollens, paper, rosoglio, and soap. In 1758 the greater part of this place was burnt down.

TROPPLIWODE, a village of Prussian Silesia, in the reg. and 32 m. SSW of Breslau.

TROQUEER, a parish on the E border of Kirkcubright, containing the suburban burgh-of-barony of Maxwelltown. Pop. in 1851, 4,925.

TRORY, or **St. MICHAEL'S TRORY**, a parish in co. Fermanagh, 3 m. N of Enniskillen. Area 6,175 acres. Pop. in 1831, 2,012; in 1841, 2,028.

TROSA, a port of Sweden, on the Baltic, in N lat. 58° 53'. Pop. 500. Its harbour is good.

TROSACHS, a surpassingly romantic mountain-vaile, between lochs Achray and Katrine, in the district of Monteith, Perthshire. The opening which affords ingress is flanked on the l. by Benvenue, towering 2,800 ft. above sea-level, and on the r. by Benawn. The defile of Beal-an-Duine is in the heart of the great gorge; a little W of it is a narrow inlet; and, at a few paces farther, Loch-Katrine bursts upon the view, the Alps of Arroquhar mingling with the clouds in the distance.

TROSSIN, a village of Prussian Saxony, 9 m. NW of Torgau.

TROSTAN, a mountain in the p. of Layde, 3½ m. SW of Cushendall, co. Antrim. Its summit has an alt. of 1,810 ft. above the level of the sea.

TROSTBERG, a village of Bavaria, on the l. bank of the Alza, 42 m. E of Munich.

TROSTON, a parish in Suffolk, 5½ m. NNE of St. Edmunds-Bury. Area 1,764 acres. Pop. 427.

TROSTREY, a parish in Monmouthshire, 2½ m. N by W of Usk. Area 1,255 acres. Pop. 176.

TROTTERSCLIFFE, or **TROSELY**, a parish in Kent, 7½ m. WNW of Maidstone. Area 1,163 acres. Pop. in 1831, 310; in 1851, 283.

TROTTON, a parish in Sussex, 4 m. WNW of Midhurst. Area 3,877 acres. Pop. in 1851, 484.

TROUGHEND, a township in Elsdon p., Northumberland, 20 m. N by W of Hexham. Area 26,010 acres. Pop. in 1831, 327; in 1851, 264.

TROUGHTON, a small, low, sandy island off the NW coast of Australia, in S lat. 13° 44'.

TROUILLE, a river of Belgium, in the prov. of Hainault, which rises 3 m. NW of Merbes; runs W, turns N, and then NNW; passes Mons, and below the village of Nimy, flows into the Haine after a course of 20 m.

TROUN (CAPE), a cape on the N coast of Staten island, in the N. Pacific, in N lat. 45° 30'.

TROUP, a county in the W part of Georgia, U. S., watered by the Chattahoochie. Area 417 sq. m. Pop. in 1850, 16,879. Its cap. is La Grange.

TROUP-HEAD, a cape on the N coast of the county of Banff, 10 m. W of Kinnaird's point, in N lat. 57° 39'.

TROUPSBURG, a township of Steuben co., in New York, U. S., 199 m. SW by S of Albany. Pop. 1,754.

TROUTBECK, a river of Cumberland, which runs into the Irthing, below Horsehead.—Also a river in Westmoreland, which runs into the Eden, 3 m. below Appleby.—Also a chapelry and village in Windermere p., Westmoreland, on the river of the same name, 3 m. SE by E of Ambleside. Area 5,322 acres. The village stands in a fertile and lovely valley at the foot of Wansfell. Pop. 369.

TROWBRIDGE, a parish and market-town in Wilts, 90 m. W by S of London, and 11 m. S by W of Chippenham, on the river Were. The Kennet and Avon canal passes about a mile north of the town, and a branch line of railway connects it with the Great Western. Area of p., 2,442 acres. Pop. in 1801, 5,799; in 1831, 10,863; in 1851, 11,148. The church is a spacious edifice, consisting of a nave, chancel, and two aisles, with chapels, and a large tower surmounted by a spire. The town stands on the side of a rocky hill, near the Were which runs into the Avon near Bradford. The houses are in general irregularly built, and most of the streets are narrow. The manufacture of woollen cloths and kerseymeres has long been the staple

trade of T., as well as of most of the neighbouring towns and villages. It is said to have been introduced here in the reign of Henry VIII., and has probably continued to be the principal source of employment ever since its introduction.

TROWELL, a parish of Nottinghamshire, $5\frac{1}{2}$ m. W of Nottingham. Area 1,570 acres. Pop. 892.

TROWERS ISLAND, or PULO-TUJIL, a small island in the Eastern seas, near the S coast of Java, in S lat. $7^{\circ} 2'$, 12 m. E by N of Klapper island.

TROWSE, or TROWSE-NEWTON, a parish of Norfolk, 2 m. SE by S of Norwich. Area 1,000 acres. Pop. in 1831, 583; in 1851, 1,363.

TROY, a township of Pike co., Alabama, U. S., 46 m. SSE of Montgomery.—Also a township of Waldo co., in Maine, 36 m. NE of Augusta. Pop. 1,484.—Also a township of Bristol co., Massachusetts, on the E side of Taunton river, 16 m. S of Taunton.—Also a township of Oakland co., in Michigan, 72 m. E by S of Lansing.—Also the capital of Rensselaer co., New York, on the E bank of the Hudson, 6 m. N by E of Albany. It is regularly laid out, and is a well built and flourishing town. It contains a fine court-house, and several handsome churches; and has several educational institutions of considerable repute. Its manufactures are important, embracing machinery, hardware, cutlery, cotton goods, and paper. Pop. in 1810, 3,895; in 1830, 11,405; in 1850, 28,785. The village of West Troy, on the opposite side of the Hudson, may be regarded as a suburb of this thriving town. The streams descending from the hills in the vicinity afford some of the finest mill seats in the country.—Also a township of Miami co., Ohio, on the Great Miami, 63 m. W of Columbus. Pop. 1,956.—Also a township of Walworth co., Wisconsin, 50 m. ESE of Madison.—Also a township of Orleans co., in Vermont, 40 m. N by E of Montpelier. Pop. 1,006.

TROYES, a town of France, the capital of the dep. of the Aube, situated on the l. bank of the Seine, which is here comparatively small and divided into several channels, in N lat. $46^{\circ} 18' 5''$, 90 m. ESE of Paris. It is of considerable extent, and is surrounded with a wall; but is ill built, the chief material being wood, for the stone found in the neighbourhood is too soft for building. Many of the houses are curiously antique. The promenades round the town are very fine and of great extent. The cathedral is a splendid edifice; and the hotel-de-ville and palais-de-justice are both fine buildings. Pop. in 1789, 30,706; in 1831, 23,749; in 1846, 24,702. The manufactures of T. are considerable, particularly in cotton and cotton stockings; woollens, linens, leather, lace, soap, starch, and thread are also made here, but on a small scale. The corn, wine, and fruit of the adjacent country also form objects of trade. The town is connected by railway with Paris.—T. was noted in the Middle ages for its great fairs, where merchandise was sold by Troyes or Troy weight. In the campaign of 1814, this town was entered by the Allies on the 7th of February; retaken by the French on the 23d of that month; but finally re-occupied by the Allies on the 4th of March. It is the seat of an archbishop, and of the different branches of the administration of the dep. Pope Urban IV. was a native of Troyes.—The arrond. of T. comprising 7 cantons, has an area of 158,000 hectares. Pop. in 1846, 98,725.

TRSCHEEMESNO, a town of Prussia, in the reg. of Bromberg, 10 m. SW of Mogillno. Pop. 8,200.

TRSTENNA, or TRZSIENNA, a town of Hungary, in the com. of Arvad, 48 m. S by W of Cracow. Pop. 8,000.

TRUB, a parish and village of Switzerland, in the cant. and 21 m. E of Berne. Pop. 2,536.

TRUBAU. See TRIBAU.

TRUBI. See AA.

TRUBIA, a town of Spain, in the prov. and 7 m. WSW of Oviedo, on the r. bank of a river of the same name. There is here a cannon foundry.

TRUBLY, or TUSSENVILLE, a parish in co. Meath, 8 m. ENE of Trim. Area 854 acres. Pop. 73.

TRUBSCHEVSK, a town of European Russia, in the gov. of Orel, on the Desna, 92 m. WSW of Orel. Pop. 4,000.

TRUCHSES. See WALDSBURG.

TRUCHTERSHEIM, a village of France, in the dep. of Bas-Rhin, 9 m. NW of Strasburg. Pop. 700.

TRUCY, a village of France, in the dep. of Yonne, cant. and 8 m. NE of Coulanges. Pop. 400.

TRUEYRE, a river of France, which rises in the Cevennes, in the dep. of Lozere, 6 m. NW of St. Amand; runs SW, then NNW, and then WSW; and joins the Lot on the r. bank, at Entraignes, after a course of 90 m.

TRUFFARELLO, a village of the Sardinian states, in the prov. and 7 m. SSE of Turin, near the r. bank of the Bonna. Pop. 1,000.

TRUIM, a small river of Badenoch, Inverness-shire, which rises among the alpine recesses of the central Grampians, and runs $12\frac{1}{2}$ m. NNE to the Spey, near Invernahavon.

TRULL, a parish of Somersetshire, 2 m. SSW of Taunton. Area 2,283 acres. Pop. in 1851, 716.

TRULLIKON, a village of Switzerland, in the cant. and 21 m. NNE of Zurich. Pop. 1,386.

TRUMBULL, a county in the NE of the state of Ohio, U. S., watered by branches of the Big Beaver and Grand river. Area 892 sq. m. Pop. in 1850, 80,490. Warren is the chief town.—Also a township of Fairfield co., Connecticut, 6 m. NW of Stratford. Pop. 1,313.—Also a township of Ashtabula co., in Ohio, 153 m. NE of Columbus.

TRUMIAN, a town of Hindostan, in the prov. of the Carnatic, district of Tanjore, in N lat. $10^{\circ} 11'$.

TRUMPINGTON, a parish of Cambridgeshire, 2 m. S of Cambridge. Area 2,200 acres. Pop. 770.

TRUN, a village of France, dep. of the Orne, 6 m. NNE of Argentan. Pop. 500.

TRUNCH, a parish of Norfolk, 8 m. N by E of North Walsham. Area 1,853 acres. Pop. 451.

TRUNS. See THONS.

TRURO, a town of Nova Scotia, in Halifax co., at the head of the basin of Minas, 3 m. S of Onalow, and 4 m. N by W of Halifax.

TRURO, a township of Barnstable co., Massachusetts, U. S., extending across the peninsula of Cape Cod, between Provincetown and Wellfleet. Pop. in 1850, 2,061. There is a village of the same name on the NE coast of this township, in N lat. $42^{\circ} 02'$.

TRURO, a parliamentary borough and market-town, considered the chief town in the co. of Cornwall, 44 m. SW of Launceston, and $8\frac{1}{2}$ m. N of Falmouth, on a small river called the Allen, which joins another called the Kenwyn at the quay, and forms the creek or river of Truro, opening into Falmouth harbour. Area of p. of St. Mary, 190 acres. Pop. in 1801, 2,858; in 1831, 2,925; in 1851, 3,169. The town, however, extends into the parishes of St. Clement and Kenwyn, and in 1841, contained 9,991 inhabitants; in 1851, 10,733. The scenery in the immediate vicinity is particularly fine; and the town has a picturesque appearance, situated, as it is, in a hollow surrounded by hills, indented with narrow wooded valleys. The principal streets are wide and handsome, and the houses are faced with granite or free-stone, and well-built. The principal public edifices are the church, a fine structure of the 15th cent.; the dissenting meeting-houses; the town-hall, a large substantial building, situated over the

main entrance to the market-place; the coinage-hall, a heavy ancient building; the county infirmary, a spacious edifice; the theatre and ball-room, schools, &c. The museum of the Royal institution was erected at a cost of £2,100, and is supported by a proprietary besides annual subscriptions. There is also a public library containing about 6,000 vols. In the harbour or creek of Truro, the water, at spring-tide, covers a space of nearly 2 m. in length, and of sufficient depth to be navigable for vessels of 150 tons. At the recession of the tide, vessels of more than 150 tons burden must unload at Mopas. From the position of T., however, at the head of the branches of Falmouth harbour, and standing, nevertheless, about midland between the seas on the east and west, it must always constitute a great central point. The quantity of tin and copper, the chief produce of Cornwall, exported from T. has therefore been greater than from any other part of the county. The copper ore is principally shipped to South Wales to be converted into metal; and coal is brought back for the use of the mines. In other respects the commerce is not extensive, but it has been rapidly increasing in wealth as well as population, owing to the success of mining speculations carried on in the vicinity. Here is a manufactory for converting block-tin into bars and ingots, a blowing-house for refining tin, a foundry for casting iron tubes employed in the mines, two potteries, and a woollen mill. The old limits of the borough comprise the whole of the p. of St. Mary, and a portion of the p. of St. Kenwyn, but did not include the whole town. The limits therefore were extended, and the borough now includes the whole town, together with an additional portion of land along each side of the river to Calenick creek. T. returns two members to parliament. The number of electors registered in 1837, was 609; in 1852, 607.

TRUSHAM, a parish in Devon, 2 m. NNW of Chudleigh. Area 749 acres. Pop. in 1851, 205.

TRUSKMORE, a mountain in the p. of Rossinver, co. Sligo, forming the culminating part of the range of mountains which extends from Benbulbin to Glenties. Its summit, on the E verge of co. Sligo, 2 m. N of the beautiful lake of Glencar, has an alt. of 2,118 ft. above the level of the sea.

TRUSLEY, a parish in the co. of Derby, 6 m. W of Derby. Area 1,078 acres. Pop. in 1851, 90.

TRUSTHORPE, a parish in Lincolnshire, 6 m. NE of Alford. Area 1,455 acres. Pop. 289.

TRUXILLO, a town of Spain, in the prov. of Caceres, 130 m. WSW of Madrid. It is situated on a hill, of which it occupies the top and the E side. The N and W sides are rugged and precipitous. On the summit of the hill is the castle, formerly a place of strength; and near it is the old part of the town, surrounded by high walls, and containing houses fortified in the feudal style; the rest of the town is modern, and extends along the slope of the hill to the plain. It contains a small but elegant square, its sides having porticoes supported by columns. The pop. in 1852 was 6,100. The environs are fertile; but the inhabitants are in general poor. Large cattle fairs are annually held here. Francis Pizarro, the conqueror of Peru, was a native of this town.

TRUXILLO, a city of Venezuela, in the prov. of the same name, 60 m. NE of Merida. The spot occupied by the city is shut in by two mountains. It is poorly built, and presents no edifices of any importance. The vicinity is pretty well cultivated, and produces sugar, cacao, indigo, coffee, and in general all the productions of the torrid and some few of the temperate zones. The pop. is about 4,000. T. was founded in 1570, and made rapid progress in industry and wealth; but in 1678 the buccaneer, Francis

Gramont, with a handful of men, attacked and completely sacked and destroyed this wealthy city, killing or putting to flight its inhabitants, and reducing to ashes its superb edifices. The ruins that still remain sufficiently attest the past grandeur of this once flourishing town.—The province of T. lies between the parallels of 8° 28' and 9° 42', and contained in 1841, 44,788 inhabitants.

TRUXILLO, a town of Honduras, situated between two rivers, on a hill near the sea, in N lat. 15° 55'. It is at present a place of little account, but has a pretty good harbour.

TRUXILLO, a province of Peru, bounded on the N by Ecuador, and on the S by Tarma. It is a mountainous district, but fertile, and produces abundance of wheat, maize, wine, olives, sugar-canes, and fruits.—The cap. of the same name was founded in 1585 by Pizarro, at the distance of half-a-league from the sea, on the banks of a small river, in S lat. 8° 7'. The houses, which are chiefly of brick, have a neat appearance. The inhabitants amount to 8,000. The town contains a cathedral, several convents, a college, hospital, and two nunneries. It is surrounded with a low brick wall flanked by fifteen bastions; and carries on its commerce by means of its port of Guanchaco, which is about 8 m. to the northward, and is the only good harbour on the coast from Callao to Tumbes.

TRUXTON, a township of Courtland co., New York, U. S., 118 m. W of Albany. Pop. 3,629.

TRYBANE, a small fishing-harbour in the bay of Killybegs, co. Donegal. It is dry at low water, and has a very indifferent quay.

TRYBANE-MUCKRAS, a small fishing-harbour at the SW extremity of the p. of Glencolumbkille, co. Donegal. It has no quay and a difficult landing-place.

TRYSULL-AND-SEISDON, a parish of Staffordshire. Area 3,110 acres. Pop. in 1851, 559.

TRYVETT, or **TRAVET**, a parish in co. Meath, 2 m. N of Dunshaughlin. Area 4,239 acres. Pop. 416.

TSAD-SO, a river of Tibet, which rises in Kham-jul, in N lat. 34° 50'; runs SE, passing Surman and Konkudsong; then turns S, and under the parallel of 27° 10', enters Yun-nan, where it is known as the Lan-tsiang.

TSANA. See **DEMBA**.

TSANG, or **ULTERIOR-TIBET**, called also by European geographers, **TESHU**, **LUMBU**, and the **UNDES**, a division of Tibet, comprising the W part of that region, and bordered on the S by the Himalaya mountains, by which it is separated from Nepal. It is intersected in its entire extent by the Yarou-tsangbo, and contains also numerous lakes. It comprises 6 cantons, and contains several towns, the principal of which are Teshu-Lumbu, the capital, Lingghie, Founghia, Nielam, Dailung, Dsungar, and Ari or Ngari. See **TIBET**.

TSANG-BÖ. See **DHONG**.

TSANG-CHU, a district and town of China, in the prov. of Chih-le, and div. of Teen-tsin-fu, 45 m. ESE of Ho-keen-fu, on the r. bank of the Wei-ho, in N lat. 38° 22' 20", E long. 117° 0' 30".

TSANG-KE, a district and town of China, in the prov. of Sze-chuen, dep. and 11 m. N of Paou-hing-fu, on the l. bank of the Kea-ling, in N lat. 31° 40', E long. 105° 56'.

TSANG-KEA-KEOU, a town of China, in the prov. of Chih-le, on the Thsing-shwy-ho, contiguous to the Great Wall. It is fortified.

TSANG-SHIN, a town of the Corea, in the prov. of Hwanghai, 51 m. SSW of Han-chu, on the Yellow sea.

TSANG-WU-HEEN, a district and town of China, in the prov. of Kwan-se, and div. of Wu-chu-fu.

TSAN-HWANG, a district and town of China, in the prov. of Chih-le, div. and 36 m. SSW of Ching-tih-fu, in N lat. 37° 43', E long. 114° 32'.

TSAOU, a district and town of China, in the prov. of Gan-hwuy, div. and 39 m. ESE of Leu-chu-fu, near the E bank of Lake Tsiao-hou, and on the l. bank of the river, which forms the issue of that lake.—Also a district and town in the prov. of Shan-tung, div. and 30 m. S of Tsaou-chu-fu, in N lat. 34° 56', and E long. 115° 38'.

TSAOU-CHU-FU, a division and town of China, in the prov. of Shan-tung. The div. comprises 11 districts. The town is 90 m. WSW of Yen-chu-fu, near the frontier of the prov. of Chih-le, in N lat. 35° 20', and E long. 115° 36'.

TSAOU-HEA, an island in the Yang-tse-kiang river of China, commencing 2 m. above Cornwallis-Bluff, 220 m. above the mouth of the river, in N lat. 32° 10', and stretching 7 m. in a NW direction. It is separated from the S shore by a channel 200 yds. wide.

TSAOU-HOU, a lake of China, in the prov. of Gan-hwuy, 12 m. SSE of Leu-chu-fu. It is nearly square in form, and is 30 m. in length from E to W, and 18 m. in breadth. It contains a small island, and discharges itself on the E into the Yang-tse-kiang.

TSAOU-TUNG, an island of China, in the Yellow sea, off the W coast of the Corea, and prov. of Hwang-hai, in N lat. 37° 44', and E long. 124° 55'. It contains a town of the same name.

TSAOU-YANG-HEEN, a district and town of China, in the prov. of Hu-pih, and div. of Fang-yang-fu, in N lat. 32° 10', and E long. 112° 41'.

TSATA, **TSARA**, or **TCHERA**, a small town of Chinese Turkestan, in the prov. of Thian-shan-Nanlo, on a small river 80 m. NW of Tak, and 100 m. ESE of Khoten.

TSATCHU. See **YA-LUNG-KEANG**.

TSATSAK, a town of Turkey in Europe, in Servia, in the sanj. and 83 m. SSW of Semendria, on the r. bank of the Western Morava.

TSATSORKENG, a town of Tibet, in the prov. of Wei, between the supposed course of the Om-tchou or Nou-keang, and La-tchou or Lan-tsang-keang, and 90 m. NW of Bathang.

TSCH. For names commencing with these letters not found amongst the following, see *ch*, *sch*, *cs*, or *cz*.

TSCHAD. See **CHAD**.

TSCHAEPRING. See **CAEPREGH**.

TSCHAJKISTEN, or **TSIAKASOK - KERULET**, a regimentary district of Slavonia, at the NE extremity of Military Slavonia, comprising an area of 134 sq. m., extending between 45° 9' and 45° 33' N lat., and between 19° 53' and 20° 20' E long., and bounded on the E by the Theiss; on the S by the Danube; and on the W and N by the Hungarian comitat of Bacs. It consists of a vast plain, intersected by canals, and possessing in some parts tolerable cultivation. Pop. in 1837, 29,027. Its capital is Tittel.

TSCHAKAKOTE, a town of Tibet, in the div. of Tsang. Pop. 5,000. It possesses an active transit trade.

TSCHERNEMBEL, or **ZERNAMEL**, a town of Illyria, in the gov. and 42 m. SE of Laybach, circle and 13 m. S of Neustadt, on the Zhermomschiza, a small affluent of the Kulp. Fruit and wine are extensively cultivated in the locality.

TSCHERNOWITZ. See **BUKOWINE**.

TSCHESCHEN, or **TESCHEN**, a village of Prussia, in the prov. of Silesia, regency and 33 m. NE of Breslau. Pop. 445. It has a glass-work.

TSCHINGLEN, a mountain of Switzerland, on the confines of the cantons of the Grisons and Glaris, and 14 m. SE of Glaris. It consists of a rocky

mass, 8,870 ft. in height, and has on its summit a deep cavern, named St. Martin's loch.

TSCHIRNAU, or **GROSS-TCHIRNE**, a town of Prussia, in the prov. of Silesia, regency and 48 m. NNW of Breslau, and circle of Guhrau. Pop. 960. It has two churches, a Catholic and a Lutheran.

TSCHIRNDORF, a village of Prussia, in the prov. of Silesia, regency and 20 m. NW of Liegnitz, and circle of Sagan, on the l. bank of the Oels-Wasser. Pop. 275. It has several iron-works.

TSCHUSSOWAJA, a river of Russia, which rises about 50 m. S of Yekaterinburg; skirts the E declivity of the Ural some distance; and then, passing through the range, runs N along the W declivity, until near 56° N lat., where it turns W, and falls into the Kama. It is navigable in spring.

TSEANG-LO, a district and town of China, in the prov. of Fo-keen, div. and 45 m. W of Yen-ping-fu, on the l. bank of a wide river, in N lat. 26° 43', and E long. 117° 38'.

TSEEN-GAN, a district and town of China, in the prov. of Chih-le, div. and 17 m. NW of Yung-ping, in a valley, on the l. bank of the Lanho, in N lat. 40° 5', and E long. 118° 44'.

TSEEN-KEANG, a river of China, in the prov. of Sze-chuen, which descends from the mountains, running along the confines of the prov. of Shan-se; passes the towns of Tha and Kwang-yang; and after a total course in a SW direction of about 240 m. joins the Kealing, 38 m. NNW of Chung-king.

TSEEN-KEANG-HEEN, a district and town of China, in the prov. of Hu-pih, and div. of Gan-luh-fu, 50 m. E of King-chu, on a small affluent of the Han-keang, in N lat. 30° 28', and E long. 112° 48'.—Also a district and town in the prov. of Kwang-se, and div. of Sze-gan-fu, 27 m. NNE of Ping-chu-fu, and near the l. bank of the Hung-keang, in N lat. 23° 40', and E long. 108° 40'.

TSEEN-SHAN, a district and town of China, in the prov. of Gan-hwuy, div. and 29 m. WNW of Gan-hing-fu, in a well-watered valley, in N lat. 30° 43', and E long. 116° 38'. It is enclosed by ramparts built of brick, 25 ft. in height, flanked with bastions. It has several gates, one of which has two triumphal arches.

TSEEN-SHAN-CHAE-TING, a district and town of China, in the prov. of Kwang-tung, in an island of the bay of Kwang-chu-fu, and to the S of Heang-shan.

TSEEN-SSUH-HEEN, a district and town of China, in the prov. of Gan-hwuy, and div. of Chu-chu.

TSEEN-TANG-HEEN, a district and town of China, in the prov. of Che-keang, and div. of Hang-chu-fu.

TSEEN-TANG-KEANG, a river of China, which has its source in the S part of the prov. of Keang-su; traverses the N part of that of Che-keang; and, after a course, in a NE direction of about 240 m., throws itself, by a wide embouchure, into the Eastern sea, a little to the E of Hang-chu.

TSEEN-WHA, an island of the Yellow sea, near the E coast of the Corea, to the S of the island of Tsiao-tung. It contains a town of the same name.

TSE-HEA, a district and town of China, in the prov. of Shan-tung, div. and 39 m. SSE of Ting-chu-fu, near the source of the Tsing-yang.

TSEIH-MIH, a district and town of China, in the prov. of Shan-tung, and div. of Lae-chu-fu, on a small river, which 9 m. below throws itself into the Yellow sea, in N lat. 36° 15', and E long. 120° 44'.

TSEIH-YEN. See **YINGKEIHEN**.

TSE-KE, a district and town of China, in the prov. of Che-keang, div. and 9 m. NNE of Ning-po-fu, near the sea, in N lat. 30° 1' 24', and E long. 121° 17' 20'.

TSELARI, a river of Abyssinia, which rises near Gurri in Angot, and after being joined by the Zama and the Sassella, joins the Upper Takkazie.

TSE-NAN-FU, a division and town of China, in the prov. of Shan-tung. The div. comprises 16 districts. The town, which is also the capital of the prov., is 192 m. S of Pe-king, at the foot of mountains, near the r. bank of the Ta-tsin, in N lat. 36° 44' 24", and E long. 117° 7' 30". It contains several lakes, and is intersected with canals. It is a place of considerable extent, and possesses several fine streets and buildings. It possesses an active trade in a grey-coloured silk called keen-chu, and in different kinds of leioli or Chinese glass, the manufacture of Yen-ching, a town in the vicinity. It is large and populous, and is held in high veneration by the Chinese as the residence of a long line of kings, whose tombs are on the adjacent mountains.

TSE-NING-FU, a division and town of China, in the prov. of Shan-tung. The div. comprises three districts. The town is in N lat. 35° 33', and E long. 116° 44'.

TSEUEN-CHU, a district and town of China, in the prov. of Kwan-se, and div. of Kwei-lin-fu, in N lat. 25° 42' 12", and E long. 111° 5' 50".

TSEUEN-CHU-FU, a division and town of China, in the prov. of Fo-keen. The div. comprises 6 districts. The town is in N lat. 24° 56' 12", and E long. 118° 51' 10", on the Tsin. Notwithstanding the disadvantages of its harbour, which is lined with rocks and sand-banks, it carries on an active trade with Formosa, the N part of the empire and Manila. But it is infested with pirates, and the inhabitants generally are in the most wretched condition. The adjacent estuaries are crossed by bridges, one of which is nearly $\frac{1}{2}$ of a mile in length.

TSE-YANG, a district and town of China, in the prov. of Shan-tung, div. and 21 m. NNE of Tse-nan-fu, on the l. bank of the Ta-tsin, in N lat. 37° 3', and E long. 117° 20'.

TSE-YUEN, a district and town of China, in the prov. of Ho-nan, div. and 23 m. W of Hwae-hing-fu, in N lat. 35° 7', and E long. 112° 39'.

TSHILA-TAGH, or **CHILA-TAGH**, a forest-clad range of mountains in Asiatic Turkey, extending from Uskub eastwards to the Elkas-Tagh, and having an alt. of 1,350 ft.

TSIAMDO, a town of Tibet, in the prov. of Kham, in N lat. 31° 10', in a valley surrounded by mountains between two head streams of the Ya-long-kiang. It is a poor place, with a Chinese garrison.

TSIAMPA, or **BIN-CHUON**. See **CHAMPA**.

TSIBBA, a town of Japan, in the island of Nifon, prov. of Simosa, and district of the same name, near the NE coast of the bay of Yedo, and 80 m. E of the town of that name.

TSIBON-BO-SIMA, an island of Lake Biwanocumi, in Japan, in the island of Nifon. It was formed by a volcanic eruption in 82 a. c.

TSIGAAR, or **TASAGOURA**, a chain of mountains in Japan, in Nifon, in the prov. of Mouta, running from S to N, and terminating at Sangar strait.

TSIH, a district and town of China, in the prov. of Shan-tung, and div. of Gen-chu-fu.

TSIH-CHU-FU, a division and town of China, in the prov. of Shan-se. The div. comprises five districts. The town is 48 m. SSW of Lu-gan-fu, at the foot of mountains, in N lat. 35° 30', and E long. 112° 49' 30".

TSIKA, a district of Japan, in the island of Si-kokf and prov. of Syo.

TSIKONGO, a prov. of Japan, in the central part of the island of Kiu-siu, between the bay of Simabara on the W, the prov. of Tsikousen on the

N, that of Boungo on the E, and the prov. of Figo on the S. It contains several lofty mountains, abounding in sulphur, silver and gold. The soil is tolerably fertile, especially in legumes and fruit. The prov. comprises 10 districts.

TSIKOUMMA, a town of Japan, in the island of Nifon, prov. of Sinano and district of the same name, 99 m. W of Yedo.

TSIN-CHU, a district and town of China, in the prov. of China, div. and 29 m. ESE of Ching-ting-fu, near the l. bank of the Hou-to, in N lat. 38° 6', and E long. 115° 12'.—Also a division and town in the prov. of Shan-se. The div. comprises 2 districts. The town is in N lat. 36° 40', and E long. 112° 46'.—Also a town of China, in the Corea, and prov. of Tseuen-lo, 210 m. SSE of King-ke-tao, in N lat. 35°.

TSIN-CHU-FU, a district and town of China, in the prov. of Kwan-se. The div. comprises 4 districts. The town is in N lat. 23° 26', and E long. 109° 51'.—Also a division and town of China, in the prov. of Kan-suh. The div. comprises 9 districts. The town is in N lat. 34° 36', and E long. 105° 46'. This div. was formerly comprised in that of Kung-chang-fu.

TSING, a district and town of China, in the prov. of Chih-le, and div. of Teen-tsin-fu, 45 m. ENE of Ho-keen-fu, in N lat. 38° 37', and E long. 116° 54'.

TSIN-GAN, a district and town of China, in the prov. of Kan-suh, div. and 24 m. N of Tsin-chu-fu, on the l. bank of the Hwei-ho, in N lat. 34° 52', and E long. 105° 50'.

TSIN-GAN-HEEN, a district and town of China, in the prov. of Kwei-chu, and dep. of Gan-chu-fu.

TSING-CHIN, a district and town of China, in the prov. of Kwei-chu, and div. of Gan-shun-fu, 18 m. W of Kwei-gang-fu, on an affluent of the Teou-hwei.

TSING-CHING, a district and town of China, in the prov. of Shan-tung, and div. of Wu-ting-fu, in N lat. 37° 13', and E long. 117° 51'.

TSING-CHU, a division and town of China, in the prov. of Hu-nan. The div. comprises 3 districts. The town is 62 m. S of Yung-chu-fu, in a mountainous locality, in N lat. 26° 35', and E long. 109° 28'.

TSING-CHU-FU, a division and town of China, in the prov. of Shan-tung. The div. comprises 11 districts. The town is on a small affluent of the Me-ho, 96 m. E of Tse-nan-fu, in N lat. 36° 44' 22", and E long. 118° 43' 30". It is a flourishing place, and carries on an extensive trade in fish.

TSING-FUNG-HEEN, a district and town of China, in the prov. of Chih-le, div. and 29 m. S of Ta ming-fu, in N lat. 35° 58', and E long. 115° 21'.

TSING-GAN, a district and town of China, in the prov. of Keang-se, div. and 39 m. W of Nan-chang-fu, in a well-watered valley, in N lat. 28° 48', and E long. 115° 21'.

TSING-HAE, a district and town of China, in the prov. of Chih-le, and div. of Teen-tsin-fu.

TSING-HEEN, a district and town of China, in the prov. of Shan-se, and div. of Hin-chu.

TSING-HO, a district and town of China, in the prov. of Chih-le, div. of Kwang-ping-fu, and 69 m. E of Shun-tih-fu, in N lat. 37° 9', and E long. 115° 46'.

TSING-HO-HEEN, a district and town of China, in the prov. of Keang-su, div. and 14 m. WNW of Hwae-gan-fu, on the l. bank of Hwang-ho, in N lat. 33° 35', and E long. 119° 2'.

TSING-HWA-HEEN, a district and town of China, in the prov. of Chih-le, and div. of Paou-ting-fu.

TSING-KE, a district and town of China, in the prov. of Sze-chuen, and div. of Ya-chu-fu.

TSING-KEANG-HEEN, a district and town of

China, in the prov. of Keang-se, and div. of Lin-keang-fu.

TSING-KEANG-TING, a district and town of China, in the prov. of Kwei-chu, and div. of Chin-yuen-fu.

TSING-KEEN, a district and town of China, in the prov. of Shen-se, and div. of Suy-tih-chu.—Also a district and town of China, in the prov. of Shen-se, and div. of Yen-gan-fu, in N lat. $37^{\circ} 12'$, and E long. $110^{\circ} 8'$.

TSING-LAN-WEI, a town of China, in the prov. of Hu-nan, near the source of the Yuen, in N lat. $27^{\circ} 4' 48''$, and E long. $108^{\circ} 32' 50''$.

TSING-LEW-HEEN, a district and town of China, in the prov. of Fo-keen, div. and 42 m. NE of Ting-chu-fu, in N lat. $26^{\circ} 7'$, and E long. $116^{\circ} 59'$, on the r. bank of a river by which it is encircled on the W, N, and E.

TSING-LO, a district and town of China, in the prov. of Shan-se, div. and 54 m. NW of Tae-yuen-fu, on the l. bank of the Fuen-ho, in N lat. $38^{\circ} 31' 12''$, and E long. $111^{\circ} 57'$.

TSING-LOU-WEI, a district and town of China, in the prov. of Kan-suh, in N lat. $37^{\circ} 18'$, and E long. $108^{\circ} 58'$.

TSING-MING-CHU, a district and town of China, in the prov. of Yun-nan, and div. of Yun-nan-fu, in N lat. $24^{\circ} 47'$, and E long. $102^{\circ} 51'$.—Also a district and town in the prov. of Kan-suh, and div. of Ping-leang-fu, 56 m. W of Ping-leang-fu, on the l. bank of the Hwei-ho, at the confluence of a small river, in N lat. $35^{\circ} 35'$, and E long. $105^{\circ} 45'$.

TSING-PING, a district and town of China, in the prov. of Shan-tung, and div. of Tung-chang-fu, in N lat. $36^{\circ} 52'$, and $116^{\circ} 16'$.—Also a district and town in the prov. of China, and Ton-yun-fu, in N lat. $26^{\circ} 38'$, and E long. $107^{\circ} 38'$.—Also a district and town of China, in the prov. of Kwei-chu, and div. of Gan-shun-fu, on the r. bank of the Cham-ke, in N lat. $26^{\circ} 40'$, and E long. $107^{\circ} 38'$.

TSING-PU, a district and town of China, in the prov. of Keang-su, div. and 12 m. NNW of Sung-keang-fu, in N lat. $31^{\circ} 10'$, and E long. $120^{\circ} 53'$, on the E of a lake. It is of considerable extent, and contains some fine houses and several temples.

TSING-SHIN, a district and town of China, in the prov. of Sze-chuen, and div. of Mei-chu, in N lat. $29^{\circ} 48'$, and E long. $103^{\circ} 51'$.

TSING-SHWUY, a district and town of China, in the prov. of Kan-suh, and div. of Kung-chang-fu, in N lat. $34^{\circ} 42'$, and E long. $106^{\circ} 12'$.—Also a district, town, and port on the S coast of the prov. of Shan-tung, and div. of Ting-chu-fu, in N lat. $36^{\circ} 57'$, and E long. $122^{\circ} 20'$.

TSING-SHWUY-HO-TING, a district and town of China, in the prov. of Shan-se, and div. of Leao-chu.

TSING-SHWUY-PO, a lake of China, in the prov. of Shan-tung, 32 m. NNE of Tsin-chu, near the r. bank of the Siao-tsin, and near the gulf of Chih-le. It is 17 m. in length from NE to SW, 8 m. in breadth, and about 39 m. in circumference.

TSING-TEEN, a district and town of China, in the prov. of Che-keang, div. and 36 m. SE of Chu-chu-fu, on the l. bank of a large river, in N lat. $28^{\circ} 10'$, and E long. $120^{\circ} 21'$.

TSING-TEEN-CHU, a district and town of China, in the prov. of Yun-nan, and div. of Kueh-tsing-fu, in N lat. $25^{\circ} 38'$, and E long. $103^{\circ} 19'$.

TSING-TIH, a district and town of China, in the prov. of Gan-hwuy, div. and 51 m. SSW of Ning-kwo-fu, in N lat. $30^{\circ} 24' 37''$, and E long. $118^{\circ} 34' 13''$.

TSING-TING, a district and town of China, in the prov. of Chih-le, and div. of Ching-ting-fu, in N lat. $38^{\circ} 2'$, and E long. $113^{\circ} 10'$.

TSING-TSEUEN, a district and town of China, in the prov. of Hu-nan, and div. of Hang-chu-fu.

TSING-Y, a lake of China, in the prov. of Keang-su, 17 m. SSW of Hae-chu. It is nearly circular, with a diameter of about 9 m., and discharges itself on the S into the Tang-yang.

TSING-YANG, a district and town of China, in the prov. of Keang-su, and div. of Che-chu-fu, in N lat. $30^{\circ} 45'$, and E long. $117^{\circ} 46'$.—Also a district and town in the prov. of Gan-hwuy, div. and 23 m. E of Che-chu-fu, in a valley.—Also a river in the prov. of Shan-tung, an affluent of the Eastern sea.

TSING-YEN-HEEN, a district and town of China, in the prov. of Sze-chuen, and div. of Sze-chu, in N lat. $29^{\circ} 32'$, and E long. $104^{\circ} 8'$.

TSING-YUEN, a district, town, and fortress of China, in the prov. of Kan-suh, div. and 42 m. NNE of Lan-chu-fu, on the r. bank of the Hwang-ho, near the great wall, in N lat. $36^{\circ} 38'$, and E long. $104^{\circ} 8'$.—Also a district and town in the prov. of Kwang-tung, and div. of Kwang-chu-fu, on the r. bank of the Pe-keang, 45 m. from Canton, in N lat. $23^{\circ} 44' 24''$, and E long. $112^{\circ} 41' 50''$. The town is 105 m. from Canton, on the Ta. It has a fine pagoda, and a tower 5 stories in height.—Also a district and town in the prov. of Shen-se, div. and 24 m. SW of Tae-yuen-fu, in N lat. $37^{\circ} 37'$, and E long. $112^{\circ} 16'$.

TSIN-HEEN-HEEN, a district and town of China, in the prov. of Keang-se, and div. of Nan-chang-fu, in N lat. $28^{\circ} 29'$, and E long. $116^{\circ} 17'$.

TSIN-KE, or KIN-KE-HEEN, a district and town of China, in the prov. of Kwan-se, and div. of Wu-chu-fu, in N lat. 28° , and E long. $110^{\circ} 27'$.

TSIN-KEANG, a district and town of China, in the prov. of Fo-keen, and div. of Tseuen-chu-fu.—Also a district and town in the prov. of Keang-su, div. and 29 m. NE of Chang-chu-fu, on the l. bank of the Yang-tse-keang, near its mouth, in N lat. $32^{\circ} 5'$, and E long. $120^{\circ} 14'$.

TSIN-KEEN, or TSOUKORA, an island of the Chinese empire, in the Lieu-kieu group, a little to the E of the Great Lieu-kieu island.

TSIN-SHWUY, a district and town of China, in the prov. of Shan-se, and div. of Tsih-chu-fu, in N lat. $35^{\circ} 40'$, and E long. $112^{\circ} 15'$.

TSIN-TING-HEEN, a district and town of China, in the prov. of Kwei-chu, and div. of Gan-shun-fu.

TSIN-UNH-FU, or PU-UNH-FU, a division and town of China, in the prov. of Yun-nan. The div. comprises 4 districts. The town is in N lat. $23^{\circ} 2'$, and E long. $101^{\circ} 10'$.

TSIN-YAN, a district and town of China, in the prov. of Ho-nan, and div. of Nan-gan-fu.

TSIN-YUEN-HEEN, a district and town of China, in the prov. of Shan-se, and div. of Tsin-chu, in N lat. $36^{\circ} 35'$, and E long. $112^{\circ} 28'$.

TSIN-YUN, a district and town of China, in the prov. of Che-keang, div. and 27 m. NE of Chu-chu-fu, on a river, in N lat. $28^{\circ} 42'$, and E long. $119^{\circ} 53'$.

TSO, a river of S. Africa, which, coming from the NW, joins the Mababe river, a feeder of Lake Ngami, on the r. bank.

TSO-CHU, a district and town of China, in the prov. of Kwan-se, div. and 23 m. NNE of Tae-ping-fu, in N lat. $22^{\circ} 43'$, E long. $107^{\circ} 11'$.

TSO-CHU, or SU-CHU, a district and town of China, in the prov. of Chih-le and div. of Shun-teen-fu, 36 m. SW of Peking, in N lat. $39^{\circ} 32'$, E long. $116^{\circ} 3'$, on the r. bank of a river which is here crossed by a bridge 600 ft. in length, with parapets of white marble ornamented with sculptures of animals. The town is badly built.

TSO-KSTI, a village of Tibet, at the confluence

of the Zangakar with the Ladak Indus, at an alt. of 10,400 ft. above sea-level.

TSO-MAPHAM. See **MAHASAROWAR.**

TSO-MORIEL, a lake of Western Tibet, in N lat. 33° 55', E long. 78° 30'. It is about 14 m. in length from N to S, with a breadth of from 3 to 4 m.; and has an alt. of 15,200 ft. above sea-level. It receives the Gyang, the Tsakshang, and the Karsok, three small mountain-streams; but has no effluence.

TSOW, a district and town of China, in the prov. of Shan-tung, div. and 15 m. SSE of Yen-chu-fu, in N lat. 35° 30', E long. 117° 10', at the foot of mountains.

TSO-WAR, a lake of Western Tibet, in N lat. 33° 24', E long. 78°, at an alt. of about 15,000 ft. above sea-level. It has an area of a few square miles, but no apparent effluence.

TSO-YUN-HEEN, a district and town of China, in the prov. of Shan-se and div. of Suh-ping-fu, to the NE of Suh-chu, in N lat. 39° 55', E long. 112° 33'.

TSU-CHU, a district and town of China, in the prov. of Chih-le and div. of Kwang-ping-fu, in N lat. 36° 25' 15", E long. 114° 33'.

TSU-HEUNG-FU, a division and town of China, in the prov. of Yun-nan. The div. comprises 7 districts. The town is in N lat. 26° 6', E long. 101° 43' 10', on an affluent of the Kin-cha-keang.

TSU-HEUNG-HEEN, a district and town of China, in the prov. of Yun-nan and div. of Tsu-heung-fu.

TSUH-KEANG, a district and town of China, in the prov. of Chih-le, and div. of He-chu.

TSUH-LUH, a district and town of China, in the prov. of Chih-le and div. of Paou-ting-fu.

TSU-KE, a district and town of China, in the prov. of Che-Keang and div. of Ning-po-fu, in N lat. 30° 1' 24", E long. 121° 17' 20'.

TSUN, or **SUN**, a district and town of China, in the prov. of Chih-le, div. and 59 m. SSW of Ta-ming-fu, on the r. bank of the Hwae-ho, in N lat. 55° 48' 50", E long. 114° 47'.

TSUN-E-FU, a division and town of China, in the prov. of Kwei-chu. The div. comprises 5 districts. The town is in N lat. 27° 38', E long. 106° 58'.

TSUN-E-HEEN, a district and town of China, in the prov. of Kwei-chu, and div. of Tsun-e-fu.

TSUNG-CHIH, a district and town of China, in the prov. of Hu-nan and div. of Yung-shun-fu.

TSUNG-E, a district and town of China, in the prov. of Keang-se, div. and 21 m. N of Nan-gan-fu, in N lat. 25° 46', E long. 114° 2'.

TSUNG-GE, a district and town of China, in the prov. of Fo-keen, and div. of Keen-ning-fu, 45 m. NE of Shao-wu-fu, in N lat. 27° 45' 36", E long. 118° 7' 50'.

TSUNG-HWA, a district and town of China, in the prov. of Kwang-tung and div. of Kwang-chu-fu, 39 m. NE of Canton, in N lat. 23° 38', E long. 113° 37'.

TSUNG-JIN, a district and town of China, in the prov. of Keang-se and div. of Fu-chu-fu, in N lat. 27° 44', E long. 116°.

TSUNG-KING-CHU, a district and town of China, in the prov. of Sze-chuen, div. and 27 m. WSW of Ching-tu-fu, in an island of the Hwang-shin, in N lat. 30° 36', E long. 108° 48'.

TSUNG-MING, a district and town of China, in the prov. of Keang-su, on the S coast of an island of the same name, 51 m. ENE of Su-chu-fu, in N lat. 31° 36', E long. 121° 18' 30'. The houses, excepting those of the wealthier inhabitants, which are built of brick, are constructed of reeds and thatched. The island lies in the China sea, in the embouchure of the Yang-tse-kiang, which is here about 60 m. wide, and is separated from the continent by

a channel not exceeding 5 m. in width, and much obstructed by sand-banks. It is about 33 m. in length from ESE to WNW, and 9 m. in extreme width, and is intersected by numerous canals. Its SE point is in N lat. 31° 29'. The surface is level, and it possesses in some parts considerable fertility. Buffaloes, pigs, fowls, geese, wild ducks, and other aquatic birds are numerous, but the wealth of the island consists chiefly in its salt mines, which form a lucrative object of trade with the adjacent provinces. It contains several villages, and is governed by a mandarin of the third class. This island was originally a penal settlement.

TSUNG-NING, a district and town of China, in the prov. of Sze-chuen and div. of Ching-tu-fu, in N lat. 38° 35', E long. 103° 58'.

TSUNG-PING-CHU, a district and town of China, in the prov. of Shan-tung and div. of Tsan-gan-fu.

TSUNG-SHEN-HEEN, a district and town of China, in the prov. of Kwan-se and div. of Tai-ping-fu.

TSUNG-SIN-HEEN, a district and town of China, in the prov. of Kan-su and div. of King-chu, 27 m. SE of Ping-leang, on the r. bank of an affluent of the Kin-ho.

TSUNG-YANG, a district and town of China, in the prov. of Hu-pih, div. and 75 m. SSW of Wu-chang-fu, on the l. bank of a small affluent of the Yang-tsen-keang, in N lat. 29° 38' 38", E long. 113° 59' 42'.

TSUN-HWA-CHU, a division and town of China, in the prov. of Chih-le. The div. comprises two districts. The town is 90 m. ENE of Peking, between two rivers, affluents of the San-ho, and near the great wall, in N lat. 40° 11', E long. 117° 59'. This town is 4 m. in circumf., and is very populous. It is noted for its tobacco.

TSU-PING, a district and town of China, in the prov. of Shan-tung and div. of Tse-nan-fu, in N lat. 36° 56', E long. 117° 50'.

TSZE-YANG, a district and town of China, in the prov. of Shen-se and div. of Hing-gan-fu.

*. TU. For many names of which the first syllable is sometimes written with this orthography, see **TO**, **TOO**, and **TOU**.

TUA, a river of Portugal, which rises on the borders of Galicia, in the Sierra-Segundera; flows SW through the province of Tras-os-Montes; passes Miranda; and falls into the Douro on the r. bank, 15 m. NW of St. Joao-de-Pesqueira, after a course of 70 m.

TUABO, a village of Western Africa, in the kingdom of Kaen, on the Senegal, in N lat. 14° 56'.

TUAK, a small island in the Red sea, about 2 m. from the coast of Arabia, in N lat. 5° 58'.

TUAM, a parish and city in co. Galway. Area of p. 25,014 acres. Pop. in 1831, 14,219; in 1841, 13,425.—The episcopal city of T., the ecclesiastical metropolis of Connaught, and formerly a parl. borough, stands on the river Clare, 7½ m. SW by S of Dunmore, and 99½ m. W of Dublin. Its site possesses one or two undulations, which relieve it from absolute monotony. Of 1,056 inhabited houses which it contained in 1841, no fewer than 825 were mere mud cabins, and each of so many of these mud cabins as 511 had only one apartment! The stone cross, now a neglected and dilapidated monument, is one of the finest specimens of the structures of its class any where to be found in Ireland. The present cathedral of the Protestant diocese is only part of the original structure, designed on a comparatively extensive scale. The present Roman Catholic cathedral is one of the costliest, best designed, best executed, and most magnificent modern Gothic ecclesiastical edifices in the three kingdoms. It ex-

hibits, both externally and internally, all the principal and many of the minute or accessory features of the old pointed or Saracenic style of architecture; and it displays to the surrounding landscape an imposing cruciform mass, surmounted from the intersection of its nave and transept with a parapeted, pinnacled, and arch-pierced quadrangular tower. The palace or diocesan house of the bishop of T. is situated in the NE vicinity of the compact portion of the town, and is a commodious but quite plain structure. The residence of the Roman Catholic archbishop, on the opposite side of the street, is a neat and sufficiently capacious, yet comparatively unpretending house. The college of St. Jarlath, or Roman Catholic boarding and day school, principally for the training of young men for official situations in the Roman Catholic church, is a large plain building, adjacent to the archbishop's residence. The other public buildings are a Presentation nunnery, a court-house, a bridewell, a barrack, a bridge, several schools, and a work-house. T., as a seat of trade, has made more improvement during the last few years than any other inland town of Connaught. Its weekly markets are the scene of very extensive traffic, in the disposal and purchase of agricultural produce; and its daily retail business is extensive in the supply of a great and populous circumjacent country. The town has an extensive brewery, several tan-yards, several flour-mills, and some manufactories of linen and coarse canvass. Pop. of the town in 1831, 6,883; in 1841, 6,034. The bishopric of T. is little if at all known to authentic record till the middle of the 12th cent. The Church Reform act dissolved the connection between T. and Ardagh, annihilated the archiepiscopal dignity of T. and annexed to the dio. of T. the dioceses of Killalla and Achonry. The nett episcopal income of T. upon the average of 3 years ending in 1831, was £4,018; the nett episcopal income of Ardagh, held in commendam with T., was £2,977; and the episcopal income of the united sees of T., Killalla, and Achonry, under the new arrangement, is £5,000. The dio. of T. is the largest in Ireland; and comprises a great portion of co. Galway, a great portion of co. Mayo, and a considerable portion of co. Roscommon. Its area is 974,879 acres; and its pop. in 1831 was 446,703. In 1834, the pop. consisted of 44,599 Churchmen, 800 Presbyterians, 369 other Protestant dissenters, and 1,188,568 Roman Catholics.—The Roman Catholic province of T. continues to be fully recognised in the Roman Catholic hierarchical arrangements; its dioceses of Tuam, Killalla, Achonry, Elphin, and Clonfert, are severally unannexed, or have each a bishop for itself.

TUARICKS, a numerous people of Central Africa, occupying all the territory to the W and S of Sudan, as far as the Niger. They are described by Lyon as the finest race of men he ever saw; tall, erect, and handsome, with an imposing air of pride and independence. Their skin is generally white, except in those parts that are exposed to the climate, which are of a dark brown. The most remarkable feature in their costume consists in a piece of glazed cotton cloth, generally blue, with which they cover their faces as high as the eyes, and which hangs down on the breast below the chin: not to interfere with this, the beard is generally clipped very close. They wear turbans, generally blue, surmounted by high red caps; while the body is generally covered with a loose shirt of blue cotton. Their swords are straight, and of great length, and are wielded with much ease and dexterity. From the left wrist is suspended a dagger, without which no T. is ever seen: he also usually carries a light elegant spear about 6 ft. in length; but in active warfare they have three longer and heavier spears, and a strong lance, all fastened behind their saddles. They sometimes also carry a long gun, and are considered sure marksmen. They speak the Berber language. Their purifications are performed with sand. Among the most powerful tribes of T. are the Ghraat, who inhabit the neighbourhood of Ghadames; the Kollavi, who possess the kingdom of Asben, of which Aghades is the capital; and the Tagama, who immediately border on Sudan.

TUAT, or **TWAT**, an oasis of Northern Africa,

in the Sahara, forming in fact a large tract of country, inhabited chiefly by Tuaricks, between the parallels of 26° and 29° N. Its inhabitants consist of two distinct races, one calling themselves Zenates, of a Negro complexion; the other consisting of Arabs. They trade in *henna*, dates, butter, cheese, slaves, gunpowder, and antimony, with Timbuctu, Ghadames, and Fezzan, but seldom go so far E as Bornu. The principal town, called Ain-el-Salah, is situated on the N frontier, 40 days' journey from Murzuk, and 50 from Timbuctu.

TUBA, a small river of Asiatic Russia, which falls into the Yenisei, 16 m. SW of Abakansk.

TUBAGE, a large and deep river of New Granada, in the prov. of San-Juan-de-los-Llanos, which enters the Orinoco a little lower than the Meta.

TUBAI, or **MORUTTI**, a small low island in the Society group, 80 m. NE of Maurua. It is the most northerly island of the group.

TUBAL, a river of Chili, which flows through a fine district into Arauco bay, in 8 lat. 37° 14'.

TUBARAM (CAPE), a headland of the Brazilian coast, in 8 lat. 20° 16'.

TUBARAO (CAPE), a headland of the Brazilian coast, in 8 lat. 5° 10'.

TUBERGEN, a town of Holland, in the prov. of Overijssel, 5 m. WNW of Ootmarsum.

TÜBINGEN, a town of Württemberg, situated on the l. bank of the Neckar, where it receives the Ammer, 18 m. S by W of Stuttgart, and 59 m. E of Strasburg. Pop. 7,500, who are partly employed in woollen and linen manufactures; but the chief income of the place is derived from its university, founded in 1477. It was originally a Protestant institute, but after the numerous accessions of territory inhabited by Catholics, the separate university erected for that profession at Elwangen was suppressed, and replaced by an admittance to T., which is now the only university in the Württemberg dominions. The number of students in 1846 was 863. There are here also a theological foundation for educating 150 persons as clergymen or schoolmasters, and a separate seminary for the sons of families of rank. The university has a library of 150,000 vols., and a botanical garden.

TUBISE, a small town of Belgium, 16 m. SSW of Brussels, on the river Senne, and the railway to Mons. Pop. 2,360.

TUBNA, a town of Algiers, 110 m. SSW of Constantinople, the representative of the ancient *Tubuna*.

TUBNEY, a parish of Berkshire, 4 m. W by N of Abington. Area 1,220 acres. Pop. in 1831, 167.

TUBCEUF, a town of France, dep. of La Mayenne, 17 m. NE of Mayenne.

TUBRID, a parish in co. Kilkenny, 3½ m. ESE of Piltown. Area 1,004 acres. Pop. in 1841, 241. —Also a parish in co. Tipperary, 2½ m. SSW of Cahir. Area 12,572 acres. Pop. in 1841, 4,874.

TUBBRIDBRITTAIN, a parish in co. Kilkenny, 3½ m. SE of Urlingford. Area 4,140 acres. Pop. in 1831, 1,103; in 1841, 1,293.

TUBURBO, a town of Tunis, 16 m. WNW of the city of Tunis, supposed to be built on the site of the ancient *Tuburbum*. It was a favourite spot of the late bey, who was at great pains in establishing plantations of fruit-trees here.

TUCACAS-POINT, a low swampy point of land on the coast of Venezuela, forming the N extremity of the gulf of Trista, and 25 m. from the mouth of Porto-Cabello.

TUCAPEL-POINT, a low projecting rocky point on the coast of Chili, 8 m. NW of Molguilla-point, and 7 m. SSE of a high bold hill known as Tucapel-head.

TUOCABER, a small town of Tunis, situated on the river Mejerdeh, 24 m. W of Tunis.

TUCHAN, a town of France, dep. of the Aude, 16 m. N by W of Perpignan.

TU-CHANG, a district and town of China, in the prov. of Keang-se, and div. of Nan-kang-fu, 39 m. NW of Jao-chu-fu, on the E bank of Lake Po-jang, in N lat. 29° 20' 24", and E long. 116° 18' 12".

TUCHEL, a town of West Prussia, on the Brahe, 25 m. W of Culm. Pop. 1,800. It has a trade in horses and cattle.

TUCHEN, a village of Prussian Saxony, in the duchy of Magdeburg, near Jerichow. Pop. 1,000.

TUCKER'S ISLAND, an island of the United States, near the coast of S. Carolina, in N lat. 32° 36'.—Also a small island in the N. Pacific, in N lat. 7° 22'. It is from 2 to 3 m. in circumf. The natives, about 300 in number, are of a dark copper colour.

TUCKEREAH, a town of Algiers, 106 m. S of the city of Algiers, the representative of the ancient *Figava*.

TUCKERSVILLE, a village of Wayne co., Georgia, U. S.

TUCKERTON, a port of Burlington co., New Jersey, U. S., near the S end of Little Egg harbour bay, 45 m. SE by S of Trenton.

TUCKUM, a town of European Russia, in Courland, near the Baltic, 23 m. NNE of Mittau.

TUCOMBIRA, a river of Brazil, which runs S, and changing its course to the E, enters the sea, 21 m. N of Los Ilheos.

TUCOPIA, an island in the S. Pacific, in S lat. 12° 21', E long. 168° 43', discovered by Quiros in 1606. It is about 7 m. in circuit, and has a pop. of about 400.

TUCUMAN, a prov. of the Plata confederation, bounded on the NE by Salta; on the E by the Gran-Chaco; on the S by Santiago; and on the SW by the Pampas or territories inhabited by the Aucaes, Huarcas, or Pampas, Pihuenches, Puelches, Uncos, and other tribes which wander over the plains and mountains adjacent to Chili. Its surface is mountainous towards the W. The great chain of the Andes, which borders and sends forth branches into Tucuman, is so high in some parts as to reach the region of perpetual snow. In it there are several mines, formerly worked by the Spaniards, and also many vestiges of the mining operations carried on by the Peruvians. The rivers of T. are numerous; the principal are the Vermejo, the Salado, the Xuxuy, the Dulce, and the Quarto. Numerous shallow lakes occur in this province, produced by the overflowing of the rivers; but they have the singular quality of being mostly saline, particularly those in the neighbourhood of the Rio-Vermejo. Vast plains also occur which are covered with fossil salt; and there is scarcely a river in the whole country of which the waters are not brackish. The climate is hot in those parts farthest from the main chain and branches of the Andes; but in general the seasons are regular, and the soil prolific, producing all sorts of grain, and esculent plants and fruits in abundance, besides immense tracts of excellent pasture for the innumerable herds of cattle, mules, and horses which are reared in this prov. Cotton, vines, tobacco, cacao, cochineal, indigo, and flax, are cultivated; but none of these articles enter into the export trade, which chiefly consists of cattle and timber. Honey and wax are also plentifully produced. The forests, which overspread a great part of it, contain good timber, which forms one great article of its trade, supplying Santa-Fe, Buenos Ayres, and other towns, with boards, which are conveyed in carts drawn by oxen. It also supplies

the timber necessary in the mining operations at Potosi. The box, laurel, pine, dragon-tree, walnut, palm, and cedar are found in the forests of T. The deserts and forests abound with all kinds of game and wild animals, as pumas, jaguars, ant-bears, bears, wild hogs, elks, deer, hares, rabbits, armadillos, guanacos, and vicunas. The American ostrich or cassowary frequents the plains. The boa, called in this country *ampolaba*, is often seen in the forests, and appears, when lying among the grass, like the huge trunk of an old tree: besides the boa, there are also rattle-snakes, vipers, and other reptiles common to warm climates. Mules constitute the great article of commerce. These animals are bought in Cordova, Santa-Fe, and Buenos Ayres; and being fattened during the winter in the valleys and plains, are driven to Peru. The amount of the pop. including the converted Indians, is about 50,000. The Jesuits formed about 24,000 of the natives into a militia, to repel the invasion of the Chaco Indians; but they are now employed in cultivating the land.—The capital and chief towns of this prov. are T., Cordova, Rioxa, Jujuy, Santiago, Londres, and Salta, with 38 other towns and villages, and 10 missions.—The Spaniards conquered this district after finishing the subjugation of Peru; and Diego-de-Roxas was its first discoverer in 1543.

TUCUMAN, or **SAN MIGUEL-DE-TUCUMAN**, the capital of the above prov., is situated in S lat. 27° 10', in a pleasant plain, having a mild climate and producing abundance of fruits and grain. It contains a cathedral, a convent of Franciscans, and a college which was built by the Jesuits. It has a trade in mules; but its principal traffic consists in oxen for travelling waggons, and in the waggons themselves. There are silver mines in its neighbourhood. San-Miguel is the see of a bishop who resides at Cordova. The pop. is about 8,000.

TUCUMANILLA, a settlement in the state of Tucuman, 10 m. W of the capital.

TUCUMARE, a river which has its rise in the extensive plains which bound the Amazon, and falls into the Madeira, between the rivers Yamari and Macacipe.

TUCUPIO, a river of Venezuela, in the prov. of Cumana, which runs S, and unites with Curuma, an affluent of the Cuyuri.—Also another river of Venezuela, which takes its rise in a plain W of Guanare, and joining the Guanarito, falls into the Portuguesa.

TUCURAI, a large river of Ecuador, in the prov. of Mainas, which falls into the Huallaga.

TUDDENHAM, a parish of Suffolk, 3 m. NE by N of Ipswich. Area, 1,239 acres. Pop. in 1831, 369; in 1851, 425.—Also another parish in the same county, 3 m. SE by S of Mildenhall. Area 2,646 acres. Pop. in 1831, 388; in 1851, 479.

TUDDENHAM (EAST), a parish of Norfolk, 6 m. ESE of East Dereham. Area 2,065 acres. Pop. 589.

TUDDENHAM (NORTH), a parish in the above co., 4 m. E by S of East Dereham. Area 2,270 acres. Pop. in 1831, 399; in 1851, 430.

TUDDEREN, a village of Prussia, in the prov. of the Rhine, and 18 m. NNW of Aix-la-Chapelle, on the r. bank of the Suster. Pop. 400.

TUDELA, a city of Spain, in the prov. and 48 m. NW of Saragossa, at the confluence of the Queiles and the Ebro. Pop. 7,400. It is the second city in Navarre, and a bishop's see. A fine bridge of 17 arches across the Ebro, beautiful walks, and an advantageous situation, give it a picturesque appearance; but the interior is spoiled by the narrowness of the streets. The houses are lofty and well-built, and there is a good plaza. The adjacent country is fertile in corn, fruit, hemp, having also good pasturage; and the greater part of the pop. is employed

in agriculture. T. was in 1814 the scene of a defeat of the inhabitants of Navarre by the Castilians, and in 1808, of a more serious overthrow of the Spaniards under Castanos, by the French under Le-fevre and Mathieu.

TUDELA-DE-DUERO, a town of Spain, on the Douro, 5 m. E of Valladolid. Pop. 1,500.

TUDELEY, a parish of Kent, 2 m. E by S of Tunbridge. Area 1,605 acres. Pop. in 1851, 642.

TUDELLILLA, a village of Spain, in the prov. and 24 m. SE of Logrono. Pop. 1,000.

TUDERGA, a village of Asiatic Turkey, 32 m. NNE of Eski-Shehr.

TUDHOE, a township in Brancepeth p., co.-palatine of Durham, $\frac{1}{2}$ m. SSW of Durham. Area 1,699 acres. Pop. in 1851, 400.

TUDUAL (SAINT), a commune and village of France, in the dep. of Morbihan, cant. and 6 m. WNW of Guemene. Pop. 2,000.

TUDURA, a town of Hindostan, in the prov. of Mysore, on the W bank of the Tunga, in N lat. $13^{\circ} 40'$.

TUDY (SAINT), a parish of Cornwall, $\frac{1}{2}$ m. N by W of Bodmin. Area 3,257 acres. Pop. in 1851, 652.

TUEJAR, a town of Spain, in the prov. and 45 m. NW of Valencia, on the l. bank of the Chelva. Pop. 1,700.

TUERTO, a river of Spain, which rises near La-Espina-de-Tremor, in Leon, and flows, in a S and SE course of 32 m., passing Astorga and Celada, to the Orvigo, which it joins on the r.

TUFARA, a town of Naples, in the prov. of San-nio, 6 m. E of Reccia. Pop. 2,400.

TUFFE, a town of France, dep. of Sarthe, on the river Vimet, an affluent of the Huine, 20 m. NE of Mans. Pop. 1,590. It has pottery-manufactories.

TUFFER, or **LASHKU**, a town of Austria, in Styria, on the Save, 4 m. S of Cilly. In the neighbourhood are found coal and chalk.

TUFFLEY, a hamlet of St. Mary-de-Lode p., in Gloucestershire, 2 m. SSW of Gloucester. Pop. in 1851, 131.

TUFILLO, a town of Naples, in Abruzzo-Citra, 15 m. SSW of Il-Vasto, near the l. bank of the Trigno. Pop. 900.

TUFINO, a village of Naples, in the Terra-di-Lavoro, 3 m. NE of Nola. Pop. 1,000.

TUFO, a village of Naples, in Abruzzo-Ultra 2da, 5 m. N of Carsoli. Pop. 720.—Also a village of Principato-Ultra, 6 m. N of Avellino. Pop. 950.

TUFTON, a parish of Southamptonshire, 1 m. SW of Whitchurch. Area 1,552 acres. Pop. in 1831, 197; in 1851, 163.

TUFTONBOROUGH, a township of Strafford co., New Hampshire, U. S., on the E side of Lake Winnipiseogee, 34 m. NNE of Concord. Pop. 1,305.

TUFUA, an island in the S. Pacific, one of the Friendly group. It is volcanic, and visible from Annamuka.

TUGBY, a parish of Leicestershire, 12 m. E by S of Leicester. Area 1,830 acres. Pop. 865.

TUGELA, or **TUKELIA**, a division of the Natal colony in S. Africa, bounded on the N and E by the Klip river; on the S by Impafane; and on the W by the Kathlamba mountains.

TUGELOO, a river of the United States, in Georgia, one of the branches of the river Savannah, which joins the Keowee, 48 m. NW of Petersburg.

TUGFORD, a parish of Salop, 11 m. NNE of Ludlow. Area 1,320 acres. Pop. in 1851, 157.

TUGGEN, a village of Switzerland, in the cant. and 18 m. NE of Schwytz, near the river Linch.

TUGGURT, the principal village in the Rouara district, on the borders of the Sahara, in N lat. $33^{\circ} 24'$, E long. $5^{\circ} 30'$. It consists of about 500 houses, and is inhabited by an industrious and trading com-

munity. The environs are well cultivated.—Also a village of Tunis, 60 m. SW of the capital.

TUGHLIKABAD, a ruined town of Hindostan, 19 m. S of Delhi.

TUGLIE, a town of Naples, in the prov. of Terra-d'Otranto, 7 m. E of Gallipoli. Pop. 1,000.

TUH-SHAN-CHU, a district and town of China, in the prov. of Kwei-chu, div. and 38 m. S of Tu-yun-fu, on the l. bank of the U-kea, in N lat. $25^{\circ} 45'$, and E long. $107^{\circ} 20'$.

TUI, a small river of Venezuela, in the prov. of Cumana, a head-stream of the Arui.

TUICHI, a river of Peru, in the prov. of Apolabamba, which runs NE, and enters the Beni.

TUILE (LA), a village of Savoy, 7 m. WSW of Albigny. Pop. 900.

TUIRA. See **SANTA-MARIA**.

TUIRAN. See **TOIRAN**.

TUK, a village of Upper Egypt, on the l. bank of the Nile, 6 m. N of Negade.

TU-KANG-CHU, a town of China, in the prov. of Kwan-se, in N lat. $23^{\circ} 4'$, and E long. $106^{\circ} 45'$.

TU-KEANG-TING, a district and town of China, in the prov. of Kwei-chu, and div. of Tu-yun-fu.

TU-KE-CHU, a town of China, in the prov. of Kwan-se, and div. of Tse-ping-fu, in N lat. $28^{\circ} 10'$, and E long. $107^{\circ} 8'$.

TULA, a government of Russia, bounded on the N by that of Moscow; on the E by Riazan; on the S and SW by Orel; on the W by Kaluga. It extends from $52^{\circ} 30'$ to 55° N lat., and has a surface of 8,900 geog. sq. m., with a pop. in 1850 of 1,251,500. Its surface presents a vast undulating plain, intersected by the Oka on the NW, and centrally by the Upa. The soil is in general of good quality; and there is here more of tillage and less of pasturage than in most of the other provinces of the empire. Rye, barley, oats, hemp, and flax are largely grown. Iron is manufactured; and woollens and linen are made for home-consumption. Exports of agricultural produce take place by the rivers Oka, Upa, Don, and Plava, and the Ivanovska canal which unites the Don and the Upa.

TULA, the capital of the above government, is situated at the confluence of the Tulpa and the Upa, in N lat. $54^{\circ} 11'$, 115 m. S of Moscow. This place, the pop. of which now approaches to 40,000, has been called the Sheffield of Russia. Here is a cannon-foundry, and a manufactory of arms for government of great extent, and in the town there are about 800 workshops for making firearms and cutlery for private use. The ore is obtained in abundance from the vicinity, but the best quality of ore used here is brought from Siberia. The other establishments of the place are tanneries, breweries, and soap and candle works. T. has likewise a traffic in corn, hemp, and other produce of the neighbourhood. The public buildings are the churches, the residence of the bishop, the courts of justice, the hospitals, a gymnasium, a seminary for priests, and a theatre. T. was founded in the beginning of the 16th cent., but it was not till 1717, that the government manufactory of arms was established here by Peter I. The river Don has its rise in the lake of Ivanou, at a short distance.

TULA, a town of Mexico, in the state and 40 m. NNW of Mexico, in N lat. $19^{\circ} 57'$, at an alt. of 2,244 yds. above sea-level, on a river of the same name, an affluent of the Tampico.

TULANZINGO, a town of Mexico, in the state and 54 m. NE of Mexico.

TULARE, a county of California, U. S., lying around a large lake of the same name [see article CALIFORNIA]. Pop. in 1852, 8,575, of whom 8,408 were Indians. There are two equally good pasces

through the mountains into the great Tulare valley, viz.: Walker's pass, near the head-waters of Kern river, which affords an entrance into the valley somewhat to the N of its upper or southern extremity, and the Tejon or Tayhona pass, which lies at the point of junction of the Sierra-Nevado and the coast-range. This is the pass through which the valley is usually entered, either from the Great Salt lake desert or from the valley of Los-Angeles. It has frequently been called Walker's pass. Lake Buenavista, or Kern lake, is about 15 m. to the N of this pass, and it is emphatically at the head of the Tulare valley. Walker's pass is little known.

TULCZYŃ, a town of European Russia, in the gov. of Wilna, 14 m. S of Braslav.

TULGOM, or TULGONG, a town of Hindostan, in the prov. of Aurrangabad, in N lat. 18° 46', E long. 74° 40'. This place was the scene of the defeat of the Bombay army in 1778, and the subsequent disgraceful convention.

TULJAPUR, a town of Hindostan, in the prov. of Aurrangabad, in N lat. 18° 17'. It stands upon a hill, and contains a number of Hindu temples, the principal of which is dedicated to Bhavany.

TULLA, or TULLAGE, a parish and town in co. Clare. Area of p. 24,531 acres. Pop. in 1831, 1,514; in 1841, 8,748. Lough Cullaunyeeda on the S boundary, has a surface-elevation above sea-level of 97 ft.; Loughs Roalara and Cloondanagh, in the interior, have surface-elevations of respectively 141 and 177 ft.—The town is 7½ m. E by N of Enniscorthy. Pop. in 1831, 874; in 1841, 1,317.

TULLAGH, a parish on the coast of co. Cork, containing the village of Abbeystand, the small port of Baltimore, and the island of Innisharkin. Area 5,349 acres. Pop. in 1841, 8,690.

TULLAGHAN, a village in the p. of Rossinver, co. Leitrim, 2½ m. WSW of Bundoran.—T. bay opens immediately E of the headland which screens the E side of Blacksod bay, has an entrance width of 2½ m., and penetrates the land NNE 5½ m.

TULLAGHANBROGUE, or GROVE, a parish in the co. and 4 m. SW of Kilkenny. Area 3,487 acres. Pop. in 1831, 627; in 1841, 1,078.

TULLAGHANOGUE, a parish in co. Meath, 2½ m. SE of Athboy. Area 1,414 acres. Pop. 178.

TULLAGHER, or TULLOGHER, a village in the p. of Dysertmoon, co. Kilkenny, 3½ m. S of Innishkeen. Pop. in 1831, 170; in 1841, 187.

TULLAGHERIN, or TULLOWHERIN, a parish in co. Kilkenny, 3½ m. SW by S of Gowran. Area 5,062 acres. Pop. in 1831, 895; in 1841, 976.

TULLAGHLEASE, or TULLILEASE, a parish in co. Cork, 7 m. NNE of Newmarket. Area 8,292 acres. Pop. in 1831, 2,368; in 1841, 3,278.

TULLAGHMAIN. See TULLAMAIN.

TULLAGHMEELAN, or TULLOGHMEELAN, a parish in co. Tipperary, 4½ m. SW by W of Clonmel. Area 2,695 acres. Pop. in 1831, 1,100; in 1841, 1,155.

TULLAGHNISKEN, TULLANISKEN, or TULLYNISKEN, a parish in co. Tyrone, 3 m. NNE of the town of Dungannon. Area 4,461 acres. Pop. 4,106.

TULLAGHOBIGLY, or RYETULLAGHOBIGLY, a parish in co. Donegal, 6 m. SW of Dunfanaghy. Area 68,608 acres. Pop. in 1831, 8,466; in 1841, 9,049. About one-fourth of the surface is arable land; all the vast remainder is very mountainous, moorish, or boggy. The summit of Errigal, situated in the E, has an alt. above sea-level of 2,462 ft.; the summit-ground of the peninsula which terminates in Bloody-Foreland, has an alt. of 1,085 ft.

TULLAGHOG, or TULLYHOG, a village in the p. of Desertright, co. Tyrone, 2 m. SSE of Cookstown. Pop. in 1831, 137; in 1841, 103.

TULLAGHORTON, a parish in co. Meath, 2 m. E by N of Clogheen. Area 6,889 acres. Pop. 2,198.

TULLAGHOUGHT, or TULLOGAUGHT, a parish in co. Kilkenny, 2½ m. SSW of Kilmaganny. Area 4,601 acres. Pop. in 1831, 1,563; in 1841, 1,750.

TULLAMAIN, a parish in co. Kilkenny, 2 m. NE of Callan. Area 1,171 acres. Pop. in 1831, 416; in 1841, 294.—Also a parish in co. Tipperary, 8 m. W of Fethard. Area 2,217 acres. Pop. 688.

TULLAMORE, the capital of King's co., in the p. of Kilbride-Tullamore, on the Grand canal, and a small affluent of the river Clodagh, 5½ m. S of Kilbeggan, and 46½ m. W by S of Dublin. The site and the immediate environs of T. are a sort of oasis in the vast tract of morass which bears the name of the bog of Allen. The streets are regular and wide. The gaol and the court-house—usually the most conspicuous objects in an Irish county town—form a pleasing feature in T., standing adjacent to each other on a raised platform at the W end of the town, and displaying with effect their respective styles of architecture, the one castellated and the other Grecian. T., in consequence both of its position on the Grand canal, and its central situation in reference to the surrounding country, is a place of considerable business. It is the principal town and chief shipping-station on the entire line of the canal, and besides being touched by all the boats in transit to Dublin from both Ballinasloe and the Shannon, it has swift iron passage-boats of its own in communication with the metropolis. Pop. 6,342.

TULLAROAN, a parish in co. Kilkenny, 4½ m. SSW of Freshford. Area 12,359 acres. Pop. in 1831, 3,962; in 1841, 3,490. The village of T. at present consists of a few cabins, and the neighbourhood entirely depends for interest on the ruins of ancient buildings, and the tales of other times.

TULLE, a town of France, the capital of the dep. of Corrèze, situated at the confluence of the Corrèze and the Solane, partly on the declivity, partly at the foot of a mountain, 42 m. SE of Limoges, in N lat. 45° 16'. Pop. in 1789, 7,774; in 1836, 9,700; in 1846, 11,646. It is badly built, having crooked and angular streets, and no public buildings except its churches and hospital. Its pop. is employed partly in the manufacture of woollen stuffs and paper, partly in preparing brandy, chocolate, and liquors; and to a considerable extent, in a large government manufactory, of fire-arms.—The arrond. has an area of 255,864 hectares, with a pop. in 1846 of 136,999; and comprises 11 cantons.

TULLIALLAN, a parish in the detached district of Perthshire, bounded on the SW by the frith of Forth. Area 2,760 acres. Pop. in 1831, 3,043.

TULLIG, a village in the p. of Kilballyowen, co. Clare, situated in a bleak district of country, 8 m. WNW of Carrigaholt. Pop. in 1841, 269.

TULLIG-POINT, a small headland on the N coast of co. Clare, 1½ m. W by S of the village of Tullig.

TULLILEASE. See TULLAGHLEASE.

TULLINS, a town of France, dep. of Isère, situated in a rich and beautiful country, 14 m. NE of St. Marcellin. Its inhabitants, amounting to 2,400, are employed partly in the manufacture of hemp and thread, partly in iron and steel-works.

TULLIVIN. See TULLYVIN.

TULLIN, a walled town of the archd. of Austria, on the r. bank of the Danube, 14 m. NW of Vienna. Pop. 1,700.

TULLOCH, a village in the parish and 2 m. NW of the town of Perth, notable as the site of the first Scottish bleachfield, and the place where the first potatoes produced in Scotland were grown. Pop. 200.

TULLOE. See TULLA.

TULLOGHER. See TULLAGHER.

TULLOW, or **TULLOPHELM**, a parish in co. Carlow, containing on its W margin, a part of the town of Tullow. Area 7,989 acres. Pop. in 1831, 3,688; in 1841, 4,478.—The town stands on the river Slaney, $\frac{1}{2}$ m. SSW of Rathvilly. Pop. of the town in 1831, 1,929; in 1841, 3,097.

TULLOWGREEN, or **TULLOWCRINE**, a parish in co. Carlow, 2 m. N of Leighlin-bridge. Area 5,899 acres. Pop. in 1831, 1,844; in 1841, 1,492.

TULLOWMAGRIMAH, or **TULLOWMAGIMMA**, a parish in co. Carlow, $\frac{3}{4}$ m. SSE of Carlow. Area 4,063 acres. Pop. in 1841, 1,125.

TULLOWMOY, a parish in Queen's co., $\frac{3}{4}$ m. SSE of Stradbally. Area 6,007 acres. Pop. 1,675.

TULLY, or **TULLYFERRE**, a parish in co. Donegal, containing the villages of Millford and Ramelton. Area 16,612 acres. Pop. in 1841, 6,141.

TULLY, **TULLOW**, or **BULLOCK**, a parish in co. Dublin, 3 m. S of Kingstown, containing part of the village of Cabinteely. Area 3,285 acres. Pop. in 1831, 1,385; in 1841, 1,207.

TULLY, or **COGLANSTOWN**, a parish in co. Kildare, consisting of four mutually detached districts in the baronies of Kilcullen, East Ophaly. Area 5,164 acres. Pop. in 1831, 1,065; in 1841, 1,279.

TULLY, a hamlet in the p. of Ballinakill, co. Galway, $\frac{1}{2}$ m. SE of Renvyle-house.

TULLY, a township of Onondaga co. in New York, U. S., 123 m. W by N of Albany. Pop. 1,559.—Also a village of Lewis co., in Missouri, 112 m. N by E of Jefferson.

TULLYALLEN, a parish, partly in co. Meath, but chiefly in co. Louth, containing part of the town of Drogheda. Area 8,298 acres. Pop. 4,642.

TULLYBRACKEY, or **TULLABRACCA**, a parish in co. Limerick, $\frac{2}{3}$ m. N by E of Bruff. Area 3,209 acres. Pop. in 1831, 1,487; in 1841, 1,473.

TULLYCANNA, a village in the p. of Ambrossetown, co. Wexford, 3 m. N by W of Duncormuck. Pop. in 1841, 123.

TULLYCORBET, a parish in co. Monaghan, 3 m. N of Ballybay. Area 7,928 acres. Pop. 5,096.

TULLYLISH, a parish in co. Down, containing the village of Gilford. Area 11,707 acres. Pop. in 1831, 10,501; in 1841, 12,660. The river Bann passes westward through nearly the centre, in a sinuous course, along a valley of charming features. Three principal localities of manufacture along the course of the river, are the hamlet of Hall's Mills, noted so far back as a century ago, for a very extensive bleaching-green; the village of Gilford, in the centre, whose linen, flax-spinning, and bleaching trade may be regarded as a department or branch of the prosperous and interesting trade of Banbridge; and the little village of Moyallen in the west, whose environs are noted for their bleach-fields and their vitriol-works.

TULLYNAKILL, a parish of co. Down, $\frac{3}{4}$ m. SE by S of Comber, containing the village of Ardmillan. Area 2,923 acres. Pop. in 1841, 1,416.

TULLYNESSLE-AND-FORBES, a united parish nearly in the centre of Aberdeenshire. Pop. 930.

TULLYRUSK, a parish in co. Antrim, $\frac{3}{4}$ m. ENE of Glenavy. Area 4,779 acres. Pop. 1,304.

TULLYVERY, a village in the p. of Killyleagh, co. Down. Pop. in 1841, 752.

TULLYVIN, a village in the p. of Kildrumsherdin, co. Cavan, $\frac{2}{3}$ m. SW by W of Cootehill. Pop. in 1841, 112.

TULMERO, or **TURNERO**, a town of Venezuela, situated in the valley of Arogoa, 36 m. E of Valencia. Pop. 8,000. It is well built, and the residence of a number of planters; but was, under Spanish regime, peculiarly the abode of all the officers, fac-

tors, and persons employed in the administration of the monopoly of tobacco, cultivated in its vicinage, on account of the king.

TULPEHOCKEN, a township of Berks co., Pennsylvania, U. S., 42 m. N by E of Harrisburg, on the N side of the Tulpehocken, a stream which runs E into the Schuylkill, above Reading. Pop. 1,800.

TULSK, a post village, and formerly a parl. borough, in the p. of Ogulla, co. Roscommon, $\frac{1}{2}$ m. SSW of Elphin. Pop. in 1841, 133.

TU-LU-FAN-TING, a district and town of China, in the prov. of Kan-suh, and div. of Chin-se-fu.

TULUMBAH, a town of Hindostan, in the prov. of Multan, on the SW bank of the river Ravi, in N lat. 30° 58'.

TULUMBO, a village of Central Africa, in Bambarra, on the N bank of the Niger, 50 m. SE of Bambarra.

TULUN, a village of Asiatic Russia, in the gov. of Irkutsk, on the Ija, 44 m. E of Nizni-Udinsk.

TULWUNDY, a town of Hindostan, in the prov. of Lahore, in N lat. 31° 15'. This place is celebrated for having been the birth-place of Baba Nanoc Shah, the founder of the religion of the Sikhs.

TUMA, a village of the archd. of Austria, 9 m. SSE of Zlabings, on an affluent of the Theya.

TUMACO, an island in the N. Pacific, lying off the coast of Ecuador, in N lat. 1° 46'. It is 2 m. long from SE to NW, and 1 m. broad. It has a port.

TUMAS MOUNTAINS, a range of mountains in S. Africa, in the Damara territory, a little to the N of the parallel of 23° S, and intersected by the meridian of 16° E. They run NW and SE, and attain an alt. of 2,000 ft. above sea-level.

TUMAT, a river of Abyssinia, which appears to have its origin between Singe and Fazool, and flows N to the Bahr-el-Azrek.

TUMBADO, a small island in the Bahamas, in N lat. 26° 24', 48 m. NNW of Grand Bahama.

TUMBELAN ISLANDS, a cluster of small islands in the Eastern seas, in N lat. 1°.

TUMBEZ, a village of Peru, in the prov. of Piura, situated on the Rio-Tumber, 280 m. N of Truxillo. It is seated in a sandy plain, and consists of about 50 houses, chiefly inhabited by Mestizoes and Indians, who supply whalers with fresh water, fruit, and vegetables. T. was the place where the Spaniards first landed in 1526.

TUMBEZ, or **SARAGURA**, a river of Peru, which rises in the Andes, and empties itself into the gulf of Guayaquil, opposite the island of Santa-Clara, or Amortajado. By it launches, flat-bottomed boats, and other small vessels, pass as far as the above settlement on its banks; but in winter it cannot be navigated on account of the great current arising from the extraordinary increase of its waters. The river traces the boundary between the states of Peru and Ecuador.

TUMBIA, a settlement of New Granada, in the prov. of Pasca, 24 leagues from Santa Fe.

TUMBUDRA, a river of Hindostan, formed by the junction of the Tungba and the Bhudra, both descending from the Western Ghauts, in Mysore; and flowing into the Kistna, 18 m. below Kurnel, after a course of 350 m.

TUMBUK, a town of Kordofan, 180 m. SW of Sennaar.

TUMBY, a township of Kirkby-upon-Bain p., Lincolnshire, 7 m. S by W of Horncastle. Pop. in 1831, 322; in 1851, 339.

TUMCURU, a town of Hindostan, in the prov. of Mysore, in N lat. 13° 15'. It is a place of some consequence, and is defended by a good fort.

TUMEN, a small town of Ghilan, in Persia, 18 m. W of Reshd.

TUMENE, a district of Tobolak, in Asiatic Russia, with a town of the same name, situated on the S bank of the Tura, at its confluence with the Tumenka, in N lat. 57°. It was built in 1586, upon the site of a Tartar town, of which traces still remain. There is a suburb on the opposite side of the river, chiefly inhabited by Tartars and Bukharians. The place contains 800 houses, with several churches, a convent, and nunnery. Its wealth arises chiefly from a foundry of bells, manufactures of soap, and considerable tanneries. It was the first town built by the Russians in Siberia.

TUMIRIQUIRI, a mountain of Venezuela, in the prov. and 30 m. SSE of Cumana, near Cumanacoa, on the road to Caripe, the chief mission of the Chaymas, which passes over the summit of a lower part of the chain, which bears the general name of the Cocollar. From the summit of this last chain, at more than 2,000 ft. in height above the plain, the eye wanders over the immense plains which reach towards the banks of the Orinoco, in the ravines alone of which can be distinguished any trees, and these but thinly scattered; the remainder of the surface is covered with an uniform coat of long waving grass, intermixed with flowering shrubs. From this point the traveller ascends towards the Tumiriquiri, by a road which is partly traversed on horseback, but soon becomes too steep and slippery for these animals. The round summit of the T. is covered with turf, and is elevated more than 4,400 ft. above the ocean. This elevation gradually diminishes towards the W by a ridge of steep rocks, and is interrupted at the distance of a mile by an immense crevice, which descends towards the gulf of Cariaco. Beyond this two enormous peaks arise, the northernmost of which, named the Cucurucho of T., is more than 6,500 ft. in height, surpassing that of the Brigantin, with which it is connected. These peaks are covered with mahogany, javillo, and cedar trees, of an enormous size. The view from their summit is very fine. The chain, which extends from W to E, is seen in all its forms; its ridges running parallel to each other at short distances, forming longitudinal valleys, intersected by crevices worn by the waters in their passage to the Orinoco or the sea; the sea bounds the prospect on the N; and an immeasurable plain forms its horizon on the S.

TUMLUK, a town of Bengal, situated on the SW side of the Rupnarain river, in N lat. 22° 17'. It is the station of the superintendent of the salt manufacture on the banks of the Hugli. The country in the vicinity is very low, and requires strong embankments to preserve it from being overflowed by the rivers during the rainy season.

TUMMEL, the lower part of the northern great head-water of the Tay, in Perthshire. It is generally described by topographers as issuing from Loch-Rannoch, and expanding, near the middle of its course, into Loch-Tummel; but the stream between the two lakes really bears the name of the Rannoch, and only that between Loch-Tummel and the confluence with the Tay strictly claims to be the Tummel. Its length of run, thus limited, is only about 12 m., or, including sinuosities, 15 or 16 m.

TUMNA, **TOOMNA**, or **TOEMONIA**, a parish in co. Roscommon, extending along the r. bank of the Shannon, containing the village of Battle-Bridge. Area 9,183 acres. Pop. in 1841, 4,180.

TUMORE, a parish in co. Sligo, 3½ m. SE of Ballymote. Area 10,834 acres. Pop. in 1841, 3,319.

TUMUN, a town of Hindostan, in the prov. of Malwah, on the banks of the Batmah, in N lat. 25° 8'.

TUNA, a small island of Lower Egypt, in Lake

Menzaleh, 8 m. SE of Tennis.—Also a town of the island of Porto-Rico, on the l. bank of the Quaxalaca. Pop. 1,400.—Also a small river of Brazil, in the prov. of Pernambuco, which runs E, and falls into the sea between the rivers Ilheos and Piratininga.—Also a village of Sweden, in the prefecture of Stara-Kopparberg, 15 m. SSW of Fahlun.

TUNBRIDGE, or **TONBRIDGE**, a parish and market-town in Kent, 13 m. WSW of Maidstone, on the river Medway, here divided into five branches, over which it has as many bridges; and intersected by the South-Eastern railway, which has a principal station here at the distance of 40 m. from London. Area 15,235 acres. Pop. in 1831, 10,380; in 1851, 16,548.—The town consists principally of one long and in some parts wide street. Pop. in 1851, 4,539. The Medway crosses it near the S end. The town-hall is a plain building. The principal architectural object in the town is the free grammar-school. There are some very ancient houses. The ruins of the castle, though not of great magnitude, are interesting, and the entrance tower is said to be the finest specimen of Norman architecture now existing.

TUNBRIDGE, a post township of Orange co., Vermont, U. S., 32 m. S of Montpelier. Pop. 1,786.

TUNBRIDGE-WELLS, a celebrated watering-place, partly in the p. of Tunbridge, partly in that of Speldhurst, Kent, and partly in the p. of Frant, Sussex, 18 m. SW of Maidstone, and 36 m. SE by S of London, on the Hastings branch of the South-Eastern counties railway. Pop. in 1851, 10,587. The neighbourhood abounds with mineral springs. The water is a light and pure chalybeate. A century ago, this place was only an inconsiderable village, it may now be regarded as a town of villas, consisting of four principal districts, Mount Ephraim, Mount Pleasant, Mount Sion, and the Wells. The latter stands in a valley formed by gently sloping hills, and contains, besides the springs, the public parade, ball-rooms, libraries, the theatre, market-house, and various shops for the sale of jewellery, toys, and Tunbridge-ware.

TUN-CHI, a town of China, in the prov. of Gantwy, in N lat. 29° 48'. It has an active trade in tea.

TUNDERGARTH, a parish in Annandale, Dumfries-shire. Area 10,630 imperial acres. Pop. 577.

TUNG-CHANG-FU, a division and town of China, in the prov. of Shan-tung. The div. comprises eight districts. The town is 60 m. WSW of Tsen-n-fu, on the Great canal, in N lat. 36° 32' 24", and E long. 116° 10'. The houses are better and more regularly built than in the generality of Chinese towns; and it has a pagoda, which ranks next to the Paon-gan-tze of Nan-king, and is adorned in an equal manner. It is an octagon tower, 8 stories high, porcelain outside, incrustated in the inside with marbles of different colours, and covered with little bells. On the highest story is a statue of the idol in copper gilt. The port possesses an active and lucrative trade.

TUNG-CHING, a district and town of China, in the prov. of Gan-hwuy, div. and 36 m. N of Gan-king-fu, in N lat. 31° 7', and E long. 116° 56'. It has bastioned brick walls, and an old tower of three stories. A small river, by which it is separated from a suburb, is crossed by a bridge. The surrounding country is well-cultivated, and has several lime-kilns.—Also a district and town in the prov. of Hu-pih, and div. of Wu-chang-fu, in N lat. 29° 15' 36", and E long. 113° 46' 55", in a mountainous locality.

TUNG-CHU, a division and town of China, in the prov. of Keang-su. The div. comprises 2 districts.—Also a district and town of China, in the prov. of

Chih-le and div. of Shun-teen-fu, on the r. bank of the Pay-ho, about 120 m. from the sea, and 15 m. E of Peking, of which it may be considered the port, in N lat. $39^{\circ} 55' 30''$, E long. $116^{\circ} 42'$. The principal streets are straight, and paved with large square stones, with foot-paths on either side, and awnings above. It has large granaries for the market of Peking, shops well stocked with tea, porcelain, silk, furs, and European merchandise; and in the streets are numerous victual stalls. The trade with the interior, of which an important branch consists in the spawn of fish bottled, is very active. The environs possess little fertility.

TUNG-CHU-FU, a division and town of China, in the prov. of Shen-se. The div. comprises 10 districts. The town is 75 m. NE of Segan-fu, in N lat. $34^{\circ} 50' 24''$, E long. $109^{\circ} 50' 55''$, on the l. bank of the Lo-ho.

TUNG-CHUEN, a town of the Corea, in the prov. of Keang-yuen, on the sea of Japan, 105 m. ENE of King-ki-tao.

TUNG-CHUEN-FU, a division and town of China, in the prov. of Yun-nan. The div. comprises 5 districts. The town is in N lat. $26^{\circ} 20' 56''$, E long. $108^{\circ} 25' 89''$.—Also a division and town of China, in the prov. of Sze-chuen. The div. comprises 8 districts. The town is 75 m. NE of Ching-fu, on the frontier of Tibet, at the confluence of the Lo-keang and Mon-koua, in N lat. $31^{\circ} 9'$, E long. $105^{\circ} 11'$.

TUNG-GAN, a district and town of China, in the prov. of Chih-le and div. of Shun-teen-fu, in N lat. $39^{\circ} 22'$, E long. $116^{\circ} 46'$.—Also a district and town in the prov. of Hu-nan, div. and 24 m. WNW of Yung-chu-fu, on the Sang-keang, in N lat. $26^{\circ} 13' 12''$, E long. $111^{\circ} 18' 80''$.—Also a district and town in the prov. of Fo-keen and div. of Tsuen-chu-fu, 120 m. SW of Fu-chu, in N lat. $24^{\circ} 44' 24''$, E long. $118^{\circ} 19' 80''$.

TUNG-GAN-HEEN, a district and town of China, in the prov. of Kwang-tung and div. of Lo-tsing-chu, 86 m. W of Chaou-king-fu, in the midst of mountains, in N lat. $23^{\circ} 5'$, E long. $111^{\circ} 44'$.

TUNG-HAE-HEEN, a district and town of China, in the prov. of Yun-nan and div. of Lin-gan-fu, in N lat. $24^{\circ} 12'$, E long. $102^{\circ} 56'$.

TUNG-HEANG, a district and town of China, in the prov. of Sze-chuen and div. of Suy-ting-fu, in N lat. $31^{\circ} 27'$, E long. $107^{\circ} 51'$.—Also a district and town in the prov. of Che-keang, div. and 12 m. SW of Kea-tung-fu, in N lat. $30^{\circ} 45'$, E long. $120^{\circ} 23'$.—Also a district and town in the prov. of Keang-se and div. of Fu-chu-fu, in N lat. $28^{\circ} 15'$, E long. $116^{\circ} 85'$.

TUNG-HEU-HEEN, a district and town of China, in the prov. of Ho-nan and div. of Kae-fung-fu, in N lat. $34^{\circ} 35'$, E long. $114^{\circ} 35'$.

TUNG-HU-HEEN, a district and town of China, in the prov. of Hu-pih and div. of E-Chang-fu.

TUNG-JIN-FU, a division and town of China, in the prov. of Kwei-chu. The div. comprises one district. The town is in N lat. $27^{\circ} 38'$, E long. 109° .

TUNG-KEANG, a district and town of China, in the prov. of Sze-chuen, div. and 90 m. ENE of Paou-ting-fu, in a mountainous locality, in N lat. $31^{\circ} 55'$, E long. $107^{\circ} 16'$.

TUNG-KWAN, a district and town of China, in the prov. of Shen-se, div. and 66 m. N of Segan-fu, on the r. bank of the Tse-ho, in N lat. $35^{\circ} 6'$, E long. $109^{\circ} 8'$.

TUNG-KWANG, a district and town of China, in the prov. of Chih-le, div. and 48 m. SE of Hoken-fu, on the r. bank of the Hwai-ho, in N lat. $37^{\circ} 58'$, E long. $116^{\circ} 36'$.

TUNG-KWAN-TING, a district and town of

China, in the prov. of Shen-se and div. of Tung-chu-fu.

TUNG-LAN-CHU, a district and town of China, in the prov. of Kwan-se and div. of King-yuen-fu, in N lat. $24^{\circ} 28'$, E long. $106^{\circ} 45'$, 38 m. ENE of Szeching-fu, in a mountainous locality, on an affluent of the Po-see-keang.

TUNG-LEANG, a district and town of China, in the prov. of Sze-chuen, div. and 39 m. NNE of Chun-hing-fu, in N lat. $29^{\circ} 59'$, E long. $106^{\circ} 11'$.

TUNG-LEW, a district and town of China, in the prov. of Gan-hwuy and div. of Che-chu-fu, on the r. bank of the Yang-tse-keang, in N lat. $30^{\circ} 22'$, E long. $116^{\circ} 54'$. It is enclosed by walls, and has two towers, one of 7 stories.

TUNG-LING, a district and town of China, in the prov. of Gan-hwuy and div. of Che-chu-fu, in N lat. $31^{\circ} 4'$, E long. $117^{\circ} 50'$.

TUNG-LU, a district and town of China, in the prov. of Che-keang, div. and 21 m. NNE of Yen-chu-fu, at the confluence of two rivers.

TUNG-LU-TING, one of the four subdivisions of the div. of Shun-teen-fu, in the Chinese prov. of Chih-le.

TUNG-MING, a district and town of China, in the prov. of Chih-le and div. of Ta-ming-fu, in N lat. $35^{\circ} 29'$, E long. $115^{\circ} 18'$.

TUNG-O-HEEN, a district and town of China, in the prov. of Shan-tung and div. of Tae-gan-fu, 26 m. SE of Tung-chang-fu, near the r. bank of the Ta-tsin, in N lat. $36^{\circ} 15'$, E long. $116^{\circ} 20'$. It is enclosed by good walls, but the houses are ill-built. It is noted for its glue.

TUNG-PING-CHU, a district and town of China, in the prov. of Shan-tung, 45 m. NW of Yen-chu-fu, on the r. bank of the Tse-nan, near the Great canal, in N lat. $36^{\circ} 6'$, E long. $118^{\circ} 16'$.

TUNG-SEANG-FU, a division and town of China, in the prov. of Shen-se. The div. comprises 8 districts.

TUNG-SHAN, a district and town of China, in the prov. of Hu-pih, div. and 69 m. S of Wie-chang-fu, near the l. bank of an affluent of the Yang-tsen-keang, in N lat. $29^{\circ} 40'$, E long. $114^{\circ} 22'$.

TUNG-SZE, a district and town of China, in the prov. of Kwei-chu and div. of Tsun-e-fu, in N lat. 28° , E long. $106^{\circ} 45'$.

TUNG-TAE, a district and town of China, in the prov. of Keang-su and div. of Yang-chu-fu.

TUNG-TSEE-HEEN, a district and town of China, in the prov. of Sze-chuen and div. of Kew-chu-fu, in the midst of mountains, on an affluent of the Chi-chui.

TUNG-UNG, a town of China, in the prov. of Kwang-tung and island of Hai-nan. It is enclosed by walls, and has streets regularly built and paved. It contains about 12,000 houses. The surrounding country is highly cultivated, and contains numerous triumphal arches and cemeteries.

TUNGURAGUA, a high mountain of Ecuador, in the prov. and 20 m. N of Riobamba. It is of a conical figure, regularly sloped on all sides, and has an alt. of 16,500 ft. above sea-level, rising far above the line of perpetual snows. It is volcanic, and often bursts forth into violent eruptions, by one of which the town of Riobamba was destroyed. The lower parts of the mountain are covered with thick forests.—Also a river of S. America, now identified with the Amazon, of which it forms the head-stream. See AMAZON.

TUNGUSES, a native race of Asiatic Russia, who wander over the whole SE portion of that vast territory. They are first found on the banks of the Yenisei, whence they extend eastward to the sea of Okhotsk. In the south, however, they are mixed with the Mongols and Buriats; and on the borders of the northern ocean, they give place to the Yakuts and Samoyedes.

To the W of the Yenisei, a few are mixed with the Tartars and Ostiaks; but in general the prov. of Irkutsk-proper is that of which they may be considered the denizens. They are of a middle size, of a robust constitution, and endowed with great agility. Their countenance bears a considerable resemblance to that of the Mongols, though it is larger, and still more flattened. They have small eyes, a smiling physiognomy, and long black hair, which they allow to flow freely over their shoulders. They employ themselves solely in hunting and fishing. They have no permanent abodes, but range through the woods and along the rivers, seldom remaining more than six days at a time in one spot. Their tents are formed of a few spars, put together in a conical shape, and covered with skins or with willow bark, which after being exposed for some time to the vapour of boiling water becomes equally flexible. Their arms are bows and arrows, with which they will attack the fiercest animals. The delicacy of their sight and smell is almost incredible. There are three classes of T. who take a peculiar character from the regions which they inhabit, and the tribes on which they border: the Rein-deer T., the nomadic races of the north, called also the wood or hunting T.; the Dog T., who live upon the sea of Okhotsk, and in the neighbourhood of Kamtebaika, called also Lamuts; and the Riding T., who being mixed with the Buriats and Mongols, have to a certain extent adopted their habits, and even employ themselves a little in agriculture. Their religion, like that of all the other nomadic tribes in this part of the world, consists in a species of Shamanism, formed by a mixture of the creed of the Lamas with their own original superstitions.

TUNGUSKA, three large rivers of Asiatic Russia, all tributaries to the Yenisei. The Lower T., the most northerly of the three, has the longest course. It rises in the NW part of the gov. of Irkutsk, and after running for a considerable space parallel to the Lena, turns gradually to the W, and falls into the Yenisei, near Turuchansk. Its entire course cannot be estimated at less than 1,000 m.—The Middle T. rises also in the district of Irkutsk, not far from the source of the Lower T., and after a course of between 500 and 600 m. through the district of Yeniseiakh, falls into the Yenisei in N lat. 62°.—The Upper T. has a greater mass of water than either of the above streams, and might even rival the Lower T. in length of course, if counted from the commencement of its stream. It bursts from the SW part of the lake or sea of Baikal, through a broken and rocky channel; and flowing W, joins the Yenisei after a course of 750 m. It bears the name of Angara in the first part of its course, and till after being joined by the Ilim, when it receives the name of T.

TUNG-UUN-HEEN, a district and town of China, in the prov. of Chih-le and div. of Tsun-hwa-chu.

TUNG-WEI-HEEN, a district and town of China, in the prov. of Kan-suh and div. of Kung-chang-fu, in N lat. 36° 6', E long. 105° 15'.

TUNG-YANG, a district and town of China, in the prov. of Che-keang, div. and 38 m. E of Kin-hwa-fu, in N lat. 29° 17', E long. 120°.

TUNG-YUEN, a district and town of China, in the prov. of Kwang-tung and div. of Kwang-chu-fu.

TUN-HWANG-HEEN, a district and town of China, in the prov. of Kan-suh.

TUNIS, a considerable territory of Northern Africa, forming one of the Barbary states, lying between the parallels of 31° and 37° N, and the meridians of 8° and 11° E; and bounded on the N by the Mediterranean; on the E by Tripoli; on the S and SW by the Sahara; and on the W by Algeria. Its area has been estimated at 70,000 sq. m. It consists chiefly of a large peninsula, stretching into the Mediterranean in a NE direction, and approaching, in Ras-Adder or Cape Bon, within less than 100 m. of the coast of Sicily. Beginning at Cape Shabba, the frontier-point of Tripoli, the coast, which is deeply indented, extends northerly with a slight declination to the E; but after turning Cape Bon, its general direction is E. The N coast line terminates at Al-Kahah, and its whole extent is about 500 m. On the E it presents the deep gulfs of Cabes and Hammamet; on the N the gulf of Tunis. The interior is as yet little known. The cultivated part

reaches from 200 to 250 miles into the interior, till it terminates with the chain of Atlas, and the vast dry plains of the Biled-el-Jerid.—The ancient subdivision of this region still claims a place in geography. The fertile country in the neighbourhood of Keff and Baijah, the *Regio Zeugitania* of Pliny, is now distinguished by the name of Frigeah. The districts between the Kairwan and the Jerid correspond to the *Bonacium* of the ancients.—This regency is watered by various streams of minor importance, but the only rivers of any consequence are the Mejerdah and the Wad-el-Quibir. The Mejerdah, the *Bagrada* of antiquity, empties itself into the sea between Cape Carthage and Porto-Farma. Its sources are yet unknown; but it is formed by the confluence of numerous streams descending from various branches of the Atlas, and distributes plenty over a fine level country in which are many towns and villages containing from 5,000 to 15,000 inhabitants. The banks of this river and the country to the eastward are indeed the best cultivated parts of the regency. That on the W side having been long exposed to the inroads of the Algerines, is thinly inhabited, and in many places desert. The Wad-el-Quibir rises in the neighbourhood of El-Keif, and falls into the sea near Tabarca.

Productions and climate.] To the advantage of a large sea-coast Tunis adds, in comparison with the other states of Barbary, which are mostly mountainous and intersected with the higher chains of the Atlas, or covered with wide desert wastes, that of being an open country of fertile and salubrious plains and mountains of moderate height, many of them crowned with plantations of the finest olives. The only ramification of the Atlas chain of any extent divides it from the Biled-el-Jerid, or country of dates, so that the whole regency is capable of high cultivation, and might be made to produce 500 per cent. more than its present average crops. The principal agricultural productions are grain, cattle, and flocks, olives, dates, and a variety of the same fruits which grow in the south of Europe; but oil, corn, wool, and cattle have always been the great staple exports of this country, and of nearly all Northern Africa. The mountains near the city of T. contain silver, copper, and lead ores; there is also a lead mine which was worked by the Romans; but the beys of Tunis, afraid of exciting the cupidity of the Christians, have always discountenanced the working of mines.—The heat becomes insupportable in July and August, when the S wind brings the heated air from the interior of Africa. Some branches of the Atlas contain elevated and temperate regions. The tracts to the south, forming 'the Date country,' though far from presenting the same rich and verdant aspect as those on the coast, yield not only dates, but grain of different kinds, and contain many large villages. All kinds of fruit common to warm climates are plentiful, with olive-trees, roses, and other odoriferous plants. Hammam Lif is a noted hot-bath very much resorted to by the Tunisians. Its temp. is generally 118°. The taste of the mineral is not unlike that of Glauber's salts, but by no means nauseating.

Population.] The population, which is calculated at 2,500,000 by some authors, and by Blaquiere at 4,500,000, consists, like that of the other Barbary states, of Moors, Arabs, Jews, and Christian slaves. The number of the Arabs exceeds that of the Moors, who are the agriculturists and merchants. Reading, writing, and the knowledge of the Koran, are acquirements common to the people; and they are celebrated in this quarter of the globe for superior refinement and courtesy. There are about 5,000 Turks, and Kuroghs or sons of Turks by

Moorish women; 50,000 Jews, and 12,000 Christians; nearly all of whom are Roman Catholics, and principally Maltese, Sardinians, and Neapolitans. There are also a few Levantines and Greeks; the rest are Moors, Negroes—about half free—and Arabs, but the Arabs preponderate in numbers. There are no Berbers or Kabyles, in the regency. These aborigines of North Africa are confined to Algeria and Morocco, not extending further east than the Atlas chain of the country anciently called *Numidia*.

Commerce.] The territory of T., from the manner in which it projects into the Mediterranean, coming into closer contact with Europe than any other of the Barbary states, is peculiarly favourable for carrying on trade in that sea. By these advantages, Carthage became the first commercial state of antiquity, and in the struggle for universal empire the rival of Rome itself; and though, under the relentless hatred of that iron-hearted people, the foundations of Carthage were ploughed up, yet its territories still formed the centre of the Roman African dominions, and were speedily covered with magnificent monuments of taste and wealth. In our own times the rulers of T. have been zealous in their encouragement of trade; and, accordingly, availing itself of the advantages of its situation, T. carries on a much more extensive trade than any of the other towns of Barbary. Grain was formerly a chief article of export, but the famine of 1805 induced the bey to prohibit its exportation. When it was exported, a license from the bey was obtained, and a duty paid on wheat to the amount of £1 10s. on the *cafie*, [equal to 2 English quarters,] and half that amount on barley. The principal port for shipping grain is Biserta. In a plentiful year, the state of T. is computed to produce about 900,000 quarters of wheat, and an equal quantity of barley. Olive oil pays a duty of 3s. 4d. per *metol* of 40 lbs. The principal ports for shipping oil, are Tunis, Soliman, and Susa. Wool, which is here nearly equal to the best Spanish, and having a longer staple, is much better adapted to the manufacture of shawls, is shipped in large quantities, at Jerbi, Sfax, and other ports on the eastern frontier. About 20,000 *cantars* of this article were, in time of peace, exported to France and Italy. Soap, of superior quality, is also largely exported. Sponge is collected on the shore between Sfax and Jerbi, and brings from 30s. to 42s. per hundred weight. Amid the ruins of Carthage, and on the rocky mountains to the eastward of Tunis, Orchilla weed is collected in considerable quantities. An extensive and lucrative commerce was formerly carried on with the interior, particularly with Constantina and Ghadames; but the bey's impolitic mode of governing the Arabs is said to have interrupted it. The caravans from Timbuctu, which used to arrive annually in June, furnished the merchants with gold-dust, ivory, and ostrich feathers. The imports—supplied almost exclusively, till of late years, by Marseilles and Leghorn—consist of all kinds of European manufactures, colonial produce, and East India cottons. The species of British goods chiefly demanded, is that kind of woollens called scarlet long-ells, which the caravans carry in large quantities into Central Africa. The merchant-vessels amount to about 100 of from 300 to 100 tons. The coasting trade is all carried on by *sandals*, which never exceed 40 tons.

Government.] The ruler of Tunis, under the Porte, bears the title of bey, and enjoys the same power as the other Barbary chiefs. The forces amount to about 10,000 men; his revenues have been estimated at £1,000,000. The Barbary powers up to the occupation of Algiers by France, and the usur-

pation of the hereditary government of Tripoli by the Porte, were *quasi* independent, and concluded treaties of amity and commerce with all the governments of Europe, without the intervention of the Turkish divan. The Porte, however, was accustomed to send the *caflan* of investment for the vice-regal authority, on the hereditary beys of T. and Tripoli succeeding to their hereditary rights; whilst the military piratical chief of Algiers, elected by that piratical republic, received in due form, and at the usual time, the confirmation of his election, without hesitation on the part of the paramount chief or sultan at Constantinople. On the other hand, the sultan exercised his rights of *paramount* sovereignty in Barbary. His money passed current in those states, his firmans of investment were received by princes and people, as the approbation of the chief of Islamism, and at various periods he received tribute in the shape of specie and magnificent presents. The amount of tribute, however, was never fixed, but was always left to the caprice or liberality of the various bashaws. The present bey of T. has at different periods despatched presents to the sultan, the last of which was, among other things, a large sum of specie, and a splendid corvette.

History.] Of the ancient Carthage, the site of which was in the close vicinity of the present capital of this state, few traces remain. "The dreadful impressions of its eternal enemy the Romans," says a celebrated journal, "have been strictly fulfilled against this devoted city. In vain does the inquisitive traveller seek in the neighbourhood of T. for the triple wall, with its lofty towers, whose capacious chambers contained stalls for 300 elephants, and stables for 4,000 horses, with lodgings for a numerous army;—in vain does he look for those safe harbours and sheltered receptacles, for those 2,000 ships of war, and 3,000 transports, which carried Hamilcar and his warriors against Syracuse; a few remains of the public cisterns, and the common sewers, are all that is left to point out the spot where Carthage, with its 700,000 inhabitants, once stood." Though the city of Carthage was razed to the ground, the Romans made its territory the centre of their African dominion, and covered it with magnificent monuments of their taste and wealth. In the irruption of the barbarous nations upon Rome, the Vandals were the first who seized upon Africa, where Genseric erected a powerful piratical dominion, whose fleets on one occasion took and sacked the capital of the Roman empire. All other occupants, however, were destined to give way before the torrent of Saracen conquest. In the 7th cent., Sidi Occuba, a lieutenant of Caliph Othman, conquered all this part of Africa, and erected it into a kingdom, of which Kairwan, or Cairwan, was the capital. After many revolutions, towards the end of the 12th cent. the dynasty of the Almohades was established in Morocco, and T. was governed by a viceroys. Under Charles V. the city of T. was the theatre of contention between the troops of that emperor and Barbarossa, the celebrated pirate. The Spanish expedition was successful; and a treaty was concluded, stipulating for a general liberation of the captives, and for a free intercourse between Tunis and the European states. This continued till 1574, when an expedition sent by Sultan Selim drove the Spanish garrison out of the Goletta, and annexed T. to the Turkish empire. It was governed for some time by its viceroys, called *deys*; but the people, or rather the soldiery, soon acquired the privilege of electing their own *dey*. The Algerines, in the course of the last century, wrested from it the fine prov. of Constantina.

TUNIS, the capital of the above state, is situated at the SW side of a large lagoon, about 10 m. SW of the site of the ancient Carthage, of which it may properly be considered as the successor, in N lat. 36° 48', E long. 10° 24'. It is surrounded on all sides, except the east, by considerable heights, but is so encircled by lakes and marshes that in such a climate it might be expected to be much more unhealthy than it appears to be. The city is large, being supposed to contain 12,000 houses, and 130,000 inhabitants, of whom 80,000 are Jews, and about 1,500 Christians. It is built in the most irregular manner, and the streets are so narrow and filthy that they can with difficulty be passed through. Large sums have been spent in the construction of forts, and in surrounding the city with a high and double wall, yet it is by no means a strong place. The citadel, called El-Gaspa, begun by Charles V., and finished by John of Austria, is commanded by

the neighbouring heights; there is also a rising ground on the north of the town, which commands both it and El-Bardo, the fortified palace of the bey, 3 m. W of Tunis. There is one great mosque, and

a number of smaller ones; a Roman Catholic and a Greek church, a theatre, several bazaars, and near the centre of the city a piazza of vast extent said to have formerly contained 3,000 shops for the sale of

woollen and linen manufactures. The finest structure is the new palace. The Moorish houses, according to the custom of Barbary, are only one story high, with flat roofs, and cisterns for the purpose of collecting the rain water. The city is moreover well supplied from a neighbouring spring, which is conveyed into it by a fine aqueduct built in the time of Charles V. About 6 m. to the W of the city is the Goletta, the great naval and commercial depot of the state. A basin has been formed here, sufficiently spacious to receive all the vessels of war and merchant ships belonging to Tunis; and considerable quantities of timber are brought from Tabarca, for the purpose of ship-building. A large lake, separated from the sea by a very narrow isthmus, extends between T. and the Goletta. It is not more than 6 or 7 ft. deep, and appears to have been formerly dry. At present it affords an ample supply of salt, and serves for the conveyance of passengers and goods between the harbour and the capital. See article CARTHAGE.

TUNICA, a county in the NW part of Mississippi, U. S. Area 600 sq. m. Pop. in 1840, 821; in 1850, 1,314.—Its cap. is Austin.

TUNJA, a town of New Granada, the capital of a district of the same name, in the prov. and 62 m. NE of Santa-Fe. It was formerly a very opulent place; and has several large churches and convents; but the present pop. of Tunja does not exceed 1,000. Its manufactures consist of coarse woollens and cottons, and formerly it had a great trade in tobacco, the quality of which was much esteemed, until it was suppressed in favour of the royal monopoly.

TUNKHANNOCK, a township of Wyoming co., Pennsylvania, U. S., 104 m. NE of Harrisburg. Pop. in 1850, 2,400. It is near the mouth of a stream of the same name, which runs SW into the E branch of the Susquehanna, about 35 m. above Wilkesbarre.

TUN-LEW, a district and town of China, in the prov. of Shan-se, and div. of Lu-gan-fu, in N lat. 36° 15', and E long. 112° 46'.

TUNNUDTIOERBIK, an island near the coast of E. Greenland, in N lat. 60° 45'.

TUNQUIN. See TORQUIN.

TUNSTAL, a parish in the co.-palatine of Lancashire, 3 m. S of Kirkby-Lonsdale, comprising the chapelry of Leck, and the townships of Burrow with Burrow, Cantsfield, and T. Area 9,224 acres. Pop. in 1831, 862; in 1851, 814.—Also a parish in Kent, 10 m. ENE of Maidstone. Area 1,196 acres. Pop. in 1831, 171; in 1851, 105.—Also a parish in Norfolk, 8 m. W by N of Yarmouth, crossed by the Norwich and Yarmouth railway. Area 1,612 acres. Pop. in 1831, 101; in 1851, 139.—Also a parish in Suffolk, 5½ m. S by W of Saxmundham. Area 2,863 acres. Pop. in 1831, 733; in 1851, 676.—Also a parish in the E. R. of Yorkshire, 14 m. E by N of Kingston-upon-Hull. Area 1,607 acres. Pop. in 1831, 172; in 1851, 159.—Also a township in Catterick p., Yorkshire, 4 m. SE of Richmond. Area 1,262 acres. Pop. in 1831, 312; in 1851, 328.

TUNSTALL-COURT, a chapelry and market-town in Wolstanton p., Stafford, 4 m. N by E of Newcastle-under-Lyne. The Grand Trunk canal passes within a ¼ m. of the town, and the double tunnel, which runs for 2 m. under Hare-castle hill, is in the vicinity. The town is seated on the declivity of a considerable eminence, and contains some good houses. In the vicinity there are extensive potteries and large chemical works. Fine veins of coal, clay, and iron-ore, are found here. Pop. in 1801, 1,677; in 1831, 3,673; in 1851, 9,566.

TUNSTEAD, a parish in Norfolk, 9½ m. NE by N of Norwich. Area 2,291 acres. Pop. in 1831; 498; in 1851, 449.—Also a small village in the p. of Tideswell, co. of Derby, 3½ m. W by S of Tideswell.

TUNWORTH, a parish of Southamptonshire, 3½ m. SE of Basingstoke. Area 1,104 acres. Pop. in 1831, 122; in 1851, 133.

TUOLOMNE, a county of California, U. S., situated between the Stanislaus and Merced rivers, and intersected on the W by the San-Joaquin. Pop. in 1852, 17,657. Its cap. is Sonora.—Also a village in the same co., on the N side of the Tuolomne river, 30 m. above its junction with the San-Joaquin, and 78 m. SE of Vallejo.—Also a river of California, which rises in two head-branches, in the Sierra Nevada; and flows W into San Joaquin.

TUOSIST, or KILMICHAELLOGUE, a parish in co.

Kerry, 11 m. SW by W of Kenmare. Area 39,841 acres. Pop. in 1831, 6,208; in 1841, 7,485. The summit of Hungry-Hill at the S extremity of the SE boundary, has an alt. above sea-level of 2,249 ft.

TUPADL, a village of Bohemia, 3 m. S of Czeslau, with manufactures of muslin and cotton stuffs.

TUPARRO, a river of New Granada, in the prov. of San Juan-de-los-Llanos, which rises under the parallel of 5° 10' N, runs E, and falls into the Orinoco at Maypures, after a course of 200 m.

TUPHOLME, a parish of Lincolnshire, 6 m. W by S of Horncastle. Area 1,795 acres. Pop. 73.

TUPINAMBAS, a nation of Indians. In the Brazilian province of Para. They formerly dwelt opposite the islands of the river Amazon, from its mouth to the strait of Pauxis; and travellers have recounted a thousand fables of them. The greater part of them have now retired into the mountains and woods towards the south, very few remaining in the Portuguese territory.

TUPIZA, a town of Bolivia, in 8 lat. 21° 28', 140 m. SSE of Potosi, at an alt. of 9,000 ft. above sea-level. There are silver mines in the vicinity.

TUPOZA, a river of New Granada, in the prov. of Ystmo, which runs nearly due W, and falls into the Chucunaqui.

TUPPEL, a town of Hindostan, prov. of Delhi, on the E side of the Jumna, in N lat. 28° 25'.

TUPSLEY, a township of Herefordshire, 2 m. ESE of Hereford. Pop. in 1831, 512; in 1851, 669.

TUPTON, a township of Derbyshire, 4 m. S of Chesterfield. Pop. in 1851, 270.

TUPUNGATO, a mountain of Chili, in the Andes, between the passes of Cumbre on the N, and Portillo on the S, rising to an alt. of 15,500 ft. above the level of the sea.

TUQUAQUE ISLANDS, some small islands off the coast of Venezuela, forming a small chain from Point-Seca to Point-Cabello.

TUQUEQUE, a river of Venezuela, a large and abundant arm of the Apure, from which it communicates with the Portuguesa, at a point 9 m. NNW of San-Fernando-de-Apure.

TUR. See THUA.

TUR, a town of Hungary, 24 m. SE of Szolnok, on the r. bank of the Berettyo.

TURA, or O'TURA, a town of Hungary, on the Waag, 23 m. N by W of Leopoldstadt.

TURA, a river of Asiatic Russia, which rises in the gov. of Perm, among the Urals, flows SE; traverses the districts of Turinsk, Tenmen, and Yalutorok; and after a course of about 260 m., falls into the Tobol below Jevlevo.—Also a small river of Irkutsk, in Asiatic Russia, which rises in the district of Nertchinsk, and falls into the Ingoda.

TURAH, a village of Kordofan, in the Hababadeh desert, 6½ hours SW of Kajebi.

TURANY, a town of Hungary, on the r. bank of the Waag, 26 m. NNW of Neusohl.

TURATE, a town of Austrian Italy, 6 m. S of Appiano, in the prov. of Cuno. Pop. of com., 2,260.

TURATTE, a town of the island of Celebes, 180 m. N of Macassar.

TURBACO, a village of New Granada, in the prov. and 12 m. SE of Cartagena. It stands at the entrance of a majestic forest, which extends toward the S and the E as far as the canal of Mahates and the river Magdalena. To avoid the excessive heats and diseases which prevail during the summer at Cartagena, and on the coast, it is the practice for those Europeans who are not seasoned to the climate, to retire inland to Turbaco during that season.

TURBAH, a town of Hindostan, in the prov. of Bahar, district of Chuta-Nagpore, in N lat. 22° 32'.

TURBENTHAL, a parish and village of Switzerland, in the cant. and 16 m. ENE of Zurich, near the r. bank of the Toss. Pop. 2,200.

TURBIGO, a town of Austrian Italy, in the Milanese, on the Naviglio-Grande, 18 m. W of Milan. Pop. 1,200.

TURBIO, a small river of Brazil, in the prov. of Rio-Janeiro, which runs W, and enters the Parana between the rivers Parapanana and Tieta.

TURBUT, a township of Northumberland co., in the state of Pennsylvania, U. S., 14 m. N of Sunbury. Pop. in 1840, 3,872.

TURBUT, or TABUT, a city of Khorassan, 50 m. NE of Turshiz. It is defended with a strong wall flanked with towers, and is said to contain a pop. of about 18,000.

TURCKHEIM, a town of France, in the dep. of Haut-Rhin, 4 m. W of Colmar. Pop. 2,843.

TURCO, a settlement of Bolivia, in the prov. of Caranges, 120 m. WSW of Potosi.

TURCOING. See TOURCOING.

TURDOSIN, a town of Hungary, in the com. of Arva, 3 m. SW of Tistenna. Pop. 1,600.

TUREGANO, a village of Spain, in the prov. and 15 m. NNE of Segovia. Pop. 1,100. It has an old castle, and a large warehouse.

TURENNE, a town of France, dep. of Correze, near the river Tourmente, 9 m. S by E of Brives. Pop. 1,876. Iron and lead mines are wrought in the vicinity.

TURFAN. See TOURFAN.

TURGHE, a town of Hungary, in the com. of Csalad, 15 m. NE of Szala-Egaszeg.

TURI, a village of Naples, in the Terra-de-Bari, 18 m. SE of Bari. Pop. 8,500.

TURIAMO, a bay on the N coast of Venezuela, in the province of Caraccas, 3 leagues to the E of Porto-Cabello. It extends one league from N to S. It has no shelter from the N wind; and partly on this account, and partly on account of the sterility of the surrounding country, it is not much frequented by trading vessels.

TURIN, or TORINA, an administrative division of the Sardinian states, forming the greater part of Piedmont, and bounded on the N by Novara and Alessandria; on the E by Coni; on the S and W by France and Savoy. It comprises the 5 provs. of Biella, Ivrea, Pignerol, Susa, and Turin.—The prov. of T. is bounded on the N by Ivrea; on the NE by Novara; on the E by Alessandria; on the SE by Coni; on the SW by Pignerol; and on the W by Susa and Savoy. The territorial superficies of T. is 3,892 sq. kilom. Pop. 379,677. Ramifications of the Cottian Alps cover the N and W parts of the prov. The rivers are the Po and its affluents the Sangone, Dora-Riparia, Stora, Arca, and Dora-Baltea. This province is about equally divided by the Po. That portion which lies on the l. bank forms part of the plain of Lombardy; that on the r. is hilly and in part mountainous, with a soil less fertile, but in many parts fruitful in vineyards. One-ninth part of the prov. is covered with woods or forest, about four parts are employed in tillage and vineyards, three in meadows and grass-lands, which chiefly lie on the N of the Po; the remaining part is occupied by roads, buildings, gardens, &c. The mountains NW of the city of T. are rich in iron, copper, cobalt, and manganese.

TURIN, the capital and seat of the Sardinian monarchy, stands in N lat. 45° 4', E long. 7° 40', 75 m. WSW of Milan, and 320 m. NW of Rome, in a beautiful plain on the l. bank of the Po, which here receives the waters of the Dora-Riparia, and flows past with a copious stream, at a short distance from the walls. Its elevation above sea-level is 240 metres. It commands towards the S, W, and N views of unrivalled grandeur, embracing the whole chain of Alpine heights which bound the plains of Piedmont.

On the E and SE it is sheltered by a cluster of richly wooded vine-clad hills, adorned with villas, temples, and palaces; and on the most prominent of these, about 5 m. from the city, stands the Superga, a royal mausoleum, whose splendour attracts the eye from distant points of the country. The city is of an oblong form, and its circumf., including the ramparts, is about 4 m. Its citadel and other fortifications placed it at one time in the rank of the strongest places in Europe; but its walls and bastions were demolished by the French after the battle of Marengo. The entrance of the city from the W is by a noble avenue, presenting an air of elegance which announces the seat of royalty; and the interior is worthy of the beauty of its situation. The modern streets are in general wide and straight, intersecting each other at right angles, and running in direct lines from one extremity of the city to the other: several of them have arcades or piazzas running along their sides, and affording a convenient walk for foot-passengers. The principal square, near the centre of the city, bears the name of Piazza-Reale, or Piazza-del-Castello, and ranks, both for size and beauty, among the most elegant squares of Europe. On one of its sides stands the royal palace; in the centre is a structure erected by the dukes of Savoy, commonly called the Castello. On three of the sides of the square are arcades, as in the palais royal at Paris. The Piazza-di-San-Carlo, though smaller, is entitled to notice, its façades being uniform, and its two longer sides having arcades supported by pillars. Of the streets of Turin, perhaps the finest is the Strada-di-Po, which stretches from the central square called the Piazza Reale, to the banks of the river. It is straight, broad, and bordered on each side with rows of arcades. The street called Contrada-di-Dora-Grande extends from the opposite side of the central square: it is equally straight as the Stradi-di-Po, and considerably longer, but neither so spacious nor so handsome. The houses in Turin are in general built of brick, and even the best are plastered in front with stucco. Like most towns which have been rebuilt, Turin has an old quarter, but it is very inconsiderable, hardly amounting to the sixth part of the whole. It is called Torino-Vecchio; and its streets, though less wide and handsome than those of the new town, are in general straight and regular. Of the public walks of Turin, the most frequented are the royal gardens: they form the morning rendezvous of the fashionable world. The terrace on the other side of the river, though commanding a view of great extent, is less frequented. The Rondo, extending between the city walls and the banks of the Po, is resorted to as an evening walk; while the Valentina, another promenade along the Po, about a mile from the town, is little visited on account of its distance. The materials of the public buildings are rich, consisting of marble of every vein and colour; but ornaments are perhaps too profusely scattered, and the city contains hardly one chaste model of architecture. The duomo or cathedral is an old Gothic edifice, remarkable for nothing but its marble cupola. The church of Corpus-Christi is very richly ornamented. Other churches claim attention only from their size, their pillars, or the variety of marble employed in their construction. A very handsome church was opened in Dec. 1863 for the worship of the Protestant party known as the Waldenses. The royal palace, situated in the central square, consists of three wings, surrounded by a court. Its extent is great, but in other respects it resembles the mansion of a rich individual, being built of brick, and covered with tiles. Its interior,

however, is not without magnificence; and its galleries contain a number of good paintings of the Italian and Flemish schools. The Castello-Reale, situated in the midst of the square, has an elegant façade of the Corinthian order; but its other three sides are Gothic. The Palazzo-Carignano, a large building of some interest, is now occupied with government-offices. The university, a large and magnificent building, contains a court surrounded with arcades, the whole of which are covered with inscriptions and antique bas-reliefs. Its library contains 160,000 vols. The Palazzo-degli-Archivi-Reale is a vast edifice. The arsenal has a large room for arms, and workshops of some extent for the manufacture of fire-arms. The opera, or principal theatre, is of great size. In hospitals T. is richly endowed. The principal one, the Spedal-Maggiore, is on the plan of a celebrated hospital at Rome, affording both employment and support to its inmates, with education to the children. The Ospizio-de-Carita receives about 1,600 paupers. T. contains in all 14 parishes, and 81 parochial churches; besides which there are very many other churches and chapels, 13 religious houses and convents for men, and 9 for females; 16 pious and charitable institutions, and many hospitals for the sick, the lame, the blind, &c. There are fifteen establishments of public instruction, amongst which are the royal university of study, the royal academy of sciences, with the Egyptian museum, that of antiquities, and that of natural history annexed; the royal military academy, the college of the Jesuits (now suppressed), the archiepiscopal seminary, the ecclesiastic academy of the Superga, the museum, and theatre of anatomy, &c.; the cabinet of literature; the royal academy of painting, sculpture, and ornament; La Filarmonica, La Filodrammatica, the halls of trades and of agriculture and commerce, and the botanical and horticultural societies.—The pop. of Turin amounted in 1816 to 88,500; in 1820 to 90,000; in 1852, to 143,157. The character of the inhabitants is, like their dialect, Italian, with a mixture of French. Their dress differs little from that of the French, and their manners have received a polish from the long residence of the court; from which, and the consequent residence of the gentry, a number of inhabitants derive their support. "The people who pass you on foot are mostly of the lower order; the men dressed very much like French mechanics; whom they resemble, only that they are more powerful and muscular-looking men—indeed, there is an annual migration of Piedmontese to Paris, where they act as porters—some of them indulging, however, in full suits of blue velvet; the women with gaudily-coloured handkerchiefs tied round their heads, and with red, yellow, and pea-green umbrellas under their arms, and gowns and cloaks of equally dazzling and forcible hues. The priests, conjoined with padres, make up a most formidable body. At every ten paces you meet, without the smallest exaggeration, at least two priests. The clerical costume is here in its greatest splendour. Nowhere else is the three-cornered shovel hat of such tremendous dimensions. In no other city are cassocks so flowing and eccentric in their cut; or coats so severe in architecture; or silver shoe-buckles and black silk stockings in such size and perfection. Gliding along, less frequently, come friars, Cordeliers, and Dominicans, with their shaven crowns and sandalled feet." The national religion of Piedmont is strictly Roman Catholic, but religious liberty is now tolerated, and there is in T. a large and respectable Piedmontese congregation of Primitive Christians and of the Swiss Protestant church, chiefly natives of the val-

leys of the Vaudois and of Savoy. All classes of the pop. are observant of their religious ceremonies. "They are," says a recent and most observant visitor, "an intelligent, orderly, and, generally speaking, a fine race, industrious, and attentive to their social and domestic duties, simple and courteous in their manners, sober, temperate, and frugal in their habits; and there is not, perhaps, a principal city in Europe which exhibits less appearance of immorality, or, in proportion to the pop., so small an amount of crime. I have not seen any capital so free from low, dirty streets, or from mean and miserable habitations; and among the lower orders of the people, drunkenness, abusive language, and disorderly conduct are rarely witnessed. There are so many sources whence the infirm and destitute receive assistance, and public begging is so properly discountenanced, that one sees in T. perhaps as little of the appearance of destitution and wretchedness as is to be found in any large and important city."

Silk forms the chief staple commodity of T., both in its raw and its prepared state; and the manufacture of that article is carried on to a large extent, particularly in damasks for furniture and drapery of all kinds, which are nowhere excelled in richness and quality. There are some inconsiderable fabrics of woollen, cotton and linen, plate and jewellery, iron and other hardwares, umbrellas and parasols; and the making of hats has here attained a degree of excellence vying even with Paris. The markets are well supplied with corn and grain, meat, poultry, cheese, butter, vegetables, fruit, flowers, &c. There is a special weekly mart for wine, to which from 100 to 150 hogsheads are usually brought, and there are also markets for hay, straw, wood, &c. The Po and other rivers produce good fish of various sorts, but fresh fish is generally an expensive article in Turin. Mutton is only supplied in the winter, when the flocks are brought down from the mountains. With vegetables and fruits, the markets are supplied in great profusion and fine quality. The price of labour in T. is, for the higher class of mechanics and artisans, from 3 to 4 francs per day, but the number is not considerable at the latter rate; for the second class, from 2 to 3 fr.; labourers from 1 to 1½ fr. per day. "The climate of T. is very healthy: there is a fine bracing clearness and elasticity in the air. It is often exceedingly hot during the day in summer, but towards evening a refreshing coolness is wafted from the mountains, and the nights are but seldom excessively hot. The Alps shut out the rays of the evening-sun from the plains, and close the daylight an hour before they leave the western side of those barriers. The vicinity of the capital to such a vast unbroken chain of mountains, most of which are shrouded in snow during six months of the year, occasions great coldness in winter."—A railway to connect T. with Novara is now in progress of execution; and it is in contemplation to connect Novara by railway with Milan or with Pavia.

[History.] In early ages the province of T. was inhabited by one of the Ligurian tribes, called *Taurini*. They occupied both sides of the Po, and the country between that river and the Alps, as far eastward as the Orca; on the W their limit extended to Avigliana. After the conquest of Liguria by Augustus, a Roman colony was settled here, and the capital of the *Taurini* was honoured with the title of *Augusta Taurinorum*, whence it derived its present name—Torino or Turin. Its modern history is closely connected with the wars of Italy, of which its situation rendered it always the first theatre. It passed successively from the Romans to the Lombards, to Charlemagne, to the marquesses of Susa, and lastly to the princes of Savoy, who made it the capital of their states. It has frequently suffered from the rival pretensions of France, Spain, and Austria. In 1706 it was besieged by the French, but delivered by Prince Eugene. In 1796 it escaped, by a timely pacification, the attack of the French under Bonaparte. In 1798 it was occupied by a French army. In 1799 it was entered by the Austro-Russian,

but was re-occupied by the French after the battle of Marengo in 1800, after which it remained in their possession until 1814.

TURIN, a township of Lewis co., New York, U. S., on Black river, 20 m. N of Rome. Pop. in 1840, 1,704; in 1850, 1,826.

TURINSK. See **TOURINSK.**

TURIRANA, a river of Brazil, in the prov. of Para, which, springing from a branch of the Tocantins, and running almost due N, serves as a line of division between the provs. of Para and Maranhão, and falls into the sea opposite San-Juan.

TURIS, a village of Spain, in the prov. and 21 m. WNW of Valencia, near the l. bank of the Magro. Pop. 2,600.

TURKA, a town of Austrian Galicia, 28 m. SW of Sambor.

TURKAL, a town of Asia Minor, the ancient *Sebastopolis*, situated near a high rock crowned by an ancient fortress, 24 m. NW of Tokat.

TURK-DEAN, a parish in Gloucestershire, 2½ m. N by W of Northleach. Area 1,890 acres. Pop. in 1831, 237; in 1851, 278.

TURKESTAN, a name often given to an extensive region of Central Asia, the original or acquired seat of the great Tartar race called Turks or Toorks, who now occupy the greater part of what is called Independent Tartary. See article **TARTARY**. The region north of the Oxus, corresponding to the *Sogdiana* of Ptolemy, is described in our columns under the title of **GREAT BOKHARA**.

TURKESTAN PROPER extends along the r. bank of the Syr, below Syram, and between it and the Aral-Nor, and stretches considerably to the N along the banks of some small rivers which come from the E and from the N. It was a rich and flourishing country previously to the invasion of Jenghiz-Khan, and included at that time the whole basin of the Syr; but the name is now confined to the NW angle of that once extensive region, now subject to Khokan. In the time of Sultan Baber, it was the seat of the Usbeks, whence, under Sheibani Khan, they came and drove Baber, and all the princes of the house of Timur, across the Syr, the Amu, and the Hindukush. The chief rivers are the Sarasu, the Arj, the Bulat, the Talash, and the Turugay. All of these have been made to fall into the Syr; but the Sarasu is now found to lose itself in a small lake, after running a long SW course through the Kirghisian steppe. The waters of this lake sometimes communicate with those of the Tele-kol, in 45° N lat. and 67° 25' E long. The Turugay seems to have been mistaken for the *Turgai*, which runs S from the same range as the Sarasu, and falls into the lake of Ak-su-kol or Bialawoda, to the N of the Aral-Nor. The Talash or Taraz, which originates on the NW slope of the Kinder-Tau, after running for some space NW and then SW, falls into the lake of Sakshum. Otrar, Jund, Saganak, Sabran, Yassi, Jenghikant, Osbanikhat, Esfijab, Jekel, Shalji, Taras, and Balasagun, all famous cities in this region, have now and for centuries disappeared. The only city mentioned by Nazarov is Souzak, the frontier city on the side of the Kirghisian desert. It is said to consist of 500 stone houses, built close to each other, situated on an eminence, and surrounded with a stone wall. The inhabitants are stated to be industrious, and are employed either in agriculture or in commerce with the Kirghis, who inhabit the banks of the Sarasu and the Tchouli. Taraz, on the Arj river, 70 m. to the NE of Otrar, seems to be the same with the city called Toorkistaun by De Lisle, Strahlenberg, and others. It is situated 15 m. from the Syr, and contains about 1,000 brick houses.—**NORTHERN TURKESTAN** is described in this work under the title **KIRGHIS KAZAKS**.—**EASTERN TURKESTAN**

is synonymous with the LOWER BOKHARA of modern geographers. See that article.

TURKEY.

On the OTTOMAN EMPIRE, nominally includes a large portion of the continents of Europe and Africa, whilst a most important part of the sultan's dominions is situated in Asia. Hassel calculated the superficial extent of European Turkey, according to the maps of Reichard and Riedt, at 189,925 sq. m., which is nearly in accordance with Arrowsmith and Lapie's maps. Pinkerton estimated the total extent of European Turkey, including Greece and the Morea, at 182,560 sq. m. Balbi distributed it thus:

The government of Rometia,	107,575 sq. m.
Bosnia,	18,890
Kupudin Pacha,	16,589
Kird,	4,235
Wallachia,	25,231
Moldavia,	17,400
Total,	189,920

In the supplement to the *Encyclopædia Britannica* the total extent of European Turkey was estimated at 180,074 sq. m. Dieterici, in 1853, assigned 153,721 geog. sq. m. to the Turkish possessions in Europe; but of these, 49,021 sq. m. were only mediate possessions, or placed by their organic relations more or less under foreign influence.

Giraberg estimated the superficial extent of the whole empire, previous to its recent losses, as follows:

European dominions,	206,707 sq. m.
Asiatic,	542,700
African,	291,690
Total,	1,041,007

Sezin and Lichtenstern calculated the total superficies thus:

The Ottoman empire in Europe, excluding Moldavia and Bessarabia,	207,562 sq. m.
Asiatic dominions,	545,595
African,	197,887
Total,	951,344

Dieterici's estimate of the area of the Turkish empire, in 1853, is as follows:

European dominions,	153,721 geog. sq. m.
Asiatic,	505,308
African,	719,328
Total,	1,377,357

Previous to the revolt of the Greeks, European Turkey formed nearly the fourth part of the Ottoman empire; and among European states was the sixth in rank with regard to territory, and the ninth in respect of population,—being generally estimated to contain about 186,000 sq. m., with a pop. of above 11,000,000. The loss of the Morea, Livadia, and the Cyclades,—an extent of territory about as great as Portugal, or Denmark with Holstein,—reduced the Turkish dominions in Europe about one-seventh, and their population one-eighth. The emancipation of Macedonia and Epirus—which has been proposed by some—with the loss of Southern Greece, would diminish the possessions of the sultan in Europe nearly one-third; and the often-threatened defection of Bosnia, Servia, and Turkish Illyria, with the loss of Wallachia and Moldavia, would confine the Ottoman empire in Europe to the two provinces of Bulgaria and Rometia. These last do not contain above 75,000 sq. m. of surface, and 7,000,000 of inhabitants, including the pop. of the three cities of Constantinople, Adrianople, and Sophia; and of this pop. at least one-fourth of the people are in heart enemies to the religion of Mahomet. In Africa and Asia the recent losses of the Turkish sultan have been

still greater than in Europe: Algiers is gone, and the remaining Barbary states yield a scant obedience. Mehemet Ali, the sultan's viceroy in Egypt, not only wrested the virtual dominion of that country from his master, but actually brought under his sway the four pashalics of Syria, and the province of Adana, and would have effectually dismembered the empire but for foreign interference. Yet this feeble empire "is constituted of territories the most opulent, extensive, and imperial ever known since the days of Rome. Three quarters of the globe contribute their fairest regions to its dominions. Its possessions include the richest provinces of Asia, Africa, and Europe. The superficial extent of its territory is more than double that of Great Britain and France united, and this not constituted of swamps or solitudes, but of the most renowned and productive countries under the sun. Under the sway of the government is comprised half the great basin of the Mediterranean. All the most famous cities of Asia, all the seats of ancient power and greatness—Tyre and Sidon, Antioch and Jerusalem, Damascus and Bagdad, Babylon and Palmyra, together with all the islands and seaports of that magnificent region, form but one half of the Turkish empire. In Africa it possesses the land of Egypt, itself equivalent to a kingdom. In Europe it pushes its dependencies from the waters of the archipelago up to the latitude of Paris, and as a centre of this prodigious dominion possesses a capital so wonderfully endowed with every conceivable advantage of strength and situation that conquerors of all ages have been lost in admiration of it, and Napoleon in the height of his glory spoke of Constantinople as equivalent to it all. Judged by resources, population, and means, the Turkish empire ought to be the strongest Power on the face of the globe."

Administrative divisions. The territories of the Ottoman empire are divided into *ejalets* or *eyalets*, the governors of which have the title of *vahid*, equivalent to 'viceroy.' Each *ejalet* is subdivided into *sanjaks* or *livas*, which are each placed under the superintendence of a *kaimakam* or lieutenant-governor. The livas are divided into *cazas* or districts; and the cazas into *nahiyas* or villages. These jurisdictions disregard geographical boundaries. For example, the government of the Dizajir, or 'the Isles,' which belong to the Capitan-Pasha, not only embraced the Turkish isles of Europe and of Asia, but the Morea, the province of Gallipoli, and the coast of Smyrna: the sultan having thought proper to place under the immediate authority of his grand-admiral all the countries which were not accessible but by sea, or which, by their position could contribute to the armament and supply of the fleet. At the beginning of the 17th cent., when the Ottoman empire embraced in its limits the greater part of Hungary, Transylvania, Circassia, and Azerdbijan, there were 44 *ejalets* and 220 *livas*: at present not more than half of those governments belong to T.; and the limits of each province have been greatly changed.

I. TURKEY IN EUROPE comprises 15 *ejalets*, viz.:

1. Ejalet of Edirne,	in Thrace.
2. Sillatrë,	Bulgaria.
3. Boghdan,	Moldavia.
4. Eflak,	Wallachia.
5. Vidin,	Bulgaria.
6. Nich or Nissa,	Bulgaria.
7. Uskup,	Albania.
8. Syrp,	Servia.
9. The fortress of Belgrade.	
10. Ejalet of Bosnia,	Bosnia and Croatia.
11. Rumill,	Albania and Macedonia.
12. Yania,	Epirus.
13. Selanik,	Macedonia and Thessaly.
14. Dizajir,	The archipelago.
15. Cret,	Crete.

The area of European Turkey, according to Dieterici, is as follows:

1. Rumili or Rumelia, . . .	46,119.04 geog. sq. m.
2. Bosnia or Bosnia, . . .	20,281.44
3. Silistria or Silistria, . . .	27,469.28
4. Djexair, . . .	9,289.92
5. Wallachia, . . .	21,288.52
6. Servia, . . .	15,967.36
7. Moldavia, . . .	11,770.88

182,721.44

II. TURKEY IN ASIA comprises 18 ejalets, viz.:

1. Kastamuni, . . .	In Paphlagonia.
2. Khudavendigilar, . . .	Bithynia.
3. Aydin, . . .	Lycia.
4. Karaman, . . .	Phrygia and Pamphylia.
5. Adana, . . .	Cilicia.
6. Bosoz, . . .	Cappadocia.
7. Sivas, . . .	do.
8. Tharabesan, . . .	Pontus and Celebes.
9. Erzerum, . . .	Armenia.
10. Mossul, . . .	Assyria.
11. Kurdistan, . . .	
12. Kharbut, . . .	Comagene.
13. Haleb, . . .	Syria and Oracene.
14. Saïda, . . .	Phœnicia and Palestina.
15. Cham, . . .	Syria.
16. Bagdad, . . .	Babylonia.
17. Habesh, . . .	Arabia and Ethiopia.
18. Haremi-Nabevi, . . .	Arabia.

The area of the Turkish provinces in Asia is thus estimated by Dieterici:

1. Asia Minor, . . .	158,456.16 geog. sq. m.
2. Armenia and Kurdistan, . . .	26,821.76
3. Syria, . . .	23,918.88
4. Irak and Mesopotamia, . . .	124,811.62
5. Arabia, . . .	145,800

508,808.22

III. TURKEY IN AFRICA is divided into 3 ejalets, viz.:

1. Misr, . . . or Egypt, . . .	424,672 geog. sq. m.
2. Tarabusi-Gharb, . . . Tripoli, . . .	225,296
3. Tunis, . . . Tunis, . . .	59,380

719,328

The Turkish possessions in Europe generally pass by the name of RUMILI, and those in Asia by that of ANADOLU; though, properly speaking, Rumili is but an ejalet of Albania and Macedonia, while Anadolu means only that part of the Asiatic provinces in which the Turkish and Arabic are spoken. The African possessions are called GAZA. Michelson estimates the area of the Ottoman empire at only 913,000 sq. m. The pop. was returned in 1844 as follows:

I. EUROPEAN TURKEY OR RUMILI.

Thrace, . . .	1,808,000
Bulgaria, . . .	4,000,000
Moldavia, . . .	1,400,000
Wallachia, . . .	2,600,000
Bosnia and the Herzegovina, . . .	1,400,000
Rumelia, . . .	2,600,000
Servia, . . .	1,000,000
Islands of the Archipelago, . . .	700,000
	15,500,000

II. ASIATIC TURKEY OR ANADOLU.

Asia Minor, . . .	10,700,000
Syria, Mesopotamia, and Kurdistan, . . .	4,450,000
Arabia, (Mecca, Medina, Habesh), . . .	900,000
	16,050,000

III. AFRICAN TURKEY OR GAZA.

Egypt, . . .	2,000,000
Tripoli, Fezzan, Tunis, . . .	1,800,000
	3,800,000
	35,350,000

Dividing the above population into races, and tribes, Michelson arranges them thus:

Race or Tribe.	In Europe.	Asia.	Africa.	Total.
Ottomans, . . .	1,100,000	10,700,000	..	11,800,000
Slavonians, . . .	7,300,000	7,300,000

Rumanians, . . .	4,000,000	4,000,000
Arnauts, . . .	1,500,000	1,500,000
Greeks, . . .	1,000,000	1,000,000	...	2,000,000
Armenians, . . .	400,000	2,000,000	...	2,400,000
Jews, . . .	70,000	100,000	...	170,000
Tartars, . . .	250,000	250,000
Arabs,	200,000	3,800,000	4,700,000
Syrians and Chaldeans,	225,000	...	225,000
Druses,	25,000	...	25,000
Kurds,	1,000,000	...	1,000,000
Turkomans,	90,000	...	90,000
	16,500,000	16,050,000	3,800,000	35,350,000

Taking the pop. according to religious creeds, the result according to Michelson is:—

Creeds.	In Europe.	Asia.	Africa.	Total.
Mahommedan, . . .	3,800,000	12,950,000	3,800,800	20,550,800
Greeks and Armenians, . . .	11,370,000	2,360,000	...	13,730,000
Roman Catholics, . . .	250,000	640,000	...	890,000
Jews, . . .	70,000	100,000	...	170,000
	15,500,000	16,050,000	3,800,000	35,350,000

These details may be compared with those given in a subsequent paragraph of this article.

Physical features.] European Turkey forms, with Greece, a large triangular peninsula, which in ancient times may have been connected with the continent of Asia: but if ever so, has been disjoined from it by some tremendous convulsion. Excluding the two principalities of Moldavia and Wallachia, the Danube, the Save, and the Unna, form the base of the triangle, and the northern boundary of the country; while Cape Matapan, in the Morea, is the apex. Its sides, excepting a small portion where the narrow strip of Dalmatia intervenes, are washed by the Euxine, the Ægean, and the Adriatic seas. The coasts, from the Catara on the W, to the mouths of the Danube on the E, present a highly irregular configuration, being deeply indented with gulfs, between which the salient points of mountain ridges extend into the sea. The interior is everywhere intersected by long chains of mountains generally running parallel to the base, or from E to W. On the N side of the Danube, one continuous plain extends to the Carpathian mountains and the river Pruth. The declination of the whole country between the Balkan and the Carpathian mountains is towards the Black sea: the peninsular portion of Turkey declines mainly towards the Ægean. From an Alpine central plateau, a region of wild and romantic beauty, the great mountain-chains of T. run off in different directions towards the surrounding seas. Of these, the range proceeding eastwards forks into two main branches, the Balkan, and the Despot-Dagh. The Balkan, Emin-Dagh, or Hæmus, forms the first great mountain barrier of Turkey on the N,—and runs ENE between the 42d and 43d parallels, from the termination of the Dinaric Alps, near Perserin, and the sources of the Ibar and Vardar, to the Black sea, a distance of nearly 500 m. Its numerous ramifications intersect in various directions the whole of European Turkey S of the Danube. Except in a few places, the whole extent of the ridge is impassable: steep precipices, rugged and abrupt ascents, lofty rocks, and impending crags, render the general face of the mountains so difficult, as to repel all attempts to climb them. The chain may be said to consist of three branches: two lower ridges rising at each side parallel to the great one. The intervening valleys are exceedingly beautiful; they form extensive sequestered tracts, shut out, as it were, from the rest of the world, and abounding in every production that the fecundity of nature could supply, or the most elaborate industry produce. See article BALKAN. The Despoto-

Dagh, the *Rhodope* of the ancients, strikes off from the main chain at Dubnitsa; runs SE towards the sources of the Arda, around which it takes a semicircular sweep; and then runs nearly E to Cape Makri. From Mount Scardus or Argentaro, one of the highest summits of the Balkan, and which may be regarded as the great culminating point of the whole mountain system of Turkey, a chain runs S and SE, which bore the ancient names of *Pindus*, *Cithæron*, and *Parnes*, and terminates in the *Sunium promontorium*, now Cape Colonna. This great chain divides the northern continent of Greece into two divisions of nearly equal breadth, and gives birth to all the most considerable rivers of that country which flow off, on its opposite sides, but in no instance cross it. The Dinaric Alps, which connect the mountains of T. with the vast system of the Alps, lie to the NW of the Balkan, and run through the Turkish provinces of Albania and Bosnia into the Austrian states. They divide the tributary streams of the Danube, or more properly of its ally the Sava, from those rivers which flow towards the NE coast of the Adriatic. The range detaches itself from the Julian Alps at Mount Klek near the sources of the Kulpa, in N lat. 45° 28', and running SE to the sources of the Kerka, intersects Military Croatia, and touches the frontiers of Dalmatia. From the head of the Kerka to that of the Verbas, the chain runs E through Bosnia, where it receives the denomination of Chator and Sallava. Turning SE towards the Bosnia, it forms in this part of its course Mount Ivan, and, running on towards the Drin, forms Mount Zamora. It then separates Bosnia from the sanjak of Scutari, and joins the Balkan near Peseerin. This chain is known also by the names of Baba, Rachka, Bori, and Djamus-Dagh.—The Carpathian mountains run betwixt the frontiers of Austria and Turkey. Near the sources of the Aluta, the Eastern Carpathian ridge divides into two branches; and that branch which runs along the l. bank of the river forms the boundaries betwixt Transylvania and the Turkish principalities of Moldavia and Wallachia. The principal summits which rise here are the Nagy-Hagymas, the Kaszony, the Piatra-Lapteiu, the Tatara, and the Magura. From Pojana-Mujeri to their termination on the Danube, the Carpathians run W by SW through Transylvania and the Banat, and along the Turkish frontiers. The Mali-Stirbacs belonging to this section of the chain, which reaches the Danube and causes that river to form a cataract, seems to be the connecting link betwixt the Balkan and Carpathian systems. See CARPATHIANS.—The Hellespont or Straits of the Dardanelles, connects the Egean sea with the sea of Marmora, and separates Anatolia, or Asiatic Turkey, from Akthai-Ovassi, or the Thracian Chersonnesus in European Turkey. See article DARDANELLES. The sea of Marmora, which is about 120 m. long, and in some places 40 m. broad, is connected by the Thracian Bosphorus with the Euxine, or Black sea, the *Pontus Euxinus* of the ancients, which washes the shores of Romelia, Bulgaria, and Anatolia; and the Black sea is connected with the sea of Azof by the Cimmerian Bosphorus. See articles AZOF, BOSPHORUS, BLACK SEA, and MARMORA.

The basin of the majestic Danube includes more than a third part of Turkey in Europe. It receives the Aluta or Alt in Wallachia, the Dumbovitzza, the Jalonitzza, the Sareth, the Pruth, the Sava with its tributaries, and the Morava. The possession of Bessarabia has given to Russia the command of the mouths of the Danube; but a short and by no means difficult cut of some 30 m. from Risovata to Kustendje, would remove the mouth of this important river far from Russian obstruction, and at the same

time shorten the navigation of that outlet for the industry of Central Europe, by more than 250 m., and bring its mouth, and consequently all its tributary streams, 150 m. nearer to Constantinople. The free navigation of the Danube is a point of great importance to the leading European powers. Austria, Russia, and the Porte, are the Powers chiefly concerned in the navigation of the Danube, but it is likewise connected, directly or indirectly, with the interests of so many other countries, particularly Germany and England, that the strongest co-operation of these Powers is unquestionably demanded to secure the unfettered navigation of this stream against every possible encroachment. By different early treaties connected with the Porte a perfect freedom of navigation and trade, whether the latter is carried on with domestic or foreign vessels, on the portion of the Danube which is comprised within the limits of the Turkish territory, is secured to the Austrian empire. All the subjects of Austria can within the Danubian provinces of Turkey pursue their commerce free and undisturbed, besides enjoying many special privileges. The consequence is, that in Galatz, one of the most important havens in the lower part of the Danube, one Austrian settlement has followed another, till at last it almost appears to be an Austrian place. While Austria thus took care to secure a point near the mouth of the Danube which might serve as a medium for connecting the trade of her eastern provinces with the Black sea, the Russians chiefly directed their attention to prevent the progress of navigation on the Danube from taking a direction injurious to their interests, and, indeed, to prevent the foreign trade of the principalities from being entirely absorbed by the Austrians, English, and others. To this end they wisely enough had the mouths and delta of the stream ceded to them by the peace of Adrianople. The same treaty also provides that the r. bank within the delta, so far as the same is under the Ottoman dominion, shall not be inhabited for a mile within land. In earlier times the mouths of the Danube were far more numerous than at present. Pliny mentions six: now there are but three, and even these are beginning to be more or less choked up with sand. The northern mouth has always been the least used; the middle or Sulina mouth, is the only one deep enough to admit freighted vessels of large size; while the southern arm, or that of St. George, was stopped up by the Russians. See article SULINA. The Danube forms the boundary between the body of the Turkish empire in Europe, and the principalities of Wallachia and Moldavia, which during four centuries have acknowledged the sovereign dominion of some strong power on the east or west of them. Upon the last extension of the Turkish empire in Europe, when the banner of the prophet waved in sight of the spires of Vienna, they accepted Turkish protection. Towards the close of the last cent., the sultan claimed the right of appointing the prince, called the *hospodar*, and thereafter the subjection of these parts of the empire to the Porte became almost absolute.—The basin of the ancient *Hemus*, now the Maritza, occupies the greater part of Romelia. It rises in the Mount Rulla belonging to the Balkan chain, and runs SW to Edrene, where it turns S and falls into the gulf of Enos. Its principal tributaries are the Stanimak, the Usundscha, the Arda, the Raska, the Tundscha, and the Erkene. The White Drin and the Black Drin uniting their waters in the sanjak of Scutari, form the Drin, Drilo, or *Drinus*.—The Pruth divides the Russian prov. of Bessarabia from the principality of Moldavia, and constitutes the SW boundary of the Russian empire, from its source in the Carpathian mountains to the point

where it empties into the Danube, about 75 m. from the embouchure of that river into the Black sea. —The European part of the Turkish empire enjoys a climate superior to that of almost every other European region. The seasons succeed each other with the greatest regularity; and the atmosphere is salubrious and friendly to the human constitution. In several of the large cities, indeed, the plague is a frequent visitant; but this dreadful distemper—if it originate in the nature of the corrupted atmosphere in large cities—owes its propagation and its augmented virulence to the notions of the Turks, who imagine that every precaution to avoid it is needless, and who consequently expose themselves without scruple to infection. In some quarters, the NE winds bring with them the atmosphere of Siberia; winter is colder than in any part of Great Britain, and sudden depression of temp. is frequent at all seasons. In Wallachia and Moldavia, the winter resembles that of Russia, and for some months the sledge takes the place of the wheeled carriage. Those parts of Albania which are protected by high mountains from the chilling NE winds, enjoy a delicious climate. The naked and rocky valleys of the interior, indeed, are often rendered almost uninhabitable by excessive heat; but the maritime districts, while reclining under sunny skies, are fanned by the Adriatic. The amenity of these shores is, however, counterbalanced by their liability to earthquakes.

Soil and productions. The soil is for the most part remarkable for its fertility,—producing spontaneously most valuable grains and fruits, and being capable of producing crops sufficient for the sustenance of a much greater number of inhabitants than it at present supports. Agriculture, however, is yet in a rude state, and industry finds a thousand obstacles thrown in her way. The Oriental is slow to admit of change, especially when the change affects his daily life and daily occupation: he obstinately refuses to adopt any method of improving the soil. To manure it, to grow crops in rotation, and to substitute new for effete kinds of fruits or vegetables, would never enter his thoughts. There is also a deficiency of hands to perform the operations of farming; and the farmer, narrow-minded and bigoted, occupying an exhausted soil, and often at a loss for labourers on whose efficiency he can rely, sinks into a state of poverty which becomes a fatal bar to any improvement of his condition. When he wishes to sow his land, when his store of produce is exhausted or taxes are to be paid, he is compelled to borrow money at 20 or even 30 per cent., on the security of the coming harvest; and even if he were to keep clear of usurers, and to secure the assistance of sufficient hands, he would probably gain nothing more than the power of raising an ampler maintenance for himself and his neighbours. T. has no roads. The old roads are impassable, and the means of transporting goods to and from the coast are confined to the camel and the mule, a mode of conveyance so expensive that only the more valuable goods can bear the cost. The roads are generally mere beaten pathways, made by one horseman and followed by another, and every man may make one for himself if he pleases. The only carriages are wooden planks laid upon rough wheels called *arabas*, drawn with cords by buffaloes which are seldom used except for burden. "Property in Turkey," says Mr. Macgregor in his report on the Turkish tariff, "was held after its conquest by the military chiefs and soldiery, among whom it was distributed. The *spahis* are still the chief feudal lords who hold the *salmets* or estates. Of these there were at the time of Solymán the Magnificent, 2,192 large *salmets*, and 50,180 small *salmets*, less in extent than about 500 acres; in 1818 the number of feudal estates in European Turkey was stated to be under 1,000, and in Asia Minor under 1,500. Exclusive of these, there are large estates which either belong positively, or pay a heavy quit-rent to the sultan or to the church. The pashas and their fiscal officers, who are the scourges of the feudal proprietors, extort from them and from the cultivators of the soil, the taxes either directly or through the municipalities. The consequence has been that agriculture and agricultural instruments in T. are generally in the most rude condition. In Thrace, cultivation is in a better state than elsewhere south of the Balkan. The valley of Maritza is fertile, producing rice, maize in plenty, wheat, millet, onions, artichokes, vines, various fruits and vegetables. Wheat, oats, barley, buckwheat, beans, turnips, flax, madder, tobacco, cotton, saffron, olives in the southern parts, and various other crops, are grown generally, of various qualities and quantities of production. In all European Turkey S. of the Balkan. The red wines of Macedonia and Albania would be good, or at least rich in quality, if prepared with care; but as made at present, they are either sweet or sour, never dry, and to increase the quantity, often mixed with water. Notwithstanding the rude state of agriculture in European T., there is

less poverty than, or not so much destitution as to the means of sustaining life as, in many other European states. The absence of beggary, and the actual means of enjoying their daily bread, is conspicuous in Roumelia, Bulgaria, Macedonia, and Albania. The latter prov. is perhaps the most independent in this, as well as in other respects, of all European T., although Bulgaria is by far the best cultivated." In the northern provinces the pasture is luxuriant, and wheat might be raised in almost any quantity. —One of the principal articles of export from T. to Great Britain is grain, but it was not until 1849 that the Turkish government permitted the shipment. Between that year and 1848, the increase in the exports of Indian corn from Galatz was from 597,063 qrs. to 1,370,745 qrs. or 110 per cent. The quantity of wheat exported from Ibralla during the same period increased from 687,909 qrs. to 1,862,909 qrs. or 180 per cent. The increase in the exports of Indian corn from the same port was from 224,310 qrs. to 1,448,619 qrs. or 545 per cent. Some opinion may be formed of the extent of the agricultural resources of T. when such results have been accomplished within the last few years. The growth of maize in the principality of Moldavia was at first a mere incidental circumstance, and the wealth derived from this source has been annually increasing for several years. The exports of grain from T. to this country have increased considerably, as the following official statement of the exports of grain from T. to the United Kingdom shows:

	Wheat.	Other grain.
1846,	33,726 qrs.	45,460 qrs.
1847,	142,899	773,322
1848,	33,169	398,749
1849,	163,387	585,717
1850,	135,558	358,476
1851,	339,899	759,340
1852,	127,470	787,117
1853,	478,486	980,704

We doubt whether any other state in Europe can show a more rapid advancement in its agricultural resources than T. in the same period of time. The same may be said of Egypt, well known in ancient history as the most productive corn-growing country in the world. In Roumelia the soil is of the richest description, especially from Philippoli to Adrianople, and thence to the Black sea; but the population is not a tenth of what would be necessary for its efficient culture, and it is only in the vicinity of towns and large villages that the land is manured. The operations of husbandry are for the most part performed by Bulgarians, who descend from the neighbouring mountains for a few weeks in the spring and autumn. From a want of the means of transport, no grain is brought to Constantinople from those fertile regions extending round its gates, although 300,000 qrs. of Russian grain are in some years imported into the capital. Next in extent to the plains of Roumelia are the arable flats of Bulgaria, on a peninsula formed by the Lower Danube and the Black sea. Here the prospect is more encouraging, for the peasantry are better tillers of the soil, and the district lies open to European enterprise. Hence this division of T. has the most benefited by the treaty of 1838. During that year and the first six months of 1839, only 6,000 kiloes were exported from Varna, Beljik, Kavarna, and Kostendji; but when a stop had been put to the extortions of Turkish *employés*, who monopolized trade, and were empowered to fix the price at which the peasant should furnish grain, many European agents became established at the Bulgarian ports, and within three years the exports augmented more than a hundredfold. The export of 1843 was 390 cargoes; that of 1845 about 800 cargoes. The grain of this district is now equal in hardness to any from Taganrog. In the mountain-frontiers of Bulgaria, Bosnia, and Albania, T. actually possesses but few resources.—Opium is one of the most important productions of T. It is the juice of the black poppy which is sown in November and December; and in June forms a ball which contains the seed. In these balls incisions are made, from which oozes out a milky substance, which is collected gradually, and formed either into cakes about the size of a biscuit, or balls as large as a four-pound shot, and is sent to Smyrna about the end of July. A good crop will yield 1,500 baskets of from 85 to 90 cakes each; and an ordinary one from 1,000 to 1,300. Of this quantity it is known with certainty that no more than 200 baskets are used in the Turkish empire, so that the practice of chewing opium, though still considered general here, is less universal than would be imagined. The best qualities are exported by the English and Americans for their separate speculations to China, and various parts of the East Indies.—The olive crop is of great importance in T. The average supply of oil in T. may be estimated as follows, viz.: 1st, Mitylene and the Main northery, 450,000 kintals; 2d, Smyrna and Anatolia southerly, 250,000 k.; 3d, Salonica, Volo, &c., 170,000 k.; 4th, Candia and the other Turkish islands, 200,000 k.; total kintals, 1,070,000, or about 56,000 tons. Of this quantity the annual export to Europe and the Black sea does not exceed 250,000 to 300,000 k.—Madder is largely grown for export, and raw silk, and cotton.

Animals. The Turkish dominions are not deficient in those kinds of cattle and beasts of burden which are common in other parts of Europe. The horses are improved by the Arabian breed; and are consequently elegant of form, spirited, and active.

Mules and asses are much used; and the breed of both is more perfect than anywhere else in Europe. Cattle are not scarce; but the beef is said to be inferior to that of countries farther to the W. Sheep of various kinds are reared, and the mutton is said to be excellent. The camel is common in the southern provinces. European T. has few wild animals: the jackal is said to be the most common. The species of birds and fishes are numerous; but so little is known of the natural history of these provinces, that little can be said concerning them. The Bosphorus swarms with myriads of the finny tribe, the most ordinary of which are *scomberi*, a species of mackerel, which are dried without salt by the Greeks; *palamedes* and *stavidria*, two species of dolphins; and anchovies and *nilufir*, which latter are caught by torch-light, on their migration from the Black into the White sea, during the autumn. The Bosphorus is, at times, enlivened by the gambols of shoals of dolphins, whose effigies are extant on the ancient Byzantine coins.

Minerals.] We are informed by ancient writers, that several parts of that territory which is now under the dominion of the Turks formerly had mines of gold and silver; and these metals might, perhaps, still be discovered, were the industry of the Turks equal to the search, but at present the only metals wrought appear to be copper and lead. Mineral deposits of immense value are found in Rumelia and also in Thessaly, consisting, for the most part, of galenas very rich in silver, and also in copper, iron, and alumstone. Gold intermixed with water-worn rubies occurs in the ferruginous sands of the valley of the Ardagh, which unites with the Maritza, about 2 m. NW of Adrianople. The coal formations in the neighbourhood of Adrianople are very extensive, and also near Haskoe, about midway between Adrianople and Philippoli. In the immediate neighbourhood of Adrianople the coal is of an intermediate quality, between lignite and true coal, but near Haskoe it is reported to be fully equal to good English. The mineral deposits in Thessaly are unbounded, particularly throughout that part which forms the peninsula between the gulf of Volo and the Grecian archipelago. This peninsula is an elongation of the southern arm of Mount Olympus, and embraces Mount Ossa and Mount Pelion. Mount Pelion and its slopes are also reported to present a mass of mineral wealth composed of alternating strata of crystalline limestone and schist, intersected by countless beds and veins of galena, rich in silver, copper, arsenic, antimony, iron, and a little gold.

Manufactures.] "The manufactures of T.," says Mr. Macgregor, writing in 1836, "are more important for domestic use than for exportation. Among the most distinguished are the carpets of Smyrna; crapes and gauzes of Salonica,—silks of Brussa,—printed muslins and cottons of Constantinople,—tanneries and dressed leather of Adrianople,—coarse cottons and other coarse cloths of Roumelia, Thessaly, Albania, and even of Bosnia,—various works in metal, and gold and silver lace,—some works in hair and linen,—the camlets and serges of Angora and the works of smiths and ordinary handicraft, comprise most of the manufactured products of the empire. The iron-mines of Bosnia are worked to some extent for the use of that province, where arms and some iron and copper works are made. The mines of Samakoff, near Philippoli, have recently produced cheap common iron. It would appear that not only the manufactures of cotton and silk, which are stated to have been formerly of valuable importance, have greatly declined, but that the Turks have neither taste nor inclination for the arts nor for manufactures. As the population of Armenian, Greek,

and Frank races are increasing rapidly, while those of the Turkish race appear to have been diminishing in numbers; and should there be security, hereafter, for investments in manufacturing industry, we see no obstacle to the growth and prosperity of various fabrics in Turkey, excepting, that it will long be more profitable for the several Ottoman provinces in Europe and in Asia to exchange their agricultural products, and raw materials for the manufactured goods of more populous and more advanced countries." The project of home-competition with foreign manufactures has been recently followed out with some degree of success in the neighbourhood of Constantinople. "I have been informed," says a correspondent of the *Times*, writing from Constantinople under date August 9, 1845, "that, as regards the proper government works, including the Ismid mills, the working of a coal-mine on the border of the Black sea, and of an iron mine at the Prince's islands, from which it is hoped machine iron may be obtained, they have been undertaken and are carried on solely at the expense of the sultan, who, convinced that a sure means of laying the foundation of national prosperity is by developing the productive and manufacturing resources of the country, is determined to make any pecuniary sacrifice in the attempt. The woollen trade with T. is now two-thirds in the hands of other nations; manufactured silks almost entirely so; and as to cotton, Manchester will discover that she can have but a weak competitor in her new rival; one whose success must at best be confined to a limited and inferior market. The cloth-factory near Ismid has been built on a low tract of land, two leagues from the termination of the gulf of Nicomedia, on one of those luxuriant levels common in the Pontus, where the streams of the Olympian range produce a degree of vegetation unknown in the rest of T., but also render the undrained soil a habitat for noxious epidemics. The capability for perhaps 300 horse-power of water led to the selection of this otherwise unfavourable locality. I found the centre of the factory to comprise a single apartment or flat, 280 feet by 140; roof 35 feet, with cupolas for additional ventilation. This apartment was filled with working English machinery upon the latest principles; and here the whole of the manufacture was carried on, from the first breaking the staple of the wool to the finishing of the cloth. When the factory commenced working, 11 months back, it was the intention only to make cloths of a fine quality; but difficulties were soon experienced from the inaptitude of the workmen, particularly in the burling of the cloth, and it was changed to the lowest qualities, for the army and subaltern officers: it has since then been gradually extending its efforts to produce finer qualities. They are making at present about 1,000 yds. a-week of coarse goods. The wool for the army-cloth was ordinary Turkish, with Turkish crossed Merino and Merino of the Mohallitch flock for the superior qualities. There are 138 hands employed in the factory, 58 of whom are adults. There are 10 Englishmen as overlookers, and an English director and assistant. The Eyoub cloth factory is a remunerative speculation. The Fezhane, as this establishment is commonly called, is the property of the sultan's mother. It was commenced about 18 years ago for the manufacture of fezes, but until the last 18 months its operations were very limited: since that time additional capital has been invested, an operative director (an Englishman) and a German foreman set over the works. About nine months since the factory was further enlarged for the manufacture of cloths. This machinery was made in Germany. The average work for many

weeks past has been 25 pieces, or 600 yds. a-week. All this cloth is of one quality, from 10s. to 11s. 3d. the yard, the difference being in the colours. The wool used is Merino, from Odessa and Vienna, of the middling quality. The cloth is sent into the bazaars, and finds a ready sale in competition with the foreign cloth of the same price. The simple system followed in this factory seems best adapted for an opening enterprise among a population unaccustomed to machinery. The employment of hand-looms and single cards, easier to work and keep in order, the producing one quality of cloth, and giving the workmen a high and equal monthly wage, are all calculated to insure success. The cloth manufacture promises soon a fair profit. They have made on an average at Eyoub for the last twelve-month 1,000 fezes a-day. The first, or knitting process, is done at home by women, who take the thread from the factory. The shearing and finishing processes are done by hand. There are about 400 hands; wages from 90 to 160 piastres. The fezes are sold at 9s. and 11s. The wool is coarse Turkish with middling Odessa.—The cotton-mill is set up at Heraclea, a healthy locality, 20 m. from Ismidt. It is the property of the vizier, Riza Pasha. Although I believe more ambitious hopes are entertained for this factory than any other, I found it by far the worst conducted. The mixing is half Egyptian cotton, one-fourth Turkish, and one-fourth New Orleans. They had been trying to manufacture from Egyptian cotton singly, but the staple was so long and stubborn as to baffle all their efforts. They proposed making fresh trials with heavier machines and larger rollers." The result of these, and other similarly directed efforts has been more successful than this writer appears to have anticipated. "Amongst the contributions received from Constantinople," says the official report on the crystal palace exhibition, "will be found specimens of broad cloth equal to some of our west of England manufacture, but this has been produced at a cost which precludes all ideas of competition with other countries on the important feature of cheap production; and the same observation will apply to their cotton fabrics, and silk piece-goods, in imitation of French stuffs, all of which can be manufactured in abundance, but at too great an expense at present to meet the means of the people at large. The improvement, however, in the article of raw silks may be mentioned especially, to prove that where encouragement is given to the energies of the people, in the way of remuneration for their skill, the result is manifest. Not fifteen years since the silk imported into England was of low quality, badly reeled, hastily and dishonestly packed, and averaged in value about 9s. per lb., whilst within the last few years a new feature in the trade has been introduced, by the adoption of the improved French and Italian method of reeling, by several of the most influential firms; and the merits of the Broosa raw silk are now found to be equal to any silks brought to this market, and the consignments realize for fine ordinary qualities 14s. to 16s. 6d. per lb., whilst some of the finest have been sold within the last few months as high as 27s. per lb. Should the manufacturers still be encouraged by a liberal policy on the part of the Turkish government, there is every hope that T. may become a self-supplying country to a large extent of the useful manufactures required. In embroidery and articles of gorgeous work common in Oriental states, T. has long stood pre-eminent; but the period has arrived when a display of barbaric magnificence, although characteristic, is no longer accounted the test of a wealthy power, but the statistics of imports and exports of commodities suited

to the wants of the million, are alone taken as the sure indications of the prosperity or weakness of a nation. With regard to the facilities of communication with other countries for commercial purposes, T. stands in the position of one of the 'most favoured of nations,' and her vast pop. spread over islands and on a continent margined with ports of safe and easy access to trading vessels, gives her the advantage of the ready supply to her own people of every required necessary from foreign powers, and admits of the greatest facility of exchanging her own natural productions so much required by others, and the value of which will be appreciated by a commercial people, in the list of articles enumerated in the present catalogue."

Commerce.] No country possesses greater physical advantages for carrying on an extensive commerce than T., and few have ever employed them to less beneficial purposes. Rich in native productions, and bordering upon three continents, T. might enjoy a trade with the whole world, were the industry of its inhabitants and the spirit of its merchants at all commensurate with its natural advantages. The internal trade is chiefly in the hands of Armenians, Greeks, and Jews; and the intercourse betwixt the different provinces is checked by the want of union betwixt the different component parts of the population, the absence of good roads and regular posts, the rapacity of the pashas, and the high rate of interest one per cent. per month paid for money. Jewish Armenians and Greek brokers also transact all business with the foreign market. The principal articles of exportation are: cotton from Thessaly; silk from Romelia; corn, flax, tallow, and hides from Bulgaria; tobacco, currants, raisins, wine, from the coast; and copper from Trebizond. Those of importation are: cotton-cloth, coffee, sugar, spices, glass, hardware, jewellery, paper, and slaves from Georgia, the Caucasus, and Africa. The commerce of T. is in a livelier condition than its industry. Taking the imports and the exports together, it may be estimated at somewhat under £20,000,000 per annum, exclusive of about £1,000,000 for the commerce with the European tributary provinces, and of about £5,250,000, the commerce of Egypt, as shown in the exports and imports of Alexandria, those to and from Turkish ports not being included in the calculation. The trade between Turkey and England has increased to an extraordinary extent, from about £500,000 in 1827, to upwards of £4,000,000 in 1852. The chief articles of import from T., exclusive of Syria and Egypt, to the United Kingdom, in 1849 and 1853, were as follows:

	1849.	1853.
Yellow berries, . . .	7,515 cwts.	6,893 cwts.
Wheat, . . .	103,716 qrs.	238,417 qrs.
Maise, . . .	280,730 —	334,864 —
Figs, . . .	29,210 cwts.	28,569 cwts.
Madder, . . .	99,701 —	111,920 —
Opium, . . .	94,844 lbs.	145,063 lbs.
Raisins, . . .	31,066 cwts.	177,745 cwts.
Raw silk, . . .	278,238 lbs.	621,461 lbs.
Lamb skins, . . .	83,768 no.	237,563 no.
Sponge, . . .	151,581 lbs.	130,192 lbs.
Tobacco, . . .	25,913 —	533,288 —
Wool or Goats' hair, . . .	2,476,092 —	2,916,509 —
Sheep and Lambs' wool, . . .	422,265 —	2,605,546 —
Shawls, . . .	£12,364	£3,361

The value of the principal articles of export to T. from the United Kingdom, in the same years, was as follows:

	1849.	1850.
Cotton, . . .	£1,658,826	£1,510,622
Cotton yarn, . . .	179,398	158,366
Iron, . . .	103,078	33,399
Tin, . . .	35,499	30,214

The total exports of the produce and manufactures of the United Kingdom to T. in 1849, were £1,515,821; in 1853, £2,029,395. It should be observed, however, that not much more than half these English imports are consumed in T., the remainder passing by way of Trebizond to Persia. T. receives chiefly our cotton manufactures, linen manufactures, hardware, iron, coal, and colonial produce. Our chief imports from T. are flax, raw silk to the extent of about 220,000 lbs., cotton-wool to the extent of nearly 20,000,000 lbs., grain of various kinds, opium, &c. France is not in so favourable a position as regards her commerce with T.; the gross total of imports into T. from France being about £1,000,000, while the exports of T. to France exceed £2,000,000. The total commerce of T. with Russia (exports and imports) is somewhat more than £1,500,000, the balance of exports and imports being slightly in favour of Russia; with Austria, nearly £3,000,000; with Holland and Belgium about £260,000; with Persia about £1,000,000; with Switzerland, the United States, and other countries, about £1,500,000. These are all more or less on the increase, and do not include the commerce of Egypt by way of Alexandria.

The navigation of T., which is chiefly carried on by foreigners, is on the increase; but the most remarkable evidence of progress is to be found in the rapid and vast extension of steam navigation for mercantile purposes. Between 1841 and 1849 the number of steamers entering Constantinople had increased from 274 to 486. There is a direct and constant communication by first class steamers between Southampton and Constantinople, and recently there has been established a similar line from Liverpool. The communication between the capital and the main parts of the empire, in the Levant, the Archipelago, and the Black sea, is singularly well organized and regular. The returns for T. for 1851 do not give either the number or tonnage of the Turkish vessels which entered and cleared the port of Constantinople, neither do they afford any information of the same kind with respect to the port of Alexandretta. The returns for the Danubian principalities only give the number of Turkish and foreign vessels cleared from the ports of Galatz and Ibraïla, and the nature of their cargoes, but not the tonnage employed. In 1851 there were 365 Turkish and 1303 foreign vessels cleared from these ports. The total number and tonnage of vessels which entered and cleared with cargoes and in ballast at the various ports of the Turkish empire, exclusive of Egypt, in 1851, were as follows:

Ports.	Turkish.		Foreign.	
	Vessels.	Tonnage.	Vessels.	Tonnage.
Constantinople.	No return.		13,099	2,459,232
Bulmon.	804	41,202	797	79,728
Samsun.	98	113,220	116	68,502
Trebizond.	181	114,500	142	86,267
Sinova.	163	15,407	1,719	234,699
Rhodes.	1,274	102,408	305	44,134
Byzant.	161	25,500	458	110,814
Alexandretta.	No return.		170	57,500
Galatz.	365	—	1,303	No return.
Total.	2,972	415,287	18,068	3,122,876

The number and tonnage of vessels which cleared from the ports of the United Kingdom to T., exclusive of Syria and Egypt, in 1849, was 434 = 100,573 tons; in 1851, 648 = 160,695 tons; in 1853, 876 = 257,860 tons.

The origin of our trade with T. is of but recent date, as previous to the last war between England and the Porte, in 1807, but two or three of our vessels annually proceeded to Constantinople with assorted cargoes. Of these cotton goods formed but a small proportion, and very few also were sent to

Smyrna. An English merchant, who had conceived a just opinion of its capabilities, established a house at Constantinople in 1812, and for several years it had the entire sway of the direct trade with England. From 1813, Constantinople became a rival mart with Smyrna, which it has at length completely eclipsed for British manufactures. Goods for Persia form of late years the most valuable parts of the shipments to Constantinople, which is not only in the direct road, but offers nearly as great advantages from being an intermediate market. The shipments to T. between 1827 and 1834, advanced to £467,000 in wove cottons, £70,000 in twist, and £692,000 in the aggregate of all articles. The following quinquennial averages will show that, while our exports to T. have much more than doubled in the course of twenty years, those to Russia have remained nearly stationary:

Average.	Turkey.	Russia.
1831-5	£1,072,637	£1,488,978
1836-40	1,541,075	1,765,887
1841-5	2,301,838	1,934,213
1846-50	2,872,267	1,704,179
1851 (single year)	2,581,250	1,289,704

We find that in 1831 T. took about 24,500,000 yds. of 'cotton manufactures entered by the yard'—in 1850, 141,000,000 yds. Of 'cotton twist and yarn' she took 1,730,000 lbs. in the former year, and 6,330,000 in the latter. On the other hand, our exports of the first-named article to Russia have fallen from 2,000,000 yds. to 1,500,000; and those of the second, from 14,000,000 lbs. to less than 3,500,000 lbs. Taking values instead of quantities, our whole export dealings with the two countries in cotton and cotton manufactures would stand thus at three different periods:

Exports to Russia. Exports to Turkey.

1831	£866,035	£687,823
1841	1,132,901	1,402,366
1851	225,117	2,077,766

During 1843 and the four following years, the amount of Austrian manufactures taken by T. had risen from £600,000 to more than £1,000,000—which was pretty exactly one-third of the total value of the manufactures exported from Austria—while the amount sent to Russia scarcely exceeded one-twentieth in any year out of the five. Commercially speaking, Russia is, indeed, wholly valueless as a neighbour to Austria. On emergencies, she supplies cereal produce to provinces which adjoin her frontier, but she contributes neither raw materials nor manufactures to any extent worth mentioning. With T., on the other hand, Austria has carried on a commercial intercourse annually increasing in value, and supplying not only food, but one-seventh of the whole raw material which enters the empire and its dependencies both by land and by sea. By a treaty between the Porte and Great Britain, all goods and merchandise, the growth of the soil, or the produce of the manufactures of Great Britain and Ireland, as well as of the countries belonging to it, and the property of British merchants, as also the goods and merchandise arriving in English vessels, or from any other country by land or by sea, is admitted into all parts of the Ottoman empire, on paying a duty of 3 per cent. *ad valorem*. In lieu of the duties which are now levied in the interior of said goods and merchandise, the merchants by whom they are imported shall be liable to an additional duty of 2 per cent., whether they sell them at the place of their arrival, or convey them for sale into the interior. British merchants are at liberty to purchase in all parts of T. all goods and merchandise imported from foreign countries. If these articles have only paid the import duty of 3 per cent., they are liable to the ad-

ditional duty of 2 per cent., previous to their being conveyed for sale into the interior; but when afterwards sold in the interior, or sent to another country, they are not subjected to the payment of any other duty. No special monopoly, with the exception of that of opium, exists in T.; but there are restrictions on particular articles which call for removal. Owing to these valonea is seldom to be bought but from the authorities at the place of growth, or by special permission. With us this acorn is extensively used in tanning and dyeing, in which 7,000 to 8,000 tons are annually consumed. Cheapness, in comparison with bark and other materials used for the same purpose, is the great requisite to increase its employment without limit, and the supply in T. is now only adequate to a high-priced demand. Wool is also engrossed in the same way in some parts of Romelia, as at Adrianople and Salonica by the pashas, who re-sell to the merchants, or derive a profit from their other contracts. From the immense tracts fit for sheep-pasturage throughout Turkey it might still be raised in far greater abundance, and the quality improved by new breeds. A cargo of wheat, grown in the neighbourhood, was imported from Smyrna into England in 1831 with the permission of the governor. Oil is chiefly furnished by the aga of Mitylene, who is at the same time the contractor with the export merchants, and pays for the perquisites of his place. This island, with the country on the opposite main to the entrance of the gulf of Smyrna, and many other places around, are olive-districts, as are the southern shore of the Marmora, Scio, Samos, and the vicinity on the Turkish coast. The forests of Albania afford inexhaustible stocks of the finest oak, besides the more distant coasts of the Black sea between Samsoun and Trebizond and the banks of the Danube. The copper of Tokat is chiefly sent to France. With one or two exceptions of private property, the mines belong to the Porte, and extend from near Trebizond to Mesopotamia, from the Euphrates to the confines of Persia: their produce, if they were properly worked, would be beyond all comparison with their present amount.

Railroads. The first want of this empire is the want of roads: instead of roads, then, to give railroads would be making a giant stride in advance. Three lines of road have already been spoken of—one from Constantinople to Adrianople, another to Smyrna, and a third to Varna. Adrianople has very extensive commercial relations with Constantinople, and yet the communication between these two first cities of the Ottoman empire is a most fatiguing, tedious, and expensive one. By land it requires four or five days' travelling on horseback on bad roads—the distance is 160 m.—and by water there are, in every season, difficulties of another kind. The port of Enos is nearly blocked up with the accumulated deposits of the river Maritza, and is therefore a very unsafe harbour; and the river itself, full of rocks, in winter has its banks generally overflowed, and in summer has often so scanty a stream in its channels, that large boats cannot sail up to Adrianople. A railroad, consequently, on this line would offer the best prospects of success. The localities are favourable, the whole distance being plains or slightly undulated, whilst the traffic would be immense, as through the river Maritza, Arda, and Toondja, whose conflux is at Adrianople, you get into the most productive provinces of Rumelia. Engineers have recently completed the levels of the line of country from Constantinople through Adrianople, Philippoli, Sofia, and Nissa, to Belgrade, with the following branch lines:—1. From Adrianople to Shumla, Rusjuk, and Bukarest, and from Shumla to Varna. 2. From Sofia to Viddin and Orsova. 3. From Nissa, by Gorguetzvatz to Viddin. 4. From Adrianople, by the Valley of the Maritza to Enos. 5. From Sofia to Salonica, in Macedonia. 6. From Constantinople to Bugukdéré; and lastly, in Asia a line has been surveyed from Scutari on the Bosphorus, to Brussa. None of these projects, however, are likely to be realized for many years to come. "The only works which can pay in T." it has been well observed, "are those of the simplest construction and the most common use. Whenever the subject is mentioned in conversation, some one is sure to talk about the railway from Constantinople, through Adrianople, to Belgrade. Now, this railway would cost about £7,000,000, more than the whole revenue of the country; and if the money were raised by Turkey, nearly 7 per cent. interest must be paid. To the resources of the empire the sum would be as great a burden as £120,000,000

to us. The country is a desert for hundreds of miles, and the undertaking would probably never pay 1 per cent. In fact, railways are for the present out of the question. What are wanted are roads to bring produce to market, and to facilitate the present long and dangerous journey. Where nothing more than a horse track has existed, it is impossible that a railway can be successful all at once." These remarks are unquestionably sound, and many years must elapse before a railway system can be profitably organized in T. The facilities, however, which T. offers for the prolongation of the great lines of European railway towards the regions of the East, have been ably investigated by Dr. Platé, who has pointed out the error which formerly prevailed respecting the S part of Servia, and the adjoining tracts, which were believed to be rendered inaccessible by Alpine chains. History alone showed that those parts could not but be accessible, since the great military roads of the Romans from Constantinople and Thessalonica led right through them, namely, through *Dardania* and *Movia*. In the middle ages, *Dardania* was the theatre of bloody wars between the Turks and the Serbians; and we know that most of their battles were fought on level plains with much cavalry on either side. Dr. Boos's recent work, *Le Turquet d'Europe*, informs us that this country, which is a level upland between the high Chiradagh in the W. and the Great Balkan in the E, is intersected by a few low and isolated ridges which stretch from W to E, and are between 1,000 and 1,400 feet above the level of the sea; but the most remarkable feature of them is, that they are intersected by deep gaps, some of them very wide, in the direction from N to S, forming as many easy passages from Servia into Bulgaria, Rumelia, and Macedonia. The ascent of these gaps is so imperceptible that the traveller is not at all aware of his crossing one of the most important mountain-systems, or more correctly plateaux, of T. The most important gap is the long and wide valley of Nissa and Sophia, through which the high-road from Belgrade to Constantinople winds, and which is like a trough encompassed by two parallel chains of mountains, those in the W being low and in their turn intersected by some of those gaps, so as to afford an easy communication with the valleys of the Strymon and the Vardar in Macedonia. This country opposes no physical difficulties to the construction of railways. A railway from Saloniki, across Dardania, to Belgrade, and thence to Vienna, either through Hungary by Pesth, or through Slavonia towards Mahrburg in Styria, where it would join the Vienna and Trieste railway, would reduce the journey from Alexandria to London to one-half of the time now required, and Trieste—that is, supposing the projected and partly-executed lines between Vienna and Cologne, Bremen, Hamburg, and Berlin be finished. The straight line would be from Cologne along the r. bank of the Rhine, by Frankfurt, Würzburg, Nürnberg, Ratisbon, Passau, and Ling—all large and highly commercial towns—to Vienna, and thence, as mentioned above, to Belgrade and Saloniki. In Servia this railway would run along the r. bank of the great Morava, which flows through a wide and level plain as far as Jagodin, where it would leave the valley, on account of the defiles near that town, and go over low upland, either towards Nissa and Sophia, through the great gap mentioned above, or descending again into the valley of the Morava, would go as far as Vrana. Between Vrana and the junction of the Bulgarska-Morava with the great Morava, there is only one obstacle, viz. a ridge of calcareous rocks, round the base of which flows the Bulgarska-Morava, leaving only a narrow space between the river and the rock. It takes ten minutes to walk round that rocky projection, and it would be easy to make a tunnel across. From Vrana the line would pass, through one of the gaps aforesaid, across the level upland to Uskub on the Vardar, whence it would go S in the valley of that river as far as Gradiaka. There are rocky defiles called Demir Kápid, or the Iron gate, and it would be necessary to lead the road over the uplands, which are not high, and of very gentle ascent. Once past Demir Kápid, the road would follow the Vardar in a level, wide, and most beautiful valley as far as the junction of the Vardar with the Egean sea, a few miles W of Saloniki. The line by Nissa and Sophia could be continued to Constantinople by Adrianople, there being no serious obstacle but the ancient *Porta Trjagana*, a narrow defile south of Ikhtiman in the Great Balkan. From Nissa or Sophia it would be easy to lead a line across some of the gaps west of those towns, which would run south of Kostendil—but not by Kostendil—and, following the valley of the Egerb Su, join the Vardar a little below Uskub. Dr. Platé makes the following calculations:—

From London to Ostend, 9 hours.

From Ostend to Saloniki, direct distance, 1,280 miles; add $\frac{1}{4}$ for rounds and deviations from the straight line, or 160 miles, gives 1,440 miles. Suppose 17 miles per hour, which is the average speed on the Vienna and Olmütz line, would give nearly 85 hours, or 3 days and 13 hours; but as, no doubt, a special train would be allowed for the despatch of the India mail, the distance would be performed in 73 hours, at the rate of 20 miles per hour only; and of 57 $\frac{1}{2}$ hours at the rate of 25 miles: say 70 hours.

From Saloniki to Alexandria, 770 miles steaming, at the average of 11 miles per hour, 70 hours: say 8 days.

Whole distance from London to Alexandria performed in either 4 days 22 hours, 6 days 9 hours, or 5 days 18 $\frac{1}{2}$ hours.

Monies, weights, and measures. Accounts are usually kept in piastres, which are divided into

paras and *aspers*; 3 *aspers* make 1 *para*; 40 *paras*, or 120 *aspers*, 1 *piastre*; but for the convenience of reckoning accounts are often kept in *piastres* and *centimes*. Money is also reckoned by 'silver purses' of 1 *kefer* = 500 *piastres*, and gold purses of 1 *kitze* = 50,000 *piastres*. The gold coins recently in circulation were the *chequin* or *sequin* of 5 *piastres*, with halves and quarters of the same; their value, like that of the *piastre*, varies according to their purity. In 1852, the Porte published a memorandum addressed to the representatives of the different Powers, which had for its object to prohibit the circulation of foreign money. According to this note, the money coined with the name of the sultan, the paper-money issued in the capital, the silver pieces of 5, 2½, 6, 3, and 1½ *piastres*; those of gold of 20, 10, and 5 *piastres*; and the Ottoman money coined in the preceding reign, will alone be allowed in commercial transactions. All other old Ottoman coins and foreign coins are prohibited. All persons who have the prohibited coins in their possession are ordered to bring them to the mint and exchange them for legal ones. The *cantar* of cotton, in yarn or wool, is 45 *okes*. Silks from Persia are sold by the *ostman* of 6 *okes*; and from Brussa, by the *tasse* of 610 drachms. The *chequee* of opium is 250 drachms; and of goat's wool, 800 drachms.—The *oke*, 2-272 *rotoli*, is the principal weight, and is equal to 2 lbs. 13 oz. 5 drachms *avoirdupois*. There is also the *chequee*, equal to 4,967 grains; and the *cantaro*, or quintal of 100 *rotoli*, is equal to 124 lbs. 9 oz. 12 drachms *avoirdupois*.—The *almud* is equal to 1 gallon and 3 pints English wine measure, or about 6 litres. It is generally used for wine, oil, and other liquids. But the *almud* of oil is estimated to weigh 8 *okes*.—The *pic*, or pike, is generally estimated in commerce as equivalent to ⅔ of a yard, English. There are, however, the long *pic*, called *archim* or *kalebi*, with which silks and woollen cloths are measured; and the shorter *pic*, called *endrezeh*, for cottons and carpets. Of the *archim*, 100 are equal to nearly 77½ English yards; and of the *endrezeh*, 100 are equal to 74½ yards.—Four *kialoz* = 1 *forter*, or *fortin*, and the *forter* contains about 3½ Winchester bushels, and weighs 240 lbs. The *kialoz* of rice weighs 10 *okes*.

Population.] It is difficult to estimate even approximately the pop. of such a country as T., whose moral and political institutions differ so widely from our own, where no accurate census has been taken, no registers of deaths and births kept, and the number of houses is unknown. Two general censuses of the whole empire were indeed made by order of the government in the 16th and the beginning of the 17th cent., but their results are not now known; and though they were, they would not greatly assist us in estimating the probable amount of the existing pop. In the *Staatshandbuche* for 1816, the pop. of the whole Ottoman empire was calculated at 24,072,000, and this estimate is adopted by Hassel. *Leichstenstern* estimated it in his *Statistical Tables* of 1819 at 24,880,000, and *Gräberg* the same year at 24,000,000. Supposing the houses to be as thinly scattered as in the less populous parts of Spain, *Malte-Brun*, writing in 1820, says the pop. of the empire may amount to between 25 and 30 millions. *Baron Humboldt*, about the same period, estimated it at 25,330,000. But in the elements of these different calculations we find great discrepancies. One geographer, for example, assigns 6,000,000 to Asia Minor; another estimates the pop. of that part of the empire at 12,000,000; equally wide are the discrepancies in the different calculations of the pop. of Egypt. Again, with regard to the European portions of the Turkish empire, the *Staatshandbuche*

for 1816 reckoned it, inclusive of Greece, at 9,482,000; while *Crome*, in his survey of the political strength of Europe, estimated the pop. of the same territory at only 6,700,000; and *Lindner* at 5,390,000. *Hassel's* approximation of 11,600,000, as the pop. of the European part of the empire in 1816—though considerably above *Balbi's* estimate in 1826—was probably pretty near the truth. This pop. *Hassel* distributed in the following manner:—

The whole of Ancient Greece,	3,000,000
The Islands, Crete, and Gallipoli, but exclusive of the small Asiatic Islands,	600,000
Bosnia,	1,000,000
Wallachia and Moldavia,	1,500,000
Servia,	1,800,000
Thracia, with the two capitals,	2,200,000
Bulgaria,	1,500,000
Total,	11,000,000

This estimate is considerably under that of *M. Boué*, who arranges and numbers the pop. of T. thus:

Turks,	1,100,000
Albanians, (Arnasots) (mostly Mohammedan),	1,600,000
Bosniacs (Mohammedan),	900,000
Hertsegovines and Christian,	400,000
Slaves or Croats,	
Slavonians, Servians, proper,	900,000
Montenegrines,	100,000
Bulgarians,	4,500,000
Romani, Wallachians and Moldavians,	3,550,000
Zinzars, in Epirus and Thessaly,	800,000
Greeks,	1,000,000
Armenians,	200,000
Jews,	200,000
Gipsies and various,	250,000
	15,200,000

In an opening paragraph of this article we have given an estimate of the pop. of the Ottoman empire, founded to a certain extent on official documents, and adopted by *Michelson*: but as at the present crisis all information, derived from personal research and experience, with respect to the real condition of Turkey, has become doubly interesting, we here subjoin the substance of an elaborate calculation of the number and distribution of the inhabitants of European Turkey, which appears in the appendix to *Mr. G. F. Bowen's* recent work, entitled *Mount Athos, Thessaly, and Epirus*. "The real amount and distribution of the pop. in the heterogeneous provinces known by the general name of Turkey in Europe," *Mr. Bowen* remarks, "are problems which have never yet been fully solved. The European subjects of the Porte have been rated as high as thirteen or fourteen millions by *Mr. Urquhart* and other writers; but this number undoubtedly far exceeds the truth. All statistics of this nature are more or less guess-work in the East; for Orientals still retain the ancient prejudice against any accurate 'numbering of the people;' a process which is connected in their minds with conscriptions, poll-taxes, and other disagreeable associations. I will, however, subjoin a translation of a very able paper on this subject, which was kindly drawn up for me by my learned friend *Dr. Philotas*, Greek professor in the University of Corfu. He is a native of Epirus himself, and has long and deeply studied the ethnology of Turkey in Europe. The diligent inquiries which I have myself instituted in various well-informed quarters at Constantinople and elsewhere, make me feel pretty certain that his calculation is not far from the truth. If it errs at all, the mistake lies in rather underrating the number of the Mahomedans. Perhaps they approach more nearly to a third than to a fourth part of the whole population."

I. WALLACHIA AND MOLDAVIA, inhabited by Wallachians, or Daco-Romans, calling themselves in

their own language <i>Romouni</i> , and all of the Eastern, or Greek church. [N. B. a few villages in Epirus are inhabited by Wallachs, some of whom are also found scattered throughout most parts of T. chiefly as shepherds and carriers.]	8,000,000
II. BOSNIA, TURKISH CROATIA, HERZEGOVINA, MONTENEGRO:	
Christian Slavonians (Greek church),	280,000
Ditto ditto (Latin church),	200,000
Mahommedan Slavonians,	400,000
	880,000
III. SERBIA is entirely inhabited by Christian Slavonians of the Greek church, with the exception of Belgrade and a few other garrisons of Ottoman troops.	
Christian Slavonians,	900,000
Mahommedan Ottomans,	10,000
	910,000
IV. BULGARIA has—	
Christian Slavonians,	420,000
Mahommedan Ottomans,	140,000
	560,000
N. B. The Christian Slavonians in Thrace and Macedonia also speak the Bulgarian dialect of Slavonic, and are usually called Bulgarians.	
V. THRACE and CONSTANTINOPLE have—	
Christian Slavonians,	290,000
Greeks,	200,000
Ottomans,	500,000
Armenians,	80,000
Jews,	80,000
	1,020,000
VI. MACEDONIA has—	
Christian Slavonians,	250,000
Greeks,	200,000
Mahommedan Ottomans,	150,000
Ditto Slavonians,	30,000
Jews,	30,000
	760,000
VII. ALBANIA is inhabited by Christian and Mahommedan Albanians, calling themselves Skipetar in their own language. They are probably the descendants of the ancient Illyrians.	
Christian Albanians (Greek church),	80,000
Ditto ditto (Latin church),	60,000
Mahommedan Albanians,	280,000
	520,000
VIII. EPIRUS (i. e. Albania south of the Acroceraunian promontory) is inhabited chiefly by Greeks, partly also by Mahommedan Albanians, and by Mahommedan Greeks, i. e. the descendants of renegades of Greek race.	
Greeks,	300,000
Mahommedan Albanians,	50,000
Mahommedan Greeks,	10,000
	360,000
IX. THESSALY has—	
Greeks,	250,000
Ottomans,	30,000
Jews,	10,000
X. CRETTE is inhabited entirely by a race of Greek descent, but of which a portion has apostatized to Mahommedanism.	
Christian Greeks,	150,000
Mahommedan Greeks,	50,000
	200,000
So that the total in round numbers is about	8,500,000
According to this calculation there are in the European provinces of the Ottoman empire:—	
I. CHRISTIANS , in all, 6,650,000, viz.:—	
a. Christians of the Greek or Eastern church:—	
Wallachs,	8,000,000
Slavonians,	2,150,000
Greeks,	1,180,000
	6,330,000
b. Christians of the Latin or Western church:—	
Slavonians,	200,000
Albanians,	60,000
	260,000
c. Armenians,	60,000
	6,650,000
II. MAHOMMEDANS , in all, 1,750,000, viz.:—	
Ottomans,	820,000
Slavonians,	430,000
Albanians,	450,000
Greeks,	60,000
	1,750,000
III. JEWS , in all, 100,000.	

"We must add," says Mr. Bowen, "to the total a few thousand Zingaris or Gipsies. The Frank residents in European Turkey certainly do not exceed 100,000. By this term are meant the subjects of the various European powers; Ionians, who are considered as British subjects; and such Greeks as are subjects of the kingdom of Greece. So that the grand total of the inhabitants of Turkey in Europe probably somewhat exceeds 8,500,000." The country might certainly maintain a population four times more numerous without being overstocked; and indeed may have done so in the brilliant epoch of the Byzantine empire. M. Jomard—who in his *Statistique de la Turquie*, estimates the whole pop. of European T. at 11,240,000 souls—remarks that the mean number of inhabitants of this empire is but at the rate of 294 individuals per square league, whilst the number in France is 1,200, in England 1,600, and in the Netherlands and Lombardy 2,000. In order to make a *levy-en-masse* of 30,000 or 40,000 men, the whole pop. fit to bear arms of a country much larger than Sicily or Belgium would be required in this empire.

Turks. The pop. of European Turkey, it appears from the above tables, is of very mixed descent. The Turks properly so called—although they form but a very small proportion of the pop.—having the dominion of the country, take the precedence of all the other tribes. They are the descendants of a people who still inhabit the shores of the Caspian, and the steppes of Upper Asia. They are a fine-looking race of men, seldom below the middle size, with lofty foreheads, dark eyes, finely cut features, and limbs cast in the Grecian mould. The full form of their limbs may perhaps in some measure be attributed to their loose mode of clothing themselves, which leaves the body free from those ligatures so common among their western neighbours; but the personal elegance of the Turk is chiefly owing to the mixture of different blood in his constitution: Arab, Grecian, and Persian blood all flow in the veins of an Ottoman, and conspire to make him the handsomest of human beings. Of their women, the countenances are more striking than the form or the gait: both the latter are probably hurt by their confined mode of life which deprives them of that kind of exercise which alone can bring the human shape to perfection, and by their manner of sitting which is said almost invariably to induce a habit of stooping. The Turk still retains the same character which the histories of the 15th century attribute to him. Indolent in time of peace, when war rouses him, he becomes infuriated; unrefined and sensual in his ideas of pleasure, yet moderate withal in his enjoyments; often starting from the lap of luxuriousness to bear the severest privations without grumbling; inhuman in his vindictiveness, yet frequently carrying an exalted friendship to a point of heroism; his courage manifests itself sometimes in a chivalrous heroism, on other occasions in a stoical indifference. Lord Carlisle's estimate of Turkish character, as that of an accurate and trustworthy observer, may be here quoted: "Among the lower orders of the people," says his lordship, "there is considerable simplicity and loyalty of character, and a fair disposition to be obliging and friendly. Among those who emerge from the mass, and have the opportunities of helping themselves to the good things of the world, the exceptions from thorough-paced corruption and extortion are most rare; and in the whole conduct of public business and routine of official life, under much apparent courtesy and undeviating good breeding, a spirit of servility, detraction, and vindictiveness appears constantly at work. The bulk of the people is incredibly uninformed and ignorant. Upon the state of morals I debar myself from entering. Perhaps the most fatal, if not the most faulty, bar to national progress, is the incurable indolence which pervades every class alike, from the pasha, puffing his perfumed *saraph* in his latticed kiosk on the Bosphorus, to the man in the ragged turban who sits cross-legged with his unadorned tchibouque in front of a mouldy coffeshop in the meanest village. In fact, the conversation of every man whom I meet, who is well-informed on the state of the population, with very few exceptions, might be taken down as an illustration, often very unconsciously on their part, of the sense usually assigned to the prediction in the Apocalypse of the waters of the Euphrates being dried up. On the continent, in the islands, it is the Greek peasant who works, and rises; the Turk reclines, smokes his pipe, and decays. The Greek village increases its pop., and teems with children; in the Turkish village you find roofless walls and crumbling mosques." Yet, after all this has been said and admitted, it must still be allowed that the Turks are the noblest and most honourable nation, amongst that multifarious aggregation of nations who inhabit the broad realm of the house of Osman. The rayahs of all nationalities hold throughout an inferior position in point of intelligence or character. The Slaves are more uncivilised, the Greeks and Wallachians are on a far lower standard of morality, than the Turks. Greeks, and Armenians in particular, both the clergy and the laity, will extort the last para from the Christian pop.

The great majority of the Turks, on the other hand, are honest, charitable, and tolerant, though it cannot be denied that they incline to pride, indolence, and fanaticism. The Osmanli is par excellence called to exercise dominion over an uncultivable conglomeration of races; and as he represents the more opulent part of the pop. it is his province, even according to the spirit of modern political institutions, to be a public functionary. The immense majority of the rayahs are poor, dependent, and tillers of the soil which almost exclusively belongs to the Turkish lord of the pashas. It would be tantamount to a destruction of the empire if the dominion of the Ottoman race were suddenly to cease, or to be shared by the rayah. The Turkish Slave has no spark of sympathy for the Turkish Greek; the Arnaut has as little for the Wallachian; but they are all held in awe by the Turk. The Turks, until very recent times, were accustomed to cover the head with a turban, or a kind of cap surrounded by numerous folds of cloth. Of the turban the sizes and forms were extremely numerous; each size and form indicating something in the rank or condition of the wearer. The Turkish garments, unlike those of the western European nations, were also loose and flowing. The lower parts of the body were covered with wide trousers or rather trousers. The shirt had wide sleeves without wristbands; and over this was worn a kind of wide vest bound with a sash, and above all, a long flowing gown. The head was then, except a small lock upon the crown; but the beard was even longer, and frequently artificially dyed. Different professions, particularly the military and learned classes, were distinguished by peculiar habits; and different nations were known by wearing either, if not of a particular form, at least of a particular colour. Sumptuary laws were in force, regulating the colour of the dresses, the colour of the slippers or boots, and the size and shape of the turban. To infringe these laws was extremely dangerous for a Turk, and almost certain destruction to a Christian. But the day of the turbaned Turk has passed. "Sultan Mahmud, in his desire to imitate Peter the Great, completely metamorphosed the appearance of all persons employed under government—that is to say, of nearly every one who was formerly possessed of wealth sufficient to wear the old costume with proper emphasis. His example has been followed by his successor; and every functionary, high or low, has been compelled to assume a kind of Frankish costume, topped by the fez or red cap, which formerly formed the skeleton as it were of the turban. I am disposed to think," says Mr. B. St. John, "that this change has gone a great way towards destroying the nationality of the Turks. It was thought that with the European dress these barbarians would assume the activity and energy of the Glaiours—perhaps, also, their instruction and their civilization. Contrary effects were produced. In the first place they do not yet know how to wear a frock-coat, and are often to be seen with one arm only in the sleeve, while at other times they button the garment at the throat, and allow it to hang round them like a cloak. They have not yet got over the habit of sitting cross-legged, and at their ease, so that their backs are almost always rounded, and they walk in a shuffling, shambling manner, totally inappropriate to their tight dresses. Few of the Turks have really become reconciled to their new costume; they feel like winged birds, or the fox without a tail, many of them on returning to the privacy of their harems, learn to throw aside their infidel frock-coats, and to dress themselves as their fathers dressed before them, and after the fatigues of the day, to undergo the wearisome operation of binding round their abdomens with a sextuple shawl! The Osmanli of the present era wears coat, waistcoat, and trousers; and a red skull-cap is the only mark that distinguishes him from the European. Amongst the lower orders the Oriental dress is still retained, and the peasant still clings to the elegant Oriental robe and turban. In the interior of the country—that is to say in Asia—Turkish dress and habits still flourish in their primitive state. The female dress consists of long loose flowing robes, and differs not materially in form from that now abandoned by the male portion of the community. The head, instead of a turban, is covered with a stiff kind of cap; but with regard to this part of the body less uniformity prevails among the women than among the men. When a female appears abroad, the veil is indispensable, and so disguises her that she cannot from her appearance be known even to her most intimate friends. Cleanliness is enforced upon the Turks by their religion, which declares frequent ablutions to be absolutely necessary. It is somewhat singular, therefore, that some have attributed the prevalence of the plague in the large Turkish cities, to the uncleanness of the Turkish mode of living. The truth is, that not only the Turks, but all other Mohammedans are, in their mode of life, much more cleanly than the generality of Christians. In eating, no people are so moderate. Their food is simple; and is seldom taken in excess. Rice forms the principal article, and is dressed in various ways, sometimes with mutton and fowl, but often without either of them. The general abstinence of the Turks is normally enforced by the Ramadan or yearly fast; but a rather destroyed than aided by the way in which that fast is observed. The Ramadan continues a month, and revolves through every month of the year. During the whole period, the most perfect abstinence is enjoined from sunrise to sunset: to take even a drop of water would be to transgress the sacred law. The follow fast is said to be rigorously observed; but as the law which enjoins it mentions the time of sunrise and sunset, which explains the period during which the fast is to be observed, the Turks ingeniously suppose that no indulgence can be wrong

that takes place between sunset and sunrise. Smoking is a species of luxury in which the Turks almost universally indulge themselves; the chief exception being in the case of young women. "In his pipe," says Dallaway, "an opulent man is extremely sumptuous; the head must be of pale amber, the stick of jasmine wood with the bark preserved, and the bowl of a delicate red clay, manufactured at Burgas in Romelia, and highly ornamented. According to the dignity of the smoker is the length of his pipe, often six or seven feet, when it is carried by two of his servants from place to place with much ceremony; and the bowl is supported by wheels as an aid to supreme indolence. In the summer, for greater coolness, the stem of the pipe is covered with cotton or muslin, and moistened with water." To procure the pleasures of inebriation without having recourse to forbidden liquors, the Turks sometimes make use of opium. In all the large cities, many coffee-houses are constantly open where coffee and opium may at any time be procured. The use of this drug, however, is said to have been formerly much more extensive than at present. According to the institutions of the Koran, every Mussulman may have four wives, and as many concubines as he can afford to maintain: reasoning from this article of their creed, and impressed with an idea of eastern voluptuousness, many Europeans are of opinion that every Turk has a seraglio, in which are immured for the pleasure of their master, four wives and an indefinite number of female slaves. But such a conclusion is not quite correct. The lady of a wealthy Turk has numerous female attendants; and as each wife occupies separate apartments and has her separate household, very few Turks treat themselves to the luxury of more than one or two wives. Polygamy exists, but by no means in the exaggerated form frequently represented. Slaves are bought, but always treated as part of the household. A slave who has become the mother of her master's child is free. The interiors of the seraglios are in general simple—a long ottoman, a bare and matted floor. Amber-mouthed pipes, inlaid with diamonds, are general; and in the establishments of some Turkish gentlemen very considerable capital is invested in this article of Turkish furniture. Turkish ladies play a great part in Eastern politics, in spite of eunuch guards and veiled faces. The life of the Turkish female is not so dreary as might be supposed; for under the cover of the *pashmak* or veil, they wander at liberty through the bazaars and busy streets of Stambul, the European quarters not excepted. They spend weeks in mutual visits at friends' houses; and notwithstanding their utter want of intellectual education, do not become the victims of ennui.

The Tartars.] At the mouth of the Danube, in the Dobrudsha, in the valleys of the Balkan, and around the capital, considerable numbers of Tartars are located. They are of middle stature, with a fine shape, small black and expressive eyes, fresh complexions, and dark auburn hair. They are a frank, hospitable, and peaceful race. Their dress is oriental; their dwellings are clean, and their occupation is husbandry and trade.

The Armenians.] The Armenians in European T. came from the sources of the Euphrates and Tigris in very ancient times. They have preserved their own language, but also speak that of the country. They have likewise a peculiar sacred language which is only understood by their priests. They are distinguished by their olive complexion, lively eyes, aquiline nose, regular features, and slender shape. They lead in general a sober and retired life, and are of avaricious habits.

Albanians.] The Albanians constitute the next class, and are very numerous. During the 11th century, they bore a part in some of the wars of the Greek empire. In the times of the separate principality, which, under the name of Acarnania or Etolia, was erected by Michael Angelus in the commencement of the 13th cent., we find them extending themselves by a predatory warfare; and spreading themselves at intervals over the whole of Epirus and Thessaly. They ennobled themselves by the powerful resistance which they made to the Turkish sultans, Morad and Mohammed, under the auspices of the celebrated George Castrioti, who defeated the Turks in 22 battles. He ruled over the territory extending along the coast, from the river Bojano and the *Palus Labeates* or lake of Scutari, to the mouth of the Thyamis, now Kalama, opposite Corfu. It was in his days that the designation of Albania prevailed, as the Albani of Ptolemy were properly his subjects, and at that time inhabited the districts of Kroja, Tyrao, and Dukagini, and to

whom he was chiefly indebted for his victories. The Albani, strictly so called, are at present denominated Merediti, and live in the pashalik of Scutari. The appellations Albani and Albania are of Roman and Greek origin; for in their own language they call themselves Arnauts, and their country Arnautlioh. They differ in language, manners, and dress, from both Turks and Greeks, and as a people are greatly superior to both.

Christian population.] Three principal races constitute the Christian pop. of European T.: the Wallach, the Greek, and the Slavonic which comprises the Bulgarian, Serbian, Bosniak, and Croat. But each of these three differ as much from each other in language, origin, and character as from the Turks. The Wallachs, a race of Italian origin, speaking a bastard Latin, amount in Moldavia and Wallachia to some 4,000,000 or 4,500,000; they have offshoots in the adjacent Bessarabia, in Transylvania, and in Hungary. In the interior of T., principally about the Pindus, from a quarter to half a million of this race are located, but entirely cut off from all communication with their brethren of the Moldo-Wallachian provs. by strange populations and a wide extent of territory. The Wallach hates both the Slavonian and the Greek, though of the same religion. Moldo-Wallachia having made a seasonable capitulation with the Porte, secured to itself great privileges. The Ruman or Wallachian race, though enslaved and degraded, is intelligent, and is highly susceptible of political enthusiasm. The next important pop., numerically, is the Bulgarian. The Slavonic origin of this people is disputed, but they are identified with their Slavonic neighbours in language, feeling, and religion, though not in character.—The Bulgarians, led by their clergy, who are in the Russian interest, are Russian partisans, but they are the most industrious, and at the same time unwarlike people in European T.—The Greeks in European T., computed at from 900,000 to 1,200,000, are in their present state unimportant. "We must not confound the Turkish Greek with the independent Greek of the Mores or of the islands. Independent Greece contains locally highly courageous and energetic populations, who were formerly semi-robbers, pirates, and merchants. It is true that on examination they seem mostly if not all of Albanian origin. But the effect of diplomatic intrigues, of the ceaseless endeavours of the court to establish absolute authority, and the predominance of factious spirit and corruptibility over patriotism, have been and continue such in Greece, as to deprive her policy of all initiative power. But the Greeks of T., with trifling exceptions (such as the inhabitants of Samos or Ipsara), are unwilling and unable to fight their own battles. They are too much attached to their individual interests, too treacherous, too suspicious of each other, and for the most part too timid in this generation ever to do more than follow the initiative which the independent Hellenes might assume. The Greeks of T. are for the most part imbued with a Russian spirit, the independent Greeks on the contrary are anti-Russian, even the Russian party in Greece receiving Russian gold and making use of Russian interests to further factious views, but always with the idea of eventually deceiving her. The Greek pop. of T. is without exception the most faithless, dishonest, and superstitious the writer ever met with, but like all the Greeks, gifted with much native intelligence. They are industrious, enterprising, and above all other people distinguished by so intense a curiosity and thirst of knowledge, that probably they are destined to play in the East a part wholly disproportionate to their present insignificance." The Chris-

tian Albanians, outnumbered by their more warlike Mahommedan brethren, are divided into Greeks and Roman Catholics, who hate each other with a more fervent hatred than they bear towards the Mussulman. Montenegro, with its 100,000 independent inhabitants, represents a vast hostile fortress in the Turkish territory. The Montenegrins are directed in everything by the bishop, whose revenue is a pension from St. Petersburg, and who acts in abject obedience to its orders. Lastly, we have the Serbians who, though only numbering 1,000,000, are politically the most important of all the Christian populations because the most warlike, because universally armed, because material prosperity and prosperous indolence allows every individual to engage in warfare, and because of the influence which Serbia exercises over Bulgaria. It is an erroneous prejudice to suppose that the Christians in T. are without influence in the state. The whole of the Levant trade is in the hands of the Greeks and Armenians. They hold the most important offices in the state. The pashas choose from amongst them their secretaries and officials. They have at all times played a conspicuous part in diplomacy, as the Turks would not condescend to learn foreign languages—not even such as are more generally spoken in those parts of the Ottoman dominions where the rayah population preponderates. The Christian communities administer their own affairs; and this body, as well as the clergy, have more than once succeeded even in inducing the sultan to depose mighty pashas. A firman has recently been issued by the sultan respecting the Protestants of his empire, considering Christians, who shall so declare themselves, as a separate and united body, and as such entitling them to claim protection of the officers of the Turkish government, to demand passports, register births, and make such representations as they require through the means of a common agent to the Sublime Porte. A remarkable religious movement has declared itself amongst the Christians of Asia Minor and Syria, and more especially amongst the Armenians. These, immersed in profound ignorance, with a clergy as ignorant as themselves, have been greatly stirred by the efforts of English and American missionaries, rather to educate than proselytise them. The result has been a large dissemination of the Bible, the universal study and knowledge of it by a great number of Orientals, and the formation of several evangelical congregations and churches in the East.

Turkish religion.] The religion of the Turks is the Mahommedan, so named from its founder Mahomet. Its doctrines and rights are promulgated in the Koran, which though a wild and incongruous mass of truth and fable, like the books of the Mosaic law is at once the civil and ecclesiastical code of its votaries. The Mahommedans are divided into two great sects, viz. the followers of Omar and the followers of Ali. The former acknowledge the four Khalifs Abu-beker, Omar, Othman, and Ali, to have been the lawful successors of their prophet, and believe in the *Souna* or Book of Oral Traditions collected by Al-bokharee; whereas the latter pronounce Abu-beker, Omar, and Othman, to have been usurpers, and esteem Ali alone of all these to have been the lawful successor of Mahomet. They dignify Ali with the name of the 'Vicar of God,' and curse Omar, whose name in their theology is used for the name of the devil. The Persians alone are of the sect of Ali, and are regarded by the Turks and all other Mahommedans as heretics. By the sect of Omar the Turkish sultan is regarded as the *khalif* or supreme head of the Mussulman faith. This high dignity was transferred by a solemn deed

of the last of the Abbassides in Egypt to Sultan Selim in 1516, who thus succeeded to all the prerogatives of the khalifat as the legitimate successor of Mahomet. All Mussulmans believe in the unity of God, and in Mahomet as his prophet. The commandments of the Mahommedan law are five in number: viz. 1st, The observance of prayer (*namaz*) five times a-day; 2d, The observance of the feast of Ramadhan or Ramazan; 3d, The giving of alms and other deeds of charity; 4th, The performing of a pilgrimage to Mecca (*hajilique*) at least once in the individual's lifetime; and 5th, The observing of external purity of body (*abdechte*). To the observance of these leading commandments are added some other practical injunctions which are deemed of minor importance. The principal of these are: the rigorous observance of Friday; the rite of circumcision; and abstinence from wine and every fermented liquor, and also from the flesh of pork, and of any animal which has died by suffocation. All these injunctions are scrupulously observed by the Turks, with the exception of that which prohibits the use of wine. The supreme priesthood, the administration of justice, and the sovereignty, were united in the person of Mahomet: the caliphs also who succeeded the prophet, united the temporal to the spiritual power; but from the impossibility of exercising in their own persons these prerogatives over all the extent of their vast empire, they established vicars whose knowledge and piety might recommend them to the people. This order took the name of 'The body or college of *ulemas*,' and was divided into three classes—the *imams*, or ministers of worship,—the *muftis*, or doctors of law, and the *cadis*, or judges. The mufti, in the long run, obtained the first place among the *ulemas*. The principal function of the mufti in the Mahommedan religion would seem to be—as the etymology of his name indicates—the pronouncing decisions on obscure or controverted points of law; but his power is not confined within limits so narrow. The mufti can be the minister of his doctrine; he can perform the duty of the imam; he is also capable of performing the functions of *cadi*. This affinity, or rather this association of powers among a people whose only code is religious law, explains the unalterable respect in which the administration of justice is held. The admission to the rank of the *ulemas* can only be obtained after long studies and frequent trial. Of the various branches of knowledge, the number of those with which some acquaintance is required, are, grammar, logic, ethics, rhetoric, theology, philosophy, jurisprudence, the Koran with its commentaries, and the *Sunna* or tradition. The *ulemas* thus form a respected and a powerful body,—a species of nobility, in the state; they engross the most lucrative employments; the judicial power in all matters of religion is vested in them alone; their persons are sacred; and their goods are exempted from liability to confiscation. To their moral influence they also unite the authority of physical force, their numbers with that of their various dependents amounting to 30,000 in the city of Constantinople alone. Among the various religious orders or *derwishes* of the Turks, the *mehlevis* and the *ectachis* form the principal classes. These species of recluses reside in the *tacké* or monasteries, under the direction of a superior, and take upon themselves the three vows of poverty, celibacy, and obedience. The magnificence of Islamism appears in its principal mosques or *djamis*, and establishments for religious instruction. The *djamis*—which are mosques *par excellence*—ought only to be built in the midst of large bodies of people, in the interior or neighbourhood of cities; in the country there

are none. They are ordinarily consecrated by the sovereigns. Of religious edifices of an inferior order, called *mesjid* (chapels or oratories), the number is considerable. In the mosques are seen neither pictures, statues, nor images—all which are condemned by the law—but solely sentences in verse, extracted from the Koran, inscribed on the walls. The floor is covered by mats or carpets. On one side of the temple is the *kibla*, a kind of niche, indicating the relative situation of Mecca, towards which the Mussulman must turn during his prayers. To the right of the Kibla is a pulpit, whereon are placed the *moeddins* (or chanters), who call the people to prayer; and to the right is a chair, from which the *khotba* is recited. The mosques are supported from the *moucateas* or proper domains of the church—a third part of all the conquered lands having been originally set apart for this purpose by the Turkish chiefs—and the *vaccuys* which are a species of reversion heirships.

Education.] There is no country in the world which offers so many facilities for national education as Turkey. Schools are attached to every mosque throughout the empire, with lands and funded property for their support; but the number of pupils in these establishments has hitherto been very limited, and entirely out of proportion with the revenues at their disposal, and it is unnecessary to say that the system of education pursued in these schools is of the most defective kind. The studies of the pupils are entirely confined to the Koran, or to some distorted remnants of the astronomical and medical sciences, which flourished amongst the Arabs. The Turkish government having determined on the gradual reform of these schools, an ordinance was issued by a committee of public instruction, containing a plan of the studies to be pursued, with rules for the admission of the pupils and the discipline to which they are to be subjected. The system of public instruction was remodelled in 1847. Previously it had been very deficient, both as furnishing little or no practical education, and also as providing no intermediate institution as a link between the lowest and highest schools. By the new system, education is brought under three heads. That of elementary instruction comprises the subjects of reading, writing, cyphering, and religion. Parents are obliged to send their children, of either sex, to school as soon as they attain their sixth year, but the instruction is gratuitous. The next grade is occupied by the middle schools, of which there are now six at Constantinople, numbering 870 pupils. The subjects of instruction in them are—Arabic, orthography, composition, religious history, Turkish and universal history, geography, arithmetic, and geometry. Finally, there are 10 colleges, at which an education is received fitting students for the several branches of civil and military life. There are in the neighbourhood of Constantinople, a medical, a military, and a naval school, all under the direction of European professors. These schools have had considerable success. French is the only European language taught in them, and is exclusively employed as the medium of instruction.

Turkish language and literature.] The language of the Osmanlis or Turks is a dialect of the Turki, which is the common tongue of all the Nomadic tribes, from the Oxus to the Ural-Tau, and from the frontier of Tibet to the Caspian sea. It has been erroneously supposed that the language of the Turks is still more barbarous than their manners: this is a great mistake, as it is inferior to none whether ancient or modern in softness, flexibility of sound, and harmony, and its rules are so admirably simple that it seems rather to have been formed by an academy of learned men than by a number of erratic and illiterate tribes. It must be remarked, however, that the Osmanli dialect is the most corrupted of all the dialects of the Turki, because it is most mixed with foreign words and phrases, though at the same time it is the most polished and elegant. It

has every title to be esteemed as one of the most refined and perfect of the Oriental languages. It is not to be considered, however, as the very same which was brought from the wilds of Tartary in the 9th cent. by the Turkomans, or by the Turki tribes who accompanied Jenghis Khan in the 13th. It has received a strong infusion of Arabic and Persian words, not merely in the terms of science and art, but in its ordinary tissue and familiar phrases. These are all connected by the regular grammar of the language, which is remarkable for clearness, simplicity, and force. Its style is far less adorned than the bombastic Persian, and as free from metaphor or hyperbole as that of a good English or French historian. On the whole, the Turki bears more resemblance to the good sense of Europe than to the rhetorical parade of Asia, and is remarkable for its downright and picturesque naivete of expression. It is written in the Arabic character, which was adopted by the Turks soon after their entrance into Persia, for they had no alphabet of their own. The Turkish is, in a great part of Asia, and on the northern coast of Africa, the common medium of communication between nations speaking different languages.

After the Turks had received a written character with the Koran of Mohammed, and at the commencement of the 14th cent. under one of their emirs, Osman, had founded an independent empire upon the ruins of the Greek, they began gradually to feel the necessity of more literary cultivation. Even Orkan, the successor of Osman, although devoted to war and conquest, founded in 1336, at Brussa, in Natolia, a literary institution, which became so celebrated for the learning of its teachers that even Arabs and Persians were not ashamed to become scholars of the Turks. Their own historians remark that the monarchs of this house until the time of Achmet I. (1603), though not all equally distinguished by glorious undertakings and princely virtues, yet all gave lustre to their reigns, by their love and encouragement of learning. The golden age of Turkish literature was in the second half of the 16th cent., during the government of Soliman, called 'the lawgiver,' the great grandson of Mahommed II., whose victories put an end to the Roman empire. One of their oldest and most esteemed annalists is Saad-ed-din, who, after having been the instructor and tutor of two sultans, died in the office of mufti at Constantinople, in 1599. His chronicle, entitled *Tuhtah-ı seneviye* extends from the origin of the Turks to the death of Selim I. in 1520, and is regarded by the Turks as a classical work. In the works of Nalms, Raschid and Tchelebisade, the annals of the Turkish empire, from 1592 to 1737, are continued in unbroken succession. Hadechi Chalife, surnamed Tchelebisade, who died at Constantinople in 1657, was distinguished for his historical and literary attainments. He composed a work of a cyclopaedic and bibliographical character, in which the names of all the branches of science cultivated by the Arabians, Persians, and Turks, are given, and the titles of all the works written in these three languages, from the 1st to the 1050th year of the Hegira (A. D. 1640). This work served as the foundation of the encyclopaedic view of Oriental science, by Joseph von Hammer (Leipzig, 1804). Their poems are chiefly of a mystical or moral cast, or devoted to love. Riddles, logogrypha, chronograms, and similar poetical trifles, are very popular among them. All their poetical productions are in rhyme. Their prosody and the technical part of their poetry are the same as those of the Arabians and Persians. The *Divân* of Baki, the principal lyric poet of Turkey, who died in 1600, has been translated into German, by Joseph von Hammer (Vienna, 1825). In 1731, during the reign of Achmet III., Ibrahim, a native of Buda, with the assistance of a Jew of Prague, Chacham Jonas, and under the patronage of the grand vizier, Ibrahim Pacha, established a Turkish printing-press at Constantinople, at which, in 1742, seventeen works, comprising twenty-three volumes, and 18,000 copies had been printed. After a long interval of inaction, the press was again used, in 1783, during the reign of the sultan Abdulhamid; but its activity continued only about two years. In 1793 it was again brought into action by Abdorhaman Effendi, a Turkish mathematician, who had rendered valuable services to the Porte, as commissioner for settling boundaries after the peace of Sistow. Abdorhaman connected it with a school for teaching engineering at Chaskol, a suburb of Constantinople. It remained there some years, and at the beginning of the present century, was removed to the barracks of the new militia at Scutari. In 1806, twenty-six works had issued from this press. The imperial historiographer, Jerome Megieser, published, at Vienna, the first Turkish grammar, in 1613; afterwards the study of the Turkish language was much attended to, particularly at Vienna, as the intercourse between Austria and the Porte had become very considerable. Meniski, court interpreter, published the best Turkish grammar (Vienna, 1690.) in Latin, folio, and likewise the best dictionary of the Turkish language. The first, with the addition of exercises in analysis and reading, was republished by Kollar (Vienna, 1756, 4to.); the last, likewise, much enlarged, by Jenisch, was republished at the expense of the emperor (Vienna, 1780—1803). There are Turkish grammars in the French language, in which the Turkish words are printed in Roman letters, by Freindl (Berlin, 1789, with a dictionary), and by Vigulier (Constantinople 1790—1794). The last grammar of the Turkish language was published by Joubert (Paris, 1823). Many scholars, of much learning in Turkish literature have been formed at the Oriental academy in Vienna, established by Maria Theresa, in 1753, for the education of young diplomatists to conduct the intercourse with the Porte; particularly Von Jenisch, Von Starmer, Von Chabert, and Von

Hammer.—The origin of the first daily paper in T. is ascribed to the Frenchman M. Blacque, who in the year 1835 founded the *Spectateur de l'Orient* in Smyrna. The idea was, however, not new, for Verminac, ambassador of the French republic to Belim III., published in 1795, a French journal, which was printed at Pera, in the palace of the ambassador. In 1811, during the war with Russia, extracts from the bulletins of the great army were likewise printed and distributed. With exception of these beginnings, the *Spectateur de l'Orient*, which soon changed its name to *Courrier de Smyrne*, was the first real political paper published in T., and it exercised a considerable influence on the events which occurred during the latter part of the Greek rebellion from 1825 to 1828. In 1831, M. Blacque was called to Constantinople by Sultan Mahmud, and published there the *Moniteur Ottoman*, an official paper, in the French language. The following year the *Takvimi Vadeai* was begun in Turkish, containing sketches of the events of the time, in fact nothing but a translation of the *Moniteur Ottoman*, yet with this difference, that the Turkish paper confined itself to publish the acts of government, while the French paper, besides the official, had an unofficial part, which had for its object to sift and defend the interests of the Porte. Smyrna, which might boast of having had the first journal in the empire, soon afterwards obtained two, and at length even four. The *Impartial* is the only one of the French journals which has remained in Smyrna; the others having been removed to Constantinople. The number of papers and periodicals has now increased to 13, which are published in the various languages of the Turkish provinces; two in the Turkish language, also translated into Armenian; four French, four Italian, one Greek, one Armenian, and one Bulgarian. The *Takvimi Vadeai* is entirely supported by the government, while the other papers have but an annual allowance of about 30,000 piastres, except the *Journal de Constantinople*, which has the double amount. In Belgrade, in the Principality, on the Danube, at Beyrut, Alexandria, &c., journals in French and in the dialect of the country are likewise published—making in all upwards of 30 periodicals at present published in the Ottoman empire.

Government.] The sultan of T. was until recently a despotic authority, uniting in himself, like the first caliphs, the whole power of the state. He not only made the laws but also executed them, and he is at the same time the supreme head of the church. It is to be observed, however, that the civil and religious law of T. having only one source, the Koran, it necessarily follows that the mufti, who is the supreme authority with regard to the legality of religious, civil, and political acts, has great influence in controlling the sultan, who can neither declare war nor conclude peace, nor undertake anything of importance, without previously asking the mufti and his ulemas if it is conformable to the law, and the mufti decides the matter by a *fetva*, or ecclesiastical decree. The nation also sometimes applies to the mufti for similar purposes, especially in cases of rebellion, which becomes a legal opposition as soon as the motive of it is declared to be just and legal by a *fetva*. Thus, although the sultan of T. is absolute, inasmuch as there is no political body in the empire which has any recognised power to check his will, he is obliged to reign conformably to the religious, political, and civil principles contained in the Koran. And so great, indeed, is the enthusiasm of the Mussulmans for the words of their Prophet that it would be a hopeless task to endeavour to preserve peace in the empire itself, should any insult, perpetrated against what they consider to be the true faith, be passed over unavenged. The sultan's title is that of *padishah* or 'prince.' The succession is hereditary in the male line of Osman's family, but is not always allowed to descend in regular order from father to son; the people, and the military—as is well-known—frequently exercise a violent right of election, and elevate another than the heir direct to the throne. The sultan is not crowned at his inauguration, but is solemnly girded with the sabre of Osman, and swears to support Islamism. The mother of the reigning sultan is called *sultana valide*; she enjoys distinguished prerogatives, and a fixed revenue, and is usually possessed of great influence in the state. The first of the sultan's wives who brings him a son is styled *chasseki sultana*. The sultan's titles run in the highest style of Eastern hyperbole. In 1839, a most important step in the

career of civil and political reform in T. was taken in the promulgation of the constitution or declaration termed the *hatti-sherif of Gulhâni*, which was formally announced by the sultan on the 2d of November, 1839. Its primary author, Reshid Pasha, who had just returned from Paris, had been intrusted with the foreign department, and had become, by his long residence in Europe, peculiarly partial to European institutions. He now determined to try whether it was not possible to adapt the constitutional and parliamentary forms of Europe to the laws of T., and had, to that end, removed all high officers of the state resident in Constantinople who, he knew, would be adverse to the innovations he wished to introduce. On the 2d Nov., 1839, he summoned all the high dignitaries and officers of the state, together with all the more notable members of the Turkish empire, all the deputies of the various *rayah* nations—that is, of the Greeks, Armenians, and lastly of the Jews—to appear at the kiosk of Gulhâni in the Serail. A similar invitation was given to the diplomatic body, for whom the Sultan's carriages were sent. A spacious place, extending before the kiosk, was surrounded by the guards of the sultan, who was himself seated in one of the apartments of the kiosk. To the diplomatic corps, and also to the Prince de Joinville, who was then by chance at Constantinople, other suitable apartments were allotted in the same kiosk. All the chief officers and deputies of the various nations, the chief ulemas, patriarchs, and high clergy of the Oriental church, and lastly the chief rabbis, were then assembled in the square, in the midst of which was erected a tribune. After a pause of solemn silence and expectation, a *hatti-sherif* was handed to the grand visier from the sultan. The whole assembly then saluted the document, after which it was handed over to Reshid Pasha, to be read aloud from the tribune. The sultan's court-astrologer stood by with a watch in his hand, waiting for the auspicious moment on the dial. When this arrived, he gave a signal, and the minister of foreign affairs delivered the contents of the document in a clear loud voice. When he had concluded, the ulema approached, and in a long prayer invoked the blessing of Heaven on the new work. The ceremony then concluded with a salute of 101 guns, fired from all the batteries of the Bosphorus, announcing to the people the grant of a constitution, to which, by way of adding to the unparalleled nature of the event, the sultan and high dignitaries of the church and state took the oath of fidelity. The chief provisions of this constitution were a promise on the part of the sultan to afford all his subjects, without distinction, full protection of life, honour, and property; to arrange an equal distribution of taxes; and to limit the military service to 5 years. The levies of the Mussulmans were to be made under certain restrictions, and the *rayahs* were entirely exempted from military service on payment of a small poll-tax. The proceedings of the courts, and especially of the religious courts, were to be subjected to strict supervision; and, lastly, the sultan surrendered the right he enjoyed to dispose of the lives and property of his functionaries without any legal process whatever. This *hatti-sherif* was favourably received by the nation at large, but not so by what is emphatically styled "the old Turkish party," that is, the fanatical and retrograde adherents of the old system of administration, who have almost uniformly added their efforts to various external causes to impede and paralyze the exertions of the wiser ministers of the sultan in the path of domestic improvement.

The principal officer of state in T. is the *vizier*
VII.

or *sadri-azem*, who, if he does not enjoy the whole power of his master, is made at least responsible for all his acts, and is not unfrequently sacrificed to his caprice or the resentment of the people. He has the care of the whole empire; manages the revenue, administers justice both in civil and criminal affairs, and commands the armies. Upon his appointment the sultan puts into his hands the seals of the empire, which are the badge of his office, and which he always wears upon his breast. His income amounts to 600,000 dollars a year, exclusive of presents and other perquisites.

The *divan*, *riqsiabi-houmayoune*, or state-council, is composed of three principal ministers: the minister of the interior or *kehaya-bey*; the minister of the exterior or *reis-effendi*; and the minister of the executive or *chavush-vashi*. The ministry assembles twice a-week in ordinary council, on which occasion the mufti or the vizier presides. The ulemas, 30,000 in number, are represented in this council by two *cadi-askiores*; and its deliberations are occasionally assisted by ex-ministers who have received the sultan's commands to that effect. The extraordinary *divan* or *ajak-divani* is at present composed of 121 members, but is summoned only on great occasions. It consists of all the officers and chief personages of the state; but its resolutions only become important when they are sanctioned by the cabinet and the imperial council. The official interpreter is called *dragoman*.

The provinces are governed by *pashas*, *ayans*, and *waivodes*, who in their administrative form imitate those of the *divan*. The *pashas* unite the administrative and military power. The ensign of their authority is a standard to which are attached so many horse-tails, the number of which indicates the rank of the *pasha*. A *pasha* of three tails, or *miri-alem* is the highest in rank, and commands the troops of his own *pashalik* when ordered by the sultan. A *miri-mirani*, or *pasha* of two tails, must march when required under a *miri-alem*. A *miri-liva*, or *pasha* of one tail, is still further restricted in authority. The *pashas* of *Romelia* and *Anatolia* are the highest in rank; the former is at the head of all the European *pashas*; and the latter presides over the Asiatic *pashas*. The *ayans* are superior officers named by the Porte for particular services. They have occasionally endeavoured to make themselves independent, but their power and number have been greatly reduced by the present sultan. The *waivode* is the governor of a city or district detached from a *pashalik*. The *seraglio* has officers peculiar to itself. The superintendent of the women is called *kislar-aga*; he has the command of the black eunuchs, and is himself one. The commandant of the white eunuchs is called *capi-aga*; he receives all the petitions which are to be delivered to the emperor. The number of inferior officers is very great, but an enumeration of them is not necessary.

[*Laws.*] The laws of the Turks are founded upon the Koran; but as Mahomet was not acquainted with life in its most civilized form, his regulations were, in the advancing stages of society, soon found to be defective. The Turkish divines have endeavoured to remedy this defect by commentaries on the Koran; and their opinions have in many cases been sanctioned as laws. The commentator who is chiefly respected in T., is said to be Abu Hanifa. The laws of the Turks appear frequently to be founded on correct notions of natural justice; but the happiness of the subject depends not only on the excellence of the laws, but on the rectitude with which they are executed, and an incorruptible judge is somewhat uncommon in this country. Turkish law is simple and summary. Civil matters are de-

cided by the ulemas, who have the case laid before them upon a sheet of paper, space being left at the bottom for their fiat. Two or three witnesses are examined, and a decision given *instantly*. Public offences are submitted to the pashas, who have the power of inflicting capital punishment, and from whose decision there was formerly no appeal; and none daring to impugn the decision, the matter ended with the sentence and execution. The sultan, in full council, abrogated the power of the pashas to inflict capital punishment, which can now only take place on a judicial sentence having been obtained and signed by a *cadi*, which also allows time for appeal. Their power of administering corporal punishment, however, still exists.

Revenue.] The sources of the Turkish revenue are: the *karatsha* or capitation tax on all who are not Mussulmans,—a tax on incomes,—the customs, a kind of land-tax, amounting it is said to no less than six shillings an acre,—the confiscated estates of wealthy pashas, who are often accused of crimes for the sake of their riches,—and the yearly tribute received from Egypt, Wallachia, Moldavia, and Servia. The sum generally arising from all these sources is estimated by Balbi to amount to £10,310,000. The sum transmitted from the great pashaliks, and the duties payable both at the custom-houses and on certain articles of consumption, continually vary greatly. The annual capitation tax falls on the *rayas* or Christians alone. It is proportioned to the means of the payer: the *rayas* of each district being divided into three classes, who pay 16, 12, and 8 piastres respectively. From this compulsory tribute, the clergy, the women, children, and all who through age are incapable of supporting themselves, are exempted; so that the number of persons subjected to it, after deducting those on whom it does not operate, do not probably exceed 800,000, of whom one-fourth may belong to the first and second classes. The budget of the empire for 1852 showed a revenue of 750,000,000 piastres, or about £7,000,000; and a nearly equal expenditure. The ordinary income and expenditure may be stated thus:

INCOME.		Piastres.
Tenths or tax on produce of land,		220,000,000
Income tax,		220,000,000
Personal tax on subjects not Mussulmans,		40,000,000
Customs,		85,000,000
Tribute from Egypt,		30,000,000
Tribute from the principalities of the Danube,		
viz.: Wallachia,	2,000,000	
Moldavia,	1,000,000	
Servia,	2,000,000	
		5,000,000
Different indirect taxes, patents, stamps, excise, tolls, post-office, mines, &c.		150,000,000
Approximative amount,		750,000,000
EXPENDITURE.		
The sultan's civil list,		75,000,000
Civil list of the dowager sultana and of the sultan's married sisters,		8,400,000
Army,		300,000,000
Navy,		37,500,000
War stock, ammunition, artillery, engineering fortifications,		20,000,000
Maintenance of the different offices of administration,		195,000,000
Foreign affairs, ambassadors, consulates, &c.		10,000,000
Dotation of the treasury for works of public service, roads and ways, encouragement of agriculture, &c.		10,000,000
Expenses of different kinds, such as a grant to the administration of the mosques for the maintenance of the establishments dependent thereon, annuities, and pensions,		84,100,000
		750,000,000

The tribute of Egypt has been increased, by the

late arrangement made by the sultan with Abbas Pasha, from 30,000,000 to 40,000,000 Turkish piastres per annum. From this state of its budget, which may be regarded as approximatively correct, the revenue of T., previous to the breaking out of the present war, appears to have been balanced by its expenditure. It had no public debt, with the exception of its paper-circulation, amounting to 170,000,000 Turkish piastres, or about £1,600,000, bearing interest; and it was decreed that this paper-money should be withdrawn from circulation by means of a special tax, to exist only till this object was attained. A first step was made in the withdrawal of the paper-money, calling in about 4,000,000 f. worth, which was publicly burnt in the presence of the sultan. Besides this, T. had a floating debt of about 10,000,000 f. or 12,000,000 f., which it owed to the contractors from whom it buys for delivery the European products necessary for its army and navy, &c. The preceding data are drawn from the best sources; but it is, as may be easily understood, impossible to guarantee their being rigorously correct. Although the state of the Turkish people differs from that of the Christian and Jewish subjects of the Porte, by the political rights which they enjoy, and by their exemption from the poll-tax and other horribly vexatious imposts reserved for the subjects who are not Mussulmans, they nevertheless pay quite enough. The agriculturists, besides tithes,—the merchants, besides enormous custom-house duties,—the artists and the workmen, besides the expenses which they voluntarily contribute to their respective corporations, besides the innumerable vexations inflicted upon them by the local authorities, also pay a mass of taxes: such are those under the name of presents for the feast of the bairam; of expenses for the fast of the ramazan; of presents for the pasha, and for his highness's stirrup; of expenses for the repair of his seraglio and his country-houses; of expenses for his stables, his kitchen, and pantry; after which come the taxes called *equivalents*; as for example, the equivalent for the building of men-of-war; that for the sheep for provisioning the seraglio and the capital, &c. All these taxes, unequally distributed, and collected with violence, would be less ruinous were they not tripled by the rapacity of the functionaries charged with their collection; and as if the sultan were moderate in his demands, as if he left to his functionaries something to glean, his absolute lieutenant and his pashas in the provinces, who are frequently changed every six months, compel the people, for their own account, to pay an imposition which is called *kudoomiye*, or congratulation on their happy arrival! The *verg* or income tax varies according to locality from 10 to 25 per cent., and is raised upon the presumed fortune, real or personal, of all the subjects of the sultan. The municipalities are charged with its apportionment. The tenths are collected upon all the productions of the earth, and even in some quarters, extend to sheep. At the conclusion of the war with Russia in 1776, the public debt amounted to 36,333,520 piastres, or about £3,628,350. It is now said to exceed £12,000,000. *Army.*] For two hundred years, namely, from the end of the 14th to that of the 16th century, the Janissaries composed the flower of the Turkish armies, and so long as the first sultans ruled from the heart of camps, and declared their decrees from the imperial stirrup, the obedience of these warriors was secured, and there never was a fitter instrument of war and conquest. In this period, all the great successes of the Turkish army were gained; but, when the sultans began to prefer the pleasures of indolence to the visions of ambition, and exchanged

the toils of the camp for the debaucheries of the harem, the discipline of this corps relaxed, and its arms became more dangerous to the ministers than to the enemies of the government. Many attempts were made to suppress it, but in vain; until the late sultan, Mahmud II., acting with more caution as well as energy, in 1826 contrived to annihilate at one blow this formidable body of warriors. The number destroyed is variously reported. All the officers, with the exception of a few of high rank who had joined the sultan's party, were known to have perished; and the general opinion is, that upwards of 20,000 were massacred during the struggle. In the recent and present struggles with Russia, and while co-operating with the British troops in Syria, the regular soldiers have exhibited the valour and discipline of European troops, and even the contingent levies fight with considerable skill. Eton calculated the Turkish army, in 1802, at 207,400 infantry of all descriptions, and 181,000 cavalry; making a total of 368,400 men, of whom 206,000 were employed as guards and in garrisons. The disposable force of T., exclusive of the contingents from Bosnia, Servia, and Egypt, was estimated in 1852 at 340,000 men, but of this number not above 170,000 could be readily mustered. At present the military force of T., as re-organized by Riza Pasha, a Prussian officer, in 1839-40, is divided into the regular active army called *aisam*, the reserve or *redif*, the contingents of auxiliaries, and the irregular troops. The regular active army under the system arranged, but not definitely organized by Riza Pasha, will consist of six *ordou* corps, or camps, under the command of a *mushir* or field-marshal, with their head-quarters at Scutari, Constantinople, Monastir, Karbront, Damascus, and Bagdad. Each *ordou* is to consist of two divisions, commanded by a *ferik* or general of division. Each division is to be divided into three brigades, commanded by *lieuts* or generals of brigade. The *ordou* consists of 11 regiments: viz. six regiments of foot, four of horse, and one regiment of artillery, amounting in all to 25,000 troops of the line. Besides the 6 *ordous*, there are to be three detached corps: viz. one brigade on the island of Candia, numbering 4,000 regulars, 3,500 irregulars, and 600 native cannoniers; a second brigade in Tripoli, consisting of one regiment of foot, and one of horse, to the strength of 4,000 men; and a third brigade, of 4,000 men, at Tunis. The three detached corps should thus muster 16,000 foot and horse. The special corps, under the command of the grand master of the artillery, are likewise divided into *ordous*. They consist of—1. The central corps of artillery, comprising 4 regiments, a reserve regiment, and 3 regiments which are quartered in the various fortresses of the empire, in the forts of the Dardanelles and of the Danube, on the coasts of Asia Minor and the Black sea; 2. The engineer brigade of 2 regiments of 800 men each. The *redif* or reserve forms a second army, with the same organization as that of the *aisam*, and consisting of the same number of regiments of the various arms. These regiments are to be divided into battalions, escadrons, or companies, and have their standing staffs of officers and corporals on active service and receiving full pay. It is the duty of the latter to live in the towns and villages among the soldiers, who, though on leave, are, nevertheless, not discharged from the service, and these soldiers they must collect and drill once a-week. The *redifs* are to gather every year for four weeks at the head-quarters of their respective *ordous*, and take part in the field manœuvres. While thus on service the *redifs* are to have the pay and the usual allowance of provisions. This system is admirably arranged; but is not, we fear, likely to

be speedily carried out in T. Of the six *ordous* only the first three were completely organized in 1852, but not more than half the cavalry was mounted. The fourth and fifth *ordous* were very deficient, the reserve being without arms. The sixth, the army of Bagdad, had neither cavalry, artillery, nor reserve. This *ordou* might be looked upon as quite cut off from the rest, by its great distance, defective communications, and more particularly by the Arab tribes of the desert, always more or less in open rebellion: entire battalions have gone over to the Persians from time to time with bag and baggage. In addition to the force of T. proper, there is nominally a large auxiliary force consisting of the contingents of the tributary provinces of Servia, Bosnia, and the Herzegovina, Upper Albania, and Egypt; but it is difficult to give even an approximate idea of the numbers of the auxiliaries; it much depends on the politics of the time or the enemy against whom they are expected to take the field. In a war with Russia the number of auxiliaries may possibly amount to 105,000 or 110,000 men: viz. 6,000 from Wallachia, 40,000 from Bosnia and the Herzegovina, 20,000 from Upper Albania, 30,000 from Servia, and 25,000 from Egypt. When the Danubian principalities are occupied by the Russians, the auxiliaries from Wallachia are not permitted to join the Turkish army; but it is likely that free corps of Pandurs will assemble in Lesser Wallachia, and these free corps may possibly muster to the strength of from 6,000 to 8,000 men. The irregular troops consist of:—

1. <i>Kavacs</i> or gendarmes on foot, <i>seymens</i> or mounted gendarmes, and <i>subashis</i> or county militia,	30,000
2. Tartars of the Dobrudja and Asia Minor,	5,000
3. Hungarian and Polish volunteers,	2,000
4. Moslem volunteers,	50,000
Total of irregulars,	87,000

The total of the military forces of T. are summed up in the Berlin *Zeit* as follows:—

	Regiments.	Registered.	War footing.
Infantry,	56	117,360	100,800
Cavalry,	24	22,416	17,280
Artillery,	6	7,800	7,800
Artillery in fortresses,	4	6,200	5,800
Engineers,	2	1,800	1,600
Detached corps {	In Candia,	4,000	8,000
	Tripoli,	2,000	4,000
	Tunis,	2,000	4,000
	80	170,376	148,680
Reserve,			148,680
Auxiliaries,			121,000
Irregulars,			87,000
Total,			505,360

These 500,000 troops are not, of course, prepared to take the field in the first weeks of a campaign—first, because the distances are too great, and the various provinces so thinly populated, all of which interferes with the immediate concentration of the contingents; and secondly, because the expense of arming and keeping up all these troops would be too heavy for the imperial treasury. It ought, also, to be remembered that the numbers and services of the auxiliary contingents are affected by a variety of circumstances and events, and that the number of 121,000 may, according to circumstances, be increased or lessened by one-half. Thus, in the present war, Abbas Pasha, the viceroy of Egypt, hastened to place at the disposal of the Porte, 45,000 troops, a line-of-battle ship, 2 first-class frigates, 4 corvettes, 2 brigs, 2 steam-frigates (one of 850 and the other of 450 horse power), and a steam corvette of 300 horse power. On the other hand, Mustapha pasha, an Albanian, recently appointed governor of Herzegovine, offered to furnish the Porte

with a levy of 200,000 Albanians, and to march them on any point which the government of the sultan might point out; and Rende-han Bey also demanded from the Porte to be permitted to organise in Kurdistan a considerable body of troops. According to the Koran, infidels cannot be admitted into the army; recruits, therefore, can be found only in the Moslem pop. A recruiting commission, consisting of several staff and other officers, mollahs, doctors, and subalterns, provided with an imperial firman proceeds to the appointed district where lots are to be drawn. The period of service is 5 years. Those who escape in the lot-drawing one year must draw again every year for four more, and if they escape till the end of the five years they then enter the *redif*, which is thus composed of raw militia and only exercised one month in a year. The appointment of the recruits to the different arms of the force is not made with regard to the personal fitness of individuals, but at random or by caprice: thus the Albanians, who are good riflemen, are taken for the artillery; fishermen, sailors, and peasants, who never sat on a horse, are sometimes drawn off to the cavalry. The drilling and exercising is partly Prussian, grafted on the remains of the former French system.

Navy. The Turkish navy consists of a number of small vessels of war and several ships-of-the-line. Before the battle of Navarino it was estimated at 21 sail-of-the-line, 31 frigates, 8 corvettes, and 30 gun-boats, carrying altogether 2,990 cannon, and 5,300 seamen. At present it consists of 2 three-deckers of 130 and 120 guns; 4 two-deckers of 74 to 90 guns; 10 sailing frigates of 40 to 60 guns; 6 corvettes of 22 to 26 guns; 14 brigs of 12 to 20 guns; 16 cutter-schooners from 4 to 12 guns; 6 steam-frigates of 400 to 800-horse power; and 12 steam-corvettes and schooners, making a total of 70 armed vessels, manned by 32,000 sailors and gunners. There is also a regiment of marines under the command of a general of brigade. The staff of the navy consists of the *kapudan pasha*, first lord of the admiralty and secretary-at-war; 5 admirals, of whom 3 are in active service; the commander of the fleet, the *kapudan* or commander of a squadron, the *liman-keisi* or port-admiral, 3 vice-admirals, the vice-admiral of the fleet, the director of the dock-yard, the director of the naval academy, 7 rear-admirals, 3 of whom command on the stations of the Danube and the Black sea, the archipelago and the Persian gulfs, while 4 belong to the council of the admiralty. These commanders have the same rank and pay as the generals of the army; the admirals are on a footing with the *feriks*; the vice-admirals rank with the *lisas*, and the rear-admirals with the *mir-alais* or colonels. The commander or flag-captain of an admiral's ship, too, has the rank of a colonel.

History of the Ottoman empire. The finest countries of the old world—Thrace, Greece, Asia Minor, Colchia, Armenia, Mesopotamia, Syria, and Egypt, together with the islands of the Archipelago and Arabia, whose commerce connects Asia and Africa with Europe, and unites the East with the West—have been ruled for five hundred years by the Turks or Ottomans, a race of mixed blood, whose name begins to appear in history about the middle of the 6th cent., when their Scythian ancestors settled at the foot of the Altai, in the steppes of Upper Asia, between Siberia and China.

In the middle of the 7th cent. a new religion appeared in the deserts of Arabia, and rapidly propagated itself throughout Asia and Africa. Mahomet's successors, the khalifs, in 638, conquered Syria and Palestine, and in 762, Bagdad the seat of a new monarchy was founded under their auspices. The khalifs of Bagdad, admiring the reported bravery of the Turks, had long chosen their body-guard from this tribe. The chiefs of this guard gradually assumed great authority in the affairs of state. Hence arose the *Emir-al-Omraks* of the khalifs, who, like the *Mayores Domes* of the Franco-German kings, under the name of prime-ministers, gradually engrossed the real power of the state, and finally elevated themselves to the throne of their masters. In the 9th

and 10th centuries the Turkish dynasties of the Tulukides and Akshidides reigned in Palestine, Syria, and Egypt; and from the end of the 10th to the close of the 17th cent. the dynasty of the Gassanides reigned in Persia and India. The Seldahucks or Seljuks, another Turkish tribe, nearly about the same period that their brethren won the dominion in these countries, successively crossed the Euphrat and Oxus, attacking nations immersed in luxury, and rendered effeminate by long-continued peace, and had overrun a great part of Asia before the close of the 11th cent. and founded a mighty empire in the East with which the Crusaders contended for the possession of Palestine. In the 12th cent. the Mongols—a nation differing in language and manners from the Tartar-stem to which the Turks belonged—uniting with several other hordes, overthrew the power of the Seldahucks in Asia Minor, and founded several small Mongolian states in that country; but the chiefs and emirs of the Seldahucks and Turkomans soon led back their tribes from the valleys of the Taurus and divided Asia Minor amongst their warlike followers. One of these emirs was Osman or Othman, the founder of the Ottoman empire. This chief was of the tribe of the Oguzian Turkomans. In 1299 he took possession of the narrow passes of Olympus, and established his camp of Caucasian-Tartars in the plains of Bithynia, under the protection of the Seldahuck sultan of Iconium. Reinforced by the accession of a number of fugitive slaves, robbers, and captives, he laid waste the surrounding countries, and conquered some provinces of Asia Minor belonging to the Roman empire of the East. Upon the death of the sultan of Iconium in 1300, (Hejira 700) Othman assumed the title of sultan himself: thus was founded by a predatory chief, upon the ruins of the power of the Arabs, Seldahucks, and Mongols, the empire of the Ottoman Turks in Asia. Between 1300 and 1366, the gallantry and activity of ten great princes aided by the heroic fanaticism with which Islamism inspires its devotees, raised the Ottoman state to the rank of the first military power in Europe. Orcan, Othman's son, established the seat of his empire at Brusa, the capital of Bithynia, which he conquered in 1323. He then subdued Asia Minor to the Hellespont: and having assumed the title of *padishah* or 'prince,' obtained the hand of a daughter of the Grecian emperor Kantakuzenos in marriage. Orcan's son, the gallant Solyman I. entered Europe in 1354, and having seized Gallipoli and Sestos, made himself master of the straits which divide Europe from Asia. Amurath I. established the seat of his empire at Adrianople, and profiting by the feebleness of the Greeks, expelled them from Thrace, and defeated the Bulgarians and Servians in a dreadful battle on the plains of Cosova.

Bajazet, who succeeded Amurath, by an uninterrupted train of victories conquered the greater portion of that territory which the Turks still possess in Europe. Palaeologus the Greek emperor solicited the assistance of the western princes of Christendom, and an army was speedily raised which, under Sigismund king of Hungary, succeeded for some time in counteracting the efforts of the sultan. Their hopes of ultimate success, however, were soon terminated; Bajazet's skill and bravery forced them to retreat towards the west and leave him at liberty to direct his whole strength against the city of Constantinople, which was on the eve of falling into his hands, when the unexpected tidings of an invasion by the Tartarian prince Demir, better known under the appellation of Timur or Tamerlane, forced him to hurry into his Asiatic provinces for the purpose of checking the career of this new enemy. The two hosts met each other with the intrepidity which was natural to them, and with an ardour inspired on both sides by a career of uninterrupted success. The contest was furious and sanguinary, but unfortunate for the Turks; the sultan was made prisoner, and the greater part of his army destroyed in a dreadful battle which lasted from daybreak to night-fall. The defeat of Bajazet for some time retarded the increase of the Turkish power; but Amurath II. led his army into Macedonia and plundered the principal cities of that country, as well as those of Boeotia, Attolia, and Phocia. Servia next yielded to his arms; and entering Hungary, he invested the city of Belgrade. The intrepidity and skill of John Hunniades enabled the Hungarians not only to defend themselves, but to carry on offensive operations against the Turkish forces. In the celebrated siege of Belgrade the sultan lost many of his men; no fewer than 150,000 are said to have fallen in one attack made upon them from the town, and the siege was at length raised. Irritated by disappointment to which he had been little accustomed, the sultan sent a great army into Transylvania; but Hunniades met them, and with the loss of only 3,000 of his own men, is said to have destroyed upwards of 30,000 Turks. Another army more numerous was despatched against the Christians, and its efforts were equally unsuccessful. But these repeated defeats, far from humbling the Turks, only stimulated them to still greater efforts; another army was immediately despatched towards the west, and the Christians on the 10th of November 1444, experienced a complete defeat before Varna. In the eastern parts of Europe there now remained no power which could with any prospect of success oppose itself to the Turkish arms. The Greek emperor's power was confined within the walls of Constantinople; and for the narrow surrounding territory he was forced to pay the sultan an annual tribute of 300,000 aspers. Cannon were now introduced into the Turkish army, and the whole Peloponnesus was subjugated. Mohammed II. who, in 1449, succeeded his father Amurath, desirous of terminating a war in which he was engaged against the prince of Caramania, made peace with the emperor of the Greeks; but he had no sooner brought this contest to a close, than he provoked a fresh dispute with the Greek em-

peror, and laid siege to the imperial city with an army amounting it is said to 400,000 men. The defence was desperate, but crowds of Turks continually pressing forward to supply the places of those who had fallen, the strength of the heroic garrison was at length exhausted; the emperor Constantine, with all his warriors, was overwhelmed in the assault, and for three days the imperial city continued to be a scene of the most inhuman carnage. Thus terminated the existence of the western empire in the year of the Hegira 867, 1483 years after Constantinian had removed the seat of the empire from Rome to Byzantium, and had given his name to that celebrated city which was now declared to be the seat of the Turkish court, and capital of the Turkish dominions.

Mohammed's success stimulated him to new undertakings. He entered Servia with 20,000 men, and made it tributary; and sent with an enormous force laid siege to Belgrade, which he was only prevented from taking by the extraordinary talents of Hunyadi, who defeated the Turkish fleet and army, and forced the sultan to retire into Servia, but did not long survive his glorious victory. Disappointed in his hopes of success against Hungary, Mohammed turned his attention to the Morea and islands of the Egean sea. The former region had been seized by the Albanians, a warlike race who offered to deliver the cities to the Turks on condition of being permitted to retain in their power the open country, for the purpose of following their ordinary occupation of shepherds; but the Turks, more willing that this territory should be possessed by the feeble Greeks than by the fierce Albanians, attacked the latter and drove them from the country. The Greeks submitted with reluctance to the Turkish yoke, and made a few efforts to regain their liberty; but in 1480, the whole country, except a few places on the coast in the hands of the Venetians, was added to the Turkish empire. The conquest of the Morea was in a short time followed by that of Trebizond, the retreat of the Comneni, who had dignified their petty monarchy with the vain title of the empire of Trebizond. After the death of Hunyadi, Bosnia had fallen into Mohammed's hands, and he was meditating new enterprises, when the most formidable adversary whom he had ever been called to encounter, appeared in the person of George Castrioti, an Epirote by nation, generally called Scanderbeg. Three large Turkish armies were successively overthrown by the intrepid and skilful Epirote; and tired of a contest in which he had experienced uninterrupted disasters, the sultan contracted a truce with Scanderbeg. The western Europeans now once more began to dread the Turkish encroachments; and the Venetians formed an alliance with the Hungarians for the purpose of checking the progress of their eastern adversaries. In 1488 the sultan again entered Epirus with an immense army, and compelled Scanderbeg to take refuge at Lysia in the Venetian states, where he died in 1498. The Venetians defeated the Turkish army in 1499, but this was almost the only advantage of which they could boast—they were driven from Negropont, and the reduction of Epirus and Albania deprived of their intrepid descendant was almost instantaneous. The Turks in an attack upon Rhodes were repulsed; but from the Venetians they took the city of Cephalonia, and invading Italy, made themselves masters of Otranto.

Bajazet II. subdued Croatia and Caramania. The Venetians recovered Cephalonia; but this slight advantage did not counterbalance the success of the Turks, who took the cities of Lepanto, Durraxo, and Modon, and plundered Syria on the one hand, and Moldavia on the other. Bajazet now formed the design of resigning his power to his eldest son Achmet. But Selim, his second son, more enterprising and ambitious than his brother, suddenly arrived from Trebizond, and having put his father to death, succeeded the throne in 1512, and by the murder of his brother secured his power. Selim attacked the Persians, and along with some other places took the city of Tauris. He next turned his arms against Egypt, and finished the conquest of that country which had been commenced by his father. The shortness of his reign did not permit him to extend his conquests farther; he died in 1519.

Solyman, the tenth sultan of his race, conquered Belgrade, and drove the knights of Malta from Rhodes, after a defence which he excited the admiration of all succeeding ages. The fatal field of Mohatz witnessed the overthrow of Corvinus, who, with an army amounting only to 36,000 men had rashly but gallantly attacked 400,000 Turks. Buda immediately surrendered; and though it was retaken in 1526, it almost immediately fell again into the hands of the Turks. Moldavia was next forced to submit to the victorious Mohammedans, who then proceeded to the siege of Vienna; but the autumnal rains retarded the operations of the besiegers and forced the sultan to abandon his undertaking. The Turks had no sooner raised the siege of Vienna, than their enemies acquiring new courage, assailed and drove them from every part of the German territories. Solyman now directed his arms against the nations on his eastern frontiers; Georgia was reduced, and Bagdad also fell into his hands, while Barbarossa, his celebrated admiral, caused himself to be dreaded in every part of the Mediterranean. Hungary had long been harassed by the Turkish forces—it was once more attacked and reduced to the state of a Turkish province. Selim II. who succeeded his father, for some time conducted the wars of the empire with equal vigour and prosperity; but his fleets failed to win that success which attended his army. The commercial powers in the Mediterranean combined their forces, and effected the total destruction of the Turkish fleet. The power of the Turks, and that of their European neighbours, was now nearly balanced. In

the reign of Amurath III. who succeeded Selim, the advantage became more evidently in favour of the Christians; and since that time though the Turks have sometimes enjoyed a transitory success, the real stability of their affairs has declined.

During a long period little alteration took place in the mutual relations between the Turks and western Europeans. Wars indeed were frequent; but few advantages were gained on either side, and these few were not of great importance. In 1684 the Ottoman empire in Europe seemed to be verging towards destruction, when by the wisdom and bravery of one man its affairs were once more retrieved. The visier, Achmet Kliperli, had the skill to call to his aid that religious enthusiasm which when properly managed conducts men to the most daring undertakings—the merit of opposing the armies of infidel was placed in the strongest light—and the predestinating creed of the prophet was forcibly inculcated. The effects of the visier's policy were quickly visible, the Christians were defeated in almost every quarter, and in 1678 the Turks had retaken Candia, Podolia, and the Ukraine, and might, perhaps, have extended their conquests still farther, had they not lost their visier at this juncture in an engagement with the Germans. After the death of Kliperli, the Turkish affairs fell into confusion; but negotiations for a peace were commenced; and in 1698, a treaty was concluded at Carlowitz between the contending parties. The Germans retained possession of Transylvania; the Banat of Temeswar and part of Slavonia was yielded to the Turks; the navigation of the Theiss and the Maros was declared free to both parties; a proper boundary was fixed between the German and Turkish parts of Hungary; and the truce was to continue 2 years. The peace with the Russians was to continue but 10 years, but they were to retain Asof. With the Poles, the duration of the treaty was to be the same: Moldavia was yielded to the Turks, while Kaminsk, Podolia, and the Ukraine were to be restored to the Poles. The Venetians retained possession of the Morea, with several other parts of the Turkish territories, and several ports were declared free to both nations. The cession of the Morea was the provision to which the Turks most unwillingly assented; they seized the opportunity of some commotions which prevailed among the European powers, and drove the Venetians from that part of their territories.

Under Peter the Great, the Russians continued to view with envy these fine provinces which owned subjection to the Turkish dominion, and seized the first opportunity of quarrel. They had for some time taken an active hand in the disturbances of Poland, and had effected what they were pleased to call a settlement of the affairs of that distracted kingdom; a discontented Pole retired to some part of the Turkish territories, and probably without the knowledge of the Turkish government, invited his countrymen to join him, promising them the support of the Ottoman forces,—the Russians, without inquiry, seized this opportunity of attacking the Turks, and in 1769 declared a new war. The success which attended the Russian too plainly betrayed the feeble state of their adversaries. The fortress of Asof, at the mouth of the Don, was seized, and Galitsain, passing the Dniester, endeavoured to seize the fort of Chocim, but was forced to retreat. Under Romanoff, the Russian arms were more successful. Chocim and Yasai were successively taken, and Romanoff invested Bender, but finding the season too far advanced for carrying on the siege, he withdrew his forces. In May 1770, Romanoff again renewed the Dniester, and marched from Chocim towards the Pruth, while Panin with another army arrived before Bender, which city was invested by the latter while the former covered his operations. Romanoff attacked the Turks at Cahoul, and obtained over them a complete victory, which compelled the grand visier to retreat the Danube. In the meantime, the fortress of Killianova and Akerman or Bialogorod, surrendered by capitulation. The strong fortress of Bender resisted until reduced to rubbish; the fortress of Brailow also was abandoned by its garrison, and immediately fell into the hands of the Russians. A Russian fleet had likewise entered the Mediterranean, and landing a body of forces upon the Morea, induced the Greeks to revolt from the Turkish government; Russian intrigues disunited the Tartar chiefs; Palestine revolted from Turkish sway, and Ali Bey chased the representative of the sultan from Cairo. In 1771, Dolgorouki, in spite of an army of 80,000 men by whom it was defended, made himself master of Crim Tartary; but the Russians durst not attack the grand visier amid the successes of the Balkans. The Turks had seized the fort of Gurgevo; and in Wallachia they were so powerful that Repnin refused to attack them, and the Turks resolved to winter on the north of the Danube; but ultimately found it impossible to maintain their ground on the south. The Turkish army, divided into two bodies, were attacked almost at the same instant, and both were defeated. The fort of Babadagh thereupon surrendered; the visier with his remaining forces retired behind the Balkan; Gurgevo was retaken; and the Turks were forced to evacuate Wallachia, while the Russian fleet ravaged all their maritime possessions, and threatened Constantinople itself. The Turks now earnestly desired peace; but the Russians demanded either that they should enjoy the free navigation of the Black sea, retain possession of the city of Asof, and be allowed a certain sum as an indemnification for their expenses; or that the Crimea, Budziac Tartary, and the extensive territory bounded by the Cimmerian Bosphorus and the N bank of the Danube, should be yielded to them in perpetual possession. The negotiations which had been carried on during a whole year, terminated

fruitlessly in March 1773, and each party prepared for a renewal of hostilities. After several unimportant skirmishes, Romanzof passed the Danube at the head of 87,000 men, and marched towards Silistria, which was defended by 24,000 men. To oppose the progress of the Russians, and to relieve the place, 50,000 men were despatched by the vizier, who compelled Romanzof to retire hastily, abandoning his ammunition and other military stores. At the moment of this return of prosperity the sultan Mustapha closed his days. Romanzof's army, powerfully re-enforced in 1774, repassed the Danube. Many engagements took place, in which the Russians were uniformly victorious, while from the Caucasus to the Danube the Ottoman power was pressed upon by their forces. The Turks were now entirely dispirited; multitudes laid down their arms; and comparatively few of them remained obedient to their officers. In such a situation, it became necessary to accede to whatever terms the Russians chose to dictate, and Romanzof, in the treaty concluded at Kutahuk-Kainarji, in July 1774, was careful that they should be sufficiently advantageous for his country. The Crimea was declared to be independent; Kilburn, Kertch, Jenikale, and the country between the Bog and the Dniester, were ceded to the Russians, who were also to enjoy the free navigation of the Turkish seas, and to be permitted to pass the strait called the Dardanelles; some stipulations were made in favour of the inhabitants of Moldavia, Wallachia, and the Greek islands, which had been in the power of the Russians, and were now to be restored; and the Russians were to retain possession of Azof and Taganrog; but, except the places which have been mentioned, agreed to relinquish all their other conquests. Austria gained the Buckovina by the same treaty. The claim of Russia to a right of surveillance in reference to the Christian religion and its churches in T. rests on this treaty "of perpetual peace and friendship," in which "the two empires agreed to annihilate and leave in eternal oblivion all the previous treaties between them." By art. 7, "the Sublime Porte promised to protect constantly the Christian religion and its churches; and it also allowed the ministers of the imperial court of Russia to make upon all occasions representations, as well in favour of the new church at Constantinople, of which mention was to be made in art. 14, as on behalf of its officiating ministers, promising to take such representations into due consideration, as being made by a confidential functionary of a neighbouring and sincerely friendly power." By art. 14, "after the manner of the other Powers, permission was given to the high court of Russia, in addition to the chapel built in the minister's residence, to erect in one of the quarters of Galata, in the street called Bey-Ogla, a public church of the Greek ritual, which should always be under the protection of the ministers of that empire, and secure from all coercion and outrage." By art. 8, Russian subjects were to have full liberty to visit Jerusalem, and no contribution or tax was to be exacted from these pilgrims and travellers; "but they were to be provided with such passports and firmans as were given to the subjects of the other friendly Powers." By art. 17, Russia restored the islands of the Archipelago to the Sublime Porte, "and the Sublime Porte on its part promised to observe religiously, with respect to the inhabitants of these islands, the amnesty stipulated in art. 1; and that the Christian religion should not be exposed to the least oppression any more than its churches, and that no obstacle should be opposed to the erection or repair of them, and also that the officiating ministers should neither be oppressed nor limited." In 1787, Mansur, a sheik of the Kuban Tartars, led the hordes over whom he had established his influence, against the Russians; but found his disorderly rabble unfit to withstand the regular forces of Potemkin who vanquished him in several engagements. The island of Taman, and the Crimea, were likewise attacked by the Turks; but in this quarter too they were repelled by the Russians. Joseph emperor of Germany, though he had no legitimate cause of quarrel, assisted the Russians with an army. The opposition of the Turks, though vigorous, was not successful; Czeremitz and Bucharest in Wallachia, and Cladova in Servia, yielded to the Austrians; while a Russian army of 160,000 men, under the command of Potemkin, Romanzof, Repnin, and Solitkow, approached from the banks of the Bog. Oczakow was besieged by Potemkin, and after an obstinate defence of four months, was taken in December 1788; and the Russians made themselves masters of Akerman and Bender. The death of Abdul Hamid occurred in the opening of 1789, when Selim III., the only son of the sultan Mustapha, mounted the imperial throne. In June 1790, a conference was held at Reichenbach, at which the ministers of Britain, Holland, and Prussia, with those of Austria and Poland, were present, and peace was established between the Austrians and the Turks, upon a treaty one article of which was that all conquests made by the former should be relinquished. The Russians were thus left to manage the contest by themselves. Suwarow, in 1790, took the fortress of Ismail. Such had been the determined valour of the defendants, that the Russians lost 10,000 men in the attack; and such was the brutal and ungenerous cruelty of the assailants, that the garrison, amounting to 30,000 men, were massacred in cold blood. Varna, the bulwark of Constantinople towards the Balkan, was now threatened, and the war on the side of the Turks had become a war of defence, and on the side of the Russians a war for the extension of their territories, when Great Britain interfered to curb that spirit of conquest which the Russians had so openly displayed. The Russians at first resented the interference; but gradually became less exorbitant in their demands, and at length consented to

peace on condition of retaining Oczakow and the territory extending from the Bog to the Dniester. These were ceded to Russia, by the treaty of Yassi, in 1792, together with an extraordinary right of interfering in the provinces of Wallachia and Moldavia, that their respective hospodars should be continued in office seven years, and not removable but by the consent of Russia. The reigning hospodars were deposed before their time; and when the Russians remonstrated, the Bosphorus was closed against their ships. Taking umbrage at these causes of complaint, in 1806, Michelson was despatched with an army of 60,000 men, who crossed the Dniester, took Bender and Chotin with little resistance, and entered Yassi, the capital of Moldavia. He then entered Bucharest, and took entire possession of the provinces of Bessarabia, Moldavia, and Wallachia. The Russians remained in almost undisturbed possession of these provinces till the year 1810; when the armies on both sides were augmented to 300,000 men, and a fierce and sanguinary contest ensued, which, perhaps, never was surpassed. The Russians passed the Danube in three places. Their direct progress would have been from Giurgevo to Rostchuk; but at this latter place the passage was impracticable. They therefore crossed over above it, at Ostrova near Widdin, and below it, at Hlorova and Turtukal, and laid siege to Rostchuk. The town was vigorously defended; and the Russians were repulsed in a desperate attack, in which they lost 6,000 men. Kaminsky made also a similar assault on the entrenched camp at Shumla; but here, too, he was driven back with great carnage. The Turks, though unacquainted with regular discipline in the field, made a fierce resistance when attacked behind their ramparts. In the month of September, Kaminsky, leaving Langeron before Rostchuk, with his disposable force suddenly attacked and defeated the Turks at Bayne; whereupon Rostchuk was compelled to surrender, with all the Turkish flotilla lying before it, and Giurgevo on the other side. In order to create a diversion, the Turks now sent a fleet into the Black sea, and threatened an attack on the Crimea. Notwithstanding this, the Russians concentrated their forces in Bulgaria, and the grand vizier was obliged to retreat before them, recross the Balkan, and take up a position at Adrianople; leaving, however, the strong and impregnable fortresses of Varna on the sea-coast, and Shumla on the ascent of the mountains, well secured at the other side. The feeble Selim, and his successor Mustapha, had both been strangled; and Mahommed was called to the throne, who soon displayed the vigour which ever afterwards distinguished him. The new vizier, Ahmed Aga, a man of the same energy as the sultan, and who had distinguished himself by his defence of Ibrail, descended from the mountains, forced the detached corps of Russians in Bulgaria to recross the Danube, and made a fierce attack upon Rostchuk, now defended by the Russian general Kutusof. The Russians, hard pressed, transported the inhabitants to the other side of the river, set fire to the town in four quarters, and then retreated themselves. The Turks rushed into the burning town, put a stop to the conflagration, and took up their position there. The grand vizier having thus driven the Russians to the opposite bank, now determined to follow them, and made the attempt in three places, Widdin, Rostchuk, and Silistria. He succeeded at Widdin, and established 30,000 men in Wallachia. He also succeeded at Rostchuk, took possession of a large island in the river, and, in perfect confidence, passed the greater part of his army to the other side, and established them in an entrenched camp. But Kutusof immediately availed himself of the vizier's crossing over, and detached 8,000 men, under Markof, to attack the camp he had left behind, which fell into the hands of the Russians. The fugitive Turks crowded into Rostchuk, where they were canonaded by the artillery of their own abandoned camp, while Langeron from the other side directed 100 pieces of cannon upon them. In this state they endured the severest privations, and were compelled to surrender, after having lost 10,000 men in the different assaults made on them. The exhausted state of the Turks, and the critical state of the Russians, now invaded by the French, induced an accommodation; and the peace of Bucharest, concluded in 1812, gave another accession of territory to the Russians, extending their frontier from the Dniester to the Pruth, and assigning to them all the country that lay between the two rivers, comprising Bessarabia, and a considerable part of Moldavia. The Russians upon this withdrew from the provinces of Wallachia and Moldavia, which they had occupied for seven years.

Great revolution.] During the sitting of the congress of Laybach, at the moment when the Neapolitan states were invaded by an Austrian army, a revolt of the Greeks against their Turkish masters burst forth in Moldavia, Wallachia, the Morea, and the Grecian islands. These news were received with disapprobation by the congress of Laybach, and in 1822 the deputies were refused their demands at the congress of Verona. In the beginning of the struggle the Greeks suffered several severe defeats from the Turks; but the Greeks entered on the road to freedom with better success in the Morea and in the islands. On the 23d of September 1821, the Greeks took Tripolizza, the capital of the Morea, and on the 1st of January 1822 the political existence and independence of all Greece was proclaimed. The Greeks gained signal naval victories over the Turks at Mitylene and in the gulf of Patras, and on the 16th of December 1822, Napoli-di-Romania was taken by capitulation, and the seat of the government transferred to that city from Tripolizza. The campaigns of 1823 and 1824 were alike inglorious and disastrous to the Turks. In March 1824, Ibrahim, son of the viceroy of

Egypt, took possession of Navarin. With this fierce and warlike chief the Greeks maintained a bloody and desolating struggle for the peninsula, until the combined fleets of Britain, Russia, and France, swept the Grecian seas of the Turkish fleet, and relieved the Morea of the presence of its ruthless invaders. Previous to this interference of arms, a treaty had been signed by these powers requiring from the belligerents an immediate armistice, as a preliminary step to a reconciliation being effected between them, on the basis, that the Greeks should hold of the sultan as of a superior lord; and should pay to the Ottoman empire an annual tribute, the amount of which should be fixed once for all by a common agreement; that they should be governed by the authorities they should themselves choose and nominate, but in the nomination of whom the Porte should have a determinate voice; and that to bring about a complete separation between the individuals of the two nations, and to prevent the collisions which are the inevitable consequences of so long a struggle, the Greeks should enter upon possession of the Turkish property situated either on the continent or in the isles of Greece, on the condition of indemnifying the former proprietors, either by the payment of an annual sum, to be added to the tribute which is to be paid to the Porte, or by some other transaction of the same nature. It was the violation of the demanded armistice in the presence of the combined fleets sent to enforce it, which led to the collision between the combined and Turkish fleets in the bay of Navarin. In March 1829, the French and British ambassadors intimated to the sultan the intention of their respective governments to acknowledge and maintain the independence of the Greeks. A treaty was finally negotiated by the three Powers, the principal articles of which will be found in our historical chapter on Greece. By this treaty, Greece is effectually separated from the sovereignty of the Porte, and pronounced a monarchical and independent state.

Recent struggles with Russia. It has been alleged by some politicians that the real source of the Greek revolution might be found within the Russian dominions: certain it is that as soon as that movement commenced, Russia began to augment her armies on the Pruth and Danube. On the 26th of April, 1828, the Russians passed the Pruth, and advanced into the principalities of Moldavia and Wallachia, and on the 6th of June, the emperor Nicholas crossed the Danube and entered Bulgaria. The first operations of the war were preceded or rather accompanied by a manifesto and declaration on the part of the Russians. In the first of these documents, the emperor complained of the violation of the treaty of Bucharest in 1812, and of the subsequent treaty of Ackerman,—of the illegal seizure of Russian vessels and confiscation of their cargoes,—of the closing of the passage of the Bosphorus, to the great injury of the Russian trade in the Black sea, and of the intrigues of the Porte with Persia to prevent her making peace with Russia. The declaration further charged T. with violating her pledge to the Servians, and her guarantee to the provinces of Moldavia and Wallachia, an amnesty was to be granted to the Servians; instead of which the Turks had invaded Servia, and devastated the country. The privileges of the principalities were to be guaranteed; but instead of this, a system had been established of the most sweeping plunder, while the incursions of the Turks inhabiting the I. bank of the Kuban were secretly encouraged. Finally, after enumerating his grounds of complaint, the emperor declared war against the Porte, and stated the objects of the war to be, to enforce the due and effectual observance of those treaties which Turkey had violated; and to secure the inviolable liberty of the Black sea, and the free navigation of the Bosphorus. War having commenced, the sultan did not dispute the Russian advance into the principalities of Moldavia and Wallachia, but concentrated his strength on Shumla, and determined to defend the defiles of the Balkan mountains. In the course of the month of July, 1828, the Russian main force invested the strong fortresses of Silistria on the Danube, and Varna on the coast of the Euxine. The latter place was got possession of chiefly through the treachery of Jusuff Pasha; but the Russians were compelled to raise the siege of Silistria on the 10th of November, and to retire into winter-cantonments in Moldavia and Wallachia. The campaign of 1829 was preceded by the taking of the important fortress of Kail, the *Arde-pont* of Nicopolis, on the 24th of January, and of Turnul, three weeks afterwards. The campaign was opened in May by the Russian forces marching upon the Danube, under Diebitsch, who immediately invested Silistria and Glurgevo; at the same time Paskewitch's division advanced along the Asiatic shore of the Black sea. The Turks endeavoured to impede the Russian armies in their principal operations by constant attacks on their positions, which rendered the contest very sanguinary on both sides. On the 11th of June the grand vizier's army sustained a severe defeat near the village of Kulertsha, in the neighbourhood of Shumla; and on the 30th of the same month Silistria surrendered to the Russians. Diebitsch immediately pushed forward across the Balkan into Thrace, after having closely invested Shumla, while Erzerum, the capital of Armenia, and the most considerable place in the eastern part of Asiatic Turkey—Bagdad excepted—surrendered to Paskewitch on the 27th of June. Mesembria, Acholon, and Bourgas, were taken possession of by the former general with little opposition; and on the 21st of August, the Russian army entered Adrianople. The affairs of the Turks being now evidently desperate, conferences on the subject of peace were entered into, and a preliminary treaty adjusted; and on the 14th of September a treaty of peace between the two belligerent powers was signed at Adrianople. By this

treaty not a foot of territory was gained or lost in Europe by either party, as far as the question of positive cessation was concerned; but in Asia, Russia obtained a considerable district,—the ancient *Cilicia*, at the east end of the Black sea. Turkey bound herself to pay £5,000,000 to Russia as an indemnity for the expense of the war, and £750,000 as an indemnity to Russian merchants for acts of spoliation committed upon them; the Servians were put again in possession of certain rights of which the Porte had recently deprived them; the Dardanelles and Bosphorus were declared free to the ships of all nations at peace with the Porte; and the fortifications of Glurgevo were to be demolished. Russia was not to evacuate Moldavia and Wallachia until the indemnities were paid; and the Porte formally recognised the political existence of Greece, as determined by Russia, in concert with France and England. This treaty "confirmed all the treaties which had been concluded at different epochs between the two empires," except as thereby modified. It contains no new provision on the subject of religion, or of Russian interference, except in relation to Moldavia and Wallachia, which provinces stood on a peculiar footing, and formed a special case. The Porte had received them back by the treaty of Kutchuk-Kainargi upon conditions set forth in art. 16, one of which ran thus:

"The Porte likewise permits that, according as the circumstances of these two principalities may require, the ministers of the imperial court of Russia resident at Constantinople may remonstrate in their favour, and promises to listen to them with all the attention which is due to friendly and respected Powers." These principalities had been the subject of further treaties at Jassy in 1792, and at Bucharest in 1812; and this treaty of Adrianople in 1829, speaking of these provinces, states, that "Russia had guaranteed their prosperity." The treaty of Balta-Liman, in 1849, recognized Russia as a protecting power in relation to these principalities. Immediately after the peace of Adrianople, in 1830, a most formidable insurrection burst forth in Albania. The grand vizier was sent to quell it; and, by dint of prudent and conciliating conduct, effectually succeeded in his mission.

Dispute with Mehemet Ali. Though nominally professing allegiance to the head of the Ottoman empire and the Mussulman faith, the two pashas of Acre and of Egypt had been for many years nearly independent of his authority. Mehemet Ali of Egypt, though by far the more powerful of the two, persevered in a show of reverence and obedience to the Sublime Porte: not so Abdallah of Acre. In 1822, he boldly threw aside his mask of submission, and at the head of an army composed of Arabs, Druses, and mercenaries from all parts of the Turkish empire, he endeavoured to seize on the pashalik of Damascus. He was foiled, however, in his attempt, and speedily obliged to retreat. He shut himself up in his strong fortress of Acre, where, by command of the Porte, he was besieged by five neighbouring pashas. After a ten months' siege, Mehemet Ali, pasha of Egypt, having become mediator with the Porte, the daring Abdallah was pardoned by the sultan, and restored to his former honours, on condition of paying a heavy sum of money as a fine. In this transaction Mehemet Ali conserved he had laid both Sultan Mahmud and Abdallah Pasha under obligations to himself. From the latter, it is certain, he thereafter exacted more deference than that proud chieftain was inclined to pay. At last, in November 1831, the quarrel between Mehemet Ali and Abdallah Pasha of Acre, broke out. Proceeding now without waiting for orders from the Porte, an Egyptian army laid siege to Acre, and took it on the 27th of May, 1832, after a bold resistance of six months. The sultan, however, naturally averse to see his pashas carrying on war on their own account, had meanwhile espoused the cause of Abdallah. The successful Egyptian, therefore, sent forward his son Ibrahim with an army which overran Syria, penetrated into Asia Minor, and advanced towards the capital of the Turkish empire. The sultan, conscious of his want of strength, called in the aid of the Russians, but even after the arrival of a Russian fleet and army at his capital, he had to make peace with Ibrahim through the medium of a French diplomatist, and to grant the pasha of Egypt the very terms he demanded before the arrival of the sultan's Muscovite allies. Sultan Mahmud died on June 30, 1839. Though he had seen some of the largest and fairest provinces of his immense empire wrested from him by conquest, or partly alienated by treaty and usurpation of his sovereign rights, Moldavia and Wallachia on the N. and Greece, Egypt, and Syria, on the S and SE, Mahmud, one of the greatest reformers of his age, freed the Porte from the military domination of the Janissaries, and had gone far towards effecting a most salutary social reorganization of the whole Turkish nation before his death.

Abd-ul Mejid. Abd-ul Mejid succeeded his father on the 1st of July, 1839, in the midst of the most formidable crisis which had ever threatened the existence of the Ottoman empire. The energy and courage of Mahmud had given way after the rout of his army at Nasib, which seemed destined to bring Ibrahim to the promontory of Scutari, and to place the Porte at the mercy of its imperious vassal. At such a moment it seemed like a bitter jest of fortune to place a youth who had not yet completed his seventeenth year at the head of the tottering empire. The most urgent danger which threatened the very existence of the house of Osmanli at the moment of his accession, was terminated in 1840 by the active intervention of the Great powers of Europe; and an arrangement concluded between the pasha of Egypt and his imperial master which has fortunately proved the basis of a lasting peace. The assistance which had been rendered

to the Porte at the moment of its utmost need by the Christian powers was an indelible memorial of the subject condition to which the empire had been reduced. In the personal character of the young sultan, however, there was ground of hope for his country. He assumed and has since exercised the supreme power in a way which exhibited no want of activity, courage, or resolution. In 1839, he gave his people what may be regarded as their Magna Charta or bill of rights; and in 1840 and 1863, by numerous *kath-sherifs* he established perfect toleration in his empire. The treaties existing till the late declaration of war between Russia and the Porte are of no great antiquity. The first concession of liberty to trade was made in the treaty of the Pruth in 1711, and in 1739 Russian merchants were first allowed to navigate the Black sea, though still in Turkish vessels. It is from the treaty of Kainarji, in 1774, of which we have given an outline, that the diplomatic relations of the two countries really commence. Her treaties—in as much as the stronger Power always has the means of interpreting treaties to the disadvantage of the weaker—form in fact, the machinery by which Russia has gradually increased her pressure on T., and endeavoured to draw into her own hands that protectorate of the Christian subjects of the Porte, which the Western Powers may claim to share in an equal degree. The first disturbance of the *status quo* originated in a dispute between the Greek and Latin churches respecting the Holy places. The affair of the sanctuaries at Jerusalem having been disposed of, and from the testimony even of Count Nesselrode himself, satisfactorily arranged, another difficulty sprung up. Menchikoff demanded guarantees for the maintenance of the privileges of the Greek church. The cabinet of St. Petersburg did not attempt to show, by alleging any particular instance, that these privileges had been violated, and the Porte, on the contrary, solemnly confirmed the religious immunities of his Christian subjects. The court of St. Petersburg seemed indeed to regard itself as charged with the exclusive right of protection over the Christian subjects of the Porte; but the other states of Europe felt that their interest in the Christians of the East was in no degree secondary to that of Russia, and that it was a perversion both of treaties and of facts for Russia to claim an influence over that body which ought to be shared, as far as it exists at all, by the other Christian powers; for practically every one of the important measures adopted of late years by the Porte for the relief of its Christian subjects has had the active and enlightened support of the British or French Ambassador, and has been opposed by Russian influence. The demands of Russia were felt to be incompatible with the preservation of Turkish independence, and were firmly rejected by the Porte; whereupon the czar declared his intention of invading the Danubian principalities, and holding them as “a material guarantee” for the concessions he demanded. A Russian army which had already been collected for the emergency, accordingly crossed the Pruth, and, in the midst of profound peace, invaded two provinces of the Ottoman empire, on the 2d of July 1853. The progress of the struggle since that date has hitherto reflected little honour either on Russian arms or Russian diplomacy; and the attitude which France and England have assumed, will, it may well be hoped, not only restore peace to Europe, but also exact important guarantees from Russia against the early renewal of fresh trouble from her ambitious designs. The treaties between Russia and the Porte, the fruit of eighty years of encroachment and intrigue on the part of Russia, are now happily abrogated, never again to be re-enacted; and the two great Western powers, France and England, will not we hope and believe desist from the enterprise in which they are engaged until they have, in the phrase taught them by the czar himself in his opening of the present struggle, secured “material guarantees” against the aggressive views of Russia. These guarantees, says an able despatch of M. Drouyn de Lhuys, the French minister, “result even from the present position which manifests the danger arising from the want of them. Thus Russia has profited by the exclusive right of surveillance which treaties conferred upon her in regard to Moldavia and Wallachia, conferring sovereign powers upon her to enter those provinces, as if they formed part of her own territory. The privileged position of Russia upon the Black sea has enabled her to found establishments there and to employ a naval force which without a counterpoise forms a perpetual menace against the Ottoman empire. The possession without control of the principal mouth of the Danube by Russia has created in the navigation of that great river moral and material obstacles which affect the commerce of every nation. In short, the articles of the treaty of Kutchuk-Kainardji relating to religious protection become, by an abuse of their interpretation, the original cause of the contest now existing in T. On all these points there are new regulations to establish, and important modifications to introduce into the *status quo ante bellum*. It may be said, I think, that the common interest of Europe demands 1st. That the protectorate exercised up to this moment by the imperial court of Russia over the principalities of Wallachia, Moldavia, and Servia cease for the future, and that the privileges granted by the sultans to these provinces, as dependencies of their empire, by virtue of an agreement concluded with the Sublime Porte, be placed under the collective guarantee of the Powers. 2d. That the navigation of the Danube, to its mouth, be freed from all restraint, and subjected to the application of the principles established by the acts of the congress of Vienna. 3d. That the treaty of July 13, 1844, be revised in concert by the high contracting Powers, with a view to establishing an European equilibrium, and to limiting the power of Russia in the Black sea. 4th. That no power claim a right to

exercise an official protectorate over the subjects of the Sublime Porte, to whatever sect they may belong, but that France, Austria, Great Britain, Prussia, and Russia shall lend their mutual aid to obtain in the initiative from the Ottoman government a respect for and observance of the religious privileges of the different Christian communities; and to turn to advantage, in the reciprocal interests of their co-religionists, the generous intentions manifested by his majesty the Sultan, without there resulting any attempt to control the dignity and independence of his crown.”

TURKEY-IN-ASIA, a great division of the Turkish empire, bounded by Persia on the E; by the Mediterranean sea, the isthmus of Suez, the Syrian and Arabian deserts, and the Persian gulf on the S; by the Black sea, the Bosphorus, the sea of Marmora, the Hellespont, and the Archipelago on the W; and by the Black sea and the dominions of Russia on the N. On the S and W these boundaries are clear and distinct, following those of Nature; on the side of Persia they have continued much the same since 1638. A line drawn southwards from the Luristan mountains, in 34° N lat. and 46° E long., till it strike the l. bank of the Tigris above Kut-al-Hamara, in 32° N lat. forms the boundary of Khuzistan and Irak-Arabi. Thence it is continued along the l. bank of the Tigris, to its junction with the Euphrates at Kornah, and from thence to the sea. From the point in the Luristan mountains above specified, the boundary runs nearly due N along the extensive range of mountains called Ayagha-Dagh—the ancient *Zagros*,—till it strike the Kurdistan mountains in 36° N lat., passing in its progress the sources of the Dialla, the Tahite, and Little Zab. From thence it runs NW along that range, passing to the NE of the sources of the Great Zab, as far as N lat. 39°. Thence it runs due N, passing to the E of Bayazid, and across the summit of Ararat in 45° E long., and from thence NW to the junction of the Aras and Harpasu, in 40° N lat. and 44° E long. Since the cession to Russia of all Persian Armenia N of the Araxes, what was once the Persian boundary on that side is now the Russian, and therefore in this part, Asiatic T. is separated from the Russian dominions on the E by the Harpasu, as far as its source in the Tchildir-Dagh, which divides the basin of the Kur from that of the Araxes. The greatest extent of Asiatic T. from W to E, or from Cape Baba in 25° 51' E long., and 39° 40' N lat., to the W base of Ararat in nearly the same lat., and 45° E long., is upwards of 1,000 m.; and the greatest breadth, or from the head of the Persian gulf, to the mouth of the Natonabi, 920 m. in a NW direction. But as this extensive region consists of two great integral divisions—Asia Minor or the peninsular division, and the eastern or continental division—the length and breadth are exceedingly various. The western division, as far as the Euphrates, contains a superficies of more than 200,000 sq. m.; the eastern, upwards of 300,000 sq. m. The peninsular division of Asiatic T. has been described in our article **ASIA MINOR**. The continental division comprises the upper basin of the Euphrates and Tigris, comprehending ARMENIA and KURDISTAN,—the region of the Orontes and Mount Lebanon, comprehending SYRIA and PALESTINE,—and the lower basin of the Euphrates and Tigris, containing MESOPOTAMIA or Al-Jezirah, together with BABYLONIA and CHALDEA, now denominated IRAK-ARABI, or the Arabian Irak, in contradistinction to Irak-Ajemi, the ancient *Media*. Each of these divisions is described under its respective head in our columns.

TURKEY, a township in Essex co., New Jersey, U. S., on the Passaic, 14 m. NW of Amboy.

TURKEY-FOOT, a township of Somerset co., in the state of Pennsylvania, U. S., 15 m. SW of Bedford, drained by Castleman's river and Laurel-Hill creek. Pop. in 1840, 1,422.

TURKEY-POINT, a cape on the coast of Maryland, U. S., at the mouth of the Susquehanna, where it takes the name of Chesapeake. Here the British army landed in August 1777, in their advance upon Philadelphia.

TURKEY-TOWN, a village of Cherokee co., in the state of Alabama, U. S., 128 m. NE of Tuscaloosa, on the Alabama and Tennessee railway.

TURKEYEN, a commune and village of Belgium, in the prov. of E. Flanders and dep. of Bassevelde. Pop. 292.

TURKHAL, a town of Turkey-in-Asia, in the pash. and sanj. of Sivas, 21 m. NW of Tokat, on the l. bank of the Tosanlu. It contains about 800 houses, and behind the town is an immense rock crowned by a fortress. It is the *Sebastopolis* of antiquity. Its environs are well cultivated.

TURKHEIM, a market-town of Bavaria, in the circle of Swabia, 25 m. SSW of Augsburg, on the l. bank of the Wertach, at the confluence of the Flossach. Pop. 1,500. It has a castle.

TURKHEIM (*OBER* and *UNTER*), two adjacent villages of Württemberg, in the circle of the Neckar, and both on the river of that name, containing respectively 900 and 2,100 inhabitants. The environs produce good wine, and contain several gypsum quarries.

TURKHEIM, or **THURINGHEIM**, a commune and town of France, in the dep. of the Haut-Rhin, and cant. of Wintzenheim, on the Fecht. Pop. in 1846, 2,858. It has manufactories of calico, and several spinning and paper-mills. The environs are noted for their wine. A victory was here gained by Turenne over the Imperialists in 1675.

TURKOCHORIO, or **KERD-ABAD**, a town of Greece, in Rumelia, in the diocese of Viotia, 18 m. NW of Livadia, to the N of the Gavrios.

TURKOMON, a town of Persia, in Azerdibjan 21 m. NW of Miana. Rice, cotton, and lint are cultivated in the environs.

TURK'S ISLAND, one of the Bahama group, having its N extremity in 21° 31' N lat., and 71° 7' 40' W long. A reef projects 3 m. from the N point, and continues along the whole E side of this island.

TURK'S ISLANDS, or **TURQUAS**, a group of islets in the SE extremity of the Bahama archipelago, and to the N of Hayti. Pop. 1,200. These islands are the most SE of all the Bahama islands. The principal is Grand Key, where there is established a port-of-entry. Many of the inhabitants migrate yearly from the Bermudas for the purpose of salt-raking, and return to Bermuda after the season is over for that purpose, so that the number is very fluctuating. There is no other produce exported from the Turk's islands.

TURLEGUE, a town of Spain, in the prov. and 24 m. SE of Toledo, in a fertile but insalubrious locality. Pop. 1,963. It has an hospital.

TURLER-SEE, a lake of Switzerland, in the cant. and 8 m. SSW of Zurich, and bail. of Knosau, at the W base of Mount Albis. It is about 2 m. in length, and $\frac{1}{2}$ m. in breadth, and abounds with fish.—Also an island at the head of Cook's inlet, in N lat. 61° 8'.

TURLOUGH, a parish in co. Mayo, $3\frac{1}{2}$ m. NE by E of Castlebar. Area 24,566 acres, of which 368 acres are in Lough Conn and 1,483 acres in Lough Culen. Pop. in 1831, 6,929; in 1841, 7,480.

TURN-AGAIN, an island of Torres strait, in S lat. 9° 34', and E long. 140° 56'. It is about 3 m. in length and $1\frac{1}{2}$ m. in breadth. It is low, level, and marshy, and surrounded by reefs and sand-banks. Its shores are covered with mangroves, and swarm with mosquitoes.—Also a headland of

New Zealand, on the SE coast of Eabeino-Mauwe, in S lat. 40° 84', and E long. 177° 5'.

TURN-AGAIN (CAPE), a headland of N. Australia, on the E side of the gulf of Carpentaria, in S lat. 13° 53'.

TURNAK, a river of Afghanistan, which has its source on the S side of the mountains which run between the Huzareh and Suliman ranges, at an alt. of 7,500 ft. above sea-level, and about 5 m. N of Oba, and joins the Urgundab in N lat. 31° 28', and E long. 65° 8'. In the upper part of its course it is a considerable stream, 8 yds. wide and $2\frac{1}{2}$ ft. deep; but in consequence of its waters being drawn off for irrigation, it becomes in the lower part of its course in summer completely dry.

TURNASTON, a parish in Herefordshire, 10 m. W by S of Hereford, watered by the Dore. Area 580 acres. Pop. in 1831, 54; in 1851, 70.

TURNAU, or **TENAWA**, a town of Austria, in Bohemia, in the circle of Bunzlau, 18 m. NE of Jung-Bunzlau, on the l. bank of the Iser. Pop. 3,505. It has manufactories of calico, printed muslins, and bijouterie. Garnets, and other precious stones, and sharpening and polishing stones, are found in the environs. In the vicinity are the ruins of the ancient castle of Trossky.—Also a town of Moravia, in the circle and 27 m. WNW of Olmutz, on the E bank of a small lake at the foot of a mountain, the summit of which is crowned by the old castle of Cunbury. Pop. 400.

TURNBY, an island of S. Australia, in Spencer's gulf, in Sir Joseph Bank's group, to the NW of Beeverly island.

TURNDITCH, a chapelry in Duffield p., Derbyshire, $4\frac{1}{2}$ m. S by E of Wirksworth. Pop. 380.

TURNEFFE, a group of islands in Honduras bay, 45 m. from the coast of Yucatan, in N lat. 17° 20', and W long. 87° 40'. It is about 45 m. in length from N to S, and 18 m. in breadth, and is surrounded by sand-banks. It is frequented by fishermen, but is uninhabited.

TURNER, a river of W. Australia, in the SW part of the co. of Sussex, and which flows into the sea to the SE of Cape Hamelin.

TURNER, a township of Oxford co., in the state of Maine, U. S., on the W side of Androscoggin river, 25 m. WSW of Augusta. The surface is pleasantly diversified, and the soil fertile. Pop. in 1850, 2,537.

TURNER'S-PUDDLE, a parish in Dorsetshire, $7\frac{1}{2}$ m. NW by W of Wareham. Area 1,983 acres. Pop. in 1831, 82; in 1851, 109.

TURNHAM-GREEN, a hamlet in Chiswick p., Middlesex, 8 m. W by S of St. Paul's, London.

TURNHOUT, an arrondissement, department, commune, and town of Belgium, in the prov. of Antwerp. Pop. of arrond. 80,000; of dep. 13,298.—The town is 26 m. ENE of Antwerp, in the midst of waste lands. Pop. 8,886. It is well-built, has a college, and possesses manufactories of linen and woolen fabrics, carpets, printed muslins, lace, numerous bleacheries, and dye-works, several breweries, tanneries, tile, brick, and lime-kilns. It returns three deputies to the provincial states. This town, which occupies a portion of a forest belonging to the dukes of Brabant, was founded in 1209. Its castle was built by Marie, duchess of Gueldres. After the peace of Munster, Philip IV., king of Spain, made a gift of T. to the widow of Frederick Henry of Nassau, through whom it descended to the house of Orange. The locality is noted for the victory of Prince Maurice of Nassau over the Spaniards in 1597, and for the defeat of the Austrians by the Brabançons in 1789.

TURNICH, a village of Prussia, in the prov. of

the Rhine, regency and 11 m. WSW of Cologne, and circle of Berghheim, on the r. bank of the Erft. Pop. 1,784. It has several spinning-mills.

TURNISCHA, or **TURNISCHE**, a town of Hungary, in the comitat of Szalad, 20 m. SW of Lővö, near the r. bank of the Lendoa. Pop. 650.

TURNITZ, **TWRDONICE**, or **TWORDONICZE**, a town of Austria, in Moravia, in the circle and 36 m. SSE of Brunn, near the r. bank of the March. Pop. in 1834, 1,254.

TURNWORTH, a parish in Dorsetshire, $4\frac{1}{2}$ m. W by N of Blandford-Forum. Area 1,560 acres. Pop. in 1831, 78; in 1851, 103.

TURNY, a commune of France, in the dep. of the Yonne, cant. and 7 m. NE of Brienon, in a valley, on a small affluent of the Armançon. Pop. 1,308.

TUROBIN, a town of Poland, in the gov. of Lublin, obwod and 23 m. SW of Krasnistaw, in the midst of a marsh, on the Por. Pop. 1,447. It has two churches.

TURON, a town of Spain, in the prov. and 51 m. SE of Granada, in a valley enclosed by mountains, in a dry but fertile locality, at some distance from the r. bank of the Adra. Pop. 2,655. It has a parish church, a customhouse, and a public granary; and in the vicinity are mines of lead and antimony.

TURON, a river of New South Wales, in the co. of Roxburgh, which flows into the Macquarie. The district through which this river flows has been one of the most productive fields of gold-digging enterprises. Both on the river itself, and on the tableland in the vicinity, whence its tributaries take their rise, the diggings have been successfully pursued. Many of these tributaries, Big Oakey and Little Oakey creek especially, have yielded a large amount of gold. The bed of the river is auriferous throughout its entire extent.

TURON, or **NORTH CAPE**, a headland of Annam, in the China sea, in N lat. $16^{\circ} 7'$, and E long. $108^{\circ} 13'$, at the NE extremity of an island of the same name, which encloses Turon harbour on the SE. It forms a lofty projection terminating in a rock, bearing in configuration a striking resemblance to that of a lion couchant. The harbour, locally named Han-san, forms one of the finest in existence. It is spacious and well-defended, and receives on the SE a small navigable river communicating by a canal with the town of Fai-fo. On the river, about a mile above its mouth, and $4\frac{1}{2}$ m. SE of Hue, is the town of Huron, formerly a flourishing and populous place. The houses are mostly built of bamboos covered with straw, and the market is plentifully supplied with poultry, especially ducks, fish, and vegetables. An extensive trade in cotton was formerly carried on with China, but the culture of the tree is now neglected. Marble now forms the chief article of export. In 1847 this place was visited by Sir John Davis on a commercial mission from the British government. Very little communication could be obtained with the shore for about six days, the alarm at first being evidently great; in addition to which it rained incessantly, and there was besides a severe typhoon. Two commissioners ultimately came on board, and invited the plenipotentiary to an entertainment and conference on shore the next day, when a very handsome reception was prepared—the commissioners appearing in their dresses of ceremony, the ancient costume of the Chinese. The first commissioner was assistant member of the board of revenue, the second treasurer of Kwangnan prov. in which T. lies. The rains continued incessantly, impeding communication, and the country was reported to be inundated and nearly impassable. A large present to the crews of the two ships, of bullocks, fowls, hogs, fruit, &c., was offered and ac-

cepted, on condition of a return being made, which was done accordingly. A party went on shore to view some very singular marble rocks about 5 m. distant; a guide was given them, and orders transmitted to afford every facility. These rocks rise at once out of the sandy flat between the river and the sea, and are covered in most parts with trees and luxuriant vegetation, peopled by numerous monkeys. The principal masses are 5 in number, of which the one nearest the sea contains some splendid caverns and galleries, which have been improved by art, and the caverns converted into temples of Buddha. The finest of these is quite a natural pantheon, being a dome of 80 ft. high, lit from the top by three openings. The floor is about 70 ft. in every direction, and has been paved. Several idols and shrines of Buddha and his disciples adorn the inside, and the whole is approached by an arched gallery with descending steps at intervals. The entire rock is laid out in a corresponding manner, with small dwellings and gardens in the open and level spaces. It would appear that our envoy, though respectfully and even kindly treated, was unable to obtain an audience of the king; and this has been attributed, "chiefly, if not altogether, to the plain and simple manner in which the mission was got up." But this failure may be regarded as of little moment. Our settlement on the NW coast of Borneo will inevitably bring us more closely into contact with the Hindu-Chinese nations, and furnish us with a point on which to place our commercial lever for moving them effectually. They will be unable to resist our civilization, when it shall have been brought into their immediate neighbourhood; and experience will demonstrate to them the futility of standing aloof, when our steamers are found to swarm in all the seas which wash their coasts, and our political power has become paramount.

TUROPOLYA, or **TUROVOPOLJE**, a district of Civil Croatia, in the comitat and to the SSE of Agram, between the r. bank of the Save, on the N, and a branch of the Alps on the S. It is 14 m. in length, and 12 m. in breadth, and presents the appearance of a fine well-watered plain. Its principal rivers are the Lomnicza, Odra, and Runa. It enjoys some peculiar political privileges.

TURPAUGE, a commune of Belgium, in the prov. of Luxemburg, and dep. of Meusancy. Pop. 249.

TURQUEL, a town of Portugal, in the prov. of Estremadura, comarca and 4 m. ESE of Alcobaca, on the r. bank of the Alcoa.

TURQUESTAIN, a village of France, in the dep. of the Meurthe, cant. and 8 m. SSE of Lorquin, on a steep mountain to the l. of the Sarre Blanche. Pop. 112. It has the remains of an ancient castle.

TURRABELE, a river of New South Wales, in the district of Liverpool plains, which flows into Lammoy river.

TURRACH, a village of Styria, in the circle and 41 m. WSW of Judenburg, near the frontier of Illyria, on the Schwarzbach, in the midst of mountains which are here crossed by a good road. It has mines of iron and copper, and several forges.

TURRAH, or **TERRAH**, a town of Hindostan, in the prov. of Gujerat, about midway between Therad and Rahdunpur. Pop. in 1809, 12,500, chiefly Coolies.

TURREEHEY, a town of Caffraria, in the Betchuana country, 120 m. W of Littaku. It consists of about 100 houses. The inhabitants paint their bodies red, and use on the hair a blue shining powder. They have numerous herds of cattle.

TURRET, a small lake and a rivulet in Strath-earn, Perthshire. The lake is about 1 m. long, and

a $\frac{1}{2}$ m. broad. The rivulet issues from the end of it, and has a run of about 5 m. SE to the Earn.

TURRI, a town of Naples, in the prov. of Abruzzo-Citra, district and 11 m. SW of Chieti, on a sandy rock, near the r. bank of the Pescara. Pop. 500. It has three churches.—Also a village of Sardinia, in the prov. and 8 m. WSW of Isili, in a fertile but insalubrious plain. Pop. 2,800.

TURRIERS, a canton, commune, and town of France, in the dep. of the Basses-Alpes, and arrond. of Sisteron. The cant. comprises 11 com. Pop. in 1831, 3,548; in 1846, 3,817. The town is 19 m. NE of Sisteron, in a valley. Pop. 613.

TURRIFF, a parish on the NW border of Aberdeenshire, divided chiefly by the Deveron, and partly by a small brook from Banffshire. Area 16,896 Scottish acres. Pop. in 1801, 2,090; in 1831, 2,807; in 1851, 3,584.—The town of T. near the centre of the p., is 11 m. SSE of Banff, and 34½ m. NNW of Aberdeen. An extensive bleachfield has existed here for about 75 years.

TURRITANO, a river of Sardinia, in the div. of Capo-Sassari, which has its source in the prov. of Alghero, flows thence into that of Sassari, and after a total course in a generally NNW direction of about 36 m., throws itself into the Mediterranean, 13 m. NNW of Sassari. Its principal affluents are the Campo-Lazzaro and the Mascaris.

TURRUNCUN, a town of Spain, in the prov. and 30 m. SE of Logrono, amid mountains. Pop. 305.

TURRYVENE, a commune of Belgium, in the prov. of Limburg, and dep. of Oostham. Pop. 126.

TURSAC, a village of France, in the dep. of the Dordogne, cant. and 7 m. N of St. Cyprien, near the l. bank of the Vezere. Pop. 740.

TURSAN, an ancient district of France, in the provinces of Guyenne and Gascogne, now comprised in the departments of the Landes and Gers. Its capital was Aire.

TURSI, a town of Naples, in the prov. of Basilicata, district and 50 m. S of Matera, on a hill, between the Sinno and Agri. Pop. 4,600. It has a cathedral, a collegiate and a parish church, several convents, an hospital, a diocesan seminary, and several handsome dwellings. This town is said to be of Saracenic foundation.

TURTEE, a village of Sind, on the r. bank of the Western Narra.

TURTLE, a small island of the South Pacific, in the Fiji archipelago, in S lat. 19° 50', and E long. 182°.—Also an island off the NW coast of Australia, in S lat. 19° 53' 48'.—Also a group of islands, 6 in number, off the NE coast of Australia, to the N of Point Look-out. They are all low, covered with wood, and encircled by coral reefs.

TURTON, a chapelry in Bolton p., co.-palatine of Lancaster, 4 m. N of Great Bolton. Area 4,110 acres. Pop. in 1831, 2,563; in 1851, 4,158. Many of the inhabitants are employed in cotton-spinning, bleaching, and calico-printing.

TURTUKAI, a town of European Turkey, in Bulgaria, on the r. bank of the Danube, opposite (Itenitza, 27 m. W by S of Silistria, situated on the sloping bank of the river, which here flows from W to E, and swells to a breadth of 1,200 yds. a little below. The guns of its fortifications command the plain on the l. or Wallachian bank, which is here quite flat for a long distance northwards. Opposite to the town there is an island in the Danube, which divides the stream into two channels, that on the S being from 600 to 700 yds. broad; that on the N 200 yds.

TUKTZ, or **TURCZ**, a village of Hungary, in the comitat of Ugocsa, 9 m. E of Halmi, at the foot of

mountains, on a small river of the same name, an affluent of the Thur. It has silver mines.

TURVEY, a parish in Bedfordshire, 8 m. WNW of Bedford, on the E bank of the Ouse. Area 3,944 acres. Pop. in 1831, 988; in 1851, 1,028.

TURVEY-BRIDGE, a hamlet in the p. of Lusk, co. Dublin, 2½ m. SSW of Lusk.

TURVILLE, or **TURFIELD**, a parish in Bucks, 6 m. NW by W of Great Marlow. Area 2,315 acres. Pop. in 1831, 442; in 1851, 436.

TURVO, a parish of Brazil, in the prov. of Minas-Geraes, on a river of the same name.—Also a river in the SW part of the prov. of Goyaz, an affluent of the Cururuhi.—Also a river of the prov. of Rio-de-Janeiro, in the district of Parati.

TURVO (**GRANDE E PEQUENO**), two rivers of Brazil, in the prov. of Minas-Geraes, affluents of the Chopoto.

TURWESTON, a parish in Bucks, 6 m. WNW of Buckingham. Area 1,240 acres. Pop. 322.

TURWICK, or **TERWICK**, a parish in Sussex, 5 m. W by N of Midhurst. Area 718 acres. Pop. 95.

TURY, or **TURI**, a small town of Brazil, in the prov. and 99 m. NNW of Maranhão, and comarca of Guimaraens, on the SE coast of the bay of Tury-Açu, in S lat. 1° 20', in a fertile locality. Pop. 5,000.

TURY-AÇU, a river of Brazil, which has its source in the W extremity of the prov. of Maranhão, near the confluence of the Araguaia, with the Tocantins; runs along the conterminous confines of the prov. of Para, traversing vast forests; and, after a total course of upwards of 375 m., in a generally NNE direction, throws itself into a bay of the same name. Boavista is the chief place on its banks.—The bay is formed by the Atlantic, between the provinces of Para and Maranhão, in S lat. 1° 22', and W long. 45° 1'. It is 36 m. wide at its entrance from NW to SE, and 21 m. in depth, and receives on the S a river of the same name, opposite Turi. The chief place in the bay is the island of Joao.—Also a headland at the NW extremity of the bay, which it separates from that of Motuoca, and 83 m. NNW of Turi.

TURYNANA, or **TUROROMA**, a river of Brazil, in the prov. of Maranhão, and district of Guimaraens, which throws itself into the Atlantic, in S lat. 2° 18', and W long. 44° 8'. Its embouchure forms a good port for small vessels.

TUSA, a town of Sicily, in the prov. of Messina, district and 8 m. NW of Mistretta, on a mountain, near the shore of the Tyrrhenian sea.

TUSBY, a town of Russia in Europe, in Finland, in the gov. and 48 m. SSE of Tavastehus and district of Borgo, on the S side of a small lake.

TUSCALOOSA, a central county of the state of Alabama, U. S., comprising an area of 1,507 sq. m., intersected by Black Warrior and its affluents, and by Sipsey river. The surface is undulating, and the soil highly productive. Pop. in 1840, 16,583; in 1850, 18,056. The capital, which bears the same name, is on the SE bank of Black Warrior or Tuscaloosa river, and 94 m. NW by W of Montgomery, in N lat. 32° 12', and W long. 87° 42'. Pop. in 1840, 1,949; in 1850, 2,961.

TUSCANY, in Italian, **TOSCANA**, a grand-duchy of Northern Italy, bounded on the NW by Lucca and Modena; on the NE, the E, and SE by the Papal dominions; and on the SW and W by the Mediterranean, here called the Tuscan or Tyrrhenian sea. Without these boundaries, there lies, within the circumference of Lucca, the Vicariato-di-Pietra-Santa, belonging to T.; and between Modena, Parma, Genoa, Massa, and Lucca, what is called the Lunigiana of T. Besides those insulated districts, the islands of Elba, Pisanosa, Palmajola, Gorgona,

Giglio, Montechristo, Melora, La Formiche, and Gianuti belong to this country. Liechtenstern calculates the Tuscan dominions at 8,415 sq. m.; Mayer's maps exhibit it at 8,460; and Balbi states it at 8,430 sq. m.

Physical features.] T. embraces three distinct regions. In the bottom of a beautiful valley, the famous Arno forms a basin of which Florence is the centre, and which on the S stretches to Crotona, and on the E to Pisa. This basin terminates near the sea in a dead level country resembling land which has been abandoned by the sea. The r. banks of the Arno are surrounded by the high chain of the Apennines; and the l. bounded by the sea and the Papal dominions, present the appearance of a desert, barren, flat country, where the soil is sterile, the air unhealthy, and the hills covered with ruins of all ages. The region of the Apennines covers one-third of the surface of Tuscany; the rich valley of the Arno only one-sixth, and the Maremma of Sienna, the remaining three-sixths. The coast-line is about 150 m. in length. The soil in the delightful valley of the Arno is rich and well-cultivated; that on the Apennines is stony. The soil near the coast is low, sandy, and at some parts swampy. The Maremma consists of a white clay, impregnated with sulphur; everywhere in this desolate country sulphureous springs and mephitic flames are seen issuing from the soil. The principal river is the Arno which is navigable for barges from Florence to the sea, and receives a great number of small rivers, as the Chiana, the Sieve, and the Evola. The Arno is of great use to the country by feeding upwards of 1,000 small canals of irrigation. The rivers were formerly very destructive, but are now all well-built up with dykes which protect the adjacent lands. The Ombrone is the largest river next to the Arno, but it is not navigable; it flows through the Maremma. The Tiber has its source here in the Apennines. The canal of San-Giovanni, and the Fosso-di-Navicelli are navigable; all the other numerous canals are merely for irrigation. The largest lake, the Lago-di-Castiglione-di-Piscaja, about 25 m. in circumference, is in communication with the sea by a canal. The climate is as much diversified as the country itself. The numerous mountains and the sea-breezes diminish the heat; though it sometimes becomes exceedingly oppressive. The mean temp. at Florence is 10° of R.; at Leghorn, 11°. On the high mountains, snow remains for weeks in winter, and the nights are very cold even in August; in the valleys, winter is so mild that snow scarcely remains for one day. Rain is not frequent; but copious dews refresh the plants. In summer the *sirocco* and the *libeccio* winds are very oppressive, and exert a pernicious influence on the vegetation. On the Apennines, and in the valley of the Arno, the climate is everywhere good; in the swamps near Pisa fevers and agues are common; the sulphureous soil of the Maremma sends forth pestilential exhalations, and it is only in winter that the herdsmen dare to visit these desolate regions long since forsaken by their inhabitants.

Productions.] The valley of the Arno is finely cultivated, and is divided into numerous small farms, separated by rows of trees or small canals: in no country of Europe perhaps is the soil so minutely subdivided as here. In the Maremma, the vegetation is so plentiful in summer that the pastures furnish supply for additional flocks of 400,000 sheep, 30,000 horses, and a great number of cattle and goats. The corn raised supplies the consumption of the numerous population only in ordinary years; in bad years supplies must be got from Leghorn. Straw has great value in Tuscany. The finest—

that of the *marzolino*, a species of wheat—being used for making bonnets. One of the most important productions is chestnuts, which on the Apennines, and the hills of the Maremma, are used for bread. The produce of chestnuts is calculated at 800,000 bushels per annum. Wine is made in considerable quantity; the best qualities are found at Monte-Pulciano, Chianti, and Pomino; most of it is consumed in the country. Oil is an object of great importance; the exportation being great, and the home-consumption amounting to about 11,050,000 lbs. per annum. Wood is abundant. Horses are numerous, but small and feeble. One of the most famous studs is at San-Rossore, where also a herd of about 200 camels has been kept from the time of the crusades. At San-Rossore there is also a herd of 1,800 wild cows, and a flock of merinoes. The asses of T. are thought the finest and strongest in Europe. Goats are numerous, and good cheese is prepared from their milk. The iron-mines of the isle of Elba are very extensive. Sulphur is exported in great quantities, and saltpetre, alum, and vitriol. The Tuscan marble is much valued. In statuary and coloured marbles, granites, chalcodony, alabaster, and serpentine, it is very rich.

Manufactures and commerce.] T. is one of the most industrious countries in Italy. In the valley of the Arno, in the neighbourhood of Florence, the manufacture of straw-hats is carried on by women, and annually produces 3,000,000 *liri*. Silk manufactures are still a principal branch of industry in the Florentine cities, and there are also some manufactures of linen, broad cloth, coral, soap, perfumeries, liquors, leather, paper, china, marble, alabaster, and mosaics. Leghorn has been declared a free port, and maintains a considerable commerce with the East. The balance of commerce is in favour of this country, which also derives considerable advantages from the numerous strangers who are constantly present in its fine capital, or visiting the baths at Pisa.

Inhabitants.] Balbi estimated the pop. in 1826, at 1,275,000 souls. The Tuscans are of Etrurian descent, but are now quite amalgamated with the Italians. The purest Italian is spoken here; but the pronunciation is guttural and harsh. There are about 15,000 Jews, and a good many French, English, German, and even Turkish settlers, particularly in Leghorn. The clergy were formerly very numerous, but Leopold abolished most of the convents, and the French secularised the rest; and only those orders which are devoted to the care of the sick, and the objects of education, were allowed. Of late years, however, T. has earned a disgraceful reputation for religious intolerance; and in 1851, a concordat was concluded between Rome and T., and which does away with many of the guarantees decreed in the last cent. against the authority of the church by the grand duke Peter Leopold. The leading points of this concordat are: that the ecclesiastical authorities are free in the exercise of their sacred office, and that the lay authorities are to aid them in the protection of morality and religion, and in the maintenance of the episcopal authority; bishops are free to publish whatever documents relate to their functions; and art. 3d provides that the bishops alone shall have the right of censorship over works treating *ex-professo* of religion, and shall moreover have the power of warning their flock or, in other words, of compelling them to avoid reading any book they may consider contrary to religion and morality. All cases relating to the faith, the sacraments, and other matters belonging to the spiritual jurisdiction by the sacred canons, must be deferred to the ecclesiastical authorities;

lay tribunals shall only be competent to inflict fines upon ecclesiastics detected in the perpetration of minor offences against the revenues, the game laws, &c. Church property is under the control of the bishops and rectors.—There was a time when the arts and sciences rendered Florence 'the brightest star of star-bright Italy;' but that age is gone; the Medici, Dante, Michael, Angelo, and Leonardo da Vinci are no more; nevertheless Florence, on account of her glorious monuments of art, and the remembrances of former times, is still one of the most interesting places in Europe. There are three universities at Florence, Pisa, and Sienna; that of Pisa has the most reputation.—The elementary schools are mostly in the hands of the clergy. More, however, is done here for popular education than in any other part of Italy, with the exception of the Sardinian dominions. There are academies and literary societies in all the important towns. The most remarkable are the *Accademia delle belle arti*, and the *Accademia Fiorentina*, which latter consists of the united societies *Del-Cimento*, *Della-Crusca*, and *Del-Disegno*.

Government. The government is an absolute monarchy. The state of justice here, as in every country where the sovereign's will is law, is extremely low. There are courts of law, and there is a Florentine code,—but it avails little when inimical to the views of the duke; and into the former it is impossible to procure admission, as all the proceedings are private, and the accused, with the horrible spirit of the inquisition, are not permitted to see their accusers. In 1852, a decree of the grand duke constituted a council-of-state, independent of the council of ministers. The council-of-state is composed of a president, 8 councillors in ordinary service, councillors extraordinary in unspecified number, and a first and second secretary. The ministers of state cannot at the same time be members of the active council-of-state; and they will only attend at the express desire of his imperial highness, but even then they will have no vote. The salary of the president of this council-of-state is fixed at 9,800 lire per annum; that of the councillors at 7,000 lire. In 1853 another decree was published, constituting on new bases the representation of the communes. Every commune is to be represented by a council-general, a tribunal, and a *gonfalonier*, the latter being nominated by the grand-duke. The council-general is to be composed of the *gonfalonier*, priors residing within the jurisdiction of the tribunal, and of the number of members determined by law. These members are to be drawn by lot from amongst the landed proprietors paying taxes in each commune. In towns where the pop. exceeds 2,000, the priors are to be 3, and the other councillors 6; over 2,000 and less than 5,000, the priors 4, and the others 8; over 5,000 and less than 10,000, 5 and 10; over 10,000 and under 15,000, 6 and 12; over 15,000 and under 20,000, 7 and 14; over 20,000, 8 and 16. In the town of Lucca there are to be 9 and 18, and in Florence and Leghorn 10 and 20. The *gonfalonier* is appointed for four years.—There are about 4,000 regular troops, besides militia. The few frigates and vessels which formerly protected the coast were lost during the French domination.—T. is administratively divided into 3 provinces, containing 36 towns, 135 boroughs, and 2,570 parishes.

Revenue. The *Monitore Toscano* published the budget of the revenue and expenditure of T. for 1853, as follows:

Revenue,	36,378,400 lire.
Expenditure,	36,308,800
Surplus,	67,600

Consequently, leaving aside the extraordinary expenses occasioned by the auxiliary force of 1,000 Austrians, the ordinary administration of the state seems to balance itself. The revenue for 1853 was 376,600 lire more than in 1852. The indirect taxes amounted to 25,699,100 lire. The expenditure for 1853 was thus estimated:—

Ministry of Interior,	2,780,000 lire.
" Grace and Justice,	3,494,600
" War,	7,000,000
" Foreign affairs,	267,400
" Public Instruction,	866,600
" Ecclesiastical affairs,	789,200
" Finance,	21,111,100
Total,	36,308,800

In the expenditure for 1853 the responsibility taken upon itself by the government for guaranteeing a minimum of interest to the contractors of the Siennese railway, and of the Lucca, Pisa, and Pistoia line is noted, the sum of 250,000 lire put down to that end. The conversion of the old loans and debts of T. into a consolidated fund at 3 per cent. was projected, as follows:—

1. Divers debts, bearing interest,	13,026,900 lire.
2. Lucca loan and loan of 1849,	31,903,000
3. Loan of 30th Sept., for 12,000,000 with mortgage on mines for thirty years,	8,811,000
4. Different debts to be converted,	21,096,000
Actual total debt,	74,238,900
Add to this proposed new loan,	21,000,000
	95,238,900

or in sterling money, £3,174,630

The budget for 1855 is as follows:—

Receipts,	37,608,400 lire.
Expenses,	37,546,700
Surplus,	61,700

This balance in favour of the revenue proceeds in part from the re-establishment of an estate tax at its original rate, and from a decree that creates throughout all the communes, from and after the 1st of February next, a tax on butchers' meat from which the cities liable to the salt-tax are alone to be exempted. The credits opened to the seven ministerial departments are distributed in the manner following:—

Ministry of the Interior,	2,741,100 lire.
" War,	7,988,800
" Grace and Justice,	3,494,000
" Foreign affairs,	240,800
" Public Instruction,	867,600
" Ecclesiastical affairs,	819,500
" Finance,	21,590,000
Total,	37,546,700

History. T., anciently called *Etruria*, was inhabited in early times by the *Etrusci*, whose antiquity is such that it is lost in the obscurity of ages. Some maintain that they were of Egyptian descent; many regard them as of Lydian origin; a still greater number will have them to have been the ancient *Pelasgi*; and of late they have been supposed to be the offspring of the Phœnicians or Canaanites. Nothing certain has yet resulted from all these learned investigations. We however know that they occupied a territory much more extensive than modern T., to which they were gradually circumscribed by the Gauls, the Samnites, and the Umbrians. They equalled the Egyptians in the solidity, and surpassed them in the beauty of their edifices, while they excelled them in the arts, and rivalled them in the luxuries of life, while the Greeks were still barbarians, and Rome was yet without a name; and though obliged in after times to bend under the Roman power, they could boast that they communicated to their conquering mistress the skill that erected her temples, the ceremonies that graced her religion, the robes that invested her magistrates, the pomp that accompanied her triumphs, and even the military music that animated her legions. Etruria was a confederacy of twelve republics, each governed by a chief called *lucomon*. These chiefs—who were priests at the same time—used to assemble near the temple of Volturna to consult on the affairs of their country. After the downfall of the Roman empire, this country came consecutively into the power of the West-Goths, Longobards, Byzantinians, and Franks, and was named Tuscany. From the time of Charlemagne it had its own margraves, who soon succeeded in becoming independent. That great revolution in the Italian cities which infused new life into the whole of Upper Italy, and effected a rapid transformation on the face of society there, was slowly developed in T. where the power of the margraves was more firmly established. Pisa was the first town which began to rise, and it was not till its power was destroyed by internal dissensions that Florence became powerful. About the middle of the 15th cent., Sienna was formed into a flourishing republic. These three cities divided the power among themselves; but Florence soon became preponderant; and the House of Medici, especially distinguished by its

great influence and patriotism, at length acquired the sovereignty of Pisa in 1407. In 1638, Florence 'with the Tuscan fields and hills' was erected into a duchy by the emperor Charles V. in favour of Alexander de-Medicia. He was of the elder branch of the Medicin family; which derived its descent from Philip de-Medicia, who lived in the 13th cent., and was a chief opposer of the Ghibelline faction. The Medici were noted for their taste in literature, poetry, and the fine arts; and learning and genius flourished under their fostering care. Cosmo I., in 1557, received Sienna from Philip II. of Spain; and in 1569 the title of grand-duke, which was confirmed by Maximilian II. in 1576. In 1737, the family of Medici became extinct; and Francis duke of Lorraine obtained the duchy as a compensation for the loss of his hereditary dominions, which had been seized by France, and given to Stanislaus, the father-in-law of Louis XV. By the marriage of Francis with Maria Theresa, queen of Hungary, and daughter of Charles VI. he became emperor of Germany, and T. in 1745 became an appanage of the Austrian family. Francis was succeeded in the duchy by his second son Leopold, who became emperor in 1790, upon the decease of his brother Joseph. In 1792, Ferdinand, second son of Leopold, was named grand-duke of Tuscany. He was driven out of his territories in 1799 by the French; who erected them into a republic under the name of the Etruscan commonwealth; afterwards made a kingdom of it under the name of Etruria; and finally incorporated it with France as an integral part of the French empire. Napoleon's sister, the duchess of Lucca, being named grand-duchess of Tuscany. In 1814, Ferdinand was restored to his duchy, which now comprehends the imperial fiefs, the principality of Piombino, the whole island of Elba, and the duchy of Lucca: see that article. Ferdinand died in 1824, and was succeeded by his son Leopold II.

TUSCARAWAS, a county in the E part of the state of Ohio, U. S., comprising an area of 704 sq. m., drained by a river of the same name, and by Sandy, Conotton, and Sugar creeks, and intersected by the Springfield, Mount-Vernon, and Pittsburg railway, and by the Ohio canal. Pop. in 1840, 25,631; in 1850, 31,761. It contains a village of the same name, 84 m. ENE of Columbus. Pop. 100.—Also a township of Coshocton co., in the same state. Pop. in 1840, 455.—Also a township of Stark co., in the same state. Pop. 1,792.—Also a river of Ohio, U. S., which rises in Portage co., and flows in a W course of 80 m. to its junction with the Walhonding, at Coshocton, with which it forms the Muskingum.

TUSCARORA, a village of Lewiston township, Niagara co., in the state of New York, U. S. Pop. in 1840, 300.—Also a township of Bradford co., in the state of Pennsylvania, watered by a creek of the same name. Pop. 1,020.—Also a township of Juniata co., in the same state. Pop. 1,018.—Also a creek of the same co., which has its source in Tell township, Huntingdon co., and joins the Juniata.—Also a range of mountains in the same state, in Schuylkill co., between Rush and West Penn townships, and forming a continuation of Mauch Chunk mountains. They abound in anthracite coal.

TUSCHKAU-OB-DER-MIES, **TAUSSKOW**, or **TUSKOW-NAD-MZY**, a town of Austria, in Bohemia, in the circle and 6 m. WNW of Pilsen, on the l. bank of the Mies. Pop. 954.

TUSCOLA, a county in the E part of the peninsula of Michigan, comprising an area of 800 sq. m., bounded on the NW by Saginaw bay of Lake Huron, and drained by Cass river and its branches.—Also a township of the same state, in Livingston co. Pop. in 1840, 247; in 1850, 544.—Also a township of the same state, in Saginaw co. Pop. 55.

TUSCUMBIA, a village of Franklin co., in the state of Alabama, U. S., 2 m. S of Tennessee river, and intersected by the Memphis and Charleston railway. Pop. in 1840, 2,000; in 1850, 2,300.—Also a village of Millar co., in the state of Missouri, on the r. bank of Osage river, 28 m. SW by S of Jefferson city. Pop. in 1840, about 50.

TUSHINGHAM-WITH-GRINDLEY, a township in Malpas p., co.-palatine of Chester, 3 m. NW by N of Whitechurch. Area 1,292 acres. Pop. in 1831, 328; in 1851, 315.

TUSKAR, or **TUSCAR ROCKS**, a group of rocks of the coast of co. Wexford, $\frac{1}{4}$ m. SE by E of Greenore-point. It consists of four masses of rock, arranged in a line from N to S, bearing the names of Tuscar *par excellence*, the North Hen and Chickens, and the South Hen and Chickens, and all lying within a space of about 2 furlongs from extremity to extremity. A lighthouse on the Tuscar rocks guides the mariner throughout the W side of the southern entrance of St. George's channel.

TUSKEVAR, a town of Hungary, in the com. and 31 m. W of Veszprim, on the Marczal.

TUSKI. See **TCHUKTSHEE**.

TUSMORE, a parish in Oxfordshire, 6 m. N by W of Bicester. Area with that of Hardwick, 900 acres. Pop. in 1831, 16; in 1851, 52.

TUSPAN, a port of Mexico, in the dep. and 136 m. WNW of Vera Cruz, on the l. bank of a small stream of the same name, at its influx into the gulf of Mexico.

TUSSI, a town of Naples, in the prov. of Abruzzo-Ultra, district and 17 m. SE of Aquila, and cant. of Santo Demetrio, on a hill. Pop. 550.

TUSSON, a village of France, in the dep. of the Charente, cant. and 4 m. NE of Aigre. Pop. 1,050. It has distilleries of brandy.

TUSTEREN, an island off the W coast of Norway, in the prov. of Drontheim, in N lat. $63^{\circ} 11'$, E long. 8° , between the Drontheimleed on the N, by which it is separated from the island of Smoeelen; the Solund on the E; and the Tuster-fjord on the S. It is 12 m. in length from NE to SW, and 5 m. in medium breadth, and has deeply indented coasts, especially on the W. It is generally mountainous, and contains several villages.

TUSTLA, **TUTTLA**, or **TOCHLAN**, a volcano of Mexico, in the state and 90 m. SE of Vera-Cruz. The last eruption, which took place in 1793, threw ashes as far as Perote, at the distance of 171 m. In its vicinity is an Indian village of the same name.

TUSZYN, a town of Poland, in the gov. and 71 m. ESE of Kalisch, and obwod of Petrikau. Pop. 700.

TUTA, a town of New Granada, in the dep. of Boyaca and prov. of Tunga. Pop., chiefly Indian, 200.

TUTAM-DARA, a village of Afghanistan, at the E extremity of the fertile valley of the Ghorbund. The locality is noted for the defeat of Ali-khan, by a British force under Sir Robert Sale, in Sept., 1840.

TUTBURY, a parish and town in Staffordshire, $\frac{1}{4}$ m. NW by N of Burton-upon-Trent, on the S bank of the Dove. Area of p. 4,001 acres. Pop. in 1801, 844; in 1831, 1,553; in 1851, 1,798. The ancient trade of the town, that of woolestapling, is extinct; but there are here a cotton factory, a corn-mill, and a glass work. T. is celebrated for its ruined castle, once the seat of the Mercian kings, and afterwards of the earls and dukes of Lancaster. In the civil wars of the 17th cent., the castle, after a long siege, surrendered to the parliamentarians, and was soon afterwards dismantled.

TUTHI, a village of the Punjab, to the N of Swan river, an affluent of the Sinde.

TUTICORIN, a town of Hindostan, in the presidency of Madras, and prov. of the Carnatic, district and 42 m. ENE of Tinnevely, near the shore of the gulf of Manaar. It has a pearl fishery, but the pearls are inferior in purity of colour to those of Ceylon. The first European settlement here was formed by the Dutch. It was finally ceded to the English in 1824.

TUTINO, a town of Naples, in the prov. of the Terra-d'Otranto, district and 25 m. SE of Gallipoli, and cant. of Tricase, at the foot of a hill. Pop. 330.

TUTNAL-WITH-COBLEY, a hamlet in the p. of Tardebigg, Worcestershire, 2 m. ESE of Bromsgrove. Area 3,450 acres. Pop. in 1851, 492.

TUTOYA, a town of Brazil, in the prov. and 165 m. E of Maranhao, on the l. bank of a river of the same name, the most westerly of the six arms by which the Paranaíba discharges itself into the ocean. The inhabitants are chiefly of European extraction, and carry on an active trade.

TUTT, a village of Sind, on the E bank of the Indus.

TUTTEROEEN, an island of the North sea, off the W coast of Norway and dio. of Drontheim. It is noted for its apples and cherries.

TUTTINGTON, a parish in Norfolkshire, 2½ m. E of Aylsham. Area 880 acres. Pop. in 1851, 213.

TUTTLINGEN, or **DUTLINGEN**, a bailiwick and town of Würtemberg, in the circle of the Schwarzwald, 22 m. WSW of Sigmaringen, on the r. bank of the Danube. Pop. in 1840, 5,302. It has manufactures of shawls, gloves, hosiery, bonnets, woolen and cotton fabrics, cutlery, nails, paper, &c.; and has also a considerable trade in corn. In the vicinity are the iron forges of Ludwigsthal, and the ruins of the ancient castle of Honberg. T., which is of great antiquity, was in 1643 the theatre of a battle between the French and Imperialists. Pop. of bail. 21,580.

TUTUILA, an island of the S. Pacific, in the Samoan group, in 8 lat. 14° 30', W long. 170° 41'. It is 17 m. in length, and 5 m. in breadth; and attains an elevation, in its loftiest peak, of 2,327 ft. It is inhabited by a considerable population, and has numerous villages upon it. On its S side is a good port called Pago-Pago. According to the testimony of Captain Wilkes, "the men of T. are a remarkably tall fine-looking set, with intelligent and pleasing countenances. The women are far from being good-looking, but are remarkably domestic and virtuous," exhibiting a strange contrast to those of Tahiti. "Travelling is believed to be safe throughout the island, and the natives," says Captain Wilkes, "as far as our experience goes, are not the blood-thirsty race they have been reported to be. The unfavourable estimate of their character has, I presume, been derived from those who first knew them, and particularly from their attack upon the expedition of La Perouse." Of this conflict, Captain Wilkes obtained the following particulars. On the morning of the massacre, the vessel stood in towards the land, and about noon the boats went ashore. While on shore, a number of canoes, belonging to the island of Upolu (to which T. was at the time subject), put off to the vessels. When alongside, a young man in one of them having laid his hand on a bolt, with the intention, as it was supposed, of stealing it, he was fired upon by the French, and mortally wounded. The natives immediately left the vessels, and hastened to the shore, where the boats had gone to get water; and on reaching them they began the attack, which resulted in the massacre of M. De Langle, and of those who were with him on shore. When the natives began this attack, the great body of the French were absent from their boats; but on the commencement of the disturbance, they all rushed towards the boats, and the confusion became general. The Tutuilians maintain that they endeavoured to save the lives of the French; and on the following day, as soon as they dared to venture from the mountains, whither they had fled during the massacre, they collected the bodies, dressed them in native cloth, and buried them in the beach, as they were accustomed to bury their own chiefs. The actors in the massacre proceeded at once to Upolu,

which will account for their having been afterwards seen there, and recognized by the French.

TUTWANU, a village of the Punjab, on the r. bank of the Ravi.

TUTWERLU, a commune of Belgium, in the prov. of Antwerp and dep. of Baelen. Pop. 116.

TUXFORD, a parish and market-town in Nottinghamshire, 24 m. NE by N of Nottingham. Area of p. 3,000 acres. The town, situated on an eminence, near the banks of a small stream which flows into the Trent, has a modern appearance; being built on the site of the old town, the greater part of which was destroyed by fire in 1702. The chief trade is in hops, considerable quantities of which are grown in the neighbourhood. Pop. in 1851, 1,211.

TUXTLA. See **TEXTLA**.

TUY, a judicial partido and town of Spain, in the prov. of Pontevedra. The partido comprises 51 parishes. The town is 18 m. SSE of Vigo, on a height surrounded by three streams, affluents of the Minho, by which it is separated from Portugal. Pop. 4,212. It has good ramparts, several forts, and a citadel furnished with numerous cannon, and stands opposite Valencia, a strong Portuguese fortress. It is well-built, and has regular streets paved and well-kept, several squares, and promenades, three fountains, a fine episcopal palace, a cathedral, several chapels, three convents, two hospitals, a foundling asylum, a college, a seminary, and barracks. The industry of the town consists chiefly in the manufacture of table-linen, hats, and leather. The climate is mild, but in consequence of adjacent marshes, insalubrious. Grain, wine, fruit of all kinds, &c. are extensively cultivated in the environs. T. is of great antiquity, and is supposed to be the *Castellum* of Pliny.

TUY, a river of Venezuela, which has its source in the mountains of San Pedro, 30 m. SW of Caraccas; flows in a generally E direction through the valleys of Aragoa, Tacata, Ocumare, and Santa-Teresa; and after a total course of upwards of 105 m., throws itself into the Caribbean sea, 27 m. SSE of Cape Codera. Its principal affluent is the Guayana.

TUYLK, a commune of Belgium, in the prov. of Limburg, and dep. of Curange. Pop. 238.

TUYRA, **TUIRA**, or **SANTA-MARIA**, a river of New Granada, which rises in the Spiritu-Santo range, in 7° 40' N lat.; flows N, and then NW, to its junction with the Chuamaque, coming from the N, in N lat. 8° 10', W long. 77° 45'; and then pursues a NW course to Darien harbour at the head of the gulf of San-Miguel. It is joined by the Nique, the Tapanacu, the Paya, the Puero, and the Yape on the r. bank; and by the Lemon, Bieo, Grandí, Pirre, San-Josef, and Tavina, on the l. bank.

TUYTENBERG, a commune of Belgium, in the prov. of Brabant and dep. of Lennick-Saint-Quentin. Pop. 252.

TU-YUN-FU, a division and town of China, in the prov. of Kwi-chu. The div. comprises 8 districts. The town is 30 m. S of Ping-yue-chu, in a valley on the l. bank of the Cham-ke, in N lat. 26° 12', E long. 107° 22'. It is exposed to the incursions of hordes who maintain themselves in independence in the adjacent mountains, and is consequently ill-built, and without any edifice worthy of notice. In this division is also Tu-yun-heen.

TVAREN, a gulf formed by the Baltic, on the coast of Sweden, in the pref. of Nyköping.

TVEDESTRAND, a port of Norway, in the dio. of Christiansand, and bail. of Nedenaes, formed by the Skager-Rack, in N lat. 58° 37', E long. 9°, and 12 m. S of Eester-Risoer. It is 12 m. in depth, and very narrow, and is entered by the Oxe-fjord, in which are the islands of Boroë and Tverdalsoe.

TVER, a central government of European Russia, lying between the parallels of 56° and 58° 40' N lat. and from 32° to 38° 20' E long. It is bounded by the gov. of Novgorod on the NW and N; by Jaroslavl on the E; by Vladimir on the SE; by Moscow and Smolensk on the S; and by Pskov on the W. It has a superficial extent of 19,660 geog. sq. m., with 1,359,920 inhabitants, in 1851, partly of Russian, partly of Finnish descent. The surface presents a wide plain, with numerous undulations, but nothing that can be called hills, and immense pine-forests. The climate is temperate, but changeable. The rivers are frozen over from the beginning of December to the end of March: the principal are the Volga, the Dwina, the Msta, the Tverza, the Mologa, and the Medveditza. The chief lakes are the Seliger and the Dvinez. The soil is of moderate fertility; and though fruit seldom succeeds, corn, hemp, cattle, and wood are raised in sufficient quantity to enable the inhabitants to export these productions. There are also iron mines. Manufactures are not numerous or important; but the transit trade is considerable. It is administratively divided into 12 circles.

TVER, the capital of the above government, and an archbishop's see, stands on the great road from Petersburg to Moscow; at the confluence of the Tvertza, the Volga, and the Tmaka, which three rivers divide the town into four parts, united by bridges, that over the Volga being of boats that may be removed during winter. Pop. 20,000. T. has been repeatedly ravaged by fire, particularly in 1763, when only a few houses were saved. The empress Catherine, after its last destruction, ordered a plan of a new town to be made out, and gave orders that the houses should be rebuilt on the prescribed model, erecting the public edifices at her own expense, and assisting individuals by loan. In consequence, T. is the most regularly built city in the empire, after St. Petersburg and Moscow. The streets are broad, and perfectly straight; and they all proceed from an open space in the centre of the town. The houses which surround this space, as well as those in the principal streets, are of brick, stuccoed white; there are also several handsome squares; but the city has upon the whole an inactive desolate appearance. The chief public buildings are the cathedral, which is old and in the Gothic style, the palace, the courts of justice, the government-offices, and the hospital. The building called the palace was fitted up for the archduchess Catherine, and her husband, a prince of Oldenburg, to whom, in his capacity of governor of the provs. of Tver, Novgorod, and Vladimir, the town was indebted for various improvements. The seminaries consist of one for the clergy; a gymnasium for education in classics, history, and philosophy; and a school for youths of rank.—The manufactures comprise linen, cordage, wax, leather, candles, bells, and hardware. Having the advantage of water-communication, T. has a considerable traffic in the supplying of the adjacent country, and the exporting of its produce, viz.: corn, hemp, and iron. Steamboats ply on the Volga between T. and the sea.

TVER, a town in the gov. of Vilna, district and 17 m. S of Telch.

TVERDOSSIN. See **TURDOSSIN**.

TVERETCH, a town of Russia in Europe, in the gov. of Vilna, district and 20 m. NE of Sventziany.

TVERTZA, a river of Russia in Europe, in the gov. of Tver, which issues from a small lake, in the district and 8 m. NNE of Vichni-Volotchok; traverses the district of Torjok; passes the town of that name; and after a total course in a generally SE direction of about 126 m., joins the Volga on the

l. bank, in Tver. This river communicates by the canal of Vichni-Volotchok with the Tzna, and thus connects the basins of the Volga and Neva. Upwards of 6,000 vessels annually pass to the Neva by this route.

TVIBERG, an island of the North sea, off the W coast of Norway, in the dio. of Bergen, in N lat. 61° 21', E long. 4° 52'.

TWEED, a river which, directly or by tributaries, drains nearly the whole area of the central and eastern border counties of Scotland, and detached districts of Durham and the north corner of Northumberland in England. It usually ranks in importance as the fourth of the Scottish rivers; but, estimated according to the extent of country which it drains, it surpasses every Scottish river except the Tay; for, while the Spey, which this rule places next to it, drains only 1,800 sq. m., and the Clyde, which is next to the Spey, drains only 1,200 sq. m., the Tweed drains 1,870 sq. m. In two head-waters, the one of which bears the name of Tweed from the outset, while the other is throughout called the Lyne, it rises respectively in the SW and the NW extremities of Peebles-shire; by the head-streams of the Ettrick, the Yarrow, and the Teviot, it drains Selkirkshire and Roxburghshire from the furthest W; by the Gala, the Leader, the Whitadder, and other streams, it draws off the waters from the 8 acclivities of the Moorfoot and the Lammermoor hills, even from a line but 11 or 12 m. S of Edinburgh; and from its remotest source to the sea at Berwick, it performs, irrespectively of windings, a run of about 100 m., about one-third of which is in Peebles-shire, and about another third through or in contact with Roxburghshire. The really remotest source of the T. is a paltry fountain called Tweed's-well, at the foot of a hill named Tweed's-cross, on the SW boundary of the p. of Tweedsmuir, in Peebles-shire, at an alt. of 1,500 ft. above the level of the sea. Over 22 m. from its origin, the T. runs prevailingly NE; and over the remaining 14 m. of the Peebles-shire part of its course, in the direction of E by S. The chief of the larger Peebles-shire tributaries, on the l. bank, are the Biggar, between Glenholm and Stobo; the Lyne, between Stobo and Peebles; the Eddlestone, at the town of Peebles; and the Leithen, at the village of Innerleithen; on the r. bank, the Fruid and the Talla, in Tweedsmuir; the Manor, between Manor and Peebles; and the Quair, nearly opposite the Leithen. During its connexion with Selkirkshire and Roxburghshire the T. continues, as in the latter part of its course in Peebles-shire, to run prevailingly E, till the last 9 or 10 m.; and over these it runs in the direction of NE by E. Its larger tributaries here, from the N, are the Cadon, between Stow and Galashiels; the Gala, between Galashiels and Melrose; the Allan, in Melrose; the Leader, between Melrose and Merton; and the Eden, in Ednam; from the S, the Ettrick, between Selkirk and Galashiels; and the Teviot, at the town of Kelso, the former previously augmented by the Yarrow, and the latter by far the largest of the Tweed's tributaries, and almost a rival of its upper stream in importance. After leaving Roxburghshire the T. is but partially a Scottish river; it divides Berwickshire from England till within 4½ m. of the sea, and then bids adieu to Scotland, and runs between England and the Liberties of Berwick. Its course for 4 or 5 m. after leaving Roxburghshire, and again for about 5 m. before entering the sea, is E; and over the intermediate distance it is in the direction of NE by N. The chief tributaries which enter it below Roxburghshire are, on the l. bank, the Loet, in Coldstream; and the Whitadder, in the liberties

of Berwick; and on the r. bank, the sluggish Till, 3 m. below the mouth of the Leet. The T. and the Clyde, for many miles from their source, flow so nearly in one direction as never to diverge to any great distance from each other; and so long as they continue nearly parallel, they flow upon almost the same level, and keep on a high table-land of country, as if hesitating whether to unite their waters or remain separate, and whether to turn their final course toward the eastern or the western ocean. In the vicinity of Biggar, where the Clyde is 7 m. from the Tweed, and 30 m. from its own source, and flows along a country by no means mountainous, the indigenous waters descend from within a $\frac{1}{2}$ m. of it to the Tweed; and 10 or 11 m. lower down, running in an opposite direction to that long pursued by the two great streams, splits its waters and sends them away in two separate detachments respectively to the Tweed and the Clyde: see BIGGAR and TARTH. Of the 1,500 ft. of the Tweed's total aggregate fall from its source to its embouchure, 1,000 ft. are achieved when it reaches Peebles. In the long run between that town and the sea, therefore, the river might be expected to become sluggish in current, and, over a considerable distance, navigable; but it accomplishes its remaining fall of 500 ft. in so many and so far-apart and so comparatively gentle descents, as to be altogether a stream of beauty, and a stranger to matters of commerce. It abounds in deep pools and in long stretches of scarcely perceptible current. A few miles from its embouchure, it becomes capable of admitting sailing-craft. The tide flows to Northam-castle, 10 m. above Berwick; and up to Newwater-ford, 6 m. above Berwick, it produces sufficient depth to float, at any time, a vessel of 30 tons. The real navigation of the T., however, is all confined to Berwick. The rental of the whole of the salmon-fisheries on the T. averaged about £12,000 a-year for the seven years preceding 1824.

TWEED. See CLARENCE RIVER.

TWEEDDALE, the ancient and still the popular name of **PEEBLES-SHIRE**: which see.

TWEEDMOUTH, a parish in the co.-palatine of Durham, situated on the S bank of the Tweed, and forming a suburb to the town of Berwick-upon-Tweed with which it is connected by a stone-bridge. Area 5,140 acres. Pop. in 1831, 4,971; in 1851, 5,714.

TWEEDSMUIR, a parish in the SW extremity of Peebles-shire. The surface is a congeries of mountainous hills with narrow intervening flats and morasses. The highest elevations are Hartfell and Broadlaw, the loftiest south of the Forth and the Clyde. Pop. in 1831, 288; in 1851, 220.

TWELOW, a town of Holland, in the prov. of Gueldres, arrond. and 21 m. NNE of Arnheim. Pop. 1,080.

TWELVE APOSTLES. See APOSTOLES.

TWELVE ISLES, or **TWELVE APOSTLES**, a group of islands on the S side of Lake Superior.

TWELVE-MILE CREEK, a river of S. Carolina, U. S., which runs into the Saluda, in N lat. 34° 50'.

TWELVE PINS, a range of mountains in co. Galway, 32 m. WNW of Galway.

TWEMLOW, a township in Sandbach p., co.-palatine of Chester, $5\frac{1}{2}$ m. ENE of Middlewich. Area 928 acres. Pop. in 1831, 152; in 1851, 123.

TWENTY-FOUR PERGUNNAHS, a district of Bengal, adjoining the southern limit of Calcutta, and stretching from the Sunderbunds on the S, to Nuddah on the N. Its surface is nearly a dead level of 1,186 sq. m. Pop. 288,000. This was the first territory of any extent the British possessed in Bengal. It was ceded by the nabob, Jaffier Ali

Khan, immediately after the revolution of 1757, and Lord Clive's jaghire was afterwards added.

TWENTY-FOUR RAJAHS, a territory of Hindostan, situated between the 28th and 30th parallels of N lat., formerly possessed by 24 petty chiefs, all of whom are now subject to Nepal or to the British government.

TWICKENHAM, a parish and village in Middlesex, 12 m. WSW of St. Paul's, on the W bank of the Thames. Area 2,440 acres. Pop. in 1831, 4,571; in 1851, 6,254. The church, a fine Doric edifice, contains the ashes of the poet Pope. The village contains many elegant mansions.

TWIELENFLETH, a parish of Hanover, in the gov. and 5 m. NE of Stade, and duchy of Bremen, in the Alteland, with a fine roadstead in the river Elbe. Pop. 640.

TWIESTRINGEN, a parish in the kingdom and gov. of Hanover, county of Hoya, 6 m. NW of Ehrenburg. Pop. 1,050.

TWIGGS, a central county in the state of Georgia, U. S., comprising an area of 393 sq. m., bordered on the W by the Ocmulgee river, and drained by its branches. The surface is hilly, but the soil fertile. It is intersected by the Central Georgia railway. Pop. in 1840, 8,422; in 1850, 8,179.

TWIN, a township of Darke co., in the state of Ohio, U. S. Pop. in 1840, 1,030.—Also a township of Ross co., in the same state. Pop. 2,195.—Also a township of Preble co. Pop. 1,675.

TWINEHAM, a parish in Sussex, $4\frac{1}{2}$ m. SW of Cuckfield. Area 1,908 acres. Pop. in 1851, 343.

TWINING, a parish in Gloucestershire, 2 m. N of Tewkesbury, including Mythe and Mythe-Hook. Area 3,155 acres. Pop. in 1851, 1,011.

TWINS, a group of islets in the Mergui archipelago, Indian ocean, to the SW of Dome island.—Also a group of islands near the NW coast of Australia, off Port Swan.

TWINSBURG, a township of Summit co., in the state of Ohio, U. S., 142 m. NE of Columbus, drained by Tinker's creek, and intersected by the Cleveland and Pittsburgh railroad. Pop. 8,179.

TWINSTEAD, or **TWINSTED**, a parish in Essex, $4\frac{1}{2}$ m. NE by N of Halstead. Area 1,008 acres. Pop. in 1831, 205; in 1851, 207.

TWISSEL, a township in Norham p., Northumberland, 13 m. NW by N of Wooler. Area 2,190 acres. Pop. in 1831, 292; in 1851, 366. The vanguard artillery of the English army crossed the Till at this place on their march to Flodden.

TWISS, a county of Western Australia, bounded on the N by the counties of Melbourne and Glenelg; on the E by the co. of Victoria; on the S by that of Perth; and on the W by the ocean. It is intersected by ramifications of the Darling range, and contains several fresh water lakes, which send their waters by the Ellen Brook and Howick rivers into Swan river. On the W is Garban river, which flows into Breton bay. The principal headland on the coast is Cape Leachenauff.

TWISTE, a village of the principality of Waldeck, and bail. of Diemel, on a river of the same name, 7 m. NE of Corbach. It has a paper-mill.

TWISTON, or **TWISLETON**, a township in Whalley p., co.-palatine of Lancaster, $4\frac{1}{2}$ m. E by N of Clitheroe. Area 849 acres. Pop. in 1851, 164.

TWITCHEN, a parish in Devon, $5\frac{1}{2}$ m. NE by E of South Molton. Area 2,918 acres. Pop. 203.

TWIVERTON, or **TWERTON**, a parish in Somerset, 2 m. W of Bath, intersected by the Great Western railway, which here passes through a tunnel 227 yds. in length. Area 971 acres. Pop. 2,958.

TWOFOLD BAY, a bay of New South Wales, in the co. of Auckland, 240 m. SSW of Sydney, in

S lat. $37^{\circ} 5'$, and E long. $150^{\circ} 10'$. It opens to the E between Woranga and Red Points, and is protected from all other winds, and possesses good anchorage. On its S side is a town named Boyd.

TWO-PEOPLE PORT, a harbour of Western Australia, on the SE coast of the co. of Plantagenet, enclosed on the S by Point Valliant.

TWO-RIVERS, a township of Manitowoc co., in the state of Wisconsin, U. S., 123 m. NE of Madison, drained by East and West Twin rivers, affluents of Lake Michigan, by which it is bounded on the E. Pop. in 1850, 924.

TWORKAU, a village of Prussia, in the prov. of Silesia, regency and 51 m. SSE of Oppeln, and circle of Ritbor. Pop. 1,010.

TWYCROSS, a parish in Leicestershire, $4\frac{1}{2}$ m. W by N of Market-Bosworth. Area 1,350 acres. Pop. in 1831, 319; in 1851, 305.

TWYFORD, a chapelry in Hurst p., Berks, 5 m. ENE of Reading, intersected by the Great Western railway, which has here a station, distant from the Paddington station $30\frac{1}{2}$ m.; from Bristol, $87\frac{1}{2}$ m.—Also a parish in Bucks, 5 m. S by W of Buckingham, comprising the hamlets of Charndon and Pounden. Area 4,110 acres. Pop. in 1831, 660; in 1851, 848.—Also a chapelry in Barrow p., Derbyshire, 5 m. SSW of Derby, on the N bank of the Trent. Area, with Stenson, 1,800 acres. Pop. in 1831, 219; in 1851, 222.—Also a parish in Leicestershire, 6 m. S by W of Melton-Mowbray, including the hamlet of Thorp-Sachville. Area 2,420 acres. Pop. in 1831, 512; in 1851, 526.—Also a parish in Norfolk, 1 m. W of Foulsham. Area 529 acres. Pop. in 1831, 82; in 1851, 84.—Also a parish in Hants, $2\frac{1}{2}$ m. S of Winchester, crossed by the Southampton and Winchester canal, and the South-Eastern railway. Area 4,219 acres. Pop. in 1831, 1,177; in 1851, 1,272.

TWYNELLS (Sr.), a parish and village of Pembrokehire, 4 m. SW of Pembroke. Area 1,358 acres. Pop. in 1831, 274; in 1851, 210.

TWYNHOLM, or **TWINEHAM**, a parish in the S division of Kirkcudbrightshire. Pop. in 1851, 782.

TWYWELL, a parish in Northamptonshire, $2\frac{1}{2}$ m. W of Thrapston. Area 1,400 acres. Pop. in 1831, 199; in 1851, 298.

TYBERCHAMPS, a commune of Belgium, in the prov. of Hainault and dep. of Senefle. Pop. 131.

TYBROUGHTON, a township in Haumer p., co. of Flint, 7 m. NE of Ellesmere. Area 1,150 acres. Pop. in 1831, 218; in 1851, 208.

TYCZIN, a town of Galicia, in the circle and 5 m. SE of Rzeszow, near the r. bank of the Wislok.

TYDD (St. GILES), a parish in Cambridgeshire, 5 m. NW by N of Wisbeach. Area 4,991 acres. Pop. in 1831, 987; in 1851, 932.

TYDD (St. MARY), a parish in Lincolnshire, 7 m. ESE of Holbeach. Area 4,845 acres. Pop. in 1831, 960; in 1851, 1,107.

TYDWEILIOG, a parish in Carnarvonshire, 9 m. W by N of Pwllheli. Area 2,241 acres. Pop. in 1831, 447; in 1851, 456.

TYEATATUA, a port of the Sandwich islands, on the W coast of the island of Hawaii, in N lat. $19^{\circ} 37'$, and W long. $156^{\circ} 6'$.

TYENDENAGA, a township of Upper Canada, in the Victoria district, bounded on the S by the bay of Quinte, and intersected by Salmon river. Pop. in 1842, 2,898.

TYFERNAN, or **TYFARNHAM**, a parish in co. Westmeath, $8\frac{1}{2}$ m. N by E of Mullingar. Area 1,818 acres. Pop. in 1831, 810; in 1841, 380.

TYJARAFE, a town of the island of Palma, in the Canary group. Pop. 2,216. It has a church and a customhouse.

TYKOCZYN, a town of Poland, in the gov. of

Augustow, obw. and 31 m. E of Loniza, in the midst of a marsh, on the l. bank of the Narew, by which it is separated from Russia. Pop., chiefly Jews, 3,516. It has three churches, two schools, and carries on an active trade in corn.

TYLER, a county in the E part of the state of Texas, U. S., comprising an area of 1,157 sq. m., bordered on the S by Big Sandy or Alabama creek, and drained by affluents of Neches river. The surface is undulating, and the soil generally productive. Pop. in 1850, 1,894. Its capital is Woodville.—Also a county in the NW part of the state of Virginia comprising an area of 373 sq. m., drained by Fishing and Middle island creeks, affluents of the Ohio. The surface is hilly, but the soil is generally fertile. Pop. in 1840, 6,954; in 1850, 5,498. Its capital is Middlebourne.

TY-LE-VEN-FU-THA, a mountain of Mongolia, in the Khalkas country.

TYLICZ, a town of Galicia, in the circle of Sandec, 21 m. SE of Nowy-Sandec, on a small affluent of the Poprad, in the midst of the Carpathians.

TYM, a river of Russia in Asia, which has its source in the gov. of Yeniseisk, runs W into the gov. of Tobolsk, and after a total course of about 300 m. joins the Oby, on the r. bank, a little to the NW of Tynsaka.

TYMOCHTEE, a township of Wyandott co., in the state of Ohio, U. S., 63 m. N by W of Columbus, drained by Sandusky and Tymochtee rivers, and on the Mad River and Lake Erie railroad. Pop. in 1840, 1,625; in 1850, 1,817.—Also a creek, an affluent of the Sandusky.

TYMOLE, or **TEEMOOLE**, a parish in co. Meath, 3 m. SSW of Duleek. Area 1,033 acres. Pop. 71.

TYNAGH, a parish in co. Galway, $6\frac{1}{2}$ m. NW by W of Portumna. Area 12,520 acres. Pop. 5,941.

TYNAN, a rivulet of cos. Monaghan and Armagh, which rises in co. Monaghan, flows through Castle-Shane, past the town of Tynan, and falls into the Blackwater in the vicinity of Caledon.—Also a parish in co. Armagh, containing the villages of Killyleagh, T. and Middleton. Area 17,045 acres. Pop. in 1831, 11,542; in 1841, 11,392.—The village is $6\frac{1}{2}$ m. SSW of Armagh. Pop. 177.

TYNAREH, a town of Nubia, in the district of Mahas, on the r. bank of the Nile, 54 m. N of Hannek.

TYNDRUM, a village at the head of Strathfillan, in the p. of Killin, Perthshire, about 20 m. W of the village of Killin.

TYNE, a river of England, formed by the united streams of the North and South Tyne. The former, rising in the disputed border-territories, passes the town of Bellingham, and a little to the N of Hexham, is joined by the South T., which, rising in Knaredale, Cumberland, flows past the town of Haltwhistle, prior to its junction with the North T. Near Hexham both rivers unite and form the T., which, pursuing an E course, runs past the town of Corbridge, and about 3 m. W of Newcastle, is further augmented by the Derwent. At Newcastle the T. becomes navigable for large vessels; and, still flowing eastward, it divides the towns of North and South Shields, and finally empties itself into the sea at Tynemouth. During the last 18 m. of its course it forms the line of separation between the counties of Northumberland and Durham. The spring-tides rise about 18 ft. at the mouth of the river, and about 11 $\frac{1}{2}$ ft. at Newcastle.

TYNE, a river of Lothian, originating in Edinburghshire, but belonging almost wholly to Haddingtonshire, and draining the larger part of its area. It has its chief source in Fala-flow, and runs NE nearly across the centre of the lowlands of the

RUINS OF TYRE.

county, to the sea at Tynninghame, $2\frac{1}{2}$ m. NW of Dunbar, performing a run of 16 m., or, if measured from its remotest source, 28 m.

TYNEHAM (Wesst, or Little), a parish in Dorsetshire, $6\frac{1}{2}$ m. W by S of Corfe-Castle. Area 2,915 acres. Pop. in 1831, 247; in 1851, 274.

TYNEMOUTH, a borough and seaport in Northumberland, at the mouth of the river Tyne, on its N bank, 8 m. ENE of Newcastle by the Newcastle and North Shields railway, which terminates here. The parish, including the townships and chapelrys of North Shields, T., Chirton, Cullercoats, Monk-Seatons, Murton or Moortown, Preston, and Whitely, has an area of 7,222 acres. Pop. in 1801, 14,345; in 1831, 24,778; in 1851, 30,524.—The town of North Shields partly occupies the townships of T., Preston, and Chirton. The mouth of the Tyne forms a haven of sufficient depth for vessels of any tonnage except on the bar of sand which crosses it, where there is little more than 7 ft. depth of water at ebb. The principal manufactures carried on in the p. are those connected with the supply of the shipping in the port and in the ship-building yards; but there are considerable manufactories of chemical substances, tobacco, hats, and gloves. T. village, consisting principally of one good street and two smaller ones, is situated about 1 m. to the E of the market-place of North Shields. The houses are for the most part well-built; and during the bathing season, considerable numbers resort hither for bathing. The ruins of the ancient priory of T., situated on a peninsula of rocks at the mouth of the Tyne, have been appropriated as a magazine for military stores. T. and North Shields were enfranchised by the Reform act, and now return one member to parliament.

TYNGSBORO, a township and village of Middlesex co., in the state of Massachusetts, U. S., on both sides of the Merrimac, and intersected by the Nashua and Lowell railroad. Pop. in 1840, 670; in 1850, 799.

TYNIEC, a village of Galicia, in the circle and 20 m. ENE of Wadowice, on the r. bank of the Vistula. It has a Benedictine convent.

TYNISH, an inhabited island in the p. of Moyrus, co. Galway, 3 furl. SSW of the nearest part of the mainland, and $3\frac{1}{2}$ m. NW by W of Garomna. Its length, south-south-westward, is $1\frac{1}{2}$ m.; and its extreme breadth is 3 furl. Its inhabitants, amounting to about 150, are engaged chiefly in the fisheries.

TYNRON, a parish in Nithsdale, Dumfriesshire; bounded on the W by Kirkcudbrightshire. Area 11,390 acres. The surface consists principally of the glen or strath of the Shinnel, and two ranges of hills which form its screens. The highest hills, Lamgaroch and Coremilligan, are each about 1,800 ft. above sea-level. The v. of Tynron-kirk, with scarcely 100 inhabitants, stands on the Minnyhive road, $2\frac{1}{2}$ m. from Minnyhive. Pop. of the p. in 1831, 493; in 1851, 482.

TY-PIN-SHAN, or **TAE-PING-SHAN**, an island of the Eastern sea, in the group sometimes known as the *Majicosima* islands, of which it is the largest and most easterly, in N lat. $24^{\circ} 50'$, and E long 125° . It is about 20 m. in length, by 10 m. in breadth, and enclosed on the N and NW by an extensive reef. Captain Sir Edward Belcher has given the first account of the Ty-pin-san group which consists of 5 islands, namely, T., Ku-ri-mah, Y-drah-bu, Y-ki-mah, and U-ga-mi: "In describing the principal features which seem to mark the character of the people of this hitherto unknown, or rather unvisited group, termed *Meia-co-shimans* by the authorities, it will be immediately apparent," says Captain Belcher, "how very near they approximate, in general, to the

inhabitants of Loo-Choo, so well detailed by Mac-Leod and Basil Hall in the voyages of her majesty's ships *Alceste* and *Lyra*. Like those mild and inoffensive islanders, their physical appearance much resembles that of the Koreans and Japanese; their dress also consists of a similar loose robe, of varied pattern, having large wide sleeves, and which is secured about the waist by a long sash. Like them, also, they strain back their long black hair, which is secured in an elegant top-knot, through which they pass their ornamental hair-pins. On state occasions the grandes wear red, yellow, or blue caps of office; and in pursuance of the customs of the Chinese their women are strictly secluded. It would be an easy task to designate this people as a set of tea-drinking old women, imbecile and apathetic; void of energy and enterprise, living in contentment on a group of islands the value and facilities of which they are almost entirely ignorant of, and of whose position and resources they are unable to take advantage. But on contrasting them with the insidious, fawning, and deceitful Chinese, or the savage and vindictive bloodythirsty Malays, I cannot but fancy their character amiable and their condition one to be envied. Their food is extremely simple, consisting chiefly of the batata, rice, and other vegetables, varied with the produce of the deep, including molluscous animals, such as the cuttle-fish, the large clam (*Tridacna gigas*), and others. They appear to indulge constantly in smoking tobacco, and seem as passionately fond of tea as their continental friends the Chinese.

TY-PO-HOY, a bay formed by a series of small islands in the bay of Canton, on the S coast of China, and prov. of Kwang-tung, in N lat. $22^{\circ} 32'$, and E long. $114^{\circ} 25'$. It is about 12 m. in length, and nearly equal in breadth.

TYRAWA-SOHIA, a village of Galicia, in the circle and 6 m. NE of Sanok, on the Tyrawa, a small affluent of the San. It has a salt-refinery, several silk mills, and petroleum springs.

TYRAWA-WOLOSKA, a town of Galicia, in the circle and 9 m. ENE of Sanok, on the Tyrawa.

TYRCONNEL, an ancient Irish toparchy, nearly identical with the present county of Donegal, in the NW of Ulster.—Also a small island in the mouth of Murchison strait, at the E coast of Baffin bay, in N lat. $77^{\circ} 36'$.

TYRE, or **SUZ**, a small port of Syria, 25 m. SW of Saida or Sidon, the representative of the ancient Tyre, called by Joshua, 'the strong city of Tzoor,' and the most celebrated of all the Phœnician cities. It seems to have been originally founded by a colony from Sidon, and at a subsequent period to have eclipsed that city itself in commercial wealth and political importance, being the greatest mart in the ancient world, and possessed of all the trade of the Mediterranean sea. So great was its naval power that it baffled the arms of the Assyrian conqueror Shalmanazar, and withstood the arms of Nebuchadnezzar for 13 years. When at length their city was taken by that powerful prince, the inhabitants retired into the insular Tyre where they built a new town, which soon rose to equal importance with the continental city. The renovated Tyre stood a siege of seven months from Alexander the Great, who treated the captive inhabitants with unrelenting cruelty; but it was again rebuilt and re-peopled by the conqueror who had destroyed it, and rose again to importance, though not to its pristine grandeur, as the monopoly of commerce which the former city enjoyed was now annihilated for ever. After the Saracenic conquest of Syria, T. gradually declined, and at the end of the last century it was a miserable village with hardly ten poor fishermen in-

habiting it. But within this century T. has again begun to lift up its head. In 1816, according to Buckingham, it contained 800 substantial stone built buildings, with suitable appendages, besides other smaller houses for the poorer classes, a mosque, three Christian churches, a public bath, and three bazaars. He calculated the increasing pop. at from 5,000 to 8,000 souls, three-fourths of whom were Arab Catholics; the rest Mussulmans, Arabs, and Turks. Mr. Connor, however, in 1820, gives a much lower estimate of the pop., making it only 1,900, and of these 100 only were Turks; and still later, M. de Bertou states the pop. at only 1,200. The chief staple is tobacco, which is sent to Cairo and Damietta, where it is sold at from £20 to £24 a cantar. To the same places are sent charcoal, dried figs, and faggots of wood. The walls of the ancient city may still be traced, forming an irregular square of about 1 m. in circuit. The harbour, which will now admit only boats, stretches 80 ft. along the shore, and 150 ft. along banks that run into the sea. Near the walls at the E end, are the ruins of two square towers, which Pocock supposes may have served as reservoirs of water from the aqueduct, for its distribution over the city. Without the walls are the ruins of a large church, built in the Syrian style.

TYRE, a township of Seneca co., in the state of New York, U. S., 150 m. W by N of Albany, drained by Clyde river.

TYRELLA, a parish of co. Down, 3 m. E of Dundrum. Area 1,999 acres. Pop. in 1841, 1,079.

TYRENASCRAUGH, or TIRANASCRAUGH, a parish in co. Galway, $\frac{3}{4}$ m. SSW of Eyecourt. Area 3,629 acres. Pop. in 1831, 1,093; in 1841, 1,118.

TYRESIOE, an island of Sweden, in the prefecture of Stockholm, and haerad of Sotholm. It contains the town of Dalard.

TYRGHETOU, a mountain of Mongolai, in the Khalkas country, between Urga and Kiakhta. It gives rise to the Chara.

TYRIE, a parish near the NE extremity of Aberdeenshire. Area about 15 sq. m. Pop. 2,830.

TYRI-FIORD, a lake of Norway, in the dio. of Aggershuus and E part of the bail. of Buskerud, in N lat. 60°. E long. 10°. It is 18 m. in length from NE to SW, but is very unequal in breadth, branching into several extensive arms. On the NW it receives the Beina-elv, and on the SW it discharges itself, by the Drammen-elv, into the gulf of Christiania.

TYRINGHAM, a township and village of Berkshire co., in the state of Massachusetts, U. S., 112 m. W of Boston, watered by branches of Housatonic river. Pop. in 1840, 1,477; in 1851, 821.

TYRNAU, or NAGY-SZOMBAT, a free royal town of Hungary, in the comitat and 28 m. NE of Presburg, in a fertile plain, and on a small river of the same name, an affluent of the Dudvág. Pop., chiefly Slovacks, Hungarians, and Germans, and nearly all Catholics, 7,000. It contains 9 Catholic churches—of which one is surmounted by two fine towers,—two convents, two seminaries, a Catholic gymnasium and observatory, a public library, an infirmary, an alms-house, and a lunatic-asylum. It has manufactories of linen and cloth, and carries on an extensive trade. It was formerly the seat of a university.

TYROL, a province of the Austrian empire, comprising an extensive and very mountainous country, on the SW frontiers of Germany, extending from Italy to Suabia, and from the duchy of Carinthia to the Grisons. Under the appellation are included, not only Tyrol properly so called, but the bishoprics of Trent and Brixen, the seven lordships of the Vorarlberg, and the counties of Feldkirch, Schellen-

berg, Monfort, Pludenz, Hohenems, and Sonneberg: the whole—excepting the seignior of Weiler—comprehending, according to Lichtenstern, 514 German sq. m., or 10,280 British sq. m. Its greatest extent from N to S, or from the southern frontiers of the bishopric of Trent to the northern frontier of Suabia, is 140 m.; its greatest length from E to W, or from the western boundary of Carinthia, to the lake of Constanx, is 160 m.; but its figure is extremely irregular. In the S its breadth is not above 70 m.; in the NW not above 40 m.; in the NE, where it forms a narrow angle between Upper Bavaria and Salzburg, not more than 85 m. and decreasing from that to 15 m., being merely a long valley, 60 m. in length, watered by the Inn. Another angle, reaching from the moor of Sterzing to the frontiers of Carinthia, interposes between Salzburg and Italy; extending 50 m. in an E and W direction, and from 30 to 20 m. in breadth from N to S.

Physical features.] Tyrol, and the whole SW part of the country above the Ena, may justly be denominated German Switzerland,—being, in respect of physical features, a continuation of that country. Of this extensive and highly diversified region, the bishopric of Trent forms the southern division; that of Brixen, the NE; the Vorarlberg, the NW; while Tyrol Proper occupies the centre. It is bounded on the N by Bavaria and Suabia; on the E by Salzburg and Illyria; on the S by Austrian Italy; and on the W by Austrian Italy, the country of Bormio, the Grisons, and the lake of Constanx. The Vorarlberg, separated on the E by a chain of mountains denominated 'the Mountains of Eagles,' from Tyrol, is sometimes known as the county of Bregenz; having the counties of Pludenz, Sonnenberg, Feldkirch, and Schellenberg, on the S. This region was the ancient *Rhetia*; and was by the Romans divided into Upper and Lower, the former answering to the Grisons and the Italian Tyrol, and the latter to the German Tyrol and Salzburg, the heights of the Brenner being the boundary between the two. It is everywhere covered with mountains; but the principal chain stretches from the Valteline on the SW, to the duchy of Salzburg on the NE, which, as Saussure remarks, is the general course of the Alpine chains. The Brenner, or 'burning hill,' as it is called in German, the modern name of this chain, rivals the grand Alps of Switzerland in its glaciers; and like other grand chains, presents exterior barriers, that on the N being distinguished by the name of Spitz, while that on the S is termed Vedretta. The breadth of the Tyrolian chain from Trent to Innspruck is 70 m. directly across from S to N. The primitive or highest elevations are to the N of Sterzing, whence precipitous streams descend to the river Inn on the N. The naked and rugged peaks of the mounts of Lorinzen, Fartachel, and Tschafateh, raise their towering heads towards the NW; on the SE are those of Glander, Schloss, Pragels, and Pallanser; whose summits are entirely bare, and seem to be composed of granite. The glacier most easy of access is that of Stuben, 4,692 ft. above the level of the sea. The Brenner is, according to Beaumont, only 5,109 ft. above sea-level. The Bok-kogel, another vast peak, in the opinion of Mr. Eustace equal in height if not superior to Mont Blanc, presents a most sublime and majestic appearance. Towards the W and N of Innspruck are several detached mountains covered with constant snow, amongst which those of Verner are the most remarkable. The Great Glockner, between Tyrol and Salzburg, is said to be 12,780 ft. in height; and the Orteles has been computed at 12,864 ft. From Schellenberg and Feldkirch, a chain of moun-

tains runs NW and SE as far as the Ober-Innthal, separating the Vorarlberg and Western Tyrol from the Grisons. It then runs S, separating the Lower Engadine from Tyrol; and stretching eastward, separates the canton of Bormio and the sources of the Adda on the S, from the Munsterthal on the N. This chain, which is the highest of the Julian Alps, is called the Wurmser-Joch, and is noted for the daring exploit of the French army, under Dessoles, in 1799, when, in order to reach the Munsterthal, and make themselves masters of the head-valley of the Adige, notwithstanding the ices and snows which covered the Wurmser-Joch, they climbed the mountain, and by this manoeuvre turned the intrenched defiles; attacked Laudohn, in his intrenchments at Glurns and Tauffers; and compelled his army to surrender with its cannon and baggage, Laudohn himself escaping with a few of his men into the Val-de-Venosta.—As might be expected in a country of mountains, rivers descend here in every direction, and separate to different seas: the Inn, the Drave, and the Lech, to the Danube; the Ill and the Bregenz, to the Rhine; the Adda, to the Po; the Adige, the Eisach, the Rienz, the Brenta, the Piave, and the Tagliamento, to the Adriatic. The Inn, the principal river of T., rises in the canton of the Grisons, and waters the Upper and Lower Engadine, before it enters T. at St. Jacob and Finstermünz. During this part of its course, amounting to 50 m., as its descent is more gradual, so its course is less precipitous than other Alpine streams; but after its entrance into T., where it is joined by numberless rapid torrents issuing from the mountains bordering on both sides of a long, steep, and narrow valley of 100 m., it runs with greatly increased velocity, till after a comparative course of 270 m., during which it receives the Zill, the Aicha, the Salza, and the Rot, it enters the Danube, at Passau, with a volume of water equalling, if not surpassing that of its rival stream. The Adige rises in the valley of the Malsheide, which is separated from the Ober-Innthal on the N by a chain of heights. After running 20 m. S it is joined by another branch, coming from the N side of the Wurmser-Joch, through the Munsterthal. The confluent stream at Glurns obtains the name of the Etsch, which it retains till joined by the Eisach at Botzen, when it receives that of the Adige. After receiving the Non and the Lavis, and passing to the south by Trent and Verona, it runs E and falls into the Adriatic, 10 m. to the N of the Po, after a comparative course of 200 m. The Eisach is larger and more rapid than the Adige, its sister-stream. To the E of the source of the Rienz, on the opposite side of the mountain, and above the village of Inichin, rises the Drave. In descending the banks of this river, through the steep and winding defiles of the Tyrolian mountains, till it arrives at the town of Liens, only 15 leagues from its source, this stream must be crossed no less than fifteen times. From Liens it pursues an E and SE course, through Carinthia, Styria, and Lower Hungary, and falls into the Danube, 16 m. below Essek. Its comparative course may be estimated at 400 m.; and it is frequently impassable on account of its rapidity. The Lech rises in the mountains of the Vorarlberg, and after a course, through that elevated district, of 50 m., enters Bavaria, separating it from the circle of Suabia, and flows into the Danube, 10 m. E of Donaawert. Its comparative course is 150 m. The Isar, a river of equal length and magnitude, rises in T., and runs along the foot of the mountains that skirt the valley of Innspruck, till it enters Bavaria. After visiting Munich, the capital of Bavaria, it runs a NE course of 80 m., and enters the Danube

at Dickendorff. The Iller rises from the W side of the Mountains of Eagles; and after running through part of the Vorarlberg and Suabia, and passing Kempten, enters the Danube, almost opposite Ulm, after a course of 100 m.

Productions and industry.] The Tyrolese mountains present every aspect, from the ever-blooming verdure of perpetual spring, to the dreary sterility of the frigid zone. Though covered with eternal snow, their sides are clothed with fine forests, abounding in every variety of forest tree, and sheltering numerous species of game. The valleys, though rocky in soil, have rich and extensive fields of corn, flax, and tobacco. On the eminences which crown these fertile vales, various sorts of fruit are grown; the vine is reared as far as Brixen, but the wine is not skilfully managed. The rugged aspect of this elevated country, contrasted with the beauty and fertility of its vales, gave rise to a saying of the emperor Maximilian, that T. was like a peasant's frock,—coarse indeed, but right warm. But the chief wealth of T. lies in its mineral productions and precious stones, such as agates, cornellians, rubies, a species of diamonds, amethysts, emeralds, chalcedonies, and granites. Mines of silver and lead, which have been long celebrated, occur near Lermos. The mines of Nasereit, in the same quarter, among the Verner mountains, 32 m. NW of Innspruck, are opulent in silver, lead, copper, and iron. Nor is the S region of T. deficient in mines; but the principal mines are at Schwatz, where one containing silver and copper, discovered in 1448, still employs 1,000 miners. The salt mines at Halle, 6 m. NE of Innspruck, produce vast quantities of that commodity, and yield a revenue of 300,000 florins, or £35,000 annually. The Tyrolese are a very industrious people. They are often seen climbing the steepest rocks with a basket of manure on their head, or letting themselves down by a rope to some little insulated spot of garden-ground which they have discovered amid the cliffs of their mountains. They work, both men and women, from the earliest dawn to the last moment of twilight. In autumn, they rear silk-worms, and cultivate hemp, flax, and tobacco. Many of them, like the Irish, in summer, emigrate for the season,—leaving their homes with a hurdy-gurdy, a knapsack, and a stock of oaten cakes, and returning at the end of autumn, after a tour in the surrounding countries, with the profits of their summer's toil. These annual emigrants are said to amount to 30,000. During winter, while the snow and the torrents block up their villages, every house exhibits a scene of industry,—the women are employed at their spinning-wheels, or in knitting stockings, or embroidering cloth,—while the men and boys make boxes, cases of instruments, and toys, which find their way not only to most parts of Europe, but even to America. A particular branch of industry in this country is the breeding of Canary birds, which are reared in great quantities for sale.

Population.] The population, according to Lichtenstern, excluding the lordship of Wieler in the N of the Vorarlberg, amounted in 1812 to 692,000; according to Stein, the pop. in 1831 was 755,401; in 1850, it was 859,706. The Tyrolese are chiefly of German origin; but there are about 160,000 Italians in the southern part of the country. A very small part of this pop. is collected in towns, as Innspruck the capital contains little more than 9,000 inhabitants, and Trent 11,000.—Tyrol and Vorarlberg are divided into 7 circles, containing 22 towns, 36 boroughs, and 3,150 villages, and bearing the names of the principal valleys and districts.

History.] Tyrol or 'the Tyrol,' as it is most frequently called,

is one of the most ancient possessions of the House of Austria, to which it fell by inheritance in 1363. Although from the commencement of their connexion with Austria, the Tyrolese had on various occasions given proofs of attachment and loyalty, it was not till the war of Succession that the Austrian family were made daily sensible of the worth of such subjects. Even when Frederic, the founder of the Tyrol line of Austrian princes, yielded himself and his possessions to the emperor Sigismund, these mountaineers continued faithful to him, fortified their passes, set the imperial troops at defiance, and preserved for him a country of which he was unworthy. The ungrateful Frederic rewarded them by the imposition of heavy taxes; but at the same time secured to them their rights and liberties. Villanage and servitude continued unknown; and the land was tilled by a free peasantry, whose representatives formed one of the branches of the legislature. Amidst the mountains of Tyrol, and their hardy mountaineers, an asylum was found in the worst ages of persecution, by many of the Waldenses. But in the latter part of the 17th cent., the bishop of Brixen, and the archbishop of Salzburg, having discovered that the posterity of these good men continued in the faith of their fathers—which was neither, strictly speaking, the system of Luther nor Calvin, and therefore not within the letter of the law which had compelled them to tolerate these two main sects of the reformers—ordered them to go to mass; whereupon, in 1681, 20,000 Tyrolese left their mountains and valleys, and went forth to seek for liberty of conscience in the Protestant states of Germany and Switzerland. Happily, however, the house of Austria soon perceived it to be its interest to pursue a milder policy; freedom of conscience was allowed, and the Tyrolese peasantry were more gently taxed than any other of the emperor's subjects. The Tyrol, therefore, is almost the only corner of the dominions of Austria whose inhabitants, though inspired with the true love of liberty, have remained attached to the dynasty of Hapsburg. During the war of Succession, the French entered T. on one side, and the Bavarians on another, at a time when there were no troops to defend the country; but the peasants blocked up the passes, broke down the bridges, and prevented their junction, nor was a single man found who could be bribed to carry intelligence from one army to the other. In 1744, when the French, at that time in alliance with Prussia and Bavaria, invaded T., the people rose in a mass and compelled the French to retire. In 1796, they again drove the French under Vauclous, out of their country; and in 1797, when Bonaparte was adding conquest to conquest, they rose en masse, under Laudohn, and descending like a torrent from their native mountains, drove the French out of their country. Had not the Austrian emperor been terrified into the preliminaries of Leoben, by the menaces of Bonaparte, who well knew the danger of his own situation, the French army, entangled in the defiles of the Styrian mountains, might have been destroyed, for the Tyrolese had made themselves masters of Verona, and were joined by all the neighbouring mountaineers, to the number of 50,000. In 1799, they drove Massena out of the Vorarlberg with great slaughter. In 1801 and again in 1805, they were also successful, particularly in 1805, when they thrice defeated Ney and the Bavarians; but by the treaty of Presburg, in 1806, their country was delivered up to Napoleon's Bavarian ally, with a futile stipulation that their ancient privileges should be preserved to them. By the constitution of Tyrol, the Austrian sovereign did not acquire a right to the allegiance of the Tyrolese until the oath of fealty had been taken, in the name of the community, by the four estates convened in full assembly at Innspruck: the Bavarian government neglected this ceremony, and took possession of the country by a set of French commissioners; the estates remonstrated, and the new monarch answered them with gracious promises. At last the constitution was abolished by a royal ordinance, and the country deprived of its very name by its subdivision into the circles of the Inn, the Eltsch, and the Etzch, under which denominations it was incorporated in the Bavarian monarchy, then newly remodelled into a dwarfish resemblance of its great foster-mother the French empire. When war again commenced, in 1809, between Austria and France, the Tyrolese, under the command of the gallant Hofer, took arms to emancipate themselves from the Bavarian yoke, and were for a time eminently successful, till, deprived of Austrian aid by the defeat of Wagram and the armistice that followed, they were left to maintain the contest alone, and after a brave, but ineffectual defence, were compelled to yield to the power of Bavaria, aided by the legions of France. In the last action, near Brizen, where the wife fought by her husband, and the maiden by the side of her father or betrothed husband, 350 Tyrolese women fell under the sabres of the enemy's cavalry. All the patriots who survived were delivered over to the military tribunals. The gallant Hofer was seized in his hut, and conducted barefooted through the snow, to Botzen, and thence to Mantua, where he was shot, pursuant to sentence of a military tribunal, on the 24th of February, 1810. The congress of Vienna, in 1815, released the Tyrolese and Vorarlbergers from their hated subjection to the Bavarian yoke, and restored their country to its former sovereign, the emperor of Austria.

TYROL, a town of the Tyrol, in the circle of Botzen, $1\frac{1}{2}$ m. N of Meran, on the l. bank of the Adige. On an adjacent mountain is an ancient fortress of the same name. In the vicinity is a quarry of fine white marble.

TYRONE, an inland county of the Irish province of Ulster, bounded on the N and NE by co. Londonderry; on the E by Lough Neagh; on the SE by co. Armagh; on the S by cos. Monaghan and Fermanagh; on the SW by Fermanagh; and on the W and NW by co. Donegal. The outline of the co. in a loose or general sense, exhibits a broad parallelogram, extending in the direction of SE by E. Its greatest length in the direction of SE by E, and along the S border, from the summit of Croagh mountain, $2\frac{1}{2}$ m. E of the Gap of Barnesmore, to the river Blackwater at Caledon, is $8\frac{1}{2}$ m.; its greatest breadth, in the opposite direction, and over Strabane and Lough Derg, is 80 m. Its area comprises 450,286 acres of arable land, 311,867 of uncultivated land, 11,981 of continuous plantations, 710 of towns, and 31,796 of water,—in all, 806,640 acres. The extreme SW district consists of a portion of the great alpine region which occupies the greater portion of co. Donegal, steeply dissected into sections here by the glens of the rivulets Derg and Mournebeg. The river Blackwater rises near the S boundary of the co. and flows along the S border, to the SW corner of Lough Neagh. The Torrent, the only considerable tributary of the Blackwater within Tyrone, rises on the SW side of Bartack mountain, and flows sinuously eastward. The Ballinderry rises in the moorland region, N of Pomeroy; and flows eastward along the N border, to Lough Neagh. The Tullyclea or Ballinamallard drains the district on the SW border around Trillick, into co. Fermanagh, toward Lower Lough Erne. All the other streams of the county consist of the head-waters and forming-tributaries of the river Foyle; they comprise all that great river's affluents of any consequence except the Finn; and they are noticed, with sufficient detail, in the article FOYLE. The county of Tyrone comprehends a small district within the basin of the Erne, a large district within the basin of Lough Neagh, and a still larger district within the basin of the Foyle.

Minerals.] Granitic rocks form a district of country about 19 m. in length, and $2\frac{1}{2}$ or 3 m. in mean breadth, extending WSW from the NE extremity of the co. Rocks of old red sandstone and sandstone-conglomerate constitute a great central district of the co., extending 86 m. W, with a mean breadth of about 10 m., and continued into the co. of Fermanagh down to the E side of Lower Lough Erne. Rocks of carboniferous limestone, exhibiting some diversity of character, constitute a great district in the S, 30 m. in length, and from 4 to 11 m. in breadth. The coal formation, situated to the N of Dungannon, though small, contains a greater number of valuable beds of coal, than any other in Ireland. At present nine workable seams are known, which vary from 8 to 9 ft. in thickness.

Agriculture.] In consequence of the characteristic configuration of the co., the soils of the low grounds consist, in a large degree, of the detritus of the rocks of the hills and mountains; and in consequence of the great diversity of the geognostic formation of the uplands, the soils are exceedingly various. Yet, in a general view, reclaimed moor or bog may be exhibited as the prevailing soil of the arable lands in the great central district of the co., a gravelly or sandy soil on the skirts of the hill and mountain flanks of many of the glens and vales, and a loam of diversified character, but, to a large extent, light and friable, over the rich fertile grounds of the S and E. Few farmers hold a larger quantity of land than 40 or 50 Irish acres. The average size of tillage farms is about 12 acres. The dairy and sheep produce bear a very small proportion to the tillage, there being but little dairying

and few sheep. In 1841, the number of farms, within the rural districts of the county, of from 1 acre to 5 acres in extent, was 14,555; of from 5 to 15 acres, 14,671; of from 15 to 30 acres, 3,776; and of upwards of 30 acres, 1,139. In 1841, the live stock in the rural districts was valued at a total of 2745,496. In 1851, of 273,125 acres under crop, 149,763 acres were in oats, and only 7,994 under wheat. Potatoes were cultivated to the extent of 37,937 acres; turnips, 16,150 acres; and flax, 18,908 acres.

Divisions and Towns.] T. is divided into the 4 baronies of Dungannon on the E, Clogher on the S, Omagh on the SW, and Strabane on the NW. The towns and principal villages are Dungannon, Caledon, Carnetel, Aughnacloy, Benburb, Clonfeacle, Moy, Cookstown, Grange, Tullyhog, Coal-Island, Stewartstown, Castle-Caulfield, Donaghmore, Pomeroy, and Coagh, in the barony of Dungannon; Clogher, Fintona, Ballygawley, Five-mile-town, and Augher, in the barony of Clogher; Omagh, Beragh, Seakinore, Dromore, Trillick, Drumquin, Castle-Derg, Six-mile-cross, and Termonrock, in the barony of Omagh; and Strabane, Ardstraw, Douglas-Bridge, Newtown-Stewart, Gortin, Dunnamanna, Ballymagorry, and Clady, in the barony of Strabane.—The county is ecclesiastically distributed among the dioceses of Clogher, Armagh, and Derry. The county sent 10 members to the Irish parliament, or two from the county at large, and two from each of the boroughs of Dungannon, Strabane, Clogher, and Augher; but it sends to the imperial parliament only two from the county at large, and one from the borough of Dungannon. Constituency of the county at large in 1842, 2,521. Pop. of the county in 1831, 304,468; in 1841, 312,958; in 1851, 255,819. Houses, in 1831, 54,663; in 1841, 54,919. First-class inhabited houses in 1841, 664; second-class, 11,706; third-class, 24,443; fourth-class, 18,107. Families employed chiefly in agriculture in 1841, 37,276; in manufactures and trade, 16,923; in other pursuits, 3,138. Families dependent chiefly on property and professions, 1,034; on the directing of labour, 19,364; on their own manual labour, 36,392; on means not specified, 557.

History.] The county of T. is conspicuous in history; it was the principal arena of the contests incident to the rebellion, recognised as 'the Tyrone rebellion,' of Hugh O'Neill in 1597. Previous to the flight and attainder of O'Neill, T. was divided into the districts of North T. and South T.; but about the period of the plantation of Ulster, North T. was transferred to the county of Londonderry.

TYRONE, a township of Livingston co., in the state of Michigan, U. S., 40 m. E of Lansing, drained by On creek, a branch of Shiawassee river. Pop. in 1840, 394; in 1850, 867.—Also a township and village of Steuben co., in the state of New York, 172 m. W by S of Albany. It has a hilly surface, and is drained by Mud creek. The soil is clay and calcareous loam. Pop. in 1840, 2,122; in 1850, 1,894; and of village, 250.—Also a township of Fayette co., in the state of Pennsylvania. Pop. in 1840, 1,189.—Also a township of Adams co., in the same state, 10 m. NE of Gettysburg, bordered by Bermudian creek, on the E, and by Conewago creek on the S. The surface is level, and the soil red shale and gravel. Pop. 756.—Also a township of Perry co., in the same state, drained by Sherman's creek and its branches. The soil in the valleys is calcareous loam. Pop. 2,391.—Also a township of Huntingdon co., in the same state. Pop. 1,226.—Also a village of Blair co., in the same state, 76 m. WNW of Harrisburg, on the Pennsylvania railway.

TYRREL, a county in the E part of the state of North Carolina, U. S., comprising an area of 727 sq.

m., drained by Alligator river and its branches. The surface is low and wet, but produces, in some parts, rice, cotton, grain, &c. Pop. in 1840, 4,675; in 1850, 5,133. Its capital is Columbia.

TYRREL'S BAY, a bay and town in the SW part of the island of St. Vincent, in the parish of St. George. It has a fortress, the best in the island, and carries on an active trade.

TYRREL'S-PASS, a market-town in the parishes of Newtown and Clonfad, co. Westmeath, 7½ m. NNE of Tullamore. It presents a remarkably clean, orderly, neat, and respectable appearance.

TYRRINGHAM-WITH-FILGROVE, a parish in Bucks, 2½ m. NNW of Newport-Pagnell, nearly encircled by the Ouse. Area 1,736 acres. Pop. in 1831, 227; in 1851, 188.

TYSMIENICA, a town of Austria, in the prov. of Galicia, circle and 8 m. SSE of Stanislawow, near the l. bank of the Worona, called also Tysmienica, a little above its confluence with the Bistrica. Pop. 2,800. It has several Catholic, United Greek, and Armenian churches, and contains several tanneries. It has an active trade in horses and in wax.

TYSNOES, a parish of Norway, in the diocese and 27 m. SSE of Bergen, and bail. of South Bergenshuus, on the N coast of the island of Tysnoes-Oe. This island is situated in the North sea, between the Strand-fjord on the N, and the Hardanger-fjord on the S, a little to the NE of the island of Storoe, in N lat. 60°, and E long. 9° 35'. It is 15 m. in length from N to S, and 6 m. in medium breadth, and has a deeply indented coast.

TYSOE-WITH-WESTCOTE, a parish in Warwickshire, 5 m. S by E of Kington. Area 4,710 acres. Pop. in 1831, 1,007; in 1851, 1,049.

TYSSNAR, a lake of Sweden, on the confines of the prefectures of Linköping and Nyköping.

TYSSOWICE, a town of Poland, in the gov. of Lublin, obwod and 17 m. SW of Hrubieszow, on the Hultwa. Pop. 2,581.

TYSY, or **TISI**, a town of Senegambia, in the kingdom of Kasson, 15 m. from the r. bank of the Senegal, and 36 m. WNW of Kuriakary.

TYTERS (LILLE), a small island of Russia in Europe, in the gov. of Esthonia, and district of Vezenberg, in the gulf of Finland, about 20 m. from the continent, in N lat. 59° 50'.

TYTERS (STORÖ), a small island of Russia in Europe, in the gov. of Esthonia, and district of Vezenberg, in the gulf of Finland, 27 m. from the continent, and 9 m. ENE of Lille Tyters.

TYTHBY, a parish in Nottinghamshire, 9 m. E by S of Nottingham, including the township of Cropwell-Butler. Area 3,610 acres. Pop. 811.

TYTHEGSTON, a parish in Glamorganshire, 3 m. W by S of Bridgend. Area 2,871 acres. Pop. in 1831, 404; in 1851, 1,152.

TYTHERINGTON, a township in Prestbury p., co.-palatine of Chester, 1½ m. N by W of Macclesfield. Area 998 acres. Pop. in 1831, 427; in 1851, 374.—Also a parish in Gloucestershire, 3 m. SE by E of Thornbury, including the tithing of Itchington. Area 2,100 acres. Pop. in 1831, 476; in 1851, 465.—Also a parish in Wilts, 4½ m. SE of Warminster. Area 1,650 acres. Pop. 95.

TYTHERLY (EAST), a parish in Hants, 6 m. SW by S of Stockbridge. Area 1,560 acres. Pop. in 1831, 294; in 1851, 398.

TYTHERLY (WEST), a parish in Hants, 6½ m. SW of Stockbridge, including Buckholt-Farm. Area 2,270 acres. The 'Rationalists,' under the superintendence of the celebrated Robert Owen, have or had an establishment here, conducted on a system of Home Colonization, and named 'Harmony.' Pop. in 1831, 497; in 1851, 447.

TYVERA, a village of Afghanistan, between Subzawur and Giriakh.

TYWARDRETH, a parish in Cornwall, 3 m. WNW of Fowey. Area 3,252 acres. Pop. 3,287.

TZABA, a mountain of Turkey in Europe, in Bosnia, in the sanj. of Herzegovina, on the Dalmatian frontier, and 20 m. W of Ghoubigue.

TZABATZ, a fortress of Turkey in Europe, in Servia, in the sanj. of Semendria, 41 m. W of Belgrade, on the r. bank of the Save.

TZAGLAIK, a town of Turkey in Europe, in Rumelia, in the sanj. of Gallipoli, 17 m. ENE of La Cavale, between two mountains, on the r. bank of the Kara-su.

TZANA, **DEK**, or **DAGA**, the largest of the islands in Lake Dembea, in Abyssinia. See **DEMBEA**.

TZAPOTECA, a mountainous district of Mexico, in the state of Oaxaca, inhabited by the Tzapotecas, between the Oaxaca and Tehuantepec.

TZAREVOKCHAIK, a district and town of Russia in Europe, in the gov. and 75 m. NW of Kazan, on the Maloia-Kokchaga.

TZAREVOSANTCHOURS, a town of Russia in Europe, in the gov. and 147 m. SW of Viatka, and district of Jaransk, on the r. bank of the Bolchaia-Kokchaga.

TZARITZIN, a fortress of Russia in Europe, capital of a district of the same name, in the gov. of Saratov, and 93 m. NW of Tchernoilor, on the r. bank of the Volga, at the confluence of the Tzaritza. Pop. 5,000.

TZARITZINO, a village of Russia in Europe, in the gov. and 8 m. S of Moscow, on the road from that town to Kachira, near the SE bank of a small lake. It possesses an imperial palace, erected by Catherine II., the architecture of which is a strange mixture of the Greek and Gothic. Surrounding it are fine gardens, and a noble avenue of trees extends from it to the village of Kolomenskoe, a distance of nearly 4 m. T. was purchased by Catherine II. in 1774 from Prince Dmitri Kantimar, hospodar of Moldavia, to whom it was given by Peter the Great.

TZATZIN, a town and fort of Turkey in Europe, in Bosnia, in Croatia, 11 m. NNE of Bihach, on a mountain.

TZAVO, a river of Eastern Africa, which rises on the NW flank of Kilimanjaro in Jagga, and runs E towards the Adi, or the bay of Melinda. At the point where Dr. Krapf crossed it, he says, he "found it about 20 or 25 ft. in breadth, with banks 15 to 18 ft. in height. The water, which was very cool, run with great speed over a fine reddish sand, and was about 2½ ft. deep. Rocks I could not observe in the river's channel, nor did I hear the least noise—quite in opposition to the rivers which I crossed on my journey to Usambára, where the river's noise was heard at a long distance. Indeed, nobody could suppose a river to be in this country, so gently glides the T. along its sandy bed. Only large mikoma trees indicate to the traveller the river's course. I saw these trees in great abundance on the coast of Malinde, into the bay of which the T. seems to empty itself. The T. runs near a range of red hills into the Galla country, where the Woi joins it. All these rivers seem to form the river Sabáki, which has probably its outlet in the bay of

Malinde. However, I wish not to be too positive in this matter, as the Sabáki must be more examined at some distance from Malinde. No doubt, the T. takes up all, or at least most part, of the water running from the E of the Kilimanjaro, whilst the rivers Góna and Lúmi carry their contents to the Pangany river. After crossing the river T., we had a fine view of Mount Théuka, which rises from the W bank of the river to a great height. There is no doubt that the whole country around the river T. has in former ages undergone great changes by volcanic action."

TZEKHA NOVETZ, a town of Russia in Europe, in the prov. and 48 m. SW of Bialistok, on the l. bank of the Nourtochek, by which it is separated from Poland.

TZEKINOVKA, a town of Russia in Europe, and gov. of Podolia, 3 m. SE of Soroka, in a peninsula formed by the Dniester.

TZERKOUNOUI, a town of Russia in Europe, in the gov. and district and 11 m. NNE of Kharkov, on the r. bank of a river of the same name.

TZERNA, a mountain of Turkey in Europe, in Bosnia, in the sanj. of Herzegovina, 23 m. ENE of Macarsca. It attaches itself on the SE of Mount Tertla.

TZERNA-GORA, a mountain of Turkey in Europe, in Bosnia, in Croatia, sanj. and 42 m. SSW of Bagna Luka, which attaches itself on the NE to the Tzervlievitzza, and in the N side of which the Sanna has its source.

TZERVLEVITZA, a chain of mountains in Turkey in Europe, in Bosnia, running between the Lopata mountains on the NW, and the Tzerma-Gora on the SE, a distance of about 21 m.

TZIETZIERJIN, a town of Russia in Europe, in the gov. and district and 36 m. NW of Mohilev, on the r. bank of the Drouz.

TZIMNITZA. See **SIMNITZA**.

TZINATZIGOS, a mountain of Turkey in Europe, in Albania, in the central part of the sanj. of Monastir. It runs from E to W between the mountains of Mouritchi and Sarakini.

TZINTZOUTZAN, a town of Mexico, and ancient capital of the kingdom of Mechoacan. Pop. 2,500.

TZIOUMLIANSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, 39 m. SW of Potemkinskaia, on the r. bank of the Don.

TZIRIN, a town of Russia in Europe, in the gov. of Grodno, district and 23 m. SE of Novogrodek.

TZITON-HAVA, a mountain of Turkey in Europe, in Lower Wallachia, on the frontier of Transylvania, and 27 m. ESE of Kronstadt.

TZITOVIANI, a town of Russia in Europe, in the gov. of Vilna, district and 25 m. SSW of Chavli.

TZKHET. See **MTSKHETKA**.

TZOUROUKHAITOU, a small town of Russia in Asia, in the gov. of Irkutak, district and 150 m. SSE of Nertchinsk, near the Chinese frontier.

TZYPA, a river of Russia in Asia, in the gov. of Irkutak and district of Nertchinsk, which runs NE, and, after a course of about 300 m., throws itself into the Vitim.

TZYVILSK, a district and town of Russia in Europe, in the gov. and 130 m. W of Kazan, on the r. bank of the Tzyvil.

U

UADANHAN, a lake of Brazilian Guayana, which discharges itself into the Rio-Branco.

UAIHUNANA, a small river of Brazilian Guayana, an affluent of the Rio-Negro.

UANAPU, **ANAPU**, or **GUANAPU**, a river of Brazil, in the prov. of Para, which has its source in the country of the Mamayanases, and, after a course in a generally N direction of about 330 m., throws itself into the Tajipuru, opposite the island of Marajo. The clove tree abounds on its banks.

UARACA, a river of Brazilian Guayana, an affluent of the Rio-Negro, on the r. bank.

UARANACUA, a small river of Brazilian Guayana, an affluent of the Rio-Negro, on the l. bank.

UARANAPU, one of the numerous arms by which the Hyapura discharges itself into the Amazon, to the W of the principal embouchure of that river.

UARAPIRANGA, an island of Brazil, in the prov. of Para, at the mouth of the Tocantins, to the E of Belem.

UARBRY, a village of New South Wales, in the co. of Bligh, or Talbragen river, 202 m. from Sydney.

UATUMA, a river of Brazilian Guayana, in the prov. of Para, which flows first S, then SE, and joins the Amazon, on the l. bank, nearly opposite the confluence of the Furo or Abacaxis.

CAUPES, or **UACALARI**, a river of Brazil, which has its sources in New Granada; flows ESE; and, after a total course of nearly 350 m., throws itself into the Rio-Negro, on the r. bank, at San-Joaquim-de-Coanne, nearly on the equatorial line, and the intersection of the 68th meridian. It is nearly 1 m. wide for 130 m. above its confluence with the Rio-Negro. Its banks are inhabited by an Indian tribe of the same name.

UAUTAS, or **UHAUTAS**, a lake of Brazil, in the prov. of Para, and territory of Solimoens. It is of considerable extent, and contains several woody islands. It receives several rivers, and discharges itself by a river of the same name, which, after a course of 36 m., throws itself into the Madeira, 15 m. above Borba, and by several other outlets, affluents of the Amazon.

UBA, a town of Brazil, in the prov. of Minas-Geraes, near the Parahibuna.

UBACH, a village of Prussia, 12 m. N of Aix-la-Chapelle. Pop. of p. 1,400.

UBAHI, a river of Bolivia, which issues from a lake of the same name, in the S part of the dep. of Santa-Cruz-de-la-Sierra, in the Pampas-de-Huanacoe; flows NNW; and joins the Guapore, on the l. bank, a little to the NW of Fort Principe-de-Beira, and after a course, to a great extent through marshes, of about 150 m. It is also called the Magdalena, Branco or San-Miguel.

UBATUBA, a maritime town of Brazil, in the prov. of São-Paulo, 30 m. NE of San Sebastian, at the mouth of a river, and at the edge of a fertile plain, in N lat. 33° 26', and W long. 45° 7'. Pop. 3,000. It has a church and a chapel. Fishing, and the culture of manioc, rice, and coffee, form the chief objects of local industry.

UBAYE, a river of France, in the dep. of the Basses-Alpes, which has its source in the Alps, at

the NE extremity of the dep.; and, after a course in a generally W direction, throws itself into the Durance, on the l. bank, at Saulze, on the confines of the dep. of the Hautes-Alpes. Barcelonnette is the chief place on its banks.

UBBERGEN, a village of Holland, prov. of Gueldres, and cant. of Wychen, 3 m. E of Nimeguen. Pop. 1,450.

UBBERSAL, a commune of Belgium, in the prov. of Limburg, and dep. of Heusden. Pop. 175.

UBBESTON, a parish in Suffolk, 5½ m. SW by W of Halesworth. Area 1,212 acres. Pop. 208.

UBEDA, a judicial partido and town of Spain, in the prov. of Jaen. The partido comprises 6 pueblos. The town is 20 m. NE of Jaen, at the foot of a hill of the same name, in a luxuriant plain, between the Guadalquivir and Guadalimar. Pop. 13,089. It has the remains of ancient walls, and contains some well-built houses, spacious and well-paved streets, three public squares and fountains, a fine promenade, well-shaded and watered by a fountain and several streams, eleven parish churches, numerous convents, a Latin school, three hospitals, an asylum, a public granary, a prison, &c. It has manufactories of varieties of woollen fabrics, and of pottery, and carries on an active trade in wine, oil, fruit, and horses. In the environs are some fine country houses, and several salt-works, wrought by government. U. was taken by Alphonso the Good from the Moors in 1212, and finally by Ferdinand I. in 1239.

UBERAVA, a town of Brazil, in the prov. of Minas-Geraes, and comarca of Patrocinio. Pop. 4,000.—Also a lake of the prov. of Matto-Grosso, at the foot of the Serra-Ponta-dos-Limites of Chamez. It is about 9 m. in circumference, and communicates on the S with Lake Gabiba, and on the E with the Rio Paraguay. Its banks are inhabited by Indians of the Guatos tribe.

UBERAUA-FALSA, a river of Brazil, in the prov. of Goyaz, and district of Rio-das-Velhas, which has its source in the Serra-da-Canastra; runs first E, then SW; and, after a course of about 60 m., throws itself into the Parana.

UBERKINGEN, a village of Württemberg, in the circle of the Danube, W of Geislingen. Pop. 500.

UBERLINGEN, a town of the grand-duchy of Baden, capital of a bail of the same name, in the circle of the See, 9 m. N of Constanx, and on the NE bank of the Uberlinger-see, an arm of the Lake of Constanx. Pop. 2,800. It is pleasantly situated in the midst of vineyards and gardens, and has a suburb, a small port, five churches, one of which, named the Munster, has a tower 300 ft. in height, a customhouse, an hospital, and a gymnasium. The ramparts are now falling into ruins. It contains several tanneries, manufactories of linen, hosiery, and pottery, and oil, tobacco, and saw-mills, and carries on trade chiefly with Switzerland.

UBERLINGER-SEE, or **BOTMER-SEE**, an arm of Lake Constanx, of which it forms the most northerly part, in the grand-duchy of Baden. It is about 14 m. in length from NW to SE, and 1½ m. in medium breadth. On its NE bank is Überlingen, and in the SE part is the island of Meinan.

UBERSDORF, a village of Switzerland, in the cant. and NE of Freiburg. Pop. 1,033.

UBIGAU, a town of Prussia, in the prov. of Saxony, rency of Merseburg and circle of Liebenwerda, on the Elster, 12 m. ENE of Torgau. Pop. 1,400.—Also a village in the circle of the Meissen, on the Elbe, to the N of Dresden. Pop. 160. It has a castle.

UBLEY, a parish in Somersetshire, 8 m. N by W of Wells. Area 1,811 acres. Pop. in 1851, 294.

UBRIQUE, a town of Spain, in the prov. and 51 m. E of Cadiz, amid sterile mountains, near the Mayacento. Pop. 5,439. It has a poor appearance, and, excepting a parish-church, a convent, a public granary, and a customhouse, contains nothing worthy of note. It has some manufactories of coarse woollen fabrics, and in the vicinity are some iron-mines.

UBSTADT, a village of the grand-duchy of Baden, in the circle of the Middle Rhine, NE of Bruchsal. Pop. 1,200. It has a salt-spring.

UBU, a river of Brazil, in the prov. of Bahia, and comarca of Porto-Seguro, which joins the Jequitinhonha, on the r., near the confluence of the Grapina with that river.

UCATARI, or **UAHUPE**, a river of Brazilian Guayana, which joins the Rio-Negro above fort São-Gabriel.

UCANHA, a town of Portugal, in the prov. of Beira, comarca and 4 m. E of Lamego, on the r. bank of the Barosa, over which is a bridge defended by a tower. Pop. 356. In the vicinity is a Franciscan convent.

UCAYALE. See **PARO**.

UCGLE, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Brussels. Pop. of dep. 4,972. The town is 2 m. S of Brussels, in a fine valley. Pop. 212.

UCHANDURRI, a town of Spain, in the prov. of Logrono, 6 m. NW of S. Domingo-de-la-Calzada, in a level country on the Tiron. Pop. 250.

UCHANIE, a town of Poland, in the gov. of Lublin, obwod and 14 m. NW of Hrubieszow. Pop. 920, of whom 400 are Jews.

UCHAUD, a commune of France, in the dep. of the Gard, and cant. of Vauvert. Pop. 847.

UCHDA, a town and cultivated oasis of Morocco, 16 hours from Tlemcen, in the desert of Angad. The town is enclosed by the walls of its gardens, and protected by a large fortress. Its pop. is estimated at 1,000, Moors and Arabs. It has a mosque and three chapels dedicated to ancient santons. The houses, built of clay, are low and of a wretched appearance, the streets winding, and covered with flints. The fortress, where the *kaid* of the district resides, is guarded in ordinary times by a dozen of soldiers, but could not be defended in consequence of its wretched condition. A spring of excellent water, at a little distance from U., keeps up, the whole year round, verdure and freshness in the gardens, through which it is distributed by the system of irrigation that the Arabs practise so well. The aridity of the surrounding country, in summer particularly, makes those gardens appear delicious, as melons, olives, figs, and other fruits, are produced there in abundance. The desert of Angad commences beyond the river Malouia, at more than 40 leagues from Tlemcen. Like the Algerine Angad, which extends to the S of Tlemcen, it is of frightful aridity, particularly in summer, though here and there may be seen spots where irrigation is practised, and where tillage is carried on.

UCHEE, a village of Walton co., in the state of Florida, U. S., on the W side of a branch of Choctawhatchee river, 115 m. W by N of Tallahassee. Pop. in 1850, 300.

UCHISY, a village of France, in the dep. of the Saone-et-Loire, cant. and 5 m. SW of Tournus. Pop. 1,100.

UCHOS, a town of Peru, in the dep. of Truxillo, district and 45 m. SSE of Patate, on the r. bank of the Tunguragua. It has a good port.

UCHPAS, a tribe of Indians of Ecuador, who inhabit the district in the dep. of Assuay, extending between the Pastaza and Tigre, in 8 lat. S°.

UCHTE, a bailiwick and town of Hanover, in the Indr. of Hanover, 18 m. SW of Nienburg, in the midst of a marsh, on the Mulbach. Pop. 1,168.

UCIMONT, a commune of Belgium, in the prov. of Luxembourg and dep. of Sausanrutz. Pop. 273.

UCKANGÉ, a commune of France, in the dep. of the Moselle, cant. and 4 m. SSW of Thionville, on the Moselle. Pop. 783. It has a custom-house, manufactories of mechanical instruments, and several tanneries.

UCKER. See **UKER**.

UCKERATH. See **SIEGBURG-UCKERATH**.

UCKERMUNDE. See **UCKERMUNDE**.

UCKERSDORF, a village of the duchy of Nassau, in the bail. and 4 m. NW of Herborn. Pop. 326. It has a paper-mill.

UCKFIELD, a parish and village in Sussex, 8 m. NNE of Lewes. Area of p. 1,717 acres. Pop. 1,590.

UCKINGTON, a chapel in the p. of Elmstone-Hardwicke, Gloucestershire, 2½ m. NW of Cheltenham. Pop. in 1831, 175.

UCLES, a judicial partido and town of Spain, in the prov. of Cuenca. The partido comprises 18 pueblos. The town is 30 m. WSW of Cuenca. Pop. 1,602. It encircles a hill, of which the summit is crowned by a fine monastery of the order of Santiago, and is well-fortified. It has a church, two convents, an hospital, and a public granary. This town is of considerable antiquity. It was long an object of conflict between the Spaniards and Moors, and was the scene of the signal defeat of the latter in 1108.

UCRIA, a town of Sicily, in the prov. of Messina, district and 8 m. SW of Patte.

UDALA, or **UDALACH**, a mountain of Spain, on the confines of the provinces of Vizcaya and Guipuzcoa, near Mondragon. It contains iron and Armenian bol.

UDANGE, a commune of Belgium, in the prov. of Luxembourg and dep. of Toernich. Pop. 581.

UDDEN, a town of Arabia, in Yemen, 54 m. NE of Mocha, on the Wady Zebid. It contains about 300 houses. The governor's palace is on an adjacent mountain. The coffee grown in the environs is deemed the best in Yemen.

UDDEVALLA, a town of Sweden, in the län and 45 m. N of Goteborg, on a bay of the Skager-Rack. Pop. 3,917. It has a small port. The streets are spacious, and the houses, although of wood, are substantially built. It has manufactories of cordage and of iron ware. The trade consists chiefly in fish, especially salt-herring, wood, and iron. In 1806, this town was almost entirely destroyed by fire; and again, in 1824, it suffered severely from inundation.

UDDINGSTON, a village of Lanarkshire, in the p. of Bothwell, 4 m. NW of Hamilton.

UDDUREE, a village of Sind, near the Phur-raun river, to the SE of Hydrabad.

UDEN, a parish of Holland, in the prov. of N. Brabant, to the E of the Bosch. Pop. 4,500.

UDENHOUT, a village of Holland, in the prov. of N. Brabant, 17 m. E of Breda. Pop. 2,000.

UDERWANGEN, a village of Prussia, in the regency of Königsberg, to the SW of Wehlau. Pop. 600.

UDESTADT, a village of the duchy of Saxe-Weimar, on the Gramme. Pop. 895.

UDHURANA, a town of the Punjab, on the Kasu.

UDIMORE, a parish in Sussex, $3\frac{1}{2}$ m. WNW of Winchelsea, on the road from Rye to Battle, included in the new borough of Rye. Area 2,221 acres. Pop. in 1831, 454; in 1851, 435.

UDINE, a town in the Austrian prov. of Friuli, situated in an extensive plain, on the Roja, at an alt. of 452 ft. above sea-level, 51 m. E of Belluno, and 66 m. NE of Venice. Pop. in 1840, 22,179; in 1850, 26,700. It is surrounded by walls, crenulated, and in some parts terraced, and is well fortified. In its centre is a hill surmounted by a castle. It contains a cathedral, several churches and convents, some handsome private dwellings, a lyceum, several gymnasia, and an episcopal seminary. Its cemetery is considered one of the finest in Europe. The culture of silk, manufacture of woollen fabrics, and of liqueurs, form the chief objects of local industry. The adjacent mountains contain quarries of marble and minerals. In the vicinity are the village and castle of Campo-Formio. See **FRIULI**.

UDINGEN, a village of Prussia, in the prov. of the Rhine and regency of Aachen, on the r. bank of the Roer. In its vicinity are an iron-foundry and a paper-mill.

UDLIGENSCHWEIL, a parish of Switzerland, in the cant. and bail. of Lucerne. Pop. 480.

UDNY, a parish in the district of Formartin, Aberdeenshire. Area 8,880 acres. Pop. 1,513.

UDONG, a city of Cambodia, about 200 m. NE of Kampot, the present residence of the sovereign of the country. According to the report of a recent European visitor, it has little in its appearance which indicates it to be the residence of a prince who formerly ranked amongst the most powerful rulers of the East. It has suffered greatly during the last fifteen or twenty years from almost uninterrupted ruthless incursions by the Siamese and Cochinchinese. The houses, or rather huts, are almost without exception built of bamboo and attap. The inhabitants have so often seen their homes consumed by the enemy's torch, that they no longer erect permanent buildings: even their cocoa-nut and other fruit-trees have been destroyed by their merciless enemies, the Cochinchinese. The pop. may amount to about 10,000 souls, principally Cambodians, with a few Siamese, Cochinchinese, and Chinese. In the centre of the town is a spacious square surrounded by a wall, with a gate on each side defended by a kind of tower: within this the king's palace is situated, surrounded by another wall, not however like the first one, calculated for defence. The buildings occupied by the king are without any architectural ornaments or spires, and principally constructed of wood. See article **KAMPOT**.

UDORF (**OBER** and **UNTER**), two villages of Switzerland, in the cant. and bail. of Zurich and parish of Dietlikon, in a fine valley. It has mineral baths, and extensive manufactories of hosiery.

UDSIRE, an island off the W coast of Norway, in the dio. of Christiansand and bail. of Stavanger, in N lat. $59^{\circ} 18'$, E long. $4^{\circ} 54'$.

UDSTERN, an island of Norway, in the dio. of Christiansand and bail. of Stavanger, in the gulf of Bakke. It formerly had a monastery.

UDVARHELY, or **UDVARHELY-SZEK**, a stul or administrative province of Transylvania, in the country of the Szeklers, bounded on the N by the comitat of Thorenburg; on the NE and E by the stul of Csak; on the S by those of Haromszek and Bepa, and the comitat of Upper Weissenburg; and on the W by that of Kockelburg. It is 51 m. in length from WNW to ESE, and 33 m. in breadth;

and comprises an area of 381 sq. m. Pop. in 1837, 81,422. It is almost entirely covered by the Carpathian mountains, the loftiest summits of which are on the NE and E. The principal river is the Gross-Kockel, by which the prov. is intersected from NE to SW. The chief productions are corn, cattle, tobacco, wood, and iron. The prov. is divided into 2 circles, Upper and Lower, and comprises 8 districts, 2 towns, of which the chief is also named Udvarhely, Udvarhely-Szekely or Oberhellyen, and 128 villages.—The town of U. is 26 m. ENE of Segesvar, on the l. bank of the Gross Kockel. Pop. 6,150, chiefly Szeklers, of whom this town is considered the capital, and whose national archives and seal it possesses. It has an ancient fortress of the counts of Gulay, a fine town-house, three churches, a Reformed and two Catholic, a convent, a Reformed college, a gymnasium, and a Catholic seminary. It contains numerous tanneries and manufactories of cordage, and carries on an active trade in tobacco and honey, the produce of the environs.

UEBELBACH, a town of Styria, in the circle and 17 m. NW of Gratz, on the Haselbach, in the midst of mountains. Pop. 500.

UEBERKINGEN, a village of Wurtemberg, in the circle of the Danube, bail. and 2 m. SW of Geislingen. It has a mineral spring. Pop. 400.

UEBERLINGEN. See **UERLINGEN**.

UEDEM, a town of Prussia, in the prov. of the Rhine, regency and 41 m. NW of Dusseldorf, and circle of Cleves, in a wide plain. Pop. 1,800. It is enclosed by walls, and has four gates. Its manufacture of linen and distillation of brandy are the chief objects of local industry.

UELITZ, a parish of the grand-duchy of Mecklenburg-Schwerin and bail. of Hagenow. Pop. 1,360.

UELMEN, a market-town of Prussia, in the prov. of the Lower Rhine, regency and 80 m. WSW of Coblenz, and circle of Kochem, on the Uelmener-meer.

UELTZEN, **UELZEN**, **ULTZA**, or **ULYSSEA**, a town of Hanover, in the gov. and 24 m. SSE of Lunenburg, on the l. bank of the Ilmenau. Pop. 2,900. It is enclosed by walls, and has three gates. It has a gymnasium and two hospitals, and possesses manufactories of woollen and linen fabrics, paper-mills, tile-kilns, and distilleries. Its trade consists chiefly in linen, yarn, wax, and honey.

UERDINGEN, a town of Prussia, in the prov. of the Rhine, regency and 11 m. NW of Dusseldorf, and circle of Crevelt, on the l. bank of the Rhine. Pop. 2,300. It has manufactories of cloth, hats, iron-ware, soap, comfits, pottery, and nails, several breweries, and oil-mills. Its trade consists chiefly in articles of local produce, and in coal. This town is of Roman origin. It was enclosed by walls in 1330.

UERERE, or **BATAC**, a small river of Brazilian Guayana, which runs S, and joins the Rio-Negro on the l. bank, between Thomar and Moreira.

UESSLINGEN, a village of Switzerland, in the cant. of Thurgau and bail. of Frauenfeld, on the r. bank of the Thur, here crossed by a bridge.

UETERSEN, a market-town of Denmark, in the duchy of Holstein and seignory of Pinneberg, on the Pinnan, 18 m. NW of Hamburg. Pop. 2,600. It has a convent, a Burgess school, a poor-house, and manufactories of sugar, starch, and pottery.

UETIKON, a parish of Switzerland, in the cant. of Zurich, bail. and 2 m. from Meilen, a little to the E of Lake Zurich. Pop. 1,100.

UETLIBERG, a mountain of Switzerland, in the cant. and a little to the NW of Lake Zurich. It

makes part of the Albis chain, and has an alt. of 2,918 ft. above sea-level.

UFA, a considerable city of Asiatic Russia, the capital of the gov. of Orenburg, situated on the banks of the Bielaia, near its junction with the Ufa, about 780 m. E by N of Mosoow. Its site is intersected by numerous torrents and ravines. It was once fortified; but the works have been allowed to fall into decay. This place contains about 10,000 inhabitants. It has a cathedral, 7 churches, 2 convents, an academy, and some mosques. The neighbourhood is inhabited by a race of Tartars who appear to be diligent and industrious cultivators, and have acquired considerable wealth. It was built in 1573, by Ivan Vassilivitch, in order to collect the tribute from the Bashkirs, as also to serve as a barrier against the inroads of the Kirghiz. It is asserted that there was anciently upon this spot a great Tartar city, the capital residence of the khans of the Nogais.

UFA, or OURA, a river of Asiatic Russia, which rises in the Ural mountains; flows WNW and then SSW through a mountainous and fertile country, till it falls into the Bielaia, near the city of its own name, after a course of 350 m. Several of its tributary streams have on their banks rich mines of iron.

UF-DER-SCHYNEW, a mountain of Switzerland, in the cant. of Berne, and bail. of Signau, 6 m. from Langnau. It is noted for its cheese.

UFFCULME, or UFFCOLUMA, a parish and village in Devon, 4 m. NE by N of Collumpton, on the river Culm. The village was at one period a considerable manufacturing place. Area of p. 6,122 acres. Pop. in 1831, 2,082; in 1851, 2,098.

UFFENHEIM, a presidial and town of Bavaria, in the circle of Middle Franconia, and 27 m. NW of Anspach, on the Gollach. Pop. 1,650. It is enclosed by walls, with two gates, and has a castle, three churches, an hospital, and a Latin school. It has manufactories of cloth, and several tanneries, and carries on an active trade in cattle and wool. Pop. of presidial, 10,000.

UFFHOLTZ, or USHOLTZ, a commune of France, in the dep. of the Haut-Rhin, cant. and $\frac{2}{3}$ of a mile N of Cernay. Pop. in 1841, 1,852.

UFFHOVEN, a village of Prussia, in the prov. of Saxony, and regency of Erfurt, to the W of Langensalza. Pop. 760.

UFFINGTON, a parish of New South Wales, in the co. of Durham, bounded on the E by William's river.

UFFINGTON, a parish and village in Berks, $\frac{1}{2}$ m. W by N of Wantage, intersected by the Wilts and Berks canal, and the Great Western railway. On the hill above the village, which rises to the height of 893 ft., is a British encampment. Area of p., 6,660 acres. Pop. in 1801, 432; in 1831, with the chapelry of Baulking and township of Woolstone, 1,019; in 1851, 1,170.—Also a parish in Lincolnshire, $2\frac{1}{2}$ m. E by N of Stamford, on the N bank of the Welland. Area 3,996 acres. Pop. in 1831, 481; in 1851, 578.—Also a parish in Salop, $2\frac{1}{2}$ m. ENE of Shrewsbury. Area 2,110 acres. Pop. 209.

UFFORD, a parish in Northamptonshire, $7\frac{1}{2}$ m. NW by W of Peterborough. Area 2,320 acres. Pop. in 1831, 809; in 1851, 297.—Also a parish in Suffolk, $2\frac{1}{2}$ NE by N of Woodbridge, on the river Deben. Area 1,156 acres. Pop. in 1851, 729.

UFLEN. See SALSUFLEN.

UFNAU, or AUFNAU, a small island of Switzerland, in the cant. of Zurich, and lake of that name, below the Rapperschwyl bridge, and opposite the castle of Pfäffikon. It lies in the wildest part of the lake, and is remarkable for the beauty of its

situation and fertility. It belongs to the convent of Einsiedlen, and contains a church built in 973, in which are the tombs of the German heroes Ulrich and Hutten.

UFTON, or UFTON-NERVET, a parish in Berks, $\frac{1}{2}$ m. WSW of Reading. Area 2,080 acres. Pop. 421.

UFTON, or OLOUGHTON, a parish and village in Warwickshire. The v. is beautifully situated on a rocky eminence $3\frac{1}{2}$ m. W by N of Southam. Area of p., 1,920 acres. Pop. in 1851, 195.

UFTRUNGEN, a village of Prussia, in the prov. of Saxony, and circle of Sangerhausen, near Rosala, and 6 m. SE of Holtberg. Pop. 860.

UGARTE-DE-MUJICA, or MUEJICA, a town of Spain, in the prov. of Vizcaya, 12 m. from Bilbao, at the foot of a mountain, and bathed by two streams. Pop. 996. It contains a residence belonging to the Mujica family, and has several mills.

UGBOROUGH, a parish in Devon, $2\frac{1}{2}$ m. NNE of Modbury. Area 8,659 acres. Pop. in 1851, 1,863.

UGENA, a town of Spain, in the prov. and 39 m. NW of Toledo, in an elevated situation. Pop. 450. It has a parish church, two chapels, and a palace with fine gardens belonging to the counts of Saceda.

UGENTO, a town of Naples, in the prov. of the Terra d'Otranto, district and 15 m. SE of Gallipoli, on a hill, in a pleasant and salubrious situation near the gulf of Tarento. Pop. 1,500. It has a cathedral, two convents and a seminary. This town, the *Ugentum* of the Romans, was one of the ancient cities of Greece. It was destroyed by the Saracens in the 8th century, and again in 1527.

UGGESHALL, a parish in Suffolk, 12 m. NNE of Saxmundham. Area 1,473 acres. Pop. 293.

UGGIANO-DELLA-CHIESA, a town of Naples, in the prov. of the Terra d'Otranto, district and 26 m. SE of Lecce. Pop. 1,517.

UGGIANO-MONTEFUSCOLI, a town of Naples, in the prov. of the Terra d'Otranto, 26 m. ESE of Tarento, in a fertile and salubrious plain. Pop. 500.

UGGLEBARNBY, a chapelry in the p. of Whitby, Yorkshire, $3\frac{1}{2}$ m. SSW of Whitby. Pop. 426.

UGIE, a river in the NE of Aberdeenshire, rising $2\frac{1}{2}$ m. from the N coast at the village of Aberdour, and entering the ocean on the E coast, 1 m. NW of the town of Peterhead. It has a run of about 21 m., generally in a SE direction.

UGIE, a parish of Ross-shire, comprising the W part of the island of Lewis and four inhabited islands, the chief of which is Bernera, eight pasture islands, and various waste islets, in and near Loch-Roag, and the group of Flannan or Flannel islands. The pop. is segregated in hamlets and villages; and in each of several of them amounts to 200 or 250. Pop. in 1831, 3,041; in 1851, 3,209.

UGINE, a town of Sardinia, capital of a mandamento, in the prov. of Upper Savoy, 8 m. N of Confians, near the r. bank of the Arly, a little above the confluence of the Cheze. Pop. 2,500. An active transit trade is here carried on in the wines of the valley of the Isere. To the N of U. is a lofty square tower, the remains of an ancient castle destroyed in the 13th century.

UGLEY, a parish in Essex, 5 m. N by E of Bishop-Stortford, intersected by the road from London to Newmarket. Area 2,038 acres. Pop. 450.

UGLIAN, an island of Austria, in Dalmatia, in the circle and opposite the town of Zara, and a little to the NW of the island of Pasman, with which it forms the W side of the Zara channel. It is 11 m. in length, and 3 m. in breadth, and possesses considerable fertility. Fresh water is scarce. Its inhabitants, who are numerous, are said to be milder in character than the Dalmatians in general.

UGLITSCH, a town of Russia in Europe, in the

gov. of Jaroslav, on the Volga. Pop. 8,000. It has a cathedral, numerous churches, and 3 schools.

UGOTS, UGOTSA, or UGOTSCHIA, a *gespanschaft* or comitat of Hungary, in the circle beyond the Theiss, bounded on the NW by the comitat of Beregh, on the NE by that of Marmaros, and on the S by the comitat of Szathmar. It is 32 m. in length from N to S, and 27 m. in breadth, and comprises a superficies of 186 sq. m. Pop., chiefly Selaves and Catholics, 45,003. The surface is generally mountainous, and possesses little fertility. The principal rivers are the Theiss, by which it is intersected from E to W, the Borsova, the Batar, and the Tur. It has some silver mines, but its forests and fisheries form its chief resources. Grain, lint, hemp, and tobacco, and in small quantities wine are the chief productions of the soil. The comitat comprises 6 towns, of which the principal is Nagy-Szöllös, and 63 villages.

UGTHORPE, a township in the p. of Lythe, Yorkshire, 17 m. W by N of Whitby. Pop. 260.

UHAUTAS, UAUTOS, or CATAUXIS, a lake of Brazil, in the prov. of Para, to the W of the Madeira, about 80 m. above the confluence of that river with the Amazon. It receives several streams, and discharges itself into by Paratari, which issues from its W side, and flows NW to the Amazon, and by a river of the same name, which flows into the Madeira and Amazon, bifurking at the confluence of those rivers. The lake is studded with islets.

UHERSKY-BROD. See UGARISCH-BROD.

UHLINGEN, a village of the grand-duchy of Baden, in the circle of the Lee, and to the NE of Berau. Pop. 700.—Also a village of Prussia, in the prov. of Pomerania, regency and 75 m. ENE of Kuslin, and circle of Lauenburg-Bütow, near the shore of the Baltic. It has beds of fine potter's clay.

UHLSTADT, a town of Bavaria, in the circle of Middle Franconia, 24 m. N of Anspach.—Also a village in the duchy of Saxe-Altenberg, on the Saale, to the SW of Arlmünde. Pop. 850.

UHNOW, a town of Galicia, in the circle and 24 m. NNW of Zolkiew, near Zolokia.

UHRICKSVILLE, a village of Tuscarawas co., in the state of Ohio, U. S., 95 m. ENE of Columbus, and intersected by the Steubenville and Indiana railway. Pop. in 1850, 577.

UG, a parish in the SW of Lewis, Ross-shire. Its greatest length, from NE to SW, is 22½ m.; its greatest breadth is 17½ m.; and its area, exclusive of water, is probably between 220 and 225 sq. m. The bay of Ug penetrates the interior to the extent of 2½ m., and has a mean breadth of about 1 m. Pop. in 1831, 3,041; in 1851, 3,209.

UINTAH, a river of Utah Territory, an affluent of the Rio Colorado, which it joins in Utah co., in N lat. 40°.

UIST (North), a large Hebridean island, nearly in the centre of the Long Island chain, and politically belonging to Inverness-shire. It has on the NE the sound of Harris; on the SW a narrow, complicated, and shallow strait, separates it from Benbecula. Its greatest length, from E to W, is 17 m.; its breadth varies between 3½ and 13½ m. The E division is cut into indescribable labyrinths by inter-estations of sea and lake. The W division is, comparatively speaking, continuous land; and sends up, in lines from SE to NW, three distinct groups or ranges of heights. One of these ranges bounds the sound of Harris; and, although lifting its chief summits of Ben-Breach and Ben-More, to nearly 1,000 ft. of alt., is of tame appearance. The second range extends almost from end to end of the district along very nearly its middle, and sends up

its principal eminence, Ben-Croghan, to a height of 1,500 ft. The third range is a prolonged and irregular group of less elevation than the others, of a smooth and undulating surface, and with declivities which fall off in gentle slopes to the SW. A belt of uneven low land between this last group and the sea forms both the chief and the most profitable area of arable ground in the island. The island has nearly 50 m. of statute-labour roads, and about 30 m. additional of good roads; but its nearest mart, or that at which any suitable interchange of commodity can be effected, is Greenock or Glasgow, distant about 200 m. The chief islands comprised in the p. are Kirkibost, Illery, Balishare, Gramesay, Kailen, Valley, and Oronsay, all connected with the mainland by dry sands at low water, and thickly inhabited; Borreray, about 2 m. to the N; and Heiskar, about 10 m. to the W. Pop. 3,918.

UIST (South), an island of Inverness-shire, in the section of the Long Island Hebrides. Its greatest length, from NNW to SSE, is 22 m.; its greatest breadth, 7½ m.; its area, including interior and intersecting waters, is about 110 sq. m. Loch-Skipport, penetrating the E coast, nearly 7 m. from the N extremity, runs NW across the island, assumes at the further end the name of Loch-Gamoslechan, and cuts off, from the main body, a low flat island which bears the designation of Iachdar. Loch-Eynort, penetrating the same coast 7½ miles farther to the S, runs WNW to within 3 furl. of the W coast, and sends off, in its progress, a profusion of raggedly outlined and forking bays. Loch-Boisdale, penetrating also the E coast, 3½ m. from the SE extremity of the island, extends 4½ m. W with several ramifications, and a mean breadth of about 1 m.; and at its head it has communication with Loch-Allan,—a narrow fresh-water lake of 3 m. in length, which ranges along the W coast at the mean distance of 3 or 4 furl. from the beach. The universal prevalence of hard gneiss rock, or of gneiss nearly granitic, presents neither subterranean receptacles for water, nor fissures to transmit it, and occasions, throughout the island, an almost total absence of springs. The W side presents an uniform alluvial plain of peat, interspersed with numerous lakes. The E division is upland; but, in consequence of its dissection by sea-lochs its heights have not the character of a range, and may, in a general view, be regarded as consisting of three separate groups. The group N of Loch-Eynort occupies apparently between a fifth and a fourth of the island, and forms a conspicuous ridge rising to an alt. of between 2,500 and 3,000 ft. The post communication is maintained by way of N. Uist, Skye, and Inverness,—the last nearly 200 m. distant; and market communication is maintained chiefly with the Clyde. S. Uist, along with Benbecula, Episkay, and Rona, and some smaller low islands, now forms a parochial district, 40 m. in extreme length, and 8 m. in extreme breadth. Pop. in 1851, 6,173.

UITENHAGE, a district and village of S. Africa, in the colony of the Cape-of-Good-Hope. The district, which is chiefly pastoral and agricultural, is bounded on the NW and N by that of Graaf Retyn; on the NE by the districts of Somerset and Albany; on the S by the ocean; and on the W by the district of George. Pop. 12,000. The Sunday or Zondag river, which flows into Algoa bay, and the Camtoos or Great river, with its affluent the Konga, are the chief rivers by which it is intersected.—The village is 435 m. E of the Cape, on the l. bank of the Zwartkops, a small river which 17 m. below flows into Algoa bay. To the SE of Uitenhage are several salt lakes.

UJ, or VI, a Hungarian word meaning 'new.' Names of places beginning with UJ or VI not found in this part of the Gazetteer, may be sought for under the name that follows: thus UJARAD, see ARAD (*New*), UJPALEKA, see PALEKA.

UJ-BANYA. See KONIGSBERG.

UJ-EGYHAZ. See LESCHKIRCH.

UJEIN, OUJAIN, or UGIN, a large city of Hindostan, the capital of a district of the same name, in the prov. of Malwah, on the Sipperah river, in N lat. 23° 12', E long. 75° 50'. The modern city is of an oblong form, about 6 m. in circuit, and surrounded by a stone wall with round towers. The houses are of brick, covered with tiles. The principal bazaar forms a spacious and regular street paved with stone, having houses of two stories in height on each side. The principal buildings are the mosques and temples. The S quarter of the city, called Jey-singpur, contains an observatory erected by rajah Jysing of Jyenagur, in the early part of the last cent. At the distance of 2 m. from the city, Mah-daji Sindia laid the foundations of an extensive fort and citadel, containing a palace; but his death put a stop to the works, his successor wisely giving the preference to Gwalior as his strong hold and place of refuge. It is one of the most ancient cities of Hindostan, and was known to the Greeks under the name of *Oense*. Its Sanscrit name is *Ujayini*, and it is stated to have been the capital of Bickermajit, a short time after the commencement of the Christian era. At some distance from the town, on an island of the river, there is a subterranean palace said to have been built about 1500, by Nasir-Addin Khilije, king of Malebah, who used to spend the hot season of the year in this place. An immense fair, or rather religious festival, is held here every year.

UJEST, a town of Prussia, in the prov. of Silesia, regency and 29 m. SE of Oppeln, and circle of Gross-Strelitz, on the r. bank of the Klodnitz. Pop. in 1843, 2,312. It has an hospital and mineral baths, and possesses manufactories of linen and hosiery.

UJFALU, or BEREITYO-UJFALU, a town of Hungary, in the comitat of Bihar, 24 m. SSE of Debreczin.

UJHELY, or SATOR-ALLYA-UGHELY, a town of Hungary, in the gov. and 10 m. SW of Zemplin. Pop. 6,548. It has a college and a gymnasium. The environs afford good wine.

UJHELY (VAG). See NEUSTADTL-AU-DEE-WAAG.

UJHELY-KISZUCZA. See NEUSTADTL (OBER).

UJIJAR, a judicial partido and town of Spain, in the prov. of Granada. The partido comprises 18 pueblos. The town is 51 m. SE of Granada, on the Adra, in the midst of the Alpujarras mountains. Pop. 3,016. It has a collegiate church, a convent, an hospital, a public granary, and a glass manufactory.

UJ-LAK, a town of Hungary, in the comitat and 7 m. W of Neutra. It contains several distilleries. See also ILLOK.

UJ-PETS, a village of Hungary, in the comitat of Torontal, 14 m. SW of Temeschwar. It has extensive rice plantations.

UJSZIGET. See SZIGETVAR.

UJVAR (MAROS). See MAROS-UJVAR.

UJVAROS, a town of Hungary, in the comitat of Szabolcs, 17 m. NW of Debreczin, on the Kadarz. It has two churches, a Lutheran and a Reformed. Cattle are extensively reared in the environs.

UJVAROSKA, a town of Hungary, in the comitat and 15 m. WSW of Neutra.—Also a town in the same comitat, to the NW of Leopoldstadt.

UJVIDEK. See NEUATZ.

UKER, a river of Prussia, which issues from a

lake of the same name, in the prov. of Brandenburg and circle of Prenzlau; passes the town of that name; runs W into the prov. of Pomerania; and, after a course, in a generally N direction, of about 45 m., throws itself into the Kleine-haff, an arm of the Pommersche-haff, at Ukermunde.

UKERMUNDE, a town of Prussia, capital of a circle of the same name, in the prov. of Pomerania, regency and 33 m. NW of Stettin, at the confluence of the Uker with the Kleine-haff. Pop. in 1843, 3,575. It is enclosed by walls now in a ruinous condition, and has two gates, two suburbs, a poor's house, and the remains of a castle. Boat-building forms the chief branch of local industry. Pop. of circle, 25,229.

UKER-SEE, a lake of Prussia, in the prov. of Brandenburg, and circle of Prenzlau. It is 6 m. in length from N to S, and 1½ m. in breadth. It discharges itself from the N by a river of the same name. Prenzlau is the chief place on its banks.

UKRAINE, an extensive region in the SE of Russian Poland, which, under the new administrative division of the Russian empire, forms the four governments of Kiev, Podolia, Poltava, and Char-kov. It lies between the 48th and 52d parallels of N lat., corresponding to the north of France and the central part of England; but has the characteristics of the climate of those of the S of Russia generally,—in summer, great heat, in winter, intense cold. In natural fertility no part of Poland, and few districts in Europe, surpasses the Ukraine. Wheat, oats, and barley are here raised with comparatively little labour, and the pastures are of great luxuriance. Fruit is abundant, and the kermes, or Polish cochineal, forms one of the leading products of the country. The forests, consisting of oak, larch, and other trees, are turned to little account, horses, goats, and other animals in an unconfined state being allowed to occupy them. The inhabitants of the Ukraine are called Malo-Russians. The chief town is Kiev, once the capital of the Russian dominions, in their circumscribed state and previous to the founding of Moscow. This province, situated between Russia and Poland, was the scene of repeated invasions, of which that by Charles XII. of Sweden, in 1709, terminated in the fatal battle of Poltava. The great natural feature of the country is the river Dnieper, which intersects it in a winding direction from N to S, and affords a channel for the conveyance of products to the Black sea, in which Odessa, situated between the mouths of the Dnieper and Dniester, forms the principal outlet. The state of productive industry is that of a country wholly agricultural, possessing little trade, and few manufacturing establishments.

UKRAINE (SLOBODSK). See CHARKOV.

UKRIE, a village of Sind, 8 m. from Sehwan, and on the road thence to Kurachee.

UKUMBANI, a district of Eastern Africa, recently visited by the missionary Dr. Krapf, who describes its N boundary as formed by the Dana, and its SW boundary by the river Adi, which, at the point where he crossed it in November 1849, was flowing with a gentle current, and a width of 170 yds. In the rainy season, the Adi is a mighty stream which the natives cannot cross. It is said to have its principal source in the mountains of Kikuyu, and to receive additional contributions from the mountains Kilungo, Iwéti, Muka, Kú, and Nsáo Wi. The river runs in U. along the mountain-wall which stretches from Ndunguni, along the Galla country, to U., and even to Kikuyu. "My guide told me," says Dr. Krapf, "that a branch of the Adi comes from Kilimanjaro; and it is highly probable that the N part of the snow-

mountain issues a portion of its water to the region of Ukambáni. The Adi joins the Tzávo, and has its probable outlet in the bay of Malinde. Having rested for a while on the E bank of the Adi, we commenced slowly to ascend the mountain-range which stretches from Kikuyu to Ndungúni. We ascended to a height of about 1,800 ft., when we arrived on the plain of Yata, where we had a majestic view of the whole region around. We viewed the serpentine course of the Adi toward the W and NW; we saw the hills and plains of the wild Waknafi; we noticed the mountains Noka, Julu, Engolia, Théuka, in whose vicinity lay the road we had taken to Kikimbuli. Eastward we saw the mountains of Munumúni, which separate the Galla country from U. To the N, Ukambáni-Proprietary lay before our view. Had I been a mere traveller, pursuing only geographical objects, I would, standing on the plain of Yata, have considered myself amply compensated for the troubles I had sustained on the road; for a great many geographical problems were solved in an instant on the height of Yata."

ULANOW, a town of Austria, in Galicia, in the circle and 36 m. N of Breszow, on the San.

ULASH, a village of Asiatic Turkey, in the pash. and 18 m. SW of Sivas. It contains about 60 Armenian families. There are salt-springs near it.

ULASKOWA, a town of Austria, in Galicia, in the circle of Czortkow, on the Sered.

ULATTS VALLEY, a valley of Solano co., in the state of California, U. S., to the NE of Suisan valley, which runs NW, and opens into the valley of the Sacramento. It is a great thoroughfare.

ULBEEK, a department and commune of Belgium, in the prov. of Limburg and arrond. of Tongres. Pop. of dep. 538; of com. 394.

ULBO, a small island of Dalmatia, in the circle of Zara, and at the NW entrance to the channel of that name. It is destitute of fertility, and inhabited chiefly by fishermen.

ULCEBY, a parish in Lincolnshire, 6½ m. SE of Barton-on-Humber. Area 2,220 acres. Pop. in 1831, 694; in 1851, 191.—Also a parish in Lincolnshire, 3¼ m. SW of Alford. Area 3,790 acres. Pop. with that of Forthlington, in 1831, 218; in 1851, 959.

ULCOMBE, a parish in Kent, 7¼ m. SE by E of Maidstone. Area 3,529 acres. Pop. in 1851, 438.

ULDALE, a parish in Cumberland, 9 m. S by W of Wigton, on the E bank of the river Ellen. There are two small lakes in the p., which are well-stocked with fish, and from which the river Ulne or Ellen takes its rise. Area 5,500 acres. Pop. 388.

ULEA, or ULEO, a river of Russia in Europe, in the grand-duchy of Finland, and Uleaborg. It issues from the NW extremity of the Ulea-trask; runs NW; and after a course of about 90 m., in which it forms several falls, throws itself by four embouchures into the gulf of Bothnia.

ULEABORG, a lään or gov. and town of Russia, in the N part of the grand-duchy of Finland. The gov. is bounded on the NW by the Tana, by which it is separated from Norway; on the W by the Tornea, by which it is divided from Sweden, and by the gulf of Bothnia; on the S by the governments of Vasa and Kuopio; and on the E by those of Olonetz and Arkhangel. Pop. in 1840, 125,114. It comprises an area, extending between 63° 30' and 70° N lat., and between 20° 30' and 30° 20' E long., of 13,080 sq. m., being 495 m. in length from NNE to SSW, and 180 m. in breadth. The soil produces rye and barley, but not in quantity adequate to the local consumption. It is to a great extent covered with wood, and in many parts marshy. The inhabitants of the coasts are Swedes, but those of the interior are chiefly Fins. They employ themselves

chiefly in agriculture, and make considerable quantities of butter and cheese. The gov. comprises 5 haerads or districts. It was annexed to Russia in 1809.—The town is 345 m. N of Helsingfors, on a peninsula, at the confluence of the Ulea with the gulf of Bothnia. Pop. 5,000. Its streets are long and straight. The trade consists chiefly in pitch, pulse, fish, and salt butter. It was built in 1610, and taken by the Russians in 1714. In 1773 it suffered severely from fire. On a small adjacent island is the castle of Uleaborg, which was built and fortified in 1590.

ULEASTRE. See HONIMA.

ULEA-TRASK, a lake of Russia in Europe, in the grand-duchy of Finland, and gov. of Uleaborg. It is about 45 m. in length from ESE to WNW, and upwards of 30 m. in breadth; and may be viewed as a series of lakes connected together by narrow channels. It gives rise on the NW to the Ulea.

ULEILA-DEL-CAMPO, a town of Spain, in the prov. of Almería, 15 m. SSE of Purchena, in a mountainous and infertile locality. Pop. 1,690. It has a parish church, and a public granary.

ULEY, a parish in Gloucestershire, 2¼ m. E by N of Dursley. Area 1,492 acres. Pop. 1,327.

ULFON, an island of the gulf of Bothnia, near the E coast of Sweden, in N lat. 63° 2', and E long. 18° 29'.

ULFSTEIN, a parish of Norway, in the diocese of Drontheim, and bail. of Romsdal, in the island of Hareid. Pop. 1,700.

ULGHAM, a parochial chapelry in Northumberland, situated on the Line-water, 5 m. NE by N of Morpeth. Area 3,615 acres. Pop. 329.

ULGUZ-DAGH, a mountain of Turkey in Asia, in Anatolia, and sanj. of Kankeri, to the NW of Tosia.

ULITEA. See RAJATEA.

ULLA. See OOLLA.

ULLA, a rivulet of co. Limerick, which rises between the mountains Roscagh and Menyeen, and runs about 6 m. SW to a confluence with the Feale.

ULLA, a river of Spain, in Galicia, which has its source 8 m. W of Puerto-Marín, in the prov. of Lugo; runs WSW between the provinces of Corunna and Vigo; and after a total course of about 90 m. throws itself into Arosa bay, near Carril. Its principal affluent is the Sar, which it receives on the r.

ULLADULLA, a maritime town of New South Wales, in the co. of St. Vincent, 136 m. SSW of Sydney. It has a boat harbour.

ULLAHAN, a rivulet of co. Limerick, which rises on the SE side of the mountain Menyeen, and runs about 7 m. SW to the Feale.

ULLAH BUND, a low earthen ridge on the confines of Sind and Cutch, extending it is said a distance of 50 m. from E to W, and in breadth about 16 m. It was upheaved by an earthquake in 1819, and was subsequently cut through by an inundation of the Phurran branch of the Indus, which formed a channel 35 yards wide, and about 30 deep, and immediately below spread into a lake named by Burnes the Lake of Sindree, and covering an area of 2,000 sq. m.

ULLAPOOL, a village on the W coast of Ross-shire, 80 m. NE of Poll-Ewe. It has a small but safe, excellent, and well-kept harbour. It was built, in 1788, by the British Fishery society; and large sums were afterwards expended upon both it and kindred establishments on the isles Martin and Tanera, at the mouth of Loch-Broom; but the failure, for a long series of years, of the herring-fishery has reduced it to insignificance when compared with its pristine condition. Pop. of the village, in 1836, 730.

ULLARD, a parish partly in co. Kilkenny, and partly in co. Carlow. It lies along the Barrow, the Kilkenny section on the W bank, and the Carlow section on the E bank, 2½ m. NNE of Graigenamagh. Area 5,846 acres. Pop. in 1841, 2,354.

ULLDECONA, a town of Spain, in the prov. of Tarragona, 18 m. S of Tortosa, in a fertile valley, 1½ m. from the l. bank of the Cenia. Pop. 3,364. It has a parish church, two convents, and a custom-house. The streets are straight and well-built. It possesses manufactories of calico, and distilleries of brandy.

ULLENHALL, a chapelry in the p. of Wootton-Wawen, Warwickshire, 1½ m. NW of Henley-in-Arden. Pop., including the hamlet of Fordhall, in 1831, 465; in 1851, 459.

ULLENSAGER, a parish of Norway, in the diocese and bail. of Aggershuus, 18 m. NE of Christiania. Pop. 4,000.

ULLENSDORF, a village of Moravia, in the circle of Olmutz, in the midst of mountains. It has a paper-mill, a glass-work, and a mineral spring.—Also a village of Prussia, in the prov. of Silesia, circle and 9 m. S of Lowenberg. Pop. 930. It has a paper-mill.

ULLESKELFF, a township in the p. of Kirkby-Wharfe, Yorkshire, 2 m. SW of Tadcaster, intersected by the York and North Midland railway, which has a station here, 8 m. 54 chains from York. The railroad between York and its junction with the Leeds railway, after being carried across the Wharfe by a viaduct, 274 ft. in length, runs across the village-green and common. Area 1,299 acres. Pop. in 1831, 339; in 1851, 483.

ULLESTHORPE, a hamlet in the p. of Claybrooke, Leicestershire, 3½ m. NW of Lutterworth. The village is close upon the line of the Midland Counties railway, which has a station here, 7½ m. from Rugby. Pop. in 1831, 599; in 1851, 592.

ULLEY, a township in the ps. of Aston and Treeton, Yorkshire, 8 m. E of Sheffield. Area 850 acres. Pop. in 1831, 193; in 1851, 182.

ULLFORS, a parish of Sweden, in the prefecture of Upsal, and haerad of Cerbyhus. It has extensive forges.

ULLIBARRI, a village of Spain, in the prov. of Alava, 5 m. SW of Orduña, in a valley. Pop. 153. It has quarries of fine stone.

ULLID, or **ILLUD**, a parish in co. Kilkenny, 2½ m. NE of Mountcoin. Area 2,248 acres. Pop. in 1831 and 1851, 646.

ULLINGSWICK, a parish in Herefordshire, 5 m. SW by W of Bromyard. Area 1,245 acres. Pop. in 1831, 293; in 1851, 356.

ULLOA (**SAN VICENTE-DE**), a town of Spain, in the prov. and 15 m. from Lugo. Pop. 200. It is the centre of extensive linen manufactures.

ULLOCH, with **PARDSEY** and **DEANSCALES**, a township in the p. of Dean, Cumberland, 5½ m. SW by S of Cockermouth. Pop. in 1851, 321.

ULLSWATER, a lake situated partly in the mountainous SW region of Cumberland, and partly in Westmoreland, at an elevation of 460 ft. above sea-level. Its length is 9 m.; average breadth 1 m.; greatest depth 210 ft. Forced by the bold hills which environ it to assume a zigzag direction, its form is nearly that of a Z. The lower reach of the lake—about 3 m. in length—is tame, when compared with the middle and upper reaches.

ULLUA, a river of the state of Honduras, which descends from the mountains in the interior; runs first NW, then N, and after a total course of about 180 m., throws itself into the gulf of Honduras. It is navigable for vessels of 200 tons burthen.

ULLY-SAINT-GEORGES, a commune of France,

in the dep. of the Oise, and cant. of Neuilly-en-Thelle. Pop. 1,210.

ULM, a village of the grand-duchy of Baden, in the circle of the Middle Rhine, 17 m. NNE of Offenburg. Pop. 700. In its vicinity are the ruins of a castle.—Also an oberamt and town of Württemberg, in the circle of the Danube. The town is on the l. bank of the Danube, which is here crossed by a fine bridge, at the confluence of the Blau, 51 m. SE of Stuttgart. Pop. in 1840, 16,231. Many of the houses are in the old German style, the streets are tortuous, some of them only are paved and drained. It contains several fine specimens of the architecture of the middle age. Of these the principal is the minster erected between 1377 and 1500, and one of the finest, largest churches in Germany. The church of Saint Michael and the town-house are also ancient edifices. It has besides a commandry of the Teutonic order, an arsenal, a theatre, an hospital, a gymnasium, a house-of-detention, and numerous benevolent institutions. Its industry, formerly very active, consists chiefly in the manufacture of linen, silk and woollen fabrics, tobacco, pipes, copper and tin ware, clocks, surgical instruments, chemical substances, sugar from beetroot, and floor-cloths. It has also numerous breweries and tanneries. The trade consists chiefly in grain, horses, and snails. The snails are bred for the supply of various markets in Austria and Germany, especially for that of Vienna, where they are esteemed a great delicacy after having been fed on strawberries. Ulm, which is of great antiquity, was constituted a free imperial town in 1802. It was formerly a place of great great commercial activity and opulence, but has suffered severely from monopolies. It occupies an important military position, and has repeatedly taken part in the wars of Germany. Its fortifications were destroyed after its capitulation to Napoleon in 1805. In 1810, it was united to Württemberg.

ULME, a town of Portugal, in the prov. of Estremadura and comarca of Alemquer, in a fertile valley, 14 m. ENE of Santarem. Pop. 450.

ULMERFELD, or **UNGERFELD**, a town of Austria, in the prov. of Lower Austria, and upper circle of the Wienerwald, on the r. bank of the Ips, 10 m. NNE of Waidhofen. Pop. 800.

ULMHAUSEN, a large village of Württemberg, in the circle of the Danube, bail. and 1 m. from Goppingen. It is noted for its mineral waters.

ULNES-WALTON, a township in the p. of Croston, co.-palatine of Lancaster, 5½ m. W by N of Chorley. Area 2,087 acres. Pop. in 1851, 586.

ULÖG, or **ILLEUX**, a town of Turkey in Europe, in the prov. of Bosnia, 63 m. NNW of Trawnik.

ULPHA, a chapelry in the p. of Millom, Cumberland, 8 m. E by S of Ravenglass, stretching along the Duddon. Pop. in 1831, 405; in 1851, 370.—Also a joint township with Methop, in the chapelry of Witherslath, Westmoreland, 9 m. SSW of Kendal.

ULRAKA-KHAN, a summit of Hindostan, in the prov. of Delhi, 17 m. SW of Almora, near a small lake. It has an alt. of 7,366 ft. above sea-level.

ULRICHAMN, or **BOGESUND**, a village of Sweden, in the prefecture of Elfsborg, 60 m. SE of Wenersborg. Pop. 800. It has tobacco manufactories.

ULRICH, a village of the grand-duchy of Baden, in the circle of the Upper Rhine, to the S of Freyburg. Pop. 150.

ULRICH (SAINT), a village of the Tyrol, in the circle of the Lower Inn-thal, on the Piller-see. It has a blast furnace and a powder-mill.

ULRICHEN, a village of Switzerland, in the cant. of the Valais, 60 m. NE of Sion, pleasantly

situated in a plain, at the foot of the Grimsel. Pop. 240. It has a sulphureous spring.

ULRICHSBALBEN, a village of the grand-duchy of Saxe-Weimar, to the NE of Weimar, on the Ilm. Pop. 440.

ULRICHSKIRCHEN, a town of Austria, in the prov. of Lower Austria, circle and 12 m. ENE of Korneuberg, on the Russbach. Pop. 940.

ULRICHSSTEIN, a town of the grand-duchy of Hesse-Darmstadt, in the prov. of Upper Hesse and bail of Scholten, 24 m. E of Giessen. Pop. 891. It has linen factories, and an active trade in cattle.

ULROME, a township and chapelry in the p. of Barmston and Skipsea, Yorkshire, $7\frac{1}{2}$ m. S by W of Bridlington, bounded on the E by the North sea. Area 1,651 acres. Pop. in 1831, 166; in 1851, 221.

ULSTER, the northern of the four provinces of Ireland; bounded on the W and the N by the Atlantic ocean; on the E by the North channel and the Irish sea; on the S by the prov. of Leinster; and on the SW by the prov. of Connaught. The longest line which can be drawn westward through the prov., extends from Donaghadee in co. Down, to Feelin-head in co. Donegal, and measures 103 m.; the longest line which can be drawn southward, extends from Malin-head in co. Donegal to the village of Finea in co. Cavan, and measures 89 m. The area of the prov. comprises 3,407,539 acres of arable land, 1,764,370 of uncultivated land, 79,783 of continuous plantations, 8,790 of towns, and 214,956 of water,—in all 5,475,438 acres. The surface is much more diversified, more beautiful in the aggregate, and greatly freer from bogs and level grounds, than any of the other three provinces of Ireland. One vast congeries of mountains, exceedingly various in outline, in grouping, and in the character of their intersecting glens and vales, occupies most of the W section of the province, or the greater portion of co. Donegal, a large portion of co. Londonderry, a large portion of co. Tyrone, a considerable portion of co. Fermanagh, and a small portion of co. Cavan; and, excepting in the range of the Sperrin mountains, along the mutual border of Londonderry and Tyrone,—this enormous congeries—exceedingly the largest in Ireland—is nowhere drawn out into ranges or systems of any considerable extent, but consists of mere groups, assemblages, and even isolated masses of individual mountains. Very many of the summits have altitudes of between 1,500 and 2,000 ft. above sea-level; a few have altitudes even upwards of 2,000 ft.; and by far the majority are too lofty and conspicuous to be designated mere hills. The S portion of the W district, or that which lies S of the Sperrin mountains, and occupies all the central regions of the county of Tyrone, fuses out into a tabular expanse of moorland, prevaillingly russet in dress, little diversified in surface, tame, bleak, and dismal; and a rich low country, of various breadth and various character, but comprising a large proportion both of flat meadowy land and fertile undulated arable land, flanks all the E side of the great mountain congeries, and passes around Lough Neagh and across a portion of the Upper Bann and the whole of the Lower Bann, so as to constitute all the valley of the Lower Bann, all the shores and immediate basin of Lough Neagh, and the terminating portion of the valley of the Upper Bann. Most of the region S of the Antrim trap-mountain system, and of the eastern and central sections of the great mountain congeries of Ulster,—or the region which constitutes most of the county of Down, about two-thirds of the county of Armagh, the south-eastern district of the county of Tyrone, more than one-half of the county of Monaghan, a small part of the county of Cavan,

and a considerable part of the eastern half of the county of Fermanagh,—may be summarily described as a constant, intricate, rich, and beautiful intermixture of hills and hollows, swells and dells, totally unlike any other great district in either Ireland or Great Britain. The largest lake in Ireland, and one of the largest in Europe, is Lough Neagh, on the mutual border of the counties of Londonderry, Antrim, Down, Armagh, and Tyrone. Two large and very beautiful lakes, are Upper Lough Erne and Lower Lough Erne, both principally within co. Fermanagh, but the former also slightly within co. Cavan, and the latter slightly within co. Donegal. The other principal lakes of the prov. are Loughs Melvin, Upper-Macnean, Gowna, Kin-nail, Sheelin, Oughter, Ramor, the Cootehill lakes, and Loughs Derg, Esk, and Veagh. The only great rivers are the Erne, from the S boundary of the prov., through cos. Cavan and Fermanagh, and across the SW wing of co. Donegal, to Donegal bay at Ballyshannon harbour; the Foyle, from many and voluminous head-waters in cos. of Donegal and Tyrone, along the N part of the boundary between these cos., and across the W wing of co. Londonderry, to the head of Loch Foyle; the Bann, from the Mourne mountains through cos. Down and Armagh, through Lough Neagh, along the boundary between cos. Londonderry and Antrim, and across the NE wing of co. of Londonderry, to the Atlantic ocean; and the Lagan, from the Slievecroob mountains, through co. Down, and along the boundary between cos. Down and Antrim, to the head of Belfast-lough.

The manufacture of linen, which has for so long a period made a chief figure among the industrial occupations of the Irish, belongs chiefly to Ulster. At present the annual value of the linen cloth manufactured in U. cannot be less than £4,000,000 stg. The number of persons employed in all branches of the manufacture is about 170,000; we may safely assert, that 500,000 derive their subsistence from it. The roads of U., in spite of the prevailing hilliness of the surface, are, in a general view, well constructed, minutely ramified, and excellently maintained.

Divisions, &c.] U. is divided into the 9 counties of Donegal in the NW, Londonderry in the N, Antrim in the NE, Down in the SE, Armagh in the E of the S, Monaghan in the W of the S, Cavan in the SW, Fermanagh in the W, and Tyrone in the centre. The pop. in 1831 was 2,286,622. Families employed chiefly in agriculture, 268,864; in manufactures and trade, 88,421; in other pursuits, 68,029. The pop. in 1841 was 2,386,873. Families employed chiefly in agriculture, 267,799; in manufactures and trade, 141,801; in other pursuits, 30,205. Families dependent chiefly on property and professions, 9,443; on the directing of labour, 152,081; on their own manual labour, 271,509. Males at and above 5 years of age who could read and write, 412,697; who could read but not write, 237,687; who could neither read nor write, 358,659. Females at and above 5 years of age who could read and write, 205,945; who could read but not write, 382,127; who could neither read nor write, 489,058. Pop. in 1851, 2,100,289.

History.] The tribes whom the Roman geographer represents as inhabitants of Ulster in the second century were the *Voluntii*, the *Vemicii*, the *Robagdi*, the *Darnii*, and the *Erdini*. Some portion of the ancient history of the province is glanced at in the articles *DALRIADA* and *AILEACH*; and the principal passages of its history during the middle ages down to the overthrow and expulsion of its native septa and chieftains are noticed in the articles *TYRONE*, *DONEGAL*, *LONDONDERRY*, *DOWN*, *CLANREBOY*, and *BELFAST*: see these articles. At the accession of James I. measures were adopted for pacificating and civilizing Ireland; and, during his reign, the project was formed and executed of what is known in history as the Plantation of Ulster—com-

pletely breaking the power of native chiefs throughout this prov., colonizing with British Protestants the vast extent of lands forfeited by the recent rebellions, expelling to Connaught, or at least from the north of Ireland, the native Irish resident on these lands, the creation of a large number of parliamentary boroughs, with an exclusively Protestant franchise, and the reduction of the civil government of the several counties into a form accordant with that of the counties of England. In consequence of a very large proportion of the colonists at 'the Plantation' being immigrants from Scotland, the Presbyterian form of church government became extensively diffused in the province, an extensive engraftment of the Scottish dialect was made upon the native Hibernico-English, and so marked a Scottish tone was given to the entire social character that in other parts of Ireland, particularly in Connaught, the modern inhabitants of U. continue till the present day to be popularly called Scotsmen. In 1784, His Royal Highness, Frederic, Duke of York, was created Earl of U; and this title, so long in use, and so various in possession, is now restricted to princes of the royal family.

ULSTER, a river which has its source in Bavaria, in the Rhöne-gebirge, to the N of Bischofsheim; flows thence into the grand-duchy of Saxe-Weimar; thence into Electoral Hesse, and after a course in a generally N direction of about 36 m., joins the Werra, on the l. bank, $1\frac{1}{2}$ m. below Vach.

ULSTER, a county in the SE part of the state of New York, U. S., comprising an area of 1,076 sq. m., drained by Walkill, Esopus, Rondout, and Shawangunk creeks. It is intersected by the Shawangunk and Blue mountains, and possesses considerable diversity of soil. It is crossed by the Albany and Hoboken railway, and by the Delaware and Hudson canal. Pop. in 1850, 59,384. Its capital is Kingston.—Also a township of Bradford co., in the state of Pennsylvania, 107 m. N of Harrisburg, bordered on the E by the Susquehanna.

ULTING, a parish in Essex, 4 m. SSW of Witham, on the N bank of the river Chelmer. Area 1,147 acres. Pop. in 1831, 158; in 1851, 164.

ULVA, one of the Argyleshire Hebrides, lying between Loch-Tua and the entrance of Loch-na-Keal, on the W coast of Mull. Its length from E to W, is $4\frac{1}{2}$ m.; its breadth is nearly 2 m. The island is distinguished for grand basaltic colonnades and picturesque combinations of these with amorphous masses of trap. Its surface rises from the shore in successive ranges of terraces to an extreme alt. of 1,300 or 1,400 ft.—Also a parish and hamlet of Van Diemen's Land, in the co. of Monmouth.

ULVERSTON, a parish in the co.-palatine of Lancaster. It contains the market-town and township of the same name, the chapelries of Blawith, Church-Coniston, Egton with Torver, Lowick, and Satterthwaite; also the townships of Newland and Osmotherley, and Mansriggs. Area 24,586 acres. Pop. in 1831, 7,741; in 1851, 10,623.—The township of U has an area of 2,900 acres. In 1801, the pop. was returned at 2,937; in 1831, at 4,876; in 1851, 6,742. The village of U., which has risen with the decadence of Dalton, and may now be considered the capital of the Furness district of the co.-palatine, is 21 m. distant from Lancaster, over the sands, and $33\frac{1}{2}$ m. by way of Cartmel. It is a neat, clean, cheerful-looking town, consisting principally of modern stone-houses, not very regularly arranged, but substantial and well-built. It stands upon uneven ground, sheltered on the N and W by gentle eminences, and in the distance by the fells. The fells produce great quantities of blue slate; the lower parts abound in the richest iron-ore found in Great Britain, and the mineral treasures of the earth do not here, as in many places, detract from the fertility of the surface. U. is not now a sea-port, for the estuary of the Leven has receded so greatly as to place the town above 1 m. inland; but a canal, $1\frac{1}{2}$ m. in length, connects a capacious basin at the town with Morecambe-bay, and is so wide and deep as to admit vessels of 200 tons burthen. The principal commerce of U. is in iron-ore, pig, and bar iron,

limestone, slates, gunpowder, and grain. The manufactures are coarse cottons, and linens, ropes, hats, and woollen-yarn; shipbuilding is also carried on to a small extent. On the NE of the town rises the Hoad-Hill, on which a handsome monument 100 ft. high has been erected by private subscription, to perpetuate the memory of Sir John Barrow, Bart., a native of the adjoining village of Dingleybeck, a great promoter of geographical science, and eminent in literature, also a distinguished traveller. Sir John was 40 years secretary of the admiralty.

ULVESUND, a strait of Denmark, between the SE coast of the island of Sieland and the island of Moeen. It is about $1\frac{1}{2}$ m. in breadth.

ULVSFIORD, a gulf of the Arctic ocean, in Norway, in the bail of Finnmark, to the SE of the island of Ringvadsøe, and to the W of the Lyngen-fjord. It is 36 m. in length from N to S, and about 6 m. in medium breadth.

ULYSSES, a township of Tompkins co., in the state of New York, U. S., on the W side of Cayuga lake, 8 m. NW of Ithaca, drained by several small streams. Pop. in 1840, 2,979; and in 1850, 3,122.—Also a township of Potter co., in the state of Pennsylvania, 121 m. N by W of Harrisburg, drained by the head waters of Pine creek. Pop. in 1840, 371; in 1850, 542.

ULZEN, a town of Hanover, in the principality of Luneburg, on the Ilmenau. Pop. 2,900. It has manufactories of tobacco, chicory, linen, &c.

UMA, a town of Prussia, in the prov. of Westphalia, circle and 15 m. SSW of Hamm, on the Kottelbecke. Pop. 8,247. It has manufactories of linen and of pottery, several distilleries and breweries, and an extensive salt-work.

UMAGO, or **OMAGO**, a town of Illyria, in the gov. and 26 m. SW of Trieste, and circle of Istria, on the Adriatic, in N lat. $45^{\circ} 25' 20''$, and E long. $13^{\circ} 21' 50''$. The situation is insalubrious.

UMARI, a town of Brazil, in the prov. of Ceara, in the mountains, on the confines of the prov. of Parahiba.

UMARINAUHI, a river of Brazilian Guayana, an affluent of the Cauhaburi or Caburi.

UMBAGOG, a lake partly in the state of Maine, U. S., and partly in that of New Hampshire. It is about 15 m. in length, and in some parts 10 m. in width. It discharges itself into the Androscoggin, which it enters in Essex township.

UMBECTA, a town of Hindostan, in the prov. of Delhi, 15 m. SW of Saharunpur.

UMBER, a town of Hindostan, in the prov. and 35 m. SE of Aurangabad.

UMBRAIL, or **WORMSER-JOCH**, a mountain on the confines of the Swiss canton of the Grisons and of Lombardy, between the Munster-thal and Bormio, 48 m. SE of Coire.

UMBRETE, a town of Spain, in the prov. and 8 m. WSW of Seville, in a pleasant locality. Pop. 1,215. It has a fine church of modern structure, a palace and gardens belonging to the archbishop of Seville, an hospital, and several distilleries of brandy. Oil and wine of the best quality are cultivated in the environs.

UMBRIATICO, a town of Naples, in the prov. of Calabria-Ultra, district and 24 m. NNW of Cotrone, on a steep mountain, and enclosed on all sides by inaccessible precipices. Pop. 2,500. It has a cathedral, but is a small and ill-built place. It has a considerable trade in grain, wax, and wine. Gypsum and alabaster are found in the environs.

UMCAMAS, a river of Caffaria, in the district of Victoria, which descends from the Giant's Cup, a summit of the Quathlamba mountains; runs in a generally SE direction; and falls into the ocean at

the port of Natal. It receives the Umpalani and Umagorda river on the l.

UMEA, or **UMMA**, a town and port of Sweden, 495 m. NNE of Stockholm, capital of the län of the same name, and at the confluence of the Umea-elv with the gulf of Bothnia. Pop. 1,465. It is built of wood, and has been twice destroyed by the Russians. Its trade consists chiefly in timber, hides, fish, butter, and pitch. "This, and all the towns I have passed," says Mr. Laing, "are, in sober reality, very like our own coast-side towns of the same population. The people earn their living in the same way, by the fisheries, the trade of ship-building, and the supplying the neighbouring country with wares. The people are clad in the same way—the peasantry very like our own Scotch country people: in some respects the difference appears to me in favour of the little towns here. They are more open and airy, the streets better paved and cleaner, the houses more roomy and nice, the meanest with window-curtains or blinds and flower-pots in the windows, and much better washed and scoured. The inns are better. I am here in a more comfortable, cleaner house, than any of our smaller towns in the north of Scotland, excepting perhaps Inverness, can boast of. In this little town of 1,100 inhabitants, at the distance of 470 m. from the capital, there are two booksellers' shops; in which I found a good stock of modern books. All the comforts, conveniences, and, to judge by the appearance of the ladies and gentlemen, the elegancies of a refined life are to be found in as great abundance as in our small towns, and perhaps even extending lower in society, from the daily mode of living being less costly. In the appearance or habits of the people, there is nothing to give you the idea of ignorance, rawness, or a low state of manners. There is nothing of Lapland here, except perhaps in the food."

UMEA, or **WASTER-BOTTEN**, a län or province of Sweden, on the gulf of Bothnia, watered by the Umea-elv. Pop. in 1840, 57,184. It produces rye and potatoes, and pastures considerable numbers of cattle. It is divided into 8 haerads, 3 fogderi, and 25 parishes.—The river U. has its source in a lake, on the E side of the Dofrines; runs SE; expands into lake Stor-Uman, and after a total course of about 300 m., throws itself into the gulf of Bothnia.

UMEA-LAPPMARK, a division of Sweden, in the W part of the län of Umea. Lycksele is its chief place.

UMENAK, or **OMENAK**, a district of Greenland, on the W coast, to the N of Jacob bay, in N lat. 72°. It has extensive seal fisheries, and contains mines of coal.

UMGANI, a river of Caffraria, which has its source in the Quathlamba mountains, runs SE, and falls into the ocean to the NE of Port Natal.

UMLYALLA, a town of Hindostan, in the prov. of Gujerat, 30 m. NNE of Ahmedabad.

UMMANZ, an island of Prussia, in the prov. of Pomerania, and circle of Bergen, a little to the W of the island of Rugen. It is 5 m. long, and 2 m. in breadth, and contains a village of the same name.

UMMELN, a village of Hanover, in the gov. and principality of Hildesheim. Pop. 145.

UMMENDORF, a village of Prussia, in the prov. of Saxony, regency and 20 m. W of Magdeburg, and circle of Neu-Haldensleben. Pop. 1,000. It has a quarry of freestone.—Also a village of Würtemberg, in the circle of the Danube, between the Rhine and Umlach. Pop. 500. It has a castle.

UMMERSTADT, a town of the duchy of Saxe-Meiningen, principality and 15 m. SSE of Hild-

burghausen, and bail. of Hildburg, on the Rodach. Pop. 900. It has cotton spinning-mills, and manufactories of pottery.

UMPFERSTADT, a village of the duchy of Saxe-Weimar, to the E of Weimar. Pop. 885.

UMPQUA, a county, village, and river of Oregon Territory. The village is on the shore of the Pacific, at the mouth of the river of the same name, 92 m. SSW of Salem. It has a good harbour, and promises to become a place of importance.

UMRITZIR. See **AMRITSIR**.

UMSEMLABAA, or **CHASE'S RIVER**, a river of Caffraria, which flows into the ocean about 80 m. SE of the 2d port of Natal.

UMSLANYAN, a river of Caffraria, which flows into the ocean about 70 m. NE of the 2d port of Natal.

UMSTADT, a town of the grand-duchy of Hesse-Darmstadt, in the prov. of Starkenburg, 12 m. E of Darmstadt. Pop. 3,140. It has manufactories of linen, and of leather. In the vicinity is the ancient castle of Otzberg.

UMTATA, or **NOSTRIL RIVER**, a river of Caffraria, which has its sources in the Umtate mountains, runs SE, and falls into the sea about 20 m. NE of the 1st port of Natal.

UM-TAVOONE, a river of Caffraria, which flows SE, and falls into the 2d port of Natal.

UM-TOOMBIC, a river of Caffraria, in the district of Victoria, which flows into the ocean about 20 m. SW of the port of Natal.

UMUR-FAKHI, a town of Turkey in Europe, in Rumelia, in the sanj. and 40 m. N of Kirk Kilissia, on the Serpa.

UMZIMCULU, or **ANT'S RIVER**, a river of Caffraria, which has its sources in the Quathlamba mountains, in the district of Victoria, flows first S to the confines of the district, and falls into the ocean about 20 m. SW of the 3d port of Natal.

UM-ZIMVOOBO, or **ST. JOHN'S RIVER**, a river of Caffraria, which has its source in the Quathlamba mountains in Cavern Glen, flows in a generally SSE direction, and falls into the sea between the 1st and 2d ports of Natal.

UMZINYATI, a river of Natal, which rises at the base of the Draakberg, in S lat. 27° 46', and E long. 29° 25'; from this its course is about ESE, until it falls into the Utukela, below the confluence of the Mooi, and not far from the mouth of the Utukela, which appears to be in S lat. 29° 16', and E long. 31° 30'. The country below the rise of the Umzinyati, and for the distance of about 20 m., is for the most part flat and undulating, with little or no wood, but covered with sweet grass, and a good tract of country for sheep.

UNA, a town of Spain, in the prov. and 14 m. NE of Cuenca, in a valley enclosed by steep mountains. Pop. 330. In its vicinity is a lake containing a floating island on which sheep are pastured.

UNA, a parish of Brazil, in the prov. of Pernambuco, on the coast, watered by a river of the same name, which has its source in the Serra-Garanhuus; separates the prov. of Pernambuco from that of Alagoas; and flows into the ocean 9 m. N of Barra Grande. Its principal affluent is the Jacuhy.—Also a river of the prov. of São Paulo, which flows into the ocean by a wide embouchure, 30 m. N of the embouchure of the Iguape.—Also a river of the prov. of Bahia, in the comarca of Ilheos, which has its source in the Serra d'Itarica, and flows into the ocean to the S of the bay des Ilheos.—Also a river of the same prov., in the comarca de Valença, which has its source in the Serra-de-Pedra-Branca, and throws itself into the ocean, between the island of Tinharé and the continent.—Also a river of

the same prov., in the comarca of Rio-de-Contas, an affluent of the Paraguaçu.—Also a river of the prov. of Santa Catharina, which flows into the Laguna, near the S extremity.—Also a river of the prov. of Rio-de-Janeiro, in the district of Cabo-Frio.—Also a river of the prov. of Espirito Santo, in the district of Guarapari, and which flows into the ocean 6 m. S of the town of that name.

UNA-DE-QUINTANA-DEL-MARQUESADO (LA), a town of Spain, in the prov. and 39 m. from Leon, at the foot of woody mountains, in a humid locality. Pop. 416. It has manufactories of linen and of coarse cloth.

UNADILLA, a township of Livingston co., in the state of Michigan, U. S., 31 m. SE of Lansing, drained by Portage river. Pop. in 1840, 643; in 1850, 1,027.—Also a township of Otsego co., in the state of New York, 30 m. SW of Cooperstown. It has a hilly surface, and is drained by Unadilla and Susquehanna rivers. Pop. in 1840, 2,272; in 1850, 2,463. The river U. rises in Onseida co., and flows S to the Susquehanna, which it joins in the NE corner of Brainbridge.

UNADILLA FORKS, a village of Plainfield township, Otsego co., in the state of New York, U. S., at the junction of the E and W branches of the Unadilla. Pop. in 1840, 250; in 1850, 300.

UNADINGEN, a village of the grand-duchy of Baden, in the circle of the See, bail. and 3 m. E of Löffingen. Pop. 650. It has a gypsum quarry and coal-mines.

UNALASHKA. See OONALASKA.

UNARE, a river of Venezuela, which has its source near a town of the same name, in the prov. of Barcelona, and after a rapid course in a generally N direction of about 135 m., throws itself into the Antilles sea, a little below Tocayo. It receives the Guere on the r., and is navigable for about 18 m.

UNCASTILLO, a town of Spain, in the prov. and 57 m. NNW of Zaragoza, encircling a mountain crowned with an ancient castle. Pop. 2,113. It has a square in which there are two fine towers with casemates, two churches, and a convent. In the vicinity are the remains of an aqueduct.

UNDAL, a parish of Sweden, in the diocese and 30 m. W of Christiansand, and bail. of Mandal. Pop. 4,000.

UNDANA, a town of Hindostan, in the prov. of Ajmir, consisting in 1820 of about 400 houses.

UNDERBARROW, a chapelry in the p. of Kendal, Westmoreland, 3 m. W of Kendal. Pop. 503.

UNDERCLIFF, a celebrated district of the isle of Wight, forming a narrow belt of land of about 5 m. in length, running between the cliffs on the SE side of the island and the sea, and not less celebrated for its salubrity than for its beauty. With regard to temperature, the mean range for the year at U. is, compared with Devon and London, as 70 to 83 and 101. In respect to the daily range of temp., it is even more equable than Madeira, as appears by the following table drawn up by Dr. Martin:

Mean daily range of temperature.

	Undercliff.	Madeira.
January,	7-48	9-15
February,	8-30	10-17
March,	10-42	9-79
April,	12-84	9-39
May,	12-82	9-05
June,	11-90	8-78
July,	10-62	9-62
August,	11-39	10-05
September,	11-09	9-83
October,	9-53	10-56
November,	7-78	10-76
December,	6-96	10-48

If we compare the difference of the mean diurnal

range of U. with that of London for a similar series of years, we shall have, says Dr. Martin, another example of the greater equability of temp. which the U. presents, and we will add Newport to show the difference which exists at so short a distance as 10 m. from the spot we are describing.

Mean daily range of temperature.

	Undercliff.	Newport.	London,
January,	7-48	9-03	8-92
February,	8-30	10-11	10-23
March,	10-42	14-03	12-77
April,	12-84	19-56	16-96
May,	12-82	19-00	17-52
June,	11-90	21-25	18-61
July,	10-62	17-41	17-66
August,	11-39	18-33	17-29
September,	11-09	18-91	16-99
October,	9-53	14-23	12-54
November,	7-78	10-91	10-73
December,	6-06	8-50	8-76

The following table exhibits the average direction and duration of the winds at U.

SW,	96-97 days.	NW,	30-95 days.
E,	60-24 "	S,	26-72 "
NE,	54-61 "	N,	24-46 "
W,	52-24 "	SE,	18-35 "

UNDERMILLBECK, a township partly in the p. of Windermere, partly in that of Kendal, Westmoreland, 6½ m. W by N of Kendal. Area 3,925 acres. Pop. in 1801, with the chapelry of Winstar, 500; in 1831, 854; in 1851, 1,421.

UNDER-SKIDDAW, a township in the parish of Crossthwaite, Cumberland, 6 m. NNW of Keswick. Pop. in 1831, 477; in 1851, 508.

UNDERVILIER, or **UNDERWEILER**, a village of Switzerland, in the cant. of Berne, bail. and 8 m. SW of Delemont. Pop. 650. It has several iron-works.

UNDERWALD. See **UNTERWALD**.

UNDES. See **URNA-DESA**.

UNDY, a parish in Monmouth, 8½ m. E by S of Newport. Area 3,717 acres. Pop. in 1851, 373.

UNGARISCH-BROD, or **UKERSKY-BROD**, a town of Moravia, in the circle and 11 m. SE of Hradisch, near the r. bank of the Oltschawa. Pop. 2,900, of whom a large portion are Jews.

UNGARISCH-HRADISCH. See **HRADISCH**.

UNGH, a river of Hungary, in the comitat of Ungvár, which has its source in the Carpathian chain; runs SW, and joins the Laborca, on the l. bank, after a course of about 90 m. Ungvár and Nagy-Bercza are the chief places on its banks.

UNGHVAR, a comitat and town of Hungary, in the circle beyond the Theiss. The comitat is bounded on the N by Galicia; on the E by the comitat of Beregh; on the SE by that of Szabolcs; and on the SW and W by the comitat of Zemplin. It is 60 m. in length from NE to SW, and 48 m. in breadth, and comprises an area of 498 sq. m. Pop. in 1837, 136,908. It is intersected by the Carpathian chain, and is generally mountainous. The principal rivers are the Ugh and Laborca. The climate in the lower grounds is mild, and the soil favourable to the culture of the vine and of silk. Its principal productions are grain, especially oats, hemp, wine, fruit, wood, honey, iron, and marble. The comitat comprises 5 towns and 206 villages.—The town is 186 m. NE of Buda, on the r. bank of the Ugh. Pop. 6,224. It occupies a fine situation, and has two suburbs, three churches, two Catholic, and a united Greek, a Catholic gymnasium, and a theological seminary. It has an active entrepot trade in salt; but their cattle and the produce of the vineyards form the chief resources of the inhabitants. It has a castle on a lofty eminence.

UNGUNATUA, a small village of Bornu, in Central Africa, 6 days distant from Kuka. Richard-

son, the enterprising traveller, died here in March 1851. Early in January of that year, he and the companions of his mission, Drs. Barth and Overweg, arrived at the immense plain of Damergu, when, after remaining a few days, they separated, Barth proceeding to Kanu, Overweg to Guber, and Richardson taking the direct route to Kuka, by Zinder. There it would seem his strength began to give way, and before he had arrived 12 days' distant from Kuka, he became seriously ill, suffering much from the oppressive heat of the sun. Having reached a large town called Kangarrua, he halted for three days, and feeling himself rather refreshed renewed his journey. After two days more travelling, during which his weakness greatly increased, he arrived at the Wady Mellaha. Leaving this place on the 3d of March, he reached in two hours the village of U., when he became so weak that he was unable to proceed. In the evening he took a little food and tried to sleep—but became very restless, and expired about two hours after midnight. In the morning, the body, wrapped in linen and covered with a carpet, was borne to a grave which was dug four feet deep under the shade of a large tree close to the village, followed by all the principal sheiks and people of the district.

UNHOSCHT, a small town of Bohemia, in the circle and 17 m. E of Rakonitz.

UNIA, an island of Illyria, in the gov. of Friuli, a little to the W of the island of Osero, in N lat. 44° 38', and E long. 14° 15'. It is 12 m. in length from N to S, and 1½ m. in breadth. Pop. about 220.

UNIACK POINT, a headland of New South Wales, in the county of Stanley, at the N side of the embouchure of the Brisbane river.

UNICZOW. See **NEUSTADT (MAHRISCH)**.

UNIEGOW, a town of Poland, in the gov. and obwod and 39 m. ENE of Kalisch, on the Wartha. Pop. 800. It has manufactories of cloth, linen, and gloves, and several tanneries.

UNIEH. See **EUNIEH**.

UNIGUESAS, a tribe of Indians who inhabit the N part of Peru, to the E of the Uygay, and near the sources of the Murgas and Capenachua.

UNINI, a natural canal of Brazil, in the prov. of Para, connecting Lake Cadaya with the Rio-Negro. It extends from SW to NE a distance of about 120 m.

UNION, a central county in the state of Pennsylvania, U. S., comprising an area of 576 sq. m., drained by Penn's, Middle, Buffalo, and Mahantanga creeks, affluents of the Susquehanna, by the W branch of which it is bounded on the E. It is hilly in some parts, but generally fertile. Pop. in 1840, 22,787; in 1850, 26,038. Its capital is New Berlin.—Also a county in the S part of the state of Arkansas, comprising an area of 1,230 sq. m., drained by Wachita river and its affluents. It is level and fertile. Cotton is its chief production. Pop. in 1840, 2,889; in 1850, 10,298. Its capital is Eldorado.—Also a county in the N part of the state of Georgia, comprising an area of 706 sq. m., drained by head branches of Hiawasee river, and other small streams. It is bordered on the S and E by mountains; but possesses considerable fertility. Pop. in 1840, 3,152; in 1850, 7,234. Its capital is Blairsville.—Also a county in the SW part of the state of Illinois, comprising an area of 390 sq. m., drained by Clear creek, an affluent of the Mississippi, by which it is bordered on the W, and by Cash river, an affluent of the Ohio, and intersected by the Illinois Central railway. It has a hilly surface, but is in some parts very fertile. Pop. in 1840, 5,524; in 1850, 7,615. Its capital is Jonesboro'.—Also a county in the E part of the state of Indiana, containing a surface of 168 sq. m., drained by the E

fork of White river, and by Hannal, Rockland, and Silver creeks, and intersected by the Indiana Junction railway. Pop. in 1840, 8,017; in 1850, 7,144. Its capital is Liberty.—Also a county in the SW part of the state of Iowa, containing a superficies, generally level and fertile, of 432 sq. m.—Also a county in the NW part of the state of Kentucky, comprising an area of 385 sq. m., drained by Highland and Tradeswater creeks and their branches, and bordered on the W by the Ohio. It has an undulating surface. Pop. in 1840, 6,673; in 1850, 9,012. Its capital is Morganfield.—Also a county in the S part of the state of North Carolina, comprising an area of 475 sq. m., drained by branches of Yadkin river. It is hilly, but generally fertile. Pop. in 1850, 10,051. Its capital is Moursie.—Also a central county of the state of Ohio, comprising an area of 384 sq. m., drained by Big Darby and Bosques, and by other affluents of the Scioto river, and intersected by the Springfield, Mount Vernon, and Pittsburg, the Columbus, and Bellefontaine railways, &c. It is nearly quite level, and is very fertile. Its capital is Marysville.—Also a district in the N part of the state of South Carolina, comprising an area of 749 sq. m., drained by Pacolet and Tyger rivers and their branches, and intersected by the Union and Spartanburg railway. It has an undulating surface, and possesses considerable fertility. Pop. in 1840, 18,936; in 1850, 19,852. Its capital is Unionville.—Also a parish in the N part of the state of Louisiana, comprising an area of 1,027 sq. m., drained by D'Arbonne river and its branches, and by branches of Wachita river. It has a level surface, and is in some parts very fertile. Pop. in 1850, 8,203. Its capital is Farmersville.—Also a township of Tolland co., in the state of Maine, 31 m. NE by E of Hartford, drained by head branches of Willimantic river, and by other small streams. Pop. in 1850, 729.—Also a township of Lincoln co., in the state of Maine, 27 m. ESE of Augusta, drained by the George and Muscungus rivers. Pop. in 1850, 1,974.—Also a township of Branch co., in the state of Michigan, 52 m. SW by S of Lansing, intersected by St. Josephs. Pop. in 1840, 507; in 1850, 1,271.—Also a township of Essex co., in the state of New Jersey, 42 m. NE of Trenton, drained by Elizabeth and Rahway rivers. Pop. in 1840, 1,482; in 1850, 1,662.—Also a township of Broome co., in the state of New York, on the N side of the Susquehanna, 128 m. WSW of Albany, and drained by Naticoke river, and intersected by the New York and Erie railroad. Pop. in 1840, 3,165; in 1850, 2,143.—Also a township of Rock co., in the state of Wisconsin, 20 m. S of Madison, drained by Sugar creek. Pop. in 1850, 1,050.—Also a township of Gloucester co., in the state of New Jersey, 35 m. NE of Hartford. Pop. in 1840, 1,074.—Also a township of Berks co., in the state of Pennsylvania, drained by Mill, French, and Sixpence creeks. Pop. 1,272.—Also a township of Erie co., in the same state, 22 m. SE of Erie, drained by the S branch of French creek. Pop. 593.—Also a township of Huntingdon co., in the same state, 19 m. S of Huntingdon. Pop. 817.—Also a township of Bedford co., in the same state. Pop. 1,029.—Also a township of Luzerne co., in the same state, drained by Hemlock Shinkshinny, and Huntingdon creeks. Pop. 1,242.—Also a township of Washington co., in the same state. Pop. 858.—Also a township of Mifflin co., in the same state. Pop. 1,221.—Also a township of Schuylkill co., in the same state. Pop. 906.—Also a township of Fayette co., in the same state. Pop. 2,723.—Also a township of Union co., in the same state. Pop. 1,630.—Also a township of Allen co.,

in the state of Ohio. Pop. 669.—Also a township of Belmont co., in the same state, drained by Still-water creek. Pop. 2,126.—Also a township of Brown co., in the same state, bounded on the SW by the Ohio, and watered by Red Oak and Eagle creeks. Pop. 3,316.—Also a township of Butler co., in the same state. Pop. 1,828.—Also a township of Carroll co., in the same state. Pop. 889.—Also a township of Champaign co., in the same state. Pop. 1,249.—Also a township of Clermont co., in the same state. Pop. 1,423.—Also a township of Clinton co., in the same state. Pop. 3,284.—Also a township of Hancock co., in the same state. Pop. 637.—Also a township of Highland co., in the same state. Pop. 1,089.—Also a township of Lawrence co., in the same state. Pop. 1,034.—Also a township of Knox co., in the same state, watered by Mohican river. Pop. 1,098.—Also a township of La Fayette co., in the same state. Pop. 1,945.—Also a township of Licking co., in the same state, on the Central Ohio railroad, and bordered on the SE by the Ohio canal. Pop. in 1840, 1,637; in 1850, 2,368.—Also a township of Logan co., in the same state. Pop. in 1840, 832.—Also a township of Madison co., in the same state. Pop. 1,350.—Also a township of Mercer co., in the same state. Pop. 566.—Also a township of Miami co., in the same state. Pop. 1,967.—Also a township of Monroe co., in the same state. Pop. 1,356.—Also a township of Morgan co., in the same state. Pop. 1,328.—Also a township of Muskingum co., in the same state. Pop. 1,625.—Also a township of Putnam co., in the same state. Pop. 401.—Also a township of Scioto co., in the same state, drained by Little Scioto river. Pop. 575.—Also a township of Tuscarawas co., in the same state. Pop. 945.—Also a township of Ross co., in the same state. Pop. 2,632.—Also a township of Union co., in the same state. Pop. 694.—Also a township of Warren co., in the same state. Pop. 1,617.—Also a township of Grant co., in the state of Indiana. Pop. 593.—Also a township of Hancock co., in the same state. Pop. 476.—Also a township of Miami co., in the same state. Pop. 584.—Also a township of Rush co., in the same state. Pop. 1,480.—Also a township of Shelby co., in the same state.—Also a township of Montgomery co., in the same state. Pop. 2,943.—Also a township of Johnson co., in the state of Arkansas. Pop. 114.—Also a township of Greene co., in the same state. Pop. 526.—Also a township of Lawrence co., in the same state. Pop. 259.—Also a township of Marion co., in the same state. Pop. 287.—Also a township of Pope co., in the same state. Pop. 291.—Also a township of St. Francis co., in the same state. Pop. 613.—Also a village of M'Henry co., in the state of Illinois, on the Galena and Chicago Union railway, 62 m. NW of Chicago.—Also a village of Randolph co., in the state of Indiana, at the junction of the Indianapolis and Bellefontaine and the Ohio lines to Cleveland, Pittsburg, and Cincinnati.—Also a village of Franklin co., in the state of Missouri, 73 m. E of Jefferson City, on Bourbeuse creek. Pop. 200.—Also a river of Hancock co., in the state of Maine, which flows S, and discharges itself into a bay of the same name.

UNION-BRIDGE, a village of Belknap co., in the state of New Hampshire, U. S., on the Boston, Concord, and Montreal railroad.

UNION-HALL, a village in the p. of Myross, co. Cork, on an isthmus between the head of Castlehaven, and a creek of Glandore-harbour. Pop. 336.

UNION-SPRINGS, a village of Cayuga co., in the state of New York, U. S., 168 m. W by N of Albany, on the W side of Cayuga lake, and intersected by the Cayuga and Susquehanna railroad. Pop. 600.

UNIONTOWN, a township of Union township, Fayette co., in the state of Pennsylvania, U. S., on Red-Stone creek. Pop. in 1840, 1,710; in 1850, 2,333.—Also a village of Lake township, Stark co., in the state of Ohio, 12 m. N of Canton. Pop. in 1840, 300.—Also a village of Carroll co., in the state of Maryland, 51 m. NW by N of Annapolis. Pop. in 1840, 100; in 1850, 339.—Also a village of Perry co., in the state of Alabama, 60 m. SE of Tuscaloosa. Pop. in 1840, 450; in 1850, 500.—Also a village of Wheeling township, Belmont co., in the state of Ohio.

UNION-VALE, a township of Duchess co., in the state of New York, U. S., drained by Fishkill creek. Pop. in 1840, 1,498; in 1850, 1,552.

UNION-VILLAGE, a village of Warren co., in the state of Ohio, U. S., 4 m. W of Lebanon. Pop. in 1840, 500.—Also a village of Greenwich township, Washington co., in the state of New York, on Eatenkill. Pop. 1,300.

UNIONVILLE, a village of Hartford co., in the state of Connecticut, U. S., on the E side of Farmington river, and on the Collinsville branch of the New Haven and Northampton or Canal railroad.—Also a village of Orange co., in the state of New York, 98 m. SSE of Albany. Pop. in 1850, 180.—Also a village of Lake co., in the state of Ohio, on the Cleveland and Erie railroad, 53 m. from Erie.—Also a village of Union district, in the state of South Carolina, on a small branch of Tiger river, and intersected by the Union and Spartanburg railway.

UNITED STATES OF NORTH AMERICA,

A federal republic, comprising the great central division of North America, between the parallels of 49° and 24° N; and bounded on the N by New Britain, and Upper and Lower Canada; on the E by New Brunswick and the Atlantic; on the S by the gulf of Mexico, and Mexico; and on the SW and W by Mexico and the Pacific.

Boundaries. With respect to the boundary line of the republic, the following details may find a fitting place here. On the 7th of April 1682, the Sieur-de-la-Salle having sailed down the Mississippi, and reached the ocean, took possession of the whole country watered by that river, in the name of Louis XIV., and bestowed upon it the title of Louisiana. It remained a French colony until 1763; but in that year Canada was ceded to England, and the French settlements were fixed by a line drawn along the middle of the Mississippi from its source to the Illinois, and thence, by a line drawn along the middle of that river, and of lakes Maurepas and Pontchartrain, to the sea. France afterwards ceded to Spain all the country known as Louisiana, and also New Orleans, that is, so much of Louisiana as was not transferred by France to Great Britain. By treaty in 1763 between Great Britain and the United States, the independence of these states was recognised, and their NW, W, and S boundaries were thus described: "By a line through the middle of Lake Erie until it arrives at the water-communication between that lake and Lake Huron; thence along the middle of the said water-communication into Lake Huron; thence through the middle of the said lake to the water-communication between that lake and Lake Superior; thence, through Lake Superior, northward of the Isles Royal and Philippeaux, to the Long Lake; thence, through the middle of Long Lake and the water between it and the Lake-of-the-Woods, to the Lake-of-the-Woods; thence, through the said lake, to the most NW point thereof; and thence, in a due W course, to the river Mississippi; thence, by a line drawn along the middle of the said river Mississippi, until it shall intersect the northernmost part of the 31st parallel of N lat.; thence, by a line drawn due E from the determination of the line last-mentioned in the lat. of 31° N, to the middle of the river Apalachicola or Catahouche; thence along the middle thereof to its junction with the Flint river; thence straight to the head of the St. Mary's river; and thence along the middle of St. Mary's river to the Atlantic ocean." There was only one error in this otherwise clearly defined boundary. The headwaters of the Mississippi are to the S of the Lake-of-the-Woods. On the 1st of October, 1800, Louisiana was retroceded by Spain to France "with the same extent that it now has in the hands of Spain, and that it had when France possessed it, and such as it should be after the treaties subsequently entered into between

Spain and other states." In 1803, France sold Louisiana to the United States. The purchase included all lands "on the east [west] side of the Mississippi, as far as the great chain of mountains [the Rocky mountains] which divide the waters running into the Pacific and those falling into the Atlantic; and from the said chain of mountains to the Pacific, between the territory claimed by Great Britain on the one side, and by Spain on the other;" but no point was mentioned where the line in the chain of mountains was to commence, nor where the last mentioned tract of land lay. France, however, had actually nothing to sell but what constituted Louisiana after the cession made to Great Britain in 1763. In defining the limits of the United States, therefore, no small difficulty has been experienced, and various discussions have taken place; first, as to the Mexican or SW boundary; second, as to those affecting the NW or Canadian boundary; and, lastly, as to those respecting the Oregon or W boundary. After the United States obtained possession of Louisiana, the boundaries on that side were, till 1821—when they were settled by a convention between the two powers—matter of dispute with the Spanish Americans. The United States claimed as part of Louisiana all the country to the SW as far as the mouth of the Rio-del-Norte. They alleged that all that region, called by the Mexicans the prov. of Texas, anciently belonged to Louisiana; and therefore that America ought to possess all Louisiana, as it was possessed by France before its cession to Spain. But the maps of Humboldt and Pike show that the bay of St. Bernard is at least 300 m. N. of the mouth of the Rio-del-Norte; besides, the Spanish pop. of Texas was brought, in the early stages of the conquest, from the interior of Mexico, or New Spain; moreover the claim which the line proposed to be drawn along the Rio-del-Norte included, was founded on the discoveries of La Salle; but the landing of La Salle in Texas was purely accidental, he having gone by mistake beyond the mouth of the Mississippi, while the Spaniards had previously explored and taken possession of both banks of the Rio-Norte; and the measures of La Salle and of those Frenchmen who followed him in Texas were always regarded as hostile by the Spaniards. The negotiations thus raised were brought to a termination by the convention of 1821, under which the Americans, in return for the cession of the Floridas, abandoned to the Mexicans all claim to the territory SW of the Sabine river, which on that side was taken as the settled boundary of Louisiana, to 32° N lat.; whence the boundary-line now turns due N to Red river, and up that river to 100° W long. These boundaries were again disturbed by the revolution in Texas, its recognition as an independent state in 1837, and subsequent reception into the North American Aduency. See article TEXAS.—By recent treaties the boundary of the United States on the side of Mexico has been considerably advanced. See article MEXICO.—The extent of Louisiana to the N was, in the first instance, to be only to the Illinois; this is distinctly noted in the grant made, in 1712, by Louis XIV. to Crozat. Subsequently the Illinois was added to it; but all to the N of the Illinois remained part of Canada. On the treaty for the cession of Canada to Great Britain in 1763, this subject was fully discussed, and the result was, not merely an unconditional cession of Canada "in full right with all its dependencies," but the Illinois was also ceded. As a subordinate province of Canada, then, Louisiana extended no further than the distinct boundaries of it could be defined; it never extended further N than the Illinois; Canada was ceded to Great Britain in its fullest extent; and the official map used by France in her negotiations with Great Britain, proves that the country N and NW of the Mississippi was ceded with the prov. of Canada. At the period of the peace, in 1783, the line of demarcation between the British possessions and those of the United States, in this quarter, as far as the NW extremity of the Lake-of-the-Woods, in 49° 37' N lat., and 94° 31' W long., was indeed pretty clearly defined; but beyond this limit—owing to the geographical ignorance of both parties—it became a matter of uncertainty how or where to fix it. Both parties believed the source of the Mississippi to be in the same parallel of latitude with the NW extremity of the Lake-of-the-Woods, but at least 6° of long. W of that position; and the line of boundary was made to run from the NW extremity of the lake, due west, till it should strike the supposed source of the Mississippi, and thence in a SE direction, down the middle of that stream as far as the 31st parallel. But as the head of the Mississippi had been found, by the successive observations of Thomson, astronomer to the North-west company, and Pike, who, in 1806, by orders of the American government, ascended the river to its source, to lie in 47° 42' N lat., and 95° 8' W long., or only 27° W, and 1° 55' E of the NW extremity of the Lake-of-the-Woods, a difference of opinion arose of course between the North-west company and the American government, respecting this boundary. The Americans maintained that if the pretensions of the North-west company were to be admitted in making the line of boundary run from the NW extremity of the Lake-of-the-Woods, almost due S instead of due W, till it touch the source of the Mississippi, it would deprive them not only of the upper course of the Red river, but of nearly two-fifths of Louisiana. Commissioners had been appointed to settle this boundary, but their powers, according to the provisions of the treaty of 1814, were limited to the determining what is the middle of the river St. Lawrence, and of the lake and water communications as far as the Lake-of-the-Woods. Delay in settling the boundary westward, by gradually unfolding the value of the country, only increased the difficulty of affixing the limits, and afforded matter of serious disputes between both

countries. By convention in 1827 it was agreed that the country between the Rocky mountains and the Pacific should remain open to both countries. Under the purchase from France, the United States had no well-founded claim to any territory beyond the Rocky mountains; but that government contended, that their claim dated, not from that purchase, but from the treaty with Spain in 1819. By that treaty the northern boundary of Mexico was defined by a line running along the 42d parallel from the mountains to the Pacific, and it was accompanied by a cession of all Spanish rights to the N. It was therefore contended, on the part of the United States, that Great Britain had no title to any territory N of that parallel, on the ground that no other country but Spain had a right to such territory. These various grounds were ultimately adjusted by treaty in 1846, the tenor of which has been set forth in our article on OREGON.—With respect to the line of demarcation between our Canadian frontier and that of the United States, the point of departure on the NE was confidently laid down in the treaty of 1783 as at the source of the St. Croix; but the river which was best entitled to be regarded as the St. Croix of the treaty was not ascertained until 1798. The defective description of the boundary in that treaty was acknowledged by both parties. The north-eastern boundary of the United States depended upon ascertaining the position of high lands dividing rivers which empty themselves into the St. Lawrence from rivers which fall into the Atlantic ocean: upon such high lands the NW angle of Nova Scotia, according to the treaty, was to be found. Commissioners of boundary, under the 5th article of the treaty of Ghent, in September 1816, could not agree upon the position of the high lands, and the king of the Netherlands declared it to be his opinion, after due consideration of the statements submitted to him, that the real NW angle of Nova Scotia was unknown when the treaty of 1783 was concluded; and his final award was a compromise of the question, which the United States government refused to abide by. In 1840, Colonel Mudge and Mr. Featherstonhaugh, having examined the physical character of the territory in dispute, reported that the line claimed by America was inconsistent with both the physical geography of the country and the intentions of the language of the treaty of 1783; that they had discovered that a line of high lands did exist to the S of the one claimed by America, and to the S of the St. John, which was in accordance both with the language of the treaty and the physical geography of the country. The disputed territory now became resolved into an area of country consisting of about 7,000,000 acres of land lying between two distinct lines claimed adversely to be the high lands of the treaty, and through the centre of which the western part of the course of the river St. John flowed. Lord Ashburton was now sent out, and the treaty of Washington, as set forth in our article CANADA, was the result of his mission.

Extent and area.] In 1790 the territory of the United States extended from the frontier of Canada to that of Florida, and from the Atlantic to the Mississippi; and the population of the republic was only 3,929,827. In 1850, the territory of the United States extended from the Atlantic to the Pacific, and from the Canadian frontier to the gulf of Mexico and San Francisco; while the pop. had increased to 23,267,498. The greatest longitudinal extent of territory possessed by the United States, from E to W, namely, from the E coast of Maine to the Oregon shores of the Pacific, is 2,900 m. Its greatest extent from N to S is 1,700 m. The territory of the United States when confined to the E side of the Mississippi, was computed by Hutchins—the old geographer of the Congress—to contain 1,000,000 sq. m., or 640,000,000 of acres of land and water; which last he computed to contain 51,000,000 of acres, or 79,698½ sq. m. In this computation, however, Hutchins committed two material errors; first in taking for granted that the lakes of Canada were accurately delineated in existing maps; and secondly in extending the territory of the United States too far to the west by laying down the course of the Mississippi, the grand inland boundary, several degrees farther W than the truth. By these two material errors, he made the superficial extent of the United States, east of the Mississippi, 100,000 sq. m., or 64,000,000 of acres too much. By official returns received in 1820, it appears that the superficial area of the United States was estimated at that period at 2,364,400 sq. m. In this estimate, the two Floridas, and the territory watered by the Columbia and its numerous branches W of the Rocky mountains, were included. The area of each of these divisions was thus estimated: 1st division, or eastern territory, including the Floridas, 965,100

sq. m.; 2d division, W of the Mississippi, 1,111,300 sq. m.; 3d division, W of the Rocky mountains, 288,000 sq. m.: total, 2,364,400 sq. m. The annexation of Texas and California and the recent acquisitions from Mexico, have added considerably to this area. The following tables and computations are taken from the 7th census report of the United States:

Area of the Pacific slope, or of the region watered by rivers falling into the Pacific,	778,286 sq. m.
Area of the Mississippi valley, or of the region watered by the Mississippi, Missouri, and their tributaries,	1,237,311
Area of the Atlantic slope proper,	637,100
Area of the Atlantic slope including only the waters falling into the gulf of Mexico W of the Mississippi,	183,646
Area of the Atlantic slope including only the waters falling into the gulf of Mexico E of the Mississippi,	146,830
Total of the Atlantic slope, or of the regions whose waters fall into the Atlantic,	967,576

Total area of the United States and their territories in 1853, 2,961,153

This estimate is by Colonel Abert, and has some claims to authenticity, which cannot be urged for those more commonly used, but in a subsequent part of the introduction to the report on the census, the aggregate area of the union, given by states and territories is stated at 3,306,000 sq. m. The latter amount is the result of an examination of various official reports from the land-office and the state department. A statement given in the census report, published in 1852, raises the territory of the United States to 3,230,572 sq. m. Mr. De Bow remarks upon the estimate of 3,306,865 sq. m. as follows:—"The territorial extent of the republic is nearly ten times as large as that of Great Britain and France combined; three times as large as France, Great Britain, Austria, Prussia, Spain, Portugal, Belgium, Holland, and Denmark together; one and one-half times as large as the Russian Empire in Europe; one-sixth less only than the area covered by the 59 or 60 empires, states, and republics of Europe; of equal extent with the Roman empire, or that of Alexander, neither of which is said to have exceeded 3,000,000 sq. m. The area of all the states of Europe is given in the American census report at 3,684,882 sq. m. The areas of the different countries on the American continent are given as follows:

United States, by detailed estimate,	3,306,865 sq. m.
British America,	3,050,398
Mexico,	1,038,834
Central America,	903,551
Russian America,	394,000
Danish America (Greenland),	280,000

Total area of North America, 8,373,648

The shore line of the United States, as furnished by the coast-survey office, is as follows:

	Main shore, including bays, sounds, &c.	Islands.	Rivers to head of tide.	Total.
Atlantic coast,	6,861	6,328	6,656	19,844
Pacific coast,	2,281	702	712	3,695
Gulf coast,	3,467	2,217	3,846	9,530
	12,609	9,247	11,213	33,069

Table of distances.] The following table will show the distances between some of the leading points of the United States by the nearest mail-routes:

Pittsburg to Boston,	616 m.
New York to Mobile,	1,476
Philadelphia to Pensacola,	1,443
Boston to Nashville,	1,590
Albany to Richmond,	506

New York to Charleston,	790
New York to Cleveland (Ohio),	671
Boston to Galveston (Texas),	2,256
New York to Astoria (land route),	8,523
New York to Astoria (via Cape Horn),	17,500
New York to Astoria (via Panama),	6,260
New York to San Diego, Cal. (land route),	3,732
Charleston to Hartford,	300
New York to New Orleans,	1,640
Falls of St. Anthony to mouths of Mississippi,	2,200
Sources of Mississippi to mouths of Mississippi,	2,986
Pittsburg to New Orleans via river,	2,176

The citizen of the United States arriving at New Orleans from New York has passed over a distance more than equal to that separating London from Constantinople, or Paris from St. Petersburg. If he has taken the land route to Astoria his travel will be nearly as great as from New York to Bremen; if the water route, he will have made a voyage nearly equal to one from London to Canton.

The following table is taken from the census report of 1850:

POPULATION, ETC., OF THE UNITED STATES.

	Total pop. in 1850.	Area in sq. m.	Inhabitants to sq. m.
1 Alabama,	771,623	50,723	15.21
2 Arkansas,	209,897	52,198	4.02
3 California,	92,597	188,983	0.49
4 Carolina (North),	369,039	45,550	19.1
5 Carolina (South),	668,507	28,000	23.87
6 Columbia District,	61,687	50	1032.74
7 Connecticut,	370,792	4,760	78.06

38 Vermont,	314,120	8,000	39.36
39 Wisconsin,	305,391	53,294	5.66
Total United States,	23,191,876	3,306,865	7.01

1 ALABAMA, formed out of territory ceded to United States by S. Carolina and Georgia, was admitted into the Union Dec. 14, 1819.

2 ARKANSAS, formed from territory ceded to United States by France, was admitted into the Union June 15, 1836.

3 CALIFORNIA, formed of territory ceded by Mexico, was admitted into the Union Sept. 9, 1850.

4 CAROLINA (NORTH), one of the thirteen original states, ratified the constitution of the United States Nov. 21, 1789.

5 CAROLINA (SOUTH), one of the thirteen original states, ratified the constitution of the United States May 23, 1788.

6 COLUMBIA (DISTRICT OF), formed from territory ceded by Maryland and Virginia, was established as seat of government July 16, 1790. Alexandria retroceded July, 1846.

7 CONNECTICUT, one of the thirteen original states,

ratified the constitution of the United States Jan. 9, 1788.

8 DELAWARE, one of the thirteen original states, ratified the constitution of the United States Dec. 7, 1787.

9 FLORIDA, formed from territory ceded to United States by Spain, was admitted into the Union March 3, 1845.

10 GEORGIA, one of the thirteen original states, ratified the constitution of the United States January 2, 1788.

11 ILLINOIS, formed out of territory ceded to the United States by Virginia, was admitted into the Union December 3, 1818.

12 INDIANA, formed from territory ceded to the United States by Virginia, was admitted into the Union December 11, 1816.

14 IOWA, formed from part of the territory of Wisconsin, was admitted into the Union December 23, 1846.

15 KENTUCKY, formed from the territory of Virginia, was admitted into the Union June 1, 1792.

16 LOUISIANA, formed from territory ceded to United States by France, was admitted into the Union April 1, 1812.

17 MAINE, formed out of part of the territory of Massachusetts, was admitted into the Union March 15, 1820.

18 MARYLAND, one of the thirteen original states, ratified the constitution of the United States April 28, 1788.

19 MASSACHUSETTS, one of the thirteen original states, ratified the constitution of the United States February 6, 1788.

20 MICHIGAN, formed from territory ceded to United States by Virginia, was admitted into the Union January 28, 1837.

21 MINNESOTA TERRITORY had its territorial government established March 3, 1849.

22 MISSISSIPPI, formed from territory ceded to United States by S. Carolina, was admitted into the Union December 10, 1817.

23 MISSOURI, formed from territory ceded to United States by France, was admitted into the Union August 10, 1821.

25 NEW HAMPSHIRE, one of the thirteen original states, ratified the constitution of the United States June 21, 1788.

26 NEW MEXICO TERRITORY, formed from territory ceded by Mexico and Texas, had its territorial government established September 9, 1850.

27 NEW YORK, one of the thirteen original states, ratified the constitution of the United States July 26, 1788.

28 NEW JERSEY, one of the thirteen original states, ratified the constitution of the United States December 18, 1787.

30 OHIO, formed out of territory ceded to United States by Virginia, was admitted into the Union November 29, 1802.

31 OREGON TERRITORY had its territorial government established August 14, 1848.

32 PENNSYLVANIA, one of the thirteen original states, ratified the constitution of the United States December 12, 1787.

33 RHODE ISLAND, one of the thirteen original states, ratified the constitution of the United States May 29, 1790.

34 TENNESSEE, formed of territory ceded to United States by North Carolina, was admitted into the Union June 1, 1796.

35 TEXAS, an independent republic, was admitted into the Union Dec. 29, 1845.

36 UTAH TERRITORY had its territorial government established Sept. 9, 1850.

37 VIRGINIA, one of the thirteen original states, ratified the constitution of the United States June 26, 1788.

38 VERMONT, formed from part of the territory of New York, was admitted into the Union March 4, 1791.

39 WISCONSIN, formed from part of the territory of Michigan, was admitted into the Union May 29, 1848.

Comparative density of population.] The density of population is shown in the following table exhibiting the population and number of inhabitants to the sq. m. in various American and European countries:

Countries.	Population.	Density.
United States,	23,191,878	7.90
Canada,	1,842,265	8.31

General physical features.] "The general physical character of the country," says Professor Wilson, "is very distinctly marked—a range of mountainous land traverses the extent of the Union, from its NE limits in the state of Maine to its SW extremity in Texas. The New England states are principally occupied by disturbed portions of this range, which in some instances, as in Vermont, rises to an alt. of 6,000 ft. The area lying E of this mountain-chain, between it and the Atlantic sea-board, is occupied by formations of the secondary and tertiary series, while the older formations are developed to a vast extent in the area on the W side. The general characteristics of the vegetation of this portion of the American continent are thus sketched by Malte Brun: "From the shores of the Atlantic to the Mississippi, the United States present an immense natural forest, interspersed with open and naked plains called *prairies*, which are numerous on the W side of the Alleghanies, but rare on the E. In the country W of the Mississippi, wood is comparatively scarce; and in the arid and desert plains occupying a breadth of three or four hundred miles to the E of the Rocky mountains, only a few trees are seen on the banks of the rivers. Some naturalists have distinguished the vegetation of the United States into five regions. 1st. The region of the NE, bounded by the Mohawk and Connecticut rivers, where the firs, pines, and other evergreens of Canada prevail. 2d. The region of the Alleghanies, where the red and black oak, the beech, the balsam-poplar, the black and red birch, overshadow the plants and shrubs of Canada, at least as far as North Carolina. The valleys among these mountains are remarkably fertile in corn. 3d. The upland country, extending from the foot of the mountains to the falls of the rivers. Here the prevailing trees are the red maple, the red and black ash, the walnut, the sycamore, the acacia, and the chestnut. In the S, the magnolia, the laurel, and the orange are interspersed through the forest. Tobacco, with the indigo and cotton plants, succeed as far N as

the Susquehanna, beyond which pastures prevail 4th. The region of maritime pines, which extends along the Atlantic coast, from the sea to the first elevations. Here the long-leaved pine, the yellow pine, and the red cedar, occupy the dry grounds; and the acacia-leaved cypress, the low and moist soils, as far as the Roanoke, or even the Chesapeake. Further to the N we find the white pine, the black and Canadian fir, and the *Thuja occidentalis*. The rice-grounds commence where the tide-water becomes fresh, and terminates where it ceases to be felt. 5th. The western region, which, no doubt, admits of sub-division, but in which, generally speaking, the forest trees are, the white oak, the black and scaly walnut, the walnut hickory, the cherry, the tulip-tree, the white and gray ash, the sugar-maple, the white elm, the linden, and the western plane, which all grow to a great size upon the Atlantic coast. The United States, generally speaking, do not present the beautiful verdure of Europe; but among the larger herbs which cover the soil are the *Collinsonia*, which affords the Indians a remedy for the bite of the rattlesnake; several species of *phlox*; the golden lily; the biennial *anemone*, with several species of star-flower, of *monarda*, and of *Rudbeckia*. It is in Virginia, and in the S and SW states, that the American flora displays its wonders, and the savannas wear their perpetual verdure. There the magnificence of the primitive forests, and the exuberant vegetation of the marshes, captivate the senses by the charms of form, of colour, and of perfume. The lands to which the tide reaches on these shores, are distinguished from the lands which remain dry by the moving and compressed stalks of the *Arundo gigantea*, the light foliage of the *Nyssa aquatica*, the *tacamahaca*, and the white cedar, which perhaps, of all the trees of America, presents the most singular aspect: its trunk being composed, where it issues from the ground, of four or five enormous bearers, which uniting at the height of 7 or 8 ft., form a sort of open vault, from the summit of which rises a single straight stem of 18 or 20 ft. in height, without a branch, but terminating in a flat canopy shaped like a parasol, garnished with leaves curiously figured, and of the most delicate green. The name of *savannahs* is given to those vast prairies of the western region, which display a boundless ocean of verdure, and deceive the sight by seeming to rise towards the sky, and of which the only inhabitants are immense herds of bisons or buffaloes: the name is also given to those plains which skirt the rivers, and are generally inundated in the rainy season. The *Magnolia glauca*, the American olive, the *Gordonia argentea* with its odorous flowers, are seen here, isolated, or in groups, while the general surface exhibits a long and succulent herbage, mixed with plants and shrubs. Here the wax-myrtle appears conspicuous among many species of *azalia*, *kalmia*, *andromeda*, and *rhododendron*; the margins of the pools and the low and moist spots are adorned with the brilliant azure flowers of the *ixia*, the golden petals of the *canna lutea*, and the tufted roses of the *hydrangea*; while an infinite variety of species of the pleasing *phlox*, the retiring and sensitive *dionea*, and the flame-coloured *Amaryllis atamasco*, in those places where the tide reaches the impenetrable ranks of the royal palms, form a fanciful garble to the woods, and mark the doubtful limits where the savannah rises into the forest. The calcareous districts, which form the great portion of the region W of the Alleghanies, present certain tracts entirely divested of trees, which are called *barrens*, though capable of being rendered productive. The cause

of this peculiarity has not yet been accurately examined." "Tameless is the great fault of American scenery. It is the last thing one expects. A traveller comes from the old world filled with ideas of the sublimity and majesty which the boundless forests and vast lakes and mighty rivers of the American continent must possess and display. Nothing can be more unfounded. In imagination, indeed, he may revel in the thought of the immense solitudes that stretch on all sides around him, and may moralise on the littleness of man in the presence of his Creator's works, and the trifling part he plays upon the mighty scene; but as far as regards the direct effect of landscape upon the eye, all this, of course, does not apply. Vision has but a limited range; and if all within that range be tame and monotonous, it is but a poor consolation to reflect upon the geographical extent of country similarly characterised. Now, in the northern part of America there are few striking features; you hardly ever see a bold and rugged outline of mountain, or a naked precipitous rock. The hills are generally round and low, and covered with vegetation to the top; the colouring too, is monotonous, except for a brief season in autumn; you have not the variety produced either by sterility or by cultivation; for the purple heather and the cold grey stone of European mountain scenery are wanting (heath, I believe, being absolutely unknown), and so, of course, is the smiling richness of a fully peopled country." [Godley's Letters.]

Geology. The territory of the United States lying between the Atlantic and the Missouri, the gulf of Mexico and the great lakes, may be divided, according to Volney, into the five following regions, namely, the granitic, sandstone, the calcareous, the sea-sand, and river alluvions.—The first, or granitic region, extends from the entrance of the St. Lawrence, down to Long Island. In New Hampshire and Maine it is mixed with some sandstone and lime; but the White mountains, in New Hampshire, are granitic. The granitic region in the state of New York seems to be divided from that of sandstone by the Mohawk river. There is some granite, however, on the banks of the Susquehanna, and many blocks of the same substance at the foot of the south-west chain in Virginia.—The region of sandstone comprises the western branch of the Green mountains, in Vermont (the eastern declivity being granitic),—the Catskill mountains,—all the mountainous country of Blue ridge, Alleghany, Laurel-hill,—the Ganley mountains, at the sources of the Great Kanaway,—the two great knots, or concentrated transversal ranges of the Alleghanies,—and in general, all their chain, as far as the angle of Georgia, and the Apalaches, to the S. Towards the NW, this sandstone region terminates on the southern sides of the Genesee, Ontario, and Erie lakes, in a district of slaty schist and blue marl, which even seems to form the beds of these watery reservoirs, as is evident from the soundings taken in them, and the stones in their bottoms and on their banks.—The third region of calcareous or limy earth includes all the western or back country, extending from the western foot of the Alleghanies, as far as the alluvion of the Missouri, and NW, across the rivers and lakes, to the sources of the Saskatchewan, and the Chipewyan, or Rocky mountains, according to Mackenzie. All this country, from the Tennessee on the S, to the head-waters of the St. Lawrence on the N, has for its basis an immense stratum, or layer of limestone, disposed nearly in a horizontal direction, in laminae or plates of one or more inches thick, of a smooth, close grain, and of a gray colour. This stratum, or layer, in its turn, rests in some places on a bed of clay, in others on gravel; and covered on the surface of the ground with a layer of excellent black mould, deepest in the river bottoms, where it is sometimes 15 ft. thick; and shallowest on the rising grounds and heights, where it occasionally does not exceed six or eight inches. Besides this immense calcareous region, there are two calcareous districts worthy of notice, as forming an exception in what was denominated the sandstone region, as being unbecommed in the mountainous country, namely: the fertile valley of limestone, bounded by the lateral chains of the North mountain and the Blue ridge,—and another valley contiguous to that of Limestone, and extending along the back of Blue ridge on the east, from the gap made by the Potomac, to the vicinity of the Schuylkill, in the county of Lancaster. The region of sea-sand comprises the whole shore, from Sandy Hook, facing the granitic shore of Long Island, as far as Florida. The whole of this region is bounded inland, by a stratum or layer of talcky granite, called foliated stone, or Muscovy glass, or isinglass, which runs constantly in the direction of the coast, that is from NE to SW. This talcky ridge, everywhere—as Evans, an old American geographer, observes—marks its course by the falls which it occasions in the

drives before they reach the sea, and these falls are the extreme limits of the tide. This seam of mica, or rather talc, is from two to six m. broad. The land between it and the sea, varying in breadth from 30 to 100 m., is evidently sand brought by the ocean, originally bounded by the talciferous ridge. The alluvial region rises in gentle undulations from the talciferous ridge to the foot of the mountains of sandstone or granite. This tract is marked by its undulations, consisting in some places of isolated ridges, in others, of ridges of little hills, as in N. Carolina; and by its soil being composed of different kinds of earth and stones, sometimes jammed together, and sometimes regularly stratified, which are interrupted, or succeed each other, several times, from the coast to the mountains; but constantly exhibiting the marks of matter rolled down from the declivities above by the waters, and this is in fact the origin of all this country. This is not at all surprising. If we consider the number and magnitude of the rivers that descend from the Alleghanies to the sea; and reflect that most of them are from 1,200 to 4,000 yds. broad, and from 20 to 50 ft. deep, long before they reach their mouths; and that, in their annual inundations, they sometimes overflow the flat country, to the depth of 20 ft. It is easy to conceive, that prodigious changes must, in the lapse of ages, have been made in the interval between the mountains and the sea, by such masses of water; and that the changes must have been also much more rapid than now, when the interjacent space is much more elevated, by the depositions brought down from the high grounds, thus rendering the action of the waters less forcible. This tract of river alluvions extends from the Hudson to the Mississippi; gradually enlarging in its progress, as the mountains recede from the coast, or region of talciferous granite; covers all the delta of the Missouri; and slowly contracts its dimensions as it ascends this river, till it finally disappears above the confluence with the Illinois. It varies in breadth from 10 to 200 m. "The tertiary beds," says Professor Wilson, in his recent report, "cover an extensive area in the northern and eastern parts of the States, occupying the valleys of the St. Lawrence and of Lake Champlain, and spreading over a great portion of the surface between the great mountain-chain and the coast-line. They then stretch southward and westward, spreading over the south part of Georgia, Alabama, Mississippi, and including a large portion of Louisiana and of Texas. On the western side of the mountain-chain the alluvium and drift cover up a large portion of the older formations, of whose characters they largely partake. The cretaceous system is first seen occurring to a considerable extent in New Jersey and Delaware. It also occupies a considerable area in Virginia and in North and South Carolina, and may be followed stretching across the northern part of Georgia, and the centre portion of the states of Alabama and Missouri. It then appears to a smaller extent in Arkansas, and expands to a considerable width in Texas. The triassic is first met occurring in Massachusetts, and then is seen occupying the valley of the Connecticut river and a portion of the valley of the Hudson;—thence it passes southward through the states of New Jersey and Pennsylvania, occurring to a small extent in Maryland, and occupying a more extended area in Virginia and North Carolina. The great range of elevated rocks, chiefly of the metamorphic age, which, commencing at the NE limits of the States, extends southward in an uninterrupted line down to Alabama, forms the principal depository of the mineral wealth of the country. In the upper part of New York state, on the S shores of Lake Superior, and in the Southern and Western states, Texas, Missouri, Arkansas, and Illinois, other distinct metalliferous districts exist; but it is believed that, beyond the limits of these well-defined ranges, no regular mineral deposits of any importance occur. The enormous development of the coal-formation secure everywhere an illimitable supply of that all-important material. Distributed throughout the strata of the coal series, and equally along the range of the metamorphic rocks, are found beds of iron ore some of them of enormous extent, and many of them extremely rich in quality. Thus, in these formations, the carboniferous and the metamorphic, are stored away the two great sources of a country's wealth—coals and iron—the backbones of its industry and the basis of its commercial prosperity. Happily, these, as well as the produce of the other mineral districts, are now within the range of transport communication with the great centres of consumption; ready markets absorb even their largest supplies; the various obstacles attendant upon the establishment of new industries have been gradually overcome, and the only element now wanting for their full and successful development—is time."

Mountains.] The territory of the United States, though embracing in its wide extent several elevated ranges of great length and breadth, cannot on the whole be considered as a mountainous country. The land along the whole line of sea-coast is level for a considerable distance into the interior. The breadth of this level tract expands from 50 m. in the NE extremity, gradually as we advance to the SW, till, in the state of Georgia, it has attained an extent of nigh 200 m.; beyond this the land gradually rises into mountains, which are much more remarkable for their length and breadth

than their height. They sometimes consist of numerous parallel ridges, rising successively behind each other; at other times they run into knots; and sometimes they recede from their parallel direction into what are called spurs. These ranges, or belts of mountainous country, though receiving a vast number of different appellations, are most usually known by the name of the Alleghanies. The French and Spaniards, who first became acquainted with it in Florida, applied to this range or long plateau, throughout its whole extent, the name of Appalachian, which is still retained by a considerable river of that country. Geographers and geologists are not yet agreed as to the precise commencement and termination of the Alleghany chain. E of the Hudson, this chain is chiefly granitic in its geological structure, and is distributed in irregular groups of mountains with rounded summits. In Pennsylvania and Virginia, they assume the form of long parallel ridges, occupying a breadth of 100 m., and rising from 2,500 to 4,000 feet. In the N part of Georgia, they again break into groups of isolated mountains. See ALLEGHANIES. According to Michaux, the Alleghanies attain their highest elevation, where they separate N. Carolina from the state of Tennessee. From the sea to the base of Tyron and Hogback mountains, on the frontier of N. Carolina, the ascent is 800 ft.; and these mountains are 3,840 ft. from this base, or 4,640 ft. above the level of the sea. The Alleghany mountains are, with peculiar felicity of expression, denominated by Jefferson the spine of the United States; and divide the eastern from the western waters, and the whole of the territory, from the Mississippi to the Atlantic, into three natural divisions, materially differing from each other in climate, configuration, soil, and produce, namely: the coast, the mountains, and the western territory. The last is denominated, by the inhabitants of the coast, the *back country*. No other mountains worthy of notice occur in the United States, between the Atlantic and the Mississippi. The whole country N of the Ohio as far as the Illinois, with few exceptions, has neither hills nor mountains, especially the tract lying between the Ohio and Lake Erie, which is one large flat, or high upland level, with its opposite slopes scarcely perceptible. The highest hill in the vicinity of Pittsburg is only 460 ft. above the bed of the Ohio, and 1,200 feet above the sea.

In extent, in elevation, and in breadth, the Rocky mountains far exceed the Alleghanies of the eastern states. Their mean breadth is 200 m., and where broadest, 300 m.; and their height in several instances exceeds 12,000, and even 14,000 ft. Many of the ranges are covered with snow in the middle of June. The longitudinal extent of this chain is immense, running as far NW as 60° N lat., and perhaps to the Frozen ocean itself. It may even be considered as a continuation of the cordilleras of Mexico. See article ROCKY MOUNTAINS. The immense valley between the Alleghanies and the Rocky mountains forms the basin of the Mississippi. The country W of the Mississippi, with little exception, is yet a wilderness, inhabited by roving bands of Indians, and beyond the limits of the organized states the whites have scarcely a settlement; but the country east of that river is thickly populated, and in the highest state of cultivation. The most remarkable feature in the face of the country is the low plain, from 60 to 100 miles wide, which extends along the Atlantic coast; beyond this plain the land rises toward the interior till it terminates in the Alleghanies. The rest of the country E of the Mississippi is agreeably diversified

with hills and valleys, plains and mountains. The soil of the low country, except on the banks of creeks and rivers, is sandy, and comparatively unproductive; but the remainder has a strong, fertile soil, capable of supporting a dense population. The Pacific section is a highly varied country, abounding in wild and majestic scenery, and traversed by magnificent rivers. Much, however, of its interior is desert, and will probably never be inhabited by civilized man. The great California desert, indeed, is one of the dreariest regions of the world, the solitude being relieved only by a few oases in the neighbourhood of streams, or on the borders of its numerous lakes; on these alone is there even an aboriginal population.

Coasts.] The shores of the United States are washed by three seas: the Atlantic ocean on the E, the gulf of Mexico on the S, and the Pacific ocean on the W. The principal bays and sounds on the Atlantic border are Passamaquoddy bay, which lies between the state of Maine and the British prov. of New Brunswick; Massachusetts bay, between Cape Ann and Cape Cod; Long Island sound, between Long Island and the coast of Connecticut; Delaware bay, which sets up between Cape May and Cape Henlopen, separating the states of New Jersey and Delaware; Chesapeake bay, which communicates with the ocean between Cape Charles and Cape Henry, extending in a northern direction for 200 m., through the states of Virginia and Maryland; Albemarle sound, and Pamlico sound, on the coast of N. Carolina. There are no large bays or sounds on the coast of the gulf of Mexico. On the Pacific coast, however, there are several excellent bays, but the principal and only one necessary to mention is the bay of San Francisco, in the state of California. It is one of the finest bays in the world.

Lakes.] With the exception of Michigan and Champlain, none of the great lakes of North America lie wholly within the territory of the United States; the rest are on the N. boundary, where they form a connected chain, extending through a distance of more than 1,200 miles. The first in the chain is Lake Superior, the largest body of fresh water on the globe. Few persons are really aware of the magnitude of these great lakes; they are truly inland seas, and navigation is as dangerous, and subjected to all the vicissitudes which are connected with the navigation of the Baltic, the Black sea, or the Mediterranean. The following statement of the extent of these fresh-water seas, with the mean depth of their waters, and their elevation above the sea, is adopted by some recent authorities:—

	Mean length.	Mean breadth.
Lake Superior,	400 m.	80 m.
Michigan,	320	70
Huron,	240	80
Green bay,	100	20
Erie,	240	40
Ontario,	180	35
St. Clair,	20	14

	Area.	Mean depth.	Elevation.
Lake Superior,	32,000 sq. m.	900 ft.	595 ft.
Michigan,	22,400	1,000	578
Huron,	20,400	1,000	578
Green bay,	2,000	1,000	578
Erie,	9,500	84	555
Ontario,	6,300	500	222
St. Clair,	850	20	570

Lake Champlain, lying between Vermont and New York, is 128 m. long, and from 1 to 16 m. wide, and discharges its waters through the Sorel into the St. Lawrence. It is computed that the lakes contain above 14,000 cubic miles of water—a quantity more than five-sevenths of all the fresh water on the earth. The extent of country drained

by the lakes, from the NW angle of Lake Superior to the St. Lawrence, including also the area of the lakes themselves, is estimated at 335,515 sq. m.

Rivers.] The principal rivers of the United States may be divided into four classes. 1st, The Mississippi and its wide-spread branches, which drain the waters of the whole country included between the Alleghany and Rocky mountains; 2d, The rivers E of the Alleghany mountains, which, rising from their eastern declivity, water the Atlantic plain, and hence flow into the ocean; 3d, The system of rivers flowing into the gulf of Mexico, which may be subdivided into those flowing from the S slope of the Alleghanies, and those having their source in the NW highlands of Texas; and, 4th, Those streams on the W of the Rocky mountains, which flow into the Pacific ocean. The Mississippi rises W of Lake Superior, in N lat. 47° 47', amid lakes and swamps, dreary and desolate beyond description; and after a SE course of about 500 m., reaches the falls of the St. Anthony, where it descends perpendicularly 16 ft., and where are numerous rapids. From these falls it pursues at first a SE, and then a S direction; and, after forming the boundary between Iowa, Missouri, and Arkansas, on the W, and Wisconsin, Illinois, Kentucky, Tennessee, and Mississippi, on the E, passes through Louisiana, and discharges itself through a delta of many mouths into the gulf of Mexico. It is nearly 3,200 m. in length, and is navigable, with few obstructions, to the falls of St. Anthony. Its principal tributaries from the E are—1. The Wisconsin, which joins it between the parallels of 42° and 43° N lat;—2. The Illinois, a navigable river, which joins it near lat. 38° 40' N;—3. The Ohio, which is itself formed by the junction of the Alleghany and Monongahela rivers at Pittsburg. It flows in a SW direction for 945 m., separating the NW States from Virginia and Kentucky, and falls into the Mississippi in 37° N lat. The chief tributaries of the Ohio are the Wabash, the Cumberland, and the Tennessee, which last is formed of several streams from the W parts of Virginia and the Carolinas, which unite a little W of Knoxville, in the state of Tennessee, and runs at first SW into Alabama, where it turns and runs NW, through Tennessee into Kentucky, and joins the Ohio, 10 m. below the mouth of the Cumberland;—and 4. The Yazoo, which rises in the N part of the State of Mississippi, and, running SW, joins the Mississippi, 100 m. above Natchez. The tributaries from the West are—1. The Minnesota or St. Peter's, which joins it about 9 miles below the falls of St. Anthony, after a SE course of several hundred miles;—2. The Des Moines, which joins it near the parallel of 40° N lat., after a SE course of more than 800 m.;—3. The Missouri, which is formed by three branches, called Jefferson's, Madison's, and Gallatin's rivers, all of which rise and unite in the Rocky mountains. The whole length, from the highest point of Jefferson's river, to the confluence with the Mississippi, is, by actual course, about 2,500 m., and to the gulf of Mexico nearly 4,000 m.; during the whole of which distance there is no cataract or considerable impediment to the navigation, except at Great Falls, which are above 2,000 m. from the Mississippi. At these falls, the river descends, in the distance of 18 m., 362 ft. The principal tributaries of the Missouri are the Yellow Stone, which rises in the Rocky mountains, and joins it after a NE course of 600 m.; the Nebraska or Platte, which rises also in those mountains, and, after an E course of 800 m., joins the Missouri, in lat. 41° N; and the Kansas, which joins it near lat. 39° N, after an easterly course of more than 600 m.;—4. The Arkansas, which rises in the Rocky

mountains, and pursuing a SE course, forms, for some distance, the boundary between the Indian Territory and Texas; after which its course lies principally in the state of Arkansas, till it joins the Mississippi in 34° N lat. Its length is more than 1,300 m.;—5. The Red River, which also rises in the Rocky mountains, below Sante Fé, and, after a SE course of more than 1,000 m., falls into the Mississippi in lat. 31° N.

The principal rivers E of the Alleghanies are—1. The Connecticut, which rises in the highlands separating the United States from Canada, and running S, divides New Hampshire from Vermont, and passing through Massachusetts and Connecticut, falls into Long Island sound;—2. The Hudson, which rises W of Lake Champlain, and pursuing a S course of more than 300 m., falls into the bay of New York, after receiving numerous affluents. It is connected with Lakes Champlain, Erie, and Ontario, by means of canals from Albany, and with the Delaware by a canal from Rondout;—3. The Delaware, which rises in New York, and flowing S, separates Pennsylvania from New York and New Jersey, and falls into Delaware bay, after a course of 300 m.;—4. The Susquehanna, which also rises in New York, and, pursuing a S course through Pennsylvania, falls into the head of Chesapeake bay, near the NE corner of Maryland;—5. The Potomac, which rises in the Alleghanies, and, after forming, during its whole course, the boundary between Maryland and Virginia, falls into Chesapeake bay. It is navigable for ships of the largest dimensions to Washington, the federal capital, about 200 m. from the ocean;—6. James river, which rises in the mountains, and falls into the southern part of Chesapeake bay; and—7. The Savannah, which forms the dividing line between S. Carolina and Georgia, and falls into the Atlantic in N. lat. 32°.

The principal rivers which rise S of the Alleghanies, and fall into the gulf of Mexico, are—1. The Appalachicola, which discharges itself into Apalachee bay, in Florida. It is formed by the union of the Chattahoochee and Flint rivers, the former of which rises in the N part of Georgia, and flowing S, receives the Flint at the SW extremity of the State. During the latter part of its course, the Chattahoochee forms the boundary between Georgia and Alabama;—2. The Mobile, which discharges itself into Mobile bay. It is formed by two large rivers, the Alabama and Tombigbee, which unite near N lat. 31°, after having pursued each a separate course of many hundred miles. There is another system of rivers flowing into the gulf from the highlands of northern Texas, consisting of the Sabine, Trinidad, and Brazos. The rivers flowing from the Rocky mountains to the Pacific, consist of—1. The Columbia, which rises near N lat. 55°, and running SW, falls into the ocean in N lat. 46° 15', after a course of 1,500 m. Its principal tributaries are Clark's river, Lewis' river, and the Multnomah or Willamette, all of which join it on its l. bank. This river was discovered in 1792, and settlements were made in the neighbourhood by Americans in 1810. The mouth of the river is obstructed by flats, but vessels of 300 tons can ascend to the distance of 125 m., and large sloops farther;—2. The Sacramento and San Joaquin, emptying into the bay of San Francisco;—3. The Buenaventura, rising in the coast range of the California mountains, empties into Monterey bay;—4. The Colorado, and River Gila (which separates Mexico from the United States), flow from the mountains near Santa Fé, and would, if not received by the gulf of California, empty into the Pacific; they belong, however, to the same system of rivers. On all these

several physical features now enumerated, distinct articles will be found in our pages. The snows and fountains of this range, from the 38th to the 48th parallel, feed, with never-failing supplies, the Missouri and its powerful auxiliary streams.

Climate.] In a country so extensive as that of the United States, there must be a great variety of climate. Were latitude alone to determine the temperature of the North American climate, the southern parts would have the same temp. as Morocco, Barbary, and Egypt; the mouths of the Missouri corresponding with those of the Nile, while the New England states correspond with the S of France, the centre of Italy, and European Turkey. America, however, affords a striking instance of the fallacy of analogical reasoning, and proves that the temp. of any region is not determined by the circumstance of latitude alone, but that a number of other circumstances must be taken into account, as modifying it, namely, the high or low situation of the country,—its being bare or woody,—its aspect,—and more particularly, the quantum and direction of its currents of air. The general characteristic of the American climate is its sudden transitions from extreme heat to extreme cold.

Northern climate.] In the northern states, situated between 42° and 45°, and corresponding to the S of France and N of Spain, the ground is sufficiently covered with snow for three or four months in winter, to make the use of sledges general during that period. In New Hampshire, they reckon upon having eight cold months in the year. The therm., at that season, varies from 8° or 10° to 18° below zero. The climate of the Genesee and Oneida tracts, which lie to the S of Lake Ontario, though half a degree farther N than Albany, is much milder in winter than that of the latter on the E of the mountains, where no month of the year is exempt from frost, and where neither peaches nor cherries will ripen. The climate of the territory S of Lake Ontario is milder than that of Philadelphia, 8° farther south; for the winter there does not generally exceed three months, nor do their snows last more than two months. Carver's assertion, that the climate to the W of the Mississippi is much milder than that of the Atlantic coast in the same parallel, is to be taken with great restrictions. Beyond the parallel of 45° it is equally cold with its opposite parallels on the Atlantic coast. There winter commences early in October with great severity; and beyond this parallel, as we advance westward, the cold increases rapidly in intensity. The reason of this phenomenon can only be found in the very high elevation of this place, and the prevalence of the NW wind, which increases in intensity of cold as we advance westward, and blows from the frozen summits of the Rocky mountains. No softening winds from the gulf of California on the SW, or the Pacific on the W, exist to ameliorate or mitigate the cold; these being either chilled during their progress over these frozen summits, or arrested in their passage by the Mexican Alps or on the ranges which form their NW continuation. Near the Rocky mountains, indeed, the SW wind is more cold and violent than that which comes from the NW. The clouds rise suddenly near these mountains, and distribute their contents partially over the neighbouring plains. The same cloud will discharge hail alone in one part, hail and rain in another, and rain only in a third, and all within the space of a few miles; while at the same time it is snowing on the mountains. The intensity of the summer heat in North America is equal to that of the cold in winter, reckoning from the summer solstice, or longest day. There are few years in which the heat does not rise at Salem as high as 80° and 81° F., which is the temp. of the Persian gulf and the Arabian coast.

Central climate.] In the central states, the winters are shorter; but the cold is neither less rigorous nor less piercing. It commonly sets in about the shortest day, and continues very severe for six or seven weeks; but it begins to be felt as early as the end of October. At Philadelphia, in 39° 55' N lat. or the same parallel with Madrid, Naples, and Valencia, and 1,100 m. S of the parallel of Edinburgh, the therm. is several days every winter at 8° and 10° below 0°. Notwithstanding the motion of a tide which rises and falls 6 ft., the Delaware—here a mile broad—has been frozen over in 24 hours, and continued in that state for 20, 30, and sometimes 40 days. The summer heats are equally intense as the winter cold. From the time of the summer solstice, and even for three weeks before, the heats are so oppressive at Philadelphia, that the streets are deserted from noon to 5 o'clock, and most of the inhabitants go to rest after dinner. At this season, Reaumur's therm. will frequently rise to 25°, and even sometimes to 28° and 30°. But what renders the heat most insupportable is the almost total want of wind, particularly from three o'clock in the afternoon, and the moisture with which the air is loaded on all the coast; so that Volney says, he would infinitely prefer the heat of Grand Cairo, in Egypt, where a constant brisk wind and very dry air contribute to render the heat supportable, to that of Philadelphia. In New York, the therm. never rises higher than 86° of Fahrenheit for 24 hours together, and the mean heat is 65°.

Southern climate.] In the southern states, as Virginia, the Carolina, and Georgia, the intensity of the cold, and its duration, diminish in pretty regular proportion to the latitude. The course of the Potomac, or more precisely that of the Patuxent, forms a striking line of demarcation in this respect. Here the domain of snow terminates; and the traveller from the north, who has hitherto seen at every house a sledge, sees not another after he has

descended the steep hill which overlooks that river. This coast has, however, pretty sharp attacks of frost during the 40 days succeeding the winter solstice. On the other hand, on all the coast beyond the Potomac, the heat, from a month before the longest day, is so great, that the therm., for the space of four months, commonly rises in the afternoon to 22° or 24° R., or 83° and 86° F., notwithstanding a gentle sea-breeze. It rises even to 33° and 38° at Savannah, which is much greater than in Egypt, where 28° R., or 83° F., is the common term in the shade. From the above facts, we have a scale of variation from heat to cold, in the northern states, of 60° or 66° R.; in the middle states, the variation is 46° or 48°; and in the southern states, 32° or 34° of the same scale. But it is not merely the great intensity of cold in winter and heat in summer that characterises the climate of the American states, in the northern, middle, and southern parts: another peculiarity, and one which is very destructive of health, are the great and sudden variations along the whole tract E of the Alleghanies, and between them and the sea, but more particularly in the middle states. After a day in which the therm. has stood at 90°, it will sometimes fall in a single night to 65°, or even 60°. There are generally few nights in which a fire could be dispensed with, except in the months of July and August.

Western climate.] The climate of the western states, after making every reasonable deduction from the inflated statements of some geographers, is much more mild and genial, and much less subjected to the extremes of cold and heat, and those frequent and sudden variations which characterise the climates of the northern, middle, and southern states. As we advance westwardly from the sea to the mountains, the climate becomes gradually colder, on the same parallel of latitude, just as if we were proceeding northward. Having arrived at the summit of the Alleghanies, where the cold has attained its maximum, a change of temp. commences as we begin to descend, and continues in an opposite ratio, till it becomes warmer on the shores of the Mississippi than in the same lat. on the sea coast. In 1799, when the therm. was at Monticello at 90°, and 96° at Williamsburg, it was at 110° at Kaskaskia. Winter does not commence in the western states and territories till the approach of the solstice; and the cold weather is felt only in the six or seven weeks following; though even then it is not fixed and constant, as there are intervals of temperate and warm days. The therm. does not in general fall lower than 19° or 21° F.: the frosts which at first show themselves a few days in October disappear, but return again toward the end of November, though they do not become settled till towards January, when the brooks, small rivers, and standing waters, freeze, but seldom continue frozen over more than from 3 to 15 days. The Wabash is frozen almost every winter, but only from 3 to 15 days. Throughout Kentucky and the basin of the Ohio, snow commonly remains only from 3 to 8 or 10 days, and seldom falls deep. Spring brings on rain and showers, with NE and NW winds; but in about six weeks after the vernal equinox, the heats commence, and exist in all their intensity, during the 60 or 70 days that succeed the summer solstice. The therm. is then between 90° and 93°. At the autumnal equinox rains come on, with winds from the NE, SE, and even NW. The whole of the autumn is more serene, pleasant, and temperate, than the other two seasons; for, strictly speaking, throughout the continent of North America there is no spring. Such is the climate of Kentucky, and all the basin of the Ohio; and we must proceed as high as the Upper Mississippi, in N lat. 45°, before we perceive any sensible difference in it. Even as high up as Niagara, it is still so temperate, that the cold does not continue with any intensity more than two months. In Ohio, according to Fearon's account, the therm. ranges from 85° to 105°, in the months of July and August. On the 8 this temperature extends no farther than the 85th degree of N lat.; beyond this it is subjected to the same common law as that of the Atlantic states. The annual and mean quantity of rain that falls in the United States is much greater than in most countries of Europe, certain mountainous regions and heads of gulfs excepted. No observations have as yet been made, to determine the annual and mean quantity of rain in the western states; the following table, therefore, is restricted to the eastern:

At Charleston, according to Dr Ramsay, in 1796,	71.8
At Charleston, at a medium from 1750 to 1780,	41.75
At Charleston, from 1797 to 1807,	49.3
The greatest quantity in one of the years immediately above,	83.4
The least quantity in one of the years immediately above,	38.6
The greatest monthly quantity in any one of the 10 years immediately above,	12.9
At Williamsburg, Virginia, (Jefferson),	47
At Cambridge, near Boston, (Williams),	47.5
At Andover, in Massachusetts, (ditto),	51
At Salem, (ditto),	35
At Rutland, in Vermont, (ditto),	41
At Philadelphia, (Rush),	30

The habitual dryness of the American climate increases as we advance W and NW from the Missouri, where there frequently is not a drop of rain for six months. This is owing to the greater distance from any sea,—the superior elevation,—and the comparative want of timber, combined with the greater intensity and longer duration of the NW wind, which sweeps with unobstructed force over the naked plains. Upon the whole, it appears that more rain falls in fewer days, in America, than in Europe; and that

there are fewer cloudy days, more fair days, and quicker evaporation.

There are, strictly speaking, only three seasons throughout the whole of North America, summer, autumn or fall, and winter. Winter does not really commence till the middle of December, or a little before the shortest day; and it is preceded by several grand crises in the atmosphere, before a general change of temperature is accomplished by the NE or NW winds driving back those of the S. In February the greatest snows fall, and the most piercing cold is experienced. In March, or the approach of the vernal equinox, it is cold and tempestuous, with snowy blasts from the NW and NE. The predominance of these winds at this period, combined with the coldness imparted to the earth by the snows, retard vegetation so much that April passes away and leaves the ground as bare as March. It is not till the beginning of May,—even in Virginia, in the latitude of 36° and 37°,—that the forests are re-clothed with foliage, though the solar rays are insufferably hot from the middle of April. Hence it follows that there is no spring in America, but a sudden transition from severe cold to severe heat, with the incongruous circumstances of a freezing wind and a scorching sun, a winter-landscape and a summer-sky. When vegetation at last bursts forth, its progress is so rapid, that the flowers are quickly succeeded by the fruit, which latter also ripens more speedily than in Europe. Very perceptible changes have taken place in the American climate, and have displayed themselves in proportion as the land has been cleared. These changes were long ago observed by different writers and travellers, from La Fontaine, down to those of the present day: they are to be ascribed to the clearing of the land, and the extensive openings made through the woods. The settler has scarcely cleared a few acres of the forest, before the ground, exposed to all the action of the solar rays, acquires, at the depth of near a foot, a heat of 10° or 15° beyond that of the land still covered with wood. But a change has taken place in the climate, it is questionable still whether it has improved; because, though the winters are shorter, the summers longer, and the autumns later, yet these advantages seem to be fully overbalanced by the increasing variations of the temperature, which are more injurious to the human constitution than long-continued cold or heat.

Soil and produce.] In a country so extensive as that of the United States, every diversity of soil, not less than of climate, is to be found—from that which mocks the industry of man, up to the highest degree of fertility. Taken on a large scale, the soil may be divided into two principal parts, perfectly distinct from each other, namely: the lands between the sea and the Alleghanies, and those beyond them. The lands bordering on the Atlantic are seldom good; whilst those W of the Alleghanies, in Lower and part of Upper Louisiana, are in general not exceeded by the best in Europe, and have besides the advantage of being nearly all virgin soil, and easily cultivated. In the northern states, or those of New England, including Vermont, one description of trees predominating in each soil has originated the descriptive names of 'oak-lands,' 'chestnut-lands,' 'pine-barrens,' 'cedar-swamps,' &c., &c. The best lands produce walnut and chestnut; the next, beech and oak; the third, fir and pitch pine; the fourth, whortleberry and barberry bushes; and the last or poorest produces nothing but marshy shrubs. The soil of the New England states is, however, much more adapted for grazing than for grain; and the former is pursued with great industry and success. The soil of the central states does not materially differ from that of the northern states, unless in the back parts of the state of New York, where it is much more productive, as in the Genesee, Onondaga, and Oneida tracts. The soil of the southern states is in general better than that of the central and northern states, except on the coast, where in many places almost absolute barrenness prevails. Wheat and tobacco are the chief articles of agricultural produce; but the labour is chiefly managed by slaves, and the plantations are too extensive to be well-cultivated.

Nothing in all the western territory equals in fertility the banks of the Ohio, where the soil is a true vegetable earth, produced by the thick bed of leaves which are annually collected on the ground, and are soon converted into mould by the humidity prevalent in these sequestered forests. The best lands in Kentucky and Western Tennessee yield

abundant harvests; but there the trees do not attain a bulk or an elevation comparable to those on the Ohio. Along the banks of the Missouri, as far as the confluence of the river Platte—a space of above 600 miles by the windings of the river—the land is well timbered, and esteemed among the best in America, in point of fertility. The soil is a deep black vegetable mould. Along the Platte, it is still richer, and has the advantage of better and more abundant streams of water. Between the Osage and the Kansas rivers, the soil is perhaps preferable to any in the United States, if taken in connection with the climate, for the purpose of settling. Beyond the junction of the Platte and the Missouri, though the soil is still rich, yet the comparative scarcity of timber, combined with the want of good water—of which there is but a small quantity in the creeks, and even that brackish—oppose powerful obstacles to its settlement.

Agriculture.] The science of agriculture is less understood in the central states than in the New England states. Wheat is there the staple article. Pennsylvania is a good grazing country, where large dairies are kept. The richness of the staple compensating for the small quantity of the productions, the southern planters prefer their own agricultural system to that of the northern states, which is more conformable to the European method. The cultivation of the tobacco-plant is much more troublesome than that of wheat, and very prejudicial to the soil. More attention, indeed, has of late years been paid in the south to rearing wheat; but still, as the wheat is to be raised from an exhausted soil, the produce cannot be equal to that even of the central and northern states. The system of slave-labour is vastly prejudicial both to the population and agriculture of the southern states; and it may be remarked that, in the southern Atlantic states, the kind of agricultural produce being almost entirely regulated by foreign demand, at one time the soil is devoted almost exclusively to the cultivation of tobacco; at another, to the cultivation of rice; at another, to the cultivation of wheat and Indian corn; at another, to that of indigo; and finally, to that of sugar and cotton. The subjoined statement exhibits the number of bushels of wheat, Indian corn, and potatoes raised in each of the southern or slave states, in the year 1848, according to the estimate of the commissioner of patents:—

	Wheat.	Indian corn.	Potatoes.
Delaware.	450,000	3,850,000	300,000
Maryland.	5,150,000	8,800,000	1,000,000
Virginia.	12,250,000	38,000,000	3,500,000
North Carolina.	2,450,000	26,000,000	3,200,000
South Carolina.	1,400,000	18,500,000	4,200,000
Georgia.	2,100,000	27,000,000	2,000,000
Alabama.	1,800,000	28,000,000	2,500,000
Mississippi.	550,000	17,000,000	2,600,000
Louisiana.	...	10,600,000	1,800,000
Tennessee.	9,000,000	76,600,000	3,000,000
Kentucky.	6,500,000	65,000,000	2,200,000
Missouri.	2,000,000	38,000,000	1,200,000
Arkansas.	800,000	8,000,000	800,000
Florida.	...	1,250,000	800,000
Texas.	1,300,000	1,800,000	800,000
Total Southern states.	44,960,000	353,400,000	29,000,000
Total Northern states.	81,414,000	234,750,000	85,475,000

It will be seen by this table that in these three articles the North is not so far in advance of the South. The three leading articles of food—those upon which man most depends—are much more equally divided in the cultivation between the North and the South than is generally imagined. Taking the value of these articles, the North shows a preponderance.

SOUTHERN STATES.

	Bushels.	Price.	Value.
Wheat.	44,960,000	1 00 dol.	44,960,000 dol.
Indian corn.	353,400,000	50	176,700,000
Potatoes.	29,000,000	1 00	29,000,000
Total.			250,660,000

NORTHERN STATES.

	Bushels.	Price.	Value.
Wheat.	81,414,600	1 00 dol.	81,414,600 dol.
Indian corn.	234,750,000	50	117,375,000
Potatoes.	85,475,000	1 00	85,475,000
Total.			284,264,600

This shows an excess in favour of the North of 33,614,600 dollars in the three leading articles.

The following table shows the preponderance of the agricultural over the other interests of America, if reckoned according to the number of persons employed, according to the census of 1840:

Geographical Divisions.	Pop.	No. of Persons employed in		
		Agricul.	Com.	Manu.
New England states.	2,234,822	414,138	17,157	187,258
Middle states.	5,118,076	808,638	50,077	333,947
Southern states.	3,338,483	955,729	12,962	87,955
South-western states.	2,245,602	650,546	14,496	87,899
North-western states.	4,131,370	890,905	22,315	144,690
Total.	17,069,453	3,719,951	117,607	791,749

It appears from official tables, that the several states of the American union produced in 1840 the following quantities of agricultural produce:—Wheat, 84,823,272 bushels; oats, 123,071,341 bushels; Indian corn, 377,531,875 bushels (between four and five times the quantity of wheat produced in the same year). Of "neat cattle" there were 14,971,586; also 26,301,293 swine; 790,479,275 lbs. of cotton; and 219,163,319 lbs. of tobacco. Virginia and Kentucky were the two chief tobacco-growing states, producing upwards of 128,800,000 lbs. out of the above-named quantity. Ohio was the greatest wheat-growing state, producing in the one year named 16,571,661 bushels; and Pennsylvania the next, producing 13,213,077 bushels in the like period. New York state, however, nearly equalled the latter, its amount of wheat being 12,286,418 bushels. It is remarkable how little wheat is grown, however, in some of the states. The area of the states, estimated in 1840 at 690,747,040 acres, gave an average of between 40 and 41 acres to each person living in those states, while the average in Great Britain was little more than 3 acres to each person. According to the census of 1850, the quantity of improved land in the United States, by which is meant such only as produces crops, or adds in some way to the productions of the farmer, is reported at 118,457,622, or about $7\frac{1}{2}$ acres to each inhabitant. But, if it be assumed that two-fifths of the pop. are engaged in other pursuits than that of agriculture, the average extent of improved land to be assigned to each person working and occupying it is not less than 12 acres. In the New England states the average for the whole pop. was in 1850 a little more than 4 acres to each person; in New York and Pennsylvania, 3.9 acres; in the other middle states, the same. In Virginia the proportion was about 7 acres; in S. Carolina, 6 acres; in Kentucky, 12 acres; and in Tennessee, 5 acres. The value of the farms in the United States was returned at 3,270,733,093 dollars in 1850. The average value of land attached to farms and plantations, both improved and unimproved, is given at 10 dols. 79c. an acre.

The agricultural products of the United States, in 1844 were as follows:

Wheat.	95,607,000 bushels.
Barley.	3,672,000 —

Oats,	172,247,000	—
Rye,	26,450,000	—
Buck wheat,	9,071,000	—
Indian corn,	421,553,000	—
Potatoes,	99,493,000	—
Hay,	17,715,000 tons.	—
Flax and hemp,	22,800,000 lbs.	—
Tobacco,	161,705,000	—
Cotton,	872,107,000	—
Rice,	311,759,000	—
Silk,	396,790	—
Sugar,	210,107,000	—

From the report of the census commissioners for 1850, we find that, in the years from 1840 to 1850, the number of cattle had increased from 14,971,586, to 18,355,287, rather more than 20 per cent. During those 10 years the production of Indian corn rose from 377,531,875 bushels in 1846, to 592,326,612 in 1850, an increase of nearly 60 per cent.; while the pop. of the Union had increased only 35 per cent. As regards wheat the progress has not been so remarkable. It rose from 84,823,272 bushels in 1840, to 100,503,899 in 1850, but the crop of 1849, to which the return of 1850 relates, was far below the average in some of the largest wheat-growing states; so that we must not look upon the last decennial increase as a fair measure of the progress of agriculture. Compared with the production of Indian corn, the quantity of wheat seems so small as hardly to afford enough for home consumption; but we must remember, that throughout the greater part of the Union Indian corn is the staple article of food. The increase in the production of wheat between 1840 and 1850 was confined mainly to the Western states. In 1840, Illinois, Indiana, Michigan, and Wisconsin, contributed only 9,800,000 bushels to the general aggregate; in 1850, those four states produced upwards of 25,000,000 bushels. The total produce of all kinds of grain in the United States, in 1850, was in round numbers 108,000,000 quarters; or rather more than double the estimated annual produce of the United Kingdom, for a pop. nearly five millions larger. One remarkable item in the agricultural statistics of the United States is the large number of horses and horned cattle. In that respect, America presents a great contrast to this country. So far as can be ascertained from Parliamentary returns and other sources of information, it appears that there are altogether only about 1,500,000 horses in Great Britain. In the United States there are 4,335,358; nearly three to one. This great disparity is mainly owing, no doubt, to the wide extent of country over which the pop. is dispersed, and the consequent distance of markets. In horned cattle there is a still greater superiority. In Great Britain the total number is estimated at about 5,220,000; in the United States there are, according to the last census, no fewer than 18,355,287. Assuming that the same proportion is annually slaughtered in America as in this country, and that the carcasses are about the same weight, the consumption of animal food must be about three or four times greater than it is in England. As regards mutton the comparison is in our favour. The number of sheep in the United States was 21,721,514 in 1850; in Great Britain, taking the commonly received estimates, the number of sheep is about 40,000,000; so that the larger quantity of mutton which this indicates will partly make up for the deficient consumption of beef.

Wheat.] The most important grain crops of the United States, next to maize or Indian corn, is wheat. The entire amount produced in 1849, the year to which the last census returns apply, was 100,503,899 bushels, being an increase over that of 1839 of 15,645,378 b. In the six New England states the culture of this grain appears to be declining, as the crop has fallen off, in 10 years, 50 per cent. In the six old wheat producing states, from New York to Virginia, including both, there was an increase of 6,140,000 b., equal to 15.27 per cent. This portion of the Union

seems better adapted, from the character of its soil and climate, to the permanent culture of the grain. In the four principal states of the NW the wheat crop was augmented, during the 10 years, from about 10,000,000 to 25,000,000 b. It is from this district that the largest supplies for export are derived. The crop of 1849 was a short one, particularly in the NW states. The exports of flour, wheat, and breadstuffs from the United States, it will be seen from the tables in our paragraphs on the commerce of the United States, have declined since 1844, but it appears that the cause of this has been rather the cessation of an extraordinary demand than any diminution in the ability of the country to supply. The aggregate amount of grain convertible into breadstuff or its substitutes annually produced throughout the Union is estimated at 900,000,000 bushels, of which nearly one-half is Indian corn, while the total of all kinds required for home-consumption does not exceed 300,000,000 b. The quantity of wheat is supposed to be about 100,000,000 b. With regard to the amount of water contained in the various sorts the results obtained by Professor Beck give 16 to 20 per cent. for Alsatian, 14 to 17 per cent. for English, 12 to 14 per cent. for American, and 9 to 11 per cent. for African and Sicilian. In relation to the amount of gluten in various samples of flour from different parts of the United States and Europe, the preference is awarded to the Kabanka variety.

Rye.] The production of rye had decreased in 1849, 4,457,000 b. in the aggregate; but in New York it was greater than in 1840 by about 40 per cent. Pennsylvania, which is the largest producer, had fallen off from 6,513,373 to 4,805,160 b. During the year ending June 1, 1850, there were consumed, of rye, about 2,144,000 b. in the manufacture of malt and spirituous liquors. According to the census returns of 1840 the product of the country was 18,645,567 b.; in 1850, 14,188,637 b.

Indian corn.] The most universally cultivated crop of the United States is maize or Indian corn. It is a principal product of the farm in nearly every state of the Union. It is a favourite article of food with numerous classes of the people, and is used in all parts of the country for the subsistence and fattening of stock. According to the census of 1840, the maize crop of the United States was 377,531,875 b.; in 1849 it was 592,326,612 b., an increase equal to 56 per cent. The production of New England had advanced from 6,998,000 to 10,377,000 b., showing an increase of nearly 50 per cent. In the production of this crop no state has retrograded. Ohio, which in 1840 occupied the fourth place as a corn-producing state, now ranks as the first, Kentucky second, Illinois third, Tennessee fourth. The crop of Illinois had increased from 22,000,000 to 57,500,000 b., or at the rate of 60 per cent. in 10 years. The rate of production is from 30 to 140 b. per acre. More than 11,000,000 b. of Indian corn were consumed in 1850 in the manufacture of malt and spirituous liquors.

Oats.] The crop of oats increased from 123,071,344 b. in 1840 to 146,678,000 in 1850. It is a crop which does not enter into the foreign commerce of the country.

Barley.] In 1840 there were produced 4,161,504 bushels of barley; in 1850, 5,167,016 b. The consumption of barley in the manufacture of malt and spirituous liquors amounted in 1849 to 3,780,000 b.

Potatoes.] The production of the commonest species of this root, called 'the Irish potato,' though indigenous to the American continent, has fallen off since 1840. The crop of 1849 was 68,796,000 b., supposed to be about 18,000,000 b. less than that of 1839, although the exact truth cannot be ascertained, as, in the tables of 1840, the two varieties of the common and the sweet potato were included in the same statement. The crop of sweet or Carolina potatoes increased from an estimated quantity of 25,000,000 b. in 1839, to 38,000,000 b. in 1849.

Flax and Hemp.] The census returns of 1840 show that there were raised in the United States 96,251½ tons of flax and hemp; in 1849, 35,098 tons of hemp, and 7,715,961 lbs. of flax. The correctness of the returns as to hemp, in the seventh census, has not yet been perfectly verified. If the returns are allowed to stand without reduction, it would appear that the cultivation of hemp and flax has not materially changed since 1840. The capacity of the United States to produce flax and hemp is almost without limit. Efforts are now making to introduce Mr. Claassen's method for the separation of the fibre of flax from the woody and useless parts of the plant into the flax-growing districts of the country, and, should they succeed, the returns of the next census will prove the cultivation and manufacture of flax to be one of the most important interests in the United States.

Rice.] The production of rice increased from 80,841,422 lbs. in 1840 to 215,312,710 lbs. in 1849. The present culture of rice in the United States is chiefly confined to 8 Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas. The yield per acre varies from 20 to 60 b., weighing from 45 lbs. to 48 lbs. when cleaned. Under favourable circumstances as many as 90 bushels to an acre have been raised. The consumption of rice is increasing in the United States, and the exportation is rather decreasing.

Tobacco.] According to the census returns of 1840, the amount of tobacco raised in the United States was 219,163,319 lbs.; in 1849, 199,752,646 lbs., showing a decrease in its culture of 19,410,673 lbs. It seems probable that this crop, hitherto a most important staple, will gradually decline until it ceases to be a leading article in the agricultural and commercial statistics of the United States.

Cotton.] Cotton was raised in gardens in the U. S. before 1784, which was the first year in which it was cultivated by planters

as a crop. In 1791, the whole export of this article was under 300,000 lbs. According to the census returns, the cotton crop of 1839 was 790,479,575 lbs.; of 1849, 987,448,600 lbs.; showing an increase of 196,970,525 lbs. It appears that the culture of cotton is rapidly diminishing in Virginia and N. Carolina. In those states it is doubtless giving place to other productions of the soil. There has been a very heavy falling off also in Louisiana, and no appreciable increase in Mississippi; but the diminution in the former state, and the failure of any advance in the latter, are accounted for by the terrible inundations of the Mississippi and its tributaries. The cotton zone of the United States, Professor Wilson informs us in his special report, may be considered as extending from the Atlantic to the Rio-del-Norte, and includes the states of Georgia, S. Carolina, Alabama, Mississippi, Louisiana, those portions of the states of North Carolina, Tennessee, and Arkansas that lie below 35° N lat., all the state of Florida above the 27th parallel, and all the state of Texas between the gulf of Mexico and the 34th parallel. This region occupies an area of upwards of 450,000 sq. m., but it is estimated that, from various causes, more than two-thirds of the territory in each state mentioned is not adapted to the advantageous growth of cotton. In 1853 there were 6,300,000 acres of it under cultivation, and the total cotton crop raised amounted to 2,150,000 bales of 400 lbs. each; of which Alabama produced 750,000 bales, and Georgia 740,000 bales. The number of labourers employed to produce this crop was 787,000. There was, besides, an unemployed area of 20,300,000 acres, suitable for the growth of cotton, on which might have been grown an additional crop of 19,600,000 bales of 400 lbs. each, giving employment to 4,900,000 additional labourers. The labour is estimated at an average of one man to each 4 bales; and the land is estimated at 200 lbs. produce per acre, or 8 acres to each labourer. The cost of producing cotton necessarily varies according to the soil, climate, season, and skill employed. It appears from the most reliable estimates that it averages from 4 7/8 cents to 6 cents per lb.; and that the net profit to the producer may be taken at from 10 to 30 per cent. upon his capital. Professor Wilson states that the per cent. increase of the production of cotton in the United States has been regularly diminishing since the commencement of the present century. The total increase per cent. for the first 20 years of the century may be taken at 177, or 8.85 per annum; for the next 15 years it was 119, or 7.66 per annum; for the next 10 it declined to 63, or 3.94 per annum; for the five years ending 1850 it reached only 14, or 3 per cent. per annum. In the same time the rate of home consumption has been increasing until it has reached 9 per cent. per annum. The per cent. increase in the production of the world has fallen in the last five years as low as 1.6 per cent. per annum, while the gross percentage of increase in consumption has been just 3.8 per cent. per annum. Commercially speaking, two distinct kinds of cotton are cultivated in the states, the long staple and the short staple. The first generally commands a considerably higher price than the latter, and the finest quality, "Sea Island," often brings a price very much exceeding the top market price. The long staple yields from 75 lbs. to 150 lbs. of cleaned fibre to the acre; and the short staple averages from 150 lbs. to 250 lbs. to the acre. The cultivation of the long staple is confined to Georgia, S. Carolina, and Florida. Twenty years ago there were retained for home consumption in the United Kingdom 208,987,000 lbs. of cotton wool. Ten years ago there were retained 672,000,000 lbs. During the last ten years the increase has been less rapid, being not more than that which the following table indicates:

1839.	1,054,000 bales.
1840.	1,293,000
1841.	1,150,000
1842.	1,193,000
1843.	1,388,000
1844.	1,426,000
1845.	1,586,000
1846.	1,599,000
1847.	1,105,000
1848.	1,505,000

Yet even this rate of progression, it is clear, far outstrips the rate of extended cultivation which the capital and labour of America afford. And were it not for the supplementary supplies drawn from other quarters, there can be little doubt that are the evils of an inadequate market for the raw material would have been much more severely felt than they have yet been. The consumption of America herself, also, begins to form an important item in the general calculation. In 1839 but 173,000 bales were retained for domestic consumption in the United States; whereas there were last year retained 500,000 bales, or one fifth of the entire crop of 1848. Supposing the American demand to proceed during the next few years at anything like this rate, it is manifest that either our cotton manufacture must become factitiously contracted within dimensions wholly irrespective of its natural capabilities, or the wants of the world; or new and additional cotton-lands must be found whence the raw material may in future be derived. It may, perhaps, not be out of place here to show the great fluctuations that have hitherto marked the growth of cotton in the United States:—

Growth of Cotton in the United States.

1823—24.	509,158 bales.
1833—34.	1,205,394

VII.

1839—40.	2,177,835
1840—41.	1,634,945
1841—42.	1,683,574
1842—43.	2,378,375
1843—44.	2,050,409
1844—45.	3,894,508
1845—46.	2,100,537
1846—47.	1,778,651
1847—48.	2,347,634
1848—49.	2,728,596
1849—50.	2,096,706
1850—51.	2,855,287
1851—52.	3,015,257
1852—53.	3,262,832

[SILK.] The attempt to introduce the silk culture into the United States has been a failure. In 1840 there were produced 61,553 lbs. of cocoons; in 1849 but 14,763 lbs. The decrease dates from an earlier period than 1840.

[SUGAR.] The cultivation of sugar is carried on in Louisiana, Texas, Florida, Alabama, and to some extent in Georgia and California. It is now a very important interest, and is rapidly increasing. Hitherto the amount of sugar and molasses consumed in the United States has exceeded the quantity produced; consequently there has been no direct occasion for their exportation. In 1818, it was estimated that the sugar made on the banks of the Mississippi alone amounted to 10,000,000 lbs. In 1818, the entire crop of Louisiana was only 24,000,000 lbs.; in 1849, it had reached the enormous quantity of 236,001,000 lbs. besides about 12,000,000 gallons of molasses. According to the census of 1840, the amount of cane and maple sugar raised in 1839 was 155,100,809 lbs., of which 119,947,730 lbs. were raised in Louisiana. By the census of 1850 the cane-sugar made in the United States in 1849 was 247,581,000 lbs., besides 2,700,606 gallons of molasses; maple sugar, 84,949,888 lbs., showing an increase, in 10 years, of 126,780,077 lbs.

[Domestic animals.] According to the census returns of 1840, there were in the United States in 1839, 4,835,669 horses and mules, 14,971,686 neat cattle, 19,311,374 sheep, and 28,301,293 swine; in 1849, the numbers were 4,835,355 horses, 559,229 asses and mules, 28,860,141 horned cattle (including 6,392,044 milch-cows and 1,699,941 working), 21,721,314 sheep, and 30,316,608 swine. The number of horses has not increased with the same rapidity as other kinds of stock, for the reason that the great extension of railroads in the northern states, between 1840 and 1850, had superseded the necessity for a large proportion of those employed for travelling purposes. In the new states of the NW, into which at the date of the census railroads had not been generally introduced, the increase of horses had kept pace with the pop. There is one horse to each 5 persons in the United States. The 500,000 asses and mules returned are almost confined to the southern states, where the climate is better adapted to this animal than to the horse. In 1850, there were returned 18,355,287 milch-cows, working oxen, and other kind, being an increase of 3,353,701 for the 10 years since 1840, or about 20 per cent. The amount of butter produced in 1850 was 312,266,962 lbs., and of cheese, 105,535,219 lbs. The average value of the exports of these two articles from the United States during 10 years has been 1,000,000 d.; during the last five years of the period, it has been 1,400,000 d.

[Sheep and wool.] There was between 1840 and 1850 an increase of 2,309,106 in the number of sheep in the United States. In New England there has occurred a remarkable decrease in their number. There were in that division of the Union, in 1840, 3,811,307; in 1850 the number had declined to 2,164,452; being a decrease of 1,646,855, or 43 per cent. In the five Atlantic middle states—New York, New Jersey, Pennsylvania, Delaware, Maryland—there was a decrease from 7,402,851 to 5,641,391, equal to 1,761,460, or about 24 per cent. In Pennsylvania there was a gain, however, during this period of 155,908. While there has been a positive diminution of 3,408,000 in the states above-named, there has been an augmentation of 6,717,608 in those S of Maryland and W of New York. Ohio has gained most largely, having been returned as pasturing, in 1839, 3,028,401; in 1849, 3,942,929; an increase of 1,914,528, or nearly 100 per cent. In each of the states S and W of the lines above indicated there has been a large proportional increase in this kind of stock; and there is reasonable ground for the opinion, that the hilly lands of Virginia, N. and S. Carolina, Tennessee, and the prairies of Illinois, Iowa, and Texas will prove highly favourable for the rearing of sheep for their wool and pelts. New Mexico has the extraordinary number of 377,271 sheep, or more than 6 to each inhabitant; proving the soil and climate of that new territory to be well adapted to this description of stock, and giving promise of a large addition from that quarter to the supply of wool. But there is no reason to expect that the American Union will produce wool for export for many years to come. The average amount imported annually, from 1840 to 1850, was 14,000,000 lbs. mostly from South America, and the quantity is rapidly increasing. In 1851, the importation amounted to 32,548,693 lbs. The growth of wool in 1849 is returned at 62,789,174 lbs., being an increase on the production of 1840 of nearly 17,000,000 lbs., or about 46 per cent. In 1840 the average weight of the fleece yielded by each sheep was 1.84 lb. In 1850 it was 2.43 lb., exhibiting an increase in the average product of each sheep of 32 per cent., and thus affording an indication of a great improvement in the breeds of sheep in the United States. This improvement is

R

chiefly manifested in the returns relative to Vermont, Massachusetts, and New York. The value of the live stock in all the states and territories is returned at the considerable amount of \$43,969,420 dollars.

The aggregate of the value of the leading products of the United States in 1840 and 1850 is thus stated:—

	1840.	Value.
Wheat, bushels, . . .	84,823,272	69,840,000 d.
Corn, . . .	377,581,875	94,583,000
Cotton, bales, . . .	1,976,198	89,286,940
Sugar, lbs., . . .	154,100,809	10,500,000
Hay, tons, . . .	20,348,108	11,240,348
Dairy, . . .		59,787,008
Wool, . . .	35,862,114	11,740,634
Coals, tons, . . .	859,686	8,680,000
Total, . . .		293,497,162 d.

	Value.	1850.
Wheat, bushels, . . .	104,799,320	83,539,294 d.
Corn, . . .	591,586,053	147,896,518
Cotton, bales, . . .	2,474,314	97,969,540
Sugar, lbs., . . .	256,403,363	17,897,735
Hay, tons, . . .	13,006,394	68,026,930
Dairy, . . .	—	37,412,308
Wool, . . .	52,422,797	15,728,539
Coals, tons, . . .	4,000,000	16,000,000
Total, . . .		884,768,264 d.

The following table exhibits the number of acres of improved and unimproved land in each state of the Union in 1849; the average cash value per acre; the produce of wheat and Indian corn in bushels of each state; the number of sheep, and the value of the live stock in each state, and the total value of the home-made manufactures, all founded on the returns made to the census commissioners in 1850:—

States and Territories.	Acres of improved land.	Acres of unimproved land in farms.	Average cash value per acre.	Wheat, bushels.	Ind. Corn, bushels.	Sheep.	Value of live-stock.	Value of home-made manuf.
Maine, . . .	2,039,696	2,515,797	12 04 d.	296,236	1,760,056	451,577	9,705,726 d.	519,899 d.
New Hampshire, . . .	2,251,488	1,140,926	16 28	185,658	1,573,570	384,786	8,671,901	339,455
Vermont, . . .	2,601,409	1,524,413	15 86	535,935	2,032,896	1,014,133	12,648,226	267,716
Massachusetts, . . .	2,133,436	1,322,676	82 80	31,211	2,345,490	188,651	9,647,710	704,233

Zoology.] The wild animals of the United States nearly correspond with those of Canada. The class mammalia, in North America, as far as known, includes 118 quadrupeds, and 28 cetacea. In the countries between the Missouri and the Atlantic, their numbers are constantly decreasing, in proportion as the population is increasing. The Moose-deer is becoming very rare, and will probably be soon extirpated, as the wolf and wild boar have been in Britain. The buffaloes have almost all crossed the Mississippi and Missouri, and taken refuge in the vast plains of Louisiana. Among the animals common to North America, are six kinds of squirrels, which greatly injure the maize-plantations and the fields of wheat. The species called the Carolinian squirrel is grayish, and a little larger than the European one. Vast numbers of antelopes frequent the plains of the Missouri. Beyond the Mandan villages, and from thence to the Rocky mountains, are found large herds of those animals which, by the French and natives, are called wild or mountain-sheep; but they little resemble sheep, except in the head, horns, and feet. They are of a dun colour, except on the belly and round the rump,

where they are white. In size, they are somewhat larger than a deer; they have fine soft hair, and very large horns, especially the males. The European animals which have been naturalized in America are the cow, horse, ass, hog, sheep, goat, and dog; and these have multiplied to such a degree, as to exceed the native quadrupeds greatly in number. The finest horses in the United States are those of Pennsylvania, Virginia, and Kentucky, which, by their mien and the elegance of their form, may be compared with the best in Europe. Their beauty arises from crossing the English and Spanish breeds. Vast numbers of wild horses are to be found in Louisiana and Mexico. Merino, or Spanish sheep, have been lately introduced into the United States. Of all the domestic animals, pigs are the most numerous, in the western states: every inhabitant keeps some, and several have as many as 150 or 200. These animals never quit the forests, where they always find food, particularly in autumn and summer. Sometimes they penetrate into the recesses of the forests, and do not re-appear for several months; they are, however, accustomed to return to the plantations occasionally, by feeding

them with maize once or twice a-week. The American hare is not above 18 inches long, and seldom weighs above 2 lbs. Of amphibious animals, many different species are to be found in the lakes and rivers of the United States; the Missouri, in the lower part of its course swarms with alligators; as also a number of its tributary streams, and all the rivers of the southern states. Of serpents, Dr. Morse enumerates near 40 kinds in the United States. Virginia, in particular, produces great numbers. The rattle-snake is the most dreadful. Among the fish are most of those esteemed in Europe; and among those that are peculiar may be mentioned the large species of white trout found in the lakes, and the cat-fish in the Ohio, Mississippi, and Missouri, some of which weigh above 100 lbs. The quantity of fish in the Missouri and its tributary streams is astonishing. Charles Lucien Bonaparte has arranged the birds of the United States into 28 families, 81 genera, and 362 species, viz.: 209 land and 153 water-birds. Of these 81 genera, 63 are common to Europe and America, while 18 have no representatives in Europe. Pheasants and partridges do not exist on the American continent. Vast numbers of wild turkeys are to be met with in the western territory and Louisiana; but as a bird of sport, the turkey is no longer found on the E side of the Appalachian chain.

Mineralogy.] The gold region of the Atlantic states is chiefly confined to a narrow belt or strip of schistose rocks, extending from the Rappahannock in Virginia, to the Coosa river in Alabama, varying in width from a few yards to several miles, with its continuity often interrupted by intruding rocks of a more ancient date. The general course of this belt from Virginia to Georgia is NE and SW. After entering the latter state, it bends somewhat more to the W, until all traces of it are lost in the state of Alabama. It may be said to extend, however, to Canada on the N, gold having been found at Canaan, N.H., and in the state of Maine; also at Middle Haddam, on the Connecticut river. Up to the present time in the states of Virginia, N. and S. Carolina, and Georgia only have gold mines been worked. The gold-bearing rocks *par excellence* are the talcoes and talco-micaceous slates, rocks belonging to the metamorphic series of geologists, ranking next in age to the granite, greasy to the feel, and of all degrees of hardness and shades of colouring. Gold is also found in gneiss, sienite, hornblende, mica slate and granite. Occasionally it is disseminated throughout the rock, but most generally occurs in veins of quartz, oxide of iron, copper or iron pyrites. It is usually in a state of minute division, some of the best ores giving no external indications of the richness, the gold only becoming visible on pulverising the specimen, and carefully washing off the sand. The yield of the mines in the Atlantic states became important first in 1824, and the first supply of California gold was in 1848. The deposits from all these sources at the mines, down to July 31st, 1852, were as follow:

	Atlantic mines.	California.	Total.
1824 to 1847,	12,808,575	—	12,808,575
1848,	851,374	45,301	896,675
1849,	977,784	6,151,380	7,079,164
1850,	665,217	36,273,097	36,938,314
1851,	602,880	56,988,232	56,540,612
7 mo. 1852,	481,080	31,290,863	31,778,983
Total supply,	14,336,360	129,706,843	146,042,203

Some American and French hunters pretended to have discovered up the Washita, 30 leagues above the hot springs, silver ore of so rich a quality that 3 lbs. of ore yield 1 lb. of silver. Indications of silver are also said to occur on the Little Missouri, a small

stream that runs into the Washita.—Copper is found in the state of Massachusetts. Within a few miles of New York is a rich copper mine, yielding from 60 to 70 lbs. of fine copper per cwt. Rich copper mines are found in New Jersey along the course of the rivers Passaic and Rariton. Other mines of the same mineral occur in Virginia, and near Lake Superior; at Copper-harbour, in the state of Michigan, on the shores of Lake Superior, a company in Boston has secured what they consider the richest copper mines in the world, extending over 250,000 acres. The metallic copper is found in laminae of varying thickness in the rocks on the S shore of Lake Superior, in the Keeweenaw district, where mining operations are carried on to a considerable extent. In the porphyritic trap rocks, yellow copper ore has been found, but has not been productively worked. Associated with the metallic copper, silver has been found, sometimes in the copper or attached to the exterior of the mass, and at others in small distinct nodules or irregular masses. Lumps, or nuggets of larger size, have been met with in the debris of the rocks, accompanied by lumps of metallic copper. Zinc has been discovered in Pennsylvania. Lead appears on the banks of the Connecticut, in the state of New York, New Hampshire, Virginia, Kentucky and Tennessee. A rich and extensive vein of lead retches along the E bank of the Missouri, from the mouth of Rocky river, more than 100 m. upwards; but the most valuable lead-mines are found in Upper Louisiana, near the banks of the Marraimeg, which falls into the Missouri between St. Louis and St. Genevieve. They cover an area of more than 3,000 sq. m., and are said to be the most extensive on the globe. The number of mines is 165, in which more than 1,100 men are employed, producing annually 3,000,000 lbs., valued at 120,000 dollars.

There is abundance of iron ore, of various qualities, in the United States. In the state of Maine, the founderies are supplied with bog-ore. There are iron mines in Rhode island, and in S. Carolina. Pennsylvania also abounds in this mineral, and immense quantities of iron ore are found in various parts of Massachusetts, Maryland, Tennessee, and Kentucky. The number of furnaces, forges, and bloomeries, in 1810, was 530, and the value of the iron manufactured annually was estimated at from 12,000,000 to 15,000,000 dollars. The total production of iron in 1844 was nearly 700,000 tons. The census report of 1850 represents the capital invested in the iron manufacture in the United States, as follows:—

I. Capital invested in manufacture,	17,248,000 d.
Raw metal consumed,	7,000,000
Cost of labour,	5,066,000
Value of products,	12,740,000
Hands employed,	20,468
II. In the manufacture of cast iron:	
Capital invested in manufacture,	17,456,000 d.
Raw material,	10,846,000
Labour,	7,000,000
Value of product,	26,000,000
Number of hands,	20,607

In 1821 the value of imported iron into the United States was 1,213,000 d.—in 1850, 9,150,000 d.—in 1851, 9,000,000 d. The subjoined statements show the value of iron and articles which are wholly or in part composed of iron imported into the United States in 1851 and 1852:—

	1851.	1852.
Pg.,	950,660 d	1,142,717 d.
Railroad,	7,397,168	10,650,194
Manufacture of cast iron,	1,437,138	1,219,202
" wrought,	2,278,089	3,469,112
" not specified,	3,427,180	2,319,280
Cutlery,	1,274,838	1,607,168

Other manufactures composed of steel in part,	668,531	916,889
Old,	302,099	311,444
	17,635,507 d.	21,626,993 d.

30,000 men are employed in the United States in iron castings; 25,000 in the manufacture of pig-iron; and 14,000 in wrought iron.

According to Professor H. D. Rogers, the Eastern or Great Appalachian coal-field extends from the N limits of Pennsylvania to the central part of Alabama, having a length of about 750 m., and widening out in some places to a breadth of 180 m. He estimates the entire area at about 63,000 sq. m. The Great Western coal-field, so far as it has been well identified, occupies the largest portion of the state of Illinois, a considerable portion of Indiana, and a small area of the state of Kentucky. The late surveys of Dr. Owen have, however, shown that in Iowa and Missouri this same coal-field has a much greater extension than had been previously supposed, which would give reasonable grounds for believing that it occupies even a greater area than the Eastern or Great Appalachian field. The portion lying E of the Mississippi is assumed to be equal to the entire Appalachian field, while that lying west is fully half as much more. Following Dr. Owen's report, and taking its extreme width from Green river in Kentucky to Des Moines river in Iowa, its range will be seen, in that direction, to be between 500 and 600 m.; while in an E and W direction, across the states of Illinois and Missouri, its greatest breadth will be fully 400 m.; and from its N termination in Iowa to its present fixed S limits on the Osage river, its range is more than 800 m. Still further S in Arkansas, a coal-field of considerable extent is known to exist. In Michigan the existence of a large coal deposit has been for some time well known, though hitherto it has been allowed to remain unproductive. In Rhode island also, irregular detached masses of a highly disturbed coal formation are met with and worked economically, though only to a limited extent. As may be supposed, these enormous areas are intersected and traversed by several of the large rivers, such as the Mississippi, the Missouri, the Ohio, Illinois, Wabash, Des Moines, and others, which offer great facilities for transportation to their produce, and open up communication with even the most distant markets." [Professor Wilson's Report.] The coal product of the world for 1853 is estimated by able statisticians at 75,000,000 tons, of which amount 40,000,000 tons are produced by Great Britain, 9,000,000 by the United States, France 4,500,000, Prussia 3,500,000, Austria 700,000 tons, and Belgium 5,000,000. It will thus appear that the United States ranks second among the coal producing countries, although her mines, especially the anthracite, are but the discovery of yesterday, comparatively speaking. It is generally believed that because Pennsylvania furnishes by far the largest quantity of coal for consumption and export, that her coal fields are the most extensive in the Union: this, however, is far from being the case. Out of twelve coal-producing states, she only ranks eighth on the list, having the smallest coal area of all except four: yet by diligence, skill, and enterprise she mines at least two-thirds of the whole that is dug in the United States. The following is a table of all the coal-fields of the United States:—

States.	Area of State.	Coal area.	Proportion of coal.
1. Alabama,	50,875 sq. m.	3,400 sq. m.	1-14th.
2. Georgia,	58,200	150	1-386th.
3. Tennessee,	44,720	4,300	1-40th.
4. Kentucky,	39,015	13,500	1-31st.

5. Virginia,	61,080	21,195	1-3d.
6. Maryland,	10,829	550	1-20th.
7. Ohio,	88,350	11,900	1-8d.
8. Indiana,	34,800	7,700	1-4th.
9. Illinois,	59,130	44,000	3-4ths.
10. Pennsylvania,	44,969	16,487	1-3d.
11. Michigan,	80,820	5,000	1-50th.
12. Missouri,	60,324	6,000	1-10th.

It will be seen that the aggregate area in the 12 states is about 565,000 sq. m., of which 133,000 m., or nearly one-fourth, are composed of coal-beds. More of these beds are bituminous than anthracite; for example, all in Virginia are bituminous, and all in Pennsylvania W of the Alleghany mountains; while nearly all E of the mountains is anthracite; and this latter is the mineral that supplies the cities of Philadelphia and New York, and finds its way to tide-water for export. Some idea of the advantages of this vast mineral treasure to the country and its future importance, will be seen by the rapid increase of production, for several periods since 1840, including the imports of foreign coal:—

	Anthracite.	Cumberland.	Imports.
1840,	845,414 tons.		162,877 tons.
1845,	2,023,053	24,653 tons.	85,776
1848,	3,089,238	79,571	196,188
1850,	3,556,899	196,848	198,213
1851,	4,395,309	257,769	180,439
1852,	4,996,130	534,178	183,015
1853,	5,195,151	533,980	147,000
1854, (Estimat.)	5,600,000	650,000	175,000

The above figures only represent what was actually brought to tide-water, not taking into view the consumption of the interior. An increase of ten per cent. per annum will show a demand for anthracite coal in 1870 of 27,573,065 tons. The great scarcity in the eastern markets, and consequently high price of bituminous coal, has been the means of opening several coal fields W of the Alleghenias. Hitherto nearly all the gas coal consumed in the eastern markets have been imported from England and the British North American provinces.

Limestone is rare to the E of the Blue ridge. From Milton, near the foot of South mountain, a vein of limestone, formed like schist, and placed between layers of perfect slate never more than 10 ft. thick, but frequently less, stretches 220 m. in a NE and SW direction. This limestone, when calcined, makes excellent lime. Abundance of marbles are found in the western states; the beautiful red serpentine, of which the pipes of the Indian chiefs are made, comes from the W of the Mississippi. Plumbago or black lead, aluminous slate, and asbestos, are found in Massachusetts. Zinc occurs in Connecticut and New York. Fine basalt, talc, white and yellow quartz, gray and green *lapis ollaris*, and *petrosilex*, occur in various parts of the United States. The Indian hatchets were formerly made of fine basalt; their knives of quartz and *petrosilex*; their kettles of *lapis ollaris*, as also their tobacco-pipes; but the calumets, or pipes of peace, were made of a species of fine serpentine. Of precious stones, properly so called, there are few or none in the United States, with the exception perhaps of topazes, which are said to have been found in Connecticut. Georgia contains no minerals whatever, except a bank of oyster-shells, 90 miles from the sea. Gypsum, or plaster of Paris, is found in the state of New York; and it is supposed that immense beds of it exist on the high grounds to the west of the Washita; it is also found in several places in the vicinity of the Missouri. White pipe stone clay, marle, red and yellow ochre, and fuller's earth, are found in the northern states.—That useful mineral, salt, is found in various parts of the United States, but not yet in such quantities as fully to supply the home-consumption. The eastern states are chiefly supplied

with this necessary article from the salt springs of Onondago and Cayuga. The salt works of Onondago are in the state of New York, about 5 or 6 m. N of Onondago village, in the village of Salina, which is situated on a bank 50 ft. above the creek and marsh in front. The country in the immediate vicinity appears to be a stiff barren clay; and wood, from the vast consumption of the furnaces, has already become scarce. The salt springs are found on the margin of an extensive marsh not unlike in appearance to the salt marshes of Hoboken. The total produce of the district in 1797 was 25,474 bush.; in 1858, 5,404,524 bush. Salt springs are much more abundant in the western states than in those to the E of the Alleghanies. There are 12 in the single state of Kentucky, between the Great Sandy and Cumberland rivers. These springs are called *licks*, from the earth about them being furrowed out in a curious manner by the buffalo and deer, which lick the earth on account of the saline particles with which it is impregnated. According to all accounts, the water of these licks or salt-springs, is not so strong as sea-water; as it requires 400 gallons to make one bushel of salt, which is more by one-half than would be wanted of sea-water to produce that quantity. The springs at the Great Kanaway are far superior to any other in the western country, both with respect to the strength of the water, and the quantity and quality of the salt, as it requires only from 90 to 130 gallons of salt water to produce a bushel of that useful mineral. There are salt springs on the Wabash; and more salines to the W of the Missouri than would be sufficient to supply the wants of a pop. double that of the United States. About 4 m. below St. Genevieve is a copious salt spring, where all the salt used in the Illinois and Indiana territories is made. On the banks of the Washita, under the parallel of 34° N, are two remarkably strong salines, where the water oozes from a bed of quicksand, as saline and bitter as the water of the ocean. The country on the S of the Arkansas abounds in salines to such a degree as to induce an almost complete sterility of soil for some hundred miles in the upper part of its course. Saltpetre is also very abundant in this quarter.

The aggregate value of the whole mineral produce of the United States, in 1839-40, was as follows:—

Cast iron,	286,908 tons.	22,952,240 d.
Bar iron,	197,223 "	16,364,806 "
Lead,	31,239,453 lbs.	917,183 "
Anthracite coal,	863,489 tons.	6,406,167 "
Bituminous do.,	27,608,191 bushels.	6,900,797 "
Salt,	6,179,174 "	1,539,793 "
Granite and other stone,		3,695,884 "
Gold,		529,605 "
Other metals,		370,614 "

Aggregate value in dollars, 59,768,088

Manufactures and commerce.] The territories now composing the American confederation, were, when originally discovered, in their physical aspect and productions, vastly different from those which tempted the cupidty of the Spanish adventurers. They possessed neither gold nor silver; and the appearance of the country convinced the first settlers that they had exchanged their native home for no paradise. The difficulties of the colonists impelled them to habits of active and laborious exertion. The country, though wild and wooded, was gradually cleared; and provisions were at length procured in such abundance as not only to supply their own necessities, but even enable them to procure some of the conveniences and luxuries of their neighbours. The parent-state, at that time rising into commercial eminence, soon began to perceive that her once-despised colonies would become to her a source of extensive trade; and to secure this market for herself, prohibition succeeded prohibition; and the interests both of Britain and the colonies were often sacrificed to short-sighted maxims of policy, and the narrow views of a few selfish traders. A report laid before the house of commons in 1732, by the board-of-trade, represents New Hampshire as manufacturing a small quantity of linen-goods for its own use, and trading in naval stores, lumber, and fish. Massachusetts, it

was stated, manufactured a small quantity of woollen and linen-goods, but not nearly sufficient to supply its own consumption. Some iron-works had been established in that state, which did not supply one-twentieth of the demand, and ships were sometimes built there, and exchanged with the French and Spaniards for molasses, wines, rum, and silks. No manufacture deserving of notice existed in the state of New York in 1730; its commerce consisted in furs, whalebone, oil, pitch, tar, and provisions; and it received from the West Indies rum, sugar, molasses, cocoa, indigo, and cotton. The commerce of New Jersey, in 1730, chiefly consisted in the export of provisions to New York and Pennsylvania. Pennsylvania exported provisions and lumber, but at that time possessed no manufactures. In 1781 some coarse woollen and linen-goods were made in the last-mentioned state for home-consumption, and a few small vessels were built for the West India market. Rhode Island had no manufactures, but possessed a few iron-works: one-fourth of the metal, however, necessary for its own consumption, was not produced. Connecticut seems to have equalled, if not surpassed, any of the other provinces in trade and industry; its inhabitants exported all kinds of lumber, grain, hemp, flax, tobacco, cattle, and horses. The West Indies was their chief market, whence they received, in return, sugar, molasses, and rum. The Carolinas were in their infancy at the period referred to; but S. Carolina had begun to export rice. Such were the humble beginnings of North American commerce. England, however, had now become fully alive to its importance, and spared no pains to monopolize the whole; but in spite of restrictions imposed for this purpose, it continued rapidly to increase. The trade of the Spanish and Portuguese colonies was at this period confined, by their respective parent-countries, to particular ports, and allowed to be carried on only by particular ships; the British colonies, on the contrary, were not only allowed to trade with every part of the mother-country indiscriminately, but—what was to them of vast importance—they were not obliged to bring the whole of their exported produce to Britain. A few articles—on this account denominated 'enumerated commodities'—could be carried only to Britain; all other 'non-enumerated commodities' might be carried any where at first, and afterwards to any port of France. This privilege was the more valuable, because, among the non-enumerated commodities were several which constituted the staple of the commercial states, as grain, lumber, salt provisions, and fish. The intercourse of the colonies with each other however was always entirely free; and this single advantage of free mutual intercourse amongst a people whose numerical population was rapidly increasing, even though their foreign commerce had been more shackled than it was, could not fail of insuring future wealth and power to the Americans. The trade of the colonies consequently continued to increase annually, till their political separation from Great Britain. That event flattered them with a degree of prosperity much greater than they had ever enjoyed; but a little experience convinced them that their hopes were too sanguine. The first congress had not power to mark out such rules of national trade as were necessary to establish the general interest of the states. Each province consulted its own enolument; and none of them evinced so much patriotism as to be above enriching themselves at the expense of their neighbours. The French revolution, which desolated every continental state, and burst asunder every tie which had hitherto bound together the various members of the European commonwealth, communicated a mighty impulse to American commerce. The annihilation of the French commerce, and eventually that of all the other European states, with the exception of Britain herself, combined with the awful catastrophe of St. Domingo, which drove the remaining planters to America, was to the United States a source of wealth and prosperity. By the destruction of the Dutch commerce, she obtained the carrying-trade of Europe; and the inability of France, either to support her own colonies, or to import their produce, transferred to the United States all her colonial commerce. These advantages America enjoyed till the abuses which the Americans made of the neutral flag, led to disputes with Great Britain, which terminated in a war that deprived them of the carrying-trade and foreign commerce. America, deprived of her foreign commerce, was now necessitated to pay more than usual attention to domestic manufactures, in order to supply the absence of European but especially British manufactures. The following branches of manufacture were among the earliest established, and now supply, in several instances, the greater, and in all a considerable part of the consumption of the United States, namely: iron and ironware, manufactures of cotton, wool, and flax, hats, paper, printing-types, printed books, spirituous and malt-liquors, hemp-manufactures, gunpowder, window-glass, jewellery, clocks, lead, straw-bonnets, candles, leather, soap, and sugar. The great obstacles to the introduction and improvement of manufactures, in the present state of things, may be reduced to the three following, namely: high wages,—deficiency of capital,—and the want of the subdivision of labour. The first is occasioned by the scarcity of hands, and the great number requisite for agricultural purposes; America has not yet a surplus population for manufacturing purposes, nor can she have for a long time to come. While good land remains to be cleared and settled, people will continue to emigrate. While agriculture and clearing new lands continue to be still the most profitable way of employing capital, little of it will receive any other direction.

Cotton manufactures.] The suspension and non-intercourse acts of the American government, de-

prising the Americans of the usual market for their cotton wool, and of the accustomed importations of cotton-goods, induced them to pay redoubled attention to the cotton-manufacture, both to supply their own consumption, and to avail themselves as much as possible of the superabundance of the raw material. But this attempt was successful at first only for a short interval, being forced upon them by an unnatural state of circumstances. The return of peace crushed their cotton manufactures, and ruined nearly all the individuals concerned in these branches. The first cotton mill was erected in the state of Rhode Island, in 1791; another succeeded in the same state, in 1795; and two more, in Massachusetts, in 1803 and 1804. During the three succeeding years, ten more were erected in the state of Rhode Island, and one in Connecticut; making 15 cotton mills in all, erected before the year 1808, working at that time about 8,000 spindles, and producing 860,000 lbs. of yarn annually. In 1808, the cotton mills were increased to 87 in number, before the end of that year; 62 of which (48 water and 14 horse-mills) were in operation, and worked at that time 84,000 spindles: 25 more were in operation, in

1811, making a total of 80,000 spindles. The capital vested in these mills was estimated at 4,800,000 d.: the cotton wool employed at 8,600,000 lbs.; value, 720,000 d.: yarn spun, 2,880,000 lbs.; value, 8,240,000 d.: and persons employed, 4,000; namely, 500 men, and 3,500 women and children. It must be observed, however, that the yarn made was very coarse, and the goods manufactured of the same description. The number of bales of cotton manufactured from 1800 to 1815 were as follows: 1800, 500 bales; 1805, 1,000 bales; 1810, 10,000 bales; 1815, 90,000 bales. The whole yearly value of the manufactures of cotton, in 1815, was 24,000,000 d., and of the capital employed in manufacturing cotton by machinery, 40,000,000 d. At that period the value of the manufactures of cotton in England might be estimated at 95,000,000 d. In 1835, the cotton manufactures in America amounted to from 45,000,000 to 50,000,000 d.; while those of England might be about 170,000,000 d. The capital embarked in manufacturing cotton by machinery within the States, in 1835, was estimated at 80,000,000 d. The following table exhibits the statistics of this manufacture in 1849:

States.	No. of estab. in operation.	Capital Invested.	Value of raw material.	No. of hands employed.	Value of entire products.
Maine,	12	8,329,700 d.	1,573,110 d.	8,739	2,596,856 d.
New Hampshire,	44	10,950,500	4,889,429	12,122	8,880,619
Vermont,	9	202,500	114,415	241	196,100
Massachusetts,	218	28,455,680	11,289,809	28,730	19,712,461

Total,	1,094	74,501,081	84,885,056	92,286	61,869,184

The following list shows the amount of dividends paid by the largest cotton-spinning and weaving establishments in New Hampshire, for a series of years:

	Capital.	Years.	Dividends.
Nashua company,	1,000,000 d.	10	85 per cent.
Jackson company,	480,000	10	120 . . .
Stark company,	1,250,000	8	78 . . .
Merrimac mills,	1,200,000	2½	— . . .
Cocheco company,	1,800,000	10	40 . . .
Great Falls company,	1,500,000	9	90 . . .
Exeter company,	162,000	10	55 . . .
Salmon Falls company,	1,000,000	4	41 . . .
Newmarket company,	600,000	10	44 . . .
Portsmouth steam mills,	537,000	2½	— . . .
Columbian company,	180,000	21	133 . . .

Pittsfield company,	160,000	2 div. in 13 years.
Portsmouth company	183,000	15 40 per cent.
South Berwick,	—	—

Total, 8,612,000 d.

The average dividend is less than 6 50-100 per cent. per annum. If the difference between the cost of the stocks and their present market value be taken from the amount of the dividends, the rate will be less than 5 per cent. per annum. To show the great reduction that has taken place in the prices of cotton fabrics manufactured in the United States, and the vigilance required by our manufacturers to keep pace with their Transatlantic brethren, it may be stated that in 1828 Amoskeag

tickings were sold at 27½ c. and 23 c. a yard, the same as are now sold at 11 c. and 9½ c. Merrimac prints fell from 17 c., in 1837, to 9-28 c. in 1849. Cochecho prints, in 1837, were 14 14-100 c., and now 8 92-100 c. Printing-cloths, which in 1835 were sold at 10 c., are now at 5 c. to 6 c. The prices of Newmarket cottons in 1837 were 12, 18, and 11½ cents; they are now 7½, 6½, and 6 cents. The Boot and Suffolk drillings in 1836 were sold at 14 cents, and now at 7 cents. Neither has this reduction been sudden, but has gone on steadily to the present time. The following table indicates the price of cotton to the manufacturer, for the last fifteen years; and also the cost of the cloth per pound during the same time. It embraces two qualities of cotton as well as of cloth:

	Fine cotton.	Coarse.	Fine cloth.	Coarse.
1835,	20.5	18.36	25.29	23.13
1836,	21.6	19.38	43.9	29.23
1837,	19.8	17.44	43.86	26.92
1838,	13.78	11.55	36.19	19.67
1839,	16.5	14.53	34.06	22.66
1840,	11.	9.78	33.83	18.13
1841,	12.5	10.58	29.55	18.31
1842,	11.	9.3	26.21	16.90
1843,	8.	6.88	25.52	13.57
1844,	9.5	8.71	21.48	14.91
1845,	7.25	6.03	22.49	12.43

1846,	8.12	7.61	22.27	15.42
1847,	10.4	10.4	21.69	18.26
1848,	9.34	8.	28.62	15.12
1849,	8 to 11½	7 to 11.6 mos.	20.36 mos.	14.65

Showing that the reduction in the price of cotton has been 10 and 9 c., while in the cost of cloth it has been 15.03, and 13.47 c. a pound, or rather less, if carried out for the whole of 1849.

Woollen manufactures.] In addition to the high prices of labour, a principal obstacle to the extension of woollen manufactures in America was for a length of time the want of wool, which was also very deficient in quality, little attention having been paid to the rearing of sheep. The woollen imported for consumption in 1826 was estimated at 8,000,000 d.; and it was then calculated that about two-thirds of the clothing, including hosiery, and of the house and table-linen worn and used by the inhabitants of the United States, who did not reside in cities, was the produce of family-manufacture. Mallory estimated the capital invested in the manufacturing of woollen, in 1827, at 40,000,000 d.; and the agricultural capital invested in raising the supply of wool, at 40,000,000 d. more. The following table shows the statistics of the woollen manufactures of the United States in 1849:—

States.	No. of estab. in operation.	Cap. invested.	Value of raw material.	No. of hands employed.	Value of entire products.
Maine,	36	467,600 d.	495,940 d.	624	758,800 d.
New Hampshire,	61	2,487,700	1,267,829	2,127	2,127,745

Total,	1,391	17,416,361 d.	345,553	25,108,165 d.

Whale fishery.] The importance of this fishery to the United States will be shown by the annexed statement of the vessels employed in the trade, and the quantities of oil brought by them to each port in 1850; as also for the previous nine years. The towns now engaged in the trade are, with the exception of New York, all in the New England states, and include those ports from whence whaling was carried on in the last century, which, though first commenced by the colonists in boats and in sight of their own homes, now employ upwards of 140,000 tons of shipping in every quarter of the globe:—

	Ships.	Brigs.	Scho.	Barrels Sperm.	Barrels Whale.

1840,	165	42	6	156,445	203,441

Whalebone also forms an important item in the products of the fisheries. The quantities imported into the United States during ten years have been as follows:—

1850,	2,242,012 lbs.
1849,	1,990,640
1848,	1,756,892
1847,	3,450,124
1846,	2,728,989
1845,	3,116,100
1844,	3,015,145
1843,	1,933,931
1842,	1,399,234
1841,	1,942,886

Domestic exports.] The following table shows the value of the exports of domestic produce, &c., for the year ending 30th June, 1852:—

Produce of the sea,	2,282,342 d.
Produce of the forest,	7,864,270
Produce of agriculture and of animals,	6,823,439
Vegetable food,	19,886,688
Cotton,	87,965,732
Tobacco,	10,031,283
Hemp,	18,649
Other agricultural products,	780,753
Miscellaneous,	6,957,280
Cotton piece goods,	7,672,161
Miscellaneous,	46,815,811
Articles not enumerated,	4,073,434 d.
Total amount,	192,368,994

The subjoined table shows the value of the exports of domestic produce each year since 1840:—

Year ending on	Specie and bullion.	Produce and manuf.	Total.
1840, 30th Sept.	2,225,073	111,660,561	113,885,634
1841,	2,745,486	103,636,236	106,381,722
1842,	1,170,764	91,799,242	92,969,996
1843, 9 months, June 30,	107,429	77,686,854	77,794,283
1844, year,	185,408	99,531,744	99,717,152
1845,	844,446	98,455,530	99,299,976
1846,	423,851	101,718,042	102,141,893
1847,	62,620	150,874,844	150,937,464
1848,	3,700,412	130,203,709	133,904,121
1849,	868,874	131,710,081	132,578,955
1850,	2,046,679	134,900,223	136,946,902
1851,	18,069,680	178,620,128	196,689,808
1852,	37,437,637	184,931,147	222,368,784

The exports of the U. S. for the fiscal year from 30th June 1853 to 30th June 1854 were in detail as follows:—

I. PRODUCT OF THE SEA.

Fisheries:—	
Oil, spermacei,	1,418,845 d.
Oil, whale and other fish,	223,247
Whalebone,	1,063,703
Spermacedi candles,	112,600
Dried or smoked fish,	371,607
Pickled fish,	89,409
	3,279,413 d.

II. PRODUCT OF THE FOREST.

Wood:—	
Staves, shingles, hewn timber, &c.,	2,578,149 d.
Other lumber,	123,743
Masts and spars,	129,628
Oak bark and other dye,	118,894
Manufactures of wood,	2,234,122
Naval stores, tar, pitch, rosin, and turpentine,	1,406,488
Asbes, pot and pearl,	334,311
	6,965,345
Glueing,	133,813
Skins and furs,	796,101
	7,915,219

III. PRODUCT OF AGRICULTURE.

Of Animals:—	
Beef, tallow, hides, and horned cattle,	2,214,554 d.
Butter and cheese,	862,243
Pork (pickled), bacon, lard, and live hogs,	6,202,324
Horses and mules,	246,731
Sheep,	17,908
Wool,	26,567
	9,570,227
Vegetable food:—	
Wheat,	4,354,403
Flour,	14,783,394
Indian corn,	1,374,077
Indian meal,	709,974
Rye meal,	34,186
Rye, oats, and other small grains, and pulse,	196,824
Biscuit or shipbread,	454,020
Potatoes,	162,569
Apples,	107,283
Rice,	1,667,358
	23,793,288
Cotton,	33,363,775
Tobacco,	109,456,404
Hemp,	11,319,319
Other agricultural product:—	
Flax-seed,	7,719
Hops,	40,064
Brown sugar,	33,856
Indigo,	36
	81,663
Manufactures:—	
Wax,	113,602
Refined sugar,	275,770
Chocolate,	10,230
Spirits from grain,	141,173
... molasses,	379,381
Molasses,	17,582
Vinegar,	20,443
Beer, ale, porter, and cider,	64,577
Linseed oil,	15,468
Spirits of turpentine,	347,492
Household furniture,	714,556

Hats,	91,361
Saddlery,	48,229
Tallow candles and soap,	681,342
Snuff and tobacco,	1,671,500
Leather, boots and shoes,	673,708
Cables and cordage,	108,216
Gunpowder,	180,048
Salt,	119,729
Lead,	5,540
Coaches and other carriages,	184,497
Iron—pig, bar, and nails,	181,908
... castings,	220,430
... all manufactures of,	2,097,234
Copper and brass, all manufactures of,	108,206
Medical drugs,	227,073

8,844,404

Cotton piece goods:—	
Painted or coloured,	1,068,167
Uncoloured,	6,926,455
Cotton thread and yarn,	22,594
All manufactures of,	733,648

8,768,894

Flax and hemp:—	
Cloth and thread,	2,924
Bags and all manufactures of,	18,860
Wearing apparel,	289,733
Earthen and stoneware,	58,685
Combs and buttons,	31,395
Brushes of all kinds,	6,612
Billiard tables and apparatus,	1,673
Umbrellas, parasols, and sun-shades,	6,183
Morocco and other leather, not sold by the pound,	6,443
Fire engines and apparatus,	9,662
Printing presses and types,	32,250
Musical instruments,	52,397
Books and maps,	142,604
Paper and stationery,	172,212
Paints and varnish,	83,020
Glass,	170,561
Tin,	29,968
Pewter and lead,	14,064
Marble and stone,	47,628
Gold and silver, and gold leaf,	11,873
Gold and silver coin,	23,458,535
Artificial flowers and jewellery,	66,397
Trunks,	27,148
Brick and lime,	32,626

33,515,361

Coal,	334,003
Ice,	176,056
Articles not enumerated:—	
Manufactured,	3,788,700
Raw produce,	1,324,205

Total, 213,417,697 d.

About two-thirds of the total value, it will be perceived, is composed of the four great staple products—cotton, wheat, tobacco, and gold; but nearly one-half of the whole is composed of exports of cotton.

The subjoined table gives the export of domestic manufactured articles, and of wheat, for a period of 21 years:—

	Manufactures.	Wheat.
1831,	5,804,199 d.	10,461,715 d.
1832,	5,424,014	4,974,123
1833,	6,988,229	5,642,802
1834,	6,012,885	4,580,797
1835,	6,837,999	4,446,182
1836,	6,915,748	3,574,561
1837,	7,811,848	3,014,415
1838,	9,010,368	3,617,794
1839,	8,019,271	7,069,361
1840,	10,612,767	11,779,098
1841,	10,775,686	8,582,527
1842,	9,769,851	8,292,308
1843,	7,354,738	4,097,182
1844,	9,680,634	7,232,898
1845,	11,007,131	6,735,372
1846,	11,482,854	13,380,644
1847,	11,847,288	32,183,161
1848,	14,711,175	15,883,284
1849,	12,947,705	73,037,430
1850,	17,145,203	7,742,315
1851,	22,209,392	11,543,063
Total,	212,376,329 d.	186,740,992 d.

This statement shows an excess of manufactured articles over the exports of wheat of nearly 26,000,000 d. in the space of 21 years, being an annual aver-

age of more than 1,200,000 d. The annexed statement of the amount, value, and average price per pound of cotton exported from the United States, from 1821 to 1851 inclusive, will be found valuable, as showing the fluctuations in the price of that important staple during the last 30 years, as also to the increase both in the quantity exported and its aggregate value in foreign markets. This vast increase is to be mainly attributed to the rapid growth and prosperity of the cotton manufactories of Great Britain, as nearly two-thirds of the whole quantity exported has been brought to this country, at a cost of nearly £14,000,000.

General Imports and Exports.] In 1774, the whole of the American commerce, both exports and imports, amounted only to 13,000,000 d. In 1784, it had risen to 21,500,000 d.; in 1794, to 67,048,725 d. After the latter year it increased prodigiously, owing principally to the events arising out of the French revolution. In 1806, American commerce had reached its acme during the period of the last great war: the exports being 103,000,000 d., of which 60,283,236 d. were for foreign produce, exclusive of the freight and charges on that produce. Her imports, in the same year, amounted to 108,000,000 d., making a total of £47,500,000. This extensive foreign commerce employed upwards of 1,500,000 tons of shipping, and 100,000 sailors. The whole exports of America, in 1826, amounted to 73,000,000 d., of which 6,000,000 were domestic manufactures, being more than double the exports of domestic manufactures in 1821. The exports of domestic produce, in 1828, amounted to £11,050,000; and of manufactures to £1,600,000; the exports of foreign produce and manufactures to £5,898,750. The total value of the exports of the United States, for the year ending the 30th September, 1828, was £18,048,750. The total value of the exports of domestic produce, in the year ending 30th June, 1846, was 102,141,893 d.; of which 23,507,483 d. was carried in foreign, and the remainder in American vessels. On the other hand, the value of the imports of foreign merchandise was 121,691,797 d., of which 11,346,623 d. was afterwards exported; leaving the balance 110,345,174 d., and showing an excess of imports over exports for the year of 8,203,281 d. Of the total imports, 15,683,624 d. was brought in foreign vessels. The proportions in which the trade of the

country was carried on with the various parts of the world, in 1846, appears from the following summary of the principal items of exports to, and imports from, different countries:—

	Exports.	Imports.
Great Britain and Ireland,	45,561,987 d.	46,160,025 d.
Great Britain, dependencies of,	12,691,358	4,516,397
France and her dependencies,	14,777,266	24,380,883
South American states,	6,622,082	13,408,602
Spain and her dependencies,	8,931,310	12,376,483
Hanse towns,	4,008,315	3,149,864
Holland and her dependencies,	2,468,883	1,971,690
Belgium,	1,652,907	886,372
China,	1,178,168	6,693,581
Hayti,	1,114,013	1,642,963
Austria,	1,104,468	878,719
Denmark,	1,057,196	753,927
Italy,	942,263	1,189,766

Africa, generally,	544,457	476,045
Asia, generally,	202,223	361,968
South Seas and Pacific ocean,	278,766	153,029
Sandwich islands,	—	348,084
Marocco,	—	4,564

A pamphlet lately issued contains some useful statistical information relative to the trade and commerce of the United States, showing that as slavery recedes the prosperity of the several states increases, manufactures become established, and trade rapidly progresses. The business of the slave ports is shown to consist chiefly in exporting produce. The total amount of goods and merchandise imported into and exported from the states during 1851 with foreign countries, and of the relative value of each article of merchandise was as follows:

	Imports.	Exports.
United Kingdom,	\$19,551,643	\$24,572,086
France,	6,607,407	5,885,964
Cuba,	3,551,444	1,359,192
British North America,	1,394,400	2,503,109
Hanse Towns,	2,063,076	1,259,885
Brazil,	2,401,106	781,867
China,	1,471,905	517,768
Holland and Belgium,	922,987	1,051,496
Spain,	450,636	1,167,206
British West Indies and Guayana,	218,351	968,291
Italy, with Sardinia and Sicily,	600,130	467,597
Chili,	569,739	394,555
Argentine republic,	680,288	222,910
British East Indies,	695,070	143,414
New Granada,	144,918	633,504
Hayti,	393,743	378,602
Porto Rico,	516,735	212,212
Venezuela,	495,896	217,609
Mexico,	375,996	329,538
Austria,	152,348	520,097
Russia,	290,163	335,769
Other countries,	1,477,081	1,683,640
Total,	\$45,046,869	\$45,497,501

	Imports in 1851.	Value.

Tea,	276,794
Other goods,	1,501,919
	\$4,520,478
Total,	\$45,497,501

The following table exhibits the imports, exports, custom-house duties, average percentage of duties, and proportion of imports per head during each 10 years since the commencement of the government, and for the last five years, ending June 30, 1854. It shows the increased rate of consumption in 1850-1854, as compared with the previous 10 years, when the business of the country was managed with more discretion than since the gold discoveries in California:—

	Imports.	Exports.	Excess Imports.
1789 to 1799,	500,592,686 d.	410,987,388 d.	89,595,298 d.
1800 — 1809,	933,516,378	751,150,399	182,365,979
1810 — 1819,	819,069,374	686,958,905	232,110,469
1820 — 1829,	902,306,480	761,690,913	140,615,567
1830 — 1839,	1,266,411,483	1,054,106,465	232,305,018
1840 — 1849,	1,196,786,983	1,340,747,504	48,960,521
1850 — 1854,	1,184,071,963	810,380,606	69,122,996
Total,	6,712,655,167 d.	5,598,931,030 d.	862,161,756 d.

	Customs.	Average per cent.	Pop.	Proportion of imports to each inhabitant each year.
1789 to 1799,	50,321,235 d.	10½	3,929,937	12.74 d.
1800 — 1809,	130,957,100	13	7,233,814	13.90
1810 — 1819,	157,411,664	19½	9,638,131	8.60
1820 — 1829,	191,606,399	23.7-8	12,966,990	6.22
1830 — 1839,	213,136,902	16.6-4	17,068,453	7.43
1840 — 1849,	217,497,496	18	23,367,496	5.14
1850 — 1854,	259,162,591	22	26,511,384	8.93
Total,	1,210,063,786 d.	18		

The subjoined table shows the exports of the produce and manufactures of the U. S. in 1851, not only as a total, but also to each particular country. It will be seen that nearly two-thirds of the whole amount are sold to the British empire:—

	In American vessels.	In Foreign vessels.	To each country.
Russia,	1,187,116 d.	378,598 d.	1,465,714 d.
Prussia,	5,182	75,317	80,499

The *New York Herald* contains a very interesting table of the movements of bank-operations in the United States, and the progress of foreign trade in each of the last 26 years, during which four different tariffs have been in operation,—two protective, one compromise, and one revenue tariff. The bank-returns are made up to the 1st January, and the trade-returns up to the 30th of June each year. The table is as follows:—

	Loans and Discounts.	Imports.	Exports.
1830,	200,451,314 d.	70,876,980 d.	73,549,508 d.
1831,	215,631,784	103,191,124	81,510,563
1832,	236,165,567	101,029,366	87,176,943
1833,	267,951,684	106,118,311	90,140,433
1834,	294,119,499	126,531,332	104,336,973
1835,	365,163,834	149,895,742	121,693,577
1836,	467,506,080	189,980,036	128,663,040
1837,	535,115,709	140,969,217	117,419,376
1838,	485,631,687	113,717,404	106,486,616

			178,138,310

A close inspection of these tables shows that in most of the states of the union the domestic exports have steadily increased. In the western states of Ohio and Michigan we find a great increase in the exports to the Canadas. We find, however, that in S. Carolina and Georgia there has been an yearly decrease in exports, amounting in the latter state to 25 per cent. The greatest increase of exports has been in New York.—A Washington statistician, while estimating the comparative resources of the free and the slave-holding states of the Union, or of the western and the southern states, calculated the value of such articles of agriculture produced in the south as will always command a foreign market, for the three years, from 1847 to 1849, as follows:—

	1849.	1848.	1847.
Cotton,	95,250,000 d.	74,920,000 d.	72,905,000 d.
Tobacco,	6,616,741	8,756,360	11,008,200
Rice,	3,841,964	3,575,895	3,091,216
Naval stores,	1,624,190	1,864,319	1,798,612
	107,332,895	88,216,574	88,903,027
To the above may be added sugar and molasses,	18,417,500	16,498,000	22,746,430
Total agricultural productions of the slave states,	125,750,395	105,302,574	111,549,457

Of which there were exported to foreign countries, during the same period, according to official returns, viz.:—

	1849.	1848.	1847.
Cotton,	66,396,967 d.	61,998,294 d.	53,415,878 d.
Tobacco,	5,904,207	7,551,123	7,242,086
Rice,	2,569,362	2,331,824	3,805,896
Naval stores,	845,161	752,303	759,221
	75,615,700 d.	72,632,543 d.	65,023,051 d.

The value of imports into the U. S. for three years, distinguishing the proportions received at the north and at the south, was on the same authority, as follows:

	1849.	1848.	1847.
New York,	92,737,497 d.	94,525,141 d.	84,167,352 d.
Boston,	26,327,874	28,647,707	34,477,008
Other Northern ports,	14,716,030	14,300,043	11,161,667
Total North,	133,780,361 d.	137,372,891 d.	129,806,027 d.

New Orleans, . . .	8,077,910	9,390,439	9,222,969
Charleston, . . .	1,810,591	1,485,599	1,680,858
Other Southern ports, . . .	4,688,577	6,760,298	5,994,978
Total South,	14,577,078 d.	17,636,336 d.	16,798,805 d.

The following is a summary of the value of exports of such articles as were produced by the free states, or from abroad by the capital of such as are identified with the interests of the free states, viz:—

	1849.	1848.	1847.
Fisheries, . . .	512,177 d.	718,797 d.	795,850 d.
Oil and Whalebone, . . .	1,876,074	1,075,327	2,480,716
Candles, . . .	169,493	186,839	191,467
Skins, furs, and ginseng, . . .	839,194	770,427	811,612
Lumber and articles manufactured from wood, . . .	3,718,053	3,066,877	3,908,341
Ashea, . . .	515,608	466,477	618,000
Provisions—estimate, . . .	10,000,000	8,800,000	7,800,000
Breadstuffs, . . .	19,000,000	18,000,000	42,000,000
Miscellaneous, . . .	1,800,000	1,600,000	1,300,000
Add manufactured goods, — estimate,	38,430,484	36,584,744	59,308,986
	50,430,484 d.	48,584,744 d.	68,208,984 d.

Another authority in Washington gives the following as the value of southern agricultural products exported from the U. S. for the under-named years:—

	1845.	1847.	1849.
Naval stores, . . .	1,085,713 d.	759,221 d.	845,164 d.
Rice, . . .	2,664,991	3,605,896	2,569,362
Tobacco, . . .	8,476,370	7,242,066	5,804,207
Cotton, . . .	42,767,341	58,415,848	66,396,967
Sugar, . . .	7,235	25,483	24,906
Southern states,	54,908,549	68,048,534	75,640,606
Total exports,	102,141,893	150,637,464	182,666,956
Northern states,	47,238,344 d.	55,588,980 d.	55,026,349 d.

An able political pamphlet known to be written by a distinguished citizen of Virginia, and designed to exhibit the superiority in amount and value of the commercial products of the southern states over those of the north, and the superior commercial advantages of the south, states the exports of southern and northern domestic produce as follows:

	Cotton.	Tobacco.	Rice.
1790-1800, . . .	19,105,755 d.	49,311,260 d.	27,554,109 d.
1801-1810, . . .	88,073,560	54,773,730	21,592,690
1811-1820, . . .	186,736,604	50,061,999	23,021,144
1821-1830, . . .	256,554,394	57,788,304	20,070,244
1831-1840, . . .	528,506,110	74,457,223	22,257,791
1841-1846 (June 30), . . .	256,846,765	42,606,511	9,886,144
1846, . . .	42,767,341	8,476,270	2,564,991
1847, . . .	58,415,848	7,242,066	3,605,896
1848, . . .	61,998,294	7,551,123	3,331,824
1849, . . .	66,396,967	5,804,207	—

II. TOTALS OF SOUTHERN EXPORTS FOR THE SAME PERIODS.

	Total of cotton, tobacco, and rice.	Southern share of the other domestic exports in ratio of pop.
1790-1800, . . .	95,971,124 d.	104,071,190 d.
1810, . . .	164,439,890	136,860,890
1820, . . .	229,799,747	111,706,852
1830, . . .	334,412,742	97,488,201
1840, . . .	625,191,124	118,215,517
1845, . . .	809,338,410	71,041,660
1846, . . .	53,810,608	21,000,000
1847, . . .	64,363,830	37,786,170
1848, . . .	71,881,240	26,308,943
1849, . . .	75,000,000	34,600,000

III. TOTAL SOUTHERN AND NORTHERN EXPORTS.

	Total exports of southern produce.	Total exports of northern produce.
1790-1800, . . .	200,042,314 d.	111,248,611 d.
1801-1810, . . .	291,300,780	133,071,866
1820, . . .	341,506,599	121,194,689
1830, . . .	431,900,943	104,204,080
1840, . . .	743,407,467	149,482,642
1845, . . .	880,380,070	95,781,886

1846, . . .	74,810,803	27,231,390
1847, . . .	102,000,000	49,637,464
1848, . . .	98,068,168	34,878,935
1849, . . .	99,500,000	32,210,061

IV. IMPORTS.

	Actual imports into the South.	North.
1790-1800, . . .	344,000,000 d.	370,845,454 d.
1801-1810, . . .	232,000,000	695,662,510
1811-1820, . . .	302,000,000	606,119,274
1821-1830, . . .	135,475,117	663,158,283
1831-1840, . . .	220,382,975	1,062,295,107
1846, . . .	13,435,111	108,256,696
1848, . . .	17,628,137	137,370,791

The following is an extract from a table showing the gain of the northern imports and exports of foreign produce and exports of domestic produce, and the consequent loss upon southern capital employed in product and consumption:—

	On exports of domestic produce.	On imports.	On exports of foreign produce.
1790-1800, . . .	29,500,660 d.	152,000,000 d.	64,078,530 d.
1801-1810, . . .	22,225,666	399,680,000	100,444,140
1811-1820, . . .	65,645,323	389,119,274	58,484,811
1821-1830, . . .	121,434,546	508,158,368	158,363,687
1831-1840, . . .	66,976,981	844,298,107	128,062,554
1846, . . .	17,382,459	75,856,686	7,631,940
1848, . . .	22,150,613	97,446,596	13,875,859

Trade with Great Britain.] In 1740 the imports of New York from Great Britain were £72,390, and the exports £171,000; but in 1836 the value of the imports in that city was estimated at £23,000,000, of which probably above £11,000,000 consisted of British manufactures and commodities. The 16,000,000 of our American brethren were better customers for our manufactures than France and Germany with a pop. of 70,000,000, and as the latter countries are approaching or have reached a state in which the progress of manufactures is more strikingly displayed than that of agriculture, they are daily becoming our rivals in the manufacturing markets, while in the United States industry is still most profitably employed in developing the resources of agriculture, and we, by our advancement in non-agricultural industry and arts, materially assist them in the rapid creation of wealth from the cultivation of the soil. The following facts show the proportions in which the commercial interests of the two countries were blended: In 1821 the proportion which the trade with England bore to the foreign trade of the United States was 35 per cent.; in 1835 it was 41 per cent. The proportion which the trade with the United States bore to the foreign trade of England was 17 per cent. in 1821, and 22 per cent. in 1835. In 1805 the proportion was 28 per cent., but in the interval our aggregate trade with all other countries had increased in a greater ratio than that with the United States. The proportion of British to American shipping which entered the ports of the United States averaged 94 per cent. annually from 1822 to 1830, but from 1831 to 1836 the average was 354 per cent. Professor Tucker, of Virginia, estimated, on the basis of the census of 1840, that the annual productions of his country amounted to 965,413,650 d. The commissioner of patents made the amount in 1849, 2,330,000,000 d. Making use of the estimate of Professor Tucker as the smallest, and referring to official returns of exports, the proportion taken by Great Britain, as compared with the whole, is as follows:—

	Annual value.	Exports to Great Britain.	Total Exports.
Agriculture, . . .	664,387,597 d.	73,495,549 d.	111,059,376 d.
Manufactures, . . .	239,836,234	541,540	11,809,501
Mining, . . .	42,358,761	194	375,154
Forests, . . .	16,835,060	1,649,869	5,917,934
Fisheries, . . .	11,996,008	849,053	2,547,684
Total,	965,413,650	76,534,205	121,710,061

According to the estimate of the professor, one-seventh of the annual production in 1840 was exported, according to that of the commissioner one-twentieth. The imports of manufactured goods, according to the first, are one-fifth of those manufactured at home; and, according to the commissioner, one-tenth. The British returns give £247,000,000 as the annual value of the production of Great Britain in 1840, and £9,564,902 as the export thence to the United States. Reducing these sums to dollars, the following comparison has been made of the mutual interchange of each other's industry:—

	Great Britain.	United States
Annual production,	1,185,600,000 d.	965,413,550 d.
Annual total export,	187,200,000	131,710,981
Brute export to U. S.,	45,949,926	
U. S. export to Great Britain,		76,530,205 d.

Assuming the pop. of Great Britain at 31,000,000, and that of the United States at 20,000,000, the consumption in each of domestic and imported goods per head was as follows:—

British consumption.	United States consumption.
Home goods,	30.15
United States' goods,	2.50
Total,	32.63
Home goods,	41.73
British goods,	2.25
Total,	43.98

By which it appears that of the British consumption 8 per cent. only was produced in the United States; and of the consumption of the United States 5 per cent. was the produce of British industry.

The following table shows the value of British and Irish produce and manufactures exported to the United States; and of the amount of raw cotton imported into the United Kingdom from the United States, according to British official returns, between the years 1820 and 1853:—

	Declared value.	Cotton imported.
1820,	—	80,929,174 lbs.
1821,	—	93,470,745
1822,	—	101,081,766
1823,	—	142,532,112
1824,	—	92,187,662
1825,	—	129,908,699
1826,	—	180,853,269
1827,	£7,018,272	216,934,812
1828,	5,810,315	151,752,289
1829,	4,923,415	187,187,306
1830,	6,132,346	200,855,358
1831,	9,053,583	219,323,628
1832,	6,408,272	219,756,753
1833,	7,879,699	287,506,758
1834,	6,844,089	269,203,075
1835,	10,568,455	294,456,812
1836,	12,425,605	289,613,692
1837,	4,695,225	320,651,716
1838,	7,382,760	431,457,888

Currency and Banks. All the banks now established in the United States are joint-stock companies incorporated by law, with a fixed capital, a portion of which is sometimes vested in real estate, but this is not obligatory. The business of these institutions is receiving money on deposit, in issuing bank-notes, and in discounting bills of exchange. The capital of the establishments existing in 1850, amounted to nearly 110,000,000 d. The total amount of the paper currency on 1st January 1850, was estimated at £2,500,000 d. There are no means of ascertaining exactly what portion of this sum consisted of the productive means. In 1850, the whole number of banks and branches

in operation in the Union was 824. The total capital paid was 217,317,211 d.

RESOURCES.	
Loans and discounts,	564,204,078 d.
Stocks,	20,606,759
Real estate,	20,582,180
Other investments,	11,949,568
Due by other banks,	41,631,853
Notes of other banks,	16,303,245
Specie funds,	11,603,289
Specie,	45,379,545
LIABILITIES.	
Circulation,	121,366,520 d.
Deposits,	100,686,885
Due other banks,	26,717,450
Other liabilities,	8,895,809

The circulation and deposits,	240,953,471
Aggregate immediate means,	114,917,234

The Eastern states had 297 banks with 61,882,154 d. capital.	
Middle states	293
Southern states	87
South-western states	73
Western states	74

The circulation and deposits in the several sections were as follows:—

	Circulation.	Deposits.
Eastern,	29,000,000 d.	14,923,000 d.
Middle,	41,862,000	64,764,000
Southern,	26,220,000	9,678,000
South-western,	20,819,000	16,334,000
Western,	14,635,000	5,586,000

A report of the secretary of the treasury has lately been published, giving an account of the condition of the banks in the United States for a series of years. The following table shows some curious facts:—

Banks.	Capital.	LIABILITIES.		Total.
		Circulation.	Deposits.	
	Dollars.	Dollars.	Dollars.	Dollars.
1834,	506	260,095,844	71,957,299	73,668,986
1835,	704	261,250,337	100,815,209	83,081,865

1846,	707	349,901,307	42,012,095	10,699,090
1847,	715	351,437,188	35,132,516	21,219,865
1848,	751	389,664,140	46,369,765	20,530,955
1849,	782	372,540,716	43,619,398	23,871,575
1850,	824	406,363,690	45,379,345	20,582,166
1851,	879	420,422,056	48,671,048	30,219,794
1852,	992	527,863,521	53,167,429	21,256,448
1853,	1098	604,129,867	64,011,288	21,716,716
1854,	1208	684,058,440	59,410,253	22,367,472

It appears by this that the number of banks has nearly doubled since 1844; their capital has increased 40 per cent. their circulation nearly 200 per cent., and their deposits over 100 per cent., while their specie has increased only 18 per cent., and their real

estate has actually diminished. Their notes, &c., in 1854, were 684,000,000 against 806,000,000 in 1844.

For the ten years ending with 1850, as between Europe and the United States, the exports of specie were far below the imports, as the subjoined table will demonstrate:—

	Imported.	Exported.
1841.	4,968,633 d.	10,094,383 d.
1842.	4,087,016	4,813,539
1843.	22,820,835	1,820,791
1844.	5,830,429	6,454,214
1845.	4,070,248	8,806,498
1846.	3,777,732	8,908,368
1847.	24,121,280	1,907,739
1848.	6,360,224	15,841,620
1849.	6,651,240	5,404,648
1850.	4,628,792	7,522,994
	86,838,992 d.	65,011,640 d.

[Coins.] The metallic currency of the United States forms scarcely one-tenth part of the amount of the general circulation. Its copper coinage consists of a *half-cent*—the circulation of which is studiously prevented—and a *cent*, or *pesny*, as it is termed, in value about the same as the English halfpenny, 100 of which go to the dollar. The silver is composed of 5 cent and 10 cent pieces, and 25 and 50 cent pieces, the *quarter* and the *half-dollar*; the latter of which are comparatively numerous. The gold coinage is the *quarter eagle* = 250 cents; the *half eagle* = 500 cents; and the *eagle* = 1,000 cents. The American dollar contains 37½ grains of pure silver, or 416 grains of standard silver. The American eagle of the old coinage, previous to the 31st of July, 1834, contained 247½ grains of pure gold. The American eagle of the new coinage contains 232 grains of pure gold. The British sovereign, when coined, contains 113 grains, and 18-1214th parts of a grain of pure gold, worth, according to our present mint valuation, 4.87 7-120th dollars. The Spanish doubloons should, according to the regulations which have nominally prevailed since the year 1773, contain 376 grains of pure gold, which would, at the American mint valuation, be worth 16 dollars 20 cents; but, according to assays made at the London and Philadelphia mints, previous to the year 1829, Spanish doubloons contained only from 360 to 382 4-10th grains of pure gold. This would make their average value 16.56½ ds.

The following are the respective values, in dollars and cents, of the foreign coins circulating in the U. S. as fixed by law in assessing duties:—

	d.	c.
Franc of France and Belgium,	0	18 6-10
Florin of the Netherlands,	40	
Florin of Southern states of Germany,	40	
Guilder of Netherlands,	40	
Livre Tournois of France,	13½	
Lira of the Lombardo-Venetian kingdom,	16	
Lira of Tuscany,	16	
Lira of Sardinia,	18	6-10
Milrea of Portugal,	1	12
Milrea of Azores,	82½	
Marc Banco of Hamburg,	35	
Pound sterling of Great Britain,	4	84
Pound sterling of British provinces of Nova Scotia, New Brunswick, Newfoundland, and Canada,	4	00
Dollars of Mexico, Peru, Chili, and Central America,	1	00
Pagoda of India,	1	84
Real Vellon of Spain,	5	
Real Plate of Spain,	10	
Rupce (Company's),	44½	
Rupce of British India,	44½	
Specie dollar of Denmark,	1	06
Rixdollar or thaler of Prussia and the Northern states of Germany,	69	
Rixdollar of Bremen,	78½	
Rouble, silver, of Russia,	76	
Specie dollar of Sweden and Norway,	1	06
Florin of Austria,	48½	
Ducat of Naples,	80	
Ounce of Sicily,	3	40
Tael of China,	1	48
Leghorn livres,	16	

The amount of the U. S. coinage up to August 1853 was—

	Gold.	Silver.	Total.
1793 to 1820,	7,431,845 d.	10,898,431 d.	18,420,276 d.
1821 to 1851,	172,752,745	68,972,977	289,725,722

In the 5 years from 1850 to 1854 inclusive, the total average of gold was 268,750,915 d.; of silver, 21,646,893 d.; and of copper, 304,433 d. And the total coinage of the republic up to Jan. 1, 1855, was 442,884,650 d., of which 80 per cent. was gold; and 76 per cent. of this gold coinage was the result of the last 5 years.

[Commercial navy.] The total merchant tonnage of the United States, corresponding to the British registered tonnage, amounted, in 1826, to 1,534,000 tons, being an increase of 11,070 tons within the year, and more than double the increase in any one

of the twelve preceding years. That of the United Kingdom, in 1827, was 2,105,605 tons. The aggregate tonnage of the Union for 1829 was 1,260,798 tons, of which 650,143 was employed in foreign trade, and 610,655 in coasting trade and fishery. In 1831 the amount of tonnage was stated at 1,191,776, of which the registered tonnage was 576,475 tons, and the enrolled 615,301. The amount of the mercantile tonnage in 1845 was 2,417,002 tons, of which the enrolled and licensed tonnage amounted to 1,321,829 tons. The latter tonnage is almost exclusively engaged in the coasting-trade, or in the cod or mackerel fisheries; it also includes the steamers on the rivers. In 1848, the sum total of the commercial tonnage was 3,154,051 tons, being an increase of 56 per cent. in 10 years. In 1852-3, the tonnage had reached 4,407,010 tons. The return of clearances from the ports of the United States shows that foreigners have a large share in the carrying trade of that country. The total clearances for the fiscal year ending 30th June, 1850, as appears by the report of the register of the treasury, was 4,361,002. The total number of vessels was 18,195; of which 8,379 were American, and 9,816 foreign. The tonnage of those cleared in New York was 2,149,096; the number of American vessels being 3,610; of foreign, 3,693. From California, 180,128 tons was the total tonnage, in 623 vessels, of which 320 were foreign, and 303 American. The returns for 1850, compared with those of 1849, were as follows:—

	1850.	1849.
Tonnage—American,	2,632,786	2,731,734
Foreign,	1,728,214	1,675,709
Vessels—American,	8,379	11,466
Foreign,	9,816	8,847
Deduct tonnage of California, 180,128 tons, from the aggregate Foreign and American this year, and we have a balance of		4,180,874
Compare with last year,		4,429,433
Showing a falling off of		248,559
Also a decrease of American tonnage of		120,936
An increase of foreign tonnage,		52,503

The number of men and boys clearing as crews was as follows:—

	Crews.	Total.	1849.	Total.
Men (American vessels),	102,888		109,249	
Boys,	3,865		3,422	
	106,753		112,771	
Men (foreign vessels),	86,896		89,579	
Boys,	2,232		2,704	
	89,128		92,283	
	195,871		205,054	

[Steam navigation] The first steam-boat successfully used in the United States was constructed by Robert Fulton in 1807. It plied on the Hudson river, with an engine of only 18 horse-power, and made the passage between Albany and New York (from 180 to 185 m.) in 33 hours. Her engine was manufactured in England by Boulton and Watt. In March 1811, the first steam-boat built by Fulton, in Pittsburg, called the New Orleans, was launched on the Ohio, and commenced, in December of the same year, to make regular trips between Natchez and New Orleans. The time required to make the trip of 300 m. between the two places was 3 days down stream, and 7 to 8 days up. The boat performed in a year only thirteen trips up and down, or 7,800 m. On the 6th of May 1817, the first steam-boat went up the Mississippi and Ohio, from New Orleans to Louisville, and arrived there on the 30th of May, or in 25 days. In 1818, the first steam-boat was launched on the great North-western lakes; in 1835, they were navigated by 25 steam-boats; in 1838, the number of steam-boats was 70. The largest ship-yards for building steam-boats, are at New York, Philadelphia, Baltimore; at Louisville, New Albany, Cincinnati, Pittsburg, and St. Louis. The total steam-tonnage of the United States in 1851 was 563,607 tons. In 1848, there were 8 lines of steam-packets with 28 steam-ships, and 58 regular lines of sailing vessels, going to almost every part of the world, comprising 186 vessels, beside 50 line or 179 vessels whose times of sailing were not regular. In addition to these, there are now the Canard line, the Collins line, the New York and Liverpool, New York and Bre-

men. New York and Havre, two Havana, Aspinwall's Panama and Oregon, and the Charleston and Havana lines, comprising some of the largest and finest steam-ships. There are, beside, 29 transportation lines, 8 lines of propellers, numbering 22 vessels; and 99 lines of steam-boats.

[*Canals.*] It appears from official statistics that, on the 1st of January 1843, the extent of canals in actual operation amounted to 4,333 m., and that there were then in progress 2,359 m., a considerable portion of which has since been completed, so that it is probable that the actual extent of artificial water communication now in use in the United States considerably exceeds 6,000 m. The average cost of executing this prodigious system of artificial water-communication was at the rate of £2,432 per mile, so that 6,000 m. would have absorbed a capital of above £32,000,000. This extent of canal-transport, compared with the pop., exhibits in a striking point of view the activity and enterprise which characterize the American people. In the United States there is a mile of canal-navigation for every 5,000 inhabitants, while in England the proportion is 1 to every 9,000 inhabitants, and in France, 1 to every 13,000. The ratio, therefore, of this instrument of intercommunication in the U. S. is greater than in the United Kingdom, in proportion to the pop. as 9 to 5; and greater than in France in the ratio of 3 to 5.

[*Railways.*] In 1840, railways had been introduced into 24 states of the Union; and the number of railways, either completed or in progress, were 179, with a total length of 9,978 m., of which however, only 3,490 m. was in operation or nearly completed. An official statement concerning the railroads of the United States gives the number of miles of railroad in operation on the 1st of January 1853, as 10,814 m. and in course of construction, 10,898 m. Many of the new lines projected have been substituted for plans for the construction of canals and turnpike roads. The cost of the railroads in the six New England states is about £9,000 per mile; in New York, Pennsylvania, and Maryland it is about £8,000. In the southern states, and in the valley of the Mississippi, it is about £4,000 per mile. The railroad system in the U. S. was commenced in 1820. The first road in operation was built for the transportation of ice from a small lake to the sea in the state of Massachusetts. The length of this road was 4 m. In the same year, the state of S. Carolina caused to be commenced a railroad from Charleston, its principal port, to Augusta, in the state of Georgia. The distance is 135 m., and the road was completed in 1833, at the remarkably small cost of about £37,000. The longest continuous line in the country, and that in the building of which the greatest natural obstacles have been overcome, is that which extends from the Hudson river, through the southern counties of New York, to Lake Erie. Its length is 449 m., and its branches are in the aggregate about 68 m. The aggregate cost of this important road was about £4,716,000, or about £25,666 per mile. Grading operations were commenced in 1833, and it was completed in May 1851. The state of New York advanced £1,500,000 towards the work, and afterwards released the company from obligation to pay the loan. In the infancy of the American railroad system, and for ten years thereafter, it was the rule to extend to every important enterprise of the kind the assistance of the state through which the road was to pass. In 1850, congress passed an act, after a protracted discussion, granting to the state of Illinois about 2,700,000 acres of public lands to aid in the construction of the central railroad above mentioned; but the precedent is not likely to be followed.—The following table presents, in a convenient form, some of the principal facts connected with railroads in the U. S., drawn from official sources in May 1852:—
